

## Jagged 682

Joseph and his party got on the train, left Berlin with satisfaction, and returned to Moscow. Although he was not able to meet Qin Tian during this trip, he was very satisfied with the results achieved.

The German government fully accepted the trade request made by the Russian Burundi Party. However, half of the payment they demanded must be replaced by grain. The rest are replaced with wood and mineral resources.

Although Russia is also very short of food now, Joseph didn't think there was anything wrong with this request. After all, Germany has always been short of food, so it will naturally ask for as much food as possible. As for whether this will have any bad effects on Russia, Joseph doesn't care. Although he knew that such words might cause many people to starve to death, he didn't care about that much anymore. His task is to get Germany to agree to trade with Russia. Now, his task is complete. As for the others, he didn't think about it.

Joseph didn't know how crazy the cloth party would be in order to get more machinery and equipment. They arbitrarily snatched the last grain from farmers, regardless of their life or death. Even if those farmers were starved to death, they didn't care. In their view, as long as the country's industry can be developed again, what's the point of killing some lowly farmers?

"Your Majesty, the Russians actually agreed to our terms. Don't they know that many people will starve to death?" Prime Minister Biluo looked surprised.

"The leaders of the cloth party don't care about the life and death of ordinary Russians. Anyway, Russia's population is too large, and some of them will starve to death. When the empire fights with them in the future, they will face fewer Russian troops. Some. This is very beneficial to us!" Qin Tian said.

Of course Qin Tian knew how great a threat it would pose to Germany after the development of Russia's industry. If possible, he certainly hopes to block Russia, so that the Russian industry will never be able to recover and develop. In this case, it will be very easy for Germany to defeat Russia in the future. But Qin Tian knew that even if Germany did not sell machinery and equipment to Russia, they could still obtain those machinery and equipment from other places. For example, the United States on the other side of the ocean, they must be very happy to make Russia stronger again. In this case, Germany's energy will be firmly restrained on the European continent, and it will not pose the greatest threat to the United States.

So, instead of letting the Americans trade with the Russians, make a lot of profit from the Russians. Then this business might as well let Germany do it. It also enabled Germany to earn enough profits from it. What's more, they can also secretly calculate the Russians and make the Russians pay a higher price for it. In this case, it is in the best interest of Germany.

Prime Minister Biluo nodded, although it seems a bit too despicable to count the Russians like this. But, for the sake of the empire, what is it to be mean? As long as the empire can grow stronger, that's enough.

"By the way, let the Ministry of Foreign Affairs contact the Russians. We are very happy to help the Russians develop their industry and economy. In this regard, our two countries can have in-depth exchanges and cooperation!" Qin Tian continued.

"Your Majesty, is this to make Russia stronger?" Prime Minister Biluo felt that his head was not enough. Russia will definitely become an enemy of the empire in the future, and if Russia becomes stronger, it is clearly asking for trouble for itself! At that time, if it wants to defeat Russia, the empire will have to pay a greater price and let more boys die on the battlefield.

"Your Excellency Prime Minister, I know what you are worried about. Don't worry, I did this entirely to count the Russians. The traffic conditions in Russia are too bad. Once we want to destroy Russia, those muddy roads will become our worst enemy. Therefore, when we help the Russians develop their industry and economy, we also help the Russians to develop transportation. We help the Russians plan a large number of railways and roads. This can certainly make Russia develop faster and stronger. However, Once the war breaks out, those railways and highways will enable the empire's army to advance quickly, and if you are lucky, you can even fight all the way to Moscow." Qin Tian continued.

Prime Minister Bi Luo opened his mouth wide, as if he couldn't believe it. After all, this is too exaggerated. The Russians are not fools, how could they agree? But he also knew that this would be very beneficial to the empire. Once this plan of the empire is really realized, the empire may be able to completely defeat Russia and destroy them.

"Your Majesty, I will let the Ministry of Foreign Affairs do its best to handle this matter. I hope the Russians will agree to cooperate with us!" Prime Minister Biluo said.

Qin Tian nodded.

After Bi Luo left, Qin Tian also thought about whether this plan would be successful.

The reason why Napoleon failed to attack Russia was not so much lost to the Russians as it was lost to the cold winter and poor logistical supplies. Russia's territory is too vast, which makes them have a jaw-dropping depth. Coupled with poor transportation facilities, this will drive all the troops attacking Russia crazy by logistics.

Isn't it the same for the German army in another time and space? The head of state's millions of troops attacked Russia and achieved great success in the early stage, eliminating a large number of Russian forces. However, Russia's poor transportation and huge depth made it impossible to fill in after millions of troops were filled in. In the end, the Russians not only held the capital, but also began to counterattack with a huge force, causing the German army to fail.

Qin Tian became the emperor of the empire, he knew that sooner or later there would be a war between the empire and the Russians. The Russian cloth party wants to liberate the world, and Germany, the world hegemon and the boss of the capitalist world, has become the target they must defeat. And Qin Tian is not willing to allow a country that can threaten Germany's security to exist in Germany. Therefore, he hopes to defeat Russia in one fell swoop in the war. If you do this, Germany's position will be strengthened and the threat will be eliminated.

"I hope God blesses the Russians to agree to vigorously develop transportation! At that time, the powerful German armored forces will be able to kill Moscow and other major Russian cities along the roads and railways. Then, this battle will be good I have played a lot!" Qin Tian murmured.
