"The island people have been beaten to the ground for the time being. Although there will definitely be a decisive battle with the island people in the future. But at least the island people will be more honest in a short time." Qin Tian stood in the office, looking at the wall hanging world map.

Now his favorite thing to do is to read the map. The map is changing almost daily, as Germany's sphere of influence is constantly growing.

The island country was defeated this time, and all those colonies of Germany in the Pacific Ocean can be taken back. Although, those colonies are relatively barren islands. But location is very important. After controlling those islands, Germany can use these islands to drive countless nails in the Pacific Ocean. Coupled with the future air force or naval aviation, it is enough to build a line of defense in the Pacific Ocean. Not only can it be used against islanders, but it can also be used against Americans.

"Not only did the islanders not occupy Southeast Asia this time, but they also suffered heavy losses. However, they will not let it go. The defeat of the islands this time has aroused hatred in their hearts. Next, the islanders will definitely start to try their best. Next time, I'm afraid we will have to face a more powerful island nation!" Qin Tian said to himself.

Qin Tian is definitely more proficient in understanding the island people than anyone else. It is precisely because of this that he concluded that the islanders must have regarded Germany as an endless enemy. In the future, the two countries will inevitably have a war. Coupled with the fact that the Americans have begun to spare no effort to support the island country, this will quickly restore the strength of the island country. At that time, Germany will have to face a powerful island country. It will be more difficult to defeat them.

However, Qin Tian believes that Germany will still win in the end. With Qin Tian, who is similar to a cheating device, as long as Germany does not make detours, their strength will become stronger and stronger. With the continuous development of science and technology, weapons are also innovating. This will make Germany's military strength more and more powerful. The long distance will become less and less an obstacle to the German army's military power. At that time, it will not be too difficult for Germany to defeat the island country, or even destroy the island country.

"The islanders don't have to think about it for the time being! Even if they want to try their luck, they will have to wait for a while before they can recover their strength! At this stage, the British are still the ones to solve. If the British are not eliminated, this world war will not end. ." Qin Tian said. He still has many plans to start, but the prerequisite is to end the war. Therefore, defeating the United Kingdom and completely ending the current war has become the top priority.

But although the British are trapped in the British Isles, they want to defeat them. It's not that easy. It is definitely the first time for the German Empire to launch an attack on the British mainland across the strait, even though the German Empire has the most powerful navy, the most powerful army, and the most powerful air power in the world. However, the tens of kilometers wide strait still constituted a certain obstacle to their actions.

If there were no barriers from the strait, with Germany's military power, Britain would have perished long ago, and there would be no need for such trouble.

It is precisely because of the barrier of the strait that the British unscrupulously act as Europe's **** stick. They don't have to be afraid of attacks from other countries at all. As long as they have a powerful navy to guard the strait, their homeland is undoubtedly safe. In the past hundreds of years, the British have also done that. But unfortunately, now their method does not work. The navy they were proud of was almost completely wiped out by the German navy. Immediately afterwards, the world's number one German Army was about to launch an attack on their homeland. Under such circumstances, it is almost impossible for the British to persist in this war.

"The British now still want to continue to fight. Perhaps it's because they can't let go of the glory of the British Empire!" Qin Tian said with a smile.

Qin Tian knew very well that the British, who had been the hegemon of the world for hundreds of years, were undoubtedly very proud. They hold their heads high, even if the huge fleet they are proud of is wiped out, they still refuse to lower their noble heads.

The former British Empire was not very good before its rise. In order to compete with Spain for maritime supremacy, they exhausted all means, and even let warships pretend to be pirates to openly rob Spanish ships.

Of course, in those days. Almost all countries do that. But the British are obviously a little more shameless. Therefore, they defeated the Kingdom of Spain and replaced Spain as the new maritime overlord. During the period, he defeated several countries and successfully defended his dominance.

"No matter what, Britain can no longer continue to exist. After defeating Britain, not only will all the British colonies be robbed. At the same time, the British mainland also needs to be split into several countries. In this case, the empire in the Atlantic Ocean will Only the coast can be regarded as truly free of worries!" Qin Tian said.

The reason why the British Empire dominates the world is that its vast and rich colonies are undoubtedly the most important pillar. Without funding from these colonies, Britain could not maintain a strong Royal Navy. When Germany just started the naval arms race with the United Kingdom, the number of pre-dreadnoughts equipped by the United Kingdom was more than twice that of the former dreadnoughts equipped by Germany! There is simply no way to support such a huge navy based on the British mainland alone.

In addition, if the British mainland continues to be unified, it will always be a threat to Germany. If Germany competes with the United States for hegemony in the future, there is no doubt that the Atlantic Ocean will be the main battlefield. Qin Tian didn't want the British Isles to become a bridgehead for the Americans to counterattack the European continent.

So, Qin Tian hoped that after defeating Britain, he could split this country into several countries. In this case, it will be easier for Germany to control.

For example, haven't the Irish been fighting for independence? Germany has also been supporting them. This time, it is just right for the Irish to gain independence and become an independent country.

The Scots are not peaceful. If they are given a chance to be independent, I believe they will definitely abandon the English and choose to become an independent country.

As for the remaining England and Wales, it may be more difficult to split them into two countries. But Qin Tian still planned to try after defeating the British. After dismembering Britain, Britain will no longer pose any threat to the German Empire.
