Bu-Russia special envoy Joseph returned home full of joy. This trip to Germany, he can be regarded as a successful completion of the task. Not only did they find a way to save the comrades in the German-occupied areas on the Eastern European plains, but they also received huge support from Germany. More importantly, Germany is willing to help Bu Russia build a batch of battleships at a favorable price, which gives Joseph the opportunity to reach into the army.

It can be said that Joseph thinks that the task this time has been completed very well. He believed that after returning to Bu Russia this time, he would definitely be rewarded by Ulyanov. In this way, he will be able to occupy an advantageous position in the competition with Trotsky. Maybe it will allow Ulyanov to establish him as his successor.

Not to mention Joseph's longing, the German Empire held an imperial meeting after the Russian delegation left. The most important topic of the imperial meeting was a series of deployments to Russia.

"Your Majesty, this time the Russian special envoy left with a smile on his face. He must have obtained what they wanted from the empire. He must be very satisfied!" the prime minister of the empire Biluo said with a smile.

Although, from the series of agreements reached between the empire and the special envoy of Bu Russia, the empire can be said to spare no effort to help Bu Russia. However, these important ministers in Germany are not fools, they can naturally see Qin Tian's plan from it.

Qin Tian smiled and nodded: "If the empire wants to maintain its dominance, it must first dominate Europe. In the whole of Europe, apart from the empire, no other powerful country is allowed. Otherwise, it will pose a serious threat to the security of the empire. Influence. Therefore, whether it is the Austro-Hungarian Empire or Russia, they are all enemies that we must eliminate."

Qin Tian paused, and continued: "Needless to say about the Austro-Hungarian Empire, we are already drawing up a plan to deal with them. The Austro-Hungarian Empire is next to us, and it is undoubtedly relatively easy to deal with them. However, Bu Russia is different. Even though we slaughtered a piece of fat from them in the last war, their strength is still very strong. In addition, the empire has too many enemies now. If you do not deal with it carefully, Napoleon the Great The failure of the expedition to Russia may be a lesson for us."

"Yes, Your Majesty!" The military and political ministers of the empire replied solemnly.

The current situation in Germany is indeed very similar to the original French First Empire. However, France at that time faced opposition from many European powers. Now Germany is facing the siege of the world's powerful countries.

"I proposed to help Bu Russia establish an industrial system. On the one hand, it is because even if Bu Russia does not get help from us, it must be able to get help from other places. For example, the Americans, they hope that Bu Russia will become stronger, and then directly attack the empire. On the other hand, we help Bu Russia to rebuild its industrial system, so we undoubtedly have a certain right to speak in establishing those important factories there. At the same time, we can also use this opportunity to spy on Bu Russia's reality. We can also learn the information we want from Bu'e. Prepare for the future attack on Bu'e!" Qin Tian said.

"Your Majesty is really far-sighted." Marshal von Falkenhain said.

"However, if we propose to help Russia build a transportation network, they will probably not agree! Of course, the construction of a transportation network will greatly promote the development of Russia's industry and economy. However, the threat, they I won't miss it." Marshal von Falkenhain continued.

"I didn't expect Bu Russia to fully agree with this point. Even if they build some decent railways and roads because of this, it will be of great help to our future attack on Bu Russia!" Qin Tian said.

The ministers nodded repeatedly. To attack Bu Russia, the vast territory of Bu Russia must first be considered. The vast territory will bring huge strategic depth to Bu Russia. In addition, Russia's poor transportation will make it very difficult for any country's military to supply logistics. Coupled with the cold weather in Russia, soldiers from other countries cannot adapt. This makes it very difficult for other countries to defeat Russia.

If Germany wants to destroy Bu Russia, it has to take these factors into consideration. Only when these factors are overcome, will Germany be able to win the war with Bu Russia.

"Your Majesty, we can buy some people within the cloth party. In this case, our goal may be achieved." Foreign Minister Wahit said.

Although, the cloth party has just taken control of Russia. But the corruption within has already begun. Many people started to indulge in pleasure. German intelligence agencies have already begun operations in this regard.

"This is a way, but it's hard to say whether it will be successful." Qin Tian said.

"Your Majesty, we can only try our best to calculate Bu. Whether we can succeed depends on God's will." Prime Minister Biluo said.

Qin Tian nodded, this is indeed the truth. The so-called planning depends on man and success depends on heaven. They can do what they should do, and whether they can succeed depends on God.

"Your Majesty, this time we are helping Bu Russia to build battleships. Will this pose a threat to us? The Navy does not have a Baltic Fleet. And many important shipyards of the Empire are on the coast of the Baltic Sea!" Minister of the Navy Reinhard Scheer The marshal was a little worried about this.

"Don't worry, if Bu Russia really intends to put the fleet in the Baltic Sea, then it is really a dead end. We can use planes and submarines to kill them all. When the war breaks out, our planes may be able to Drop heavy aerial bombs and heavy aerial torpedoes! Isn't it easy to deal with those battleships? What's more, the shipyard didn't deploy anti-aircraft weapons for those battleships!" Qin Tian smiled.

Marshal Reinhardt Scheer suddenly laughed. He knew that Qin Tian had dug a hole for Bu'e. But those guys still jumped in foolishly, they were looking for their own death!

"The strength of Bu Russia is not as good as ours. If they develop the army with all their strength, it may be difficult for us to defeat them. However, if they allocate part of their strength to develop the navy! Then, they will seek their own death Yes. At that time, it will be relatively easier for us to defeat them. Everyone, in order to defeat Bu'e, we must do our best and use all the methods!" Qin Tian looked serious.

"Yes, Your Majesty!" The other ministers also replied solemnly.
