

Jagged 906

"Your Excellency, according to this point of view, the possibility of us resisting the German invasion is undoubtedly very high. However, after we win, do we really want to give independence to those Indian natives?" William Nicholson asked the lord.

As the commander of the British Army in India and the British Indian Army, he also knows the situation in India very well and knows how rich it is here. For the British Empire, India has undoubtedly become an indispensable and most important colony. It can be said that if India can continue to be in the hands of the British Empire, this will greatly promote the re-emergence of the British Empire.

So, Lord William Nicholson, also does not really want to lose India. If India is lost, even if the British Empire rises again, it can only be a second-rate power, and it will never return to its peak state.

"Of course it is impossible! If we really defeat Germany, then it will be the fourth period of those guys. At that time, I will kill them all!" Baron Charles Harding said.

This is a plan he had thought up a long time ago, and everything was just to deceive those Indian natives to contribute their strength to resist the German invasion. When the German attack is really resisted, then those Indian natives will become unimportant. This is the reason why the so-called birds are exhausted.

"But if that happens, won't it cause even greater chaos in India? At that time, our rule will also be overthrown by the Indians." Lord William Nicholson frowned. He thought that if he deceived the Indians like that, he might be in great trouble. After all, after this war, even if the losses are heavy, the military strength of the Indians will still be greatly improved.

"So, Your Excellency, you have to think carefully about how to consume the most radical and most opposed people in the war. Use the hands of the Germans to eliminate those radicals. In this case, even if When chaos breaks out in India, it will be easily suppressed. At that time, India will still be our colony. After all, a large part of Indians have been tamed by us. They have accepted our rule willingly. As long as they are hungry If they don't die, they won't resist. It's only a small group of people who really resist us. We can get rid of them and defeat the Germans at the same time. Then, we can sit back and relax!" Baron Charles Harding It looks like everything is under his control.

"Your Excellency, if this plan can really be realized, then we will be the biggest winners!" said Lord William Nicholson.

Although this plan is very risky, the possibility of success is also very high. The most important thing is that once successful, the benefits will be amazing. So, no one can deny this.

"Your Excellency, we will succeed. I think God will bless us! The British Empire will be revived in our hands. We will all be the heroes of the British Empire. Our names will be remembered forever In the annals!" Baron Charles Harding was very excited.

This time, Baron Charles Harding planned a scam carefully, a scam that wiped out all the elites in India. Use their desire for freedom and independence as bait to make them work hard for the British Empire. At the same time, they used the hands of the Germans to remove these people. Wait until the end, after defeating the Germans, and then take action to wipe out all the remaining elites. In the end, it

is they who benefit. Their rule in India will thus be truly stabilized. It will be impossible for India to get rid of their colonial rule.

Next, Baron Charles Harding issued an order to invite the leaders of the Congress Party and the Green Party Alliance to the Governor's Palace to discuss the future of India.

After receiving the invitation from Baron Charles Harding, Tilak, Gandhi, Nehru and Jinnah all readily went. Although they all hated the British colonial rule of India, they all had to admit that the current British and Indian colonial authorities were not something they could resist.

In addition, the credibility of the colonial authorities is also trustworthy, so there is no need to worry that they will take this opportunity to attack them.

It's just that they didn't know that Baron Charles Harding had already dug the trap, and he just waited for them to jump into it foolishly. Once they jump in, they really can't turn over again.

Charles Harding only invited the Congress Party and the Green Party Alliance because they are the only two largest parties in India. For the rest of the small parties, there is no need to invite them at all. As long as the two parties are persuaded, all problems will be solved.

On January 31, 1916, the leaders of the Congress Party and the Green Party Alliance walked into the Governor's Palace of India. In order to show their importance, Baron Charles Harding even greeted them on the steps of the gate. There is no doubt that this is already a great courtesy to these people.

Nehru, who was only in his twenties, was even very excited and excited. In his view, Baron Charles Harding's behavior was a recognition of them. This means that they have become important people in India.

"Welcome to the Governor's Mansion. I am very happy that you are here!" Baron Charles Harding smiled.

"Your Excellency, Excuse me!"

The group did not stop at the gate of the Governor's Mansion, but entered inside under the guidance of Baron Charles Harding.

After some pleasantries, their conversation got to the point.

"Everyone, the British Empire has suffered an unprecedented defeat. Even our homeland has been occupied by the Germans. However, we believe that the difficulties are only temporary. The British Empire has not given up its efforts so far. We firmly believe that, We will be victorious in the future!" said Baron Charles Harding.

However, Tilak and the others were noncommittal about Baron Charles Harding's statement. The Germans are so powerful now, they don't believe that the British still have a chance to come back.

Of course, everyone did not refute Baron Charles Harding. Otherwise, everyone will lose face.

"India is also in danger. The Germans are preparing to attack India. Once the Germans attack India, the whole of India will be killed and suffer heavy losses. I think no one wants to see India change Be like this!" said Lord Charles Harding.
