Qin Tian stayed in northern France for three days, and after finalizing his battle plan against Britain, he left France and returned to Berlin. At this time, the peace treaty between Austria-Hungary and Italy had been signed, and the Austro-Hungarian delegation had left Berlin.

"Your Majesty, the delegation of the Austro-Hungarian Empire has left. However, they are not very happy. Especially Crown Prince Karl, I am afraid that the dissatisfaction with the empire has reached the extreme." Imperial Foreign Minister von Kidren Wachter said.

"As early as when I was fighting against Russia, I already discovered that Crown Prince Karl had an inexplicable hostility towards me. Unexpectedly, he is still like that now. However, this is a good thing for the empire. If there is no Karl with a person like the crown prince, how can the empire find an excuse to attack the Austro-Hungarian Empire in the future?" Qin Tian said with a smile.

Qin Tian believes that after the death of Austrian Emperor Franz Joseph I and Karl inheriting the throne of the Austro-Hungarian Empire, the relationship between the two countries will inevitably deteriorate further. Even a conflict is not out of the question. At that time, the German Empire will have enough reasons to attack the Austro-Hungarian Empire.

"Yes, Your Majesty." Vashite nodded.

"Your Majesty, the empire's current war against England will start in three months. Except for the war against England, there is no war in other directions. In addition, we have obtained large tracts of land from Russia, France and the Kingdom of Italy. Territories and a large amount of war reparations. Therefore, the imperial cabinet believes that we can develop those newly acquired territories in the east." Prime Minister Bernhard von Bülow said.

In the treaty signed between Germany and Russia, Poland, the three Baltic countries and half of Belarus were ceded to Germany by Russia. Finland and Ukraine will also become independent with the support of Germany. In fact, Finland and Ukraine will also be under German control. This made the German border advance hundreds of kilometers to the east at once. If such a large territory is developed, it will bring Germany's national strength to a higher level. Among other things, Eastern Europe has always been the main grain-producing area in Europe. If Germany can obtain the grain in this area, then Germany will not only be self-sufficient in grain, but also have a large surplus. More importantly, this will be a great weakening for Russia. After losing a large piece of resource-rich and fertile land, Russia's strength will be severely damaged. The threat to Germany has also been greatly reduced.

"Well, it is indeed possible to develop the east. The war in Britain will not have much impact on the empire. Therefore, the development of the east at this time will not affect the war situation." Qin Tian said.

"By the way, is the Russian civil war over?" Qin Tian asked.

"Your Majesty, the Russian Civil War is almost coming to an end. The cloth party's army has wiped out the main force of the white army. Although the remaining white army is still lingering, it is no longer a threat to the cloth party." von Farr Marshal Kenhain said.

Due to the lack of support from the Allied Powers, the strength of the White Army has been greatly weakened compared to another time and space. The army controlled by the Russian cloth party has become stronger. Under the ebb and flow, it is understandable that the White Army was quickly wiped out by the cloth party.

"Since this is the case, then we have to speed up the development of the east. We must grow stronger in the cloth party, develop the east, and prepare for war. Otherwise, once the war breaks out, we will not be able to prevent it ." Qin Tian said.

Qin Tian knew very well that once the Bukit Party's five-year industrial plan was launched, they would achieve rapid development. At that time, this backward and poor country will develop into a powerful industrial country in a very short period of time. This time Germany has occupied so much territory in Russia, even those who are partisan are very dissatisfied with this. Once they have the chance, they will definitely go to war against Germany and take back those territories. Even, they will ambitiously launch an attack on the mainland of Germany to liberate Germany. It is precisely because of this that Qin will be extremely wary of the Budang Party and Russia. Sometimes, he even wondered whether it was right or wrong to support the Budap Party.

"Your Majesty, does the cloth party dare to tear up the treaty and attack us?" Prime Minister Bilo couldn't believe it.

Not only Prime Minister Bilo, but almost all other military and political ministers of the empire also held the same view. After all, in their eyes, the Empire is the most powerful country in the world. The Russian cloth party has just seized power in the country not long ago. If they dare to launch a war against Germany, Germany will definitely beat them to the ground.

"Everyone, don't underestimate Russia and the Russian Burundian Party. Otherwise, you will suffer losses in the future. I can guarantee that Russia in the future will become very powerful under the leadership of the Burundian Party. At that time, they will become an important threat to the empire. Therefore, if necessary, the empire must try its best to destroy them in the future!" Qin Tian said.

Since the Russian cloth party developed rapidly under his support. Then, Qin Tian thought he was obliged to destroy them. This is also to ensure the security of Germany. Once Russia defeats Germany, Qin Tian believes that with the ruthlessness of those guys, he will definitely die.

Qin Tian's words made everyone pay more attention to Russia and the Burundi Party. They knew that since Qin Tian said that, there must be his intentions. If this is the case, then the empire will have to find a way to deal with Russia and the Budapest in the future.

"Your Excellency Prime Minister, has the cabinet drawn up the Eastern Development Plan?" Qin Tian asked.

"Yes, Your Majesty. Although, there are still many guerrillas in the new territory in the east. They are all against the empire. Therefore, before the large-scale development of the east, the army must first eliminate these guerrillas. "' Prime Minister Bilo said.

"Chief of Staff, I will leave this matter to you! The newly formed troops of the empire can be dispatched to destroy those guerrillas. Since they have no chance to go to the battlefield, then, in order to improve

their combat effectiveness, use those guerrillas to train their hands , is also a very good choice." Qin Tian said.

"Yes, Your Majesty." Von Falkenhain replied.

The troops fighting against Britain are ready. The other troops can only watch. Especially the newly formed troops did not catch the troops on the battlefield. However, soldiers can only become stronger after seeing blood. Therefore, they can only deal with those guerrillas.
