

Last Building on Earth Chapter 111-115

Chapter 111

Li Haotian pulled the Orion bow in his hand, three light arrows appeared, shot out in the air, pierced through the three evil spirit goblins, dragged their bodies and flew backwards.

The Iron Army launched "Shield Strike", and the vajra shield in his hand flew out with tentacles, hitting an evil spirit goblin in the head with a "bang".

The head of this evil spirit gob was hit, shattered on the spot, and exploded like a severely hit watermelon.

Gu Manyao, Zhao Lei, Zhang Haofei, Bai Yan and others rushed up one after another.

Bai Yan, relying on convention, first launched the "Wizard Blood Spray", and a large amount of witch blood was sprayed out like a rain of blood. The dozens of evil spirit goblins facing him were shrouded in the witch blood, and then his right arm turned into a giant blood sword. Chop down and kill an evil spirit goblin.

With everyone's current strength, the dozens of evil spirit goblins standing in front of them were vulnerable, and Wang Xuan, who rushed the fastest, quickly approached the evil spirit's nest.

At this moment, a faint whistle came from above, and a black flame about the size of a football suddenly appeared, smashing down from above.

Wang Xuan instinctively felt uneasy, he raised his head suddenly, and this flaming black fireball appeared less than one meter above his head.

The speed of the black fireball was too fast, and he had no time to dodge. Fortunately, the two metal tentacles he split out, one of which was coiled above his head, since he knew that the evil spirit mage could be born in this nest of evil spirits, he was in Beware of possible ranged attacks.

At this moment, a black fireball suddenly appeared. Although he was not surprised, the metal tentacles hovering above his head met him and hit the black fireball with a slam.

A huge black flame exploded everywhere. Wang Xuan was too close to avoid it completely. The black tiger helmet on top of his head was splashed by the sparks from the black flame.

This black flame is very terrifying. The sparks splashed onto the black tiger's helmet and immediately began to burn on the helmet.

Wang Xuan reacted quickly, stretched out his left hand, tore off the black tiger helmet that was burning with black flames, and shot out another metal tentacle like a javelin, stabbing into the oncoming evil spirit's nest, and then bent the tip of the metal tentacle like a hook and hooked it. The nest of evil spirits, he pulled his right hand, jumped up, and flew into the air with the help of the pulling force of the metal tentacles.

He looked up and noticed that at the top of the 20-meter-high Evil Spirit Nest, a pitch-black monster appeared.

Compared with ordinary evil spirit goblins, this monster is two meters tall and looks more like a violent goblin that was invaded and infected by evil spirit power. Another black flame burned on the black staff, which converged to form a football-sized black fireball.

There is a group of evil spirit goblins guarding it around it, protecting it like the stars and the moon.

Wang Xuan knew without the eyes of a picture book that this guy must be an evil spirit mage.

With the help of the metal tentacle, Wang Xuan jumped up five meters in a vertical direction. Another metal tentacle shot out, stabbing a higher part of the evil spirit's nest, and then hooked it. A pair of long arms, replaced up and down, climbed up along the nest of evil spirits.

The evil spirit mage standing at the top showed a second black fireball and smashed it towards Wang Xuan who wanted to approach.

At this moment, Wang Xuan's Illustrated Eye has captured its data.

"Name: Evil Spirit Mage, Race: Evil Spirit, Danger: ★★★☆, Evil Spirit Mage evolved from the violent goblin infected by the power of evil spirits, it not only inherits the ** of the violent goblin Power, and the ability to control the fire of evil spirits. The fire of evil spirits is very scary. Once burned, it is difficult to extinguish. The only way is to avoid the fire of evil spirits as much as possible. The disadvantage is that the evil spirit mage is casting evil spirits. The fire takes a while, it can't be cast instantly, the best way to deal with the evil spirit mage is to approach it, interrupt its casting, and make it unable to fire the evil spirit fire."

The information about the evil spirit mage appeared in his mind. Wang Xuan watched the second black fireball appear above his head. The evil spirit mage also understood that among the crowd, only Wang Xuan could threaten it, so he attacked twice in a row. The target is Wang Xuan.

The remaining seven people slowly approached the nest of evil spirits while resisting the evil spirit goblins that were madly surrounding them. Li Haotian, the center of the seven people, with a solemn face, raised the Orion bow in his hand and pulled it open round. At the limit of the moon shape, a giant light arrow with a length of two meters took shape, locked the evil spirit mage above, and shot it violently.

This giant arrow of light dragged the white light and came down instantly, and the evil goblins who were protecting the evil spirit mage rushed up desperately, blocking the evil spirit mage with their bodies.

This giant light arrow shot through the bodies of the two evil spirit goblins in a row. The strength was slightly weaker and the speed slowed down, so it was easily avoided by the evil spirit mage.

Li Haotian sighed secretly, this two-meter giant arrow is powerful, but every use requires a lot of energy, and he can't use it continuously.

With the help of two metal tentacles, Wang Xuan climbed up the evil spirit's nest. When he saw the second black fireball appear, it moved sideways in an instant. Although the black fireball shot at a fast speed, he wanted to hit it from the air. The current Wang Xuan is very difficult.

The two metal tentacles controlled by Wang Xuan are like two extending arms, which are far more flexible than ordinary people's arms. Three black fireballs attacked, all of which were avoided by him.

He quickly approached the top of the evil spirit's nest, and the metal tentacles swept out into the sky. The evil spirit goblins standing on the upper edge were beaten and fell into the sky. He shook his body and stabilized. Standing in front of the evil spirit mage.

The evil spirit mage realized the horror of the enemy in front of him, and it was too late to condense the fire of the evil spirit. He held the black staff in his right hand and smashed it towards Wang Xuan, who came up.

Wang Xuan stretched out his right hand, the metal tentacles rolled backwards, and went up along his right arm, immediately turning into a giant demonic beast arm, and with a bang, he punched the black staff that came over.

The black staff broke and flew out. In melee combat, the evil spirit mage suitable for long range was only slightly stronger than the violent goblins, about the level of the sub-body. How could he be Wang Xuan's opponent?

One punch broke the black staff, Wang Xuan took a step forward, and the second punch came out. An evil spirit goblin rushed forward, trying to use his body to protect the evil spirit mage. Wang Xuan punched the evil spirit brother with this punch. Brin's chest hit the evil spirit mage again.

The evil spirit mage screamed, his chest collapsed in immediately, screamed and fell backwards, falling from the nest of evil spirits.

Wang Xuan immediately put away the giant arm of the beast, the metal tentacles reappeared, rolled forward, and immediately wrapped the flying evil spirit mage, using it as a weapon, and swung it to the side.

A group of evil spirit goblins standing above were hit by the evil spirit mage, unable to withstand the force, and fell down one after another.

Wang Xuan rolled the evil spirit mage and kept smashing it to both sides, and soon smashed the group of evil spirit goblins above it, and the evil spirit mage who was caught by the metal tentacles suffered from these repeated impacts, and his bones were already broken. The meat was rotten and burst into a mass of meat sauce.

After killing the evil spirit mage, Wang Xuan jumped and jumped down from the evil spirit's nest more than 20 meters high, showing the giant arm of the demon beast on the right again, punching towards the evil spirit's nest.

With a "boom", the Nest of Evil Spirits could not withstand the power of the giant arm of the beast, and immediately burst a huge gap, with a large amount of juice splashing out.

With the previous experience of dealing with the Goblin Mother's Nest, Wang Xuan is very familiar with it this time. The giant arm of the beast exploded with powerful force, and kept blasting inward, creating a flesh-and-blood channel along the evil spirit's nest, towards the evil spirit's nest. The central heart area is close.

Gu Manyao, Zhang Haofei, and Zhao Lei slowly approached, guarding the flesh-and-blood passage that Wang Xuan had struck, blocking the evil spirit goblins that rushed forward.

This group of evil spirit goblins with a danger level of only two and a half stars is not enough to threaten the current crowd.

Wang Xuan quickly opened a flesh and blood passage leading to the central area of the Evil Spirit's Nest, and saw the huge heart inside.

Because it was polluted by the power of evil spirits, the heart was black. Wang Xuan could hardly see in this flesh-and-blood channel. He could only rely on the assimilation of magical beasts and hearing to capture the sound of the heart beating to determine the direction.

He activated the strongest pair of beast arms, both of which turned into giant arms of beasts, attacked one after another, and quickly smashed the heart of this nest of evil spirits.

As the black heart was smashed, a large amount of juice began to seep out, and the nest of evil spirits, like a small hill, began to melt.

A large amount of black juice rushed out along the flesh and blood channel that Wang Xuan had just opened, penetrated into the ground and disappeared. This evil nest was like a leaking ball, shrinking down at an alarming rate.

Wang Xuan picked up a white scale that emerged from it, felt the energy fluctuations in his body, put away the giant arm of the beast, and rushed out from it.

Outside, the surrounding evil spirit goblins were all killed one after another, leaving only a corpse on the ground.

After these evil spirit goblins were killed, the power of the evil spirits in their bodies disappeared, and the corpses gradually turned from black to their original green.

Zhao Lei, Gu Manyao, and Zhang Haofei began to pick up the crystal scales dropped by these evil goblins after they were killed. A total of 57 crystal scales were harvested and handed over to Wang Xuan.

Wang Xuan put it away. The number of scales he has now has reached 942.

Looking at the nest of evil spirits again, the black juice inside completely leaked out and penetrated into the ground, leaving only a piece of skin as thin as a cicada's wings. Everyone tore the skin apart and saw a giant meat cocoon inside.

Zhao Lei opened the cocoon with a fish scale knife, and a box appeared inside.

This is a copper chest. It is not small in size. The surface is covered with rust. It looks rusted. This rust treasure chest is the reward for their mission.

Although the danger level of this mission is marked as four stars, it is not too dangerous in Wang Xuan's opinion. If it is difficult, the only danger is the first black fireball fired by the evil spirit mage. Fortunately, I have As a precaution, only the black tiger helmet was burned.

At that time, if he was a little careless and was hit by the black fireball, it would be dangerous.

Wang Xuan opened the rust treasure chest with a metal tentacle, and what he saw was a knee pad covered with green scales.

Wang Xuan's heart skipped a beat, he hurriedly opened the eye of the illustrated book, and he captured the information on this knee pad covered with green scales.

"Name: Goblin Knee Pads, Quality: Second-Order Excellent, Introduction: Made with yellow rhino skin scales grown on the surface of the violent goblin body, nano crystals are added to it, nano crystals can be activated through blood, scales and yellow rhinoceros The double defense of the leather makes the Goblin kneepads have a very good defense effect, which can completely resist the slashing of ordinary swords. Function, before the crystal energy is completely depleted, the damaged area can be automatically repaired up to one-third of the knee pad. A specially manufactured energy crystal is embedded in the goblin knee pad, which can improve the wearer's physical fitness by 15%."

Looking at the goblin knee pads, Wang Xuan's face showed a hint of joy.

He now has Goblin Scales and Goblin Gauntlets on him, and now with this Goblin Kneepad, that's a three-piece Goblin suit.

Between the same type of equipment, set attributes can be improved.

In addition to this goblin knee pad, Wang Xuan noticed that there was a rolled up parchment and a light green crystal the size of a fingernail in the patina treasure chest.

Seeing another piece of parchment, Wang Xuan was slightly startled, picked it up, opened it, and saw "Mission Name: Goblin Redemption, Difficulty: ★★★★★"

Although the title of the mission is the same as Goblin's Redemption, the difficulty has increased by one star to five stars.

Wang Xuan understood what this meant.

Look at the introduction of the task content.

"Destroy five primary evil spirit nests infected by the power of evil spirits, UU read www.uukanshu.com to find an intermediate evil spirit nest, destroy this intermediate evil spirit nest, destroy the evil spirit's heart in it, and rescue Goblin clan, reward bronze treasure chest."

The introduction of the task content is very simple. The reward is a bronze treasure chest. This should be a treasure chest that is one level higher than the current copper rust treasure chest. There may be better treasures hidden in it. However, looking at the difficulty of these five stars, Wang Xuan understood the danger of this mission.

Put down the parchment, pick up the light green crystal, and open the eye of the illustrated book to capture the data.

"Name: Goblin mechanical armor, quality: initial state, the initial state armor that can be used to equip mechanical beasts, with this layer of mechanical armor protection, mechanical beasts will have a stronger body and stronger defense capabilities. "

Sensing this information, Wang Xuan looked at the small pale green crystal in his hand and understood that it was for the use of mechanical beasts.

"Wang Xuan, what is this?" Zhao Lei was a little curious. He could see the goblin knee pads at a glance, but he really didn't know what the light green crystal was.

Gu Manyao had some impressions and said, "Is it also a powertrain?" She remembered that when Wang Xuan obtained the initial powertrain, it seemed to be this kind of small crystal, but the color was different.

Wang Xuan said, "It's for Xiaogai." As he spoke, he opened his pocket and took out Xiaogai's mechanical beast heart.

The heart of this mechanical beast split open, revealing the crystal face list inside. There are six slots on the crystal face list. The powertrain has been inlaid in the center slot, and the remaining five slots are surrounded by pentagons.

Chapter 112

Wang Xuan knew before that these five slots can be equipped with five different types of mechanical crystals, which can be used to improve the capabilities of mechanical beasts. This mechanical armor is one of them. He put the green crystal in his hand into one of the slots. , then activated the mechanical beast and threw it out.

The heart of this mechanical beast was faintly glowing and squeaking. There were countless gears rotating on the surface, expanding continuously, combining to form a mechanical body, extending its limbs and falling to the ground, turning into the appearance of a mechanical dog.

Immediately following the appearance of circles of green light in its body, everyone watched as green scales appeared on the surface of its body. These green scales continued to emerge, combine with each other, and cover them layer by layer. , limbs and tail, its body is covered with a layer of heavy armor.

This armor is somewhat similar to the goblin scales worn by Wang Xuan, with green scales on the surface, but the green scales are much larger.

After Xiao Gai was equipped with this Goblin Mechanical Armor, her body became a whole lot bigger. In comparison, her head and limbs were much smaller, and the whole shape became a little weird.

The body is covered with this layer of mechanical armor, and Xiaojiao's defense ability has been greatly improved. Wang Xuan understands that when he is in a state with it, this layer of goblin mechanical armor will also cover his body, allowing him to Get stronger defense.

Everyone was watching the changes of Xiaojiao, Gu Manyao praised: "This mechanical beast is really amazing, even like us, it can also wear armor, if Xiaojiao is now with you, you are not equivalent to having double armor protection. ."

Wang Xuan nodded towards her and waved at Xiaojiao, who immediately ran to him happily.

Reaching out his hand, he gently touched the dense green scales on Xiaogai's back, and said, "With an extra layer of this goblin mechanical armor, it looks a lot bigger, but it's a pity that it still lacks limb armor, otherwise it would be true. can be used as a mount."

The limbs of the little boy now seem to be a little shorter. Even if Wang Xuan wants to ride on it, he feels a little shorter and looks a little weird.

Zhao Lei picked up the parchment that Wang Xuan had just put down, unfolded it and looked at it carefully, and said, "I can't think of a successor to this Goblin Redemption mission, but it's more difficult, and it has reached five stars. Do we want to continue?"

Li Haotian was taken aback and said, "Five-star difficulty? This is beyond our ability. It would be dangerous for us to complete it."

Zhang Haofei glanced at him and said, "Li Haotian, you are so timid, the higher the difficulty, the better the reward."

Wang Xuan put the little girl away, put it back into his pocket, and said, "Normally speaking, a four-star level is compared to an adult body. The difficulty of this five-star level is beyond the level of an adult body. It's too hard for us to try now, we'll have to wait for everyone's strength to improve. Let's talk about it at one level."

Although Wang Xuan also wanted to get the reward from the bronze treasure chest, he knew that this five-star difficulty mission was definitely not a joke. A little carelessness could lead to a catastrophe, and even the best reward is not as important as life.

Seeing Wang Xuan say this, Zhao Lei nodded, rolled up the parchment again, and handed it to him.

Putting away the parchment, Wang Xuan took off the white python knee pads he was wearing and put on the goblin knee pads he had just obtained.

Both of them are second-tier equipment with the same attributes, but they are different for Wang Xuan. Sure enough, as he put on the goblin knee pads, the energy crystals in the knee pads immediately matched his goblin scales and goblin armor. The energy crystals in Lin Hu's hands resonated, and the energies between them were combined, increasing the abilities of these three pieces of equipment by one percentage point.

Now the goblin scales he wears have increased his stamina recovery rate by 17%, the goblin knee pads have increased his stamina from 15% to 17%, and the goblin handguards have also increased his strength by 17%.

The extra white python knee pads were given to Gu Manyao, and with the tiger claw boots she originally owned, she now has two pieces of second-order high-quality equipment on her body.

Wang Xuan's second-order fine-quality black tiger helmet was burned by the fire of the evil spirits, and he could no longer wear it. He felt a little awkward because of the lack of a helmet. He could only wait to go back and buy one and two Ordinary quality iron helmets are worn first.

As for the second-order sophisticated helmet, you need to hunt monsters to get it. It has a certain randomness and cannot be obtained at any time.

"Gene Era"

"Let's go, next time everyone is stronger, let's do this Goblin redemption mission." After Wang Xuan finished speaking, he turned around and walked towards the dark passage back.

The other seven followed one after another and walked out along the 100-meter-long dark passage, but they saw that in the passage outside, the corpses of the goblins that were all over the ground were gone, even the one whose limbs were broken by Wang Xuan. The Violent Goblins are gone too.

Before, Wang Xuan was afraid that killing it would affect the mission, so when he entered the Goblin world, he abandoned it on the ground and did not kill it.

The place became silent, and no one was seen. I wonder if the two groups of people who left earlier said something to the newcomers outside. For so long, no newcomers dared to come in.

The eight people went back to the mall along this passage. There were quite a few newcomers here. The two teams they drove away before were gone, and they should have left.

Leaving the East District, Zhang Haofei didn't see that Lin Xinru when he returned, and he felt very regretful.

"Everyone rest well and keep your spirits up. After waking up, we'll go upstairs to have a look." Wang Xuan gave each of them a crystal scale. There is nothing to miss, and all I want to do is go to the higher floor to see what happens.

Wang Xuan spent thirty crystal scales to buy a second-order ordinary iron helmet.

In this mission, the black tiger helmet played a huge role, precisely because it blocked the fire of the evil spirit for him. If he didn't wear the helmet, the fire would splash on his head, and the consequences would be disastrous.

This also made Wang Xuan more and more aware of the importance of this armor. At a critical moment, it could really save his life.

The eight people still opened eight rooms. Wang Xuan secretly counted. This time, he entered the rest area. There were 32 rooms inhabited by people. In just a short period of time, the number of people on this floor was almost geometric. The numbers are growing.

According to his conservative estimate, the number of people here has exceeded at least 200, and it is even possible to reach 300.

Here, there is no change between day and night. Wang Xuan and others stay on this floor, and they have lost the concept of time. They only know to rest when they are tired, and find ways to hunt monsters when they wake up.

When the eight people rested, they gathered in Wang Xuan's room again.

Wang Xuan distributed two bottles of primary nutrient solution to each person, and now there are 60 bottles of primary nutrient solution left in his Xumi mustard seed space.

In addition, there are 11 bottles of intermediate nutrient solution.

Considering that they didn't know what was going on upstairs, after the eight people discussed it, they went to the room where the goods were sold, and prepared to purchase a batch of supplies, just in case.

Wang Xuan first took out 69 crystal scales and bought 69 bottles of intermediate nutrient solution. In addition, he originally owned 11 bottles, so he collected 80 bottles of intermediate nutrient solution.

This bottle of intermediate nutrient solution can be used for three days, and each person will be divided into ten bottles. These nutrient solutions are enough for everyone in January.

After that, I spent 8 more crystal scales and bought 8 basic daily necessities for backup.

After the purchase, Wang Xuan still had 827 crystal scales left on his body.

"Let's go." Wang Xuan led the seven people to the hall, and everyone was a little nervous and looking forward to it.

There are more people in the hall. Many people are in groups, sitting in different corners of the hall. Not everyone is willing to spend crystal scales to rest. Many people use the hall as a place to rest. Just find a place with no one to lie on the ground and use it as a bed.

Wang Xuanneng could clearly feel that this layer gradually had a relatively clear distinction of strength and weakness.

Some people only have one or two or two or three pieces of inferior equipment on their body, which makes them look very shabby. Most of them are newcomers who are at the lowest level, while those with a full set of inferior equipment or one or two pieces of second-order equipment belong to the middle level. In addition, sporadic people began to appear with three or four pieces, or even a full set of second-order equipment.

Although the number is very small, these people are obviously at the highest level of this layer. When such people appear, everyone around them is respectful and looks very respectful, and they don't dare to offend at will.

Wang Xuan understands that as more and more people enter, the living environment here is likely to deteriorate further, and the classes will become more and more distinct.

After all, the space here is only so large, including the hall, the rest area, and even the area for hunting monsters, all are limited. When there are too many people, conflicts will inevitably arise due to the competition for resources.

The appearance of eight people Wang Xuan obviously attracted the attention of many people.

In particular, seeing Wang Xuan's eight people approaching the glass column in the center caused a stir among many people in the hall.

Everyone who enters here basically knows that by taking the elevator in the central glass column, they can go to the higher floor. There were four people who came down from the upper floor before. This is not a secret. It is passed from the old to the new. Newcomers know these things.

If you want to enter the elevator, you need at least a sub-body. Although it is said that with the passage of time, the sub-body has appeared one after another, and it is no longer rare, but the people who become the sub-body have the same concerns as Wang Xuan before. When you go to an unknown higher floor, you want to wait for your teammates to go together.

However, it is not easy for a team to have all the sub-body. Now that Wang Xuan and the eight people are wearing equipment and they are walking towards the glass column together, the people in the hall are not fools, and they immediately understand what is going on.

These eight people have all arrived at the sub-body, and they most likely want to enter the elevator to go to a higher floor.

This kind of situation is very rare. The people who were sitting and resting stood up, and the people who were chatting stopped talking, and they all paid attention.

Wang Xuan and the others walked to the elevator. Zhang Haofei took a step forward and pressed the button to open the door. The elevator door opened silently.

The people in the hall gradually gathered over. When they saw the elevator door open, they knew in their hearts that these eight people really wanted to take the elevator to leave.

"Wang Xuan!" Suddenly, a voice came.

Wang Xuan looked back, but a group of six people came over, led by Cheng Aiguo, with Meng Lian, Lu Weichao, Feng Yuan and Wei Zitao beside him.

"Brother Cheng." Wang Xuan smiled and nodded at him.

"You are leaving." Cheng Aiguo looked at them with envy and emotion.

Wang Xuan smiled and said, "Yes, I'm about to go up and have a look. Brother Cheng, how about you?"

Cheng Aiguo said, "We are still short of Meng Lian, Feng Yuan, and Wei Zitao who can't get to Yatai. I guess it will be almost in a day or two."

Zhao Lei heard this and laughed: "Then let's go up and have a look, remember to come to us early."

While joking, Wang Xuan started walking towards the elevator.

The eight people all walked in one after another. Except for Wang Xuan, the other seven people went in and began to look around.

Cheng Aiguo stood outside the elevator, showing a concerned look: "Wang Xuan, remember to pay attention to safety."

Although he knew that the eight people in front of him were powerful, he was still a little worried about what he would encounter when he entered the new floor.

Wang Xuan nodded towards them, seeing many people around him, looking inside curiously.

For the eight people who were able to enter the elevator, both envy and admiration.

In the elevator, in addition to the button leading to the third underground floor, there is also a button for the ninth floor above ground. Wang Xuan tried to press the button leading to the second floor and decided to go to the second floor first.

As he pressed the button, the elevator door began to close. He saw the caring expressions of Cheng Aiguo and Meng Lian looking at him, and understood that they really cared about him.

There were many people's soft breaths from outside, and then the elevator door was completely closed, and the people outside were no longer visible.

The eight people in the elevator were a little nervous. Even if they were stronger than Wang Xuan, they couldn't help but lightly held their right hand, the metal tentacle was ready to activate at any time.

After that, he vaguely felt that the elevator was shaking slightly. This kind of vibration was very slight. If it wasn't for his strong strength and sensitive sense, he could hardly detect it.

He understood that the vibration should represent that the elevator was going up.

At this moment, the eight people in the elevator didn't speak, their eyes were all looking at the elevator door in front of them.

Thinking of rising to the unknown second floor, Wang Xuan suddenly became nervous for no reason. The metal tentacles appeared from his right hand and slowly wound upwards. If the situation was not good, he would instantly activate the powerful "Warcraft Arm" to carry out defense or attack.

Soon the elevator vibration disappeared, and the elevator door in front of everyone opened.

"It's here." Wang Xuan heard Zhao Lei take a deep breath next to him, and he could hear a trace of nervousness in Zhao Lei's voice.

As the elevator door opened, everyone looked outside together, but none of them saw the outside situation, because there was a white opaque light curtain outside the elevator door.

There was a little strangeness in their hearts, everyone didn't rush through this light curtain, but looked at Wang Xuan.

Wang Xuan signaled everyone not to move, and released metal tentacles to try to touch the white light curtain.

The metal tentacle stretched out onto the white light curtain, and was immediately blocked by an invisible force. At the same moment, a message appeared in his mind.

"Everyone needs a clown mask to exchange for the pass to the second floor. Without the pass, you can't enter."

Sensing this information, Wang Xuan was startled. Only then did he understand the real purpose of the clown mask.

He knew why the woman whose hatching beast was a snow-white long sword had a clown mask on her left hand.

At that time, he still wondered that the clown mask was neither a weapon nor a piece of equipment. Could she be wearing it herself when she held it in her hand?

Only now did he know that if he wanted to enter the second floor, he needed to exchange the clown mask for a pass to enter and leave this floor.

"I wanted to come in and try it before she came. I knew that I needed a clown mask to exchange for a pass, and then I went to hunt and kill clowns to get a clown mask, and then I successfully entered the second floor."

Retracting the metal tentacles, Wang Xuan said, "To enter this second floor, everyone needs a clown mask to exchange for a pass before entering."

While talking, he opened the pocket on the left and took out the clown masks stored in it one by one, only to find that there were seven clown masks in total, but there were eight of them.

"What should I do? One less." Zhao Lei looked at Wang Xuan.

Eight people belong to the same team, and it is not appropriate to leave anyone behind. Zhao Lei has no idea.

Wang Xuan put the seven masks back into his pocket and said, "It's nothing, we'll go to the southern district and get another clown mask."

As he spoke, he tried to press the button on the third floor, but the button did not respond, and a message sounded in his mind: "The monster's growth is not long enough to be used."

Press the fourth floor, the fifth floor, the sixth floor... He went all the way to the ninth floor, which was the highest, all of which indicated that he had not grown enough and could not use it.

"It seems that the hatching beasts have grown enough, and they are only able to use the elevator, but if they really want to go in, I am afraid that there are other requirements, such as the clown mask to change the pass when entering the second floor, and I don't know how to go to other floors. What would be required."

After that, everyone gave up and entered the second floor. Wang Xuan pressed the button on the first floor again. This time, he did not remind him that the growth length was not enough. The elevator door closed quickly, and there was a slight vibration again. When the elevator door opened again, they saw By the time the crowd that had gathered around was dispersing, Cheng Aiguo and Meng Lian were also preparing to leave. They didn't want to see the elevator door suddenly open, and Wang Xuan and the others came out again.

"What's going on?" Cheng Aiguo looked surprised.

"If you want to enter the second floor, you not only need to reach the sub-body, but also need a clown mask to compete for an entry and exit pass. We still lack a clown mask."

Although Cheng Aiguo has grown to the sub-body level, he has not entered the elevator and tried to go to the second floor. He didn't know this, and he was slightly startled when he heard this, and then said, "Clown mask? That's it, I said, this clown mask turned out to be this one. use."

Meng Lian said, "Do you still need a clown mask?"

Wang Xuan looked at her, nodded at her, and Meng Lian looked at Cheng Aiguo.

Cheng Aiguo knew what she was thinking when he saw her eyes, he laughed, and unbuttoned a small backpack from behind. This kind of small backpack can be sold in places where self-service items are sold. It can be worn on the body and is very close to the body. Loading some items does not affect the battle very much. As everyone has some crystal scales, many people start to buy them.

Because Wang Xuan has a better Sumeru belt, the two Sumeru mustard spaces are enough to hold a lot of supplies, and everyone doesn't need this kind of personal backpack.

Seeing Cheng Aiguo take off the backpack behind him, Wang Xuan understood a little, but saw him open the backpack and take out a clown mask from it.

"It's a coincidence that we met a clown before. Fortunately, three of us arrived at the sub-body, and we worked together to solve the clown and got this clown mask. I stayed, but I didn't think it would really come in handy now."

Wang Xuan took the clown mask and said, "Then you..."

Cheng Aiguo smiled and said: "We only have one clown mask. From what you just said, it is estimated that everyone needs one. We want to go up, but there are still five more. There is not much difference between five and six. Well, let's use it for you first, we're not in a hurry anyway."

Lu Weichao said with a smile: "Yeah, hurry up and go up. When we go up, we expect you to be covered."

Seeing what they said, Wang Xuan did not refuse to accept it. Now they are all thinking about entering the second floor, and they really don't want to waste time in the southern district.

Seeing that they still lacked some second-order equipment, Wang Xuan took out an extra second-order knee pad that Gu Manyao had replaced before, and said, "I won't say thank you, it just happens that there is an extra piece of equipment here."

Cheng Aiguo took it over with a smile, knowing that Wang Xuan was embarrassed for taking the clown mask, and if he turned down this second-order equipment, I was afraid it would make him even more embarrassed.

"That's fine, you go up first, we'll go up to find you in a few days." Cheng Aiguo smiled and said goodbye again.

Originally, he thought that in a day or two, Meng Lian and the three of them in the team could also break through the sub-body, and they would be able to go up, but now they know that they need six clown masks. Difficult, the difficulty is that this clown appears randomly, and no one knows when it will appear and when it will not appear, so it is not easy to collect six clown masks.

However, he does know the process of summoning the Clown King~www.mtlnovel.com~ As long as you gather a group of people and destroy the merry-go-round at the same time, you can summon seven clowns at the same time with only seven remaining horses.

"If you can unite some people and summon seven clowns at the same time, then you can get seven clown masks, that is, the clown king is too strong to deal with, but I don't know whether the task process of summoning the clown king is one-time or can be repeated continuously. of."

In Cheng Aiguo's contemplation, he saw Wang Xuan and the others returning to the elevator, waving at them, and then the elevator door closed again.

Cheng Aiguo let out a sigh of relief, feeling a little envious in his heart, then turned his head and said, "Let's go, let's go to the southern district, everyone has to work hard, try to get up early, and it's boring to stay on this floor."

Although he is not young, he has never surrendered.

In the elevator, Wang Xuan took out eight clown masks, one for each person, and the elevator stopped on the second floor again.

As the elevator door opened, Wang Xuan held a clown mask in his left hand, took a deep breath, faced the light curtain in front of him, and put the clown mask in first.

He watched the clown mask disappear into the light curtain, and soon sensed a message.

"The entry and exit pass to the second floor was successfully exchanged, and we have the qualification to permanently enter and exit the second floor."

Following this voice, Wang Xuan stepped out, entered the light curtain, and disappeared.

Chapter 113

Wang Xuan passed through the light curtain, his eyes darkened, and he had already stepped out of the elevator. What he saw was a huge square. At the end of the square, a large number of buildings could be seen, all of which were small buildings.

If it wasn't for the sky above, but the ceiling with no end in sight, Wang Xuan would almost suspect that he had walked out of Longmao Square and came to the outside world.

The ceiling looks very high. According to Wang Xuan's visual observation, it is only more than 100 meters. It is not so much the second floor of a building as it is an independent space. The only difference from the real space may be the upper part. Not the endless sky.

There is not such a bright and bright floor here, but it is dark. With Wang Xuan's current vision, he can only vaguely see a large number of small buildings in the distance. Looking back, Zhao Lei, Gu Manyao, Zhang Haofei and Tie Jun are one after the other. One by one, they got out of the elevator behind them.

He saw a huge number "10" above the elevator door, and then looked at the same glass column behind him, which went straight to the top that was more than 100 meters high, but this glass column was much larger than the glass column in the center of the first floor hall. , its diameter must be at least five times that of a layer of glass column.

Everyone's first reaction when they walked out was the same as Wang Xuan's. They were shocked by the scene in front of them.

Wang Xuan saw the huge glass pillar behind him, he was busy walking around the glass pillar, and soon saw one elevator after another, with different numbers on it.

When he went around and returned to the original elevator, he realized that there were ten elevator doors on the glass column, and ten numbers from "1" to "10" were written on them, and the elevator they had just walked out was one of them. elevator No. 10.

Wang Xuan raised his head, and accidentally found a huge clock hanging on the giant glass cylinder. According to the hands above, it was now 3:12 minutes.

According to the gloomy environment around, Wang Xuan's heart moved. Judging from the display on the clock, could it be said that it is three o'clock in the morning? So why is it so dark here? If this is true, is there a difference between day and night here, unlike the first floor, which is always brightly lit, and there is no concept of day and night after staying there for a long time.

"Is this the second floor of Longmao Plaza? It's like a small world..." Zhao Lei muttered to himself.

Gu Manyao glanced at him and said, "Do you still think this is Longmao Plaza?"

Zhao Lei said with a wry smile: "I'm used to it. It looks... like a small town. There are many buildings around. I don't know if there are people living in it. It seems quiet now."

Wang Xuan said: "It should be at night here. Looking at the clock above, it is estimated that it is past three in the morning."

"We've been on the first floor for a long time, and we've forgotten that there are still days and nights." Tie Jun felt a little emotional.

"It's just why there are ten elevators here, and where do the other nine elevators lead?" Zhang Haofei couldn't help pressing the door of elevator No. 9 with a curious expression on his face.

The elevator door opened silently immediately.

Zhang Haofei was stunned for a moment. He didn't dare to walk in directly. Instead, he stretched his head and looked inside, and found that the buttons inside were exactly the same as those in the elevator they had just taken.

"It is estimated that these elevators are all the same, but why are there as many as ten?" Zhao Lei also looked at it with a surprised look.

Wang Xuan thought for a while before asking, "Could it lead to a different layer?"

"What do you mean by a different layer?" Gu Manyao didn't understand for a while.

Wang Xuandao: "For example, the lobby on the first floor where we were just now, the rest area, also includes the four areas of the south, south, north and west. We can understand these areas as an independent space. I suspect that there is not only one such independent space, but a There are ten, and if you number them, it will be from one to ten, we just got out of the elevator No. 10, maybe the independent space we are in is the No. 10 space."

Gu Manyao understood, showing a look of surprise, and said, "If this is true, how many newcomers are there? Moreover, people from these ten places take the elevator to the second floor, and they will all come here, so there should be a lot of people here. The talent is, it just seems to be quiet around now."

Zhao Lei replied, "This may be because it is night here. If the time of the clock is correct, it is three o'clock in the morning. At this time, most of them are sleeping."

Wang Xuandao: "These are just my guesses, the specifics will be understood gradually, let's go, let's go around and take a look at this second floor, what is there in the end, no matter what, it looks too big here Well, it's much better than staying on that narrow floor."

Zhao Lei said: "By the way, Wang Xuan, I think your analysis is right. The second floor is so big, but the first floor is so small. There is a reason, because there are ten on the first floor, and the ten in the first floor space are so small. When people arrive at the sub-body, they can enter here, so this second floor is so big because it needs to accommodate a lot of people."

Tie Jun nodded and said, "What Zhao Lei said makes sense."

Wang Xuandao: "Let's go over there first." As he said that, he walked towards the nearest building. There were all small buildings resembling single-family villas, with three floors and four floors. And five layers, ranging in size, densely packed, looks a lot.

The other seven followed behind him and walked in together.

The nearest three-story building was about fifty or sixty meters away. The eight people quickly walked to the front of the building. The doors and windows were locked and it was quiet. There should be no one living there.

Wang Xuan saw that there was a small screen on the door with a slot on the side, and immediately clicked on the screen, and a line of words appeared on it.

"You need ten crystal scales every day to live in, and you need to live in ten days."

Seeing this line of small print, everyone was stunned.

"It turns out that this small building is for people to live in. It is similar to the rest area on the first floor, but it is too expensive. It takes ten crystal scales to live in a day. One hundred crystal scales."

Zhao Lei looked at the small print and couldn't help shaking his head.

Wang Xuan is also shaking his head. Although he now has more than 800 crystal scales in his pocket, he is reluctant to let him take out 100 of them to live in this small building for ten days.

Zhao Lei said: "So many small buildings are not all for living, right? This row is a three-storey building, and the next row is a four-storey building, which is twice as big as this small building. How much does it cost? Wang Xuan, let's go and see."

Wang Xuan snorted, and the eight people bypassed the three-story building in front of them and walked towards the second-row building at the back. The second row is a four-story building with a much larger area. , more people can live there.

It was still quiet inside. There was also a small screen on the door. Wang Xuan opened it and saw a line of small characters on it.

"You need 20 crystal scales every day to live in, and you need to live in ten days."

Zhao Lei shouted, "My dear, you need 200 scales for this living."

Wang Xuan looked at the third row at the back. All the buildings in the third row were five-storey buildings, and the floor space was even wider. I think there are many rooms in it, which can accommodate a lot of people.

Wang Xuan's eyes fell on the five-story building closest to him, and saw a small flag on the top of the building.

In the gloom, I couldn't see it clearly, and I could only vaguely see that a simple phoenix was drawn on the flag.

When Wang Xuan noticed this five-story building, his heart felt inexplicably nervous, and he instinctively felt uneasy, as if there was some danger hidden in the five-story building.

Zhang Haofei wanted to continue to look at the five-story building in the third row, but was stopped by Zhao Lei.

On the back of his right hand, the Sacred Mark was opened, and he observed the five-story building from a distance, and said in a low voice: "Don't approach, there should be people living in this small building, I feel very uneasy, you can see that the roof is still there. With a little flag planted, I guess what it might be."

Wang Xuandao: "I feel similar to you. I just came here, and everything is still unclear. If you don't feel right, don't approach it casually. Let's go to other places first."

Zhang Haofei heard Wang Xuan say the same, and realized that Zhao Lei was not talking nonsense, so he nodded his head to show his understanding.

The eight people quickly turned around and left the area that was full of single-family buildings, and walked towards the right side of the area.

There is a street that can be seen from a distance, and there are buildings on both sides of the street.

This time, when they were just approaching, they suddenly found that the elevator door No. 5 in the giant glass column not far away suddenly opened.

Wang Xuan immediately stopped and looked there.

I saw that after the elevator door opened, five people filed out.

The leader was a young man in his twenties. He was wearing a full set of Tier 2 equipment, three of which were of excellent quality. Just looking at this set of equipment, his strength was definitely not weak.

There were three men and one woman walking out behind him. All four of them were wearing a full set of Tier 2 equipment, and more or less had one or two pieces of sophisticated Tier 2 equipment on their bodies. Purely compared to equipment, they were no better than Wang Xuanba. How many people are different.

After these five people came out, they were similar to Wang Xuan and eight people. At first, they looked around curiously.

It looks like it's the first time I've entered here.

Seeing the reactions of the five people, Wang Xuan immediately understood in his heart that his previous guess should be true. Those ten elevators do lead to ten different first-floor halls, and in those ten first-floor halls, it is the place where the newcomers gather. When the newcomer's hatching beast grows to a sub-body, and after obtaining the clown mask, they can pass the ten elevators and enter the second floor together. The five people in front of them should be from the fifth hall. Take the No. 5 elevator to enter here.

These five people also noticed Wang Xuan, because it was the first time for each other to enter here, and they were all vigilant. These five people did not come over, but were observing on the spot.

After Wang Xuan glanced at them, he continued walking towards the street ahead.

There is a horizontal plaque hanging on the street with the words "trading area" on it.

Maybe it was because of the early hours of the night. The street was also quiet. Eight people walked in slowly and saw shops on both sides. Each shop was huge. Inside, it was dark and dark.

Wang Xuan saw the first shop on the left, with a horizontal plaque on it, with the word "weapon" written on it.

"Go, go in and have a look." Wang Xuan walked towards this place. The other seven people had no objection. They followed behind him. When they walked in, the lights in the shop automatically turned on, from dark and dark to lights. brightly lit.

"Unexpectedly, there are also automatic induction lights here. It will automatically turn on when someone is there, and it will automatically turn off when no one is there. It is environmentally friendly and energy-saving. It is better than the place where we sell weapons." Zhao Lei couldn't help laughing.

This store looks similar to the place where weapons are sold on the first floor. The only difference is that it looks bigger and there are more self-service vending machines, which can accommodate hundreds of people to buy weapons here at the same time.

Wang Xuan looked at the vending machines in the row on the left, and found that the weapons sold here are similar to those on the first floor, including the fish scale knife that Zhao Lei is currently holding.

After a glance, he lost interest, and he immediately walked to the right.

The weapons sold in the row of vending machines on the right looked obviously more high-end. Zhao Lei saw a faint green light flowing from one of the knives. Information on this knife.

"Bitian knife, quality, third-order ordinary. The blade is inlaid with an energy crystal. When used, it will activate this energy crystal and increase its power... Good guy, two hundred crystal scales."

Zhao Lei suddenly raised his voice after reading it.

Wang Xuan also checked the information of this Bitian knife, looking at the attributes and appearance, it is far better than the fish scale knife in Zhao Lei's hand, and the quality has reached the third-order ordinary. Rank-quality equipment, but this value is also ridiculously expensive, reaching a full two hundred crystal scales.

Looking at other weapons, the quality is all third-order ordinary, and the value is the same two hundred crystal scales.

"Since there are Tier 3 quality weapons for sale here, there should also be Tier 3 armor. I don't know what Tier 3 armor looks like."

Because everyone has hatched beasts, they are not too interested in these weapons, they just took a look and walked out.

Next to this huge weapons store is a store that sells armor. Everyone walked in, and the lights in the dark store immediately turned on.

Like the place where weapons are sold, the vending machines on the left sell the familiar second-order armor, including five sets of iron helmets, heart protection iron armor, and iron lock knee pads.

Everyone's attention was focused on the long row of vending machines on the right.

The vending machines in this row only sell five types of armor. Wang Xuan looked at the five-piece sets of helmets, armor, knee pads, gauntlets, and boots. The surface of these equipment exudes a metallic luster. It looks like gold and iron, and the material is very special. No one can tell what material it is made of. The appearance looks very beautiful. If you can wear these five-piece suits, your appearance will definitely not be low.

Wang Xuan clicked on the screen on one side and saw the names of the five-piece suits.

"Alloy helmet, alloy armor, alloy knee pads, alloy handguards, alloy boots."

The names are all alloys, and Wang Xuan casually clicked on the alloy helmets to view the details.

"Name: alloy helmet, quality: third-order ordinary, alloy helmet made of special alloy, this special alloy has two characteristics of lightness and toughness, worn on the head, it is light and beautiful, and has a strong defensive effect, alloy helmet There are two special energy crystals in it. One energy crystal can directly act on the wearer's ears, increasing the hearing ability by 20%, and one energy crystal can directly act on the wearer's eyes, increasing the wearer's hearing ability by 20%. Vision. The nano crystals inside can be activated through blood, and have a strong self-repairing ability. Before the energy is completely depleted, as long as the damage does not exceed half, it can be automatically repaired. "

Looking at this information, Wang Xuan nodded secretly, this alloy helmet is worthy of being a Tier 3 armor, far surpassing the Tier 2 ordinary iron helmet he is wearing now, and it is also better than the Tier 2 fine-quality helmet he was wearing before. Dark iron helmets are good.

The alloy helmet not only has a defensive ability that surpasses the previous two helmets, but also improves the wearer's vision and hearing by 20%. One piece of armor can improve both attributes at the same time. This is the first time I have seen it, but let's look at the value. Had to shake his head.

300 crystal scales, ten times that of a second-order ordinary iron helmet.

They managed to save more than 800 crystal scales, but they were only enough to buy two.

Looking at the alloy armor again, looking at the introduction, it is similar to the alloy helmet. They are all armors made of special alloys. They are both tough and lightweight, and have strong defense capabilities. Without enough penetration, they cannot penetrate this special alloy. It also contains two special energy crystals, each with different effects, one energy crystal can increase the wearer's stamina recovery speed by 20%, and the other energy crystal can increase the wound healing speed by 20%, which also requires 300 crystal scales.

This attribute surprised Wang Xuan. This alloy armor can not only increase the stamina recovery speed by 20%, but also increase the wound healing speed by 20%. This ability is quite amazing.

After all, in battle, no one can guarantee that they will not be injured, and increasing the speed of wound healing by 20% can be regarded as a very high-quality ability.

Wang Xuan looked all the way. These five pieces of alloy armor all require 300 crystal scales. Each piece is inlaid with two types of energy crystals and has two special abilities. Buy all the equipment and wear it.

Compared with these third-order equipment, the so-called second-order excellent equipment he is wearing now is garbage.

"It's unimaginable... This third-order armor is too strong. Although it is expensive, it is completely worth the price. I even think it is cheap." Zhao Lei was amazed.

When Wang Xuan listened to Zhao Lei's words, he felt the same way. Compared with the special abilities attached to this alloy suit, except for the two attributes of the alloy helmet that improve his hearing and vision, he felt that the attributes of the remaining four pieces of equipment were almost the same. Excellent, it is totally worth the money, even if each piece sells for 500 crystal scales, he takes it for granted.

"It seems that we have found what we should do next, which is to frantically earn crystal scales. I can't wait for a moment. I have to buy these five-piece sets." Zhao Lei's eyes flashed, his face firm.

Gu Manyao smiled and said, "Do you know how many crystal scales are required for this five-piece set?"

"Isn't it 1,500? Wang Xuan, you should have more than 800. We have accumulated so much in just a few days. Give us a little more time. Is 1,500 still difficult?" Zhao Lei Hehe smiled and looked excited.

Although Wang Xuan also longed for the five-piece suit, he restrained himself after thinking about it, and said, "Go to other stores to see if there are any other good items."

The eight people walked to the shop that sold armor, and continued to follow the shop on the left to enter the third shop.

The third store on the left sells all kinds of supplies.

Compared with the materials sold on the first floor, there are many more varieties of materials here, including high, medium and low grades.

The nutrient solution alone has milky white primary nutrient solution, green intermediate nutrient solution and yellow advanced nutrient solution.

The effect of this advanced nutrient solution is better than that of the intermediate nutrient solution. Regular consumption can strengthen the body, long-term use, it can also improve physical fitness, and even has the effect of rebirth.

However, this advanced nutrient solution is not cheap, a bottle requires 20 crystal scales, and each bottle can only last for two days.

Looking at the price, Wang Xuan felt that the more than 800 crystal scales in his pocket were really nothing, and there was nothing to buy here.

In addition to this advanced nutrient solution, there are also various materials, mainly a wide variety of daily necessities, among which the belts for sale attracted his attention.

Wang Xuan checked the information about the belt.

This looks like an ordinary leather belt, named "Primary Storage Belt", with a small storage space of one cubic meter. Although it is far from comparable to his Xumi belt, the price here is high. , requires 500 Crystal Scales.

In addition to this "primary storage belt", there is also the "intermediate storage belt", which has two cubic meters of storage space.

Wang Xuan was about to look at the price, when he suddenly felt something, he turned his head, and saw a person's head popping out of the door.

Wang Xuan was taken aback when he suddenly saw a human head, and when he looked closely, he realized that it was a man in his thirties, with a full beard and some mud and blood stains on his face. He looked disheveled and very sloppy. Ghostly, ghostly, hiding by the door, posing as a cat, peeking inside, looking like a thief.

The man noticed the eight people in Wang Xuan, and immediately rushed in in a flash.

Wang Xuan was shocked when he saw the speed at which he rushed in. Although this guy looked a little embarrassed, the speed was not slow, it was faster than a normal sub-body running at full speed.

Looking at him again, there are four pieces of second-order excellent equipment, and there is also an alloy armor that he has just seen. This is a third-order piece of equipment, worth 300 crystal scales.

In addition to this armor, what caught Wang Xuan's attention the most was that he wore a primary storage belt around his waist. This storage belt alone would require 500 crystal scales.

It can be said that the price of this man's equipment is added together, and he needs thousands of crystal scales.

Apart from Wang Xuan, the other seven people also noticed the man who suddenly entered, and looked at him together. The man's equipment was definitely not simple. Looking outside, he rushed to a nearby self-service vending machine. He held a lot of crystal scales in his hand and threw them into it.

As for Wang Xuan's eight people, he directly ignored them.

The eight Wang Xuan looked at each other, and they all saw the surprise in each other's eyes. This sneaky man who suddenly appeared, he should be here to buy things, but his actions were too weird.

The man quickly put fifty crystal scales into the vending machine, followed by fifty bottles of green intermediate nutrient solution from the bottom row of cabinets.

The man's movements were fast, as if he was robbery, he opened the pocket on the left side of the storage belt, and was busy putting the fifty bottles of intermediate nutrient solution into the pocket.

If Wang Xuan hadn't seen with his own eyes that he bought the nutrient solution with fifty crystal scales, he would have thought he was robbed.

At this moment, people suddenly flashed at the door, silently, and there were three more people.

These three people suddenly appeared, and the man who was rushing to put the nutrient solution in his pocket was shocked, and his face stained with some dirt and blood suddenly became very ugly.

"It's not easy, Wu Yi, we finally let us block you." These three people, two men and one woman, among them the woman was about twenty-seven or eighteen years old, her face was as cold as ice, and she stared at Wu Yi.

Chapter 114

Wang Xuan saw that the two men and one woman had similar equipment to Wu Yi. They both had four second-order equipment and one third-order equipment. The most conspicuous part of the three was that each of them wore a red cloth belt around their waists. , looks like three red belts from a distance.

As soon as the three entered, they immediately fanned up.

The woman stretched out her right hand, and a fire snake about the size of a thumb appeared on her right hand, slowly winding around.

Wu Yi quickly put away the nutrient solution and said solemnly to the three people who were slowly pushing up: "According to the regulations, you can't kill people here. I don't believe you dare to violate this regulation."

The woman sneered: "Regulations? In the middle of the morning, even if we kill you, who would know? Just dispose of your corpse. Do you really think anyone above will care about your life?"

Wu opened his mouth, and wanted to say something, the woman suddenly waved her right hand, and the fire snake wrapped around her right hand suddenly swelled and changed. In the blink of an eye, it turned into a flaming python as thick as an adult's arm, and rushed towards Wu Yi.

As soon as this woman made a move, Wang Xuan and eight people could feel a rush of flames and high temperature across a distance of five or six meters. This power was really terrifying, and it was definitely not a power that ordinary sub-body can exert.

Wang Xuan's heart trembled slightly, and he immediately raised his right hand to signal everyone to step back and distance themselves from them.

They didn't expect that it was three or four o'clock in the morning, and they would still encounter an accident here. They just came here, and they didn't want to be involved.

Following the woman's sudden attack, one of the other two men, a dark-skinned man, followed suit.

He stretched out his right hand, and a metal stick about two meters long appeared in his hand. On the surface of the metal stick, there was a faint blue-white electric light wandering. The blue-white electric light on the surface came into contact with the air, making a faint crackling sound, which looked very scary.

The two of them went all out, their might was terrifying, this Wu's expression changed drastically, he didn't take the initiative to meet him, but stomped his feet, slammed, turned around, and moved towards Wang Xuanba who was retreating five or six meters away. rush away.

The woman and the black-faced man were all focused on preventing Wu Yi from escaping, but they did not expect that Wu Yi would take the initiative to flee inwards. He was slightly startled, and his shot failed, so they were busy chasing after them. Another man with a round face rushed forward.

Wang Xuan and eight people changed their faces. They were originally five or six meters away from Wu Yi. They were afraid that they would be involved in this dispute. Come.

"This guy!" Wang Xuan immediately understood what Wu Yi meant. He knew that he could not defeat these three people, and he actually wanted to drag his eight people into this muddy water.

Wu Yi turned around and threw himself with all his strength. The speed was as fast as a sharp arrow. This is the speed that a real body can only burst out. Zhao Lei, Gu Manyao, Zhang Haofei, Tie Jun, Yu Shanshan and others were all just sub-body, how could they react? He was rushed in.

"Get out of the way!" The woman who controlled the fiery snake shouted at Wang Xuanba and the others, and rushed over, seeing Wu Yi fleeing between Bai Yan and Yu Shanshan, the fiery snake in her right hand let go. Going out, the fire snake swelled and changed more and more huge.

Although she didn't deliberately target Yu Shanshan and Bai Yan, the fire snake's main target was Wu Yi, who escaped between the two, but under the terrifying heat wave, Yu Shanshan was in a panic and

instinctively stepped back. The light mirror defense was activated to prevent being burned by the flames of this fire snake.

An octagonal light mirror appeared, and the fire snake collided with the light mirror, making a screeching sound. The power of the fire snake was too strong, and Yu Shanshan's light mirror couldn't resist it, and immediately waved and shattered.

The fire snake was blocked by the light mirror, and then took a step slower. Wu Yi suddenly turned his upper body slightly, his right arm swelled, and stretched out violently in the air. With five fingers, he grabbed the woman's neck.

This time was as fast as lightning. The woman was affected by Yu Shanshan's light mirror, and she didn't expect Wu Yi to suddenly turn around and fight back while escaping. She was caught off guard and her neck was twisted. With a sound, there was a brittle sound of bones breaking in her neck. Wu Yi's right arm was like rubber and could be twisted and deformed freely. He grabbed her neck and turned it around, and she twisted her neck and even twisted her face. behind.

The black-faced man who followed behind the woman saw the woman's back to him, but his face suddenly turned to face him. He was shocked, and immediately understood what was going on. He was shocked, and let out a roar. With a terrible thunderstorm sound, he volleyed over.

With a crisp sound, Yu Shanshan's light mirror instantly shattered and shattered. She opened her mouth and spat out a mouthful of blood, and fell backwards, her arms breaking in pain.

The black-faced man's eyes were about to burst with fire, and he smashed Yu Shanshan, who was blocking the front of him, with a stick, followed by the second stick and smashed it towards Wu Yidang's head.

All this changed too fast, even if Wang Xuanba wanted to distance themselves, it was too late. They all stood together and were very close to each other.

As soon as Wu rushed between them, he mingled with everyone. He suddenly counterattacked and broke the woman's head, and followed a diagonal vertical to the side of Bai Yan who wanted to retreat. The black-faced man turned into a stick. smashed towards Baiyan.

Wu Yi's eyes glowed with terrifying light. He wanted to use Bai Yan to block the stick. If the black-faced man wanted to avoid killing Bai Yan, he could take advantage of the moment when the other side closed the stick and kill the black-faced man. man.

The black-faced man could also see what Wu Yi meant. If he wanted to take back the stick he swung out with all his strength, he would have almost no defense ability at the moment when the stick was retracted. At this time, Wu Yi made a sneak attack. Women's footsteps.

It was almost too late to think about it, the black-faced man growled lowly, not only did he not withdraw his stick to avoid Bai Yan, but instead increased his strength, wanting to smash Bai Yan's head with one blow, and followed suit to attack Wu Yi.

On the other side, the round-faced man appeared silently, bypassing Baiyan, and suddenly a square shield formed by accumulation of soil appeared in his right hand. Pu Rabbit, coming with a faint gust of wind.

The two of them were completely irritated when their companions were twisted and their necks were twisted. Their eyes were full of crazy and terrible murderous intent. In their eyes, they no longer cared whether Wang Xuanba was dead or alive. They only wanted to join forces. As soon as this Wu was killed, as for Wang Xuanba, they knew that they were newcomers when they saw that they didn't have any special marks on them.

Wang Xuan took two steps in a row. He naturally didn't want to get involved in other people's disputes, but he didn't want Wu Yi to be too cunning and to draw the flames of war. Seeing these two hit a blow, I'm afraid that he might not be able to kill Wu Yi, but Bai Yan would definitely die. Save.

Although Bai Yan's strength is not weak, but between these three people, both speed and strength are crushed by them. It can be said that among the eight of them, only Wang Xuan can keep up with their reaction speed.

Seeing that Bai Yan's life was in danger, Wang Xuan did not hesitate to extend the thick metal tentacles, reaching the limit of five meters long, bursting with the strongest force, and slammed into the air.

With a loud bang, sparks splashed everywhere, and the metal tentacles hit the metal stick that hit Bai Yan's head. Both parties used the strongest force. In the terrifying sound, although the metal tentacles bounced back, the black-faced man did the same. I felt my hands shaking violently, the tiger's mouth cracked, and the metal stick almost flew out of my hand.

He was horrified and couldn't help but look at Wang Xuan.

On the other side, Wu Yi's right hand stretched out to a distance of four or five meters. He grabbed the self-service vending machine not far away. With this grasping force, he suddenly accelerated and rushed over, narrowly avoiding the round-faced man's volley. Shield strike.

The black-faced man fell back two steps, stared at Wang Xuan with a stern look, suddenly turned around and rushed outside, suddenly shouting: "Duan Chen, let's go!"

Duan Chen, the round-faced man who used the shield strike, missed a hit. Hearing the call of the black-faced man, he turned around and fled without saying a word.

Wu Yi shouted loudly: "Hurry up, don't let them escape!" With his right arm stretched out, he volleyed it like a whip.

Wang Xuan thought of the look in the eyes of the black-faced man who was looking at him before he left. There was fear and resentment in his eyes, and he knew in his heart that the black-faced man hated him evenly.

Although the two sides had no grudges and no grudges before, but now that they have forged grudges, they have to make a decisive decision and cut the weeds, otherwise there will be endless troubles.

Almost before Wu Yi called out, he activated his metal tentacles, trying to intercept the two.

I didn't want that Duan Chen suddenly turned around and threw the earthen shield in his hand.

This earthen shield shot, suddenly changed and extended, like a giant round table smashed over.

Wang Xuan's heart froze, the metal tentacle stretched out straight, and he pulled it up in the air.

With a "bang", the drawn giant earthen shield exploded in the air, and a large amount of soil splashed around, with astonishing power.

When the incident happened suddenly, Wang Xuan was taken aback, and he was busy dodging and retreating.

When he retreated, Na Wuyi took another step slower. The two seized the opportunity and rushed out of the shop, disappearing into the darkness outside.

Wang Xuan used metal tentacles to protect his body and rushed out of the store, only to see that in a short time, the outside became silent and dark, and his vision was blocked.

Shaking his head secretly, although Wang Xuan didn't know the identities of these people, he knew that if the two escaped, there would be boundless disasters.

The metal tentacles swung horizontally and blocked Wu Yi.

It can be said that everything tonight was caused by this Wu Yi. If he hadn't intentionally escaped into the eight of his own, he would not have been able to drag the eight of them into the water.

Seeing that Wang Xuan's eyes were not good, Wu Yi stopped and immediately shouted softly: "Boy, don't blame me, if you were me, would you do that if you wanted to survive? If you don't do it for yourself, the world will be destroyed, you want to kill it. I, I'm afraid it's not that easy. Those two guys escaped, and they will bring more people here soon. They won't let you go. If you want to survive, just listen to me and follow me immediately. Walk."

He said while carrying the woman's body, he was about to avoid Wang Xuanheng's metal tentacles in front of him and escaped towards the outside of the trading area.

Wang Xuan controlled the metal tentacles, fluctuating endlessly. Tonight's incident is really a disaster, and it can be said that there is no place to reason. Thinking of the black-faced man's malicious eyes, thinking of the woman being killed, there is indeed a part of Yu Shanshan. For the reason, he gritted his teeth and shouted at Zhao Lei and Gu Manyao in the store: "All come out, hurry up!"

Hearing what he said, Wu Yi nodded secretly, thinking that this guy made a decisive decision without any hesitation, but he was a character. The more he was like this, the more he was afraid of Wang Xuan.

Zhao Lei and the other seven were all newcomers who had just entered this floor. When they suddenly encountered such a change, everyone was blinded. Hearing Wang Xuan's light drink, they rushed

outside. Bai Yan didn't say a word and picked up his arms. Yu Shanshan, who was seriously injured, followed behind.

Wu Yi carried the woman's body and fled into the distance in the dark. Wang Xuan and the others followed closely and rushed out of the trading area. They saw rows of single-family buildings not far away. As they walked around the small building, Wang Xuan saw a thick wall about ten meters high. There was a door in the middle of the wall, but it was closed at the moment.

When Wu Yi fled under the fence, Wang Xuan saw a rope hanging down from the fence.

Wu Yi held the woman's body under his arm, climbed on the rope, alternating his hands, and quickly climbed up.

He stood on the fence and threw the woman's body outside the fence, then motioned Wang Xuan and eight people to come up.

"Quick, come up."

He gave a low drink.

Wang Xuan and eight others climbed the rope and climbed the fence one after another.

With everyone's skills, even if you don't use this rope, it's not too difficult to climb over the wall. With this rope, it's even easier to climb over.

Wang Xuan went up to the fence and saw a large number of stone piles piled up outside the fence. At first glance, it was a barren mountain and wild ridge with no end in sight, overgrown with weeds. It was difficult for him to imagine that it would be on the floor. Inside, if it weren't for the ceiling above, it would be a completely independent world.

Wu Yi saw that all eight people climbed up~www.mtnovel.com~ and then put away the rope. Wang Xuan saw that there was a hook on the rope.

Wu Yi put away the hook and jumped down.

Wang Xuan followed him to the ground. Seeing Wu Yi landed, he sat down on a rock on the ground. He took a deep breath and said, "There was no danger, but fortunately no one came after us."

Wang Xuan just stared at him with terrifying eyes and said nothing.

The other seven people came down one after another, Bai Yan hugged Yu Shanshan, finally landed, and then put her on the ground.

Yu Shanshan was a little moved when she looked at Bai Yan.

Although Bai Yan usually ignores her, at a critical moment, he still cares about himself.

"Why are you staring at me like that? My heart is full of hairs." Wu Yi stretched out his hand and shook it twice towards Wang Xuan.

Zhao Lei walked up to Wang Xuan and said angrily, "We need an explanation. What the **** is going on tonight, your own business, but you intentionally involved us."

Zhang Haofei said viciously, "Damn you bastard!"

Wu Yi sighed and said, "I don't want to, otherwise, why would I stay up late at night and sneak in to buy things? Isn't it just because I don't want to cause trouble? But I didn't expect that they were blocked by them. You are also really unlucky. , I won't come early, I won't come late, but I'm in the store at this time."

Chapter 115

Wang Xuan looked at him quietly, with no expression on his face.

Wu Yi looked at Wang Xuan, a strange smile suddenly appeared on his face, and said, "Are you thinking that if you kill me, you will get the forgiveness of Duan Chen and Yao Tiande?"

As he spoke, he shook his head and smiled: "You newcomers are really naive, this **** stinky woman died, although I killed it, but there are also reasons for you, just this one, they will not let you go, You have no choice but to work with me to survive."

Wang Xuan suddenly said, "Is it safe to escape here?"

Wu Yi was slightly startled. He originally thought that Wang Xuan would ask him a lot of questions, but he never thought that Wang Xuan would ask this.

Nodding, Wu Dao said, "I can't say it's absolutely safe, it's just that in this wild, the sky is big and the earth is big, and you can hide wherever you want. No matter how many people there are, it will be difficult for them to find us. As long as we don't return to the town and are not blocked, they will also take We can't do it."

Wang Xuan nodded slightly and said, "I see, it's no wonder that you thought of escaping outside the fence at the first time, so we came here, and we really don't understand anything."

Before he could finish the words, the metal tentacle in his right hand burst out violently, like a long metal whip, dragging out a sonic boom, and instantly went straight to Wu Yi, who was sitting on the ground.

This sudden attack was like thunder, and the power was terrifying.

Although Wu Yi was sitting on the ground and seemed to be lazy, he was always on guard against the people in front of him, but Wang Xuan's sudden attack still made him feel surprised and surprised, he turned over, dodging while he shot, his right arm seemed to be astonished. The python that sprang out stretched out several meters and grabbed Wang Xuan's neck.

Both sides were adults, and they suddenly attacked, as fast as lightning. Everyone did not expect that Wang Xuan was willing to follow Wuyi out of the city, but now suddenly attacked, they were all surprised. It was too late to help, so I could only watch.

When Wang Xuan turned around, Wu Yi's five fingers fell in the air, and the metal tentacles rolled around Wu Yi's outstretched right arm. The "twisting and strangling" was activated, immediately twisting his right arm, trying to twist it off.

Wu let out a loud roar, his right arm twisted irregularly, kicked his feet, and slammed his body as a weapon, hitting Wang Xuan.

With a "bang", the two sides slammed into each other firmly. Wu Yi's right arm was not afraid of the entanglement of the metal tentacles at all. Instead, it continued to stretch, wrapping around Wang Xuan's body and entangling him.

Almost at the same moment, the metal tentacle that Wang Xuan extended turned upside down, following his right arm, flesh and blood merged with the metal tentacle, and the giant arm of the beast appeared.

With a bang, the punch hit Wu Yi's left belly.

Wu Yi let out a roar, his left belly and the armor on his body exploded, blood and flesh flew out, his body flew backwards, and his right arm wrapped around Wang Xuan, swung him up, and moved towards a pile of rocks. smash.

Wang Xuan was in the air, and his left arm also turned into a giant arm of a monster, slamming the pile of rocks with a bang.

The rock shattered, and he used this strength to stabilize his body. With his right hand, he grabbed Wu Yi's arm wrapped around him, and pulled Wu Yi flying.

Wu Yixin knew something was wrong. Wang Xuan's strength was far beyond his imagination.

As an adult, this guy is just a newcomer, how can he be so terrifying?

"Stop! Even if you kill me now, those people in Duan Chen will not let you go!"

Wu Yi roared with a hideous expression on his face. He wanted to withdraw his right arm, but it was too late.

"I didn't even think about killing you to please them."

Wang Xuan responded calmly, swung Wu Yi's right arm that stretched five or six meters long, and a terrifying force erupted. With a "bang", Wu Yi was smashed by him on a pile of rocks.

Wu Yixue also wanted to use his left hand to support and resist, but there was nowhere to have the power of Wang Xuan's giant arm of the beast, only to hear a crisp sound, his left hand immediately broke into pieces, burst open, and his body was knotted. He smashed firmly on this pile of rocks, blood

spurted wildly from his mouth, and there was a brittle sound of broken bones in his body, and his body twisted irregularly, becoming like a tattered rag doll.

The power of this smashing was so strong that even the pile of rocks was smashed and several stones flew out. Wu's body was like a mass of mud, and he fell there, unable to struggle to get up.

Listening to Wang Xuan's words, Wu Yimeng widened his eyes, but a confused look appeared on his face.

"Why... Since you know you can't please them by killing me, why do you still kill me... If you wanted to kill me, why did you just run away with me?"

He was completely swept away.

He was willing to take Wang Xuan and eight people to escape here, because he thought that these newcomers were easy to handle. On the premise that they didn't understand anything and offended the group of people like Duan Chen, he only needed a few words to coax them to listen to him. If you want to use some means at that time, you will be able to take Wang Xuan and eight people as subordinates, and you will be able to form your own power team. With enough strength, you don't have to be afraid of Duan Chen and Yao Tiande.

But he didn't expect Wang Xuan's strength to be far more terrifying than he imagined, and he didn't expect him to kill himself even though he knew that killing him would not resolve their hatred with Duan Chen.

Wu Yi was confused. He wondered why Wang Xuan was willing to escape with him since he wanted to attack him.

Wang Xuan looked at Wu Yi, who had most of his body exploded, and knew that he could survive now because of his strong self-healing ability and tenacious vitality.

"You're right. We are newcomers who have just come here. We don't know where to flee to to be safe, but I think you must know, so it's definitely right to flee with you."

As soon as Wu heard this, his face froze, his eyes were round, and his eyeballs seemed to be about to protrude, his face twisted, showing an angry look.

"So...you are willing to follow me...just to find a safe place?"

Wang Xuan nodded and said, "That's right, since it's safe here, it's time to settle the account just now."

As he spoke, he extended the metal tentacles again, and instantly reached the five-meter limit.

"Despicable and cunning beast, if you kill me, the people of the Rakshasa will surely kill you, too. I just had the good intention of trying to escape with you, you ungrateful little beast—"

Most of Wu's body could hardly move. Seeing that Wang Xuan was about to pull the metal tentacles over, he struggled to fight back, and roared wildly, full of unwillingness in his heart.

"Good intentions? When you want to drag us into the water to cushion your back, you should be damned!"

Wang Xuan waved his metal tentacles and slammed them down into the air, with a crisp sound. This blow hit Wu Yi's neck, which was struggling and resisting, and the terrifying blood exploded. Wu Yi's frantic screaming stopped abruptly. , his neck was directly interrupted, his huge head rolled out, his eyes were wide open, his face twisted, as if he could not rest his eyes.

A mass of white light appeared and slammed into Wang Xuan's right hand. He felt the surging energy in his right hand, and he killed an adult of the same level. The energy gained was stronger than killing a few four-star monsters. Even better.

Zhao Lei and Gu Manyao watched silently on the side, feeling that the atmosphere was frozen, everyone's heart was extremely heavy, and their hearts were depressed.

After seeing Wu Yi dead, he let out a long sigh of relief.

What happened tonight is beyond words.

Wang Xuan walked up, opened his pocket, took out a spare piece of clothing, wrapped Wu Yi's head in and tied it up, then carried the wrapped head and put it in the Xumi mustard space.

Zhao Lei walked up, saw Wang Xuan put away Wu Yi's head, and said, "Wang Xuan, you said we took this guy's head and gave it to Duan Chen and that Yao Tiande, what would happen to them?"

Li Haotian showed a hint of hesitation and said: "We don't want to be deceived by this Wuyi. What happened in the store just now has nothing to do with us. We even helped them kill this Wuyi. They should be grateful to us. , you won't be bothering us, will you?"

Wang Xuan glanced at the corpse of the unnamed woman on the ground, and said slowly: "If this woman is not dead, then everything is easy to say, but now no one knows what will happen, if they insist on the death of this woman to us It is not impossible to think that it is related to us, and it is not impossible."

yy novel

When Yu Shanshan heard this, she said with shame: "It's all my fault, it would be better if I didn't do it at the time."

Wang Xuan glanced at her and said: "It's not your fault, that woman suddenly launched a fire snake and rushed over, and you were also affected. It's normal to take defensive measures to protect yourself. In short, we'll be ready, if they really find us. , let's take out the head of this Wuyi first, and explain the situation clearly, if they are reasonable people, then everything is easy to talk about, otherwise, if the reasoning does not make sense, we must be prepared to protect ourselves."

Hearing what Wang Xuan said, Yu Shanshan felt much better.

Zhang Haofei said, "If it's just Duan Chen and Yao Tiande, there's nothing to fear."

Wang Xuan pondered: "I saw that these three people were wearing uniform red belts around their waists, and then I saw that these three people were so afraid of them, and what kind of rakshasas did they mention, I guess these three people should belong to the same name as rakshasas. Of course, this Rakshasa may also be a personal name, if there are only two of them, then Wu Yi doesn't need to be so afraid of them at all."

Hearing Wang Xuan say this, Zhang Haofei's face was also ugly, and he murmured, "If it really belongs to some kind of powerful force, and it is unreasonable, then we will be in big trouble."

Hearing Zhang Haofei say this, everyone's faces showed ugly expressions.

Wang Xuan was still calm, and said sullenly: "The so-called unreasonable, actually depends on the object, we are weak, people naturally don't need to reason with us, as long as we are strong enough, I believe these people will be willing to reason with us. of."

Gu Manyao sighed: "So the most important thing for us now is to reach adulthood. As long as we all reach adulthood, I don't believe these people dare to do anything to us."

Wang Xuan grinned and said, "Yes, if you want to live in a place like this, everything else is fake. Strength comes first. Don't worry, let's see what these two have."

After he went to search Na Wuyi's body, Gu Manyao and Yu Shanshan also started to check the woman's body.

Except for a few pieces of armor, both Wu Yi and the woman have primary storage belts, and everything they carry is in these two belts.

Wang Xuan took out everything from Wu Yi's storage belt.

There are fifty bottles of intermediate nutrient solution he just bought, some crystal scales, hook ropes, and some daily necessities. What caught his attention was a folded piece of paper.

Wang Xuan unfolded the paper and found that it was a map.

"Map of Bug Town."

Looking at the words above, Wang Xuan's heart moved slightly.

When others saw the map, they all gathered around.

"I see, the map of this worm town is the map here. Look at the layout of this worm town. This is the central square, and in the center is the glass cylinder of the ten elevators. This is the trading area." Zhao Lei only glanced at it. Get excited right away.

They are worried that they don't know anything about this place. Now that they have this map, it will be different.

Wang Xuan looked at the map seriously, and now he knew that the town with high walls in front of him was called "Insect Town". This "Insect Town" was surrounded by walls, and there were entrances and exits in the south, south, and northwest.

According to the signs on the map, outside the walls of Insect Town, there is "Snake Domain" in the east, "Centipede Island" in the south, "Scorpion City" in the west, and "Insect Country" in the north. , and a figure similar to a high tower, with three small characters "Hell Tower" written on the side.

"Look at this terrain. There are many pictures similar to rock piles painted on the east side of this insect town. I know it. Our current position is the east side of the town. This place is called 'Snake Domain'." Zhao Lei looked at it, afraid that others would not understand it. busy explaining.

"It's called Snake Domain, will there be a lot of snakes here?" Li Haotian couldn't help but ask.

Wang Xuan silently looked at the map several times, including the layout inside the town and the situation outside, all in mind, before handing the map to Zhao Lei and the others.

"No wonder it's called Insect Town. Look at the names of the surrounding areas. Centipedes and scorpions are all related to insects." Zhang Haofei glanced at it and smiled.

At first, everyone was panicking, but now as time goes by, everyone calms down.

Anyway, things have already happened, so it's no use panicking.

Several people took out everything in the two storage belts~www.mtlnovel.com~ The crystal scales on both sides were added together, and there were a total of 328 pieces. Wang Xuan put them into his pockets. He is now The number of crystal scales possessed reached 1155.

The third-tier alloy armor on Wu Yi's body has been destroyed and cannot be worn. The woman also has a third-tier equipment on her body, which is a pair of alloy boots.

Wang Xuan took off his knight boots and put on these third-order alloy boots.

These alloy boots, enhance the movement speed by 20%, and also enhance the bounce force by 20%, which is much better than the knight boots.

After Wang Xuan put it on, he tried it, and sure enough, he felt that his movement speed seemed to be a little faster.

And his knight boots were given to the Iron Army.

In addition to the crystal scales, equipment, and some daily necessities, the woman also had 10 bottles of mid-level nutrient solution in her pocket. In addition to Wu Yi's 50 bottles, he put them away. He now has 140 bottles of mid-level nutrient solution.

"Come and see, this woman still has this in her bag." Zhao Lei took out everything in the woman's storage belt, and finally took out two pieces of parchment.

Now everyone knew what this parchment represented. There were actually two rolled up parchments in the woman's storage belt.

Wang Xuandang took one first, unfolded it, and saw a line of words.
