

Kryptonian 74

Chapter 74 Sneak Attack!

"Decryption of the Power of the Galaxy..."

Luther's super brain performs rapid calculations.

After he obtained Galvatron, he studied with Galvatron for a long time.

Luther would never let go of an opportunity to grow, which is why Karl, the God of Death, found it strange.

On the one hand, he insisted on his own thoughts and thinking patterns, and on the other hand, he let his super brain learn Galvatron's scientific thinking and intelligent thinking patterns, so his performance was very strange.

However, for such a perverted thing as a super brain, even if it maintains two modes of thinking at the same time, there will be no problem. It feels like it has a system and artificial intelligence with it.

"Decryption completed, the power of the Galaxy is initially unlocked."

The preliminary unlocking that Ge Xiaolun had not completed until now was unlocked by Luther.

This unlock is the angel's genetic power and a small amount of void strike ability.

In the original plot, Ge Xiaolun's void strike ability is "Silence". It is said that the anti-void ability subverts the law and can subvert the conservation of energy and the conservation of dark energy.

"Initially unlocked, it is not as good as the Void Controller Hero Core version of Ge Xiaolun..."

Luther continues to unlock, and then there are the permissions originally set by the Super Seminary, which are more difficult than the angels.

But Luther still successfully unlocked it, which took less than a day.

"The super brain is so powerful. Once connected to the super computer, it will completely defeat all the super computers I know. I wonder how it compares to a big clock?"

Luther was still surprised by the speed of the super brain.

Unlocked it so easily?

"Oh, there is another level of authority. What the hell, was it set up by the Space Principal or Dinghei?"

After Luther decrypted the second level of authority, he now has the power of the Galaxy with anti-void capabilities.

However, the lack of a void controller prevents him from defining matter like the Xiongxin version of Ge Xiaolun.

Defining matter is what Luther needs most. Other void and anti-void abilities such as defining space, rewriting concepts, subverting the conservation of energy, etc. are meaningless to Luther.

Only by defining matter can Luther define and modify his Kryptonian genes, Doomsday genes, and Broly genes!

"The King of Gluttony bites and howls..."

If Luther doesn't want to take action against Angel Yan and the others, he can only wait for King Taotie to swallow the void engine to obtain the void ability. Then he will study it and come up with a void controller himself.

"It's not impossible. After destroying more than 80% of the Taotie, the Taotie King Shihao might go back to find Karl, the God of Death, to upgrade... Of course, he might also be scared away by me."

Luther began to think about how to layout.

For example, kill Angel Yan in a sneak attack, let her activate the secondary biological engine to resurrect her, and then study her at that time?

Anyway, being able to modify the dark plane information, even if Angel Yan comes back alive, he still doesn't know who did it, and there is only a small chance that Holy Kesha will be able to detect who did it.

"It doesn't feel good. I'm a little bit unscrupulous..."

Luther sighed, and then secretly found Angel Yan.

He is not a good person to begin with, otherwise why would he coax and sneak attack Broly?

Luther didn't care so much as long as it was for his own benefit.

"I'll help you in the future."

Luther looked at Angel Yan in front of him who still didn't know what would happen next.

He couldn't make a sneak attack, nor could he modify or block his own dark plane information, otherwise he would simply tell Angel Yan and them who attacked them.

"Angel Chase and Angel Yan are both here, two secondary biological engines."

Luther then appeared as a super soldier with black wings and black clothes.

In his hand was a dark alloy sword that he had pinched out at random.

In An Suyin's terms, the angel was not stupid and could definitely guess that something was wrong.

"Who!"

Angel Yan, Angel Chase and Angel Moi were stunned after feeling a huge amount of dark energy.

Then a mysterious man with black wings appeared. The pair of huge black wings looked full of ominousness and evil. He was holding a black sword and slashed at Angel Yan.

Angel Yan is not afraid in the face of danger, even if the opponent is likely to be a third-generation god who is stronger than herself, but she is a demigod, and Queen Kesha's sacred knowledge treasury supports the bonus of computing power, so it is not a problem at all against a third-generation god.

"when!"

Sparks flew everywhere, Angel Yan's pupils shrank, and the opponent's speed suddenly increased. He instantly broke through the block of her flaming sword and struck her Su Yin Armor. This sword split the Su Yin Armor, almost cut off her entire body!

If Angel Chase and Angel Moi hadn't used their swords in time to force each other back, Angel Yan would have died here.

But her current situation is not very good, because it is not due to the divine body, Angel Yan cannot rely on energy to recover quickly, and can only maintain his own life.

Angel Chase and Angel Moi wielded flaming swords to fight against the Black Winged God.

"Dang-dang-dang!"

The flaming sword chopped the opponent's dark alloy sword into pieces. The Black Winged God was about to die under the flaming swords of Angel Chase and Angel Moi. Then another dark alloy sword appeared in his hand, and he burst out again. At that terrifying speed, the two swords passed through his afterimage!

The next moment, Angel Chase pierced the heart with his sword and was nailed to the wall. Angel Moi was kicked far away by him, hit the wall, and then fell.

The Black Winged God picked up the flaming sword on the ground and walked towards Angel Yan.

"Sister Yan..."

Angel Zhui struggled, but soon his head tilted and he died temporarily.

She had a resurrection armor, and she could be resurrected as long as she pulled out the sword.

Angel Moi fell to the ground. The kick from the Black Winged God just now crushed her internal organs and bones. She couldn't die, but she couldn't recover for the time being, and she couldn't move.

Angel Yan stared at the Black Winged God with wide eyes. She had connected to the Holy Kesha and transmitted all of this to the Holy Knowledge Treasury.

"What on earth are you..."

Angel Yan hadn't finished her words when the Flame Sword pierced her heart!

Then Angel Yan's pupils shrank. This is what death feels like.

Powerless... cold...

Eyelids became heavier and heavier, and finally closed.

Luther pulled out the Flame Sword and took Angel Zhui and Angel Yan away for research. It was not advisable to stay here for a long time. With the ability of Holy Kesha, she might force her way through the wormhole in the next second.

But he guessed wrong. It was the clone of Tianji King Hexi who came.

Even if Holy Kesha wanted to come over, it would be too late. It's not that she couldn't do it, but she would have to mobilize the energy of hundreds of stars that burned out in an instant to cross from the Angel Nebula to the Chiwu Star System in the Milky Way in one breath.

The Milky Way is just a remote place, and the Angel Nebula and the Tiandao Star System of the Lieyang Civilization are both huge galaxies that are not much smaller than the Milky Way, so the distance can be imagined.
