

King of kings

1696

"Alright, today's auction has officially begun, the first item to be auctioned tonight is a pill, this pill is called the Uncommon Pill, it was obtained by a mercenary group from an ancient relic, according to history books, those who take the Uncommon Pill can quickly step into the Exaltation Stage, it is the best pill for an impact Exaltation Stage cultivator, the starting price is 5 pieces of sixth grade spirit stones." In the auction hall, the auction had officially started.

Omi and Mu Qianji sat in the VIP room and watched, it was estimated that there was more than Omi's flying sword being auctioned off tonight, so Omi could only wait patiently, if he wasn't wrong, Omi's flying sword was the grand finale.

And so, auctioning one item at a time, about an hour and a half had passed.

"Everyone, tonight's auction is finally at its highest point, that is, tonight's grand finale item, a medium-grade superior magic weapon, everyone please look this way." The host of the auction, pulled open a black cloth on the stage while mouthily saying, "Everyone, please look this way."

As soon as the black cloth was pulled away, only a middle-grade superior flying sword was placed there, it was the same flying sword that Omi had.

"Wow, it really is a mid-grade superior flying sword."

"Tsk tsk."

The entire auction hall, everyone stirred, tonight's finale item came out.

The host said, "Everyone, you all see it clearly, then, let's start the auction, the starting price for this Intermediate Superior Grade magic weapon is 50 pieces of Sixth Grade Spirit Stones."

"55 pieces."

"80 pieces." First URL m.kanshu8.net

"100 pieces."

In the auction hall, many people immediately started shouting prices.

"120 pieces."

"121 pieces."

"140 pieces." At that moment, an old man shouted, and everyone looked towards that person, but it was the Ning family's ancestor, Ning Fang.

"Ning Fang isn't going to kill Omi, and he's still in the mood to come here and grab the flying sword." The crowd was talking.

That Ning family ancestor paid no attention to the crowd's discussion, although it was important to go kill Omi, it was even more important to take this intermediate superior magic weapon.

"150 pieces." At this time, another person shouted.

The price had reached the point where fewer people were shouting, after all, not everyone could easily take out more than 100 pieces of sixth grade spirit stones.

"155 pieces." Ning Fang, the Ning family's ancestor, shouted again.

"160 pieces." Another person shouted, and everyone looked towards this person, but it was Lv Zhu, an Exaltation Stage powerhouse of the Lv family.

The Ning Family Old Ancestor shouted again, "170 pieces."

At this moment, the Ning Family Old Ancestor was already a bit anxious, after all, the price shouted to 170, their Ning Family, could only take out 180 pieces of sixth grade spirit stones, if they couldn't take more than 180 pieces, then they would have to miss out.

At this moment, the strong man from the Lu family snorted, looked at Ning Fang and said, "Ning Fang, do you have to steal from me?"

"Lv Zhu, isn't that what the auction house is like, if you really don't have any spirit stones, why fight with me." The Ning Family Ancestor said, feeling a little upset, that Lv Zhu, who was just an Exaltation Stage of the Lv Family, and he was the Ning Family Ancestor, spoke to him in a threatening tone.

If Lv Yuxi was here, she could definitely recognize that Lv Zhu, who was part of the group that framed her father.

Lv Zhu said, "Ning Fang, you, an ancestor of the Six Exodus Family, even dare to steal from me?"

"Hmph, I'll offer 180 sixth-grade spirit stones." The Ning family ancestor was upset and raised ten Spirit Stones to his face.

With an angry look on his face, Lu Zhu said, "We'll see." After saying that, that Lv Zhu walked away.

The host shouted, "Is there any higher than 180?"

r />

"180 once."

At this moment, in the VIP room, Omi was depressed, "Only 180 sixth-class spirit stones were auctioned off? Holy shit, didn't we say 200 or so before?"

Mu Qianji also had some regrets.

"180 twice."

"180 three times."

"Congratulations to Senior Ning Fang, for obtaining this Intermediate Superior Flying Sword." The host shouted.

Ning Fang didn't look good, he could have auctioned it off at 170, but, having been irritated by that Lu Zhu, no one shouted at him to raise it to 180 himself, losing 10 sixth-grade spirit stones for nothing.

"Senior Ning Fang, go pay your spirit stones, and after you pay, you can take this middle-grade superior magic weapon with you."

Ning Fang snorted and went to pay the spirit stones.

In the VIP room, Omi wasn't in a beautiful mood.

"180 sixth-grade spirit stones, after deducting 10% to the auction house, only 162 sixth-grade spirit stones are left." Omi said depressedly.

Mu Qianji consoled, "Previously, it was a twenty-eight percent split, even if the auction goes to 200 pieces, twenty-eight percent, it's only 160 pieces, now although 180 pieces, but nineteen percent, there's still 162 pieces after the split, so don't be depressed, just treat it as a twenty-eight percent split."

"All right." Omi could only comfort himself.

The auction hall soon ran out of people, and everyone went back after the auction.

That Ning family ancestor, who had paid 180 sixth-class spirit stones, also left.

Not long after, an employee came to inform Omi, "Gentlemen, the auction has ended, you can go to the settlement office to collect your spirit stones."

Omi and Mu Qianji immediately went to the settlement office.

A female staff member at the settlement office handed Omi a slip and said, "You can look at it to see if there are any mistakes, and if there are no mistakes, sign a name and you can collect your spirit stones."

Omi took the slip, and it read: total auction price is 180 pieces of sixth-class spirit stones; after deducting ten percent of the auction site's share, 162 pieces are left; after deducting three.5 percent of the auction site's deposit, 156 pieces are left; after deducting eight.5 percent of the basic tax rate, 140 pieces are left; after deducting five percent of the post-sale retention fee, 131 pieces are left; after deducting three.8 percent of the market float rate, 124 pieces are left; after deducting basic operating expenses 4.8 percent, 115 pieces left. In the end, the total amount due is 115 pieces of Sixth Grade Spirit Stones."

Omi looked at the list, this fee, that fee.

Omi and Mu Qianji were both dumbfounded.

Mu Qianji was busy saying, "Are you guys making a mistake?"

"Hello, don't worry, we are strictly calculating according to the rules of the auction house, we will never count you an extra piece, our auction house is very strict in its management, you can rest assured, if there is no mistake, please sign, and then you can settle the spirit stone due to you."

Mu Qianji said, "Didn't we say before that it would be a ninety percent split?"

“Yes, now it’s a nineteenth split, and we’ve been responsible for specifically explaining that we changed the original twenty-eight split to a nineteenth split. If you’re really lucky, if you follow the twenty-eight split, you’ll end up getting a lot less spirit stones again.”

“What is this auction house margin?”

“Hello, this is the basic amount our auction house charges for securing your items, and you can rest assured that our auction deposits are strictly standard and we will never overcharge you.”

“And what is this basic rate?”

“Hello, everyone who is auctioned off is required to pay a certain amount of tax, and the percentage of tax paid is strictly in accordance with the regulations issued by the Four Seas Head Office, and we have to pay this tax to the Four Seas Head Office afterwards as well.”
