"Tsk tsk! The Americans are really willing to give all the capital ships to the British. It seems that they deliberately want the empire to pay a higher price in this war." Qin Tian said with a look on his face. smile, but those who are familiar with him can feel the killing intent emanating from his heart. The actions of the Americans behind the scenes have completely angered him.

If possible, Qin Tian would like to go to war with the United States immediately. But the prerequisite is that Germany must now have the strength to completely defeat the United States. Otherwise, if the battle is halfway through but there is not enough financial resources to continue the fight, the problem will be serious.

Now, although Germany's military strength has surpassed that of the United States. However, it is not so easy to defeat the United States across the Atlantic. The population of the United States is larger than that of Germany. Industrial output is also higher than Germany. This allows them to arm a considerable number of troops. Coupled with the advantages of local operations, the German army may be able to defeat the US military in the early stage. But as time goes by, the disadvantages of cross-sea operations will greatly restrict the German army's combat power. At that time, it may be difficult for the German army to win.

Once Germany attacks the United States and fails to win, it will have a huge impact on Germany. It may even cause social unrest. In that case, it would be more harmless for Germany to wage such a war.

Wars never break out for no reason. The reason why war broke out is because the contradictions between the two sides cannot be resolved and the interests cannot be satisfied. In that case, the only solution is through war. Usually, war is also the last resort, the last resort when there is no other solution.

"Your Majesty, the Americans have spared no effort to support the British. In the previous wars, they were frantically transfusing blood to the British. They hoped to help the British defeat the empire. Later, their goal was changed to borrowing the hands of the British. To weaken the strength of the empire. All this is for the interests of the Americans. They are afraid that after the empire defeats Britain and France, the next one will attack them. Therefore, they hope that in this war, as much as possible Make trouble for the empire. Even if the empire wins this war, it will be a miserable victory. In that case, the empire will not be able to trouble them for a long time." said the prime minister of the empire, Biluo.

This truth is very clear to the military and political ministers of the empire. But the problem is, now the empire has no way to deal with the Americans.

"Your Majesty, General Scheer has ordered the Breaking Fleet to stop going south. The High Seas Fleet has already rushed to the battlefield. It is expected to join the Breaking Fleet tomorrow morning. By then, we will have enough strength to crush the British. Even The Americans gave their active battleships to the British, and they are definitely not our opponents!" Marshal Earl Tirpitz said confidently.

Qin Tian nodded. He is very confident about the Imperial Navy. Although, the "Wilhelm the Great" aircraft carrier has not yet entered service. But with a fleet of battleships and battlecruisers, the German Navy is also capable of meeting all challenges.

"Send a telegram to the fleet and tell them that this time they must defeat the British and completely destroy their hopes. I want to see how they can persist after this failure! I don't believe they can come back from other places." Got so many warships." Qin Tian said.

In order to support the British, the Americans even gave the British the main battleships in active service. If these warships are dealt with by the German Navy, the British will be completely finished. At that time, they will no longer have other channels to get more battleships. At that time, the British Navy will be unable to continue to fight.

"Yes, Your Majesty!" Marshal Earl Tirpitz nodded.

Qin Tian's request undoubtedly completely destroyed the hope of the British. As long as the German fleet wins again this time, Britain will be completely finished.

At 4:00 am on May 17, the German Navy's High Seas Fleet and the Breaking Fleet converged in the waters northwest of the island of Ireland. At the same time, the battlecruisers 'Von der Tann' and 'Leopold' also returned to the team. This brought together all the main battleships of the German Navy, including 23 battleships and 11 battlecruisers. With so many capital ships, it is undoubtedly the most powerful fleet in the world.

General Reinhard Scheer, Lieutenant General Hipper and Lieutenant General Spee met and discussed the upcoming battle.

"There is no doubt that we were cheated by the Americans. They secretly gave the British 12 battleships, which gave the British the courage to fight us again. This time, the update deliberately came to trouble us and defeated us. We! His Majesty has given us an order to win this battle no matter what!" Admiral Reinhard Scheer said.

"Your Excellency, even if the British obtained 12 battleships from the Americans, they would only have 20 battleships after adding their own remaining battleships. Could it be that they thought that with these 20 battleships, they could Can you defeat us?" Lieutenant General Spei said with a dark face. His side lost a battlecruiser in this battle, which made him very uncomfortable.

"Perhaps, the British have other advantages! Therefore, we must be more cautious in this battle." Lieutenant General Hipper said.

"Tomorrow morning, send light cruisers, destroyers and seaplanes to search this sea area. Find the British, and then launch an attack. This time, we must win, and we cannot give the British any chance to come back !" Admiral Reinhard Scheer said.

Looking back, what the British did was indeed admirable, but at the same time a little lingering. After the main force of the British Navy was eliminated last time, the German Navy generally believed that the British Navy was no longer a concern. But who would have thought that in just two days, the British would once again have a powerful navy? If the German navy hadn't discovered the abnormal behavior of the British in advance and had prepared a way to deal with it, maybe the German navy would have suffered a big loss this time.

The same mistake, one occurrence is enough. If it reappears a second time, it will be fatal. In order to avoid such a crisis from happening again, the German navy had to completely wipe out the British navy in this battle!
