

## Jagged 843

"Germany has no opponents in this world. As they start to digest the benefits gained in this war, they will become stronger and stronger. At that time, there will be no country that can match them confronted," U.S. Secretary of State Blaine said.

Crown Prince Hirohito and Kato Takaaki both looked deeply convinced.

The colonies that Germany is about to acquire alone are enough to make them salivate. The rich Southeast Asia, as well as India and Australia, etc., undoubtedly do not represent huge interests! Although India and Australia are still under the control of the British Empire, anyone with a discerning eye knows that once the German army launches an attack, the British cannot resist it.

How wonderful it would be if those colonies could be acquired by the island nation! Then, the short board of the island country's shortage of resources can be made up for. This will enable the island nation to take off with its wings and soar into the sky. Although it is difficult to fight for world hegemony, there is no problem at all in dominating the Western Pacific. Thinking of this, Crown Prince Hirohito's heart seemed to be bleeding.

"In order to deal with the powerful Germany, we can no longer fight alone. In that case, we will only be defeated by the Germans one by one. We need to unite with other countries to form an anti-German alliance to deal with the Germans together. Only in this way can we win the victory!" Brian continued.

"An anti-German alliance? This is a good idea." Crown Prince Hirohito said.

Kato Takaaki also nodded, agreeing with this method.

Between the island country and Germany, water and fire are already incompatible. Once Germany continues to grow stronger, the fate of the island country will definitely be very tragic.

"Your Excellency, Secretary of State, Germany is too powerful. Even if we unite to defeat Germany, it will be very difficult. If we want to defeat Germany, then we have to further develop our military power. Only then will we have a chance. But it is a pity that our strength is too weak, without further support, I am afraid it will be difficult to challenge Germany!" Kato Takaaki said.

He said that, naturally he wanted to get more support from the United States. The loans given by the Americans have almost become the main source of funds for the island nation to develop its military power.

"Your Excellency, Minister of Foreign Affairs, in order to maintain world peace and fight against the evil Germany, the United States of America will definitely continue to provide support to the island countries. After returning to China this time, I will try my best to facilitate the second batch of loans to the island countries!" Bryan Said.

The faces of Crown Prince Hirohito and Kato Takaaki immediately filled with smiles. With more American loans, they could build more warships and arm more troops. At that time, it is entirely possible to take the entire Southeast Asia and even India and Australia from the hands of the Germans by virtue of geographical advantages. Once successful, the strength of the island country will become even stronger. It is entirely possible to fight against Germany.

"Your Excellency, Secretary of State, in this case, we will be more likely to defeat Germany." Crown Prince Hirohito looked confident.

In his opinion, as long as the military strength of the island country is further improved, when other countries go to war with Germany, the island country will take advantage of the main force of Germany to be dragged in Europe and the Atlantic Ocean, and take the opportunity to march towards Southeast Asia, India and Australia. In that case, the chances of winning will be very great.

"In addition to the union of our two countries, we will also unite with the British Empire." Brian continued.

"British Empire? Is the current British Empire still the former British Empire? Uniting with them will not have much effect at all." Kato Takaaki frowned.

Many of the colonies they want to occupy in the future belong to the British Empire. If it is united with the British Empire, there may be problems with the ownership of those colonies in the future.

"The British Empire has fallen, but it is undeniable that they still have great advantages in many high-tech fields. Therefore, our alliance with them is very necessary. Besides, our goal now is to defeat the Germany. As for the distribution of benefits after the war, we will talk about it later." Bryan said.

Brian knows what the islanders are worried about. They have always been salivating over the British colonies in Asia. Therefore, the island countries will definitely be dissatisfied with bringing Britain into the alliance. In fact, the United States also does not want to see the island countries expand too much in the Western Pacific. In that case, it will also pose a threat to the interests of the United States in the Pacific. Therefore, Americans are also happy to see the post-war island countries and Britain competing for those colonies. In that case, the interests of the United States can be guaranteed.

Kato Takaaki nodded and said no more. Now the Americans are their benefactors. If it is not necessary, it is very uneconomical to offend the Americans. Anyway, it would be impossible for them to spit out the colonies they won during the war.

"In addition, we should also find ways to bring more countries into the alliance. For example, the Austro-Hungarian Empire, France, the Kingdom of Italy, the Ottoman Turkish Empire, and even Russia!" Brian continued.

Crown Prince Hirohito and Kato Takaaki were already dumbfounded.

"France and Italy have suffered heavy losses in this war. If they join the anti-German alliance, there should be no big problem. The Ottoman Turkish Empire remains neutral in this war. But if they can give them more benefits, they It is also possible to join in. However, the Austro-Hungarian Empire is an ally of the Germans? How could they join the anti-German alliance?" Crown Prince Hirohito asked.

"The relationship between the Austro-Hungarian Empire and Germany has become worse and worse. In particular, the crown prince of the Austro-Hungarian Empire is quite hostile to Germany. Once Franz Joseph I passes away, the alliance between the Austro-Hungarian Empire and Germany will inevitably It will be lifted. At that time, it will be our opportunity to bring Austria-Hungary into our alliance." Bryan explained.

"If so many countries join the anti-German alliance, then we can definitely defeat the Germans!" Crown Prince Hirohito said.

Bryan nodded: "As for Bue, we will find a way to get in touch with them. However, it is hard to say whether it will be successful or not."

Now, the whole world is wary of Bu Russia, after all, they are all capitalist countries. The purpose of Bu Russia is to overthrow these countries and liberate the enslaved people all over the world. However, even so, Brian believes that as long as they have common interests, they can also unite.
