

# Jagged 1061

## Chapter 1061

On June 18, the Berlin Conference was officially held. The location of the meeting is chosen in the meeting room of the cabinet. Although there are many countries attending this meeting, often only the heads of state and officials in charge of diplomacy participate, and other staff members have to wait outside the meeting room. Therefore, an ordinary meeting room can accommodate all the participants.

Emperor Qin Tian personally attended this meeting. When Qin Tian entered the conference room, the leaders of all the countries stood up to greet Qin Tian. Although some of them were much older than Qin Tian, they were very respectful in front of Qin Tian. After all, Qin Tian was the emperor of the most powerful country in the world, the German Empire. The strength of the country is much stronger than their country. In front of Qin Tian, they are not qualified to put on the airs of a king or a president.

"Hello everyone, sit down!" Qin Tian had a smile on his face, looking very amiable.

"Thank you, Your Majesty!" The kings and presidents said one after another.

Subsequently, Imperial Prime Minister Vahit chaired this meeting.

"Your Majesties, Your Majesty the President, you are welcome to come to the German Empire, come to Berlin, and attend this meeting. Our countries are all European countries, and we are all one family. In today's increasingly complicated international situation Under the circumstances, it is even more necessary to unite and tide over the difficulties together." Imperial Prime Minister Wahit said.

Wachter directly pointed out the theme of this meeting at the beginning of the meeting. The purpose is very clear, that is, to hope that European countries can unite to deal with the crisis. As for what kind of crisis it is, it goes without saying that it is undoubtedly the upcoming war. This is not beyond the expectations of the leaders of these countries.

Wacht spoke for half an hour before finishing. He elaborated on Germany's current strength in detail, and told everyone that even if a war breaks out in the future, Germany is capable of winning. If all countries join the German camp, then Germany will definitely lead everyone to victory.

After Wachter's speech, everyone almost understood Germany's intentions. As for what position they should take, they already knew it in their hearts.

At this time, Qin Tian stood up from his seat, glanced at everyone, and said, "Everyone, Europe has always been the center of the world since the age of great exploration. When we entered a civilized society, the Americas were still indigenous. The world. Although the Americas have developed and become stronger and stronger, Europe is still the center of the world, and the whole world is still under our control.

Now, the international situation is becoming more and more responsible. Several ambitious countries are frantically developing their military power, intending to challenge the hegemony of the German Empire and Europe's central position in the world. This is absolutely unacceptable to the German Empire and even all European countries. We hope that all European countries can stand

together with the empire to meet the challenges of those ambitious countries. I believe that all our countries united will be able to defeat those enemies.

I assure everyone that the German Empire will never treat its allies badly. After defeating those ambitious countries, all countries that helped the German Empire will gain sufficient benefits. "

Of course, the leaders of many countries don't believe in Qin Tian's promise. The original Austro-Hungarian Empire was also an ally of the German Empire! However, Austria-Hungary does not seem to end well. After the end of the last world war, the Germans directly crossed the river and demolished the bridge, destroyed the Austro-Hungarian Empire, and directly annexed the most elite Austria. However, that was also the Austro-Hungarian Empire courting death. If it hadn't been for Emperor Karl I of Austria who wanted to provoke Germany and still withdrew from the Allies under Germany's stern warning, he would not have given Germany an excuse.

"This time, the German Empire hopes to re-establish the Allies, so that we can all unite under the banner of the Allies to meet future challenges and win the war! I believe that future victories must belong to us!" Qin Tian Said.

"Rebuilding the Allies? So that's what the Germans wanted."

"The Germans require everyone to join the Allies. This undoubtedly requires all countries to accept their leadership after the outbreak of war!"

The leaders of many countries began to talk about it. Some countries are eager to join the Allies. But there are also some countries that do not want to be involved in the war. After all, once a war breaks out, people will die. For many small countries with only one or two million people, their population is precious!

However, the leaders of these countries are very clear that now they have no other choice. Now that Germany has called them here, it is undoubtedly asking them to express their views.

"The Kingdom of Italy is willing to join the Allies led by the German Empire. Everyone knows that we were originally a member of the Allies. However, in the last World War, because of some short-sighted people, we made a shameless act of betraying our allies .I personally feel deeply regretful and angry about this. Now, the German Empire has given us another chance. I am willing to represent the Kingdom of Italy, join the Allies, obey the orders of the German Empire, and do everything possible to assist the German Empire and win the war. In future wars, defend the interests of the whole of Europe!" Italian Prime Minister Mussolini was the first to stand up and express his willingness to join the Allies.

Italian King Vittorio Emanuele III's complexion is a little unsightly. The short-sighted people in Mussolini's mouth obviously include him! However, at this moment, he obviously cannot object. Otherwise, his king might have come to an end.

The leaders of other countries all looked to Vittorio Emanuele III. There was a hint of a smile in their eyes, which made Vittorio Emanuele III feel ashamed and angry.

"The prime minister did this for the benefit of the Kingdom of Italy. For the benefit of the kingdom, what does it matter if he is ridiculed?" Vittorio Emanuele III thought. Thinking of this, he also made up his mind.

"Your Majesty, the Kingdom of Italy is sincerely willing to join the Allies this time. I swear in the name of God that we will never betray this time. If we betray again, the Kingdom of Italy will be destroyed!" Vittorio Emanuele III was simply shameless, and directly stated his position.

## Chapter 1062

Qin Tian glanced at Mussolini with great interest. He felt that this guy was really thick-skinned. However, for those who want to do great things, a thick skin is a must-have quality. If you don't even have a thick skin and can't let go of your figure, it is simply impossible to achieve great things.

Undoubtedly, the statements made by Mussolini and Vittorio Emanuele III on behalf of the Kingdom of Italy undoubtedly gave everyone a head start. At the same time, it also put a lot of pressure on other countries. After all, among these countries, Italy is one of the best in terms of population and national strength. Even they did not hesitate to express their willingness to join the German-led allies, so do other countries have anything to say?

"Very well, Your Majesty the King, Your Excellency the Prime Minister. I believe in the sincerity of the Kingdom of Italy. I also believe that you will not betray again this time. I assure you that as long as you can win future wars, the Kingdom of Italy will get what it deserves. In addition, the previous restrictions on the military power of the Kingdom of Italy will be officially abolished from now on!" Qin Tian said.

Although, Qin Tian knew that the combat effectiveness of the Italian army had never been strong, and they had always belonged to pig teammates. However, the matter of buying bones with thousands of dollars must still be done. Otherwise, how can other countries trust Germany? Germany is willing to readmit even the former betrayer of the Kingdom of Italy, let alone other countries.

Mussolini and Vittorio Emanuele III were delighted. After the end of the last world war, Italy had already recovered from the trauma of the war. The losses they suffered during the war have already been recovered. However, due to the original requirements of Germany, their military power has always been restricted. This also prevents the Kingdom of Italy from becoming a normal country. Now, Qin Tian personally promised to abolish the restrictions on the military power of the Kingdom of Italy, which undoubtedly broke the shackles for them!

"The Republic of Turkey is willing to join the Allies. We guarantee that if a war breaks out in the future, the army of the Republic of Turkey will unconditionally obey the command of the German Empire. We will do our best to assist the German Empire and win future wars!" President of the Republic of Turkey Kay Moore also expressed his opinion.

Although the Ottoman Turkish Empire no longer exists, the Turkish Republic has basically inherited the legacy of the Ottoman Turkish Empire. In Europe as a whole, Turkey's industrial country can be regarded as a powerful country. Of course, it is far from being able to compare with the Ottoman Turkish Empire that beat the \*\*\*\* out of the whole of Europe, and it is undoubtedly far behind. But even so, the Republic of Turkey cannot be underestimated.

Now, the Republic of Turkey has made a clear statement that it is willing to join the German-led Allied Powers, and at the same time is willing to obey the command of the German Empire unconditionally. Obviously, this is tantamount to completely treating himself as a subordinate of the German Empire, not an ally. This has also put a lot of pressure on other countries.

"Your Excellency, welcome to join the Allies!" Qin Tian said with a smile.

Immediately afterwards, King Arthur of the Kingdom of England and Wales also stood up: "The Kingdom of England and Wales is willing to join the Allies and fully obey the command of the German Empire. As long as Germany makes a request, the Kingdom of England and Wales will do its best to meet Germany's requirements !"

King Arthur's statement shocked the leaders of other countries even more. After all, Germany attacked the British Isles and destroyed the British Empire. The British Empire, which once dominated the world, no longer exists. It stands to reason that the British should hate Germany. However, King Arthur regarded Germany as his loyal boss.

Qin Tian smiled, of course he understood what King Arthur was thinking. Although the current British Empire no longer exists, it is obviously much better to be the king of England and Wales than to be an ordinary prince of the British Empire. Prince Arthur also did not want Germany to lose in future wars, in which case he would not be able to keep the throne. Therefore, he can only do his best to help Germany win the war. And this is exactly what Qin Tian hopes to see. The reason why King Arthur was chosen to be the king of the Kingdom of England and Wales was from this perspective.

Qin Tian nodded: "Welcome to the Kingdom of England and Wales, join the Allies!"

"Your Majesty the Emperor, the Kingdom of Sweden is willing to join the Allies and obey the orders of the German Empire!" King Gustav V also said.

Although the Kingdom of Sweden is now in decline, they used to be a traditional power in Europe! Now, even the Kingdom of Sweden has taken the initiative to express its willingness to join the Allies and obey the orders of the German Empire. This undoubtedly means that the general trend has come. Other countries, in the face of such a general trend, have no room to resist at all. Otherwise, they will be easily crushed to pieces.

"Welcome the Kingdom of Sweden to join the Allies!" Qin Tian smiled.

Qin Tian knew that now that these countries have expressed their willingness to join the Allies one after another, it is no longer possible for anyone to object. No one can stop the reconstruction of the Allies. Moreover, other countries have no choice. They had no choice but to join the Allies. Otherwise, they would have no way to survive in Europe.

It was under such circumstances that other European countries also expressed their willingness to join the Allies and obey Germany's orders. Such a result made Qin Tian very satisfied. Originally, he thought that there might be some twists and turns in this meeting. But I didn't expect it to go so smoothly.

Of course, this is undoubtedly of great benefit to Germany. At least, Germany no longer needs to use thunder to destroy some disobedient countries to deter other countries.

"Everyone is willing to join the Allies, which is very good, and I am very pleased. I believe that when we are all united, the whole world will tremble. Our strength will defeat any resistance. The world, will it's still from Europe!" Qin Tian said with satisfaction.

Next, Qin Tian left the meeting room. The following meeting will be chaired by Prime Minister Wahit.

Since all countries have joined the Allies, the power of all countries needs to be integrated. At the same time, the resources of all countries must be integrated to serve future wars. Only in this way can the whole of Europe be twisted into one rope and the greatest strength can be unleashed.

#### Chapter 1063

Countries agreed to join the Allies one after another, which undoubtedly paved the way for Germany to integrate the power of the entire Europe. Next, before the outbreak of the war, Germany will focus on integrating European countries, mobilizing all their strengths and kneading them into one. In this case, after the outbreak of future wars, the possibility of Germany winning will be greater.

On the second day after the meeting began, Marshal Manstein, the Imperial Army Minister and Chief of the General Staff, began to propose to the countries participating in the Allied Powers the mobilization of troops after the outbreak of the war.

The protectorate of the empire has been notified before. They already know it in their hearts, so they won't announce it at this meeting. Of course, as the protectorate of Germany, they have no right to object. Whatever Germany asks for, that's what it will be, there is no room for bargaining, and that may be the price you have to pay for putting the country's security behind Germany's protection!

"The Kingdom of Italy needs to mobilize 3 million troops after the outbreak of the war, and obey the deployment of the Allied General Staff. Among them, 1.5 million troops need to be mobilized within three months after the outbreak of the war!" Marshal Manstein said.

The Kingdom of Italy has a population of more than 40 million. For them, mobilizing 3 million troops is far from the limit. However, mobilizing so many troops and equipping them will undoubtedly cost a lot of money.

King Vittorio Emanuele III and Prime Minister Mussolini couldn't help but feel pain. However, when they declared their position to join the Allies, they spoke very beautifully. If they repent at this time, their reputation will be completely lost. What's more, Germany will not let them go again. Therefore, in the face of Germany's request, Mussolini had no choice but to pat his chest and promise that after the war broke out, the Kingdom of Italy would mobilize three million troops to obey the dispatch of the Allied General Staff.

"The Republic of Turkey, after the outbreak of the war, must mobilize 1.2 million troops to obey the dispatch of the General Staff of the Allied Powers! Among them, 600,000 people will be mobilized three months after the outbreak of the war." Marshal Manstein said.

The current Turkish Republic is not the original Ottoman Turkish Empire after all. After losing a large amount of territory, their population has shrunk to less than 20 million. But even so, mobilizing 1.2 million troops is not a big problem for them.

"Okay, no problem!" President Kemal replied very simply.

"The Kingdom of England and Wales, after the outbreak of the war, you need to mobilize three million troops to obey the dispatch of the Allied General Staff. One and a half million of them will be mobilized three months after the outbreak of the war!" Manstein The marshal continued.

The Kingdom of England and Wales inherited the most elite part of the British Empire and has the largest population, with a population of more than 40 million. They mobilized three million troops, and there was no problem at all.

"Yes, Your Excellency the Marshal!" Although King Arthur knew that this would cross off a large sum of money. But if it can help Germany destroy the British Empire, it will undoubtedly be very worthwhile.

The Kingdom of Spain has a population of more than 20 million, so in Manstein's plan, they need to mobilize 1.5 million troops. In this regard, neither the King of Spain nor the Prime Minister has any objections.

The Kingdom of Romania has a population of 18 million, and they will mobilize 1.2 million troops to fight.

France has a population of 16 million (a country established on the southern land of France, and the northern territory has been incorporated into Germany), and they will mobilize 1 million troops to fight.

The Kingdom of Bulgaria has a population of 6 million, and they will mobilize 400,000 troops to fight.

The Kingdom of Sweden has a population of more than 6 million, and they will also mobilize 400,000 troops to join the war.

Portugal, an industrial country with a population of more than seven million, will mobilize half a million troops to fight.

The Kingdom of the Netherlands has a population of more than 8 million, and they will mobilize 600,000 troops to fight.

The Kingdom of Greece has a population of more than seven million, and they will mobilize half a million troops to fight.

The Kingdom of Denmark has a population of 4 million, and they will mobilize 300,000 troops to fight.

The Kingdom of Norway has a population of 3 million, and they will mobilize 200,000 troops to fight.

The Principality of Luxembourg has a population of 300,000, and they will mobilize 20,000 troops to join the war.

No country disagrees with Germany on the number of troops they need to mobilize after the outbreak of war. Although, they all know that means they have to pay a lot of money. However, Germany seems to be apportioning tasks, they have no right to refuse or oppose at all! Once opposed, it might anger Germany again. The consequences of this will be very serious.

Even if you don't count the kingdoms of England and Wales that have been counted before, they belong to countries controlled by the empire, so in the plan of the General Staff, their army belongs to the second echelon.

After deducting the kingdoms of England and Wales, other countries promised to mobilize 10.82 million troops after the war broke out. Even if only half of the troops were mobilized within three months after the outbreak of the war, that would be 5.41 million. Including the 6.8 million troops that Germany's protectorate and controlled countries were able to mobilize at the beginning of the war, this has reached more than 12 million. If you add the German Empire's own army, then, in this war, the Allied Powers led by Germany have more than 30 million people in the army alone.

Such a huge army is enough to sweep away all enemies. Even if several of Germany's enemies unite, Germany is fully capable of confronting it. At least, Bu Russia on the European continent is absolutely unable to withstand so many Allied\* troops.

Of course, although the Allies were able to mobilize so many troops, these troops came from different countries and did not understand each other's languages. If they want to display their combat effectiveness on the battlefield, they need to conduct smooth command. Otherwise, once there is confusion in the command, not only will they not be a boost to the German army on the battlefield, but they will drag the German army down. Germany took great pains to form the Allies, and then forced the member states to mobilize so many troops, not to slow them down, but to really hope that they can share the pressure for the German army on the battlefield. Even if they can't fight against the enemy's first-line troops, as long as they can defeat those second- and third-line troops, or ensure the safety of the logistics supply line, that's enough.

In order to command these armies, the Allied Powers set up the Allied General Staff, which is responsible for coordinating and commanding these armies.

#### Chapter 1064

"Your Majesty, the meeting these days has gone very smoothly. Those member states not only agreed to our army mobilization plan, but also accepted our wartime resource allocation plan! In this way, once a future war breaks out, we can The power of the whole of Europe has been mobilized to fight against our enemies. Our chances of winning will be improved even more!" Imperial Prime Minister Wahit smiled.

Qin Tian nodded. This time, the plan to integrate the forces of various European countries was indeed going well. At least from the current point of view, all the plans of the empire are going smoothly. Those countries tried their best to cooperate with the requirements of the empire and did not object. This point even exceeded Qin Tian's expectation. After all, European countries are divided into many countries, and each country undoubtedly has its own thoughts. It will be very difficult to integrate their strengths. But now, Germany has easily achieved it.

"In this way, we will have a great chance of winning in the next war. It will be very easy to defeat Bu Russia with the power of the whole of Europe. After defeating Bu Russia, we will be able to fight across the Atlantic Ocean in one fell swoop. Go, destroy the United States and Britain. In the end, we will go on an expedition to the Far East and eliminate the island countries. At that time, all threats from the empire will be eliminated. The empire's hegemony will continue forever!" Qin Tian said with a smile on his face.

Of course, all of this is the most optimistic scenario. No one knows if there will be any accidents. But at least from the current situation, everything is still very smooth.

"Yes, Your Majesty." Vashite nodded.

"Marshal Manstein, although the General Staff of the Allied Powers has been established, your work is still very complicated. I hope that you can basically sort things out within two years. The armies of all countries must not only be mobilized, but also complete. Training. I don't want the troops provided by those countries to be old, weak, sick, or sent to the battlefield without proper training. In that case, it is impossible for them to provide us with help on the battlefield, and instead they will drag us down!" said Qin Tian.

"Yes, Your Majesty. We will specially send officers to those allies and protectorates to guide them in training the army." Marshal Manstein said.

"In addition to training the army, those officers and generals must also receive training. Only in this way can they be made to obey our command, so that there will be no incidents of obedience and injustice on the battlefield." Qin Tian reminded.

People are selfish, let alone those countries. Once a war breaks out, there will definitely be countries that want to preserve their strength. In that case, it will cause a lot of uncertainty on the battlefield. These problems could have been avoided if Germany had had a great deal of influence over the generals and officers of those armies.

Marshal Manstein nodded again and again, he knew that what Qin Tian said was very important.

"Your Majesty, due to limited financial resources, some countries may not be able to provide all the equipment for the army. In this regard, we may need to provide them with some support." Manstein said.

Qin Tian nodded: "The empire can provide them with some military equipment, but these military equipment need to cost money. If they don't have money, then they owe it for the time being. After they win the battle, they will pay for it. deducted from the income."

Qin Tian promised that after the allies defeated those enemies this time, the countries participating in the war would distribute the war dividends according to the amount of effort they contributed. Since Germany provided them with military equipment, the money should naturally be included in the investment.

"Yes, Your Majesty!" Marshal Manstein replied.

"Everyone, the meeting is not over yet. Everyone should seize this opportunity to communicate with the countries to ensure that we can truly control these countries this time and unite them around the empire!" Qin Tian said.

Although all countries have now joined the Allied Powers, Qin Tian knows that there must be some countries that are not sincere. They were just forced to join the Allied Powers because other countries had already joined them. Regarding this part of the country, Qin Tian didn't want to clean it up. Of course, the prerequisite is that they must be able to complete the tasks assigned by the empire and not

drag the empire down during the war. Otherwise, the empire doesn't mind getting rid of these unstable factors before the war breaks out, so that the empire can have a stable rear.

"Your Majesty, the success of this meeting is inseparable from the support of several big countries. Therefore, I think Your Majesty should personally summon the kings and prime ministers of these countries to show the importance that the empire attaches to them. As long as these big countries can abide by the covenant and strictly implement the orders issued by the empire, then other countries will not dare to resist." Foreign Minister Gustav Stresemann suggested.

Qin Tian nodded. As the emperor of the German Empire and the host of this meeting, he can be regarded as the leader of the Allied Powers. Well, it is entirely appropriate to meet the leaders of some countries. Not to mention, there were several countries that were so knowledgeable at the time of this meeting. Without their help, this meeting would not have been so smooth.

"Well, let me find some time to invite the kings and presidents of the Kingdom of Italy, the Republic of Turkey, the Kingdom of England and Wales, and the Kingdom of Sweden to dinner!" Qin Tian said.

These countries are all considered to be influential powers. Moreover, at this meeting, they also tried their best to cooperate with the German Empire. In terms of emotion and reason, Qin Tian should express his gratitude to them.

"Yes, Your Majesty." Gustav Stresemann nodded.

In the afternoon of that day, Qin Tian sent people to formally invite the kings and presidents of these countries. After receiving Qin Tian's invitation, the kings and presidents of these countries reacted differently. However, there is a feeling of being flattered. After all, Germany is now the hegemon of the world, and the German emperor is definitely the most powerful person in the world. It was undoubtedly their honor that Qin Tian invited them to have dinner together.

"Your Majesty, this time is undoubtedly an opportunity for the Kingdom of Italy. You must seize it. The Kingdom of Italy has missed too many opportunities. This time, we cannot miss it again." Mussolini looked solemn Said to King Vittorio Emanuele III.

Vittorio Emanuele III nodded, he knew what Mussolini meant.

## Chapter 1065

Imperial Emperor Qin Tian asked the kings and presidents of several countries to have dinner together, officially the small restaurant of the Imperial Palace. The area is small, but it is very warm and elegantly furnished. Even though Qin Tian is the emperor of the empire, he can also be regarded as the richest person in this country. However, he didn't like those resplendent and magnificent things, but the warm and elegant things made him more satisfied.

Several kings and presidents sat at the bottom of the long table. As for Qin Tian, he naturally took the main seat without hesitation.

"Your Majesty the King, Your Excellency the President, thank you for coming to the German Empire to participate in this Berlin Conference. Thank you also for joining the Allies and fighting for the interests of the whole of Europe!" Qin Tian raised his glass and said.

"Your Majesty, this is what we should do. Both Russia and the United States are ambitious. If they win, it will be a disaster for us. Therefore, we naturally hope that the German Empire can lead us to victory in future wars. For this, we will do our best!" King Vittorio Emanuele III said.

Now he has completely let go of his airs and dignity, and looks like a little brother from Germany. Although, before the last world war, the Kingdom of Italy was one of the three giants of the Allies, and the king of the Kingdom of Italy was also someone who could sit on an equal footing with the German emperor and the Austro-Hungarian emperor. But now, everything is already different.

"Yes, Your Majesty the Emperor. If Buer ruled Europe, we would all be executed just like Nicholas II. And those Americans are just a group of nouveau riche. Except for a few they have nothing but filthy money. We absolutely cannot let them rule Europe! As His Majesty said, the center of the world is Europe, and the whole world should be under our rule. For this reason, the Kingdom of Sweden is willing to fight to the end!" said King Gustav V of Sweden.

Qin Tian nodded with a smile. He knew that these guys were smart people, and they knew very well that the whole of Europe is now under the control of Germany. If they want to develop, they must have a relationship with Germany. Of course, they can also contact Bu Russia. However, Bue's treatment of nobles and capitalists frightened them, and they didn't want to die without knowing it. Therefore, Germany became their only choice.

The next dinner, everyone exchanged cups and cups, it can be said that the host and guest had a good time. During the dinner, Qin Tian also made a promise to them. The world is too big. Although Germany dominates the world, it is unrealistic to want to completely rule the entire world. Therefore, Germany also needs the help of allies. Together with Germany, they will share the power to rule the world.

Qin Tian's promise undoubtedly made the kings and presidents of these countries very satisfied. Isn't it because of this that they responded to Germany immediately after Germany proposed to rebuild the Allies? If Qin Tian can promise them, they don't have to worry about Qin Tian going back on his word. After all, with Qin Tian's identity and status, it would be too embarrassing if he repented.

After dinner, King Vittorio Emanuele III and King Gustaf V left first. But King Arthur and President Kemal stayed on.

"Your Majesty, will we land in America in the future and destroy the United States and Britain?" King Arthur asked.

Obviously, King Arthur is undoubtedly most concerned about this issue. He hopes that Germany can destroy Britain in the war, so that he can completely relax.

"Yes, Your Majesty, please rest assured about this. Whether it is the United States or the United Kingdom, they are the countries we want to destroy. However, they are far away in America. If we want to destroy them, there will be a big battle to fight. We for this, I'm afraid they will pay a heavy price," Qin Tian said.

"Your Majesty, the Kingdom of England and Wales will fully assist the German Empire! The three million troops we promised can definitely be mobilized. In addition, without the help of Germany, we will spend as much money as possible to equip the three million troops as well as possible." All these armies will be

handed over to the command of the German Empire. I only have one request, and that is to destroy Britain!" King Arthur said.

"Your Majesty, I can assure you that Britain will definitely be destroyed. No one can take your throne away!" Qin Tian said.

Qin Tian's guarantee made King Arthur breathe a sigh of relief, which was equivalent to taking a reassurance. He knew that Britain would surely perish, and his throne was finally preserved.

King Arthur left happily, and Qin Tian also had a smile on his face. It would be great if King Arthur's kingdom of England and Wales could do its best in the war against America. In that case, Germany will have more troops to devote to the American continent. In this case, the losses of the German army on the battlefield can be reduced.

"Your Excellency President, is there anything else?" Qin Tian asked when he saw that President Kemal hadn't left.

"Your Majesty, the Republic of Turkey cannot overthrow the brutal rule of the Sultan without the help of the German Empire. Therefore, in this war, we will do our best to assist Germany." President Kemal said.

"Your Excellency, thank you for your support. I believe that after the victory of this war, there will be a place for the Republic of Turkey among the major countries in the world!" Qin Tian promised.

President Kemal's face flashed a gleam of joy.

"Your Excellency, I have noticed that the Persian Gulf in the Middle East has become your country's most important oil producing area. If we want to fight against Bu Russia, we have to prevent Bu Russia from attacking the Persian Gulf. Once a war breaks out, Turkey will The army of the Republic will attack the Caucasus and assist the German Empire in protecting the Persian Gulf," President Kemal said.

Qin Tian nodded, "Thank you, President. With the help of the Turkish army, I believe that even if Bu Russia wants to attack the Persian Gulf, it will be powerless!"

Although Germany does not have too many troops stationed in the Persian Gulf, they have long been on guard against Bu Russia. Once the war breaks out, the German army will set off directly from Ukraine, attack Josephgrad, and then march to the Caucasus, cutting off the passage for the Russian army to enter the Persian Gulf. In this case, the Persian Gulf will be safe. Since the Turkish army can attack the Caucasus first, it will undoubtedly be safer.

## Chapter 1066

Germany convened many European countries to attend a meeting in Berlin to rebuild the Allies. Although, the specific alliance treaty is still kept strictly confidential. However, for several major countries, it is not a big deal to figure out all this.

Moscow, Kremlin, Joseph's office. Ye Ruofu, director of the State Security Bureau, is reporting the collected intelligence to him.

"Comrade Joseph, the Germans threatened other European countries to join the Allies at the Berlin Congress. Under the pressure of Germany, those countries have already expressed their views to join

the Allies. This makes the entire European countries, except us, have already joined. The Allies are gone. The Germans are trying to integrate their power!" Yezhov said.

"That is to say, if we break out of war with the Germans next time, it means that we are fighting against the whole of Europe?" Joseph frowned tightly with his pipe in his mouth.

"Yes, Comrade Joseph. However, there should be many countries that did not join the Allies in good faith. Therefore, once the war really starts, they should not make much effort." Ye Ruofu said.

Joseph nodded, but the Germans successfully rebuilt the Allies, which still made him feel tremendous pressure. There is no doubt that in the face of the huge allies, if war breaks out, then Bu Russia, which is also in Europe, will bear the brunt and become the target of attacks by Germany and the allies. Germany alone is too much for Bu Russia to bear. Not to mention that they are still integrating the power of the whole of Europe. In that case, it will undoubtedly be even more difficult to deal with.

"Is there anything else?" Joseph asked.

"The Germans also set up the General Staff of the Allied Powers, which stipulated for each member state how many troops they would need to mobilize once a war broke out. According to the information we have received, countries such as Ukraine, Italy, the Kingdom of England and Wales, and the Kingdom of Hungary, all It was required to mobilize at least 3 million troops to join the war after the outbreak of the war. If other member states are included, the entire Allied Powers must mobilize more than 20 million troops," Yezhov continued.

Joseph's face suddenly changed, 20 million troops, this is undoubtedly an extremely terrifying number. You know, among the 20 million troops, the German army is not included. The combat effectiveness of the German army is even stronger. Once a war breaks out, Bu Russia will undoubtedly bear unimaginable pressure.

Other high-ranking Russian officials and generals in the office also changed their faces drastically. They all know very well that Bu Russia can mobilize up to fifteen million troops. That is in the case of extreme mobilization. If so many people are really mobilized to fight, social functions will be greatly affected. But even so, they may not be able to resist Germany and the other allies commanded by Germany!

"It seems that this time the Germans are preparing to eradicate other major countries that threaten them in one fell swoop. Otherwise, they would not have worked hard to form the Allies." Joseph said.

"Comrade Joseph, we must be highly vigilant about this. The Germans have now begun to integrate the armies of the entire Allied countries. Once they succeed, we will be under tremendous pressure!" People's Commissar of National Defense Voroshilov Said.

"Is there a way to destroy their alliance, such as provoking those countries that are not willing to join the alliance." Molotov suggested. After all, once Germany has integrated the power of the whole of Europe, it will not be something they can deal with at all.

"You can try it, but the possibility of success is not too great." Ye Ruofu said. Whether some of the members of the Allied Powers are willing or not is just his guess. He didn't want to really implement the plan to sow discord. If the plan fails to succeed, wouldn't he be responsible for it?

"I think everyone is too worried. The only thing we have to worry about is the Germans from the beginning to the end. As for the other countries, there is no need to worry too much. What is the combat effectiveness of their army? We are brave The Bu Russian army will surely defeat them easily

! said Joseph.

As the great purge has come to an end, many high-level party, government and military officials in Bu Russia have been purged, and replaced by people who are all loyal to Joseph. This also makes the whole of Bue almost become Joseph's monopoly. From the change of Volgograd's name to Josephgrad, it can be seen that he has been deified in Bue and has become the same person as Ulyanov.

"Comrade Joseph is right. Although the enemy is strong, we are not weak. Our heroic army, under the leadership of the party, will definitely defeat them!" said Marshal Yegorov, Chief of the Russian General Staff.

While the industrialization of Russia continues to develop, the modernization of the Russian army is also unfolding. Marshal Yegorov even led the construction of the armored forces of the Russian Army and so on. Compared with more than a decade ago, the current Russian Army has also undergone radical changes. Of course, they all know that the combat effectiveness of the Russian army may not be comparable to that of the German army. But they all believe that the gap is definitely not as big as imagined. What's more, the Russian army still has an absolute advantage in terms of strength. Even if Germany's population is increasing rapidly, it cannot be compared with Bu Russia. Therefore, the Russian army has much more soldiers than the German army.

"Well, that's it. As long as we can defeat the Germans, then other countries are nothing to worry about. We have also prepared for this war for such a long time. I believe that comrades will not let I'm disappointed!" Joseph said.

"Yes, Comrade Joseph." Everyone replied loudly. Now these senior leaders of Bu Russia have regarded Joseph's decision as an imperial decree, and no one wants to disobey or dare to disobey. Otherwise, the NKVD will definitely come to trouble them. Once it is targeted by the NKVD, it will be dead. Now who doesn't know Buo, if you offend Comrade Joseph, then wait to be arrested by the NKVD and then kill him!

"Comrade Joseph, the Germans have rebuilt the Allies, which not only poses a threat to us, but also poses a threat to the United States. We may contact them and fight against the Germans together." People's Commissar for Foreign Affairs Chicherin suggested .

Joseph thought for a while, then nodded: "Try to get in touch with them!"

## Chapter 1067

Across the ocean, the U.S. government is also very concerned about the Berlin Congress held in Germany this time. As soon as the meeting was over, American spies figured everything out. Although, Germany's anti-espionage capabilities are very strong, and American spies can't take advantage of it. However, other countries do not have such strong anti-espionage capabilities.

When the intelligence department put Germany on the desk of President Roosevelt, after reading the information that Germany rebuilt the Allies and began to integrate the power of Europe, and stipulated

how many troops each member country needs to mobilize during the war, President Roosevelt looked at the information. His expression was very dignified.

"Europe's background is too deep. Even if we have developed for more than a hundred years, we are still far from catching up with them! As long as the Germans integrate more than half of Europe's power, we will not be able to fight against them!" Roosevelt sighed Take a breath.

"Come on, find all the cabinet ministers! In addition, the Chief of Staff of the Army, the Chief of Naval Operations, and Mr. Hopkins, all come." Roosevelt ordered.

Obviously, the matter this time was too difficult, and he had to consult extensively.

Soon, senior officials of the US government and military gathered in President Roosevelt's office.

"This is the information just obtained by the intelligence agencies, let's take a look first!" President Roosevelt said.

Senior officials began to pass through the intelligence, and the office became very quiet, only the sound of papers being turned over. However, when senior officials of the US government and military read the content of the intelligence, their faces changed drastically. Especially the Minister of War, the Chief of Army Staff, the Secretary of the Navy, and the Chief of Naval Operations all looked pale.

"Gentlemen, I think we are really in big\* trouble this time!" President Roosevelt said after everyone had read the information.

"Yes, Your Excellency, I completely agree with your point of view. We are in a lot of trouble this time. No one thought that the Germans would have such boldness and want to integrate the power of the entire Europe. Most importantly, now It seems that they are progressing very smoothly. Those countries have joined the German-led Allied Powers. And they have no objection to the huge number of army mobilizations proposed by the Germans. Obviously, they have agreed with the integration of the Germans. ," Secretary of State Hull said.

"Perhaps, they were just forced by the pressure of the Germans and dared not express themselves. In fact, they were not willing." War Secretary Woodling said.

"Maybe, but I have to admit that the Germans' European integration plan has initially succeeded. Once war breaks out, I think it will be difficult for us to defeat them. After all, the army alone can mobilize more than 30 million people. Moreover, this is far from the limit of the Allies. If they wish, they can further increase the number of troops." Finance Minister Morgenthau said.

"Gentlemen, since the Germans are already preparing for the next war, I think we must also take the necessary actions. Otherwise, we will have no chance of winning in future wars." President Roosevelt said.

"Your Excellency, we have been preparing for war since a few years ago. In order to expand our armaments, we have already accumulated a lot of debt. I have to remind you kindly, if we don't think about it, our annual financial income will probably be higher. Even bank interest can't be exchanged. At that time, our government may only go bankrupt." Morgenthau said.

At the beginning, in order to get the United States out of the economic crisis as soon as possible, President Roosevelt chose to expand the military to stimulate economic development. For this reason,

the U.S. government borrowed heavily from those large consortia and banks. Although, this certainly made the United States out of the economic crisis. But at the same time, it also made the United States owe a huge amount of foreign debt to the government.

President Roosevelt nodded, of course he knew this. However, he has already put all his hopes on the war that will break out in the future. If the United States can win future wars, then everything can be resolved. But if the United States fails miserably, then the United States will be finished directly.

Originally, President Roosevelt believed that although Germany was powerful, it would still be very difficult to counter the United States, Britain, Russia and the island countries at the same time. Therefore, their chances of winning are not too small. But now, the Germans have integrated most of Europe, which means that Germany's strength will increase dramatically. And their chances of winning will be greatly reduced.

"Your Excellency, apart from continuing to develop our own strength, I am afraid we have to think of other ways. Germany is not only our enemy, but also other enemies. Although, Britain has already secretly allied with us, the island country It is also in our support. However, we have no real alliance with the island country. Now that Germany is powerful, we must truly form an alliance with the island country. Only in this way can we hit the strength to deal with Germany. In addition, we We should also consider Bu Russia. Although Bu Russia's ideology is different from ours, they are still very powerful. War will inevitably break out between Bu Russia and Germany. Germany will not allow a powerful country to emerge In Europe. Therefore, we can also unite with Bu Russia. Once Bu Russia is attacked by the Germans, we must fully support them so that they can survive the German attack for a longer period of time. Use this to consume the strength of the Germans." Secretary of State Hull suggested.

"Yes, Your Excellency. At this stage, we must unite with other countries. Bu Russia is undoubtedly a very important ally. Now, with the help of the Germans, Bu Russia has developed a not weak industry .Although in many cutting-edge fields, it is still unable to compare with us. But the industrial output value is still very strong. Aircraft, tanks and cars, they can all produce and build their own. More importantly, they have a huge population. If Bu Russia With extreme mobilization, they can even mobilize 20 million troops. This will make them the main force against Germany," said War Secretary Woodling.

Many senior officials in the United States were originally hostile to Bu Russia. But now, Bu Russia has become an indispensable and important force for them to defeat Germany. This made them have no choice but to give up their hostility and turn to cooperate with Bu Russia, hoping to unite all forces against Germany and defeat Germany in future wars.

President Roosevelt nodded: "Let our people contact Bu Russia!"

## Chapter 1068

The re-establishment of the Allies is undoubtedly of great benefit to Germany. Next, the General Staff of the Allied Powers led by Germany began to send military officers to various countries to urge them to establish efficient mobilization systems and train their troops. In order to ensure the smooth supply of wartime logistics, Germany asked all member states of the Allied Powers to start changing their equipment and adopt German equipment. In this way, after the outbreak of future wars, it will not be easy to have logistical supply chaos, which can greatly improve the efficiency of logistical supplies.

Of course, the refitting of the armies of various member states has also brought a large number of orders to German arsenals. Even though many weapons are authorized to be produced by arsenals in other countries, the arsenals in Germany are still making a lot of money. This makes them more supportive of the empire. The Krupp factories, Rheinmetall and Mauser factories even declared that once a war breaks out, if the government fails to pay for the purchase of weapons and equipment in time, they can credit the weapons and equipment to the military. These three arsenals plus Qin Tian's own German arsenal almost monopolized the entire German arms market.

Qin Tian asked the General Staff to basically integrate the armed forces of the member states of the Allied Powers within two years. At the same time, let the troops of each member state basically have combat effectiveness, instead of becoming a drag on the German army as soon as they enter the battlefield.

Qin Tian handed over the internal affairs of the Allied countries to the people below. And he took advantage of the time when the war had not yet broken out, and began to inspect the army, sea and air forces of the empire. In order to be able to have an exact understanding of the combat effectiveness of the various units of the German army before the war broke out.

Now, the German Army has a total of 12 armies, including the two armored armies of the 8th and 9th. The other 10 armies also built motorized infantry armies. It can be said that the maneuverability of the German Army has been greatly enhanced as a result. Once the war breaks out, the mobility of the subsequent troops may not be comparable to that of the 12 standing armies, but Germany will try its best to equip these troops with trucks, armored vehicles and motorcycles to improve the mobility of these troops.

Of course, the mobility of the armies of other European countries is generally low, and many troops can be regarded as real infantry.

On the outskirts of Warsaw, the training ground of the 8th Army of the German Army. Qin Tian and the senior generals of the army arrived here. The 8th Army was the first armored army formed by the Imperial Army and consisted of two armored divisions, three mechanized infantry divisions and six motorized infantry divisions. There is also a heavy armor brigade, a heavy artillery brigade and other units directly under the army. The entire group army has 200,000 people, 1,600 tanks, a large number of armored vehicles and artillery. The march of the entire group army is transported by trucks, and its mobility is very powerful.

The 9th Army, formed from part of the 8th Army, is also an armored army. These two group armies can be regarded as Qin Tian's direct troops. Therefore, the equipment is also the best among all the German armies. The 8th Army is currently based in Warsaw and the 9th Army is based in Ukraine. Once the war with Bu Russia breaks out, these two armies will become two powerful fists, slamming at Bu Russia. Qin Tian believed that with the strength of the German army, it was completely achievable to severely damage Bu Russia at the beginning of the war. In particular, the railways and highways in the west of Russia, with the help of Germany, are well-constructed, which is very conducive to the actions of the German armored forces.

On the training ground, a team of tanks is moving at high speed, practicing rapid assault operations. The track of the tank crushed the ground, making a "creak, creak" sound, which made people feel toothache. The entire training ground was filled with dust.

The infantry positions and fortifications built on the training ground were easily broken through under the pressure of the tank's tracks.

"Boom! Boom! Boom!"

The tank guns of the tank fired, and the shells hit the targets on the ground accurately.

After the drill, Qin Tian was very satisfied with the performance of the armored troops. It is already very good that the armored forces of this era can demonstrate such strength. You know, the armored forces of the German Army are far ahead of other countries. Not only are the tanks equipped much more advanced than those of other countries, but the quality of the armored forces and the application concept of the armored forces are also at the forefront of the world.

Qin Tian stepped down from the stands, entered the training ground, and chatted with the armored soldiers amiably, asking them what opinions they had on the tanks they were currently equipped with.

The tanks currently equipped by the German Army are mainly "Leopard" medium tanks. The current mass-produced tank is already the 'Leopard 5'. Compared with the previous models, a great improvement has been made, not only the reliability has been greatly enhanced, but also the performance of all aspects has been greatly improved. It can be said that this tank is definitely the most powerful tank in the world today. Only the heavy tanks that Germany itself is preparing to equip its troops can defeat this type of tank.

The 'Leopard 5' tank, also known as the 'Black Panther' tank. Compared with the "Black Panther" tank in another time and space, the performance of the "Black Panther" tank equipped by the German army in this time and space has been greatly improved. First of all, the power has been enhanced, using the latest Maybach 1,000-horsepower engine, and the suspension has also been replaced with a torsion bar suspension, which is much better than the Christie suspension in another time and space. In addition, Germany, which has the most extensive colony in the world, does not lack resources such as rubber. Therefore, there is no need to use staggered road wheels like in another time and space. Although the staggered road wheels can ensure the performance of the tank, it is a nightmare for the repair and maintenance of the tank. Instead, there are five pairs of large road wheels, which are simpler and more reliable. Secondly, the firepower has also been improved. The 52-caliber long-barrel cannon, combined with the new armor-piercing projectile, is enough to penetrate all the armor of other tanks of this era. Again, the armor of the tank has also been greatly improved. The frontal armor of the turret is 100mm armor with an inclined angle, and the frontal armor is 80mm armor with an inclined angle of 32 degrees. The armor on both sides and the rear is 45mm rear with a 48-degree slope. On the front of the turret, there is also a 100mm thick bulletproof shield. Compared with another time and space, the armor capability has undoubtedly been greatly improved.

In addition, the "Black Panther" tank no longer has a driver's window, but a periscope instead, which greatly improves its defense capability.

Chapter 1069

"Your Majesty, the 'Black Panther' tank we are equipped with is very advanced in performance. According to the information we have received, tanks from other countries simply cannot compare with our 'Black Panther' tank. Our 'Black Panther' tank, At least five years ahead of them!" General Guderian, commander of the 8th Army, smiled.

As one of the commanders of the two armored armies of the Imperial Army, General Guderian is now full of ambition. He is very much looking forward to the upcoming war. Looking forward to leading the army of the German Empire and defeating powerful enemies. In that case, he would also be able to get the marshal's scepter he had dreamed of.

Manstein, who was a staff officer, was already one step ahead of them, becoming the Imperial Field Marshal, and serving as the Minister of War and Chief of Staff. This made General Guderian and General Rommel, commander of the 9th Army, very envious. You know, before the last world war, when Qin Tian was the commander of the 8th Army, he valued all three of them very much.

Qin Tian nodded, the performance of the 'Black Panther' tank is indeed very advanced. As a traveler, he is well aware of the flaws of the 'Black Panther' tank in another time and space. Therefore, he also personally participated in the design of this type of tank, found out all those defects, and made improvements. This has greatly improved the performance of the "Black Panther" tanks currently equipped by the German army.

Qin Tian knew that if war broke out, the 'Black Panther' tank would be the main tank of the German armored forces. At least, in the early or even mid-term of the war, the large number of "Black Panther" tanks will become the most powerful armored weapon for the German armored forces to crush other countries. As for more advanced tanks, due to production and cost reasons, they will not replace the 'Black Panther' tank as the main force in the armored forces in a short time.

'Black Panther' tank, weighing 38 tons, 8.66 meters long (with gun barrel), 3.22 meters wide and 2.68 meters high. It adopts a 1,000-horsepower Maybach gasoline engine, with a maximum speed of 60 kilometers per hour, a maximum travel distance of 250 kilometers without an auxiliary fuel tank, and a maximum travel distance of 500 kilometers with an auxiliary fuel tank. The tank gun is a 52-caliber 75mm tank gun equipped with capped armor-piercing projectiles, tungsten carbide core armor-piercing projectiles, hollow-charge high-explosive projectiles and tracer projectiles.

"How big is our 'Black Panther' tank production now?" Qin Tian asked.

"Your Majesty, the current monthly output of the 'Black Panther' tanks is 300. If war breaks out, this output can be quickly increased to 600! If necessary, it can even be increased to 900!" Chief of Staff Man Marshal Stein said.

Qin Tian nodded, the output is already not low. The "Black Panther" tank has only been mass-produced since last year. At present, only the 8th Army and the 9th Army are equipped. The other 10 armies are still equipped with the previously produced 'Leopard 4' tanks or even 'Leopard 3' or 'Leopard 2' tanks. The previous tanks still have a lot of immature performance and lack of reliability. Therefore, the output is not large. In the plan of the German Army, they will be replaced with "Black Panther" tanks one after another.

During the war, if the monthly production of 900 "Black Panther" tanks can be increased, it will be more than 10,000 in a year. This output seems to be very high. But the various losses of tanks during the war were also great. In addition to being destroyed by enemy tanks, it was more lost due to various mechanical failures. Therefore, it is necessary to have a large number of tanks to supplement the front line at any time, so as to maintain the powerful assault capability of the armored forces.

You know, in another time and space, the Russian T-34 tanks produced more than 80,000 tanks. If Germany wants to conquer other major powers in this time and space, it will definitely need more tanks. Therefore, in Qin Tian's view, even if the monthly production rate is increased to 900 'Black Panther' tanks, it is not enough.

"Let's find a way to further increase production. After the outbreak of the war, our 'Black Panther' tanks can be increased to 1,200 or even 1,500 vehicles per month. Follow-up more powerful tanks, if you want to in terms of mass production, the output needs to be further improved. Only in this way can our armored forces have enough tanks in the war." Qin Tian said.

"Yes, Your Majesty!" Marshal Manstein nodded. He knew that because of Qin Tian's order, the arsenal responsible for producing tanks had to expand again, install more production lines, and recruit more workers.

Qin Tian stayed in the Eighth Army for three days before leaving Warsaw and returning to Berlin.

The tank factory of the German Arsenal on the outskirts of Berlin is working overtime to produce the most advanced tanks of the German Army. The "Black Panther" tank is nothing more than a medium-sized tank, although its performance is very advanced, enough to beat any tank from other countries. However, the German Army still needs a more powerful tank in order to be able to deal with the powerful tanks of other countries with thick armor. For example, once the USSR is defeated on the battlefield, they will soon launch the KV series of heavy tanks. The KV tank with rough skin and thick flesh, the 75mm tank gun of the "Panther" tank will be quite difficult to deal with.

It was precisely to guard against this that the German Army developed a more powerful heavy tank at Qin Tian's request. Now mass-produced is the 'Tiger 3' tank. The previous 'Tiger 1' and 'Tiger 2' tanks are both experimental. Because of the immature technology, all aspects of the performance of the tank failed to achieve the expected results. Therefore, only a very small amount was produced for testing. It was not until the latest "Tiger 3" tank that its performance matured that mass production began.

The 'Tiger 3' tank, named the 'Tiger' tank, will be mainly used to equip the heavy tank brigades of the armored army, the heavy tank battalions of the armored forces of other armies, etc. The cost of the 'Tiger' tank is much higher than that of the 'Black Panther' tank. Therefore, mass production will not be carried out on a large scale at present, only small batch production will be used to equip the main forces. On the battlefield, they will also mainly assume the role of the sharp knife of the armored forces. Unless the performance of the enemy's tanks has been greatly improved and the "Black Panther" tanks are very difficult to deal with, the "Tiger" tanks will be mass-produced on a large scale and deployed in troops.

Of course, if that time really comes, the German Army should have developed a more powerful tank. For example, advanced tanks equipped with 105mm tank guns, or even main battle tanks equipped with 120mm smoothbore guns and armor-piercing shells with stabilized tail fins, etc.

## Chapter 1070

'Tiger' tank, weighing 48 tons, 8.45 meters long, 3.4 meters wide (3.56 meters wide when using combat tracks), and 2.66 meters high. Using a Maybach gasoline engine with 1,200 horsepower, the maximum speed is 50 kilometers per hour. The weapon is an 88mm 56-caliber tank gun and two 7.92mm machine guns. In terms of armor, the frontal armor of the turret is 120 mm at a 30-degree

bevel, and the frontal armor of the armor is 100 mm at a 35-degree bevel. The side and rear armor is 85 mm at a 60 degree bevel. In addition, the thickness of the gun mantlet is 150 mm.

The 'Tiger' tank is much stronger than the 'Black Panther' tank in terms of firepower and armor. Except that the speed is a little slower because of the heavier weight, the other performances are very strong. Compared with the "Tiger" tank in another time and space, the armor performance of the "Tiger" tank is also better. In addition, the armor adopts oblique armor in an all-round way. Under the same armor thickness, the bulletproof ability is ahead of the vertical armor.

Qin Tian stood in front of a 'Tiger' tank that had just left the factory and hadn't been painted yet, with a smile on his face. The pitch-black tank, shining with icy metal light, looks so mighty that people can't help but be in awe of it.

With his efforts, the German military production and R&D capabilities in this time and space are much ahead of the other time and space. This enabled the German army to begin to equip these advanced weapons in 1936. Once the war breaks out, the German army will definitely be able to catch the enemy by surprise with these advanced weapons. This will give Germany a great advantage in the war.

"Your Majesty, the performance of the 'Tiger' tank is much more advanced than that of the 'Black Panther' tank. However, the cost is also much more expensive. At present, we will produce a small amount and equip sharp-edged troops. I agree. When the time comes, we will These 'Tiger' tanks can be used to defeat the most powerful enemies and directly destroy their will to fight. Other enemies can be dealt with by the 'Black Panther' tanks!" said Admiral Guderian.

"Even if it is the 'Black Panther' tank, those enemies currently have no way to deal with it. Compared with the armored forces of the Empire, they are really far behind!" Admiral Rommel looked proud. He is proud that the empire can have the most advanced tanks and the most powerful armored troops in the world.

Qin Tian smiled, and said to his two beloved generals: "War is the best catalyst. After the outbreak of war, the technology of all countries, especially military technology, will develop rapidly. At that time, our opponents will also change. The 'Panther' tank will no doubt be in the limelight in the early days of the war and beat the \*\*\*\* out of those enemies. However, when their more advanced tanks enter service, the 'Panther' tank will look very It is difficult. Therefore, we need more powerful tanks. The 'Tiger' tank is only our first mass-produced heavy tank. There will be more advanced tanks in service later."

General Guderian, General Rommel and others nodded repeatedly. In terms of weapons and equipment, Germany has always been at the forefront of the world. In this aspect, these generals are impeccable.

"Generals, I am responsible for providing you with the most advanced and powerful weapons in the world. And you are responsible for using your ingenuity to win the war for me and the empire! I have done everything I can, I hope that you can also do everything you should do!" Qin Tian said with a smile. All of his efforts have only one goal, and that is to win the war. If you fail, all your efforts will be in vain.

"Yes, Your Majesty. We guarantee that we will be able to win!" Admiral Guderian looked determined.

Admiral Rommel also nodded solemnly, and he also firmly believed that future victories would definitely belong to them.

The next day, Qin Tian went to the General Staff Headquarters to attend a seminar on new tactics. Attending this meeting were not only generals of the army, but also generals of the air force. Because, the tactic to be discussed this time is exactly the blitzkrieg proposed by Qin Tian.

"Everyone, the empire now has the most powerful armored force in the world, the most powerful army and air force. Advanced weapons and equipment have brought about tremendous changes. At the same time, our tactics have also undergone tremendous changes. Twenty years later, the tactics used in the last world war are obviously impractical and outdated. Therefore, I hope that our army will not only be at the forefront of the world in terms of weapons and equipment, but also in terms of tactics, we can also be at the forefront of the world. In this way, we will have greater confidence in defeating those powerful enemies and winning the war in the future war!" Qin Tian said.

"Yes, Your Majesty!" All the generals replied.

"The focus of today's discussion is how to apply the armored force and the air force. I call this tactic blitzkrieg. That is, at the beginning of the war, the air force is deployed on a large scale to bomb the enemy's front-line airports and wipe out all the enemy's fighter planes. At the airport, so as to completely ensure the air supremacy of many front lines. After that, the army launched an attack. As the forward force of the army, the armored force used its powerful assault capability to tear apart the enemy's defense line, and then continuously penetrated the enemy's in-depth defense Encirclement divides the enemy's active forces to form encirclement circles one after another. The infantry closely follows the armored units. After the armored units complete the encirclement, they take over from the armored units and eliminate the enemies in the encircled area. The armored units can continue to launch assaults In this way, we can not only destroy the enemy's frontal defense, but also make it impossible for the enemy to organize a strong defense. Before the enemy's defense force was organized, it was bombed by the Imperial Air Force, and the armored forces Assault. In this way, we will defeat the enemy again and again. In this way, it will undoubtedly be easier for us to win the ability on the battlefield!" Qin Tian said.

The air force seizes air supremacy, and the armored forces quickly assault and divide and encircle. This is undoubtedly the essence of blitzkrieg. Although Qin Tian doesn't know much about specific tactics, he can put forward what he knows, and then let those professionals perfect and deduce it, and finally form a tactic that can really be applied to actual combat.

According to the idea proposed by Qin Tian, the generals began to brainstorm. At the same time, start deduction on the sand table. With the help of a large number of combat staff, the tactics of the blitzkrieg will soon take shape. It only needs to be tested on the battlefield after the outbreak of war.
