

King of kings 1159–1160

1159

“Uh, a place called Dog’s Tail Town, it seems to be in the Townsend Sect.”

The teacher’s wife said, “Feng’er, you’re creating a sect on the territory of the Townsend Sect, you’re going to be destroyed by the Townsend Sect, and no one wants to have another sect underneath their own sect. If you want to create a sect, you must at least have the strength to not be afraid of the Townsend Sect ah, isn’t that too risky for you.”

“Uh, so according to what you’re saying, there are sects occupying every place in this Jianghu, and I don’t have anywhere to create my own sect.”

“Yes, so a sect isn’t so easy to create, even if it’s a Sect Master’s Grand Perfection. Moreover, no matter which Ancestral Master Perfection is strong, they are already focused on higher level martial arts and won’t waste their time on creating a sect at all. Feng’er, you shouldn’t waste your time either, if you have this time, you might as well work harder at martial arts and break through one martial arts realm upwards.”

“That’s true, but, you know, the martial arts I created on my own are so good, if I don’t let generations of people pass it on, it’s too wasteful.” Omi said, scratching his head.

“Alas, I really can’t do anything about you, if you want to create a sect, then I do have a suggestion.”

“Please say it, Shisha.”

Yan Xinyi said, “There is no land on this continent for you to build your own sect, so if you really want to build your own sect, you can only go out to the sea, there are some uninhabited islands around the continent, currently these islands, no sect has designated them as their own territory, so they are still uninhabited. It’s just that the islands in the sea are far away from the land, transportation is not convenient at all, and the sea beasts are numerous and uninhabited, so it’s really not a good place.”

Omi smiled, “Teacher’s wife, thank you for your advice, no need to worry about transportation, I have a flying machine, and it’s only half a day’s journey from here to the Demon Sect’s head office.”

“What? So fast.” The teacher’s wife was shocked.

“Yes.” Omi nodded his head. First URL m.kanshu8.net

"Ah."The teacher's wife seemed unable to believe it.

Omi was a bit excited inside, creating a sect on the island was quite good, and then, Omi would go to another world and bring a group of architects, construction workers, and some scientists, and then he would be able to develop the island in a big way.Of course, Omi could also go to the other world and bring a group of people over to live on the island, and gradually, Omi believed that he could turn the island into a modern and prosperous place.Look at those sects on the mainland, who are envious of him.

However, this day was still a bit far away, just a plan for Omi, and the crossing point was a bit far from here, not quite enough to transport a large number of people, it would be best if these problems were solved, if planes and such could be brought over.

The next day, the division was able to get up as well, still severely thin, but at least in good spirits.

All the Shishu brothers were gathered together.

"Brother Wind, we're going to the Endless Gate today, right?"Third Senior Sister asked.

"Yes, but the address of the Endless Gate has been changed, the previous place, within the territory of the Townsend School, Shishu said that the Townsend School would definitely obstruct it, all, following Shishu's advice, we'll go to the surrounding area and find a suitable island to serve as the address of the Endless Gate.Then I'll take you guys to another world for fun."

"Wow."

"I'm so looking forward to it."

"Great, I've been wanting to go to the other world for a long time."

Omi said, "Now I have a lot of flying machines, so each of you will be matched with one, and you can easily go to the other world."

"Yay."Omi's brothers and sisters all

Very excited.

Little Sister said, "What about Master?Aren't we looking for it?"

"Alas, Master hasn't heard from us for a year, and we've searched all the sects of the Righteous Alliance."Everyone lowered their heads, and Shifu was gloomy for a while.

Omi said, "Since we've searched all the proper alliances, I wonder if the Demon Territory has any, could that Zongshi Great Perfection strong man who captured Master be someone from the Demon Sect?"

"Ah, if it's a demon, that's the end, I'm afraid Master's chances of survival are really slim."

The teacher's wife's eyes were red and she didn't speak.

Omi consoled, "Shisun, don't worry, I'll ask Mu Qianji, to help us find out what's going on. With things as they are, we can only pray."

"I understand." The teacher's wife nodded, it's been a year, what else can we do.

Omi said, "Then, let's go to Dog Tail Town now, first we'll retrieve my flying machine, I'll teach you how to use it, then we'll fly overseas to find the island, after we find the island, we'll go to the Demon Territory, let Mu Qianji help us find the people, and finally, we'll head to the other world."

"Mm, you arrange."

Omi asked Black Jiao and Dao: "Little Black, Little Fire, please, help me transport a few people."

Little Fire said, "Brother Chen, your brothers and sisters are my brothers and sisters, and your mothers are my mothers."

"Hehe, then don't be long-winded. Big Brother, Second Brother, Third Sister, Fourth Brother, Fifth Brother, and Little Sister, get on Little Fire and Little Black's backs, and I'll use the flying machine."

"Hmm."

Everyone sat on the backs of the Black Jiao Fire Demon Beast, carrying these people, they wouldn't reduce their speed.

Shisuniang, Little Sister, and Third Sister, the three of them sat on the back of the fire beast, while the others sat on the back of the black jiao.

The teacher's wife stroked Little Fire's beautiful fur and smiled, "Feng'er was able to encounter such a world wonder, the future must be extraordinary."

Third Senior Sister said, "Our Brother Feng is the best."

Little Sister said, "Auntie, is there really something about Senior Brother Wind's life? After you woke up, we actually wanted to ask, but we didn't dare to ask yet."

The teacher's wife said, "Let's talk to Wind about this some other time."

"Oh."

"Depart."

Little Black and Little Fire slowly rose into the air.

At this moment, many people of the Divine Dragon Sect were watching.

In the past few days, everyone in the Divine Dragon School knew that the disciples of Ding Ru, the temple, were about to leave the Divine Dragon School.

Everyone was sobbing and sighing.

Today, we finally saw that a large group of them were leaving.

The teacher's wife was sitting on the back of a small fire, overlooking the buildings of the Divine Dragon School below, and was at a loss and uncertainty inside, she had lived here for decades, and today she was going to say goodbye to this place, but she wasn't attached to it at all, and she even hated it.

"Bye bye." Second Senior Brother waved his hand to the ground, the other disciples of his uncles.

Big Brother said, "Goodbye, Divine Dragon Sect, it wasn't me who abandoned you, it was you who abandoned me. If the Divine Dragon Sect's founding ancestor, your dead spirit, can hear you, you must fix the current Divine Dragon Sect and force us out."

"Goodbye." Little Sister looked at the place where the Divine Dragon Sect grew up, and a faint feeling of sadness was also present within her.

1160

Omi flew up into the air with his flying machine on his back and said to everyone, "Everyone, don't stay behind, the old is not going, the new is not coming, there is no place to stay here, I believe we will have a better tomorrow. Let's go."

Saying that, Omi came to lead the way, with Little Black and Little Fire following behind, and soon disappeared into the distance in the sky.

On the ground of the Divine Dragon Sect, however, many many disciples as well as their uncles and uncles, were still looking at the distant sky, and then they sighed, they watched the disciples of Ding Ru, the hall of disciples, leave, and there was a sense of resignation and sadness within them. But what could they do, there was bound to be a trade-off between Song Dingtian and the disciples of Ding Ru's hall, and without disposing of Song Dingtian, they were bound to leave.

"Good luck to you." One master uncle said.

Another uncle asked, "Where are they going to live after they leave the Divine Dragon School?"

"I heard that they created a new sect, called something like the Endless Gate."

"Haha, a new sect created? It's kind of funny."

"It's a bit funny, but they still had the courage to leave the Divine Dragon School and create their own sect."

"Is there still land in this river?"

"It's hard to understand, anyway, good luck to them."

Omi and the others flew in the sky for two hours, then landed in a dense mountain forest. Remember the URL . kanshu8 . net

It was exactly the place where Omi had struck the Ancestor Realm.

"Wow, that's really fast, tsk tsk." Everyone was still marveling at Little Fire and Little Black's flying speed.

After landing on the ground, Sifu immediately saw a humble wooden house not far away, with a sign nailed to the outside of the wooden house that read Endless Gate.

"Windy, the address you originally looked for is here, right?"

"Yes, ma'am, but it's a bit of a pity that it's no longer available, this is where I created the Endless Technique ah."

"Oh, it doesn't matter, the place where the Divine Dragon Sect's founding ancestor created the Descending Dragon Sword Technique is not the Divine Dragon Mountain either, I heard that it was on an island somewhere, and he also had a Black Jiao friend in the beginning."

"Hmm."

The teacher suddenly said, "Feng'er, listening to you always mention the technique you created yourself, is the technique you created really strong?"

"Would you like to see the teacher's wife?"

"Okay, Reiji, give me the sword." Sensei right.

Little Sister said, "Sensei, your body is still starting to recover."

"It's fine."

The teacher's wife took the sword and then fought with Omi.

Shisuniang was at the middle stage of the Ancestor Realm.

Omi was at the early stage of the Ancestor Realm.

As soon as Shiniang made her move, Omi had picked off her sword.

The teacher's wife was stunned there as if she was incredulous.

"Feng'er, did you really create this yourself?"

"Of course, how does the teacher feel?"

"Gosh, it's too unpredictable and ever-changing."

"So, I named it Endless Gong."

Omi's teacher's wife couldn't calm down for a long time, Omi's self-created sword technique was too profound.

"Feng'er, now I finally understand your desire to pass it on to the ages, indeed, it would truly be a loss to the world if such an exquisite sword technique were to be lost."

"Haha, Shini-sama is overpraised, the loss is not so much of a loss, the world is endless, the future is full of geniuses, and there may be others who will create even stronger sword techniques in the future."

The teacher's wife said, "Feng'er, I suggest that you take this martial art .

Pass it on to all your brothers and sisters. Even though they haven't comprehended your martial dao, with this subtle sword technique, it's definitely stronger than the Descending Dragon Sword Technique."

"Good, that's exactly what I mean."

The teacher's wife said to Omi's brothers and sisters, "Don't go using the Descending Dragon Sword Technique from now on, just use the Endless Sword Technique, trust me that's right."

"Good."

In the past, when Omi hadn't yet stepped into the clan, when he hadn't yet created Endless, although he had already comprehended his martial dao, Omi still used it in conjunction with the Descending Dragon Sword Technique then, and Omi's brothers and sisters were still doing the same now. Now that Shizuo asked them to use it in conjunction with Omi's self-made Endless Sword Technique, it would be more effective and could continue to be used even after

stepping into the clan, but of course, it would be a different story if their self-made sword techniques were even stronger after matching their own martial dao after stepping into the clan.

Omi took out the hidden flying machines, forty-nine in total.

“So many?” Everyone was shocked to see so many flying magic treasures, although they already knew that Omi had many, but seeing it with their own eyes was different.

“Haha, in fact I still have more, I just didn’t bring them here, in the other world.”

The teacher’s wife laughed, “I originally thought that this was some kind of flying treasure left over from the ancient era, but it turned out not to be.”

“Of course it isn’t, I wasn’t able to explain it to you before, it’s a technological product. This thing just breaks a notch and it’s destroyed. If it were a real magic treasure, it would be absolutely indestructible, there’s a world of difference.”

“Hmm.”

“Everyone carry it on your shoulders, I’ll teach you how to use it.” Omi said to everyone, then when those few flying machines: “No. 4, No. 5, No. 6, No. 7, No. 8, No. 9, No. 10, set the new master control code.”

Soon, everyone’s flying machines were set, and their flying machines were not restricted by Omi.

The initial speed was two hundred per hour, then slowly accelerated, and after an hour they were all able to use and control it flexibly.

“Everyone has learned how to do it.”

“Of course, it’s not hard at all.”

“Good, then we’re ready to start flying, we’ll head out to sea and find the new address of the Endless Gate.”

“Okay Le.”

Omi shouted, “Start up.”

“Swoosh, the flying machine sent Omi slanting up into the clouds in one go, and behind him, the rest of them followed.

Omi saw that they were all able to control it flexibly, he smiled, and then Omi adjusted his direction and flew forward.

After flying for about three hours, finally, they flew to the edge of the continent and saw the ocean.

The ocean was still a rather mysterious area to the people of this world, because there were very few people who went out to sea, the wooden boat was too slow and not strong, and it would leak if it was randomly hit by a sea beast, so none of the surrounding islands had any sects occupying it as their territory.

Thus, Omi could have a good look for nice islands.

"Let's go out to sea."

"Wow, the ocean is so big."

"The first time I've ever seen the ocean in my life, it really is spectacular."

Omi's brothers and sisters yelled.

Everyone flew out of the ocean to go, it was only less than three minutes of flying before they saw an island. Although it had only been flying for three minutes, the island was actually over a hundred kilometers away from the mainland.

"That island is nice." Omi said.

"Then let's go down and take a look."

Everyone immediately landed down on that sea island.

Landing on an unpopulated, completely pristine island, that felt pretty good.
