

# King of kings

1782

"Why is there a ban?"

"Nonsense, there must be a ban, this is at least the spirit stone cave house of the world's strongest man from tens of millions of years ago, I just didn't expect that the ban would be preserved until now."

Mu Qianji said, "The basis of the ban is spirit stones, there are still so many spirit stones, of course the ban won't disappear, it's just that this ban consumes spirit stone cave dwellings, and it's been consumed for tens of millions of years."

"Now we have to find a way to break the restriction first, we won't know until we go in and see it."

Omi offered his heavenly flying sword and used the Shura Eighteen Blades to cut down for a while.

"Boom." There was a huge rebound and Omi was bounced off, moreover, Omi's arm went numb and his fingers popped out blood.

"Oh my god, this restriction is too strong, it can't be broken." Omi said.

"Then what should we do, if we can't break it, won't we just have to watch?"

"I'll try again."

Omi put away his flying sword and pressed his hand on the restriction, his entire body's immortal energy seeping into the restriction.

"Bang." Suddenly, the restriction seemed to sense something and let out a thumping sound. One second to remember to read the book

"Alright, the ban is broken."

"So easy."

"After all, it's the Nine Daoist Demon King's Immortal Qi, and this is also the Nine Daoist Demon King's Spiritual Stone Cave, so there's some kind of mutual sensation, right?"

Omi was the first to enter the Spirit Stone Cave Residence.

It was true that many of the spirit stones in the Spirit Stone Cave Residence had been consumed by the ban, there were still many furniture made from spirit stones in it, and now those furniture were also missing, however, there were still many spirit stones throughout the cave residence.

These spirit stones were all seventh-grade and eighth-grade spirit stones.

The total number was so large that Omi couldn't count it, especially the seventh grade spirit stones, almost eighty percent of them were seventh grade, and twenty out of the remaining hundred percent were eighth grade.

Omi and the others had already broken through to the Distraction Stage, all the seventh grade spirit stones, Omi and the others were basically useless, only the eighth grade spirit stones could still be used for them to refine one last time.

Omi walked into a hall in the spirit stone cave, there was a portrait of a man hanging in the hall.

"He can't be the Nine Dao Demon King himself, can he?" Tang Huan looked at the portrait and said.

Omi said, "Ten times out of ten, I didn't expect the Nine Daoist Demon King to look like this, huh?"

Omi went up and took off the Nine Daoist Demon King's portrait, and suddenly discovered that there was a small storage compartment behind the portrait, and inside the storage compartment, there were still many things.

"Hey, there's still stuff."

Everyone gathered around, and at the top of the storage compartment was a letter.

The letter was yellow, but it wasn't rotten, Omi picked it up, and it was really heavy with years of sediment.

The letter read, "If you are reading this letter, it means that you have obtained the relics I left behind, congratulations to you. I can't take these things with me, so I'll leave them to those who are fortunate enough to have them. In my life, I have killed countless people and done a lot of bad things, so I hope that those who get my legacy will learn to be a good person. I'm not going to talk about the spiritual stones, but in addition to the spiritual stones, I also left behind 190 scrolls, each of which has a corresponding function on it, to be used at will. The strongest of these scrolls can deal with the Sixth Stage of Tribulation.

It was to deal with, killing was unkillable, but it was enough to be used to keep the other party alive and besieged. In addition to that, eleven heavenly-grade magic weapons and eighteen boxes of various pills, these pills are all very high-grade, and at worst, they are for use by divisive stage powerhouses. Alright, fortunate man, I hope you get these relics and can use them well, I have felt the call to ascend, I'm leaving this realm soon, I hope that when you read this letter, I'm still mixing well in the Immortal Realm."

Omi finished reading in one breath.

Mu Qianji and the others sighed.

Perhaps, when the Nine Dao Demon King left this letter back then, he would never have thought that by the time his relics were acquired, he himself would have already been killed, leaving behind only a bit of his remaining soul.

Omi immediately began to count those treasures.

"Eight scrolls of Heavenly Formation Scrolls, this Heavenly Formation Scroll can trap the sixth stage of Tribulation."

"Nine scrolls of the Gilded Light Immortal Mask, this Gilded Light Immortal Mask is a restraint, the strongest of which can resist the Sixth Stage of Tribulation. That's why among the relics, the Heavenly Formation Scroll and the Gilded Light Immortal Mask are the most expensive."

Omi nodded his head and put away the seventeen most precious scrolls.

"There are also the Green Wolf Scrolls and the Ten Thousand Violet Scrolls, these are the strongest to deal with the Fifth Stage of Tribulation. Twenty-eight scrolls in total."

"There's also the Heavenly Roc Acceleration Scroll, the Ten Thousand Miles Tracking Scroll, a total of sixteen scrolls. This Heavenly Roc Acceleration Scroll and the Ten Thousand Mile Tracking Scroll are both fast, and it says that ordinary Tribulation Sixth Stage may not even be able to catch up. This one is also extremely precious."

"Unfortunately, it only adds up to sixteen scrolls, it's a bit too little."

"Mo is too little, it's better than nothing."

Lu Yuxi asked, "These scrolls are so strong, how on earth did they get made?"

"All of them were sacrificed by some half-immortal masters, according to what they are good at, each scroll was incomparably difficult to form, just like an ordinary sword, sacrificing it to become a heavenly flying sword or above, the difficulty and time required can be imagined." Omi said with a sigh, Omi had also sacrificed magic treasures before, he had spent a lot of energy and time to sacrifice flying swords from primary to advanced when he possessed Immortal Qi, not to mention those ordinary people. Therefore, these scrolls were very precious and could only be used once.

Continuing the inventory.

"Spirit Gathering Formation Scroll, the function of this Spirit Gathering Formation Scroll is that it can gather all the spirit stones in the surrounding area, and the speed of cultivation will increase exponentially, the Spirit Gathering Formation Scroll has no time limit, once it is opened, as long as there is a sufficient supply of spirit stones, it can exist indefinitely. The amount of spirit stones consumed by the Spirit Gathering Formation every day was one hundred seventh grade spirit stones. Spirit Gathering Formation Scrolls, two."

Omi said, "These two Spirit Gathering Formations, I have to build him in the Seventh Sea, otherwise it would be a real waste of natural resources."

"The rest of the scrolls are about to deal with the Thunder Tribulation first to fourth stage."

"Let's count the pills again."

"200 pills of the Returning Spirit Pill and 311 pills of the Jade Hedge Pill."

"Wait, is there an introduction, what's a Rejuvenation Pill? What is Yu Ji Dan? I've been cultivating all this way up here, relying solely on refining spirit stones, and have never used anything else at all, so I'm completely unaware of it."

"Rejuvenation Pill, taking one of these pills will allow our spirit to briefly enter a thought space where we only have complete self, this is very beneficial for cultivation, and is more than ten times stronger than ordinary cultivation."

"Yu Ji Pill, this pill can quickly repair the infant, leaving the infant in its most youthful state, however, it is only effective for ten years."
