

Chapter 897

Chapter 897

The Illuminati doesn't forgive, or forget. For some reason, they took the Amazon thefts personally, despite its negligible impact. Maybe it was that all the other players were regionally invested while the Amazons seemed to be dog-piling them. The fact that Amazons had existed in Europe for nearly 2500 years either didn't occur to them, or they didn't care.

Flash forward to the start of the 20th century. Through the discrete use of marriage-assassination, land grabs and the basic lawlessness in the Western United States, rural South America, Australia and the islands of Southeast Asia, the Amazons had grown vastly in numbers and economic influence.

The Egyptians come knocking once more. Unlike past encounters, they were bringing an offer of alliance. The Illuminati controlled key assets in the British Empire and were using those chokeholds to eliminate their rivals. This was not news to the Amazons. Their holdings in India and the Dutch East Indies had been under

pressure of the Illuminati for a century.

Ever since the Illuminati nearly ground out the Thuggee(one of the 9 Clans), the Egyptians and Amazons have been constantly harassed. This was not the first warning the Egyptians had brought. The Amazons hadn't want a war with the Illuminati and they certainly didn't trust the Egyptians. This time they agreed to go to war though.

Why? Two things-totally unrelated. First, the Illuminati and the Seven Pillars of Heaven had agreed to carve up Asia. Amazons lived in Asia and they were no man's chattel. Secondly, the Women's Rights movement was in full swing. The Amazons had nothing to do with it. Those were outsider females. What interested the Amazons were the legal ramifications of Women's Equality.

The Amazons were poised for a massive increase in their financial footprint. With the Illuminati out of the way, or at least, preoccupied, they could seize assets and have time to fortify before they could be attacked. Women's Equality would allow this to take place. Basically, the Amazons were going to exploit the blood, sweat and tears of women to advance their agenda.

From all accounts, the only groups that recalled the Amazons last foray into Secret Society politics were the Amazons and Egyptians. Certainly no one had enlightened the Condottieri. They started smacking around some Amazon bases in Europe and unleashed 'Hell on Earth' . With the help of the Egyptians, they got to it in Amazon fashion.

A General of the Condottieri and his family were eating at a Naples eatery when five women dresses like nuns walked in and shot up him, his entire family plus some bodyguards. When the response team showed up, they killed them too. A few police were added to the obituary column as the Amazons escaped. Welcome to Amazon warfare.

The Condottieri were furious over such a public breach, as well as the losses. They swore a vendetta. The 9 Clans happily informed the Condottieri that a 'War of Extermination'was the Amazon default setting. The Condottieri were not afraid -not yet. See, there was another secretWW@W.nu0&0WoRM.0om

society called La Solidaridad.

Working on intelligence from the Illuminati, La Solidaridad overran an Amazon compound in Argentina. They thought it would be funny to take the survivors as sex slaves. Maybe the Illuminati was experimenting to see just how pissed-off Amazons could get. Maybe La Solidaridad hadn't read their Homer, especially those parts concerning Ancient World vengeance.V0w.N0velw0rM.c0M

It took the Host six months to start things rolling then the carnage began. They made damn sure the men knew they were being hunted by women. They weren't there to out-macho the men, or make a point. Every night, they attacked the men and their families in the cities and towns. For safeties sake, La Solidaridad retreated to their country estates. Hug e mistake.

A good number of them had to have hunted at some point in their lives. How they missed being 'flushed out into the open'was beyond me. Out in the countryside, there was nowhere to hide. Walls meant little because Amazons were incredibly fit and trained to fight at night. Most of the families

the Amazons killed. They were the lucky ones. The survivors? By using a new Edison device, they took some home movies of the fates of those men.

The Amazon's favorite tact ic was to shove lit sticks of dynamite in the men's asses then steer them toward the closest river. One guy actually made it. His relief didn't last long. The Amazons had done something to turn the normally safe caiman population into rabidly aggressive swarmers. Bitches-insanely, sadistic bitches.

In eighteen months, La Solidaridad had ceased to exist as an organization and never recovered. The Illuminati used that time wisely to beat down the Egyptians, Earth and Sky, and the 9 Clans, aided by the Seven Pillars. Having concluded their first order of business, the Amazons sent their home movie to the Condottieri.

It wasn't mercy toward the Condottieri. I was psychological warfare. The Amazons needed the Condottieri off-balance so they could go after their real enemy. It seemed the Illuminati had instructed La Solidaridad on how to 'intimidate'the Amazons-through rape, torture and enslavement.

Specifically, it was Cael O'Shea who set the tragedy in motion-Granddad.

Beyond Granddad being impossibly fucking old, he had possessed some seriously out of control animosity where Amazons were concerned. Before the Amazon's could implement their hunt, the 9 Clans intervened. The Illuminati had been giving them real problems and they saw a way to gain some breathing space. Had the Amazons and 9 Clans been in communication, the World might be a very different place today.

Instead, the heir to the Austria-Hungarian throne was wacked by the Black Hand, some Serbian numbskulls took the fall and the rest of us got World War I. Oddly enough, this one murder accomplished the goals of the 9 Clans, Amazons, Egyptians and Earth and Sky Society. The British Empire still stood, but was wrecked. China was much worse off than that.

Before the Amazons could gain their vengeance, the Egyptians negotiated a cease-fire between groups. The Amazon Council was furious yet unwilling to fight the Illuminati alone. They kept down their

bile... and waited. In the post-War period, the Amazon/Illuminati feud ate much of their resources(probably the Egyptian's intentions all along).

A truly dark side of this struggle was the Amazon support for the Nazis. Did the Amazons switch course? Yes, but not for the reasons most people would think. Jews, gypsies, communists and homosexuals going into camps didn't worry them one bit. What did? Let's go back in time to those women in the Swiss Alps who headed north.

A great many of them went North then East... to places like Poland, Belarus, Lithuania, Latvia and Estonia. It wasn't so much a matter of whimsy as one of terrain and population. All the best farmland was in western Germany, the Low Countries and France. That's where the Germanic peoples settled. Behind them, to the East, were the Slavs.

steal their dank swamps, deep forests and isolate meadows.

Sometime in early 1939, right after the Third Reich snatched up Bohemia, some Amazon augur decided to open up Hitler's Mein Kampf to see what was going on i. e. to see when Hitler would get around to jumping on England-the whole reason the Amazon were supporting him. What she found out was bad, bad, bad! The genocide of a bunch of people they could care less about? Not a problem.

Invading the Slavic lands? What? Russia/Soviet Union hadn't been the big foe in WWI and they certainly were not Germany's greatest enemy at the moment-Britain was! Drang Nach Osten? That was an undefined migration of Germans back into Slavic lands that ended over 600 years ago? Their Eastern European sisters were in grave danger from a lunatic.

The common sense response (for Amazons)was to kill the Hitler. They couldn't get close, so they took their problem to their old allies, the Egyptians and 9 Clans. Those two saw nothing wrong with the way things were developing. The Amazons swallowed

their pride and went to the Illuminati who seemed rather enchanted with the idea of the fascists and communists annihilating one another.

They had no way to safely approach the Soviets. Pulling their sister houses out of Eastern Europe was no longer an option-the other Secret Societies would be looking for that and try to figure out where the Amazon home bases were. The Amazons decided to make a fight of it. They were not going to charge panzers with spears.

No, they started setting up caches of supplies and weapons in the most inaccessible places imaginable. The hope was that as Nazi Germany was grinding Communist Russia to dust, they could smuggle out their people in the chaos to Sweden then points west. The problem was W W II didn't work out that way. Great Britain got spanked at Dunkirk and Poland, France, Belgium, Denmark, the Netherlands, Luxemburg and Norway all surrendered to the Nazi blitzkrieg.

Then the Germans invaded Yugoslavia and the Soviet Union. Yugoslavia went under, but the Soviet Union didn't fall. Much to the

Amazon Council's horror, resistance units began to interact with the local Amazons in an effort to improve their mutual survivability. Tales of mysterious female fighter, appearing to slay their enemies then disappearing into the wilderness filtered to both the Stavka(Russians) and SOE (British).w0w.f0o0elw0o0m.00m

The SOE discovered an answer to the mystery in mid-1942, by way of the fledgling US OSS. The Americans 'found'three female Army recruits who volunteered for such a mission. A month later, the partisan bands with those agents found the 'Forest Women' and all the lights came on. Unknown to the public World, the Amazon Council decided that the best hope for their kinswo men was to bring down the Nazis and ride out the Allied conquest.

All of that might have been a happily little footnote except for what happened next. Hundreds of Amazons fought-no surprise -yet they didn't fight alone this time. Menand women of the local populace fought side by side with these lethal warriors. They shared battle plans, food, fire and medical care. That huge cultural barrier created over two and a half millennia began to erode.
