

Kryptonian 35

Chapter 35 Luther's top thug plan

Very comprehensive magic, including the magic that Luther wanted to control others.

"The magic system of Dragon Ball is really huge."

Luther looked at the vast sea of magic knowledge. Even if he had a super brain, he didn't know when he could learn it all.

The enhanced memory and thinking speed of the super brain could not help him learn and use these magics quickly.

"The third wish, I want to be able to learn superpowers in the universe!"

Luther said to the elder.

Superpowers can also be learned. In addition to the superpowers that are innate and race-born, for example, the teleportation that Sun Wukong learned is a kind of superpower.

It's just that teleportation can only move with the qi of living things, which is not as convenient as the King of the Kai who can teleport to any place in the universe at will.

And I don't know if this teleportation of the King of the Kai is their privilege or the superpower learned from the God Realm?

So Luther plans to try it.

This time, the Namekian Dragon did not meet Luther's wish because it was beyond its ability.

"What do you mean, magic can be learned, but superpowers can't?"

Luther was puzzled and had to slowly lower the standard.

He felt that the superpower in Dragon Ball that moved him the most was the superpower in the Ginyu Force that could stop time by holding his breath.

If it weren't for the fact that Gudu's combat power was too low, he could be the captain of the Ginyu Force with this superpower.

If this was given to Luther, relying on the super breath that all Kryptonians have, he could hold his breath for an unknown period of time, which would be an infinite stop of time for him.

"It shouldn't be possible for me to get such a BUG superpower, right?"

Luther himself was a little skeptical, until the Namekian dragon fulfilled his wish, Luther reacted.

"No, I really got it???"

Luther's pupils shrank. He had thought that if he failed again, he could only wish for the genes of the Frozen Demon or other rare genes to create artificial humans, but it turned out to be successful!

Then Luther felt carefully and realized that he was tricked by the animation again.

Gudu's superpower is to stop time instantly, but it cannot stop time for a longer time, because stopping time will consume its own energy. (The animation is set to stop time as long as the breath is held.)

He got the ability of the comic version of Gudu, which can stop time instantly, but it will consume his own energy.

The longer the stop time, the greater the energy consumed. This consumption is not gradually increasing, but increasing exponentially.

If stopping time for one second requires 1 unit of energy, two seconds is 10 units of energy, and three seconds is 100 units of energy!

Even if he has infinite physical strength and energy brought by the sun and Doomsday genes, it is estimated that he can't stop too much time at once.

The advantage is that he only needs to slow down to stop time again.

It can be regarded as a superpower to stop time continuously!

More importantly, with the strength of Doomsday's Kryptonian, who can withstand his crazy output for two or three seconds?

In addition, Luther also got a superpower that is more convenient than "travel through time", that is, teleportation. Imagine a place in your heart and you can move there instantly. It all depends on the strength of your own mental power and mental power to determine the distance of teleportation.

Similar to the abilities of mutants Nightcrawler and Red Devil.

In addition to not being able to travel through the world, in Luther's opinion, this superpower is more convenient than "travel through time".

Next, Luther did not return to Earth immediately, but learned the Namek language on Namek, which was considered to be prepared.

After all, when the original plot began, the Great Elder was about to die of old age. The key to maintaining the existence of the Namek Dragon Ball was the Great Elder, and then the other dragons. At that time, new dragons would be selected to have new Namek Dragon Balls.

With the learning ability of Kryptonians, Luther was able to talk fluently with Neru in less than a few minutes, and Neru was a little surprised by Luther's learning ability.

Finally, Luther returned to the Earth of Dragon Ball with part of Neru's body tissue.

"With teleportation, it will be much more convenient to travel in the future, and I can go back to visit Broly..."

If Luther lacks the legendary Super Saiyan gene, he will go back to pull Broly's tail. Anyway, with his speed, Broly will not be able to find it at all unless he stimulates his potential and grows up, and he can't resist.

I don't know what Broly will think when he knows about this in the future.

"Speaking of which, I'm short of a thug. If I kill Broly's father secretly now and then adopt Broly as my older brother, can Broly obey me?"

Luther thought about the scene of himself facing Frieza's army in the future. Behind him stood Broly, the top thug who became stronger and stronger, and then there was the artificial human army that was a mixture of Saiyans, Namekians and Earthlings' genes.

This... I guess he can kill Frieza without even doing anything, right?

"I'm so tempted, but it's not that easy to control Broly."

Luther was thoughtful. It's hard to say anything else. Broly seemed to have been spoiled by his old father, but he was actually a very filial child. It's just that his father was afraid of his power and trained him as a tool for him to return to Planet Vegeta and become the King of Saiyans.

Compared with the old version of Broly, the new version of Broly is fundamentally kind and can be friends with monsters after all. Luther is worried about this.

Is he a good person?

Strictly speaking, Luther felt that he could not be regarded as a good person. He only acted and thought in line with the standards of a "good person" based on the three views of normal people and the ideological education he received in his previous life.

I am not so indulgent that I can do whatever I want as a native of my motherland.

In essence, Luther would not kill innocent people indiscriminately if there was no benefit, but if there was no benefit, he would still kill bad guys indiscriminately. This was a pursuit of psychological and moral satisfaction, and the bad guys would have to die.

So if there was a conflict with Broly one day, Broly might resist him.

"Let me think about it, spiritual magic..."

Luther is still more inclined to control Broly. Of course, forget about Babidi's evil of controlling other people's hearts.

Besides, if he controls Broly, he won't have to worry about Broly encountering magic and superpowers that can control him in the future, right?

"It's decided, first create the androids, and then go collect Broly!"

Luther returned to Earth. Now the Red Satan Army has officially changed its name to the "Emperor Organization" and is powerful. However, all artificial humans absolutely obey Luther's orders, so they are only entrenched in one place and do not rule the world.

Two updates have been restored, and there will be another chapter later. Please read it, vote for me, vote for recommendation, thank you, help the author get the third round of recommendation! ! !

To catch up, just click to the end of the latest chapter. This is the most important. To see if it can be recommended in the third round, just read this. If it can be recommended in the third round, I will still update it twice every day! ! ! ! !
