"On these boards, it says above?" Omi asked curiously.

"You can see for yourself, it records each team's mission completion each month. For example, we, Team Nine, have completed our missions on schedule every month." Fen said.

"But, every squad on here has completed their missions on schedule. By the way, what's the status of this first squad?" Omi saw that one of the boards representing the first squad read, "Three thousand eight hundred and eighty-nine."

Fen smiled, "We can't compare this one."

"Team leader, what does this 3889 mean?"

"3889 means that their first team, already on their 3889th mission, wiped out the monsters."

"Ah, total annihilation? Didn't you say that if you kill one, the mission is complete?"

"Yeah, if the weaker team kills one, they can retreat. If the strong ones are strong, they can also annihilate all the demon beasts ah, their first team, they've annihilated them 3889 times."

"Wow, so strong. What about our ninth team?"

"Zero times."

"Ah, we haven't wiped out the monsters once, have we?" Remember the URL .kanshu8.net

"No, Omi, truth be told, actually, our ninth is the weakest, almost every time a newcomer comes, the other groups don't want them, and then we arrange for them to come to the ninth group. After a few hundred years, if the newcomers are strong, the other groups will come and dig them out. For example, I, the leader of the eighth group last month, came to invite me to their group, and I'm still considering it. I'm afraid that if I go to Group 8, only six of you will be left in Group 9, and the survival rate will be even lower every time I complete a mission. That's why, our ninth group, always has such a small number of people, and the other eight groups, the average number of people is around fifty." Team leader Fen said.

"Understood."

Yao Fang also said, "Omi, you are so strong, I think that sooner or later, the other groups will also come to invite you, and then, once you leave, only six of us will be left in the ninth group again."

Omi said firmly, "No way, when I first came here, the others didn't want me, and when I'm strong enough to exercise in Group 9, they'll come and invite me to join, it's disgusting. I swear, I will never go to any other group."

Brother-in-law Ni said, "Omi, words can't be so full, after all, there were many people who said that in the past, and in the end, they still went to other groups."

"Yes, after all, Group 9 is too weak, in Group 9 not only is the death rate high, but the harvest is also smaller."

Brother-in-law Ni asked, "Team Leader Fen, you're not going to go to group eight, are you?"

Fen was silent and didn't answer immediately.

Everyone looked at Fen.

Omi was busy saying, "Team Leader Afen, you can't go to Team 8."

Fen bit her lips and said, "Originally, I was planning to refuse the invitation to Group Eight, but, yesterday, Omi came, Omi's strength is not inferior to mine, I think, Omi can replace my position in Group Nine, so, I'm going to, consider it."

"Ugh." Everyone sighed.

"I knew that you would definitely leave too, our Group Nine is nothing but a tomb for newcomers, and those who can't be strong will stay in Group Nine without an invitation, and there will always be an accidental death if you stay in Group Nine, and there's nothing to gain from Group Nine."

Everyone looked frustrated.

Omi, however, didn't quite understand.

"What you guys are saying.

What's the harvest?" Omi asked.

Yao Fang said, "Every time you kill a demon beast, you may obtain a Hong Meng Beast Core. You should know about the Fetal Pill, and the Hong Meng Beast Core is an essential material for refining it."

"Understood." Omi nodded, what was a Fetal Pill, it wasn't an ordinary thing, it was something that Omi was gluttonous for.

"Ten thousand Hong Meng Beast Cores can be condensed into one drop of Hong Meng Qi, and one drop of Hong Meng Qi will be sufficient to make one Fetal Pill. In the other group, with at least 50 members, they're strong, and they can kill at least a dozen or more every time, or even wipe out all the demon beasts, so that the probability of finding the Hong Meng Beast Nucleus is greatly increased. The other groups, they can find at least two or three or even more Hong Meng Beast Nuclei every time, so that over hundreds of thousands of years, each of them can almost get a drop of Hong Meng Qi from 10,000 or more of them."

"Hong Meng Qi is not only one of the materials used to refine fetal pills, but it can also be taken directly. Taking Hong Meng Qi can strengthen a realm for about five minutes while fighting. Furthermore, any serious injury from taking Hong Meng Qi can be recovered instantly as long as it doesn't involve the Primordial Spirit."

"Omi, if you go to the other groups, you can almost get a drop of Hong Meng Qi in a few hundred thousand years. And in Group Nine, there are only so many people in total, and every month, you can only complete the task of killing a demon beast and how small is the probability of finding the Hong Meng nucleus on a demon beast? If you can't even find one for hundreds of years, I'm afraid it would take tens of millions of years to gather 10,000 Hong Meng Beast Nuclei in Group Nine. At least I've never found a single Hong Meng beast nucleus among the demonic beasts I've killed in Group Nine so

far. Moreover, if you stay in Group Nine for tens of millions of years, you might all die in the claws of the demon beasts.”

Omi nodded his head.

“Also, the more powerful a demon beast is, maybe it possesses two Hong Meng Beast Nuclei, maybe three or four. Such powerful demon beasts must be surrounded by many people to be killed.”

Fen said, “Alright, let’s stop talking, let’s set off to finish this month’s mission.”

Everyone seemed to have a bit of a problem with Fen at the moment.

After all, Fen had just stated that he would probably go to Team 8.

Omi smiled, “Everyone has their own freedom, and we don’t need to blame Fen, after all, that Hong Meng Qi is indeed noble. If it were you guys instead, and the other groups invited you to go, wouldn’t you guys go? And still be stupid enough to stay in Group 9?”

“This.” The group put themselves in Fen’s shoes for a moment and understood.

“Let’s go, let’s finish this month’s mission first.”

Omi and the others, directly arrived at a huge forest of demon beasts.

Fen said, “We’ll walk through the forest, and when it’s about time, the corresponding demon beasts will naturally appear to kill us, and then, after we kill any of them, we can choose whether to escape or continue.”

“En.”

After a few minutes of walking in the forest, finally, suddenly fourteen powerful demon beasts appeared in front of them.

“Ow.” The fourteen demon beasts didn’t rush up at the same time.

Fen shouted, “Everyone, cheer up.”

The fourteen demon beasts, the weakest of them, were similar to Fen, or, similar to Omi, and the strongest of them, were three times as strong as Omi.

The strength of these demonic beasts was not fixed, if Omi’s strength increased, then the strength of the demonic beasts would also be elevated accordingly. This caused, no matter how much it was raised, the strength of the demon beasts was above.
