

# King of kings

2247

During the last month in the army, there was no more special training and everyone was free to move around.

Omi chose to close the door and cultivate his Sun and Moon Divine Sword.

"There's only one month left, I must enter the depth space, only by entering the depth space will I be able to cultivate the Sun and Moon Divine Sword even higher."

"However, Deep Space isn't something you can enter just because you want to, some people, they only enter it once in their lives, it's simply unattainable."

"Ahhhh, what to do about this."

"Now, Omi already knows that anyone who can enter Deep Space, after reaching Golden Immortal in the future, if they still want to go further, they will not be restricted by the Immortal Court, which is something that countless people dream of. However, it's not something that can be entered just because one wants to."

"No, I must enter the Deep Space."

Just then, Omi remembered something, a spatial tablet.

Previously, when Omi was at the Academy of Immortality, it was very easy to enter the state by entering the spatial tablet for cultivation, but at that time, Omi had never opened the depth space.

Omi immediately took out the spatial stele and entered it.

Sure enough, within ten minutes, Omi entered the depth space again. Remember the website [.kanshu8.net](http://kanshu8.net).

Omi immediately began to practice the Sun and Moon Divine Sword, and his mind became incredibly agile.

Omi didn't know how long it took, but when Omi practiced the Sun and Moon Divine Sword to the 100th level, Omi exited the Depth Space.

As soon as Omi exited the depth space, he realized that only one day had passed in the outside world, and Omi felt that the effect in the depth space was equal to the time spent in the outside world as if it had taken millions of years.

"Yay, great, I've trained the Sun and Moon Divine Sword to the hundredth level, now I'll train the Shura Divine Blade to the hundredth level as well."

Omi entered the spatial tablet again, striking the iron while it was hot, and immediately started practicing the Shura Divine Saber.

When Omi reached the hundredth level, he exited the depth space again and looked at the time, only half a day had passed.

“Haha, the Sun and Moon Divine Sword and the Shura Divine Saber, I’ve practiced to the hundredth level, and now that I’ve combined my two swords to exert their power, I don’t think that those who have practiced to the 180th level may be my opponent.”

“There’s still so much time left, I’ll continue to strike the iron while it’s still hot and practice the Star Shift Technique to the third level as well.”

Omi entered Deep Space for the third time.

Two hours later, Omi exited the depth space and smiled, “Wow, it’s only been two hours outside, and I’ve already practiced the Star Shift Great Law to the third level.”

“It’s just a pity that the Star Shift Dafa only has the first three layers in the Immortal Academy, and I don’t know where to go to learn the next few layers.”

Omi immediately went to find the captain.

“Omi, what are you looking for me for?”

“Captain, I’d like to ask if this barracks has a library?”

“Of course, the military camp’s library, it’s very complete, any spell you want to learn, the Air Tearing Technique, it’s all here, after all, this is a military camp, it’s just that you should rest now ah, it’s less than a month until the army is dispatched, why are you going to toss this.”

“I’m not sure if I’m going to be able to do that, but I’m not sure if I can.”

The captain said, “There are a total of fifty levels of the Star Shift Great Law, and the library in our barracks has thirty levels.”

“It’s only thirty floors.”

“Don’t underestimate it, this thirty layers is no longer something ordinary people can practice, as far as I know, in the entire Immortal Court, all those who practice the Star Shift Great Law, no more than five have exceeded thirty layers.”

“It’s so difficult, not even Immortals?”

“Yes. Including Immortals, there are no more than five that are over thirty levels. Those who have practiced the Star Shift Technique to over thirty levels, ordinary people are no longer able to harm his skin. However, Omi, it’s time to depart in another twenty days, don’t toss it, this two

Over ten days, you haven’t even had time to read the Star Shift Technique once, let alone practice it.”

“No, Captain.”

“Resign yourself to your fate, Omi, I know that inside you are terrified that you’ll never return this time, that’s why you’re crazy enough to want to practice, but you have to face reality, too.”

“Captain, to tell you the truth, I have entered deep space several times in the past two days.”

"Ah, how is that possible, my sister opened the depth space before you, but up until now, the total number of times I've entered the depth space has not exceeded five."

"Anyway, in a word, can you help me lend out the Star Shifting Technique, I want to take advantage of this last less than a month to put up a good fight."

The captain nodded, "Yes, I can help you, perhaps, you are feeling nervous because you are dying, so it is good that you can open the depth space frequently, I must help you."

"Thank you then Captain."

"Wait for me here, I'll be right there."

"Good."

In less than half an hour, the captain came with a huge book that was a meter thick.

"Omi, the Star Shifting Technique of the Military Camp Collection, the first thirty levels of the Technique are all here, so study it."

"Thank you, Captain."

"Remember, the secrets must be returned to me two days before the army is dispatched."

"Yes, captain."

Omi excitedly walked away with the super thick Star Shift Method, this time, Omi was bound to practice him to death.

Omi didn't know how long he had been practicing, anyway, until he really couldn't practice anymore and felt like he was going to explode his brain if he practiced any more.

Thus, Omi only stopped at this point.

Omi exhaled deeply, and he practiced the Star Shifting Technique, up to the 18th level.

Omi didn't know how far he could go after practicing to the 18th level.

Omi exited the depth space and discovered that ten days had passed since the outside world had passed.

"Damn, ten days have passed in the outside world, it shows how long I've spent in depth space."

Omi immediately took the secret and returned it to the captain.

"Captain, it's back to you."

"Uh, Omi, why are you returning it so soon, there's still ten days left." The captain was confused.

"Truth be told, I practiced until I really couldn't practice anymore, I was going to explode my brain if I practiced any more, so I quit the depth space."

“Practicing to the point of exploding brains, how is that possible, practicing a technique to the point of exploding brains, that’s unless, practicing to the point where it’s far beyond the limits of someone in your realm, honestly, how many levels have you practiced to?”

“Hehe, truth be told, I’ve only practiced to the 18th floor.”

“What?You’ve only gotten to eighteen levels?”

“Yeah, what’s wrong with that?”

The captain said in shock, “Omi, I can assure you that you won’t die this time out.”

“Why?”

“Omi, as far as I know, people who have trained to the 18th level of the Star Shift Great Law can’t kill you, even if someone from the late Xuan Xian stage kills you.Because, the 18th level of the Star Shift Great Law can completely divert the attacks of late Xuan Immortal powerhouses.”The captain looked at Omi with the eyes of a monster.

Omi was also shocked, Xuan Immortal?

“Really, now, the Dao Immortal Domain, no matter if it’s early or mid stage or late stage, it’s completely no match for you, and Xuan Xian, can’t kill you at all anymore, but you still have to be careful, Xuan Xian is so much ahead of you after all, even though you can resist Xuan Xian by applying the Star Shifting Great Law at the 18th level, your realm is too low and your consumption is so great that you can’t apply it more than a few times.”

“Mmhmm, I understand, then I’ll go down first.”

“Go.”
