

King of kings

Chapter 2516

After a short wait, Ernie returned.

“How was it? Which inn still has rooms?”

“Shopkeeper, I’ve asked all of them, there’s really no more, the number of people coming to the Divine Plains You Forest for training has increased again recently.”

The shopkeeper had to say to Zi Ye, “Miss, I’ve tried my best.”

omi said, “It’s really no good, we’ll share a room, you sleep on the bed and I’ll sleep on the floor.”

“I don’t want it, I don’t know you.” Zi Ye firmly refused.

omi smiled, “Then you go out and sleep on the street.”

“Hey, you scoundrel, that room is already mine.”

“I’ll ask you one last time, do you want to share it?”

Miss Violet Leaf bit her teeth and said, “Fine, sharing is sharing, I’m a top-grade god anyway, I’m not afraid of you playing rogue.”

The shopkeeper was certainly happy. The first website m.kanshu8.net

omi and Ziye returned to the room.

omi didn’t play hooligan, when he immediately hit the floor and they spent the night together.

The next day, omi was ready to go out and see how to sell Raider Maps.

“Hey, what are you going for?” Zi Ye asked.

omi said, “I have a name, it’s Wind Light Cloud, not Hello.”

“Wind Light Cloud, don’t you have to go on an adventure?”

“Today off.”

“You’ve only been here a year, haven’t you? Why do you want to take a break after only one year, I hadn’t taken a break for over a hundred thousand years in a row before.” Zi Ye said.

"You're really patient, I'm not, I've been going to the Divine Plains Ghost Forest every day for a year, and most importantly, I haven't improved at all in this year of training, I've run out of patience."

"It's only been a year and you want to improve, you're not taking the calendar too seriously."

"Oh, yeah."

"By the way, Wind Lightning, where have you gone now? You've only been here a year, so I guess you've just gone not far in depth."

omi bowed his head, "Indeed, it took a year to get through a section."

"What." Zi Ye was startled, "It took you a year to go a section deeper? You're bragging, and besides, you're only a middle god, much less this fast."

"This is nothing, I even drew out a Raider map." Saying that, omi spread out a Raider map.

"Oh my god, are you alone? Or a team?"

"Of course it's one person."

"That's by no means possible, which one of the people making the Raider Map now isn't a person who proceeds as a team, only as a team can it be made with the least amount of danger."

"Oh, I'm just one person anyway, I'm leaving to sell the Raider Map."

"Wind Lightning, you can't sell it here without a reputation, you should know that no one will believe that your Raider Map is real."

"Then what do you mean?"

"If you really want to develop in this area and make money in this area, you must first establish a brand of yours to gradually convince people that your Raider Maps are trustworthy before anyone will buy your Raider Maps."

omi smiled, "So troublesome, I'm here to practice, not to sell Raider Maps, since it's so troublesome, I'll forget about it and just concentrate on practicing."

Miss Purple Leaf seemed to see a business opportunity in omi, and was busy saying, "Wind Lightning, I'm not hiding anything, I've made it before!

A strategy map, how about we share in it and earn the liquid of the Hongs, what do you think?"

"Why do you want to share shares with me? Isn't your goal to become stronger?"

"Yes, but becoming strong is not something that happens overnight, if you can earn a large amount of Hong Meng Liquid, even though you can't become stronger, you can still have a very strong power. Truth be told, my hometown, was colonized, and now my people are living

in dire straits, if there is a large amount of Hong Meng Liquid, it can also ease the burden of my hometown."Zi Ye persuaded omi.

omi said, "You think, this money is easy to make?"

"It's not difficult as long as there's a doorway, and you're able to produce a strategy map in a year, you must have a distinguished family history, I'm sure."

"Hahaha." omi laughed.

"Honestly, are you from the God Emperor family?"Zi Ye asked.

"No, but my master is one of the Ten Great God Emperors."

"Ah, so powerful, one of the Ten Great God Emperors."Zi Ye was in awe, I didn't expect that Wind Lightning's backstage was so illustrious ah, Zi Ye felt a bit of a generation gap.

"What?Intimidated?"

"Well, sort of, I wonder if a man as tall as you would look down on a woman from the colonies like me.Well, the joint just now, count me out, and I'll sleep on the floor from now on, and if that's not enough for you, I'll go."

"Why the sudden change so much?"

"Because you are a disciple of the Ten Great God Emperors, I can't afford to offend you."

"Hahaha, Ziba, you don't need to have such thoughts, to tell the truth, before I became Old Sang's disciple, my status was probably even more humble than yours, I come from a small level 28 world, and my world was colonized."

"Uh, no way."

"So, Ziba, we're in the same boat."

"Uh-huh."Zi Ye felt much closer to omi at once.

omi smiled, "Since you want to share shares with me, let's do it, I originally vowed to stop doing business, but now for you, I'm back in business."

"Thanks, you have the Ten God Emperors as your backstage, we can definitely succeed."

"Hehe."

omi said in his heart, "What the heck, I did business once in the Immortal Academy, but I didn't expect that I would come back to do business in the universe.However, this time, the business this time is different, the money earned is the Hong Meng Liquid, and no one has too much of the Hong Meng Liquid.If omi possesses a large amount of the Hong Meng Liquid and brings it back to the Celestial World, there's no telling how many descendants he can cultivate."

For example, if you let the Hong Meng Liquid mix with rainwater and rain down on every drop of land, how many heavenly treasures would the land grow?

How many strong people can be raised from the abundance of heavenly materials and earthly treasures?

So what, how much faster can cultivation be done if the liquefaction of Hong Meng is turned into air and inhaled by immortals?

Therefore, for the future of the Heavenly World, it would be better for omi to earn no amount of Hongshi to even fill the rivers of the entire Heavenly World with Hongshi.

Most importantly, doing business here wasn't just about doing business, one also had to risk one's life to create a strategy map, and the process of making it was also an experience.

"Then how do we start?" Ziba asked.

"There's no rush, let's get to know the market first."

Zi Ye added, "Wind Light Cloud, I must remind you, the entire universe, all the powers are hunting for resources, the Hong Meng liquid is a resource, once you go on this path, it is the same as robbing resources from other major powers, you must be prepared for the possibility of being attacked and framed at any time."
