

Jagged 835

There is no doubt that the United States is the well-deserved hegemon in America. Because of the unique geographical environment, the United States has developed very rapidly. After the end of the Civil War, American industry developed by leaps and bounds. Now, the whole of America has become America's backyard.

Of course, in South America, Germany's power is not weak. Germany began to compete with the United States long before the outbreak of World War I. It's just that the United States has an advantage in the Americas because of its geographical advantage.

"If the Empire launches an attack on Canada, will the United States go to war with the Empire?" Qin Tian sneered.

"Your Majesty, the Republic of America will not be an enemy of the German Empire. However, I hope that Your Majesty will not underestimate the determination of the United States of America to defend its own interests!" Brian said.

Even if Germany is now the world's hegemon, it has the most powerful army and navy in the world. However, the United States is not vegetarian. Although the U.S. Navy is still vigorously building new warships, the strength of the U.S. Army has already developed. The current U.S. Army already has millions of standing troops. The equipment is also much stronger than before. Such a force may not be as elite as the German army. But fighting on the mainland, there shouldn't be much problem if you want to resist the German army attacking across the Atlantic. After all, the United States has a strong industry and a huge population base, and its population of more than 80 million can provide them with millions or even tens of millions of troops. The U.S. government firmly believes that with so many troops, there is no problem in defending the mainland.

Qin Tian squinted his eyes, the arrogance and arrogance of the Americans made him very unhappy. He'd love to kick Brian out if he could. However, this does not help in solving the problem.

Germany's scheduled plan does not start war against the United States now. Germany has gained too much in this world war. These benefits must be digested before Germany's strength can further grow.

Although Germany is very powerful, it is undoubtedly very difficult to defeat a powerful country like the United States after just finishing a world war. Even, it is very likely that Germany will collapse. And the German people obviously don't want to fight another protracted war. They think the war has been won and it is time to enjoy the fruits of victory. If there is another war, they will definitely be completely disappointed. In that case, the support of Qin Tian and the German government among the people will inevitably decline as a result.

"If there is no need, the German army will not attack Canada!" Qin Tian thought for a while, and then said. It is obviously not cost-effective to tear face off with the United States at this time. Therefore, he intends to let the British go first. When Germany integrates and digests the benefits gained in this war in the future, it can find its way back at any time.

Brian nodded, a smile on his face. The powerful Germany actually backed down, which was beyond his expectation. However, this is undoubtedly a very exciting thing for him. This undoubtedly proves that

although Germany is very powerful, it is not invincible. As long as they are a little tougher, they can also make the mighty Germany compromise.

"However, the empire will definitely occupy all the British colonies except Canada. Any obstruction will be crushed to pieces by the empire!" Qin Tian emphasized.

Brian was noncommittal. Although, the United States also covets those colonies of the British. But he knows that the United States has no way to compete with Germany. The Germans were certain to win those colonies. If they get involved, it will inevitably lead to an all-out war with Germany. The United States also does not want to really tear itself apart with Germany. The current United States does not have the capital to go to war with Germany.

"In addition, I don't want the British to make small moves. For example, sending a fleet to attack the empire's merchant ships and the like. Once the empire finds out, then the empire will directly attack Canada. If the United States dares to stop it, then go to war!" Qin Tian warned. He believed that after the British fled to Canada, they would not be reconciled. At that time, they will definitely continue to make small moves. Although that does not pose a great threat to Germany, it is undoubtedly quite disgusting!

"Your Majesty, I will pass on your request to the Canadian side. I believe they will make the right choice!" Brian said.

Qin Tian nodded and didn't say much. After a few unnutritious words, Brian said goodbye and left.

At the meeting that afternoon, Qin Tian conveyed the request of the Americans to the ministers of the empire. Everyone is filled with righteous indignation and enthusiasm.

"What are the Americans? How dare they threaten the empire?" The Minister of War and Chief of the General Staff von Falkenhain looked angry.

"Yes, Your Majesty! The U.S. Navy has only two battleships now. Although they still have many battleships under construction. But it will take time. As long as His Majesty orders, the Imperial Navy can take all the coastal cities on the east coast of the United States. Destroy!" Marshal Earl Tirpitz, Minister of the Navy, also said.

Germany is now the hegemon of the world, with the most powerful military strength. The Americans dare to threaten them. Isn't that boring?

"The current empire can no longer fight big wars. That's why Americans are so unscrupulous!" Prime Minister Biluo said.

Qin Tian nodded: "It is true that the Imperial Navy has the ability to weaken all the coastal cities on the east coast of the United States. However, it is unrealistic to defeat the United States at this point. Among other things, the Americans can arm millions of troops to protect Their homeland. The Empire has to travel thousands of miles across the Atlantic to attack the United States. This is a huge disadvantage. At least at this stage, it is difficult for the Empire to defeat the United States."

Qin Tian has a clear understanding of the reality, and has not become arrogant just because Germany has become the hegemon of the world, which makes the ministers very gratified.

You must know that a young man like Qin Tian's age will easily lose himself after suddenly gaining power. For example, the crown prince of the Austro-Hungarian Empire, isn't that what it looks like?

"Everyone, there should be no conflict between us and the British who have fled to Canada for the time being. Of course, we will not sign any peace treaties or armistice agreements with them. Our attack on the colonies that originally belonged to the United Kingdom will not stop. If the British dare to play small tricks, they must resolutely fight back! Let them know that the empire is not something to be lightly humiliated!" Qin Tian said solemnly.

"Yes, Your Majesty!" All the ministers replied.
