

Jagged 1051

Chapter 1051

The United States has aggressively expanded its armaments, which seems to be a signal to other countries. Other countries have also begun to expand their armaments one after another. For a time, the international situation became extremely tense.

Moscow, the Kremlin, Joseph is summoning People's Commissar of Defense Voroshilov and People's Commissar of Foreign Affairs Litvinov.

"Comrade Joseph, according to the report of the U.S. representative office, the U.S. government has begun to borrow heavily to expand its armaments. A large number of orders from the government and the military have revived many factories that were on the verge of bankruptcy. The U.S. industry has once again started a rapid development. Development. It is expected that they will come out of the economic crisis soon." Litvinov said.

"Americans have to invest a lot of money to do this, right? Can they, who have been hit hard by the economic crisis, still get that much money?" Joseph asked. He is not a fool. Americans must be willing to invest if they want to use the expansion of armaments to stimulate economic development. If you invest less, it will be of no use at all.

"Yes, Comrade Joseph. The Americans have invested a lot this time. It can be said that they have already accumulated a lot of debt. If the US government is regarded as a company, they are already insolvent and can declare bankruptcy." Li Vinov said.

"Aren't Americans worried that their financial pressure will be unbearable and they will collapse directly?" Voroshilov asked.

"The Americans are obviously preparing for war by doing this. If they can't hold on at that time, they will definitely try to detonate the war. Once the war breaks out, their domestic attention will be diverted. In this case, those Debt is not a problem at all." Joseph's face was very ugly.

"This means that war seems to break out soon. Comrade Joseph, once the war breaks out, it is very likely to trigger a world war. We must make preparations early!" Voroshilov said quickly.

Although the military strength of Bu Russia is also very strong now, they have the largest army in the world. However, Voroshilov and others know that the current combat effectiveness of the army is not determined by the number of people. No matter how many troops there are, once they are attacked by the German army, they may not be able to resist it.

Joseph nodded: "I will bring it up at the next Politburo meeting."

Soon, the Politburo meeting was held, and Joseph proposed to further enhance the military strength of Russia to deal with the increasingly complex international situation. However, unexpectedly, it was opposed by many Politburo members. Although, at the final vote, the Politburo members who supported Joseph still had a majority, allowing his proposal to be passed. But at the same time, it also sounded the alarm in Joseph's heart. He believes that there are still many people who oppose him

within the Politburo, and even in the whole of Russia. If those people are not found and eliminated, his rule will be threatened. Even, even his life will be threatened.

You must know that the political struggle in Russia is very cruel, and the losers often lose even the elimination. Joseph didn't want such a thing to happen to him.

"No, I will definitely get rid of those guys. They are all unstable factors. Once we go to war with Germany, if they cooperate with the Germans, then we will be finished!" Joseph thought secretly.

Joseph knew very well that during the period of cooperation between Bu Russia and Germany, the Germans took the opportunity to develop many spies within Bu Russia and planted many nails. Some even hold high positions in the government and military. Before, Joseph didn't want to anger Germany, so he kept forbearing. But now, since the Americans have started to expand their armaments first, Germany's attention will definitely be attracted by the Americans. Well, he just took this opportunity to clean up the interior. At that time, when a war breaks out with the Germans, he will be able to fully control the country and implement the orders thoroughly, with only his voice.

Next, Joseph talked to several Politburo members who supported him. At the next meeting of the Politburo, Yagoda was proposed to serve as the People's Commissar of Internal Affairs. The appointment, without opposition, was passed quickly.

That afternoon, Joseph summoned Yagoda.

"Comrade Yagoda, I have to tell you with great regret that our country seems to be very strong. However, there are many problems hidden in it. The biggest problem is that in our party, army and government, there are Opponents. They have colluded with foreign forces and intend to subvert our country. We must not let their conspiracy succeed, and we cannot let them threaten our country. Therefore, I propose you to be the People's Commissar of Internal Affairs. I hope you can find those people and wipe them out!" Joseph said.

"Yes, Comrade Joseph, I am determined to complete the task!" Yagoda promised.

Yagoda was originally Joseph's confidant, and he also knew that the reason why Joseph promoted him this time was to hope that he could be a dog and eliminate all Joseph's enemies. In this way, Joseph can feel at ease.

Of course, as Joseph's people, his powers were given to them by Joseph. If Joseph goes down, it won't end well for them either.

"Comrade Yagoda, do you really understand what I mean?" Joseph was a little worried.

"Comrade Joseph, please clarify." Yagoda said.

"In our party and army, many of Trotsky's accomplices are hidden. We must not let those people go!" Joseph said.

"Yes, Comrade Joseph, I understand!" Yagoda nodded.

Trotsky was Joseph's biggest opponent, and even when the two competed, Trotsky had a great advantage. If many Josephs used conspiracies and tricks, and Trotsky disdain to use the army, Joseph would have been crushed long ago. You know, the Russian army was created by Trotsky alone. This also

made Trotsky very influential in the army, and many people were related to him. Joseph was worried that in the middle of the war, those armies would be out of control. Therefore, he hopes to be able to pre-emptively deal with those people first. Only in that way can he truly feel at ease. No matter at any time, the army is an important cornerstone of a country. Only by mastering the army can one be able to master the power of the country.

Chapter 1052

On the afternoon of December 1, 1934, Kirov, a member of the Russian Politburo, was shot in the Smolny Palace in Leningrad and died on the spot.

You know, Kirov is one of the top leaders of Bu Russia. His assassination will cause great shock in the entire party and the whole country of Bu Russia.

"Check! Be sure to check it out! No matter who is involved in the murder of Comrade Kirov, you must not let it go, and you must make him pay the price!" Joseph was furious, but the Russian internal affairs people The committee immediately launched an investigation into Kirov's assassination.

"Yes, Comrade Joseph!" People's Commissar Yagoda replied loudly.

After Yagoda left, a smile appeared on Joseph's face. Obviously, the assassination of Kirov this time will become an opportunity for him to clean up those rebels. Taking this opportunity, the Internal Affairs Committee can make a big move.

On the day Kirov was assassinated, Joseph made amendments to the criminal law of Bu Russia without discussion and approval by the Politburo: First, all judicial organs should speed up the trial perpetrator of crime. Investigating terrorist cases shall not exceed ten days. Second, the Presidium of the Russian Central Executive Committee will not consider applications for pardon from such criminals. Once a judgment is rendered, it cannot be appealed and pardoned. Thirdly, the NKVD shall execute such criminals immediately after they have been sentenced to death.

It is precisely these amendments to the Criminal Law that allow the Russian Internal Affairs People's Committee to arrest and interrogate senior leaders of the party, government and military in Burusa without restraint. Then he tortured him with all means, and after being beaten into a trick, he was shot directly.

Under Joseph's instigation, the NKVD began large-scale arrests of those suspected of assassinating Kirov. Of course, this is just an excuse. Those who really have to deal with are those who oppose Joseph.

At the beginning, the NKVD arrested those people in the name of investigating Kirov's assassination. But soon, they started directly arresting those who defended the country. Of course, all of this is still just a crime they fabricated at will.

Moscow, a high-end residential area. Many of the people living here are senior leaders of Bu Russia.

After going through the most difficult time, even though the conditions across the country are still not very good, there are still many people who can't even eat enough. However, the leaders of Russia have been able to enjoy a better life. Joseph believes that if the leaders of Burus live well, they will have more energy to devote themselves to handling state affairs. Therefore, several high-end residential areas were established in Moscow and allocated to those senior leaders.

A series of more than a dozen trucks drove to the outside of the residential area, their lights illuminating the surrounding area brightly. The heavily armed soldiers jumped out of the truck. It can be seen from their armbands that these soldiers are all troops under the NKVD.

"Quick! Quick! Hold the main intersection, and don't allow the suspects to escape." An officer ordered loudly.

A tall, thin middle-aged man led a group of soldiers and walked straight into the residential area. The soldiers guarding the residential area did not dare to stop them at all. You must know that after Kirov was assassinated, the NKVD made arrests in Moscow and made a big splash. Almost everyone knows that the NKVD is not to be messed with.

This group of people went directly to a villa in the residential area. Here is Zinoviev's residence.

"Bump!"

There was a knock on the door of the room. When the people inside opened the door, they were stunned for a moment, as if they did not expect that there would be so many soldiers.

"Who are you looking for?" asked Zinoviev's wife.

No one paid attention to her, and the soldiers rushed in directly.

"Yagoda, what do you want to do?" Zinoviev, who was writing documents in the study, ran out immediately after hearing the movement, just in time to see these people. He knew the leader, Yagoda, the NKVD Commissar.

"Comrade Zinoviev, your crimes have been exposed, come with us!" Yagoda said triumphantly. This is the first time they have arrested a senior leader like a political commissar! Usually, these members of the Politburo always look aloof in front of him. Now, they were about to become prisoners, which gave him a very special feeling.

"What? What crime have I committed? Yagoda, you are arresting people indiscriminately! I want to respond to Comrade Joseph, and I want to appeal to the rostrum of the Central Executive Committee!" Zinoviev roared angrily.

"Hmph! Take it away!" Yagoda simply ignored Zinoviev's threat.

You know, Zinoviev is a member of the Politburo. Without someone's instruction, Yagoda would not dare to arrest people no matter how courageous he is! Therefore, all of this is basically the leader of the Kremlin.

Zinoviev was arrested, and many people in the residential area saw it, and they all looked shocked.

"My God! Comrade Zinoviev was also arrested, what should we do?"

"The NKVD can even arrest members of the Politburo. Are they going to cover the sky with one hand?"

On the second day after Zinoviev was arrested, another senior leader of Bu Russia, Kamenev, was also arrested.

Soon, the two were interrogated by the NKVD, and they were finally executed by shooting on charges of "selling themselves to foreign spy agencies" and "establishing a terrorist organization to assassinate Kirov and other senior leaders of Bu-Russia".

The reason why the two of them were shot was that one of the biggest reasons was that they were representatives of the new opposition and posed a threat to Joseph's rule.

This is just the beginning, and the actions of the NKVD soon spread to the whole of Russia. Hundreds of thousands of people were arrested by them for various crimes, and many were shot.

The arrests by the NKVD were not only carried out within the Burgundian Party and the Russian government, but even extended to the army. Marshal Tukhachevsky, chief of staff of the Russian army, was also arrested. You know, Marshal Tukhachevsky is an outstanding military strategist known as the Red Napoleon. He made a lot of contributions in the Russian Civil War and was deeply appreciated by Ulyanov.

It is precisely because of this that Marshal Tukhachevsky doesn't give Joseph much face. Therefore, Joseph naturally wanted to get rid of such disobedient people.

In addition, there are many people in the army who have relations with Trotsky. In order to fully control the army, Joseph must also execute them.

Chapter 1053

Time flies by, and it is 1936 in a blink of an eye.

The international situation has become increasingly tense, and a large-scale war seems to be breaking out soon.

Under the leadership of Roosevelt, the United States is aggressively expanding its armaments. A large number of orders from the government and the military have made the industry and economy of the United States prosper again, and the lives of the people have become much better. Everything seems to be better. It seems that the United States has come out of the economic crisis.

Of course, such prosperity is still nothing but false prosperity. Everything is based on huge orders from the government and the military. As a result, the U.S. government has owed a huge amount of foreign debt, and once the government cannot afford this debt. Then, it's time to crash. They seem to have gained nothing but a strong army and navy.

However, if their army can win the war, then everything will be fine. As victors, they can slaughter the defeated countries at will, and take a lot of wealth from them to make up for their own losses. In that case, the United States may still be able to cope with all problems.

However, if not only did not win the war, but failed. Then, the consequences may be very serious. At that time, whether the United States can continue to exist is still very difficult to say.

It's just that neither President Roosevelt nor ordinary Americans paid attention to those. They all firmly believe that in future wars, they will definitely win. Because their army is becoming stronger and stronger.

Bu Russia, the whole country is shrouded in the atmosphere of terror caused by the NKVD. A large number of senior leaders of the Bu Russia government and army were arrested and then shot casually, as if they were executing ordinary criminals Same.

Similarly, it was in such a terrifying atmosphere that Joseph's power was growing. Many leaders of Bu Russia know that if they want to survive, they have to rely on Joseph and hug his thigh tightly. Therefore, through the actions of the NKVD, Joseph gradually took control of all the power of Bu Russia, truly overriding everyone.

Under Joseph's request, Bu Russia's army is also preparing for war. A large number of tanks and aircraft were equipped to the troops. Although, Joseph knew that the combat effectiveness of the Russian army could hardly compete with the German army. However, he hoped to be able to withstand the German attack by increasing the number of troops. Attempts to rely on quantitative changes to cause qualitative changes.

Bu Russia has a population of more than 100 million. If they expand their army wildly, it will be enough to mobilize tens of millions of troops. This scale is already much larger than the German Army. What's more, Germany's enemy is not only Bu Russia, but several powerful countries. Once several powerful countries go to war with Germany at the same time, Germany's power will inevitably be dispersed. In that case, the German army that Bu Russia will face will be relatively much less. Therefore, Joseph believes that Bu Russia still has a good chance of winning in future wars.

Once Bu Russia defeats Germany and wins the war, they can take advantage of the trend to bring the entire European continent into their own rule and become a country that unifies the European continent. With the foundation and strength of the whole of Europe, there is no problem at all in conquering the whole world.

Joseph has begun to dream of the dream of planting red flags all over the world!

Germany, Berlin, Imperial Palace.

Qin Tian was looking through the documents sent by the Intelligence Bureau. The information collected from the intelligence agency shows that war is already brewing. The cloud of war has begun to gather. It is estimated that it will not be long before the war will break out.

"Roosevelt attempted to stimulate the domestic economy through the expansion of armaments. Obviously, this is a desperate attempt to put all the treasures in future wars. Is he really sure that their army will be able to defeat the German Empire in future wars and win Victory?" Qin Tian sneered. You know, over the years, the United States has been developing its military power, but Germany is also developing its military power!

It's just that, because no war broke out in these years, the German * army has never been visible, and the outside world doesn't even know how powerful the German * army is.

However, Qin Tian believes that the current German army, whether it is the army, navy, or air force, is definitely the most powerful in the world. If other countries want to confront Germany, they are just asking for humiliation.

"The purge of Bu Russia has intensified, which is a good thing for the empire!" Qin Tian put down the information in his hand, and a smile appeared on his face.

In this time and space, because of Germany's help, the Great Cleansing in Bu Russia lasted longer and affected a wider area. It can be said that the entire Bu Russia will suffer huge losses as a result. Especially in the Russian army, a large number of experienced commanders and fighters were shot. This is completely an act of self-destruction of the Great Wall. Once the war broke out, how would those inexperienced generals and officers command the troops to fight against the ferocious German army? Is it because of the slogans of those political workers?

Of course, this is undoubtedly what the German Empire wants to see. The more weakened the strength of the Russian army, the greater the possibility that the German army will defeat the Russian army in the future. In other words, the German army will suffer less losses in the war to defeat Bu Russia.

Although, through the Great Purge, Joseph further grasped the power of Bu Russia. But, that doesn't matter. The important thing is this time and space, Germany has become stronger. At the same time, Qin Tian is not the head of state, and he will not make the mistakes made by the head of state. This will give Germany a great advantage in the war against Russia. As long as you can fight steadily, defeat Bu Russia. Then, there will be no doubt about Germany's victory in future wars.

"Since everyone is unwilling to be lonely, they have begun to prepare for war. Then, of course, the empire cannot lose to them. From now on, the empire also needs to be prepared for war. They will not know until the war breaks out that Germany How far has the military power of the empire swollen to? They will be beaten all over the place by the empire!" Qin Tian said secretly.

"Come here, let me know that the imperial meeting will be held tomorrow!" Qin Tian ordered.

"Yes, Your Majesty." The secretary immediately went to make a phone call.

Qin Tian hopes to unify everyone's thoughts at the imperial meeting tomorrow. Let everyone start preparing for the war that will break out next.

Chapter 1054

Germany, Berlin, Imperial Palace, conference room, imperial meeting is being held.

Emperor Qin Tian sat in his seat. The military and political ministers of the empire sat on both sides of the long table. The expressions on everyone's faces are more serious, because they all know that this meeting is of great importance. It is related to a series of deployments of the empire in future wars.

The German Empire has been the hegemon of the world since it won the last world war. The identity and status of the overlord brought many benefits to the German Empire. Everyone knows that if the German Empire can also win this war, then the status of the hegemony can be maintained forever. However, if Germany fails in this world war, the consequences will be disastrous. I am afraid that the German Empire will not only lose its hegemony, but also be crazily suppressed by the enemy, and may even be destroyed. Such a price is undoubtedly unacceptable to the military and political ministers of the German Empire. Therefore, everyone naturally hopes that the German Empire can win the next war.

"Everyone, in the last world war, the empire paid a huge price to win the war, which also made the empire sit in the position of world hegemony for 20 years! During these 20 years, the empire has gained Great development. It can be said that the dividends of war have caused earth-shaking changes in the empire in the past two decades. But at the same time, those enemies of the empire do not want the

empire to sit on the throne of hegemony. Take away the throne of the empire. Therefore, in the next war, the empire must do its best to defeat all those enemies again. Only in this way can we maintain our supremacy. Even our country and the nation. No matter how high the price is, we must win the next war!" Qin Tian looked solemn.

Qin Tian knew very well that once Germany failed in the war, Germany would definitely suffer bad luck given the diabolical nature of the United States and Bu Russia. The Germans will also pay an extremely heavy price. The United States and Russia, which have been suppressed by Germany for 20 years, will not let Germany go easily. In order to avoid such a tragedy, Germany has only one way, and that is to do its best to win this war. As long as you win, then everything is not a problem.

"Yes, Your Majesty! The Empire will win!" The ministers replied one after another. They also know that this time the empire has no way out and must win. Otherwise, the empire will be completely finished.

"Prime Minister, Minister of Finance. Starting this year, 20 billion marks will be squeezed out from the fiscal revenue of the empire and the income from the colonies for war preparations. All kinds of war materials needed in the reserve war, including tanks, armored vehicles, Airplanes, trucks, artillery, etc.!" Qin Tian said. Qin Tian believed that the upcoming war would last longer and be more tragic than the last world war. Therefore, before the outbreak of war, it is necessary to make adequate preparations. Otherwise, it will not be easy for the empire to win future wars.

"Yes, Your Majesty!" Prime Minister Wahit and Chancellor of the Exchequer Earl Poole replied.

Although, 20 billion marks is not a small number. However, the German Empire is not out of reach. Last year, the fiscal revenue of the empire had exceeded 60 billion marks, and the income from the colonies had also increased to 20 billion marks. Of course, this is mainly because the international situation is becoming more and more tense, and Germany has also increased its exploitation of the colonies, so it was able to get so much money.

However, although there are many benefits, there are also many places to spend money. Therefore, after hastily withdrawing 20 billion marks, many government plans had to be stopped or postponed. After that, everyone will have a hard time. However, the purpose of this is to win the war. It is better to live a hard life now than to be defeated in the war.

"Marshal Manstein, once a war breaks out, how many troops can the army mobilize to fight?" Qin Tian asked.

Marshal von Falkenhain retired from the position of Minister of War and Chief of Staff more than ten years ago because of his old age. Marshal Ludendorff, who succeeded him, also retired two years ago. And Manstein, whom Qin Tian valued, was promoted to the rank of Field Marshal of the Imperial Army, serving as Minister of the Army and Chief of the General Staff.

Similarly, the Secretary of the Navy has also changed, and Marshal Reinhard Scheer also retired a few years ago because of his age. The current Secretary of the Navy is Admiral Raeder.

"Your Majesty, the current 12 armies of the Imperial Army, except for the two armies stationed overseas, can be fully staffed within a month. After mobilization, another 12 armies can be formed

within three months. One year After that, the Imperial Army can form another 12 armies!" Field Marshal Manstein replied.

The group armies that Marshal Manstein said would not be sent to other countries to expand their armies by catching some mobs to make up the numbers, but trained elite troops. Although the group armies mobilized later were not as elite as the first-line troops, they could still be regarded as world-class powerful troops. A total of thirty-six army groups, which will increase the total strength of the German Army to 7.2 million people!

If Germany still only has a population of more than 50 million, it is obviously impossible to mobilize that many troops. However, just after the end of the last world war, Qin Tian implemented family planning throughout the country. As of now, it is the twentieth year. The little guys who were born first have now grown up to be adults and can fight for the empire. In addition, the war will not break out now, it will have to wait two or three years. At that time, the empire will have more qualified soldiers. The farther back, as the baby boomers grew up, the German rescue had more soldiers. In this way, Germany in this time and space will not fall into the embarrassment of not having enough troops at the end of the war like the Germany of the head of state.

Qin Tian nodded in satisfaction. Under his request, the family planning policy of the German Empire was well promoted. Now, the national population has exceeded 120 million. And, a large part of them are teenagers under the age of twenty. This total population is only smaller than Bu Russia in the whole of Europe. Bu Russia is only more than 40 million more than Germany. This gap can be completely made up by the weapons and equipment and the combat effectiveness of the soldiers.

Chapter 1055

If the German Army expands to thirty-six armies with 7.2 million people, such a huge force should have no problem defeating Bu Russia. Although, Bu Russia's maximum mobilization capacity is about 12 million. However, the weapons and equipment of the two sides are too far apart, there is also a generational difference in combat concepts, and there is even a huge gap in the combat literacy of the soldiers.

Under such circumstances, the German army only needs to fight steadily and through two or three large-scale battles to wipe out the main force of the Russian army. Then, the German army can nibble away Bu Russia step by step.

Germany in this time and space is no different from Germany in another time and space. Whether it is national power or the international environment, Germany in this time and space is much better than Germany in the head of state. Germany, the Führer, lacks resources and cannot fight a long war. Therefore, they can only try their best to defeat the enemy and win the war in the shortest time. However, Qin Tian's Germany is different. Their population is not much less than Bu'e, which ensures that they will have sufficient soldiers. At the same time, the territorial area is much larger than that of the Marshal's Germany, and it also has the most extensive colony in the world. These have ensured that Germany has enough strength to carry on the war. Even if it drags on for a long time, Germany can continue to fight !

As long as Germany can defeat Bu Russia in the war, then Germany will have a great chance of winning. Next, Germany will be able to defeat other enemies with its strong sea and air strength.

"The two armies stationed overseas also need to be strengthened as soon as possible. Once we fight in Europe and Russia, the island country will definitely seize this opportunity and march to Southeast Asia and Australia!" Qin Tian said.

He knows the character of the islanders too well. With such an advantage, they will definitely take advantage of it. What's more, Germany and the island countries are now life and death enemies. Over the years, the islanders have tightened their belts to develop their military power, isn't it just to avenge Germany? This has almost become the common goal of the entire country and nation of the island nation. Therefore, once a war breaks out, it will inevitably be a large-scale battle.

"Your Majesty, in Nanyang and Australia, we have recruited locals to form some troops. Although the number is not large and the combat effectiveness is not very strong, it is barely usable. With their assistance, we rely on our two elite armies to resist. There should be no problem with the attack of the islanders!" Marshal Manstein said.

Qin Tian shook his head, he knew that Marshal Manstein and the others underestimated the islanders. Although the weapons and equipment of the islanders are not as good as the German army, their fighting will is very strong. When fighting, you are not afraid of death. Such a combat style often makes it impossible for the armies of other countries to confront it. Therefore, if the German army does not pay attention to this point in the battle with the army of the island country. At that time, I'm afraid it will be ugly to lose.

In addition, Qin Tian is not optimistic about the aboriginal troops in Nanyang and Australia. Although the weapons they are equipped with are all weapons eliminated by the German army, they are more advanced than those equipped by the island army. However, their will to fight is too bad, and their training is far inferior to that of the Japanese Army. Once on the battlefield, they will be easily defeated when they encounter the fierce and fearless attack style of the island army.

"Those colonial troops are simply unreliable. They are mostly used to maintain the law and order in the rear. If they are sent to the battlefield, they will be vulnerable. At that time, apart from holding back our troops, they will have no other role at all. ." Qin Tian said.

Marshal Manstein did not expect that Qin Tian would look down on the colonial army so much, but he knew that Qin Tian must have his basis for saying so. Originally, he also planned to take a temporary defensive position in Southeast Asia and Australia with the existing troops. Wait until the European battlefield is won, and then send reinforcements to the Far East. But now it seems that this does not seem to work!

"Your Majesty, if this is the case, after our second group army is formed, we can send two more group armies to Nanyang and Australia. In this case, we will have 800,000 people in Nanyang and Australia. If we take a defensive position, It is no problem to resist the attack of the islanders." Marshal Manstein said.

Qin Tian nodded, it is undoubtedly safer to do so. Of course, the islanders will launch an attack on Germany, and they will certainly not launch it at the beginning of the war. In that case, Germany still has enough time to dispatch troops to Southeast Asia and Australia.

"Marshal Raeder, where's the navy?" Qin Tian asked.

Like the army, the task of the navy in this battle is also very arduous. Because, after the outbreak of the war, the imperial navy will deal with the United States, Britain, and island countries at the same time, and wage fierce battles with powerful enemies in the Atlantic and Pacific Oceans at the same time. Although the imperial navy is very powerful, it is undoubtedly very difficult to deal with so many powerful countries at the same time.

"Your Majesty, the five major fleets of the Imperial Navy have all completed their battle preparations. So far, our five major fleets have equipped a total of 38 capital ships and 20 aircraft carriers. Such combat power is enough to crush other countries. Even if we are fighting in the Pacific Ocean and the Atlantic Ocean, we have great advantages. In addition, the construction of a new aircraft carrier of the Empire is about to start. Once it is completed and put into service, the Imperial Navy will have even greater strength." Lei Marshal Del said.

The capital ships of the German Navy are still those capital ships in the last war. Although, the earliest batch of warships have been in service for almost thirty years now, and they are already out-and-out old ships. However, after the refurbishment, the combat effectiveness is still very strong, at least 90% of the heyday can be guaranteed. Now that the aircraft carrier has become the main force, it is already very good that the capital ship can have such a combat power. After all, except for the cutting-edge battleships of the United States that are stronger than the battleships of Germany, the battleships of other countries cannot compete with the battleships of the German Navy.

As for aircraft carriers, the first two 'Pioneer-class' battleships in service with the German Navy have retired from active service and have become training ships. The main aircraft carriers currently in service are 12 "Constellation-class" aircraft carriers, four "Deutschland-class" aircraft carriers and four "William the Great-class" aircraft carriers.

Among them, 12 "Constellation-class" aircraft carriers, four each for the Home Fleet, the Pacific Fleet and the Atlantic Fleet, four "Deutschland-class" aircraft carriers for the Indian Ocean Fleet, and four "Wilhelm the Great-class" aircraft carriers for the Mediterranean Fleet .

Chapter 1056

"Marshal Kesselring, where is the Imperial Air Force?" Qin Tian asked.

The former Minister of the Air Force Zeckert retired with the rank of Marshal, and Albert Kesselring was promoted to Marshal of the Air Force, succeeding him as the Minister of Air Force of the Empire.

Because of Qin Tian's attention, the German Air Force has already developed into the most powerful air force in the world. Whether it is the number or performance of fighter jets, or the number and technology of pilots, other countries are far from being able to compare with Germany. In terms of the air force, Germany firmly occupies the number one position in the world.

"Your Majesty, the strength of the Imperial Air Force is number one in the world. Currently we have 3,000 fighter jets, 2,000 bombers, and more than 1,000 transport planes. We have 15,000 pilots. In addition, aviation clubs around the world, who know how to fly There are still many people. If we need to recruit pilots, we can expand the number of pilots to 30,000!" Marshal Albert Catherine said.

Under Qin Tian's request, the German Air Force has always attached great importance to the training of pilots. In addition to opening a special flight school to train pilots of the Imperial Air Force, it

also opened flying clubs in various places to teach civilians to fly. This makes the empire have many people who know how to fly. Those folks who know how to fly can become qualified air force pilots with a little more training. Perhaps, to become a fighter pilot requires talent. Still, flying a bomber is no problem.

The bombers equipped by the Luftwaffe are mainly divided into two-engine medium bombers and four-engine heavy bombers. The requirements to fly these bombers are much simpler than those of fighter jets. Even female pilots are capable of it.

Qin Tian nodded, he is not worried about the Imperial Air Force. Now, the main fighter of the Luftwaffe is the BF-109 fighter, but the more advanced FW-190 fighter has also begun test flights. It is expected that it will be able to mass-produce and equip troops starting next year. When the war breaks out, the FW-190 fighter will also become the main fighter of the Imperial Air Force. At that time, the Luftwaffe will have enough strength to sweep other enemy air forces and occupy the entire sky.

"Judging from the current situation, the war may break out in the next two to three years. Therefore, I hope that the army, navy and air force of the empire can prepare for war during this time. Once the war breaks out, the imperial army must fight Take the advantage in the middle, defeat our enemies in one fell swoop, and establish the eternal supremacy of the empire!" Qin Tian said.

"Yes, Your Majesty!" The military and political ministers of the empire said one after another. Everyone's eyes are full of confidence. They know that the future war may be very difficult, but they firmly believe that they must be the ones who will win in the end.

"Your Majesty, in addition to the strength of the Empire itself, the Empire also has other protectorate forces that can be used. For example, the Kingdom of Ukraine, the Kingdom of Poland, the Kingdom of Belarus, and the three Baltic countries, where His Majesty is also the king. In addition, the split from the Austro-Hungarian Empire Kingdom of Bohemia, Kingdom of Hungary, Kingdom of Dalmatia, Kingdom of Croatia-Slavonia, Kingdom of Bosnia-Herzegovina. And under imperial control the Republic of Finland, Kingdom of England and Wales, Republic of Ireland and Scotland The Kingdom, the Kingdom of Yugoslavia, etc. The Empire is responsible for ensuring their safety. Once a war breaks out, they should also fight with the Empire," said Imperial Prime Minister Wahit.

The German Empire now controls almost the whole of Europe except Bu Russia. Other countries, apart from being the protectorate of the empire, are countries that have a close relationship with the empire. The Empire is responsible for the security of these countries, but again, they are also in line with the Empire.

It's just that Qin Tian doesn't have much confidence in the combat effectiveness of the armies of these countries. He doesn't want the armies of those countries to be unable to do anything other than drag their feet when they go to the battlefield.

"Your Majesty, I know you are skeptical about the combat effectiveness of the armies of those countries. However, their combat effectiveness is certainly not strong, but if we wipe out the enemy's elite troops, they should be able to deal with the remaining mob. In this way, once they are put on the battlefield, the pressure on our troops can be greatly relieved. No matter how bad it is, we can also use the troops of these countries to protect the logistics supply line and attack those guerrillas." Minister of War Marshal Manstein Said.

Qin Tian nodded, it is true, even if the combat effectiveness of the armies of those countries is very bad, it is no different from waste snacks. But even waste has a role to play. Among other things, it is not a big problem to maintain the law and order in the rear, ensure the safety of the logistics supply line, and deal with guerrillas. Qin Tian knew that once the German army invaded the territory of Bu Russia, with Bu Russia's habit, they would definitely organize many guerrillas to make trouble for the German army in the rear. Qin Tian didn't want to use the precious soldiers of the German army to deal with those guerrillas. In this case, the troops of the protectorate became the best choice.

"Well, once the war breaks out, let the troops of the protectorate follow our command!" Qin Tian said.

"Your Majesty, we have drawn up a plan to allow those protectorates to mobilize enough troops when future wars break out. Therefore, there are regulations for each country. According to the population and economic conditions of each country, a minimum Amount." Marshal Manstein said immediately.

Qin Tian couldn't help laughing, it turned out that these guys had already prepared, they had already set their minds on those servant countries, and they were just waiting for Qin Tian to nod.

Qin Tian took the plan handed over by Manstein and read it carefully.

Among the protectorates of the empire, the ones most closely related to the empire are undoubtedly the countries where Qin Tian is the king, including the Kingdom of Ukraine, the Kingdom of Poland, the Kingdom of Belarus and the three Baltic countries.

These countries were originally under the slavery of Russia. However, in the last world war, Germany defeated Russia and rescued them from Russian slavery. After Qin Tian became the king of these countries, he began to promote the integration of these countries and Germany. Although, that will be a long project. However, after twenty years of hard work, great results have been achieved. If Germany goes to war with Russia, they will definitely stand on the side of the empire and do their best to help the empire defeat Russia. Therefore, the armies of these countries will be the first echelon trusted by the empire - the servant army.

Chapter 1057

In the plan of Marshal Manstein, the Ukrainian Kingdom has a population of 30 million, so after the war breaks out, up to 2 million troops can be mobilized to participate in the war. The first million people, the second million people.

The Kingdom of Poland also has a population of more than 30 million, so the maximum number of troops they can mobilize is also 2 million. At first one million troops were sent to assist the Germans in fighting, and if necessary, another million people were mobilized to fight.

The Kingdom of Belarus, because a small half is still in the hands of Bu Russia. In addition, their population was not large in the first place. After twenty years of development, there are only five million people now. In Marshal Manstein's plan, the Kingdom of Belarus would mobilize a total of 400,000 troops after the war broke out. At the beginning, 200,000 troops were dispatched to assist the German army, and if necessary, another 200,000 troops would be mobilized later.

The three Baltic countries, although they are three independent countries. However, their populations are not large. Adding up the three countries, there are only about six million people in total.

These three countries, according to their respective populations, will mobilize a total of half a million troops. In the early days of the war, 200,000 troops were dispatched to assist the German army in combat, and later, if necessary, another 300,000 troops were mobilized.

In addition to these countries, the states that originally formed the Austro-Hungarian Empire were also closely related to the empire. In other words, it is controlled by the empire at all. After all, the reason why they were able to become independent was inseparable from the support of the empire at the beginning. After independence, they also became the protectorate of the empire.

Among these countries, the Kingdom of Hungary is undoubtedly the strongest. The Hungarian Kingdom in this time and space is not another small second-rate country whose territory is occupied by other countries. You know, among the many states of the Austro-Hungarian Empire, the territory of the Kingdom of Hungary alone accounts for more than one-third. The current Kingdom of Hungary, after 20 years of steady development, has a population of more than 30 million, and it is definitely a big country in Europe as a whole.

So, in Manstein's plan, the Kingdom of Hungary also needs to mobilize two million troops in this war. At the beginning of the war, one million troops were needed to assist the German Empire in fighting.

The Kingdom of Bohemia is a major country among the former Austro-Hungarian states second only to the Kingdom of Hungary. Not only industrial development, but also a large population. The present Kingdom of Bohemia has a population of 15 million. In the plan of Marshal Manstein, the Kingdom of Bohemia will mobilize 1.2 million troops to participate in the war. At the beginning of the war, 600,000 troops will be dispatched to assist the German army in combat.

The Kingdom of Dalmatia, the Kingdom of Croatia-Slavonia, and the Kingdom of Bosnia-Herzegovina are relatively weak and have a small population. The combined population of the three countries is only 12 million. Therefore, in Marshal Manstein's plan, these three countries will mobilize one million people to participate in future wars. At the beginning of the war, 500,000 people were dispatched to assist the German army.

In addition to these countries, there are also those countries controlled by Germany. The Republic of Finland became independent from Russia with the help of Germany. The Kingdom of Yugoslavia was established on the basis of the Kingdom of Serbia. However, it was under the control of the Austro-Hungarian Empire before. After the Austro-Hungarian Empire was destroyed by Germany, they did not usher in real independence, but were controlled by Germany. In addition, the Kingdom of England and Wales, the Republic of Ireland and the Republic of Scotland were established on the mainland of the British Empire. Although these three countries are independent countries. However, they were all established with the help of Germany, and Germany still has troops stationed in the British Isles. This makes these three countries consistent with Germany.

The population of the Republic of Finland is not large, only about three million. However, the Finnish army fought bravely and skillfully. In Marshal Manstein's plan, the Republic of Finland will mobilize 200,000 troops to join the war, and initially 100,000 troops will be dispatched to assist the German army.

The territory of the Kingdom of Yugoslavia is not as large as another time and space. The population is only 10 million. In Marshal Manstein's plan, the Kingdom of Yugoslavia will mobilize 800,000 people to fight. In the initial stage, 400,000 troops will be dispatched to assist the German army.

The Republic of Ireland is better developed than another time and space. Because there was no division into Northern Ireland and Ireland, and no war broke out. Therefore, the current Republic of Ireland has a population of eight million. In Marshal Manstein's plan, the Republic of Ireland would mobilize 600,000 troops. At the beginning of the war, 300,000 troops will be dispatched to assist the Germans in their operations.

The Republic of Scotland now has a population of five million. Therefore, in Marshal Manstein's plan, they will mobilize 400,000 troops to fight. In the early stage, 200,000 troops will be dispatched to assist the German army in combat.

The Kingdom of England and Wales, the most populous. There are now a full 40 million people. However, King Arthur, who now rules the Kingdom of England and Wales, is very satisfied with his current life. He does not want his throne to be taken back by his nephew after Germany is defeated. Therefore, under his leadership, the Kingdom of England and Wales sided with the German Empire. In Marshal Manstein's plan, the Kingdom of England and Wales can mobilize up to three million troops. In the early days of the war, 1.5 million troops were needed to assist the Germans. Of course, the army of the British Isles will not be used on the plains of Eastern Europe, but to defend against the United States and Britain. And, when it is necessary to launch an attack on the American continent in the future, they will land on the American continent with the German army. Presumably, this is what King Arthur hopes most. As long as the British Empire has survived, the legitimacy of his throne has been questioned. Only when the British Empire is destroyed can his throne be maintained forever.

"Marshal Manstein, in your plan, all the protectorates will mobilize a total of 13.6 million troops in future wars. This is almost twice the amount of the Imperial Army after full mobilization. Even It is the initial stage of the war, and these protectorates will dispatch a total of 6.8 million people, which is a huge army larger than the Imperial Army. Can the Imperial Army command such a large army?" Qin Tian saw the final summary After the numbers, I couldn't help but be a little dumbfounded.

"Your Majesty, although there are many troops dispatched by these protectorate countries, there are not many troops that can be used on the front line of the war. Most of them serve as auxiliary tasks in the rear. What's more, after the outbreak of the war, we are attacking Bu Russia. At that time, on the front line of the Atlantic Ocean, we still need to retain enough troops to deter the United States and Britain. With the help of these protectorate troops, our pressure will be greatly reduced." Marshal Manstein said.

Chapter 1058

"Arming such a large army requires a lot of weapons and equipment. In addition, the consumption of war supplies will also be astonishing. These will double the price the empire pays in the war." Qin Tian Said with a frown.

Of course, the armies of these protecting countries can play a certain role on the battlefield. However, if this drags down the logistics of the German Empire, it will do more harm than good.

"Your Majesty, in terms of weapons and equipment, we will equip the armies of these protectorates with the weapons we replaced earlier. In addition, we will reduce the heavy weapons they equip and mainly satisfy light weapons. After all, they will rarely participate in the front line. In the combat of the troops, it is mainly used for the tasks behind the battlefield. In terms of supplies, since the protectorates have sent so many troops to participate in the war, they are naturally responsible for the logistics of the troops. Of course, those economic conditions are too. If the poor countries cannot complete it, the empire still needs to help them. The empire can promise them that after defeating those enemies, they have the right to share part of the war benefits. I think that in this case, all countries will actively participate. Marshal Manstein continued.

Qin Tian nodded. If Marshal Manstein's plan is followed, the empire will indeed only need to pay a small price to ensure that the empire will have enough troops on the future battlefield.

"Since this is the case, let's implement it according to your plan!" Qin Tian said.

"Yes, Your Majesty!" Marshal Manstein beamed with joy. Qin Tian agreed to their plan, which undoubtedly meant that they could use Qin Tian's name to request the cooperation of those protectorates. With Qin Tian's prestige, those protectorates would not dare to reject Germany's request. In this case, the possibility of the plan's success will increase a lot.

"Your Majesty, seeing Marshal Manstein forming so many troops in the protectorate of the empire, I suddenly had an idea." Imperial Foreign Minister Gustav Stresemann said.

"Oh? What do you think?" Qin Tian asked.

"Your Majesty, apart from the Empire, Russia, and the protectorate of the Empire, there are many countries in Europe. If they can be brought closer to the alliance of the Empire, then the strength of the Empire will also increase greatly. After all, now the empire is the most powerful country in the world. And Europe is the center of the world. If we can twist the power of the whole of Europe into one rope, this will allow the empire to win this war at the lowest cost!" said Gustav Stresemann.

Qin Tian couldn't help but nodded, although most of the remaining countries were small countries. However, if they are integrated, the strength is also not weak. For example, the Kingdom of Italy is a traditional power. Although it has declined, its foundation is still there. Especially after Mussolini became the Prime Minister of the Kingdom of Italy, he began to actively expand outward. It's just that the entire Mediterranean Sea and even the entire Africa are under the sphere of influence of Germany, and the Kingdom of Italy has no place to expand if it wants to expand.

The Republic of Turkey and the Kingdom of Spain can also be regarded as big countries. There are also the Kingdom of Romania, the Kingdom of Bulgaria, the Kingdom of Sweden, the Kingdom of Norway, the Kingdom of Denmark, the Kingdom of the Netherlands, the Republic of Portugal and the Kingdom of Greece. If these countries can be integrated and join the Allied Powers headed by the German Empire, then the power held by Germany will be greatly increased.

Even if the military power of these countries is not very strong, the combat power of the army is relatively poor. However, like the protectorates of Germany, even if they cannot participate in front-line operations, there is always no problem in performing rear missions. What's more, the enemies of Germany, their troops are not all elite troops. The standing army may be very powerful, and Germany's protectorate and allies are not opponents. However, as long as the German army has eliminated their

elite troops, the combat effectiveness of the remaining hastily mobilized troops is not very strong. The German protectorate and the armies of the allies will be able to resist. In this case, the German army will have a large surplus in terms of military strength. The losses in the war will not be too great.

"Your Majesty, this is a very good way. In that case, we will be able to integrate all the forces in Europe except Kaibu Russia. The army we can control will increase by one-third again. With so many troops, even if No matter how bad the fighting power is, even if you use people to pile them up, you can still defeat those enemies!" Marshal Manstein said excitedly.

Qin Tian knew that the sea of people tactic was Buer's specialty. In another time and space, didn't they just rely on their huge military strength to drag down Germany, the head of state? The advanced and powerful tiger and leopard tanks were overwhelmed by the cheap T-34 tanks using tank sea tactics.

In this time and space, if Germany can have an absolute advantage in terms of military strength, this will make Bu Russia have no advantage in this regard. Then, Germany's chances of winning will rise again. Sufficient troops will allow Germany to directly adopt aggressive tactics of multi-faceted attack instead of adopting conservative tactics. Bu Russia will be exhausted because of its inferior military strength. In this way, Germany will be able to defeat Bu Russia in the shortest possible time. Even when it is necessary to use troops against the Americas and island countries in the future, the troops of these countries can be sent there. In that case, the losses of the German army can be greatly reduced.

Especially the island countries, those island people are not afraid of death. Once the German army lands on the island country, it will inevitably encounter a crazy counterattack from the island people. In that case, the casualties of the German army will inevitably rise accordingly. If the troops of other countries are allowed to deal with those crazy islanders, then the losses of the German army will naturally be much less. Even if it will eventually lead to large-scale casualties among civilians in the island country, it has nothing to do with the German army.

"Since everyone thinks it is feasible, then, in the name of the empire, invite the leaders of those countries to Berlin. It is time for the Allied Powers to rebuild!" Qin Tian said.

During World War I, Germany and Austria-Hungary were undoubtedly the core forces of the Allied Powers. In addition, the Kingdom of Bulgaria was also a member of the Allied Powers. However, after the Austro-Hungarian Empire withdrew from the Allied Powers, the Allied Powers ceased to exist. Now, when the next world war is about to break out, Germany has stepped forward to rebuild the Allies, which is very helpful for strengthening Germany's power.

Chapter 1059

In May 1936, the German government officially issued a letter to the leaders of the Kingdom of Italy, the Republic of Turkey, the Kingdom of Spain, the Kingdom of Romania, the Kingdom of Bulgaria, France, the Kingdom of Sweden, the Kingdom of the Netherlands, the Kingdom of Norway, the Republic of Portugal, the Kingdom of Denmark, the Kingdom of Greece and the Principality of Luxembourg invited them to attend a conference in Berlin.

At the same time, the leaders of the German protectorate were also invited to Berlin. Even if the kings of some countries are succeeded by Qin Tian, their prime ministers still need to go to Berlin for a meeting.

As the international situation is becoming more and more responsible, and war seems to be on the verge of breaking out, Germany invited so many countries to Berlin for a meeting with such fanfare, which put a lot of pressure on other countries. Especially Germany's enemies are even more worried about Germany's further integration of the strength of these countries. If that's the case, Germany will be even harder to beat.

However, Germany is obviously powerful. If Germany wants to forcibly integrate those countries, they have nothing to do. If they stand up against it, Germany will only attack them first. Today's Germany is still extremely powerful in military strength. Other countries simply do not have the strength to confront Germany.

Countries such as the United States can only appeal to Germany, as the world hegemon, to find ways to ease the current tension instead of further intensifying the situation. It's just that the German government simply ignored the appeal of the Americans, which made the Americans angry and had no other choice. Who made Germany the world leader now?

After receiving the invitation from Germany, the kings, presidents and prime ministers of these countries set off for Germany one after another. Although, they don't know what Germany invited them for. However, since Germany has issued an invitation, they have no choice but to accept it, and they have no courage to refuse. Germany now dominates the world, especially in Europe, and no country dares to confront Germany. Even the powerful Bu Russia has maintained a friendly relationship with Germany over the years. At least, that's how it looks on the surface.

The date of the Berlin Conference was set on June 18, but the leaders of various countries arrived in Berlin ahead of schedule. Many people want to figure out in advance what Germany's purpose is this time. So, after they arrived in Berlin, they all showed their talents. However, only the top German officials know about the rebuilding of the Allied Powers, and those people have spent a lot of effort to find out.

The Embassy of the Kingdom of Italy in Germany, Italian King Vittorio Emanuele III and Prime Minister Mussolini are talking.

"Prime Minister, have you figured out what the Germans want to do?" Vittorio Emanuele III asked.

"Your Majesty, it's still unclear. However, I think the Germans have only one purpose, and that is to integrate the power of the whole of Europe. The current international situation is becoming more and more tense. Although Germany is the hegemon of the world, and in the These years have grown stronger and stronger. However, other opponents of Germany are not vegetarians. The United States, the United Kingdom, the island countries, and even Russia have become stronger and stronger. Germany wants to compete against these countries at the same time with its own power. country, it is still very difficult. Therefore, the Germans want to integrate our forces and help them fight against those countries." Mussolini said.

Although, Mussolini has no real materials and is very good at speculation. However, in grasping the direction of international relations, there are still two brushes. Otherwise, he wouldn't be in this position.

Qin Tian saw Mussolini's rise to power and did not stop him. However, he secretly sent someone to look for Corporal Adolf, but there was no such person. Therefore, Qin Tian also wanted to see how the performance of Mussolini in this time and space would be.

Vittorio Emanuele III couldn't help but frowned. In the last world war, Italy betrayed the Allies, so its spine was almost broken. Although the Austro-Hungarian Empire was destroyed by the German Empire, they took the opportunity to take back Venice. However, Sicily is still under German control so far. If Germany was defeated in a future war, they might be able to take Sicily back. If Germany wins, they will never have a chance to take Sicily back. Therefore, Vittorio Emanuele III was not willing to help the Germans fight. In his heart, Germany is still their enemy.

"Is there a way to reject the Germans?" King Vittorio Emanuele III asked.

"Your Majesty, this is probably very difficult. If we refuse, it will inevitably lead to the Germans being hostile to us. Even, in order to ensure their safety, they are very likely to get rid of us before the outbreak of the war. After all, with the strength of the Germans, it will be very easy to get rid of us." Mussolini said.

Vittorio Emanuele III's face suddenly turned dark and ugly.

"Your Majesty, this may be an opportunity for us. Since our last defeat, the development of our military power has been restricted. As Germany becomes stronger and stronger, we have never dared to cross the restrictions of the Germans. If we can redevelop the army, it is totally possible to help the Germans fight this war. Besides, we help the Germans fight the war. After winning the battle, they will always share some of our benefits. When the time comes, we will gain greater and more benefits than Sicily," Mussolini said.

Mussolini knew that Sicily had always been Vittorio Emanuele III's heart knot. But the Kingdom of Italy will have no future if this point is kept at bay. Germany is too strong, so strong that Italy can't fight it at all. Therefore, Mussolini can only think of other ways. It would undoubtedly be the best if the military could be redeveloped and the losses recovered from other places.

"Okay, Prime Minister, I will listen to you!" Vittorio Emanuele III nodded. He also knows that Germany is too powerful, and the Kingdom of Italy has no way to defy Germany's will, so they can only obey. In this case, there may be some benefits. If you continue to confront Germany, the end will be very tragic.

Although King Vittorio Emanuele III never forgot about Sicily, he did not want to become a subjugated king.

Chapter 1060

Actually, the intention of Germany to convene the leaders of European countries to Berlin for a meeting with such great fanfare is undoubtedly very obvious. Anyone with a little brain can guess the intention of the Germans.

But, even if you know, what can you do with it? After all, they dare not resist Germany, they can only obey. As Mussolini said, if any country dares to refuse, it will definitely be regarded as an unstable factor by Germany. In order to ensure that it can have a stable rear in future wars, Germany will

inevitably attack these countries before the start of the war. At that time, this may be a disaster for those countries.

Of course, some countries regard this meeting as an opportunity. An opportunity to further enhance the country's strength and status in the future international community.

The Republic of Turkey overthrew the rule of the Ottoman Sultan more than ten years ago and became a republic. Kemal Pasha, became the President of the Republic of Turkey. Although, in this time and space, Turkey did not join the Allied Powers in the last world war. However, their relationship with Germany is also very good. The revolution led by Kemal was also supported by Germany. Otherwise, based on the relationship between Germany and the Ottoman Empire, as long as the Sudan asked Germany for help and Germany sent troops to suppress the revolution, they would not be able to persist. It is precisely because of this that after Kemal became the president of the Republic of Turkey, he still firmly stood on the side of Germany.

In the embassy of the Republic of Turkey in Germany, President Kemal and Foreign Minister Fatih are also talking. Fatih was also an old man during the Ottoman Empire, but during Kemal's revolution, he stood firmly on Kemal's side. Therefore, after the success of the revolution, he still held a high position in the government of the Republic.

"The Kaiser called the leaders of European countries to gather in Berlin this time, and his purpose of integrating the whole of Europe has been revealed. This also shows that the war is about to break out! We missed the last war. This time, How should we choose?" Camille said.

"Your Excellency, Germany is too powerful. Twenty years ago, they defeated Britain, France, Russia and other powerful countries and became the hegemony of the world. And they have repeatedly caused heavy losses to the United States. Today, twenty years later, Germany is undoubtedly stronger. Of course, Germany's other enemy countries have also become very powerful. However, if they want to confront Germany, it will undoubtedly be very difficult. I am still very optimistic about Germany, and I think they will definitely win the war in the future!" Fati He said.

Kemal nodded: "I also think that Germany will win the war. Kaiser Wilhelm III is a person who can perform miracles. In the last world war, Germany did not have much advantage. It even betrayed the Allies in Italy Under the circumstances, Germany was already at a disadvantage. However, under his leadership, Germany still won the victory. This time, how could Germany lose the war when it clearly had the upper hand? possible."

"Then, this time the Republic of Turkey should be on the side of Germany." Fatih said.

"Yes, not only that, we also need to let Germany see our strength. Only in this way can we gain a more important position in the future international situation!" Kemal said.

"The Persian Gulf region in the Middle East has become Germany's most important source of energy. Most of the oil consumed in Europe is extracted from there. However, it is too close to Bu Russia. If Bu Russia launches an attack on the Middle East If we attack, it will be a great threat to Germany. And we, the Republic of Turkey, can undoubtedly support Germany in this direction. In that case, Germany will definitely respect us even more. In the future international community, we The status will be greatly improved!" Kemal said.

Fatih nodded again and again, if Germany wins this world war. Then, Germany's dominance of the world will become a foregone conclusion, and other countries simply do not have the strength to confront Germany. However, these countries that have good relations with Germany will inevitably benefit a lot from it. The world is too big, and it is impossible for Germany to take all the benefits. As the eldest brother, naturally he also needs to give the younger brother a little sweetness.

"The Republic of Turkey does not have the capital to become a hegemon. However, we can become an important assistant to the hegemon and become one of the important powers in the future!" Kemal said. This is undoubtedly his goal.

Also holding the same mind as the Republic of Turkey, there is also the Kingdom of Sweden. The Kingdom of Sweden was not what it is now. They are in Europe and can be regarded as the overlord of Northern Europe. He even fought wars with Russia many times, and Russia suffered unspeakably. However, after entering modern times, Sweden gradually declined. Russia defeated Sweden and snatched Finland from Sweden. Even Norway broke away from Sweden and chose independence. However, King Gustav V of Sweden was also an ambitious man. He didn't want Sweden to gradually sink like this. So he hopes that Sweden can become stronger.

This time, Germany's desire to integrate European power undoubtedly gave him an opportunity. If the Kingdom of Sweden can join in and show great strength in future wars, then their international status will be greatly improved. Even follow behind Germany's **** to get more benefits.

After all, if Germany wins in the future, then the future international community will be dominated by Germany. However, with a hero and three gangs, no matter how strong Germany is, it still needs the assistance of other countries. Gustav V hoped that Sweden could become an important ally of Germany so as to realize the revival of the Kingdom of Sweden.

Other countries have other ideas. Arthur, King of England and Wales, was undoubtedly one of them. Although Ireland and Scotland were lost, only half of the British Isles remained in England and Wales. But King Arthur was very satisfied with this. After all, England and Wales are the real heart of the British Empire. What he is worried about now is undoubtedly what if Germany loses in the war? In that case, wouldn't George V, who was hiding in Canada, return to the British Isles again? At that time, his throne will be lost. Therefore, King Arthur hopes to do his best to help the German Empire win the war. After all, that's helping themselves as well.
