

KRYPTONIAN: MAN OF STEEL

Chapter 16 Finding Broly

"Come out, Shenlong!"

Luther called out the dragon.

Suddenly, the seven dragon balls glowed, gathered together and flew into the sky. There was lightning and thunder, and the day instantly turned into night. An oriental-style dragon slowly poked its head out from the black clouds.

"Say your wish, no matter what it is, it will come true, but you can only make one."

Shenlong looked at Luther and said.

"Can you bring the legendary Super Saiyan Broly here?"

Luther asked, he didn't want to run that far, and the planet looked very deserted, so even if he wanted to use it, there was nothing he could do.

"Sorry, this wish is beyond my ability."

Shenron replied emotionlessly.

"Tch, can't you even do this... Oh, it seems so. Broly's current combat power should be higher than that of Son Goku after defeating Frieza. If he doesn't agree, he won't be able to teleport."

The Namek Dragon Balls are much more powerful than the Earth Dragon Balls, but there is no way to send Sun Wukong back without his consent.

So, can we just go by ourselves?

Fortunately, he was well prepared.

"Then send me to the legendary Super Saiyan Broly!"

Luther made it clear that he was afraid that Shenlong would randomly find someone named Broly and send him there.

"Your wish is simple and has been fulfilled."

Shenlong opened his mouth and said, and as Shenlong's words fell, Luther suddenly felt a strong pulling force coming from all directions.

This force seemed to have endless energy, tearing apart the space with him in an instant and speeding away in an unknown direction.

Luther only felt that everything around him became blurred, and time and space seemed to have lost their meaning.

His heart was full of surprise and expectation, not knowing what kind of world he was about to face.

However, the strength of this pulling force is not very strong. If Luther wants, he can break free by his own strength. However, he did not do this. He chose to trust Shenlong, believing that it would lead him to the right place.

Just when Luther was still thinking about how long this crossing would take, he suddenly felt that the traction on his body disappeared, and then he began to fall from high altitude.

The friction in the air caused the surface of Luther's body to glow red, but Luther flew up again in an instant and regained his body's balance.

"This planet is Broly's planet?"

Luther's Qi perception, super vision, and super hearing were fully activated, and he instantly felt a powerful and violent Qi, which completely exceeded any Qi he had sensed so far, including Luther's own.

Without saying a word, he flew in the direction of the breath, and then saw a child dragging a huge corpse walking.

Obviously, this is the new version of Broly. The old version of Broly's style is not like this.

The new version of Broly is actually more powerful. The old version of Broly's combat power doubled every year, but the new version of Broly grew exponentially in battle.

If you give him a little more time, he might be able to catch up with Super Blue Gogeta and defeat Super Blue Gogeta.

There was no movement when Luther appeared. There was a biological force field, and supersonic movement would not cause any physical effects. He was just like a ghost, disappearing and disappearing.

Before Broly could react, he felt pain and felt as if his tail had been pinched hard.

Well, Luther was worried that he wouldn't be able to break through the defense, so he directly attacked the Saiyan's weak point, the tail. He grabbed Broly's tail, then cut it off with his heat vision, and then extracted it from Broly's tail wound. A large sample of Broly's blood.

"Ah! Who!"

Broly turned around angrily and looked around, but he didn't find anyone. However, his tail was missing, and the pain in his butt told him that this was not his imagination, so the angry Broly began to bombard the surroundings indiscriminately. Kill the invisible enemy.

It's a pity that Luther had already run far away by this time.

He not only ran far away, but also used his energy to create a huge underground space for himself, and then hid in the underground space.

Luther knew that if he came to Broly, he would not be able to return to Dragon Ball Earth for a long time, so he brought a lot of universal capsules, which stored a large amount of supplies. The most important thing was , he moved his laboratory here.

"Then, let's get started."

Luther planned not to go back until he researched something.

Luther then freed up his lab and began studying Broly's blood samples and cells as well as the genes carried by his tail.

Every day he could hear Broly making a big noise and Broly's anger getting stronger and stronger.

By the way, Luther doesn't need to sleep at all, so he can research without sleep. If Broly has no results for the time being, he can turn around and research the Doomsday gene he wants.

A two-pronged approach is to cultivate a genetic combination of Saiyans and Kryptonians.

Anyway, there was no free time. It was not until the timer hanging on the wall of the laboratory had passed two years that Luther achieved great success!
