

## Last Building on Earth Chapter 126-130

### Chapter 126

Wang Ziren approached eight people within ten meters, and Wang Xuan finally stood up.

Yao Tiande and Duan Chen, chasing Wang Ziren over at this moment.

The injuries they suffered before have also recovered at this moment, but their faces were not good-looking, and they silently followed behind, not saying a word.

Wang Ziren looked at the people in front of him, and then his eyes fell on Wang Xuan, from his face to Xumi's belt, then looked at the alloy boots he was wearing, and finally returned to his face.

"You are the one who killed Wu Yi?" Wang Ziren stopped and spoke suddenly.

"Boss, his name is Wang Xuan, and he is Wu Yi who killed him." Duan Chen and Yao Tiande fell behind Wang Ziren, and they were busy explaining when they heard Wang Ziren speak.

Wang Ziren frowned slightly, and there was a trace of displeasure on his face, as if he was a little dissatisfied with Duan Chen's interjection, but Duan Chen was behind him and did not see Wang Ziren's expression.

Wang Xuan nodded slightly and said, "Yes, who are you?"

Wang Ziren smiled lightly and said, "Since you killed Wu Yi, you should have obtained Wu Yi's relics. The equipment and storage belt he left behind are all on you?"

Hearing this, Wang Xuan's heart froze slightly, thinking that the other party really came for the Book of Giants, but his face was still calm, but he nodded naturally: "Yes, but Wu Yi is too powerful, we At that time, the fight was brutal, and his equipment was basically damaged. He could no longer use it, so he discarded it. We took the storage belt, but this guy was very poor, and there was nothing valuable in the belt, just some crystal scales. There is also a map, nutrient solution and some daily necessities."

Wang Ziren stared at Wang Xuan, seeing his calm expression and a hint of surprise, as if he didn't understand why he came here to ask him about Wuyi's relics.

In order to cooperate with Wang Xuan, Zhao Lei immediately said, "You didn't come here just for Wu Yi's relics, right? What's so strange about these things? Is there any treasure we missed?" He pretended to be at a loss.

Wang Ziren looked at their expressions, with a gloomy expression on his face, and suddenly sneered and said, "You guys stop acting, I see the Book of Giants on you."

He suddenly said that when he saw the Book of the Giants, both Wang Xuan and Zhao Lei were stunned. Their brains were flexible, and they instantly understood that this guy was deliberately speaking the Book of the Giants to test their reactions, so they still pretended to be at a loss. appearance.

However, Zhang Haofei, Li Haotian, Yu Shanshan and others in the crowd did not turn their heads so fast. When Wang Ziren suddenly said that he had seen the Book of Giants, his first reaction was how could Wang Ziren directly see the Book of Giants that Wang Xuan had put away. The book, inevitably showed a hint of surprise and curiosity.

Wang Ziren saw the reactions of all of them, and immediately understood, he couldn't help laughing.

What he was most afraid of was that Wu Yi hid the Book of the Giant God somewhere, and Wang Xuan and others killed Wu Yi, but failed to obtain the Book of the Giant God, then the clue would be completely cut off, even if Wang Xuan and others were killed It didn't work anymore.

Seeing Wang Xuan and Zhao Lei looking dazed now, but the others around them looked surprised, and immediately understood that Wang Xuan and Zhao Lei were disguising, so there was only one possibility, they obtained the Book of Giants.

This book is in their hands.

Thinking that the Book of Giants was in the hands of the eight people in front of him, his mood suddenly became very good, and his face showed a happy look.

Wang Ziren was smiling, and Wang Xuan shook his head and said, "What book of giants, I don't know what you're talking about."

Wang Ziren put away his smile, with a solemn look on his face, and said solemnly: "I have nothing to do with Wang Ziren, this matter has nothing to do with you originally, this book of giant gods is useless in your hands, but may be offended for you. There will be endless disasters. Give it to me, I will not embarrass you, but also let you join the Rakshasa and become the core members. On the contrary, that is to be the enemy of me and the entire Rakshasa. I hope you will consider this clearly. pros and cons."

This sentence made Zhao Lei and Zhang Haofei's hearts move slightly. By handing over the Book of Giants, not only can they avoid conflicts with this terrifying Prince Ren, but can also enter the Rakshasa and become a core member?

Except for Wang Xuan, the others were inevitably moved.

Everyone saw how Wang Ziren killed the silver-backed centipede just now. If he really wanted to be his enemy, he would inevitably feel fear and hesitation.

What's more, behind him, there is Rakshasa, one of the five major forces in Insect Town.

"Wang Xuan, what do you say..." Zhao Lei approached Wang Xuan and whispered.

Hearing Zhao Lei's question, Wang Xuan understood that he was admitting in disguise that the Book of Giants was in his hands, and he couldn't help sighing secretly, and now he couldn't hide it.

Gu Manyao whispered: "The question is how can we ensure that what he said is true? What if he goes back on his word?"

Wang Ziren heard Zhao Lei and Gu Manyao's words with a hint of impatience on his face. With his status and strength today, he was willing to talk so much with these eight newcomers, which already gave them enough face.

Although he was not going to really let Wang Xuanba go, but when he heard Gu Manyao, a young rookie, dare to question his own words, he immediately felt that his majesty was offended, his face sank, and he said coldly, "I'm here for you. You have a chance to live, otherwise I can kill you all, and then take the Book of Giants, but I don't know what's good or bad."

As soon as he said this, Zhang Haofei felt unhappy, even if the other party was a strong man beyond his body, he still felt a fire in his heart, and immediately retorted: "The eight of us are all adults, no matter how powerful you are, if you want to kill Eight of us, it's not that easy."

I thought that the eight of my own teamed up, plus Wang Xuanyuan's strength beyond the average adult, if I really don't believe it, I will definitely lose to this Wang Ziren, this guy's tone is too crazy.

Seeing Zhang Haofei contradicting himself, Wang Ziren's face was a little ugly, he gave Zhang Haofei a cold look, his patience was about to end.

Zhao Lei replied: "Zi Ziren, you just said that we should hand over the book of giant gods, and let us become the core members of the Rakshasa. I suddenly thought that these are all vernacular words you are talking about, in case you get the book of giant gods. , what if you turn your face and attack us again? You must at least give us some protection."

Wang Ziren said coldly, "What guarantee?"

Zhao Lei was at a loss for words. He couldn't think of any guarantee for a while, so he looked at Wang Xuan and said, "Wang Xuan, have you thought of any guarantee?"

Wang Xuan smiled slightly and said: "It's very simple, you are now 200 meters away, and I will leave the Book of Giants here. When we leave, how about you come over and get it? Even if you regret it at that time, we still have it. Enough time to escape."

Zhao Lei said: "This method is good, but his speed is too fast. I think 200 meters is not enough. It is better to retreat to 300 meters to be safe."

Wang Ziren didn't speak, just looked at them coldly, and after Zhao Lei finished speaking, he slowly said: "Are you playing me as a fool? A group of people who don't know what they are called, originally wanted to kill you after taking the Book of Giants. If that's the case, then kill you first and then take the Book of Giants."

As soon as the words fell, he suddenly shot, and with just one punch, he went straight to Wang Xuan's face, and if he wanted to punch, he would blow his head.

He and Wang Xuan were separated by a distance of four or five meters. Suddenly, he shot, and in the blink of an eye, his fist arrived in front of Wang Xuan. The speed was dazzling.

Wang Xuan has been guarding Wang Ziren with all his might. Almost as soon as he shrugged his shoulders, he predicted that he was going to shoot. The metal tentacle on his right hand extended out, split in two, pulled out with a sonic boom, and walked to the side. He retreated violently and shouted: "Do it!"

Bai Yan raised his right hand and launched "Wizard's Blood Jet".

Yu Shanshan stretched out her hands and activated the mask.

Wang Ziren's speed was too terrifying, he moved, and he disappeared from Bai Yan's field of vision.

He took a slight breath of cold air, and suddenly Yu Shanshan groaned, his body almost twisted sideways, but Wang Ziren was punched on the right waist and abdomen.

Fortunately, Yu Shanshan reacted and immediately launched a "mirror reflection".

Wang Ziren let out a soft moan, his fist was bounced back by a huge force, and his right arm was slightly numb from the shock.

Although Yu Shanshan used the "mirror reflection" to bounce back Wang Ziren's attack, a layer of cold sweat broke out on her back. As long as she was half a second later, her body was twisted and folded in half by Wang Ziren's punch. Killed on the spot.

Wang Ziren was a little careless. He didn't expect Yu Shanshan to have this special "mirror reflection" ability. Wang Xuan's two metal tentacles, one on the left and one on the right, silently attacked from the left and right. From his right hand, a cloud of blue The dim light is coming on.

Wang Ziren is a powerhouse that surpasses his adult body. Wang Xuan understands that although he is much stronger than an ordinary adult body, he is absolutely incapable of being a match. The only way to overcome him is to use the energy of blue crystal scales.

His current body strengthening is far from what he used to be able to withstand the energy burst of a part of the blue crystal scales. When these two metal tentacles are activated, there are blue dim lights shining along the surface of the metal tentacles.

Gaining the power of the blue crystal scales, the speed of the two metal tentacles suddenly increased, and with a bang, one of the metal tentacles came to Wang Ziren and hit his head, so fast that he wanted to dodge It's too late.

Another metal tentacle silently came behind him, like a big python suddenly appearing, wrapping around his waist and pulling him so that he couldn't dodge.

Wang Xuan had calculated many times in his heart for this sudden attack, and he hit Wang Ziren with a single blow, making him unable to show his terrifying speed. The powerhouses of the five forms must also be smashed into flesh by the joint efforts of everyone.

At this moment, a metal sword suddenly appeared, levitated, and protected him in front of Wang Ziren. The metal tentacle that hit his head was drawn on the metal sword, bursting with dazzling sparks, and the blue dim light on the metal tentacle, lit up suddenly and intensely, bursting with dazzling light.

The metal sword vibrated and couldn't resist it immediately.

The terrifying energy that burst out from the blue crystal scales made even Ziren change his face. At the same moment, his waist tightened and he could hardly breathe. He was already entangled by another metal tentacle that lit up with blue light, and began to Shrink and strangle.

Wang Ziren was suddenly tied up, Gu Manyao stretched out his right hand, and the demon chi flew out and turned into a black dragon, all the scales on his body swayed and swayed, making a "crashing" sound, seized this opportunity and rushed towards Wang Ziren.

Zhang Haoifei's bones rattled, and the skeleton launched with all his strength, and went around to the other side, and a pair of skeleton arms attacked from behind.

The Iron Army launched a "savage charge", using a diamond shield to protect the body, and hit Wang Ziren from the side.

The crowd almost swarmed up and squeezed Wang Ziren in the middle. There were two real intentions of the crowd. One was to shoot with all their strength, and it was best to kill him in an instant. If Wang Ziren was too strong, everyone could not kill him, then it can also create opportunities for Bai Yan.

Bai Yan launched the "Wizard Blood Jet" again, and now everyone surrounded Wang Ziren in the center, the witch blood fell from the sky and enveloped everyone.

Even Wang Ziren was unavoidable, and immediately, together with everyone, they were all drenched in witch blood.

Duan Chen and Yao Tiande were on the other side. They didn't seem to have thought that the change was so fast. Although Wang Ziren's shot was so quick and he showed amazing means, what was even more shocking was Wang Xuanba.

This Wang Xuan's metal tentacle struck at such a high speed that there was a faint sign of surpassing his body. With one blow, even Wang Ziren was bound, and the metal sword he controlled was no match for the metal tentacle.

Among the crowd, Li Haotian did not attack, but he pulled the Orion bow in his hand into a full moon, aiming at Duan Chen and Yao Tiande, and the arrow rain of a large-scale attack was ready to erupt at any time.

If Duan Chen and Yao Tiande want to help Wang Ziren, he can stop them by launching a rain of arrows, and with just one click, Wang Xuanji and Wang Ziren should be able to decide the winner.

This kind of life-and-death battle can't be dragged on for a long time.

With a snort, Zhang Haofei, who rushed up from behind Wang Ziren, suddenly let out a roar, his eyes widened and he looked down at his chest, only to see that a metal sword entered his chest and exited from his back. Pierce his body and start writhing inside.

Flesh and blood were flying, Zhang Haofei roared miserably, and the skeleton hand couldn't care about attacking Wang Ziren any more.

On the other side, Gu Manyao had just released Yaochi, and the surviving Yaochi was about to pounce on Wang Ziren. Suddenly, a sword fell from the sky and inserted it into Yaochi's body. The black dragon scales pierced through the holes, but this huge force was inserted into the monster chi, and hit the ground rocks heavily.

The metal sword was spinning violently, generating a terrifying force that pressed against the monster below, letting the monster struggle, but it was like being pressed against the top of Mount Tai and could not break free.

Gu Manyao opened her eyes wide in shock, showing an incredible expression on her face.

The iron army who launched the "savage collision" successfully hit Wang Ziren from the side. Ziren's body immediately followed his diamond shield and flew out to the side together, pulling the metal tentacles wrapped around his waist. Get straight.

Wang Xuan quickly realized that something was wrong. The two metal tentacles he controlled, one was about to shake the metal sword that was protecting Wang Ziren in front of him, and the other was wrapped around his waist and launched a twisting strangulation. Suddenly following the iron army and flying out, with a "snap", the metal sword couldn't withstand the force of the metal tentacles, and it fell down. Suddenly, it reached his chest.

The speed of this sword is too fast. If Wang Xuan had not used the energy of the blue crystal scales to improve his speed, strength and reaction ability, this sword would not have time to respond.

The metal tentacle that shot down the metal sword before pulled back, and with a slam, it slammed into the metal sword that shot over.

Wang Xuan pulled another metal tentacle that wrapped around Wang Ziren's waist, and let out a low growl, the blue crystal scales activated, and a terrifying force erupted, pulling it into the air and flying towards him.

Tie Jun also flew over with Wang Ziren.

Tie Jun hit Wang Ziren and Wang Ziren grabbed his Vajra Shield with his backhand. Now that he was pulled over by Wang Xuan, he even lifted up Tie Jun with the Vajra Shield and threw it towards Wang Xuan in the air.

Wang Xuan took a deep breath, this Ziren's horror was beyond his imagination.

The metal sword he can control is not the one that everyone thought before, but several.

Only at this moment, there were three handles in a row, one pierced through and severely injured Zhang Haofei, twisted in his body, blood and flesh flying, and the other held against the living monster, pressing it firmly on the strange rock, unable to move, and returning. A sword attacked Wang Xuan, who had just been knocked into the air by his metal tentacles.

It was the first time that Wang Xuan had encountered such a hatching beast, and he actually possessed several swords.

Although Tie Jun was fully grown and his strength was not weak, he was crushed by Wang Ziren regardless of his speed or strength.

Yu Shanshan opened the mask to protect Wang Xuan. Tie Jun, who was smashed over, slammed into the mask.

There was a crisp sound, the mask shattered, Tie Jun opened his mouth, and a stream of blood spurted out. Wang Xuan seized the opportunity, and the retracted metal tentacle burst into the air~www.mtlnovel.com~ again Pulling over Wang Ziren's head.

This strike contained the energy of blue crystal scales, and both the speed and strength faintly surpassed the limit of the adult body. Although Wang Ziren had three metal swords, he didn't have time to defend at the moment, and a single blow would shatter his head.

Seeing this blow, he came in front of him, and suddenly a metal sword floated out of Wang Ziren's body and protected him in front of him, blocking the sure-kill blow.

A fourth metal sword appeared.

Immediately after, the fifth metal sword shot out from Wang Ziren's body, slamming into Wang Xuan's chest like a pistol.

Wang Xuan sucked in the cold air, and no longer hesitated, the metal tentacles immediately turned back and wound up along the wrist.

In the past, when he activated the energy of blue crystal scales, he only needed to use the metal tentacles to instantly kill the opponent. This time, he was forced to activate the giant arm of beast.

It was the first time for him that the energy of the blue crystal scales cooperated with the giant arm of the beast.

And this is also the most dangerous situation, it is not absolutely necessary, he is never willing to use it.

## **Chapter 127**

The giant arm of the beast was originally an attack that consumes the most energy and can burst with the strongest power. Combined with the energy of the blue crystal scales, it can be said that this burst of power will reach an unimaginable level of terror and will exceed the limit that his body can withstand. A little careless, is the end of the body explosion.

It's just that Wang Ziren is too powerful, each metal sword has the strength to easily crush an adult body, and he can control five metal swords at the same time, which is simply appalling.

Yao Tiande, who was standing still, was pale, his lips trembled slightly, and he muttered, "Is this the fifth form? It's too strong, but this Wang Xuan, who is only an adult, is so terrifying..."

The right arm was entangled with metal tentacles, and the flesh and metal fused, turning into a half-flesh, half-metal beast arm. This time, blue neon lights lit up on the arm.

With a loud bang, Wang Xuan swung the giant arm of the beast that was rendered by the blue rainbow light, and hit the fifth metal sword that burst out with precision and accuracy.

"Crack!" There was a crisp sound, and Wang Ziren suddenly let out a roar, with a look of pain on his face.

The fifth metal sword he controlled shattered.

These five swords were like a part of his body. One of the swords shattered, and he was shaken, and blood flowed from the corner of his mouth immediately.

He opened his eyes, and there was a terrifying divine light in them, with a continuous sound, the metal sword that had penetrated Zhang Haofei, which had severely injured Zhang Haofei, suddenly flew back upside down. Zhang Haofei groaned and fell heavily to the ground. Jian also gave up Yaochi and flew upside down.

All the four metal swords returned to his body and disappeared. In the next instant, the four swords appeared from all four directions of his waist and jumped out suddenly.

"Crack!" A crisp sound, the metal tentacles wrapped around his waist were instantly broken by the four metal swords, and exploded into a large number of metal fragments scattered.

The four swords were launched together, breaking the metal tentacles that entangled his body. Wang Ziren's face was pale, his long and narrow eyes were narrowed together, and he finally regained himself. At this moment, he was like a demon, with a Grab, he grabbed the four swords together, and together with the broken fifth metal sword, they joined together and turned into a two-meter-long giant sword.

When Wang Xuan jumped up, the metal tentacles broke, and he groaned, as if he had been punched in the chest, but the giant arm of the beast lit up with blue rainbow light still slammed towards Wang Ziren.

At the same moment, the giant sword formed by the fusion of five metal swords took shape, and Wang Ziren held the giant sword and slashed it out.

The giant sword made an earth-shattering, ear-shattering noise against the giant arm of the blue beast. In the dazzling light of the explosion, Wang Ziren grinned, and his body swayed violently. He slashed out the giant sword with all his strength. It was the giant arm of the beast that came over to Wang Xuan and chopped it out.

Wang Xuan's expression changed, the goblin scales on his body could not stand before the giant sword arrived, and began to collapse.

At this moment, Yaochi appeared, like a nimble little dragon, suddenly wrapped around the giant sword, blocking the fatal blow for Wang Xuan.

At the same moment, Wang Xuan's left hand was entangled by the metal tentacle, the blue light lit up, and another giant arm of the beast appeared, slamming against the giant sword from the side.

The giant sword vibrated, numerous cracks appeared on the surface, and more blood flowed out of Wang Ziren's mouth.

"Go away!" He suddenly roared, dragged the giant sword, and swung it out in the air, and the Yaochi, which was entangled in the giant sword, immediately broke into seven or eight pieces.

This demon chi and Gu Manyao seem to be two sides of the same body. Now the demon chi is split into seven or eight pieces. Gu Manyao screams in agony, blood spurting from his mouth, and falls back to the sky. There are terrible cracks on the surface of his body, and he seems to be going from split.

After shattering the Yaochi, Wang Ziren dragged the two-meter-long giant sword and swept it out sideways, blowing a strong wind and swept towards Wang Xuan.

In just a short period of time, Zhang Haofei's chest was smashed to form a huge transparent hole. He was severely injured and lost his fighting power. Gu Manyao's monster was shattered into seven or eight pieces. She felt the same, fell to the ground, and suffered more serious injuries than Zhang Haofei. .

It can be said that apart from Wang Xuan, the most powerful two of the eight were severely injured. Although Tie Jun was injured, luckily the injury was not serious. After breaking the mask, he vomited blood and turned over. "Shield Strike", attacking Wang Ziren from behind.

Bai Yan didn't make a move, stepped aside, concentrated his mind, and launched the witch blood with all his strength.

Wuxue has penetrated into Ziren's body, he is controlling Wuxue and wants to influence Ziren.

It is not easy to control and influence a fifth-form powerhouse with witch blood.

With Bai Yan's full force, Wang Ziren was finally affected. The giant sword that was swept away with all his strength suddenly shook violently on the way, and there was a slight delay in the movement.

Although Wang Xuan used the energy of the blue crystal scales, combined with the power of the giant arm of the beast, in terms of strength, he could even overwhelm Wang Ziren, but in terms of speed, there was a slight difference.

The giant arm of the beast strengthened the strength of his arms, but his legs failed to get the same strengthening, and his movement speed couldn't keep up with the strength.

Fortunately, Wu Xue played a role, Wang Ziren's movements were slightly sluggish, and Wang Xuan's giant arm of beast slammed, hitting the giant sword that was swept over again. In the harsh sound, more appeared on the surface of the giant sword. Crack, his other giant beast arm, hit Wang Ziren's chest.

Blood flowed from Wang Ziren's mouth.

He pulled away suddenly and backed away violently.

Zhao Lei on the other side activated the "Holy Eye" and cooperated with the Holy Light of the Cross to capture Ziren's movements all the time. At this moment, he finally seized the opportunity. At the moment when he retreated, the Holy Light of the Cross hit him precisely on his back.

With a thud, the holy light of the cross penetrated through the body and exploded, Wang Ziren opened his mouth, and blood spurted wildly from his mouth.

In the blood that spewed out, there were faintly broken internal organs.

His long and narrow eyes were wide open, and blood was seeping out of them. He opened the waist bag of the storage belt with his left hand, and took out a bottle of glass tube only the size of a thumb. There was a black mass in it, and it was violently crushed.

As soon as the glass tube shattered, the black substance encountered the air, and a large amount of black smoke burst out immediately.

When the incident happened suddenly, everyone was shocked. They didn't know what the black smoke was. They thought it was poisonous. The first reaction was to hold their breath and retreat.

Wang Xuan smashed the giant arm of the beast with all his strength, and suddenly black smoke surged. He missed the shot, and Wang Ziren in front of him had disappeared.

With awe in his heart, Wang Xuan opened the pocket in his left hand, took out the heart of a mechanical beast from it, summoned the little girl, and merged with him.

Launching the giant arm of the beast and borrowing the energy of the blue crystal scales, although the power is extremely powerful, it consumes a lot of physical strength. There is a faint tearing pain in his body. The initial state powertrain supplements physical energy.

Combining with the mechanical beast, immediately added a layer of defense to the body, replenishing the exhausted physical strength, and then took out the flame spar and threw it on the ground.

The flame spar hit the ground, shattered, and with a loud bang, terrifying flames rose.

The raging flames pushed the black mist away. Amidst the exclamations of the crowd, Wang Ziren, who originally wanted to hide in the black mist, reappeared. He had been staying less than three meters away from Wang Xuan. At this moment, he was holding a bottle of liquid in his hand and poured it into his mouth.

As the liquid entered his throat, a mass of white light emerged from his body, and the white light was mainly concentrated in the chest and abdomen.

This is a special healing holy medicine. Drink it into the body, and immediately start to heal the serious internal injury he just suffered. Looking at his body, there is a layer of mechanical metal on the outside of the alloy armor.

Like Wang Xuan, he took out the giant mechanical wolf and merged with him to further enhance his strength.

The violent flames that erupted from the flame spar burned the black mist, and everyone felt the threatening heat wave and avoided them one after another.

Wang Ziren threw away the healing holy medicine he had just finished drinking, his face distorted and he shot up.

He really did not expect that only eight adults would be able to push himself to this point.

What shocked him the most was that Wang Xuan did not know what treasure he had obtained. In his adult form, he was able to burst out with a strength that was not inferior to that of ordinary fifth-form powerhouses.

If such a treasure can be obtained for himself, can he dominate the entire insect town?

Wang Ziren had a greedy look in his eyes. At this moment, he was more determined to kill Wang Xuan. Not only could he obtain the Book of Giants, but he could also obtain some kind of mysterious treasure in his body that could emit blue dim light.

His speed was faster than everyone else. He seemed to be rushing towards Wang Xuan, but suddenly turned around and rushed towards Zhao Lei.

He was severely injured by Zhao Lei's sneak attack just now, and he hated him so much that he planned to kill him first, and then kill Wang Xuan.

Zhao Lei was horrified, how could he keep up with Wang Ziren's speed? Although he had holy eyes and captured the opponent's attack trajectory, his body couldn't keep up with the speed of his thinking.

"Wang Xuan—" He only had time to call out Wang Xuan's name, and launched the Holy Light of the Cross to counterattack as much as possible.

Wang Ziren easily avoided the holy light of the cross he launched, and swept the giant sword out, and he was about to cut Zhao Lei in half. He didn't want the witch blood to play a role again and affect him.

He felt his head sink, his arms suddenly softened, and the giant sword that swept out immediately stopped.

"Damn!" Wang Ziren was extremely angry, and finally began to suspect that it was the side effect of being sprayed with the blood on his body. It seemed that he had to kill the person who sprayed the blood before.

Just when he had this idea, Wang Xuan seized the opportunity of his giant sword stagnating, and with a blow from the monster's giant arm, he blocked the sweeping giant sword for Zhao Lei.

In terms of power, the giant arm of the monster that borrowed the power of the blue crystal scales can suppress Wang Ziren.

The giant sword in Wang Ziren's hand was bounced back heavily, and Wang Xuan's other giant beast arm followed closely, hitting Wang Ziren's chest.

Although there is a double defense, the armor of the mechanical beast on the outer layer immediately twisted and deformed and collapsed.

Wang Ziren was too strong, so Wu Xue couldn't affect him all the time. He could only play a role at intervals. When the mechanical beast's armor was twisted and deformed, he recovered again, and his body turned around following the attack of the beast's giant arm, venting the power of the attack as much as possible. Go, hit Wang Xuan's chin with an elbow on his left arm.

Wang Xuan only felt a buzzing sound in his head, his jaw shattered immediately, and his body fell out.

Wang Ziren seized the opportunity, swung the giant sword, and slashed down into the sky.

Li Haotian with the Orion bow on the other side has been monitoring Duan Chen and Yao Tiande on the other side, but the two of them stood silently watching the battle. Seeing Wang Xuan in danger at this moment, Li Tianhao couldn't help it. The condensed two-meter giant arrow was shot, and it shot Wang Ziren like a drill.

"Go away!" Wang Ziren suddenly roared, and the giant sword in his right hand slammed at a faster speed, hitting the light arrow that was shot over.

With a loud bang, the arrow of light shattered, and Li Haotian opened his eyes wide with an incredible look on his face, his body icy cold.

His two-meter light arrow was so powerful that it was shattered by Wang Ziren's giant sword?

This guy is just horrible.

Just after smashing Li Haotian's light arrow, Tie Jun launched a "heavy blow" and hit him from behind.

Although he knew Wang Ziren's horror, he still rushed forward without hesitation.

As soon as Wang Ziren turned around, he dragged the giant sword and slashed out horizontally, smashing the iron army together with the shield in his hand. Suddenly, the giant sword sank, but Wang Xuan, who fell to the ground, grabbed him with a pair of monster arms. 's great sword.

Wang Ziren twitched hard, but when he failed to twitch, Tie Jun slammed into him.

Wang Ziren couldn't dodge in time, and groaned. Fortunately, he had the double defense of the mechanical beast and the alloy armor. He was not lightly injured. With a flick of his right hand, the two-meter giant sword suddenly split and turned into five metal swords.

Wang Xuan was unable to grasp the five metal swords together in an instant, and one of the metal swords shot out from between his arms, piercing the double defense of the mechanical beast and the goblin scale armor on his body. Front chest in, back out.

The body was pierced, the metal sword twisted violently in his body, and the flesh and blood flew out immediately, the pain pierced his heart.

Wang Xuan reacted quickly, grabbing the twisting metal sword with his right hand. Under his terrifying power, he instantly pulled out the metal sword that pierced through his body, but he was unable to grasp the rest with his other hand. of four metal swords.

The four metal swords erupted together, shook each other, and flew out of Wang Xuan's palm.

With a loud bang, the golden sword hit the Vajra Shield, sending the Iron Army and the Vajra Shield flying.

The other three metal swords were shot at Bai Yan, Li Haotian and Zhao Lei.

Wang Ziren did not control the metal sword to shoot at Wang Xuan. He understood that the metal sword was not enough to kill Wang Xuan. Instead, he could easily be smashed by his monster arm. To kill him, he could only use a giant sword that combines the power of five swords. Just do it.

Wang Ziren controlled the four swords to attack everyone separately, turned around and rushed towards Bai Yan among them.

Wang Xuan pulled out the metal sword that had pierced through him, and when he used his right hand with force, only a crunching sound could be heard, and the metal sword was crushed by his terrifying power.

Wang Ziren, who was running wildly, shook his body and groaned, and blood immediately flowed from his mouth again.

Bai Yan's face changed slightly when he saw the metal sword shot at him, and he continued to retreat.

Yu Shanshan has been paying attention to his safety, and without hesitation, activated the mask to protect him.

The metal sword hit the mask, and the mask couldn't bear the force and began to shatter.

Yu Shanshan entered the "mirror-reverse" state and rushed over at full speed, protecting Bai Yan with her body.

Wang Ziren appeared at the same moment, Bai Yan's witch blood had a great influence on him, if it weren't for the witch blood, he would have killed Wang Xuan to win, and now he wants to kill Bai Yan first, and doesn't want to see Yu Shanshan's again." "The mirror is reversed", having suffered a loss before, Wang Ziren would not be fooled again, and turned around Yu Shanshan in a flash of lightning.

Bai Yan understands that the speed cannot keep up with Wang Ziren. Between life and death, his face is still calm, his right arm is transformed into a blood crystal giant sword, and his chest and back are armored with blood crystals. Ren, while cutting the blood crystal giant sword out.

With a wave of Wang Ziren's giant sword, Bai Yan's blood crystal giant sword was instantly shattered, and the difference in strength between the two sides was too great.

Behind him, Wang Xuan was running wildly. Seeing that it was too late, he put away the giant arm of the demon beast in his right hand, and showed the metal tentacles again.

Wang Ziren was about to dodge the metal tentacle attack, and then behead Bai Yan, but he didn't want to suddenly have a headache at this time, his eyes suddenly turned black, and he almost fell.

Bai Yan finally successfully launched the witch blood again, which affected him.

Wang Ziren's body was stagnant, and the metal tentacles snapped on his back from behind.

Although there is a double defense, it can't resist the metal tentacle's blow. The mechanical armor and the alloy armor split open, and blood splashes from it. Wang Ziren groaned, and the metal tentacle stretched forward and wrapped around his neck.

Wang Xuan exerted his strength, dragged his body, flew into the air, and smashed towards the other side.

The metal tentacles kept shrinking and wanted to break his neck. Wang Ziren couldn't care about attacking Li Haotian, Zhao Lei and the others, and was busy recalling the metal sword, and then showing it from the neck to fight against the metal tentacles.

Knowing that he couldn't be entangled and strangled, Wang Xuan simply pulled him out, loosened his neck, and the metal tentacles rolled back, wrapping around his arms, showing the giant arms of the beast again, and rushing towards him.

Wang Ziren fell heavily on the ground, rolled on the ground, and fell in front of Duan Chen and Yao Tiande. He felt a severe pain in his back, and understood that the blow just cracked his vertebrae, and the injury was not minor. Has affected his speed.

Seeing Wang Xuan pounce on him again, Wang Ziren finally gritted his teeth and said, "Come on, you two, and block him for me!"

Now that the battle has come, Wang Ziren has to admit that it is difficult to defeat Wang Xuan's eight people by himself, with one enemy and eight people. Although he has severely injured several people, he has not really killed even one person. He is shocked. , can only order Duan Chen and the two to help.

Without his order before, the two only dared to watch, but did not dare to do anything.

Now, with Wang Ziren's order, Duan Chen and Yao Tiande have successively revealed their hatching beasts.

Duan Chen immediately transformed the earthen shield into the size of a round table, and hurled it towards Wang Xuan, who was rushing up, trying to block him.

Unexpectedly, Wang Xuan broke through the earth shield in an instant with a pair of giant arms of demon beasts, ignoring the explosive power of the earth shield, and rushed straight to Wang Ziren.

Duan Chen's eyes widened at this scene, with a look of disbelief on his face.

Yao Tiande roared, and blue-white electric light burst out from the surface of the metal stick, which exploded its power to the extreme, and swept sideways towards Wang Xuan, who was rushing up.

Wang Ziren stood up, combined the five metal swords he recalled into one, turned it into a giant sword again, and slashed it out in the air.

At this moment, the witch blood launched by Bai Yan took effect again.

As he continued to try, he now began to gradually understand how to use the witch blood to affect the powerhouse that surpassed the adult body. The effect of the witch blood began to become more and more obvious.

Wang Xuan avoided the metal stick that Yao Tiande had swept over, and the giant beast arm in his left hand stretched out, grabbing the stagnant giant sword of Wang Ziren, and the giant beast arm on the right slammed into it. .

Wang Ziren's long and narrow eyes glowed with terrifying light. Although he had just been affected by the witch blood, fortunately, the time of the influence was very short. , suddenly made a thud, and received a heavy blow from the metal stick on the face.

The incident happened suddenly, not to mention that Wang Ziren didn't react, even Wang Xuan was greatly stunned.

Duan Chen on the other side showed his earthen shield again. He was about to continue attacking Wang Xuan, but when he saw this scene, he instinctively stopped.

No one could have imagined that the metal rod that Yao Tiande swept out was just avoided by Wang Xuan, and the metal rod turned back.

Unprepared, Wang Ziren never thought that Yao Tiande would smash the metal stick on his face, even if he was a powerhouse in the fifth form, he didn't have time to dodge.

This stick was so powerful that it directly smashed his nostrils, cracked his teeth, and one of the eyeballs burst out of his socket, almost blowing his head.

Fortunately, Wang Ziren is a strong man who surpasses his adult body. At this moment of life and death, he has an instinctive survival response, and he reluctantly tipped his head backwards, which nearly let out part of his power, and was not directly headshot by this stick.

"Yao Tiande, are you crazy?" Duan Chen couldn't help but scream.

Wang Xuan seized the opportunity and swung the giant arm of the beast fiercely, followed by another blow, and Wang Ziren fell back in the middle.

This time, Wang Ziren could no longer dodge, his head exploded like a watermelon, red and white mixed together, splashing everywhere.

Seeing that Wang Xuan's head was smashed by Wang Xuan~www.mtlnovel.com~ Yao Tiande immediately put away the metal stick, jumped back, opened the distance from Wang Xuan, and shouted, "Duan Chen, stop!"

Duan Chen was in disbelief, watching Wang Ziren, who had become a headless corpse, fall down, his face turned bloodless, and then looking at Yao Tiande, his whole body was trembling slightly because of excessive fear.

"Zi Ziren said the Book of the Giant God in front of us. There is a huge secret hidden in it, and it even involves the survival of the entire Rakshasa. As long as we know the Book of the Giant God, he will not let it go no matter what. We, if we let him succeed, we will all be killed by him, and he will never let the second person know about the Book of Titans."

Yao Tiande was much calmer than him, and said the reason for his sudden action: "We want to survive, the only chance is to kill him."

Duan Chen was stunned, he didn't know what the Book of Giants was, listening to Yao Tiande's words, his face was blank, looking at Wang Ziren's corpse, his heart only felt empty, and all his strength seemed to be drained.

Then, he slowly fell softly, and was unable to stand because of excessive fear.

"He died...we...we will also be killed by Rakshasa...we all...can't live..."

## **Chapter 128**

In Wang Ziren's headless corpse, a white light appeared, and there was a strong aura of life in it, struggling constantly.

This hatching beast, which has evolved to the fifth form, seems to be full of unwillingness, and wants to struggle to escape.

Suddenly, an invisible force descended, instantly erasing the consciousness of life in this white light, turning it into a mass of pure energy.

This mass of energy flashed away in the air and disappeared into Wang Xuan's right hand.

Immediately afterwards, he felt the white light in his right hand fluctuate violently, and there was a faint sign that it was about to tear.

Wang Ziren, as a powerhouse in the fifth form, how powerful the hatching beast energy he left behind after his death, and now all of them are swallowed up by Wang Xuan's magical beasts. Coupled with this Wang Ziren's energy, he immediately propped up his white light like it was about to burst.

Wang Xuan's heart trembled, feeling the violent fluctuations of the white light, and there was a faint feeling of tearing. Could it be that he wanted to break through the adult body and enter the fifth form.

However, this feeling of tearing only lasted for a few seconds, and the violent fluctuation of the white light gradually subsided. The excess energy seemed to overflow and slowly dissipated into his body, helping him recover from the battle just now. injury.

He has now reached the limit of energy that the adult body can absorb, but he failed to successfully break through the adult body. Now he understands that Yuan Xiao did not lie to them. It is very difficult to break through the adult body. It is not just enough energy to break through. question.

Looking at Duan Chen, who fell softly, and Yao Tiande, who retreated five meters away and put away the metal rod, Wang Xuan slowly restrained the giant arm of the beast and began to control the energy of the blue crystal scales in his body that were faintly showing signs of runaway.

The muscles in his arms were trembling slightly, and all over his body, muscles in many places were strained or torn due to the overloaded fighting, and a large number of blood vessels burst open. Fortunately, the excess energy that had just overflowed was constantly nourishing The whole body repairs these injuries.

On the other side, Li Haotian, Zhao Lei, Bai Yan and others were busy rushing over, looking at Wang Ziren who had fallen to the ground and turned into a headless corpse, and then looking at Yao Tiande, all of them couldn't hide the shock in their eyes.

No one could have imagined that Wang Xuan, who was difficult to kill by the eight of them together, would be killed by Wang Xuan because he was beaten by Yao Tiande.

Gu Manyao was the one who was injured the most. She was lying on the ground at the moment, almost unable to move, and then Zhang Haofei, but because the change in this scene was so amazing, he resisted being twisted like a tattered chest and lifted it up with support. Turning his head, he looked towards this side with some curiosity.

Looking back on the experience just now, the fear of this princely kind made everyone feel a sense of luck for the rest of their lives.

Wang Xuan slowly sat down on a stone and peeled off the heart of the mechanical beast. Looking at Wang Ziren's body on the ground, the heart of the mechanical beast was peeled off from the alloy armor of his body. rolled to the ground.

Yao Tiande stood five meters away from him, watched Wang Xuan sit down, and finally said: "We kill Wang Ziren now, and Rakshasa will do everything in his power to kill us. Rakshasa confrontation."

Li Haotian said, "What about us? You belong to you, we are us, and you brought this Ziren here. These things are all up to you."

Wang Xuan waved his hand, motioning Li Haotian to stop talking, no matter what, Yao Tiande would be the most important in killing Wang Ziren today, otherwise Wang Ziren would join Yao Tiande and Duan Chen to attack together, the consequences would be unimaginable, and they would be the ones who would be defeated.

Li Haotian closed his mouth when he saw Wang Xuan waving his hand.

Wang Xuan thought for a while and said, "How can you find us so quickly? Centipede Island is not small. It's not easy to find a few people here."

Yao Tiande said with a wry smile: "Because of Wu Yi's head, Wang Ziren has a special item for tracking ability. Although it is a one-time use, it is indeed magical, just because you have touched Wu Yi's head. With this tracking item, he brought We found you."

Wang Xuan looked at Wang Ziren's corpse on the ground, the intermediate storage belt around his waist, nodded slightly and said, "I see, it has solved my doubts." I wondered what treasures were stored in this guy's belt. , but now he doesn't even want to move a little finger, just sits and rests silently.

Zhao Lei walked over and said, "What do you mean by the secret of the Book of Giants? Just because of the Book of Giants, Wang Ziren wants to kill you all? So you are the first to do it?"

Yao Tiande hesitated for a moment before saying, "This matter involves too much, so it's best not to have too many people know about it."

Zhao Lei said: "My idea is just the opposite. The reason why a secret is a secret is because too few people know it. Those who know the secret will not be safe. If everyone knows it, the secret will no longer be a secret. Everyone It's safe."

Yao Tiande didn't expect Zhao Lei to have this set of theories. After thinking about it, he smiled bitterly: "What you said also makes sense."

Zhao Lei stood beside Wang Xuan and looked at Yao Tiande. Although the other party helped them successfully kill Wang Ziren, Zhao Lei was wary of Yao Tiande. This person could kill even his own boss. Who would dare to trust him casually?

Yao Tiande seemed to understand what these people were thinking, and said, "I heard about the legend of the Book of Giants from a friend named Huang Tao before, but he has already left here. It is said that the Book of Giants came from above."

He reached out and pointed upwards.

Everyone was startled.

Wang Xuan raised his head and immediately saw the top of the sky, which was 100 meters high, and said, "Above? Do you mean a higher floor?"

"That's right." Yao Tiande looked around and determined that they were the only ones in this area, so he continued to whisper: "It is said that this book of giant gods records the secrets about gods, as long as you know this secret, you will be able to compete with gods and gain rule. The authority of this world, the freedom to enter and leave this world."

Wang Xuan's heart moved, thinking that the records in the Book of Giants were somewhat similar to what he said. It seems that this person named Huang Tao is not a simple person, and said: "Where did Huang Tao know about this? He left this world. , went to the world above?"

Yao Tiande said: "Where did Huang Tao know about this, I don't know either, he just asked me to chat when he was about to leave, and talked about a lot of rumors about this world, including the book of giant gods, as for him going. I don't know where."

Wang Xuan frowned slightly and said, "The only place he can go is the floor below or the floor above, how could you not know?"

Yao Tiande said: "Maybe you didn't know when you came here. Actually... there is another situation, that is, every six months, people who enter here fail to break through the body and will be sent away. As for where to send it, we have no idea. People know."

Everyone was stunned, and Zhao Lei couldn't help but say, "Is there such a rule?"

Yao Tiande said with a wry smile: "Yes, there are various legends about where to send it, and each one is more terrifying than the other, and there are even rumors that it will be eaten by this building. In short, everyone who arrives here is desperately trying to break through, but it is a pity that they want to break through. Being an adult is really hard, except for a few people who can succeed, the vast majority of people can't."

When everyone heard this, they all looked at each other in dismay. For the first time, they knew that it was so important to be able to break through into adulthood.

Wang Xuan said: "So, your friend Huang Tao, because he couldn't break through the adult body, arrived in half a year and was sent away?"

Yao Tiande nodded.

Wang Xuan pondered slightly: "The legend of the Book of Giants came from above, but why did it fall into Wu Yi's hands? How did Wang Ziren know all this?"

Yao Tiande said: "Speaking of this, I know a little bit, but I can't guarantee the accuracy. In fact, most of it was told to me by Huang Tao, plus some of my guesses, he said that there was a woman from above who came to Insect Town. It seems that the relationship with Rakshasa is very deep, and the leader of Rakshasa must respect her when he sees her. She asked Rakshasa to ask for some people. Among them were Wang Ziren and Wu Yi, when Ziren was still fully formed, they were still teammates in the same team."

After hearing this, Wang Xuan realized that Wang Ziren and Wu Yi were once part of the same team.

"No one knows what this woman is going to do, only that she took the group of Wang Ziren and Wuyi into Centipede Island, and then something happened, they were attacked, only Wang Ziren broke through and escaped alive, Of course, we learned later that Wu Yi was not dead."

"For a long time, we have only secretly arrested Wu Yi under the order of Wang Ziren, but Wang Ziren never said the specific reason, and now I know that it is because of this legendary book of giant gods, so I am guessing that this giant \*\*\*\* Could it be that the book was brought down by this woman, and something terrible must have happened in the depths of Centipede Island at that time, Wu Yi got the Book of Giants and escaped, and Wang Ziren broke through into the body. He escaped alive and told everyone that they were attacked by a very terrifying monster, everyone died, and only he escaped."

"Looking back now, he concealed the book of the giant gods. Obviously he lied. I suspect that the woman's death was related to him, and maybe even killed by him. The purpose may be for the book of the giant gods."

"If this is true, it would be terrifying. It is conceivable that if this matter spreads out, let alone the people above, even the leader of the Rakshasa will not let him go. I can't bear the anger above. So I understand that he dared to mention the Book of Titans in front of us before, and he has plans to silence all of us."

Hearing this, Wang Xuan understood why Yao Tiande wanted to kill Wang Ziren so decisively, just because he knew that after Wang Ziren killed them, he would never let him and Duan Chen go.

Duan Chen, who fell softly to the ground, slowly heard this, his face finally softened, and he understood that if Yao Tiande didn't start, Wang Ziren would kill Wang Xuan and eight people after killing them. They had no choice at all. .

"Leader of Rakshasa? So, Wang Ziren is not the boss of Rakshasa?"

Yao Tiande shook his head and said, "Of course not, Rakshasa is a large-scale organization, Wang Ziren is our boss, and he has a group of subordinates like us, we are what outsiders call core members, but in fact we are It's just a dog in his eyes."

Yao Tiande said this with a slightly wry smile: "As for Wang Ziren's position in Rakshasa, it is equivalent to being on the second floor of the pyramid. The first floor is the Rakshasa leader. It is said that Rakshasa is the code name of this leader, but I haven't seen it. After him, only the real core person in the second layer of Rakshasa like Wang Ziren is qualified to see him."

Zhao Lei interfaced: "So it seems that there are people like Ziren in your Rakshasa? How many?"

Yao Tiande said: "Not many, I can know about eighteen people. I don't know how many actually."

"Eighteen..." Wang Xuan and Zhao Lei took a deep breath.

"These eighteen people have all broken through to the fifth form?" Zhao Lei was busy asking.

Yao Tiande nodded and said, "The adult body can only be a core member at most. Only by breaking through the adult body can one enter the Rakshasa's true power center and be on his own."

"My good fellow, there are eighteen fifth forms, Wang Ziren is dead, there are still seventeen, plus a mysterious Rakshasa leader, if they want to take revenge for Wang Ziren, what are we going to fight? Wash your neck so that someone can cut it." Zhao Lei smiled bitterly and touched his nose.

Tie Jun slowly said, "We are not vegetarians either. If we can break through into adulthood, we don't need to be afraid of them. If we can kill Ziren today, we may not be able to kill the Rakshasa leader."

Wang Xuan glanced back at him and said with a toothy smile: "Brother Tie said it right, no matter how powerful or powerful the opponent is, we can't lose our fighting spirit first."

With this rest, the energy of the blue crystal scales in Wang Xuan's body slowly subsided. Fortunately, the strength of the adult body was strong enough, and the energy did not runaway.

Feeling that his physical strength was slowly recovering, Wang Xuan stood up and went to check on Gu Manyao's injury first.

Although she was seriously injured, she is already recovering and should be fully healed in a while.

Thinking of the previous battle, if Gu Manyao hadn't sacrificed his life to save him, he would have been split in half by Wang Ziren's sword, and he was very grateful to Gu Manyao.

When Gu Manyao saw Wang Xuan regain his mobility, the first thing he checked was his injury, which shows the importance of himself in his heart.

This gave her a strange feeling all over her body.

At this moment, Zhao Lei had stripped off all the armor on Wang Ziren's body.

"Wang Xuan, except the alloy helmet is seriously damaged and cannot be used, the other four pieces can still be used." Zhao Lei put all four pieces of alloy equipment on the ground with some excitement, plus the mechanical beast heart of the mechanical giant wolf, Then take the intermediate storage belt and give it to Wang Xuan.

He knew that if there was something good on Wang Ziren, it would definitely be in this intermediate storage belt.

Wang Xuan did not rush to check the contents of the intermediate storage belt, but looked at Yao Tiande and Duan Chen and said, "We have completely offended Rakshasa by killing Wang Ziren. If Rakshasa finds out Wang Ziren, we killed him. , I'm afraid you won't let us go, what are your plans?"

Yao Tiande said sincerely: "Duan Chen and I want to follow you. If you don't want to take us in, it will be a dead end for us."

Duan Chen also stood up slowly, he didn't speak, just stood beside Yao Tiande, obviously expressing to advance and retreat with him.

Wang Xuan pondered slightly, and said: "I killed Wang Ziren, even if Rakshasa wants to take revenge, you should find me. As for the stick you hit... No one saw it around at that time, as long as we didn't say anything, They don't necessarily know."

A miserable smile appeared on Yao Tiande's face, and he said, "Many people saw that we were the ones who came here with Wang Ziren. Now that Wang Ziren is dead, as subordinates, we will all be executed regardless of whether it has anything to do with us or not. This is the rule of the core members of the Rakshasa."

Wang Xuan was stunned, he did not expect such a regulation.

Zhao Lei said: "It seems that they really have nowhere to go. Since that's the case, Wang Xuan, why don't you..." He said while looking at Wang Xuan, revealing the meaning of asking.

Although he began to be a little wary of these two people, after chatting for a while, his impression of Yao Tiande changed a little, especially Yao Tiande knew a lot of rumors, which made him very interested.

Wang Xuan understands that the two of them have nowhere to go now, and for the time being, they can only be accompanied by the eight of them. The two are familiar with things in Insect Town, and it happens that he plans to go deep into the central area of Centipede Island, with two more helpers. Also a good thing.

After knowing that the book of giant gods was suspected to come from above, he became more and more curious about what secrets this book of giants recorded, which could make people comparable to gods.

However, what Yao Tiande said just now about the woman above made him doubtful.

The woman took Wang Ziren and Wuyi into the Centipede Island, most likely because she wanted to enter the depths of the Centipede Island and search for the gate of immortality recorded in the Book of Giants.

It's just that something happened in the process, and in the end, only Wang Ziren and Wuyi escaped alive.

"This Wu is only an adult. He can escape alive, which shows that the depths of this centipede island should not be as scary as imagined." Wang Xuan pondered in his heart.

Yao Tiande thought that Wang Xuan was afraid and worried about Rakshasa~[www.mtlnovel.com](http://www.mtlnovel.com)~ couldn't help but said: "Actually, we don't need to be too afraid of Rakshasa, you are only an adult now, you can fight Wang Ziren, as long as you If you can break through into the body, these people are not your opponents at all."

After witnessing Wang Xuan's strength, Yao Tiande understands that his future is limitless, which is another main reason why he bet on Wang Xuan.

There is a huge gap between the powerhouse of the fifth form and the adult body. It is amazing that Wang Xuan can leapfrog and fight against the powerhouse of the fifth form.

"Yao Tiande, what other legends or useful information do you know about Insect Town? For example, other information about the four major forces, by the way, I remember there was a female captain of the patrol, riding a mechanical unicorn, she was Who."

As Wang Xuan spoke, he picked up the intermediate storage belt and began to check what treasures were inside.

Yao Tiande pondered slightly: "Riding a mechanical unicorn? I understand, you are talking about Xiao Bichen from Phoenix, right? She is not the female captain of any patrol team. The actual patrol team is composed of five major forces. Generally, The main personnel of the five major forces will take turns on duty, when you saw it, it should be Xiao Bichen's turn to be on duty, and when she is on duty, she can be regarded as the captain of the patrol team."

Wang Xuan wrote down Xiao Bichen's name, nodded slightly and said, "So that's how it is."

Look at the space of this storage belt, there are a lot of things, almost full of them, including crystal scales, high-level and intermediate-level nutrient solutions, spare second-order fine-quality armors, and two pieces of parchment paper. , there is a map, as well as several glass vessels with liquids and several crystals of different colors.

## **Chapter 129**

Wang Xuan took out all these crystal scales. The number was small, and there were only 152 crystal scales. Among them, 23 crystal scales were twice the size of the crystal scales they normally saw. They look exactly the same as they usually see.

"What's wrong with the crystal scale?" Wang Xuan asked Yao Tiande with a crystal scale that was twice as large.

Yao Tiande hurriedly explained: "This is a medium-sized crystal, which can be exchanged with a small-sized crystal in the exchange area. The ratio is one to one hundred."

Wang Xuan nodded and understood that the crystal scales are divided into small and medium scales. The 1109 crystal scales he has now are all small crystals, and every 100 small crystal scales can be exchanged for 1 medium crystal scale. .

In this Wang Ziren's storage belt, these 23 crystals are medium-sized crystals. If you exchange them, you can exchange for 2,300 small-sized crystal scales.

Putting all these crystal scales away, he now has 23 medium crystal scales and 1238 small crystal scales.

In addition to the crystal scales, there are 45 bottles of intermediate nutrient solution and 32 bottles of advanced nutrient solution.

This advanced nutrient solution is a good thing, and each bottle requires 20 small crystal scales.

Wang Xuan also put them away. In his current Xumi mustard seed space, he has 60 bottles of primary nutrient solution, 177 bottles of intermediate nutrient solution, and 32 bottles of advanced nutrient solution.

For the spare pieces of second-order high-quality equipment, Wang Xuan chose a second-order fine-quality fearless helmet and replaced the second-order ordinary quality iron helmet that he had been wearing, and distributed the rest to everyone.

Looking at the two parchments again, Wang Xuan opened one of them, and Zhao Lei squatted beside him and helped open the other.

Wang Xuan looked at the parchment in his hand, with a line of words written on it.

"Quest Name: Cerberus' Call, Difficulty: ★★★★★★"

Seeing this difficulty, Wang Xuan was taken aback, and then he looked at the bottom, where the reward was written: Cerberus Teeth.

"Cerbetooth?"

Wang Xuanmeng recalled that at the end of the corridor on the first floor, there were four districts, east, west, northwest, and the first three districts were free to enter. Only entering the north district required the fangs of hellhounds.

"With Cerberus' Teeth, you can open the door of the North District and trigger the legend of the hidden quest king. We have always suspected that the legend of the king is related to the certificate of the king."

Zhao Lei also came over to see the parchment in his hand, and his first reaction was to scream: "The difficulty is six stars? It's outrageous!"

With the strength of their current group of people, they may not be able to complete the "centipede hunter" of the five-star difficulty, let alone the six-star difficulty task.

"No wonder Wang Ziren got this parchment but didn't complete the task. I'm afraid he can't do it with such difficulty." Zhao Lei shook his head.

Wang Xuan looked at the address of this hellhound's summoning quest, and he was at the \*\*\*\* tower at the end of the insect country north of the town.

Put away this parchment, and look at the one Zhao Lei just opened, there are only a few simple lines on it.

"Task name: Help others, Difficulty: None. Task content: Help ordinary people get hatched beasts and grow. The more people you help, the higher the growth rate and the greater the reward. The minimum reward is to help a person grow to a prototype. , reward the rust treasure chest, the highest reward is to help no less than ten people grow to the sub-body, and reward the bronze treasure chest."

Looking at this task, Wang Xuan was a little curious and said, "Helping others? This task is a bit interesting."

Zhao Lei said: "Help ordinary people get promoted? Where do ordinary people come from here?"

Wang Xuandao: "You forgot that you can go back to the underground parking lot? Maybe you can meet ordinary people who just came in there."

Zhao Lei moved in his heart and said, "If you say that, this task is not difficult. If you help ten people grow to the sub-body level, you can get the same bronze treasure chest as the five-star difficulty task."

Wang Xuandao: "It's a pity that this task is too time-consuming."

He shook his head as he spoke, and temporarily put away the two parchments. The Cerberus' summoning task was too difficult to consider for the time being. As for the task of helping others, it would take a certain amount of time. No time to do it.

Looking at the map again, he originally thought it was the map of Insect Town. He was about to take a look and put it away, but when he opened it, he found that it was not the map of Insect Town, but the map of Scorpion Town.

Looking at the map, this Scorpion City is very big, and it looks very complicated inside.

"The map of Scorpion City, this Scorpion City is in the west of Insect Town. I didn't expect there is such a huge city in the west of Insect Town." Wang Xuan said while putting away the map of Scorpion City.

Yao Tiande said on the side: "Scorpion City is very dangerous, much more terrifying than Centipede Island. Only people like Wang Ziren who have broken through the adult body dare to enter. The entire Insect Town has broken through the adult body. It is estimated that basically all people are there."

Wang Xuan sighed: "So, there are very few people who have broken through and stayed in Bug Town?"

Yao Tiande said: "Of course, since they can break through the adult body, they are all people with extremely high talents, which are equivalent to the geniuses we used to talk about. Naturally, they all want to become stronger, so they can only go to more dangerous places. The Scorpion City has tried his luck."

Zhao Lei's heart moved: "It seems that the four directions of this worm town are also more dangerous than the other. If you put it this way, is the worm country in the north the most dangerous, more terrifying than the scorpion town?"

Yao Tiande said: "Generally speaking, newcomers will go to the Snake Territory, where there is no danger. When they reach the adult, they basically enter the Centipede Island in groups, especially if they want to enter the depths of the Centipede Island, the more people they need, the better. , the number of people is too small to dare to enter, and the strong who have broken through the adult body can go to the scorpion city, but the insect kingdom in the north... It is said that it is the base camp of the Zerg, and usually no one can enter, I heard Huang Tao say However, you can only enter when there is an insect wave every once in a while."

"Insect tide?" Wang Xuan, Zhao Lei, Tie Jun and others all looked at Yao Tiande together.

Yao Tiande nodded and said, "Yes, I've only been here for more than a month, and I haven't experienced it. Huang Tao has been here for a long time. He said that he personally experienced two insect waves. I remember when he said that, the expression on his face was more than enough. Ji. He said that when the insect tide occurs, countless insects will appear from the insect country in the north, submerging the insect town like a flood, all over the sky, all kinds of terrifying insects, including centipedes, scorpions, spiders, and Praying mantis and other insects."

When Yao Tiande said this, he stretched out his hand and gestured: "Although I haven't experienced it, when I heard him say it, I still felt terror. Triggering the insect tide, every time the insect tide, the number of casualties is basically more than half, he experienced twice, said the most terrifying is the second time, the insect town of more than 2,000 people, only a few hundred people survived in the end, In the end, it seemed that someone came from above, and it calmed down, otherwise it would be a group destruction. It is said that in this case, the above shot violated a certain rule. Generally speaking, the world above cannot interfere here, so the above It was paid for a very heavy price, and it is said that it left a message for it, that will be the last time to help, and then there will be a worm wave, even if the worm town is destroyed, the above will no longer help."

Hearing this, Wang Xuan, Zhao Lei, Tie Jun, Li Haotian and others looked at each other and saw the shocked expressions on each other's faces.

"There is still such a thing..." Wang Xuan muttered to himself, looking towards the distant insect town, thinking of entering the insect town before and seeing that there were many people in the square and the trading house.

"Then do you know how many people there are in Bug Town?"

Yao Tiande said: "According to the time Huang Tao said, it has been more than two months since the last insect wave. As for the newcomers entering here, it is estimated that there are on average thirty or forty people a day. If it is calculated based on the number of people entering, early It has exceeded 2,000 people. Of course, some people will continue to die, and some people will be sent away after half a year, so the specific number is difficult to estimate, but fortunately, the five major forces have strictly registered newcomers, you join the Xuan Gang, It should also be registered, on the one hand, you can collect crystal scales, on the other hand, it is also equivalent to counting the current number of insect towns, how many people, those core personnel of the five major forces must know."

"But if you count the time, the interval between the two insect waves that Huang Tao experienced is three months, so it should not be far from the new insect wave."

Zhang Haofei's injury recovered a little, he stroked his chest and walked over. Hearing this, he took a deep breath and said, "Damn, this insect town is really not a place for people to live, and there are still insect waves, I originally thought If you really can't get out, it's not bad to get old here, anyway, I don't have the love of my parents outside, it doesn't matter where I go, it's better to fight for hegemony here and raise a few women to be happy."

Gu Manyao also regained some energy. Hearing Zhang Haofei's words, he couldn't help but rolled his eyes at him and said, "How many more do you want to raise? You are so shameless."

Zhang Haofei laughed and said: "Men are not all the same. There are regulations outside that you can't marry more than one. There shouldn't be more here, Wang Xuan, are you right?"

Gu Manyao said unconvinced: "I think there are more men than women here. How many more do you want to marry? Who will marry you? I think it's more or less the same for women to find more husbands."

As soon as these words came out, everyone was shocked. Wang Xuan couldn't help but look at Gu Manyao and said, "Gu Manyao, do you still want to find more husbands?"

Gu Manyao blushed and spat: "Wang Xuan, you are talking nonsense, I'm not talking about Zhang Haofei's just saying that he wants to marry a few more people, who said I think so? Of course I hope to be able to have a couple for the rest of my life, But in a place like this... it's too extravagant to talk about love, and it's more important to think about how to live."

Zhao Lei sighed and said, "Yes, in the past, it was said that love needs a material basis, and love without bread has no future. Only when I got here did I know what material basis, what bread, what love is all bullshit. Going down is the most important thing."

Wang Xuandao: "I can't say the same. It's too tiring to fight and kill every day. If you can really find a woman to talk about love and adjust it, it would be good."

Zhao Lei smiled and said, "So Wang Xuan, do you want to fall in love?"

Wang Xuan said, "Don't you want to?"

Zhao Lei thought for a while before saying, "I don't know. It seems that I haven't had this idea so far. Maybe I'm nervous every day, thinking about what to do tomorrow, and I don't have time to think about it."

Tie Jun coughed lightly, and said, "Wang Xuan, if you want to fall in love, you have a ready-made one in front of you. I think you and Gu Manyao are a good match. You are a talented man and woman, and you are a natural pair."

As soon as he said this, Gu Manyao immediately blushed, but did not say anything against it.

Wang Xuan smiled and said, "Brother Tie is very reasonable.

Zhao Lei laughed and said, "Gu Manyao, what do you say?"

Gu Manyao blushed, neither objecting nor agreeing.

Yu Shanshan looked envious, looked at Wang Xuan and Gu Manyao, and then quietly glanced at Bai Yan beside her.

Bai Yan still sat silently watching.

Tie Jun smiled and said: "If people don't object, it means they have acquiesced. I am a person who has come here, and I am familiar with it."

While chatting with them, Wang Xuan continued to check the rest of the intermediate storage belt. Apart from some daily necessities, the most important ones were five glassware bottles containing liquid and four crystals.

He took it out, opened the eyes of the illustrated book, and checked them one by one.

Among the five bottles of glassware, one bottle of primary physical strength water, one bottle of primary night vision water, and three primary bottles of healing water.

Wang Xuan also obtained a bottle of primary physical strength water. He knew that after drinking this physical strength water, he could quickly recover his physical strength, and after drinking the primary night vision water, he could temporarily obtain an effect of seeing in the dark for a duration of time. For six hours, drinking the primary healing water, no matter how serious the injury, can recover in an instant.

In the previous battle, Wang Ziren was hit by Zhao Lei's holy light of the cross, and his internal organs were seriously injured, so he once drank a bottle of primary healing water.

These five bottles can be regarded as treasures. This Wang Ziren is really not simple. These treasures must be opened in the treasure chests obtained by completing tasks or hunting some powerful monsters, and the level of this treasure chest is definitely not low.

Look at the remaining four crystals, one is the initial state alloy mechanical armor, one is the explosion spar, and two are the initial state mechanical head armor.

This initial alloy mechanical armor is the same as the initial mechanical head armor and the goblin mechanical armor equipped on Xiaojiao, which are the shells used to equip mechanical beasts.

Picking up the heart of the mechanical beast that was peeled off from Wang Ziren's body on the ground, the owner died, and the mechanical beast became an ownerless thing again. Wang Xuan opened the heart of the mechanical beast, and the crystal face list inside appeared. Of the six crystal grooves, four are inlaid with crystals.

They are the initial state powertrain, the initial state alloy mechanical armor, the initial state mechanical head armor, and the initial state mechanical leg armor. It is precisely because these mechanical shells are equipped that Wang Ziren's mechanical beast is so huge. If these shells are removed, his mechanical beast is not much bigger than Xiaoguo.

Wang Xuan took down the four crystals embedded on them one by one, and then opened Xiaojiao's crystal face list.

The initial goblin mechanical armor did not need to be replaced, so he installed the crystals of the initial mechanical head armor and initial mechanical leg armor.

Then start the little boy.

Immediately, the heart of this mechanical beast began to change drastically. In the crisp sound of Kacha, Xiaogai continued to expand, and soon turned into a dog formed of metal machinery, and then a goblin machinery formed of green scales. The armor covers the body, the initial mechanical head armor wraps and fits to its head, and the mechanical leg armors are tangled with each other, covering and wrapping the four legs that were originally slightly slender and short.

Immediately, Xiaojiao's body became much larger. Although it was still in the form of a dog, its body was already the size of a calf, and it could be called a real mechanical giant dog.

It moved slightly, and the sound of mechanical gears was turning all over its body. Wang Xuan was very satisfied. The current little girl is a qualified mount. He can ride on it, just like the mechanical loner that the "Phoenix" Xiao Bichen rides. wildebeest.

The others looked envious when they saw Xiaojiao really taking shape. Wang Xuan took out another mechanical beast heart, and added the mechanical beast heart left by Wang Ziren, and said, "Now there is a powertrain in the initial state. You can activate another mechanical beast, Gu Manyao, do you want it?"

He remembered that Gu Manyao couldn't put it down when he saw Xiaojiao before, but now that he has a new powertrain, he thought of giving it to her.

Gu Manyao looked at him with surprise and nodded.

"There are two hearts of mechanical beasts, one is a wolf, and the other is unknown."

"Once you drop blood, you can't change it. Pick one."

Gu Manyao thought about it and chose the unknown.

Thinking that the wolf was Wang Ziren's mechanical beast before, she was a little reluctant to want it, so she might as well choose this unknown, maybe it will give her a surprise.

"Then you drop the blood on it and activate this mechanical beast."

Under the guidance of Wang Xuan, Gu Manyao dripped blood on the heart of the mechanical beast, opening the heart of the mechanical beast.

Wang Xuan gave her the extra initial powertrain, initial mechanical head armor and initial mechanical armor.

Gu Manyao put these three crystals on the crystal face list of the Heart of the Mechanical Beast, unfortunately the leg armor is missing.

Wang Xuan now has an extra initial mechanical head armor and initial alloy mechanical armor in his hand, so he put it on the crystal face list of the mechanical wolf, but without the powertrain, the mechanical wolf cannot be started. .

Yao Tiande watched from the side and sighed: "The heart of a mechanical beast is not unusual. It must be sold in the material store, but the powertrain is scarce, so it is difficult to get it."

Gu Manyao activated the heart of the mechanical beast that he had just obtained, and soon, a huge mechanical fox appeared, but it lacked leg armor and appeared to be huge, but its limbs were slender and short, like a huge dachshund.

Everyone couldn't help but laugh when they saw it.

But Gu Manyao said with joy: "What are you laughing at, aren't you lacking leg armor? Maybe I can get it soon, hum." As he said that, he reached out his hand. In front of her, she made a coquettish gesture in her arms.

Wang Xuan smiled and said, "Would you like to give it a name?"

Gu Manyao said happily: "Of course, your name is Xiaojiao, then mine is Dajiao."

Wang Xuan was speechless and said: "Why is my name Xiaojiao, but yours is Dajiao, is the name reversed?"

Gu Manyao smiled and said, "Don't you know that the lady is the priority? Seeing how graceful my body is, it must be a vixen. I believe the little girl will agree to it?"

While she was talking, she looked at Xiaojiao, Wang Xuan never expected that Xiaojiao was nodding her head as if she understood, and made a sound of metal turning.

"This guy, eat inside and out." Wang Xuan was so happy that he couldn't help but want to kick him.

Zhao Lei laughed and said, "Is this mechanical beast still divided into genders? Are there males and females?"

## **Chapter 130**

Gu Manyao was in a good mood and gave Zhao Lei a blank look.

Wang Xuan counted all the items in the intermediate storage belt left by Wang Ziren. This time the harvest can be said to be huge, and then put this intermediate storage belt together.

There were also four third-order ordinary-quality alloy equipment on the ground. Wang Xuan replaced the three second-order fine-quality goblin scales, goblin knee pads and goblin handguards on his body, and replaced them with third-order alloy armor, Alloy knee pads and alloy handguards.

In addition to the alloy boots he originally owned, he already had four of these third-order alloy suits.

Everyone watched Wang Xuan put on four third-order equipment, and the whole person's attitude was completely different.

Each piece of metal equipment has two attributes, the metal armor can increase the stamina recovery speed and wound healing speed by 20%, the alloy knee pads can increase the stamina and body strength by 20%, and the alloy handguards can increase the strength and strength by 20%. Instant explosive power, and alloy boots increase speed and bounce by 20%.

Now the four pieces of metal equipment are worn together, and the energy of each other is stimulated. This effect has been further improved. All the improved effects have been changed from the original 20% to 23%.

Feeling the change in the power in his body, a look of shock appeared on Wang Xuan's face.

He finally understood why Wang Ziren was so powerful.

This Wang Ziren was wearing a full set of alloy equipment at that time, and the improvement was even greater, which could reach 24%. He is not bad now, in terms of speed, jumping power, strength, instantaneous explosive power, physical fitness, physical strength, physical strength recovery speed, and wound healing speed. It has been uniformly increased by 23%. With this set of equipment replaced, it can be said that his comprehensive strength has increased by at least one grade.

Move the body and feel that this equipment fits perfectly with the body. Wearing it on the body, it is as light as nothing. The energy spar in the equipment is stimulated, and the energy released from it continues to pour into the body, making his physical fitness, strength, physical strength, etc. Get a big boost.

Wang Xuan nodded and said: "This third-order equipment is indeed terrifying. A set of third-order equipment can at least improve the strength by one level."

"So much improvement?" Zhao Lei was a little curious.

Wang Xuan sighed: "If I had just worn this set of Tier 3 equipment, I wouldn't have been so embarrassed when I started with this Prince Ren, these days we have to get more crystal scales, and strive for everyone to be able to do it. Put on Tier 3 equipment early."

Hearing what Wang Xuan said, everyone was excited and full of desire for this Tier 3 equipment.

"How to distribute the extra alloy boots?" Zhao Lei looked at the extra alloy boots on the ground and looked at Wang Xuan.

Wang Xuan picked up the alloy boots and planned to give them to Gu Manyao, but considering that she had just obtained the mechanical fox and gave her the alloy boots, others would inevitably have some opinions in their minds, so they gave the alloy boots to Bai Yan.

Bai Yan didn't expect Wang Xuan to give him the pair of third-order alloy boots, so he was stunned before taking them.

Everyone watched Wang Xuan give the boots to Bai Yan, but they had no objection. He was able to kill Wang Ziren just now. It can be said that Bai Yan's witch blood played a big role. Bai Yan had contributed a lot to hunting all kinds of monsters along the way. Now he has to Alloy boots, it should be.

The three second-order fine-quality Goblin equipment that Wang Xuan replaced was divided among the crowd.

"It's almost time to rest, we should go."

Wang Xuan looked at Wang Ziren's corpse on the ground, waved his right hand, the metal tentacles extended out, rolled up his corpse, and threw it into a cave not far from the front.

Although he knew that the earth here has the function of self-purification, self-purification will take some time after all. He doesn't want anyone to pass by and see Wang Ziren's body at this time, so as not to cause trouble.

Watching Wang Xuan throw Wang Ziren's body into the depths of the cave, Zhao Lei thought of something and said, "Yao Tiande, we killed Ziren, how long will it take for the people of the Rakshasa to find out?"

Yao Tiande pondered: "It will take at least two or three days."

"Is it so late?" Wang Xuan thought to himself that Wang Ziren was considered a high-ranking Rakshasa. Now that he was killed, it would take Rakshasa two or three days to know?

Yao Tiande said: "Although Rakshasa is one of the five major forces in Insect Town, the organization is relatively loose. After all, the people in Insect Town mainly spend their energy on hunting monsters and breaking through to improve themselves. I guess it can be done in two or three days. It was discovered mainly because this Wang Ziren had a concubine named Lin Qingya. At that time, Wang Ziren brought me and Duan Chen to Centipede Island. Lin Qingya knew this. If Wang Ziren did not return for two or three days, there would be no news at all. , She must have suspected that something was wrong, and if she investigates again, she may not be able to hide it, so I guess it will take two or three days, of course, it may be longer. If Lin Qingya is not here, I think he will be dead for a week. The people of the Rakshasa don't necessarily know."

Zhao Lei said: "I remember you said that Wang Ziren had a prop that could be traced, so he could find us through the head of Wu Yi. Will other people in this Rakshasa have similar props to find us?"

Yao Tiande shook his head slightly and said, "The use of this kind of prop is conditional. To put it bluntly, it is mainly based on some residual smell. According to the information I know so far, the effective time is only a few hours. The earlier the more accurate, because the smell is in the It keeps disappearing, and it is difficult to track it after basically twelve hours, let alone two or three days."

Hearing Yao Tiande say this, Wang Xuan let out a light sigh of relief and relaxed a lot. In two or three days, he could find a way to break through.

As long as you can become a powerhouse in the fifth form, you don't need to be afraid of Rakshasa.

Gu Manyao, who was the most seriously injured among the crowd, also fully recovered. She brought a mechanical fox and just tried a fit. In the fit state, not only the defense is enhanced, but also the physical strength. The only thing missing is the lack of leg armor.

There are more Yao Tiande and Duan Chen in the team, a total of ten people, plus Wang Xuan and Gu Manyao's mechanical beasts, continue to enter deeper into Centipede Island.

As you go deeper, there are fewer people to see, and almost no one ventures into it.

Most of the adults are on the edge of Centipede Island. They only need to hunt and kill silver-backed centipedes on the edge. First, they can harvest crystal scales, and second, they can obtain energy, which is relatively safe.

This time, everyone only walked less than 100 meters forward, and then encountered the attack of the silver-backed centipede and the giant pincers again.

The two types of centipedes account for half of each, and the total number has reached an astonishing forty or more.

Wang Xuan watched Xiaojiao take the initiative to rush up. With the full set of armor and shell, its strength is also improving. Originally, Xiaojiao's strength was only equivalent to a sub-body, but now it has almost full-body strength. A silver-backed centipede faces off.

Wang Xuan changed into Tier 3 equipment, and his strength was greatly improved. This time, he did not show the arms of the beast, but controlled two metal tentacles and pulled them out in the air.

The speed, strength, and explosive power have all been improved, and the power of the metal tentacles has been enhanced.

There is no need to activate the arms of the demon beasts to hunt the silver-backed centipedes, which made Wang Xuan a lot easier.

Although the number of centipedes exceeded forty, there were two more powerful adults among the crowd. Yao Tiande and Duan Chen had already obtained the energy needed to break through the adult body, but they had been unable to break through. hopeless breakthrough.

But at the moment with everyone, they are still desperately hunting these centipedes to relieve everyone's pressure.

Bai Yan used witch blood to weaken the strength of these giant pincers, and it was not difficult for everyone to hunt them down.

Wang Xuan's main target is the silver-backed centipede. Every time he kills one, a white scale emerges from the silver-backed centipede's body, sinks into his right hand, and is absorbed by the white light in it.

Feeling the white light absorbing energy, it is constantly fluctuating violently. The energy he needs for growth is enough. Now that this energy is absorbed, it will continue to overflow and infiltrate, just like using a bamboo basket to draw water, no amount of water will leak out. .

"This has never happened before. After drawing enough energy, all the extra energy will overflow. If it continues like this, it won't be able to break through without hunting and killing more monsters and drawing more energy?"

Originally, Wang Xuan was full of self-confidence. He thought that he had not broken through into the body just now, and he still failed to absorb more energy. As long as he hunted more monsters and gained enough energy, he would always break through, but now he understands that this is no longer the case. The problem of drawing more energy.

Wang Xuan was not anxious, but calmed down and thought while fighting.

Fortunately, these silver-backed centipedes are not enough to threaten him, and even if he devotes a part of his mind to thinking, there will be no danger.

As he slowly sensed the white light in his right hand, he gradually realized something in his heart.

"If the white light in the right hand used to be like a sealed balloon, hunting monsters to draw energy is equivalent to injecting gas into the balloon. As more and more gas is injected, the balloon will expand more and more. It grows bigger and eventually reaches its limit, the balloon explodes, this is a breakthrough, and then a new and bigger balloon is formed, which is a higher form, and so on and so forth, all the way from the embryonic form to the initial opening, sub-body, adult body , all the same, so this process is not too difficult, just need to get enough energy, and finally break through."

"But after reaching adulthood, with the strength of the hatching beast, there has been a qualitative change. This white light seems to have changed from a relatively fragile and easily broken balloon to a bowl-like vessel with a huge gap. Hunting and killing The energy obtained by the monster is equivalent to pouring water into the vessel. When the water in the vessel is full, it is impossible to break the vessel, but overflow. If this continues, even if the water in the three lakes and four seas is exhausted, it will not be destroyed. use."

As he constantly sensed the white scales entering the white light in his right hand, and then the energy overflowed and spread out, Wang Xuan quickly captured the key to why he couldn't break through even though he had enough energy.

"This principle is not difficult to understand. Yao Tiande has been in this second-layer world for more than a month, and there are even people who have not been able to break through for half a year. Naturally, they have already hunted enough energy to break through. It is not at all. The problem of insufficient energy."

"It's impossible to break the bowl by injecting water, but if you want to grow and break through, you have to break the bowl so that you can condense and grow into a larger and stronger vessel for holding energy... "

"So, the only way is to seal the mouth of the bowl and turn it into a sealed vessel, so that it can finally successfully break through through continuous injection of energy."

Wang Xuan understood the key to breaking through into the adult body, and also knew that it was not difficult for everyone to understand this step, but the real difficulty was how to seal the bowl.

And this step is the most critical, and they cannot do it at all, because it is equivalent to changing the nature of the hatching beast, and turning the hatching beast from a "bowl" with a gap into a sealed "vessel".

Unless the hatching beast itself can make this change.

"It turns out that the so-called adult breakthrough is actually to let people communicate with the hatching beasts, and through people to influence or even drive the hatching beasts to make this kind of change, so that the original gapped vessel becomes complete, only by doing this step, to break through."

Wang Xuan watched the silver-backed centipedes fall down in front of him, and small beads of sweat slowly ooze out on his forehead.

He finally understood why he became so powerful after breaking through into adulthood. Anyone who can break through into adulthood can communicate with the hatching beast, and even change the essence of the hatching beast.

But this also means that the consciousness of the hatching beast will be further strengthened. If we talk about the previous forms, the consciousness of the hatching beast is still a necessary accessory, and the hatching beast is more like a life purely used for combat. weapon.

But if you want to break through into the adult body, you must awaken the consciousness of the hatching beast, and even continuously strengthen its consciousness, so as to influence or force it to make changes in certain aspects, from incomplete to complete, and then to break through.

After breaking through to the fifth form in this state, its hatching beast must have a certain self-awareness. He understood why after Wang Ziren died, the white light in his body rushed out, his life breath was so strong, and he struggled so violently.

"It turned out to be like this. I assimilated with the beast, and the consciousness of the beast has long been integrated into my consciousness. It's not so much to change the beast, but to change myself. It's not difficult for me, and it's nothing. Later troubles, but for others..."

Wang Xuan couldn't help looking at Gu Manyao, Zhao Lei, Tie Jun and others around him.

He understands that if Gu Manyao and the others want to break through into the adult body, they must awaken part of the consciousness of the hatching beasts in their bodies. In this case, the hatching beasts will naturally grow stronger, giving everyone stronger power, but in Wang Xuan's view, this change has hidden dangers.

Once the self-consciousness of the hatching beast becomes stronger and stronger, will it really be willing to be used as a weapon by humans forever? At a certain stage, will it backfire?

"Let's not talk about the hidden dangers that may arise in the future, just awakening the consciousness of the hatching beasts is very difficult. These people can't break through the adult body. To put it bluntly, their willpower is not strong enough, or their consciousness is difficult to match the hatching. The beast communicates, and if you can't wake up the hatching beast for one day, you can't break through the adult body for one day."

Wang Xuan understands that it takes a certain amount of talent and some luck to wake up the hatching beast.

For example, some people are born with the characteristics of the hatching beasts they have, and they may be able to communicate with the hatching beasts easily. On the contrary, it may be difficult for some people.

After comprehending, Wang Xuan began to try to change the white light in his right hand. He needed to evolve the incomplete white light into a more complete vessel. Only in this way can he hunt monsters and gain energy to break this closed vessel. , in order to break and stand, so that the beast grows further, and evolves into a larger and tougher vessel that can accommodate more powerful energy.

More than 40 silver-backed centipedes and giant pincers were quickly killed by everyone. Among them, Tie Jun, Zhang Haofei, and Duan Chen were slightly injured, but they were all minor injuries and could recover at any time.

Wang Xuan picked up a piece of parchment from the "centipede hunter", which recorded that the number of silver-backed centipedes he hunted became 49.

There are still 51 left, and the task of hunting 100 silver-backed centipedes is completed.

Everyone stopped and rested for a while, picked up 42 small crystal scales, and handed them all to Wang Xuan.

The number of small crystal scales he has now has reached 1280.

After a short rest, when Zhang Haofei and Tie Jun recovered from their injuries, they continued to go deeper.

Wang Xuan was trying to try the "centipede hunter" mission. In fact, he wanted to go deep into the depths of the centipede island to see if the records in the book of giant gods were true.

With the continuous deepening, the number of centipedes encountered by everyone is also increasing, and the number of centipedes that appear casually now will not be less than fifty.

Fortunately, half of them are giant pincers. Affected by the blood of Bai Yan's witch, their strength will decay to the level of three and a half stars. In addition, Wang Xuan has become stronger, and there are two more powerful adults in the team, Yao Tiande and Duan Chen. And after Xiaojiao and Dajiao

obtained the mechanical armor, the combined combat power of the two of them is now stronger than that of a single adult.

When Wang Xuan and others continued to hunt centipedes and gradually approached the depths of Centipede Island, one of the small single-family buildings in the east of Bug Town belonged to Wang Ziren.

He has paid enough rent for one month, and during this month, he has the right to live in it by himself or with someone.

Most of the people who can live in this small single-family building are powerful beings, and generally adults do not dare to approach them at will.

At this moment, in the small single-family building belonging to Wang Ziren, Lin Qingya, who likes to dress up beautifully, is standing in the hall, looking at the person in front of him with astonishment on his face.

In this hall, besides her, there are seven people standing.

The two headed, one is a woman who looks to be in her thirties, her skin is a little rough, she is wearing a full set of Tier 3 alloy equipment, and her body exudes a pressing aura.

Standing beside her was a tall man, nearly 1.9 meters tall. He was also wearing a full set of Tier 3 alloy equipment, with his back and waist. The alloy equipment was tightly attached to his body, his muscles swelled, and he could feel the explosive power contained in his body.

In addition to them, the other five were four men and one woman. They were basically wearing second-order high-quality equipment, and occasionally a third-order alloy equipment. Obviously, these five people had a significant gap with their strength status.

Looking at the man and woman wearing a full set of Tier 3 alloy equipment in front of them, Lin Qingya's expression was a little nervous and uneasy because of their aura.

She didn't expect that the group of people in front of her would suddenly break in. She didn't know the names of the four men and one woman standing behind, but the man and woman in the third-order alloy suit in front of her, although she didn't know what the two had ability, but know their names and identities.

This is a big man in the "Rakshasa" who can be on an equal footing with Wang Ziren. The man's name is Li Xing and the woman's name is Lu Bingbing. Even if Wang Ziren sees them, they have to be polite.

They suddenly broke in, and Lin Qingya was inevitably nervous.

"Is Wang Ziren alone, or is it the Centipede Island that several people went to?" At this moment, Li Xing was asking Lin Qingya.

"Three people, he took Yao Tiande and Duan Chen with him, can you tell me what happened to Ziren? Why did you suddenly come here to ask this?"

Lu Bingbing said in a daze: "The leader ordered us to come, something happened to Wang Ziren."

"What?" Lin Qingya's face changed drastically, and she followed her and shook her head: "Impossible, Ziren just went to Centipede Island. With his strength, what monsters on Centipede Island could hurt him? He couldn't have an accident. , I see, are you kidding me? Besides, how can the leader be sure that something happened to him?"

She was able to wear fine clothes and eat food here because she climbed on Ziren. If something happened to Ziren, she couldn't imagine it.

Lu Bingbing didn't speak anymore, Li Xing frowned and said, "Okay, shut up and stay obediently and don't affect us."

Then he looked at Lu Bingbing and said, "Then it's up to you."
