

KRYPTONIAN: MAN OF STEEL

Chapter 13 Genius Bulma

"No, Bulma, not unless you can help me solve this problem."

Luther used the beauty trick, and he didn't feel ashamed at all. Compared with the benefits, selling beauty is nothing?

Bulma was still young at this time, but she had already shown her talent, her unreasonable talent in black technology.

"What subject?"

Bulma asked immediately.

"This is it. I have found a substance that can stimulate the human body's potential, but the lethality rate of this substance is too high. I want to improve and optimize it."

Luther showed Bulma the Super Divine Water.

"Is this so..."

When Bulma heard that it was about biotechnology, she felt unsure. After all, her education was in mechanics.

From the fact that Bulma can develop various machinery and repair cars on the road, we can see how hard-core Bulma is and how strong her hands-on ability is.

"So I'm sorry, Bulma, go and have some fun yourself."

Luther touched Bulma's hair.

Bulma suddenly softened. After all, she was a woman who could make her daughter go on an adventure alone, just to find the dragon ball and wish for a prince charming. She even dared to shoot and kill. You know what she was capable of in this regard. How strong is the obsession?

At this moment, Bulma had only one idea, and that was to become a useful person to Luther, to make Luther notice her, fall in love with her charm and talent, and then...hehehehe.

Looking at Bulma's hurried away figure, Luther shook his head and returned to research.

We can't just count on Bulma. If Bulma doesn't work, will he waste his time?

Moreover, judging from the fact that Bulma has not solved the problem of fairy bean production for so many years, maybe Bulma is not good at this aspect.

Otherwise, it's impossible that Bulma didn't think of cultivating more fairy beans to solve the problem of Z warriors being injured, right?

During this time, through research and study, Luther had discovered the properties of super divine water.

I don't know how the Cat Immortal got such a thing, but the effect of the Super Divine Water is too overbearing and too strong for ordinary people to bear.

Luther is currently studying the purification, optimization and weakening of super divine water.

Optimization and purification are for himself. He doesn't think that the Super Divine Water has stimulated all his potential. Naturally, he wants better Super Divine Water.

The weakening is to create a better super soldier compound.

At the same time, Luther also mastered the universal capsule technology during this period of study. Dr. Brive didn't know this yet. He was wary of it,

but he couldn't resist Luther being too perverted, so he just followed the clues and traced the source to restore and crack it. technical barriers and blockades.

Of course, Luther did not say such a thing. He had mastered the universal capsule technology and did not intend to bring it back to the Marvel Universe to develop any universal capsule products. This thing was too high-end and not suitable.

He just wanted to see if he could develop a smaller storage device, and then take away as many useful things as possible, such as fairy beans and super divine water.

"It is best to get the spirit tree fruits through the Dragon Balls. Given the background of the Marvel Universe, it is not difficult to find a living planet to plant the spirit tree fruits."

There are so many good things in Dragon Ball, and Luther wants to take them all away.

What Luther didn't expect was that Bulma came to him within a few days and asked for 100 ml of super divine water for research.

Then she confidently took out the finished product and gave it to Luther.

"What's this?"

Luther looked at the bright red liquid that looked like blood in the bottle.

"Brother Luther, this is an optimized drug that I synthesized after analyzing the ingredients of the super divine water. The fatality rate has been reduced by fifty percent!"

Bulma said confidently.

"What's the effect?"

Luther was very interested.

"The injected white rats have become super white rats that can even bite through steel bars. Speaking of which, brother Luther, how did you find such a thing?"

Bulma asked with great interest.

"I found it while searching for treasure..."

Luther has begun working on Bulma's synthesis.

"Brother Luther, you promised me."

Bulma suddenly said to Luther with dissatisfaction.

"...Oh, then where do you want to go to play?"

Luther could only temporarily seal the compound. Anyway, as long as he coaxed Bulma and asked her to help him, he would probably be able to solve a lot of problems, right?

"How about we go to an amusement park?"

Bulma said immediately.

"Um."

Luther had no objection, even if Bulma wanted to go to the haunted house to pretend to be scared, or go to the merry-go-round to get a hug.

Without saying a word, Bulma took Luther and set off, driving to an amusement park she knew. This amusement park was actually her family's property.

The Universal Capsule Company is an unimaginable giant. The industry is of course not just the factories and stores that produce and sell Universal Capsules.

Luther patiently accompanied Bulma through various activities. Anyway, he was not in a hurry and had plenty of time.

Bulma was naturally very satisfied with the game and secretly kissed Luther.
