

## ***Kryptonian 90***

### *Chapter 90: Frog in the Well*

In any case, Devil No. 1 has been saved, just like the original plot.

Because Ge Xiaolun did not authorize it, Morgana was able to survive on Blue Star. Holy Kesha and the others were guarding the sky above Blue Star. If Morgana dared to leave Blue Star, they would hunt down Morgana.

Now, the difference is that Holy Kesha has withdrawn from the Blue Star and only stayed in the Chiwu star system, even withdrawing from the scope of the moon.

Morgana and Death God Karl are both a little worried about the current turn of events. They want to ensure that Holy Kesha will not run around when they fight. At the very least, they must stop her from moving around.

However, if the battlefield expands into the starry sky, there will be too many variables.

As for the Grand Canyon, they have already witnessed what is called a war between gods today.

Whether it was Luther's casual release of a large number of Ansu Silver Weapons and God-killing Weapons, or Holy Kesha's unparalleled computing power, accurately intercepting every weapon, it was an eye-opener for them.

The Deno civilization was completely shocked. They were like frogs in a well, and they had no idea about the gap between themselves and the angel civilization. The Deno civilization started as a war between each other.

There was only one Lieyang civilization that could barely be regarded as a foreign enemy. At that time, the Lieyang civilization was not called the Lieyang civilization, but was called the Tiandao civilization.

Then the result was that both the Deno civilization and the Lieyang civilization suffered losses. The Deno civilization lost its home, and the Lieyang civilization almost lost its home planet, and it disappeared before it could open its eyes to see the world.

Dukao himself had been frozen for many years before he came to the earth. To say that they were isolated in the country was too much. I can only say that they were similar to the scum that had just emerged from the cage.

Dukao's information about angels can only rely on the records of the Super Seminary and asking Di Leina, a person from the Lieyang Civilization.

The original plot was so outrageous that it was planned to use three stages of god-killing operations against Holy Kesha in the sacred realm of Holy Kesha, and control Ge Xiaolun, Liu Chuang and Di Leina through the backstage authority of the Super Seminary.

Luther didn't know how the person involved, Holy Kesha, could not hold back his laughter. Anyway, he felt that if he were Holy Kesha at that time, he would definitely not be able to help it.

"I didn't expect the angel civilization to be so powerful. What happened to the Kryptonian civilization?"

Dukao said with a solemn expression in the conference room of the Black Great Wall Base.

"Kryptonian civilization first appeared in a broadcast. We have analyzed this broadcast and found that it was broadcast by invading and controlling all radio signals on the entire earth, but it was not taken seriously at that time."

After this incident, Lianfeng had already started investigating the Kryptonian civilization and angel civilization.

It is a pity that among the information of the Super Seminary, there is only part of the information about the angel civilization. It is already a great thing to be able to record Angel Yan, the sacred left-wing guard. Angel Yan was discovered when he first came to the earth.

Then Dukao compared the database of the Super Seminary and learned the identity of Angel Yan.

It's just that the information they recorded has lagged behind for who knows how many years.

"Mr. Luther of Kryptonian civilization, Mr. Luther of Kryptonian civilization, I am Angel Yan of Angelic civilization..."

"Our angel civilization hopes to continue trading with you, and we are willing to add three super gene engine materials."

The broadcast was replayed by Lian Feng.

At that time, Dukao just asked Lianfeng to pay attention to it, and left it alone until the culprit was found.

Now that the power of Kryptonian civilization has been demonstrated through the angel civilization, it has naturally attracted attention.

"Judging from this broadcast, it seems that the holy left-wing guard of the Angel Civilization is looking for a deal with the Kryptonian civilization? And the content of the transaction is probably unusual."

Dukao expressed envy, jealousy and hatred, and the Deno Civilization and Super Seminary were so poor that their eyes were red.

As a result, the top super-god civilizations are trading, and the super gene engines are just gifts?

"Rena, what do you think?"

Dukao looked at Di Leina and asked, he couldn't tell what information.

"Ah, Uncle Du, I don't know this..."

Di Leina was still thinking about the main god of Krypton she saw during the day. No matter in terms of strength, appearance or status, the other person had achieved the ultimate goal of a civilized main god and king. Di Leina felt that she had the same status as him, but was inferior. So much.

She felt like a huge failure, and then she envied Luther.

The God-King of Krypton left a very deep impression on her.

It can be said that Luther's strategic goal has been achieved. At least Di Leina has a psychological impression of his power.

This caused her to be subtly affected by this impression in the future.

"Doesn't the Sun civilization have information about the Kryptonian civilization?"

Dukao asked Di Leina, of course, because he wanted to see if the Lieyang civilization knew about the Kryptonian civilization.

"Sorry, Uncle Du, before this, I have never heard of a super-divine civilization like the Kryptonian civilization in the known universe. Maybe it was another super-divine civilization supported by the Space Principal when he was still there? "

Di Leina shook her head and said.

She didn't lie, she really didn't know.

"However, I have already passed all the information back to Pan Zhen. Maybe Pan Zhen will know about the Kryptonian civilization."

Di Leina continued.

After all, Pan Zhen is the regent of Lieyang Civilization. The database of Tiandao Tower is undefended to him and he can read everything.

With the size of the Lieyang civilization that has existed for such a long time, if they don't know about the Kryptonian civilization, there will be nothing they can do.

"Really? I see. I look forward to Mr. Pan Zhen's reply."

Dukao nodded, and then thought about it. What Dilena just said was not impossible. After all, their Denor civilization rose in this way.

The Shenhe civilization opened super-god academies everywhere, leaving behind many legends of the gods of the Shenhe civilization and the super-god civilizations supported by the super-god academies.

Don't think that there are few, but only a few civilizations have emerged at the top.

This is the case with the Lieyang civilization, the Denor civilization, and even the rise of the angel civilization only after contact with the super-god academy.

No one knows why the Shenhe civilization is so generous and spreads the technology of gods and super soldiers to the known universe.

Some civilizations think that the Shenhe civilization is to deal with the physical war between the Shenhe body, the beast body and the triangle body, in order to ensure that the Shenhe body civilization can suppress the beast body civilization and the triangle body civilization.

Some civilizations also think that the gods and super soldiers technology spread by the super-god academy must have problems. They are influencing the known universe in their own way, causing the technological development of the entire known universe to go astray.

If there had not been the influence of the Super Seminary, perhaps the current technology in the known universe would be a flourishing and diverse place.
