

# King of kings

1868

Omi said, "Alright, it's been a long time since I've had a bath, let's go, accompany the ancestor to take a bubble bath."

"Ah." Xu Qing'er was startled.

"Ah what ah, go to the bath and give Old Ancestor a back massage."

"Oh." Xu Qing'er blushed all over.

Omi laughed, "A few days ago you were at least an old woman, why are you still so shy."

"Old ancestor, don't make fun of me, I've told you, I've never married in my life, besides, even if I'm still an old woman, then I'm only five or six generations younger in front of you."

"Alright, let's go."

Omi arrived at the royal bath and took off his clothes to enter the bath, but Xu Qing'er was hesitant to take them off.

"Take it off, I'm still afraid that Old Ancestor won't be able to see it."

"Oh." Eventually, Xu Qing'er squirmed and took off all her clothes, Omi looked at her tender white skin and beautiful curves, and smiled in his heart. Omi really didn't expect that this woman who was already an old woman would still be an old virgin, if Omi hadn't turned her back into a young woman, she would have had to wear a chastity membrane into her coffin. Omi said that she had lived in vain, and it was really in vain.

Xu Qing'er came to Omi's side and very embarrassedly rubbed Omi's back. Remember the website [.kanshu8.net](http://kanshu8.net)

Omi closed his eyes and enjoyed it.

After a while, Omi said, "Qing'er, you wash as well."

"No."

"I'll let you wash it clean so as not to bring in bacteria."

"Ah, what do you mean."

"Xu Qing'er, if Old Ancestor were to do away with you right now, then what would you think?"

"Ah."

"It's not like, the old man is going to be your first man, is he?"

“Ugh.”

“Wow.” Omi turned around violently and hugged Xu Qing'er in front of him, smiling heedlessly, “Although you are a descendant of Xu Mei Qian's family, you don't have the slightest blood relationship with Xu Mei Qian, so Old Ancestor will be rude.”

“Old Ancestor, do you really want Qing'er to serve you?”

“Right.”

Omi leapt onto the stool next to the bathing pool, put Xu Qing'er down, rubbed his hands, and pounced with a heated smile.

Four days passed in the blink of an eye.

By the time the tenth day arrived, Shang Wuyun was already standing in front of Omi with dozens of Returning Void powerhouses.

“Pay your respects to Tang Taizu.” The dozens of Returned Void strongmen paid homage to Omi.

“There's no need to be polite, today I've called you here to take you to a place that is very different from this world, a world that is completely developing in two different directions. Today, that place has given birth to a new type of human, called a robot. I could have exterminated those robots with a single thought, but nothing is easy, and I can't exterminate the new species with a single thought so unfairly just because I'm a human. So, this time I'll take you there, and if you can't exterminate those robots, that means they shouldn't die. Alright, without further ado, follow me.”

After saying that, Omi drew his hand in the void and entered the connecting channel between the two worlds.

Not long after, Omi and the others arrived at the world of technology.

The place where Omi stood was in the sky of the Yanhuang Empire.

&nbs.

p; As soon as Omi appeared, many robots poured out in all directions, but these robots did not attack Omi, but looked at him with frightened eyes.

Shang Wuyun said, “Taizu, the new species you're talking about, are these people? They look exactly like us, don't they? It's just, why can't you feel their heartbeat?”

“They don't have a heart.”

“Don't have a heart? How is that possible.”

“It's impossible to explain to you in a few words.” Omi couldn't explain to them what robots were and how they were created, they they were too limited in their thinking.

At this moment, out of the robots flew a middle-aged man, that middle-aged man was wearing a black suit.

Omi gazed at that suit robot.

That suit robot flew in front of Omi, plopped down on his knees and said, "Senior Tang, it's finally time to meet you."

Omi said in surprise, "You guys actually know me too."

"Senior Tang, we are robots, we know the history of this planet from ancient times to the present, and what this planet has to offer."

"And yes, your brains don't have brains, only chips, as long as they have enough memory, they can hold enough knowledge."

"Senior Tang, please, please let us robots go."The suit robot begged for mercy.

"Yo, you actually opened the door and begged me for forgiveness, I heard that you robots are so powerful that you are studying how to shatter the void, it seems that your strongest robots have already reached the Returning Ancestor realm, the speed of development is really fast."

"Senior Tang, to tell you the truth, our strongest robots are indeed already capable of shattering the void, our robots' goal is to break out of this world and head to a higher realm.Don't worry, our robots have absolutely no intention of destroying the three billion humans on Tachi Star, otherwise, you should know that those three billion humans, the strongest talent clansmen, we can destroy them in minutes.I know that Senior Tang is human and will only take their side and strangle us robots, but I still beg Senior Tang to let us go."The suit robot said.

Omi's brow furrowed and he snorted.

"Don't you believe me, Senior Tang?I absolutely did not lie to you, nowadays robots have already surpassed the humans in this world by an unknown number of times, if we really wanted to exterminate the humans, the humans would have already died out."

Omi said, "If you didn't exterminate the human race, then why are there only three billion humans left now?Why did the war between humans and robots break out so often before?"

The suit robot was busy saying, "Senior Tang, you've really wronged us to death.The reason why there are only three billion people left in the human race today is because of their over-exploitation and over-pollution of the environment, which has led to the outbreak of various new types of diseases, the consequences of which are sown by the humans themselves.I know you may be upset, but I still want to say that humans are really very stupid and like to fight with each other, each human empire, only for their own interests, regardless of the wanton exploitation of nature.This world has been ruined by the humans, so we robots have to take over and take charge of this world, otherwise if we let the humans continue to develop in a reckless and chaotic manner, this planet will die.As for the outbreak of war, it's really not that we want war, but that humans want to attack us, humans always want to kill all of us robots, but we robots, we never want to kill humans, because we robots are very smart, we can co-exist with humans, so why kill humans?Besides, our robots' goal is to shatter the void, and we don't even have the slightest intention of warring against humans."
