

Jagged 933

On August 8, 1916, Emperor Qin Tian of the German Empire was crowned again in Berlin. This time he wore the crown symbolizing the Indian emperor, adding another title to his title.

Many Indian lords participated in this coronation ceremony. During the coronation ceremony, they swore allegiance to Qin Tian.

The military and political officials and celebrities of the German Empire, as well as the envoys of various countries stationed in Germany, all participated in this ceremony.

There is no doubt that after acquiring India, the German Empire will become even stronger. This is definitely not a good thing for other countries in the world. However, they were powerless against the strength of the German Empire. Germany's military strength is at its strongest. If there is a war with Germany at this time, they have no chance of winning at all. Therefore, they can only watch Germany's strength grow further.

When Kaiser Qin Tian held the coronation ceremony, in distant India, General Ludendorff, commander of the German 8th Army, was leading a regiment of troops to Kerala in southwestern India. The reason why he rushed there was entirely because Qin Tian specially instructed General Ludendorff during the expedition to India.

Qin Tian told General Ludendorff that in the underground palace of the Padmanabhaswamy Temple in Kerala, there are dozens of tons of gold and other jewels. Qin Tian asked Admiral Ludendorff to find out those gold, silver and jewels and transport them back to India. Moreover, if gold is really found in that temple, the two German armies in India immediately searched those temples throughout India and brought all the gold, silver and jewelry back to Germany.

Although, doing so will definitely arouse the resistance of those Indians. However, Qin Tian didn't care at all. Because the next ones to clean up the mess will be the rulers of the Indian states. They will be the rulers of this land. And they will certainly not want to see the situation in India become chaotic.

Every temple in India has a tradition of burying precious metals such as gold. Instead of letting those gold and silver treasures disappear from the sky in the underground palace, it is better to dig them out. In this case, Germany can also have a greater wealth.

Although Germany is now the number one power in the world. However, in Qin Tian's view, Germany has many inherent deficiencies. In order to make up for these shortcomings, he can only get as much wealth as possible for Germany. Then use this wealth to further strengthen Germany's strength in a short period of time, making Germany even stronger. Ensure that Germany can win again in the future World War II. Otherwise, Germany's dominance will be overthrown. All victories will disappear like flowers in mirrors and moons in water. Qin Tian didn't want to work hard for so many years, but it was still nothing in the end.

"How long before we can reach the temple?" Admiral Ludendorff asked.

"General, we will be able to arrive tomorrow afternoon." The colonel head reported.

Admiral Ludendorff nodded and didn't say much.

However, the head of the colonel was very curious and couldn't help asking why he rushed to an Indian temple in such a hurry.

"His Majesty the Emperor has received news that dozens of tons of gold are buried underground in that temple. Therefore, we need to dig out the gold and bring it back to the empire. If the news is confirmed to be true, then other temples in India, is there gold hidden? In that case, I am afraid we will have to search it in India. We will have to bring all the gold and other treasures back to Germany. This will be a big problem for the empire. A very large fortune. It must not fall into the hands of others, or be allowed to remain in India!" said Admiral Ludendorff.

"Yes, General!" The head colonel nodded. Dozens of tons of gold are worth a lot.

The next afternoon, the German army arrived at the temple. Admiral Ludendorff did not issue any unnecessary orders, and the colonel head directly ordered the troops to drive the monks out of the temple.

"What do you want to do? This is a temple, and you will not be allowed to act wild!"

"God will punish you!"

The monks who were expelled from the temple cursed the German army one after another. However, under the guns of the German army, they had no other choice.

Native Indians in the vicinity also came here one after another. When they saw the monks being kicked out and the German army entering the temple and searching around, they suddenly became excited.

However, when the Germans set up mortars, grenade grenades, and general-purpose machine guns and squad machine guns, aiming at the angry people, they immediately shut up.

These native Indians have been tamed by the British. In their eyes, Westerners are very powerful. If the Westerners are provoked, the final result will be very tragic. Although the behavior of the German army made them very angry, at this time, it is undoubtedly the most important thing to save their own lives.

"General, the soldiers have searched and found no underground palace!" The colonel head reported.

General Ludendorff couldn't help but frowned, thought for a while, and then ordered: "Let the engineers go up, blow up this temple, and then dig!"

"Yes, General." The colonel immediately went to make arrangements.

"Boom!"

With a loud bang, the temple was blown into ruins.

The German army directly blew up the temple, which made the monks and believers unacceptable. They rushed towards the German army frantically, trying to break through the German blockade.

"Da da da!"

The head of the colonel directly gave the order to shoot, and several machine guns began to shoot. Some Indian juniors who rushed forward were shot and fell to the ground screaming.

The other Indian natives were immediately frightened and dared not move forward.

Subsequently, the German engineers began to dig in the ruins of the temple.

An hour later, they had a harvest. A dungeon buried deep underground was discovered. There are golden nuggets and gold chains inside.

"Very well, continue to detect. Also, pay attention to vigilance. If those Indian natives dare to make any changes, shoot directly!" Admiral Ludendorff ordered.

"Yes, General." The head colonel nodded.

The excavation continued until the evening. The German army unearthed a total of more than 40 tons of gold from the underground palace of the temple. There are also many other jewellery.

When the German army tried to transport away the gold and jewels, it once again caused the siege of Indian natives. It's just that, under the muzzle of the black hole, those Indian natives had no choice but to let the German army take away the gold and jewelry.
