

Last Building on Earth Chapter 136-140

Chapter 136

This centipede is five meters long, as thick as a bucket, walking like a halberd, the outer shell of the body is as black as steel, and the mouthparts on the head are open, revealing two rows of serrated teeth.

Compared with ordinary centipedes, in addition to the eyes on both sides, there is a huge vertical eye above the mouthparts, glowing with a strange green light.

It was extremely fast, and in the eyes of everyone, it was almost not much slower than Lu Bingbing and Li Xing among the elites.

"This monster is a five-star." Everyone knew that this monster was terrible, and they stepped back. Such a monster is not something they can deal with, only Wang Xuan can do it.

Wang Xuan understood that this must be the three-eyed centipede mentioned on the parchment, and if you kill it, you can get the bronze treasure chest rewarded by this mission.

The metal tentacles stretched out, and an eyeball appeared on it. The "eye of the illustrated book" opened, and immediately captured the information of this three-eyed centipede.

"Name: Three-Eyed Centipede, Race: Centipede Clan, Dangerous Degree: ★★★★★ (five-star), Three-Eyed Centipede is an indigenous centipede leader living on Centipede Island, its lifespan is more than a hundred years, and it can resemble a silver-backed centipede. The same spray of corrosive poison is far more corrosive than the silver-backed centipede, each step is harder than steel, extremely sharp, and it is the most terrible monster on the centipede island."

Wang Xuan understood that the five-star danger level meant that the strength of this three-eyed centipede was comparable to that of an ordinary elite.

Bai Yan launched the "Wizard's Blood Jet" from a distance, trying to weaken the three-eyed centipede's combat power.

The blood of the witch spewed out from the sky, the three-eyed centipede screamed, and a dark green poisonous juice was ejected from its open mouth.

This poisonous juice is extremely foul-smelling, as if it were shot from a pistol.

Bai Yan's face changed drastically. With his speed, it was too late to dodge. He could only cover his chest and right arm with witch blood, forming a blood crystal armor to protect his head and face.

Suddenly his left arm tightened, and a strong force pulled him and flew out to the left sideways. With a bang, a figure rushed out diagonally, but Wang Xuan shot.

He pulled Bai Yan apart and jumped up, avoiding the corrosive poison that was sprayed over, and two metal tentacles swept past like lightning.

The others stepped back one after another, as far as possible.

Tie Jun, Duan Chen, and Yu Shanshan all showed their shields and masks to protect everyone from retreating.

With a crisp "snack", the three-eyed centipede swung its body horizontally, and the foot on its side bounced, wanting to rise into the air and dodge Wang Xuan's attack.

But Wang Xuan shot faster, and the metal tentacles slammed on it first, and immediately interrupted the four legs.

The four legs were broken, the three-eyed centipede's open mouthparts screamed, and another corrosive poison shot towards Wang Xuan, the body was vertical, and the five-meter-long body slammed into it, the power was extremely ferocious. .

Wang Xuan shook his body to avoid the poisonous juice. The poisonous juice sprayed on the rock, making a sizzling sound and emitting blue smoke. The rock was corroded by the poisonous juice, leaving stains of corrosion on the surface.

"This guy's speed is not slow, he is much stronger than the average adult, but he still can't compare to the real powerhouses like Li Xing and Lu Bingbing."

Wang Xuan's thoughts turned, and he took the initiative to face the three-eyed centipede that collided with. With a wave of his right hand, the metal tentacles turned back and wrapped around his right arm. The flesh and metal fused, and the giant arm of the beast took shape instantly.

With the breakthrough to the perfect state, his beast arm has undergone subtle changes again. The original one-meter-long arm of the beast has become huge, reaching a length of one meter. The blue veins are full of turbulent energy.

If the previous giant arm of beast was a lifeless machine, then the current giant arm of beast seems to have life, just like the arm of a real beast.

With a kick of his feet, Wang Xuan almost jumped up, collided with the three-eyed centipede that collided with, and the giant arm of the one-meter-long beast slammed head-on.

The huge fist smashed into the open mouthparts of the three-eyed centipede, and it disappeared in an instant, breaking its mouthparts and head, and the hard steel shell shattered like paper. The centipede's head and half of its body exploded.

A large amount of juice mixed with the shards of the broken shell splashed and fell on Wang Xuan's alloy armor.

The people who retreated to the back looked at this power with envious expressions.

What a powerful blow it is to blast a five-star monster with a punch.

Everyone's heart is more and more eager to break through the body and be promoted to the powerhouse.

A white scale appeared and submerged in Wang Xuan's right hand. He felt the energy in his right hand fluctuate slightly. The metal tentacles that merged with the flesh and blood of his right arm reappeared. The giant arm of the beast disappeared. The metal tentacles retracted into his right hand and disappeared.

The small half of the three-eyed centipede whose body was blown up had a flesh cocoon rolled out of the remaining half of its body.

Wang Xuan understood that the quest reward, the bronze treasure chest, should be in the cocoon.

This time, the mission of the "centipede hunter" was completely completed.

Zhao Lei rushed over excitedly, took out the fish-scale knife, and carefully cut open the meat cocoon. Sure enough, a small treasure box appeared inside. This treasure box was light cyan and made of bronze. The rusted copper box is completely different.

"I don't know what treasures will be here. The specification of this bronze treasure chest should be higher than that of the rust treasure chest. Wang Xuan, you should open it yourself."

Zhao Lei wanted to open it, but after thinking about it, he smiled and asked Wang Xuan to open it.

The others also slowly gathered around. Yao Tiande and Duan Chen looked envious. He was not strong enough to complete such a five-star task, let alone seeing this bronze treasure chest.

Wang Xuan did not approach, but released metal tentacles to open the bronze treasure chest.

Even if he knew that there should be no danger in this bronze treasure chest, he was still instinctively vigilant, just in case.

When the bronze treasure chest was opened, he approached. The chest was not big. There were four items in it. They were 5 medium-sized crystal scales, a glass tube containing liquid, a light red crystal, and a Dried dark blue fruit.

Wang Xuan first collected 5 medium-sized crystal scales, and the medium-sized crystal scales he currently owns became 38. He opened the eye of the illustrated book to check the glass tube containing the liquid, and found that it was a bottle of primary healing water.

He already had three bottles of primary healing water, and now this is the fourth bottle.

Look at the information on the pale red crystal again.

"Name: Flame Claw, a primary weapon that can be used to equip mechanical beasts."

"Huh? The weapon used by the mechanical beast?" Wang Xuan's face showed a hint of joy. He understood that the crystal face list of the mechanical beast has six crystal slots, the center one is

installed with the powertrain, and the other three are installed with the head, body and legs respectively. Of the two remaining armors, one is a weapon and the other is an energy shield.

However, these two kinds of crystals are relatively rare. Even Wang Ziren and Lu Bingbing were unable to obtain them. Wang Xuan did not expect that there would be weapons used by mechanical beasts in this bronze treasure chest.

Take out the weapon crystal of the flame claw, open Xiaojiao's crystal face list, and put this crystal in it.

Immediately, Xiaojiao's whole body shook slightly, and the surface of a pair of front claws was covered with a new layer of fiery red metal machinery, and there was a faint flame flowing on the surface.

"Little girl, try the power of this flame claw." Under Wang Xuan's command, Xiaoguo rushed out and rushed towards the corpse of the three-eyed centipede that still had most of its body remaining, raised one front paw, and slammed into it. caught out.

The surface of the fiery red metal mechanical claw immediately rose with a raging flame, and with a snort, it grabbed into the hard shell of the three-eyed centipede, scratched a crack on the surface, and the flame went in through the crack, inside the three-eyed centipede's body burn up.

"Amazing..." Zhao Lei, Gu Manyao, Zhang Haofei, Tie Jun and the others couldn't help shouting when they saw it.

This three-eyed centipede is a five-star monster with a hard shell, which is difficult to break even if it is an ordinary adult, but now it has been torn apart by Xiaojiao's flame claws.

Just looking at this blow, Xiaojiao's destructive power has surpassed that of ordinary adults.

"I didn't expect this mechanical beast to be equipped with weapons, which is amazing." Li Haotian couldn't help but wonder, his eyes showed envy, and he also began to want to get a mechanical beast of his own.

Wang Xuan looked at the last dark blue fruit in the bronze treasure chest that looked a little dry. This fruit was only the size of a walnut. When he observed it with the eyes of the illustrated book, he immediately captured the information of this fruit.

"Name: Soul Beneficial Fruit, very rare. Eating it can increase people's spiritual and soul power, but it is very risky to eat. People with weak wills can easily not be able to withstand the increased spiritual and soul power, resulting in their own insanity. What's more, the soul can't bear this power, it collapses directly, and it is killed on the spot."

Wang Xuan frowned as he looked at this information. The introduction of this soul-benefiting fruit is naturally very rare and magical. It can enhance the power of one's spiritual soul, but eating it is very dangerous.

"This kind of fruit with side effects will die if you are careless. Who dares to eat it easily?"

Wang Xuan shook his head, he could only put it into Xumi's belt, and ignored it for the time being. At least for now, he didn't dare to eat it casually, risking himself.

Although this soul-boosting fruit is very tasteless, the other three are good, especially the flame claws obtained, which enhances Xiaojiao's combat power. The reward of this bronze treasure chest is indeed much better than that of the rust treasure chest.

"Wang Xuan, this task has been completed, what should we do now? Go back to Worm Town and see? Or continue to hunt centipedes here? Try to see if we can break through to the perfect state?" Zhao Lei looked at Wang Xuan, he felt that he had a breakthrough Perfect hope.

Seeing that everyone was looking at him, Wang Xuan looked at the highest point of Centipede Island not far from him, thinking that if the Book of Giants was accurate, then the entrance to the underground would be there.

Thinking that before the six-winged centipede appeared, he had a vague feeling of being peeped at, although it was only fleeting, it still made him feel bad, and after thinking about it, he said, "You guys wait for me here. "

Everyone was stunned, not knowing what he meant by these words, but they saw Wang Xuan disappear with a bang.

He used his vision and hearing to the limit, sensed the surroundings with his heart, and ran at full speed in the direction of Insect Town.

Soon he rushed out a thousand or two kilometers, startling a group of silver-backed centipedes and giant pincers, chasing him.

However, Wang Xuan ignored these centipedes and kept accelerating forward, quickly throwing them away.

Zhao Lei, Gu Manyao and Zhang Haofei looked at each other, not knowing what Wang Xuan was doing.

However, thinking that Wang Xuanlin left and asked them to wait here, everyone could only wait here, and by the way, picked up some of the crystal scales that had fallen off from the death of the six-winged centipede on the ground.

Wang Xuan ran in this area for nearly 20 minutes. Except for the hordes of centipede monsters, he didn't find anything, and the feeling of being peeped and observed completely disappeared.

"Strange... Is that feeling really because of the six-winged centipede or the three-eyed centipede? If there are other people hiding in the dark, I suddenly run around to search like this, there are not many places to hide... It's hard to escape my observation It is."

Wang Xuan shook his head. He had just looked all over the area, and he didn't find it, so he could only give up and run towards the direction of Zhao Lei's nine people.

When he came back, Zhao Lei and several people greeted him and asked why.

Wang Xuan explained, and Yao Tiande said with some admiration: "Wang Xuan, you are really cautious, it's just a momentary feeling, you have to spend half an hour to check it carefully."

Zhao Lei said with a smile: "It is precisely because he is cautious that we can live until now, otherwise Lu Bingbing and these guys would come, and we would all have to die."

Yao Tiande couldn't help nodding when he thought it made sense.

"Since Wang Xuan has read it and said there is no problem, it must be no problem. It is estimated that the Rakshasa leader was also scared to death by us, and dare not come again. Let's continue to hunt centipedes. I hope I can do it today. Impress yourself." Zhang Haofei laughed.

Zhao Lei gave Wang Xuan the 15 crystal scales he had just picked up.

Wang Xuan took the crystal scales, his brows were still slightly wrinkled, and he looked at the four directions again. In this open area, there was no one else but them, and the nearest centipede hunting team was at least one kilometer away.

He thought for a while and said, "Let's move on."

It was already close to the highest point in the center, and he was a little unwilling not to look at it.

The others had no objection and followed Wang Xuan towards the highest point in the center.

The three mechanical beasts jumped forward and led the way at the front of the crowd. After the lead Xiaoguo obtained the weapon, his strength was greatly improved. A pair of front claws were covered with fiery red metal machinery, which was very conspicuous, which made it look majestic.

When they were about to approach the highest point, they encountered nearly twenty six-winged centipedes.

Everyone joined forces, with Wang Xuan's protection, and Bai Yan's witch blood to weaken the six-winged centipede's combat power. The crowd killed these six-winged centipedes relatively easily and obtained 19 crystal scales.

Wang Xuan now has 1,927 small crystal scales.

After killing these six-winged centipedes, everyone finally reached the highest point of Centipede Island.

Here you can overlook the whole island, and everyone is in a good mood.

Wang Xuan looked around. The highest point was a giant rock that looked very complete. It was 30 to 40 meters in length and width. When stepping on the ground, it was a solid rock layer, not like the spiral direction recorded in the Book of Giants. down the entryway.

"If we can get here now, is it considered that we have conquered Centipede Island?" Zhang Haofei laughed, in a good mood.

Gu Manyao couldn't hide the joy on her face, looked at Wang Xuan, and said, "Wang Xuan, I'm almost there."

Wang Xuan was observing the surrounding terrain when he suddenly heard Gu Manyao say this. He didn't react for a while, and said, "What's the hurry?"

Immediately after understanding, his eyes lit up and said, "Are you going to break through into adulthood?"

"Well." Gu Manyao nodded with joy on her face. This was a happy event for her, and she wanted to share it with Wang Xuan.

Wang Xuan smiled slightly and said, "Congratulations." But he was a little worried.

Gu Manyao's monster chi is very different from everyone's hatching beasts, but the adult body already seems to have self-awareness and come alive. This is a happy event, so that she can easily break through to the perfect state, but in Wang Xuan's view, Hatching beasts are too self-conscious, full of uncertainty, and hidden dangers.

It's just that after obtaining the hatching beast, it grows and evolves step by step. The hatching beast will inevitably become stronger and stronger, and its self-awareness will become stronger and stronger. This is almost irreversible, unless, like Wang Xuan himself, a chance coincidence makes the hatching beast's consciousness and consciousness become stronger and stronger. Assimilate itself, be digested and swallowed by it.

Wang Xuan also didn't know what the evolution of these hatching beasts would become in the end. He had no choice but to worry about Gu Manyao.

"What are you two whispering about?" Tie Jun walked over with a smile. He really liked this pair. The more he looked at it, the more he felt that Wang Xuan and Gu Manyao were a good match. them.

Hearing Tie Jun jokingly called them a young couple, Wang Xuan wanted to laugh a little, but Gu Manyao's face immediately flushed, and she turned around and said, "I feel like I'm about to break through."

Tie Jun was stunned for a moment, and then said with joy on his face: "Congratulations to you, you are amazing, if you break through again, both of you will be perfect."

Wang Xuan didn't speak, he opened his pocket and took out the golden paper that was only the size of a palm.

His mind is now on the Book of Giants. For those who have read the records of the Book of Giants and the map behind it, the temptation is fatal. Although he is not a person who is particularly greedy for power, but as long as it is a human being, there are all kinds of emotions and six desires, and there are selfish desires. Who does not want to gain powerful power, who does not want to be above all living beings, not to mention the immortal gate mentioned in it, side by side with gods.

Looking at the records in the Book of Giants again, Wang Xuan was still a little excited. He took a breath to calm down, and then looked at the map on the back.

This map is amazing, the angle is different, the map seen is different, others can only see a blur, only know that it seems to be a map, but can't see what map it is, only the person holding the gold paper, with the holder's Angle, and constantly adjust the angle, and then slowly see the image of this place come alive, and the three-dimensional effect emerges.

At this moment, Wang Xuan was observing the map, constantly adjusting the position of the gold paper and himself. Slowly the map stood up, his body was retreating, and the image of the place was constantly enlarged. In the end, only this front appeared on the gold paper. The three-dimensional pattern of a giant rock, in his eyes, the map on the gold paper overlapped with the giant rock 30 to 40 meters long in front of him.

No one else could see it, they could only see Wang Xuan holding the golden paper in his hand and backing away, no one knew what he was looking at.

"Wang Xuan is fascinated by this book of giant gods." Zhao Lei shook his head. He didn't take the book of giant gods seriously, he felt it was a scam, what immortal gate, what comparable gods, he only believed in the strength he possessed now, and did not believe in these gods and gods Goofy legend.

Thaksin science and technology, I believe that all this should be created by some kind of super civilization, and even hatching beasts are life weapons created by special technology, but gods? He didn't believe it.

Chapter 137

Yao Tiande was shocked when he heard it: "Book of the Giant God?" He had heard the legend about the Book of the Giant God, and he always thought it was illusory. Even if he knew that Wang Ziren came to find Wang Xuan and others, it was because Wang Xuan and the others got it. The Book of Giants, but this is the first time I have seen it with my own eyes.

Originally, he thought the Book of Giants was a thick book, but unexpectedly it was a piece of thin gold paper the size of a palm. In Wang Xuan's hand, if he hadn't looked carefully, he would have hardly noticed it.

Thinking that Wang Xuan was holding the legendary Book of Giants, Yao Tiande's heart could not help beating. Although he did not think that the legend was 100% true, there might be some exaggeration, but this Book of Giants It must be a treasure.

Wang Xuan ignored everyone's eyes, and just silently overlapped the map that appeared in the Book of Giants with the rock in front of him.

He started to walk forward. In the three-dimensional map, he clearly saw the pattern of a pentagram, with a blurred figure in the center. The head, hands and feet corresponded to the five corners of the pentagram. The **** are located in the center of the circle, which looks a bit weird and has a sacred mystery.

As the portrait of the pentagram appeared, a faint consciousness immediately appeared in his mind, which appeared in the book of giant gods, entered his mind, and was perceived by him.

"Watered with blood, the womb of the underworld will open, opening the way to the gate of immortality."

Sensing this information and comparing the map with the rocks in front of him, Wang Xuan determined the five corners of the pentagram. These five corners are also the parts of the head, hands and feet of the fuzzy human-shaped pattern in the center.

Wang Xuan cut off his right hand, found the positions of the five corners on the rock, and dripped blood.

The others were watching silently. Although they didn't know what he was doing, they probably guessed that it had something to do with the Book of Giants he was holding, and understood that he should have discovered something.

The blood splashed on the rock, but at first there was no response. As more and more blood was spilled, it gradually turned into a pool of blood. At the center of the pool of blood, the rock sank faintly, forming a shallow pool of blood. Pothole, all the blood was sucked into the pothole.

Seeing the reaction, Wang Xuan knew that he had guessed correctly, and then found the second point on the rock that was printed on the pattern on the map, and drenched the blood again.

Soon the five points of the pentagram were all drenched in blood by him, forming five small potholes, but other than that, there was no other reaction.

Wrinkling his brows slightly, Wang Xuan thought of something, walked towards the center, found the center of the pentagram, which is the genital part of the fuzzy human shape in the pattern, and drenched the blood.

This time, with the blood dripping down, the blood spilled on the rock, and it reacted violently. The blood was like a living creature. It was divided into five lines and extended along the center of the circle. Wherever it went, the rock ground seemed to be surrounded by Lighted up, a clear pentagram pattern formed by blood emerged.

This scene was quite astonishing. Everyone stepped back, but saw the giant rock shaking slightly, and the blood pentagram floating on the surface suddenly sank. The giant rock was divided into several pieces, followed by the inside. There was a creaking sound, and the center of the pentagram collapsed.

Wang Xuan looked at the scene in front of him with excitement and excitement on his face.

This Book of Giants is really true, and he really opened the entrance to the palace deep underground.

When the shaking of the rock disappeared and the blood pentagram disappeared, Wang Xuan began to walk towards the center.

The others reacted and followed, unable to hide the surprised look on their faces.

Among them, Zhao Lei was the most shocked.

"Is the record in the Book of Giants true? What's going on here?" He also began to become suspicious.

Yao Tiande's heart was beating wildly, he never thought that following Wang Xuan, there would still be such an opportunity, but he didn't know what he would see next.

Wang Xuan put away the gold paper in his hand and looked at the passage where the rock sank. There are steps going down in this passage. The steps are like a spiral staircase that keeps going down. Looking down from above, you can't see it at all. How deep is the bottom.

Fortunately, I have the Book of Giants in my hand. I can use the map to compare the revolving steps. I know that there is a huge space under the steps. According to the passage displayed on the map, I can go straight to the gate of immortality.

Wang Xuan looked at the people around him and said, "I'm going to go down and have a look, how about you?"

Zhao Lei smiled and said, "Is there any need to say that? Of course we will follow you when you go down."

Zhang Haofei nodded and said, "Yes, let's go down and have a look."

Gu Manyao didn't speak, but the look in Wang Xuan's eyes obviously meant that I would go wherever you go.

Seeing that everyone was going to be together, Wang Xuan nodded and said, "I don't know what's going on below, and whether there will be danger. In short, everyone must be careful when they go down, and follow my instructions."

"Don't worry, we won't mess around."

Wang Xuan snorted, waved his right hand, and said, "Little girl, go down and have a look."

He let go of the little girl and headed down the stairs first.

He and Xiaojiao are in the same mind, and if there is danger below, he can immediately sense it through Xiaojiao.

As Xiaojiao went down, he was sure that there was no danger in going down the steps by more than ten meters. No matter how far he went, it would exceed the sensing distance between him and Xiaojiao. He no longer hesitated, and began to descend down the steps.

The metal tentacles extended out, protecting the top and surrounding areas, just in case.

Followed by Gu Manyao, she followed closely with her mechanical fox, followed by Zhao Lei, Zhang Haofei, Tie Jun, Bai Yan, Li Haotian and others.

Everyone went down one after another, and finally all went down the steps.

It looks very dark here. Fortunately, everyone's eyesight is far beyond ordinary people, and they can barely see things. The little girl in the front waved the flame claws from time to time, and the flames rose, like two torches illuminating the front.

The steps spiraled downward, and after about 100 meters deep into the ground, they appeared in a huge and dark cave.

When Duan Chen was the last to jump off the steps, ten people and three mechanical beasts were all in this giant karst cave. The karst cave was dark and deep, surrounded by piles of strange rocks. Where is the way out, everyone stopped here, not knowing where to go next.

Wang Xuan took out the palm-sized golden paper again, and carefully looked at the map on the back of the golden paper, looking for the way to the gate of immortality.

In his careful adjustment, the map on the back of the gold paper was presented three-dimensionally again. The map at this moment changed again, and it had formed the appearance of the giant karst cave in front of him.

According to the map, the cave was shaped like a teapot, with a small entrance at the top and a huge bottom at the bottom. The steps they descended were right in the center of the cave.

Comparing the cave space in front of him according to the map, Wang Xuan quickly saw that a road was displayed on the map. Going forward along his left, when he reached the end, he could find the passage leading to the gate of immortality.

"Let's go." Wang Xuan held the golden paper in his left hand and drank it lightly in his mouth. The little girl jumped out first and rushed towards the darkness on the left.

Wang Xuan followed closely behind.

Others followed suit.

Going forward along the darkness, there are strange rocks of different sizes underfoot, which is very difficult. Fortunately, everyone is agile and keeps flying on these rocks. After walking about two or three hundred meters, everyone finally saw it. A dark cave appeared in the darkness ahead.

The cave was about three meters wide and five meters high, and it was dark inside, and nothing could be seen.

Seeing the darkness inside, Wang Xuan frowned slightly. Yao Tiande in the crowd took out a spar and rubbed it carefully on the surface. The spar began to glow like a light bulb, illuminating a radius of several meters.

Zhang Haofei glanced at Yao Tiande and said, "What is this?"

Yao Tiande explained: "This is a lighting crystal, not a valuable thing."

Wang Xuan beckoned to Yao Tiande and asked him to come to the front of the team.

Yao Tiande rushed forward, came to him, and used the lighting crystal in his hand to look into the dark cave facing him. Wang Xuan observed carefully and could only see that there were rock walls on both sides of the cave, and the surface was covered with a lot of cracks. As dense as a spider web.

Wang Xuan still released Xiaojiao to enter first, and then he slowly entered. The metal tentacles were guarded in front of him and above his head, and his face was full of vigilance.

This cave is dark and dark, and no one knows if it is dangerous. Wang Xuan does not dare to be careless. The closer he gets to the gate of immortality, the more cautious he is.

The others were divided into two rows, one after the other, all showing their hatching beasts, ready to deal with emergencies at any time.

The crowd went deep all the way, and Wang Xuan, with the help of the lighting crystal in Yao Tiande's hand, noticed that a large number of murals began to appear on the rock walls of the caves on both sides.

These murals were painted very simply, and they looked like graffiti made by the ancients. Wang Xuan asked Yao Tiande to stop, took the lighting crystal from his hand, and carefully observed these murals. The most common symbol is the pentagram.

Shaking his head secretly, he handed over the lighting crystal in his hand to Yao Tiande, signaling everyone to move on.

The cave seemed very quiet except for the breathing and footsteps of everyone. Suddenly, Zhang Haofei reached out and touched his face, feeling like some rain was dripping on his face.

"Is there any water here?" Zhang Haofei said while reaching out to touch his face. When he looked at his hands again, he found that there was something white on his hands, and there was a faint stench.

"What the **** is this?" He couldn't help but raised his head and shouted, and then two more drops fell on his face, and he was busy reaching out and wiping it, his face was covered with this white paste substance.

Yao Tiande also felt it, and was busy raising the lighting crystal to take a picture, only to find that the top of the cave above was densely covered with huge bats.

At a glance, I don't know how many there are.

Zhang Haofei saw it too, thinking that the white paste-like thing on his hands and face had a stench, he suddenly understood that it was bat feces.

"Fuck you! You damned bats, **** everywhere, I'm going to **** you, do you have any sense of public morality!" Zhang Haofei suddenly felt extremely disgusted, and hurriedly dodged to the side, took out the towel from the storage belt and slapped his face wipe on.

Everyone was drenched in a lot of bat dung, and they moved away from each other. Yu Shanshan even raised her hands up and opened a semi-circular mask to protect everyone in it and block the bat dung that fell from time to time. .

Perhaps it was because the voices of the crowd alerted the resting bats. There was a sudden snort from above, and a large cloud of darkness appeared. Yao Tiande held up the lighting crystal and said in surprise, "These bats are going to attack us!"

With the help of the light released by the lighting crystal, he saw a black mass of bats appearing above. These bats spread their wings and were one or two meters long. He had never seen such a huge bat before. In his exclamation, these bats began to grow. Groups rushed towards the bottom.

Zhang Haofei heard the crunching sound of bones all over his body, and the skeleton shot, looking at a huge bat that jumped down, suddenly activated the whirlwind bone claws, and grabbed it.

The bat was caught by his bone claws, and immediately its bones and flesh rotted, and it exploded.

Wang Xuan opened the eyes of the illustrated book and unexpectedly found that he could not capture the bat information.

Apparently, the information on these bats is not stored in the database of the Eye of the Pokédex.

The two metal tentacles stretched upwards like two giant pythons, bowing left and right, killing two bats instantly. Wang Xuan said solemnly, "Everyone, run forward quickly."

There are too many bats above. It seems that there are hundreds or thousands of them. If you stay here and slowly kill these bats, you will be exhausted.

As Wang Xuan spoke, he increased his speed and began to run forward. When a bat jumped down, he immediately controlled the metal tentacles to kill it.

The others followed closely, and Yu Shanshan kept propping up the mask, but she couldn't block all of them when a swarm of bats rushed down, and the mask was broken by bats from time to time.

Fortunately, although the number of these bats is large, their strength is not too strong.

The crowd did not love to fight, they followed Wang Xuan closely, rushing towards the depths of the cave while defending against the bats that fell down in groups.

The bats above the cave were completely disturbed. More and more bats appeared. The darkness covered almost the entire cave. Stronger than Wang Xuan was blocked, and a group of bats appeared in the cave in front of him. They all rushed towards him frantically, and even he couldn't resist the two metal tentacles he controlled.

Wang Xuan had to launch a "spiral strangulation".

The two metal tentacles stretched to the limit of six meters, rotating with each other, generating a terrifying spiral tearing force, swinging into the swarm of bats, and immediately one of the bats were twisted in, and they were instantly torn into pieces.

Wang Xuan speeded up, and with "spiral strangulation", he just cut a **** path in this cave and rushed out.

After rushing out of the cave, Wang Xuan was taken aback and his body fell sharply. The end of this dark and dark cave turned out to be a cliff.

"Be careful, this is a cliff!"

Wang Xuan shouted to remind everyone behind him that he swung the metal tentacles out, like two javelins, slammed into the side of the rock wall, but the little girl who was following him couldn't hold back and rushed out a few meters in the air. , falling straight down.

"Damn it!" Wang Xuan saw it in his eyes and used one metal tentacle to plunge into the rock wall to control his body, and the other metal tentacle swung out in the air, entangling the falling boy and barely grabbing it.

"It's dangerous!" Wang Xuan breathed a sigh of relief, and then looked at the huge space at the end of the cave, and it was pitch black below.

A large number of bats frantically besieged the people still in the cave. After hearing Wang Xuan's reminder, everyone did not rush out rashly.

"Wang Xuan!" Gu Manyao stood by the entrance of the cave, looked down, and found that Wang Xuan was hanging on the rock wall below with his metal tentacles.

"Wait a minute, I'll take a look at the map." Wang Xuan didn't know what to do next. He was busy taking out the gold paper and looking at the map carefully.

Gu Manyao, Zhao Lei, Zhang Haofei and others were all blocked at the entrance of the cave, gathered together, and desperately fought back against the endless bats that rushed over.

Yu Shanshan, Tie Jun, and Duan Chen used their masks and shields to block them from time to time. Bai Yan launched a "Wizard's Blood Jet", which weakened the strength of these bats to the level equivalent to a sub-body. A single swing will kill a bat.

Among them, Li Haotian was the one who killed the most bats.

To deal with such relatively weak bats, Li Haotian's "Arrow Rain" brought out the benefits of a wide-area attack. Every time the "Arrow Rain" was launched, the sky was bursting with arrows, and pieces of bats fell down.

The crowd blocked the attack of the bats at the entrance of the cave. Wang Xuan rolled Xiaojiao and moved it to the edge of the rock wall. Xiaojiao stretched out his flame claws, grabbed into the rock wall, and stabilized his body. At the same time, he checked the map against the golden paper. , the above

three-dimensional map changed again, constantly changing, and finally formed a three-dimensional model of a huge abyss.

Wang Xuan understood that the three-dimensional model of the abyss corresponds to the huge dark space in front of him. According to the three-dimensional model of the abyss, the "gate of immortality" he was looking for was at the bottom of the abyss.

"So that's the case." Wang Xuan lifted his spirits, put the gold paper into Xumi's belt, and said loudly: "Everyone climbed down the rock wall, there is a road below."

After he finished speaking, he let Xiaojiao go down the rock wall, while he relied on two metal tentacles, inserted into the rock wall alternately up and down, and fell down.

Hearing Wang Xuan's voice, Gu Manyao put away the mechanical fox, turned down again, and fell down the rock wall. He immediately caught up with Wang Xuan, who had descended several feet below. Enter the rock wall, stabilize your body, stretch out your left hand, climb on a protruding rock, and then pull out the Yaochi knife.

Zhang Haofei is even simpler~www.mtlnovel.com~ He has a pair of skeleton claws, these claws are extremely sharp, grabbing into the rock wall is like digging into the soil, easily relying on this pair of skeleton claws to grasp the rock wall down.

After that, Zhao Lei, Tie Jun, Bai Yan, Yu Shanshan, Yao Tiande and others went down one after another.

Li Haotian shot the last rain of arrows at the bats that had been saved, and watched a large number of bats fall down before turning over.

Although the cave was full of bats, after everyone rushed out of the cave and down to the rock wall, they stopped chasing and retreated back into the cave. Obviously, as long as outsiders did not invade their lair, they would not attack humans at will.

Although this rock wall is steep, with everyone's current skills, each of them is more flexible than apes, and it is not difficult to climb down. Among them, Wang Xuan, who is the fastest, uses the length of the metal tentacles to calculate the distance. Looking at the distance of the rock wall, he calculated in his heart that he had descended more than 300 meters, and finally he saw the bottomless black water below the abyss rock wall. On the black water, there were some dilapidated stone pillars.

These stone pillars vary in height and thickness, the thin ones are no more than one foot in diameter, the thick ones are five or six meters, the short ones just surfaced, and the tall ones that stand more than ten meters high.

It is densely packed, and at first glance, there are at least hundreds of stone pillars standing in this black water.

Wang Xuan slowly approached a stone pillar below, and noticed the statues protruding from the surface of these stone pillars, with many horns and beast-faced fangs, which seemed to be statues of some ancient monsters or ancient evil gods.

Looking at these statues, Wang Xuan felt a chill down his spine and an inexplicable unease in his heart for some reason.

These stone statues seem to be embedded in these stone pillars, sealed by the stone pillars, and they may break open the stone pillars at any time and be resurrected again.

Chapter 138

Looking at these stone pillars, Wang Xuan's heart is slightly awe-inspiring, holding the gold paper in his left hand, watching the map on it change again. From his current point of view, there are stone pillars of different heights and thicknesses on the map. Inside the stone pillar are the forms of monsters or evil gods formed by intertwining with countless thin threads.

These monsters and evil gods are big and small, and depending on the stone pillar, the size of the sealed monsters and evil gods are also different.

Wang Xuan noticed that there was a small stone pillar inlaid with an evil **** with a fly head and wings but a human body. He was no more than a foot long. When he noticed the stone statue, a thought suddenly appeared in his mind. The inexplicable information made him understand that this human-shaped evil **** with fly heads and wings was named "Lord of the Flies".

Sensing this information, Wang Xuan's heart was slightly awe-inspiring, but he believed more and more that the records in the "Book of Giants" were very likely to be true.

"Following these stone pillars to the end is the door of immortality. Opening the door of immortality and entering the lost palace will awaken the ancient power and will be able to stand side by side with the gods..."

Wang Xuan put away his excitement, looked at a stone pillar below, and jumped down.

He landed on this stone pillar with a diameter of about two feet, and the mechanical beast Xiaojiao who was with him also jumped and jumped to another stone pillar.

Wang Xuan released a metal tentacle and reached into the black water on one side.

As soon as the metal tentacle touched the black water, there was a chi chi sound and smoke came out.

I was slightly startled, and immediately put away the metal tentacles. In just this short moment, the tip of the metal tentacles just touched the black water and turned pitch black, as if corroded.

"It's very corrosive." Wang Xuan's heart was awe-inspiring. With the horror of this black water, once a person fell into it, unless he could climb out in an instant, he was afraid that he would soon be corroded into a pile of dead bones, and not even bones were left. .

"Wang Xuan—" Gu Manyao's voice came from above.

Wang Xuan raised his head and saw that Gu Manyao was holding a Yaochi knife in his right hand, descending down the rock wall, only five meters away from the black water surface below.

"Pick a stone pillar and jump down, remember not to touch the black water below, these waters are highly corrosive."

Wang Xuan's voice spread far and wide, reminding everyone who followed behind.

After that, he started to jump towards another stone pillar three meters away, and approached the end of the abyss according to the direction marked on the map.

Gu Manyao landed on the stone pillar that Wang Xuan was standing on just now, and she followed the stone pillar that Wang Xuan stepped on and followed closely behind.

Zhang Haofei also fell down. He was about to speak when suddenly he heard a loud bang. Black water splashed around the stone pillar he was stepping on. A python-like black shadow burst out and rushed towards him.

When the incident happened suddenly, Zhang Haofei couldn't help but let out a strange cry, and his first reaction was to jump towards the stone pillar on the other side.

Wang Xuan, who was at the forefront, stopped immediately and looked back.

He saw a very strange creature. This creature was shaped like a jellyfish, with a huge canopy. Its body was almost transparent, with a faint white light. The internal organs and blood vessels could vaguely be seen inside. The human face has large translucent tentacles around it, and each tentacle is more than ten meters long.

At this moment, it retracted the upper umbrella cover, broke out of the water, and stretched out its tentacles to attack. This terrifying appearance made Zhang Haofei's first reaction not to resist the counterattack, but to flee.

Zhang Haofei just jumped onto another stone pillar. The jellyfish monster used its huge tentacles to wrap around the stone pillar he was just standing on. Several giant tentacles more than ten meters long swung up and moved towards Zhang Haofei, who had just fled to one side, and the other side. Gu Manyao drew it.

This monster can survive in the highly corrosive black water, and it must be extremely terrifying. Wang Xuan opened the eye of the illustrated book, turned around and rushed towards it.

The Eye of the Pokédex caught the jellyfish monster, but he didn't want to but no information appeared. Like the bat before, there was no information about the jellyfish monster in the Eye of the Pokédex.

"What's going on? Is this really a lost world, and all the monsters here are not in the normal world, so there is no information?"

Wang Xuan's thoughts turned around, but when he saw Gu Manyao shouting, he had already swung the Yaochi knife and launched a three-stroke slash.

Three sword breaths came out of the sword and slashed towards the giant tentacles that were swept over.

Although the power of this giant tentacle swept over was strong, it was slashed by three sword qi, and it was still cut off in an instant.

Zhang Haofei on the other side had no choice but to activate the skeleton, raised his arms, and grabbed out the whirlwind bone claws to fight the giant tentacles that swept over.

The whirlwind bone claws smashed the giant tentacles that were swept over, but the force of the tentacles swept over made him unsteady and flew out sideways.

"Damn-"

Zhang Haofei screamed, he was kicked out of the stone pillar, and he was about to fall into the black water below.

At this moment, the iron army fell onto a stone pillar from above, and suddenly threw the diamond shield in his hand, with a tentacle attached to the back.

"Zhang Haofei, catch it!"

With his loud shout, the diamond shield instantly flew above Zhang Haofei's head.

Hearing Tie Jun's stern shout, Zhang Haofei responded quickly, and immediately stretched out his hand and grabbed the tentacles attached to the back of the diamond shield.

Tie Jun used all his strength, contracted his tentacles, and yanked it violently, pulling Zhang Haofei, who was about to fall into the black water, and flew towards him.

Wang Xuan's body flashed, overtook Gu Manyao, and landed on the stone pillar closest to the jellyfish monster. Two metal tentacles with a length of six meters waved out, pumping towards the jellyfish monster's translucent human-shaped face. come over.

The most terrifying thing about this monster is that it has a face that looks like a human being, and even has the mouth, nose, eyes and ears of a human being, which makes it seem indescribably weird.

This jellyfish monster is entrenched on a stone pillar. Gu Manyao has just cut off two giant tentacles. Its open mouth is shaking, and it seems to feel pain, but it has no vocal cords and cannot make a sound.

Around the big face, giant tentacles that were almost transparent rose up, and madly pulled towards Wang Xuan and the metal tentacles.

It can feel the great power of these two metal tentacles.

Wang Xuan entangled the two metal tentacles together, and activated the fifth ability "spiral strangulation" to promote the realization of the state.

The two metal tentacles revolved around each other, creating a terrifying tearing force that swept over the giant tentacles.

The power of this "spiral strangulation" is terrifying. Wherever it is swept, the giant tentacles are torn and smashed, and a lot of translucent flesh and blood splashes around.

The large, almost transparent face was twisting, and although it could not make a sound, it was full of painful expressions.

Wang Xuan jumped up and closed the distance between the two sides again. He had already tried out that although the strength of this jellyfish monster was not as good as that of a real powerhouse, it was also close to the five-star danger level. It was very terrifying. .

The more than a dozen tentacles of the jellyfish monster were quickly smashed by the "spiral strangling" controlled by Wang Xuan. It knew that it was not good, so it loosened the entangled stone pillar and wanted to escape back into the water.

Wang Xuan slammed the metal tentacle into the air, wrapped it around its big face with a squeak, yanked it back, and smashed it heavily on another stone pillar.

There was a loud "bang", the stone pillar did not move at all, and the giant umbrella cover on the big face burst open, becoming tattered, and a lot of juice splashed out.

At the same time, Wang Xuan launched "Tangling and Strangulation", the metal tentacles kept shrinking, and the entangled face was quickly twisted into a ball of meat sauce.

It wasn't until a white scale emerged from his big face that it sank into his right hand, and Wang Xuan released the metal tentacles, turning into a mass of translucent rotten flesh jellyfish monster corpse that fell down, and was soon swallowed by the black water.

It can live in highly corrosive black water, which may have something to do with the characteristics of its skin, the body surface is not afraid of black water corrosion, or it has something to do with the faint white light released from its body, but it is now twisted into a rotten ball. The flesh, the white light in the body dimmed and disappeared, and when it fell into it, it could not resist the corrosion of the black water. There was a chi chi sound on the water surface, and blue smoke was emitted, and the rotten meat was constantly corroded.

The others came down one after another and landed on different stone pillars. Seeing that Wang Xuan successfully killed the jellyfish monster, they all let out a sigh of relief.

"Wang Xuan, what is the name of this monster? I'm afraid it has a five-star level of danger?" Zhao Lei's voice came over.

"I don't know either, the Eye of the Book cannot see its data."

Wang Xuan responded: "It's better than four and a half stars, but worse than five stars."

"You guys wait here to prevent this kind of monster from remaining in the water, I'll go take a look."

Wang Xuan said while flying along the stone pillars in the distance. He was very fast, and everyone else stopped at the edge of the rock wall. If the situation is not right, he can immediately return to the rock wall and climb up.

They watched Wang Xuan disappear into the dark distance, swallowed by the darkness, and after a while, he reappeared.

"Everyone, come down."

Wang Xuan's voice came from far away. He had just reached the end of the abyss along these stone pillars. He didn't see any jellyfish monsters attacking again. This kind of weird jellyfish monster, or there are other jellyfish monsters, but it has been hidden by fright, at least for the time being, it should not appear.

After hearing Wang Xuan's words, everyone began to fly in his direction. Wang Xuan waited for them to approach, and then continued to go deeper along the stone pillar.

The further inward, the thicker the stone pillars that appeared under the feet of the crowd, and the crowd fell on it, and their hearts became much more stable.

This abyss is very large, and the black water surface is nearly a thousand meters. Everyone flew along the stone pillars that appeared on it. Fortunately, there was no danger or attack on the way, and they successfully reached the other side.

There is still a rock wall with no top visible on the other side. There is a huge cave on the rock wall, three meters wide and more than five meters high. It is about ten meters above the water surface. Wang Xuan stretched out his metal tentacles and stabbed into the rock wall. In the past, another tentacle swung up again, clinging to the cave, and with the strength of these two metal tentacles, his body rose up like a cloud.

Zhang Haofei said with some envy, "I used to think that Wang Xuan's metal tentacles were too earthy and not as handsome as my skeleton, but now I realize that these two large tentacles can cope with all kinds of environments. They are completely multi-functional, so they shouldn't be too convenient."

He thought that he had been hit by the jellyfish monster and almost fell into the black water just now. The attack distance of his skeleton was too short to save himself. If there were two metal tentacles as long as Wang Xuan, he could easily If you grab the other stone pillars, you don't even need the Iron Army to save them.

As he spoke, he activated the skeleton, and a pair of bones grabbed the rock wall, like a human-shaped gecko, and climbed up.

Zhao Lei laughed when he heard this: "Zhang Haofei, you only know now?"

His "first saint" is not as good as a skeleton in climbing the rock wall. He can only use his hands and feet to grasp the protrusions on the rock wall to climb.

The crowd climbed up one after another, Wang Xuan had already walked ten meters along the cave, and the little girl who was released went even deeper into the cave for twenty or thirty meters.

Holding the golden paper in his left hand, he observed the map on the back and determined that the end of the cave was the gate of immortality.

Putting away the golden paper, my heart was excited again.

The gate of immortality is finally coming. What secrets are hidden in this gate, and what is the power of the ancient times. Can you be compared with the gods by obtaining this ancient power?

Seeing that everyone came up, Wang Xuan looked back at everyone and said, "Go, the gate of immortality is at the end of this cave."

Hearing Wang Xuan's words, everyone became excited.

Although everyone did not believe the records in the Book of Giants at first, but as they went deeper, they saw such a huge space below Centipede Island, and after seeing the stone pillars that were suspected to be inlaid with a large number of monsters and evil gods, everyone felt a little bit in their hearts. shaken.

Even Zhao Lei, who does not believe in the existence of gods, is now beginning to think that the gate of immortality recorded in the book of giant gods must have rare treasures, or hidden treasures.

The crowd went deeper into the cave, without encountering danger or monster attacks. After about a thousand meters in, Wang Xuan, who was at the front of the team with Xiaoguo, stopped.

The cave has come to an end.

Looking at everything in front of him, Wang Xuan took a deep breath.

The others stopped beside him one after another, looked up together, and looked at the end of the cave.

"The Gate of Immortality?" Yao Tiande couldn't help but shouted softly.

In front of everyone, at the end of the cave is a huge pentagonal stone slab with a diameter of more than ten meters, which seals the passage of the cave. The pentagram is engraved with the pattern of a pentagram. In the pattern, there is a human figure. , This human figure is about ten meters high, with open arms and legs in the shape of a "big" shape, and its head, hands, and feet are exactly facing the five corners of the pentagon.

Wang Xuan understood at a glance that it was exactly the same as the pentagram that he had opened the entrance to the Centipede Island before.

Different from the pentagram at the entrance of Centipede Island, the human figure on this giant slate is extraordinarily real, with complete facial features. Although the eyes are open, the eyes are hollow and have no eyeballs. This human figure is embedded in the slate. , was sealed, and on the body exposed on

the outside of the slate, you can see that it has a plump female breast and male reproductive organs. This humanoid is hermaphrodite, and its body proportions follow the most perfect golden ratio.

Everyone was staring at the androgynous human figure protruding from the stone slab. This human figure seemed to have some kind of mysterious power, which attracted everyone's attention to its body and could not move away for a long time.

After a long time, it was Wang Xuan who woke up first. He suddenly felt a sense of unease in his heart. It seemed that some kind of huge danger was approaching.

Frightened, he broke out in a cold sweat, and saw the other nine people around him staring blankly at the slate figure in front of him, their faces sluggish, as if they could stand like this until the end of the day.

"Gu Manyao!" Wang Xuan drank lightly, and immediately pushed Gu Manyao next to him.

Gu Manyao was pushed by him, and then woke up, his face turned pale, and when he touched his forehead, he was covered in cold sweat.

"This slate is very evil." Gu Manyao had lingering fears.

"Well, we'll wake the others up." Wang Xuan immediately pushed Zhao Lei, Zhang Haofei and the others, and Gu Manyao also pushed the others to wake up.

When everyone was woken up, all their faces were pale, as if they had suffered a serious illness, and there was cold sweat on the back of their foreheads.

"Everyone don't look at its eyes, its eyes are weird." Wang Xuan said in a deep voice, he now thinks that this slate human figure has no eyeballs, only a pair of open empty eyes, but these eyes are very strange, if you stare into its eyes, you will slowly seem to be able to **** people's souls in. If there is no outsider to wake up, I am afraid that you will be lost in it forever.

Wang Xuan took out the golden paper. According to the map of the Book of Giants, the stone slab with the pentagram in front of him was the gate of immortality. As long as the gate of immortality was opened, he could successfully enter the lost palace at the end of Centipede Island and become a side by side. the existence of gods.

Looking at the map on the back of the Book of Giants again, Wang Xuan understood that the method to open the gate of immortality must be recorded on it.

With his careful observation, the map on the back of the Book of Giants reappeared, like a three-dimensional animation changing, from the original abyss and a large number of stone pillars~www.mtlnovel.com~ to the one with pentagrams and humanoid statues engraved in front of him. slate.

Soon the three-dimensional pentagram pattern that appeared on the map overlapped with the slate in front of him. Originally, Wang Xuan thought it would be similar to opening the entrance to Centipede

Island, and he would smear his own blood on the five corners of the slate pentagram. And the center point, you can open the door of immortality.

But as the map overlapped the slate in front of him, he immediately gained the real way to open the gate of immortality.

"The Book of Giants overlaps with the Gate of Immortality. The Book of Giants is soaked in the blood of believers. The Gate of Immortality will be opened, and the ancient power will wake up from the womb of the underworld..."

Sensing this information, Wang Xuan understood that to open the gate of immortality, two conditions are needed. One is to stand in front of the gate of immortality. Then dip and smear the palm-sized book of giant gods with blood. Only when these two conditions are met can the gate of immortality be opened.

Knowing the method, Wang Xuan immediately carefully observed the map that appeared on the giant god, and made sure that it fit perfectly with the giant board in front of him. Only then did he cut through the palm of his right hand. Paper drips.

Strange to say, as the blood dripped, Wang Xuan saw the blood rising from the gold paper and extending along the three-dimensional map. Soon the map was dyed blood red with blood, and the pentagram appeared on the map. And the humanoid pattern in it is faintly glowing with blood red light.

Everyone couldn't see the change, they could only see that in the gold paper held by Wang Xuan in his left hand, a blood-red pentagram pattern suddenly rose up. on slate pattern.

Chapter 139

As the blood-red pentagram pattern reflected on the slate, a strong blood light suddenly appeared on the slate that had been silent.

In the blood light, everyone saw a faint sound of machine turning from the slate. The pentagram and the human figure embedded in the slate seemed to come alive. Suddenly, the humanoid statue was about to struggle out of the slate.

Seeing this change, everyone was taken aback, and they all stepped back. Wang Xuan immediately revealed the metal tentacles and protected them in front of him. Gu Manyao, who was beside him, tightened his right hand, and the demon chi appeared, ready to release it at any time.

Everyone became nervous, but saw the humanoid statue move and sway, struggled out, and rushed in the direction of everyone.

Yu Shanshan's first reaction was to open the mask and protect everyone in it. Iron Army's King Kong Shield and Duan Chen's Earth Shield appeared one after another.

I don't want that this humanoid statue just struggled out of the slate, suddenly weathered, burst into fine sand, and turned into a giant like a pile of countless fine sand. Now it leaves the slate, throws out, and turns into a pile again Sand, spilled on the ground.

Everyone was waiting, thinking of defending or counterattacking, not wanting that the ten-meter-high human-shaped stone statue would suddenly turn into fine sand and disappear. Looking at the stone slab in front of him, as the human-shaped stone statue embedded in it disappeared, a huge stone statue appeared on it. The human-shaped gap, in the gap, faintly transmits a faint light.

Only then did everyone understand that the door of immortality was opened.

Almost at the same moment, Wang Xuan's heart shrank violently, as if he had been stabbed by a needle, and his muscles instinctively tensed, about to burst into the strongest force.

Although I don't know where this danger comes from, this is the first time that my instinct is so strong. Wang Xuan almost instantly detonated the power of the blue crystal scales in his body, and the metal tentacle in his right hand suddenly lit up with faint blue rays of light. .

With a "bang", the mask that was protecting everyone around suddenly shattered.

Yu Shanshan groaned, as if she was hit hard, and a mouthful of blood spewed out of her mouth. At this moment, she didn't even know how the mask was shattered, she only felt that her body suddenly flew out like a cloud.

Zhao Lei, who was standing in front of her, felt a hand on his left shoulder. The power of this hand was irresistible. His left shoulder and the armor immediately collapsed into it, and there was a sound of bones shattering, and his body lay sideways. Flying out to the right, hitting Tie Jun, the two of them groaned and fell out.

It was Wang Xuan who stood in front of Zhao Lei. At the same time that Zhao Lei was pulled away, he turned around. The energy of the blue crystal scales in his body seemed to explode, and the metal tentacles suddenly lit up with a blue light. Pulled out with his right hand.

Almost at the same moment, he saw a short person with a height of less than 1.6 meters in front of him.

This man was wearing a full set of black metal armor he had never seen before, and the helmet he was wearing covered even his face, leaving only his eyes, mouth and nose exposed.

It was he who suddenly appeared from behind the crowd, shattering the mask that Yu Shanshan had used to protect the crowd, squeezed into the crowd, pulled out both hands, and Yu Shanshan and Zhao Lei, who were in front of him, flew sideways one after another. , his body interspersed, and the target was Wang Xuan, who was standing at the forefront of the team. He swung his left fist, and there was a faint whistling wind on it. The speed and power of this punch were beyond imagination, and the energy contained in it. Squeeze the air, creating a sonic boom.

This punch hit Wang Xuan in the head, as long as he was hit by it, his head and the alloy helmet he was wearing would explode into pieces of flesh and blood in an instant.

Wang Xuan's instinct was extremely strong. At this moment, he felt that danger was coming, and it was not from the immortal gate just opened in front of him. This made him realize instantly, detonated the blue crystal scales in his body, and turned around suddenly. Sure enough, he saw the short man in black armor.

A look of astonishment flashed across the short man's eyes, and Wang Xuan's reaction was completely unexpected.

The punch that had been guaranteed to be out of ten was blocked by the metal tentacle that extended from Wang Xuan's right hand. The fist hit the metal tentacle, and a terrifying force erupted. Wang Xuan only felt a violent shock in his right arm. All the bones in his right arm were shattered and blasted away.

At the same moment, detonated by this terrifying force, the energy of the blue crystal scales in his body fluctuated violently. The tentacles that originally contained the energy of the blue crystal scales vibrated, and the pieces of metal covered on the outside were about to spread out. The blue dim light suddenly released a dazzling blue light.

The terrifying power and the energy of the blue crystal scales blasted in by the short man exploded in the metal tentacles controlled by Wang Xuan. Wang Xuan felt his legs soften, groaned and fell back, his throat was sweet, and a blood was about to spurt. come out.

The short man was not feeling well either. The left fist that was blasted out was bounced back, and the black gauntlet immediately cracked open with blood splashing out.

The power that Wang Xuan burst out was far beyond his imagination. The fear in his eyes was bright, and the right hand that was hanging down beside his body suddenly opened, and a gap was opened in the palm of his hand.

The crack runs from the palm of his right hand, the wrist to the inside of the arm, showing a crack that is more than a foot long. The crack opens to both sides, and rows of serrated teeth are opened like petals inside, which seems to have a horror. The monster parasitized in his right arm. At this moment, he tore a gap in his right arm, opened his **** mouth full of teeth, and slammed out.

At this moment, Wang Xuan's throat was sweet, the blood in his body was surging, and he was barely able to stabilize his falling body. Suddenly, he saw this short man struggling to rush out of the terrifying monster in his right arm. He was horrified. The giant arm, the metal tentacles coiled up along his right arm.

At this moment, everyone around him also reacted one after another. Zhang Haofei let out a loud roar, and the white skeleton struggled to emerge from his body. A pair of white bones and arms rushed towards the short man's side, always following Wang's side. Gu Manyao, who was beside Xuan, reacted even faster than him. She saw that Wang Xuan was in a bad situation. This short man with unknown background was extremely terrifying, even more terrifying than Wang Ziren, Lu Bingbing, and Li Xing.

Even so, she still did not have any fear, and did not hesitate to release Yaochi to intercept the terrifying monster that rushed towards Wang Xuan.

Yaochi came to life, the black scales all over his body trembled, like a black dragon from ancient times, which narrowly blocked Wang Xuan and greeted the monster that rushed up.

This monster was extremely strange. It drilled out of the short man's right arm, and when it saw the wind, it grew long. The open mouth of the blood basin suddenly swelled again, and it suddenly changed to the size of a house.

Wang Xuan had just shown the giant arm of the beast, and before he could attack, the monster chi released by Gu Manyao was sucked in by the monster's open mouth.

The demon chi was swallowed up, and Gu Manyao felt the same, and a stream of blood spurted out of his mouth. The **** mouth of this terrifying monster fell down on his face, and immediately swallowed Gu Manyao and Wang Xuan who was standing behind her.

This scene was too weird and terrifying, everyone gasped, Zhang Haofei just rushed up, and suddenly had severe stomach pain, but was kicked in the chest by this short man, with a crunching sound, his chest collapsed, and his ribs were all inside. Broken, blood spurted wildly from the open mouth, flew out in an instant, hit the rock wall of the cave passage behind, and then fell down.

This short man is simply crushing and powerful in the face of them.

Bai Yan launched the "Wizard's Blood Spray", and the blood of the witch was sprayed out from the sky. Li Haotian pulled the Orion bow in his hand, and a two-meter-long light arrow appeared, locked on the short man, and shot the light arrow out.

Yao Tiande's palms were sweating coldly. Although he was shocked, he bravely swept the metal stick with the electric light in his hand.

At this moment, he finally saw this short man wearing a full set of black metal armor, with a blood crystal belt made of a large number of blood crystal stones tied around his waist. His mind was like lightning and thunder, and suddenly he understood the identity of this short man. .

Everyone shot together, and the short man in front of him suddenly disappeared and disappeared. Whether it was a witch blood jet, a two-meter giant arrow, or a blow from Yao Tiande's metal stick, they all failed. Everyone looked up, but saw the short man in black armor. The man has already swept forward ten meters away, and arrived at the open door of immortality. With a kick of his feet, he rose up along the door of immortality, turned over again, and disappeared into the gap of the human shape, disappearing. .

Almost at the same moment, there was an earth-shattering explosion sound of "Boom", and the monster that changed as big as a house suddenly exploded from it. Suddenly, a large amount of juice splashed out, and the monster was blasted into a huge hole. As the leaking ball shrunk down, Wang Xuan rushed out of the hole with Gu Manyao in his arms.

Just now, he was swallowed by this terrifying monster along with Gu Manyao, only to feel that his eyes suddenly darkened, and there were countless sharp teeth inserted into his body like sharp knives on all sides.

These are the rows of serrated fangs that grow in the monster's big **** mouth. They were swallowed, and these fangs immediately covered them and inserted them into their bodies to cut them into pieces.

What is even more terrifying is that there is a terrifying suction force in the depths of the big mouth of the blood basin. It seems that there is a black hole hidden in the depths of this monster's body. , they only need to be broken into pieces in an instant, and not even a whole limb will be left.

Gu Manyao was in front of him, and even he suffered such horror, not to mention Gu Manyao.

In the shock, Wang Xuan stretched out his right hand, grabbed Gu Manyao, and quickly took out an explosive crystal from his pocket with his left hand, and threw it into the black hole that produced a terrifying suction force.

The power of the explosive crystal was beyond his imagination. He could only hear the rumbling sound of the explosion. He felt a huge wave of air that knocked him down and fell out. Gu Manyao was also slammed into him by the air wave.

Wang Xuan hugged her, and suddenly saw a light appear. This terrifying monster as big as a house was blasted out of a huge gap. He hurriedly hugged Gu Manyao and escaped from the gap.

When Wang Xuan escaped, he saw that the terrifying monster was rapidly shrinking like a leak, with a large amount of juice flowing out. It soon shrank and only a thin film remained. Looking at the short man, he had disappeared.

Thinking back on the momentary change just now, Qiang Wang Xuandu had lingering fears. It was the first time he had seen someone confront him head-on, overwhelming the blue crystal scale energy he inspired.

"Wang Xuan, that guy entered the gate of immortality!"

Zhao Lei turned over and got up. Although his left shoulder was knocked down and the bones inside were broken, the injury was not minor, but luckily the injury was not serious. Seeing Wang Xuan appear with Gu Manyao in his arms, he was busy and screamed anxiously. stand up.

They all saw the short man turn over and enter the gate of immortality, and they all looked anxious, but this short man was too terrifying, much more terrifying than the powerhouses like Wang Ziren and Lu Bingbing they had encountered before. Wang Xuan, they dared not go in and chase anyway.

They all understand that whoever chases in and encounters this short man will be killed in an instant.

Although Wang Xuan knew that the short man had entered the gate of immortality, he did not speak. Instead, he put Gu Manyao in his arms on the ground, hurriedly opened his belt, and took out two bottles of primary healing water.

He was covered in blood, and the full set of Tier 3 alloy equipment could not stop the monster's mouth full of teeth cutting, and there were at least dozens of blood holes on the surface of his body in an instant.

But Gu Manyao was hurt more than him. She looked like a **** man, her eyes were white, and she had fallen into a coma. Seeing her breathing intermittently, it seemed that she might lose her breath at any time.

Wang Xuan was so anxious that he couldn't take care of himself, and immediately squeezed her tightly closed mouth, poured an open bottle of primary healing water into it, and then opened another bottle of primary healing water and poured it into his mouth inside.

The effect of this primary healing water is really amazing. As soon as it enters the mouth, it immediately turns into a hot stream, which spreads to the whole body. All the injured parts begin to emit a faint white light. In addition to his own healing ability, the whole body is injured. Hemostasis heals with amazing speed.

Looking at Gu Manyao lying on the ground again, although she passed out in a coma, a faint white light appeared all over her body, the wounds all over her body were healing, and the primary healing water she had just fed her was working. Breathing also slowed down.

He felt slightly relieved, realizing that Gu Manyao's fate was picked up, he immediately jumped up, and with a flick of his body, he arrived in front of the gate of immortality.

"Wang Xuan, be careful, he is the leader of the Rakshasa!" Yao Tiande rushed over with a metal stick, and was busy reminding Wang Xuan to enter the gate of immortality.

From the moment he saw the blood crystal belt on the waist of this short man, Yao Tiande understood that in the entire Rakshasa, only the leader Rakshasa wears such a belt, and the others, including Wang Ziren, can only wear red belts. The only difference is that Wang Ziren and their red belts will be made more delicate, unlike their adult members who are just a simple red cloth.

Since this short man is wearing a blood crystal belt, he must be the leader of the Rakshasa.

Wang Xuan was not surprised, he just nodded slightly, turned over and jumped over the gap in the human shape and entered the gate of immortality.

From the sudden appearance of a sneak attack by a short man in black armor, he had probably guessed his identity.

He understood that his feeling of being peeped at before was not wrong. The person who peeped at him in the dark must be the leader of the Rakshasa.

It's just that at that time, he had checked in detail within a radius of one or two kilometers, and found nothing.

He didn't know what the Rakshasa leader had to do to completely avoid his magical beast instincts, and he didn't even feel any further along the way until the Rakshasa leader launched a sneak attack. He couldn't dodge with a single blow, and he was dead now.

The strength of this Rakshasa leader is terrifying, far more powerful than the real powerhouses like Wang Ziren, Lu Bingbing, and Li Xing. Wang Xuan understands that there are only two possibilities. One is that the power of the Rakshasa leader has broken through the real state. , is already a higher form of existence, and there is another possibility that he, like himself, got some kind of special opportunity,

obtained special treasures similar to or even surpassed the blue crystal scales, and strengthened his strength, so he can be so powerful.

"This guy has been secretly peeping and following us, and he is naturally coming for the Book of Giants. It seems that he has long known the Book of Giants, and even understands what the records are on it."

"He deliberately couldn't hide, let us take the risk ahead and lead the way. He followed in the dark until I opened the gate of immortality. He finally couldn't help but shoot and wanted to kill me with a sneak attack. Later, he realized that it was difficult to kill me in a short time. If I die, I will immediately enter the gate of immortality, and I want to get the things in the gate of immortality one step ahead."

Wang Xuan turned over and entered the gate of immortality through the human-shaped gap, and his thoughts turned around, fully understanding the cause and effect.

He also knew why the Rakshasa leader didn't **** the Book of the Giant God, just because the real function of the Book of the Giant God was to guide and open the map of the immortal gate. UU reading www.uukanshu.com has now opened the immortal gate. Books are useless, what really matters is the things in the gate of immortality that can make people comparable to gods.

Entering the gate of immortality, I immediately saw a faint light. There is another huge space inside the gate of immortality. Unlike the darkness outside, there is a faint light inside the gate of immortality, and there is a faint black mist floating around. , in the black fog, you can see a huge black shadow standing tall.

As for the Rakshasa leader who entered ahead of him, he was nowhere to be seen.

Wang Xuan released Xiaojiao and rushed towards the faint black mist facing him. He followed closely behind him. Behind him, Yao Tiande turned over with a metal stick and rushed in through the gap.

Although he was terrified of the Rakshasa leader in his heart, he couldn't help but yearn for the legend of the Book of Giants and wanted to come in and see what happened.

Behind Yao Tiande is Bai Yan. He understands the terror of the Rakshasa leader, and Wang Xuan's strength may not be able to deal with it. His witch blood may weaken the Rakshasa leader's combat power. He wants to help Wang Xuan.

As soon as they entered, they saw Wang Xuan swaying, rushing into the black mist in front of him and disappearing, and they were busy following up.

Wang Xuan protected the metal tentacles in front of him, and soon saw the giant black shadows appearing in the black mist, all of which were actually statues.

These statues are very strange. They are different from the monsters or evil gods with blue faces and fangs embedded in the stone pillars that he saw in the black water before. Like the legendary mummy.

These are statues of a giant mummy.

Chapter 140

Such a statue is very strange. It is divided into two rows. Each statue of Mu Nai Yin is ten meters high. At first glance, I don't know how many there are.

At this moment, he heard a faint sound coming from the end of the black mist. Knowing that the sound must be from the Rakshasa leader, he immediately accelerated forward, the metal tentacle of his right hand extended out, and a faint blue light appeared inside.

To deal with this terrifyingly powerful Rakshasa leader, he can only rely on the blue crystal scales because of his lack of strength.

Aroused the energy of the blue crystal scales, his speed increased again, and he shot out almost like an arrow, instantly throwing away Yao Tiande, Bai Yan, Duan Chen, and Zhao Lei who had finally caught up.

Not all the people chased in, because Gu Manyao was still in a coma, Yu Shanshan chose to stay and take care of her.

Zhang Haofei was seriously injured, his sternum was broken, and it was difficult to recover in a short time. Although he was very curious, at this moment, he could only stay with the two girls and give up entering the gate of immortality.

Wang Xuan ran for about two or three hundred meters along the two rows of Mu Nai Yin Tuo statues, and soon saw a person in the depths of the black fog.

This man was short, only about one meter six, wearing a full set of black metal armor, with a blood crystal belt around his waist, he was the leader of the Rakshasa.

On the ground in front of him, a pentagram figure with a diameter of more than ten meters protrudes, and a humanoid figure with both male and female physiological characteristics is embedded in the figure.

It is almost identical to the Gate of Immortality that Wang Xuan had seen before. The only difference is the five angular orientations of the five-pointed star, the head, hands, and feet of the humanoid statue in the middle, and the center point is each covered by a giant sea bowl thick. The chains were locked, these six chains, neither gold nor iron, were made of unknown materials, and extended into the black mist, and there was nothing tied to the other end.

At this moment, the leader of the Rakshasa was standing on the pentagram, with blood flowing from his hands. He smeared his blood on the six places of the pentagram that were locked by giant chains.

As he continued to smear the blood, the surface of the pentagram that was originally floating on the ground, faintly appeared blood-red light, forming a blood-red pentagram, and the blood-red light released by the pentagram tore apart the black mist. .

The leader of the Rakshasa saw the change of the pentagram, and immediately stepped back, kneeling on the ground with his knees, and his hands clasped together, as if a believer was worshiping the supreme god.

Wang Xuan saw all this in his eyes, and immediately stimulated the energy of the blue crystal scales in his body. At the same time, he merged with Xiaojiao, pushing his combat power to the strongest peak state, speeding up, and rushing up in an instant.

Xiaoguo jumped up and squatted on his body, clinging to his body, forming a second layer of mechanical defense on the outside of his alloy armor. It can provide him with an endless stream of physical energy.

The metal tentacles extended out of the body and started to split, splitting into two parts. Inside, there was a blue light lit up. The two metal tentacles spun around each other, producing a terrifying strangulation force. The leader draws.

This is the fifth ability that he mastered when he was promoted to the state of comprehension, "spiral strangulation".

The leader of the Rakshasa had already sensed that Wang Xuan was chasing him from behind, but he ignored it. He just lowered his eyelids and knelt down to the pentagram that was releasing blood-red light in front of him, until the tearing force generated by the "spiral strangulation" was about to approach him. , He finally opened his eyes with a cold and stern look in his eyes, he put his hands on the ground, and with a loud noise, his body bounced up like an ape.

"Spiral Strangulation" almost swept past his black metal armor and hit the ground.

This ground looks like a rock, but it is actually much harder than a rock. When the "spiral strangulation" is drawn on it, it can only make tiny white marks, crackling sounds and sparks.

The Rakshasa leader stretched his legs to the ground, raised his right arm, a crack split from his right palm all the way to his right arm, opened to both sides, and rows of fangs emerged inside, and the terrifying monster appeared again, from his right The arm threw out, and the mouth of the blood pot rose when it met, it was like a huge pocket, and it moved towards Wang Xuan, wanting to swallow him in one mouthful.

But the Rakshasa leader turned to look at the pentagram again. Obviously, his mind was completely attracted by the pentagram, and he wanted to get what was sealed in the pentagram.

Wang Xuan had the previous experience, and when he saw the Pokemon again, he immediately waved his metal tentacles and swept along the monster that came down from his pocket.

As the sound of the cowhide being torn rang out, the metal tentacles that launched the "spiral strangling" swept the monster in the pocket, the monster's open **** mouth cracked open, and a large amount of juice splashed out, and Wang Xuan swayed around. The monster standing in front of him rushed towards the Rakshasa leader again.

The blood-red light released by the five-pointed star became more and more intense. Yao Tiande, Bai Yan, Duan Chen, Zhao Lei, Tie Jun and Li Haotian, who were running towards here from afar, also noticed the five-pointed star emitting light in the depths of the black fog. , and immediately accelerated again, rushing towards here at full speed.

The energy in Wang Xuan's body was surging, combined with the power of the blue crystal scales. This full-strength attack was as fast as lightning, but the Rakshasa leader was faster than him. Although he turned his back to him, he disappeared in a flash.

The metal tentacles drawn by Wang Xuan fell in the air, trapped in the blood-red light of the five-pointed star, the Rakshasa leader silently appeared beside him, his left hand clenched into a fist, and suddenly a punch came over.

On the surface of his fist, the skin faintly showed signs of swelling, and it looked very bright. It seemed that the energy inside was too strong, and the folds on the skin were stretched.

Wang Xuan understands that this must be an attack similar to his own giant arm of demon beast.

As soon as the thought moved, the metal tentacles turned back, and the two tentacles were intertwined and coiled together, as if to form a circular shield, and the Rakshasa leader punched the metal tentacles that were entangled and coiled.

The sound of a dull thunder sounded, and the blue dim light released from the metal tentacles immediately dimmed, and the countless metal pieces that formed the metal tentacles scattered immediately.

Wang Xuan groaned, the metal tentacles were blown up, and he was also shaken, the white light in his right hand was fluctuating, his right arm was in severe pain, and his heart was hit by a terrifying force. Sweet, there is already a strand of blood seeping out.

The power of the Rakshasa leader's punch was unbelievably powerful, but he himself was not lightly injured. Although the metal tentacles could not withstand the power of his punch, the energy of the blue crystal scales contained in them exploded, causing his Left fist can't take it.

The eyes of the Rakshasa leader showed shock and fear again.

As Wang Xuan guessed, the punch of his left hand is similar to the giant arm of a demon beast. It is his strongest blow. With one punch, it is almost indestructible. Even a concrete wall can punch a huge hole. , he can tackle one with one punch.

To burst out such terrifying power, the flesh and bones of his fist can be said to be harder than steel to withstand the power of this burst of power.

But at this moment, although he blasted the opponent's metal tentacles with one punch, his left fist, which is tougher than steel, could not withstand the opponent's burst of power. There was blood splattered.

Although shocked and fearful, the Rakshasa leader did not hesitate, but took a step forward, and his right fist followed closely.

The power of this punch was even stronger than that of the left punch just now. It made a sonic boom in the air and went straight to Wang Xuan's heart in an instant.

Even if he has a double defense, as long as he is hit by this punch, his body will be smashed in two in an instant, and there is absolutely no chance of life.

When Wang Xuan was retreating, he had already activated the giant arms of the demon beasts with both arms. Two metal tentacles wound up along the arms, and the metal and flesh merged, turning into two half-flesh, half-metal giant arms. The surface of the giant arms, There are strips of blue blood vessels protruding, covering two giant arms.

There was a loud "bang", Wang Xuan used his right fist to confront his right fist, and he held the opponent's fist in front of him. The two fists collided. A blue light lit up, shaped like a slender blue light line.

A strange color immediately appeared in the eyes of the Rakshasa leader. The black gauntlet covered on the surface of his right arm shattered, and a large pool of blood burst through the skin and flesh of his right arm and spurted out from it.

Compared with strength, the Rakshasa leader lost to the blue crystal scales.

However, his reaction speed was terrifying. When he realized the bad moment, he pushed his right foot to the ground, and his body fell back with the force of Wang Xuan's punch, relying on one left foot to stabilize his body. The raised right leg kicked on Wang Xuan's lower abdomen.

Wang Xuan clenched his left fist. He originally wanted to kill him with a punch. He didn't want the opponent to have a faster response and speed.

The mechanical shell covering his lower abdomen immediately shattered and collapsed, followed by the splitting of the alloy armor, and finally the lower abdomen suffered a heavy blow. He opened his mouth, blood gushing from his mouth, and his body rolled backwards and fell out. .

Fortunately, there is the double defense of Xiaojiao's mechanical shell and alloy armor, which at least cancels out half of his strength, otherwise, he will be seriously injured if he does not die.

Wang Xuan flew out of the sky, and when he saw that he was about to fall to the ground, he supported his left arm on the ground, suddenly changed direction, rolled to the other side and flew out.

Sure enough, just as his body changed direction and flew out, the Rakshasa leader was like a goshawk swooping at a rabbit, his terrifying left fist hit the ground firmly, and there was a loud bang.

As long as it was a little off, the one who hit was Wang Xuan who fell to the ground.

Wang Xuan rolled and flew out in the air, his right arm had already withdrawn from the giant arm of the beast, and the metal tentacles reappeared and volleyed over.

At this moment, the Rakshasa leader just punched the ground, and the reaction force made his left arm numb, and he had no time to dodge. The metal tentacles came over, and the power of the metal tentacles exploded, causing the flesh on his right hand to peel off and splash, and even the phalanges were exposed.

Enduring the severe pain in his right hand, he grabbed the metal tentacle and pulled it hard. Wang Xuan, who flew out, was pulled back by him and flew towards him.

The leader of the Rakshasa stood up, his left hand clenched into a fist, and with terrifying power, he called towards Wang Xuan who flew over.

Wang Xuan also raised his left arm, which was still in the state of the giant arm of the beast, and was about to hit his left fist when he suddenly missed the punch. .

The change was so fast that Wang Xuan couldn't keep up with his reaction speed. He only felt that his body suddenly flew into the air, slammed into the ground with a bang, the impact was too strong, and Wang Xuan's internal organs felt Turning over, there was a sound of bones breaking in the body, and a large amount of blood spurted out of his mouth immediately.

Bai Yan, Yao Tiande, and Zhao Lei finally rushed up, Li Haotian shot a two-meter giant arrow from a distance, locked on the Rakshasa leader, and shot it first.

The Rakshasa leader ignored the powerful two-meter giant arrow at all, and just swung his left fist at will, and the two-meter giant arrow exploded.

Bai Yan immediately launched the "Witch Blood Jet".

The Rakshasa leader kicked his feet and was about to pounce on Wang Xuan, who had just been smashed to the ground by him. Suddenly he heard a bang, and the five-pointed star, which had been releasing blood-red light, vibrated violently, forming a five-pointed star. The blood of the star rose into the sky, and the ground seemed to have caused an earthquake, shaking violently.

Suddenly, everyone was shocked. Even the Rakshasa leader didn't care about attacking Wang Xuan, who fell out. He turned around and saw that in the pentagram that formed the blood-colored beam of light, six giant chains seemed to be pulled by invisible forces. Straight, making a rattling vibrating sound.

The giant androgynous portrait inlaid in the center of the pentagram began to vibrate, as if it was running out of strength, trying to struggle to get out of the seal of the pentagram.

An indescribable force was like a tsunami tide, rushing towards all directions.

The leader of the Rakshasa was the closest and bore the brunt of it. With a muffled groan, he rolled over and fell heavily. The black metal armor of his whole body faintly collapsed. This was a terrible consequence of being suppressed by invisible forces.

Then there was Wang Xuan, who fell to the ground. He showed a pair of giant arms of the beast again, and he wanted to fight again with the Rakshasa leader who was about to rush over, but he didn't want this terrifying force to appear, so he was suppressed on the ground, and his body was like It pressed a big mountain, making it difficult for him to breathe, let alone stand up.

The six Bai Yan, Yao Tiande and Zhao Lei were a little farther away, and the impact of the force was much smaller. Even so, it was still unbearable for them. The six of them knelt directly, and they couldn't help Zhang Zhang in the first round of impact. Open your mouth, all seven holes are bleeding.

They felt an invisible force squeezing their bodies, trying to squeeze all the blood out of their bodies.

In horror, they fell to their knees and tried their best to crawl away from the blood-red beam of light.

Wan Tiande also finally understood that no matter whether the records in the Book of Giants are true or false, and whether there is a chance to be compared to the gods, it is not something they can get their hands on.

With their strength, as long as they get a little closer, they are afraid that they will be smashed to pieces, and they will be irreversible.

Wang Xuan was suppressed to the ground by a terrifying force. The blue crystal scales in his body were boiling with energy. The blue veins and veins on his skin were faintly glowing with blue light. This blue light only enhanced his strength and accelerated the healing of his injuries. The two ribs that had just broken were automatically joined together.

He began to climb up with difficulty, and then watched the terrifying blood-colored beam of light penetrate above the black mist. It was a long time. In this blood-colored beam of light, the ground shook more and more violently, and the six chains that were pulled straight kept emitting violently. There was a sound of vibration, as if a terrifying force was continuously pulling them.

The nearest Rakshasa leader had blood flowing out of his mouth. He was shaking all over, bearing more terrifying power than Wang Xuan. In terms of reaction and speed, he was slightly better than Wang Xuan, but purely in terms of power, he might as well stimulate the blue crystal. The scale energy Wang Xuan, he put his hands on the ground, desperately trying to struggle to get up, he raised his head, the beast-like roar continued in his throat, and blood was constantly flowing out of his mouth, nose, eyes and ears.

In the blood-colored beam of light, the giant androgynous figure locked by six chains struggled more and more violently. Suddenly, "Katha" made a crisp sound, and the chain locked on its right wrist broke.

As the chain broke, its right arm embedded on the ground immediately lifted up, and with five fingers, grabbed the chain wrapped around its left arm.

The chain was grabbed by its right hand and immediately shattered inch by inch.

Everyone witnessed this scene and felt the terrifying energy released by the waves. Is it really some kind of **** in the legend?

It is a god, why is it locked in chains and imprisoned here, and who is imprisoning it?

The real purpose recorded in the Book of Giants is to let them come here to release the imprisoned it?

All kinds of doubts swept through his mind, and the Rakshasa leader slowly climbed up from the ground while roaring constantly. He put his hands on the ground and tried his best to raise his head, but he saw that in the blood-colored beam of light, the ten-meter-high giant figure had broken off the entanglement. He held the chains of his hands and feet, stretched out his hands again, and grabbed the chains that locked his neck. With force, the fifth chain also broke and shattered.

At this moment, the blood-colored beam of light that soared into the sky began to show signs of fading away.

The struggling figure seemed to be a little anxious, and then stretched out his hand to break the last chain in the center. At this moment, the blood-colored beam of light subsided in an instant, and a loud bang came from the depths of the ground. Everyone looked at the pentagram on the ground and the giant figure, as if it was pulled and swallowed by an invisible force, and fell down.

At the same moment, the power that had suppressed the crowd suddenly disappeared, and the Rakshasa leader immediately took a breath and almost jumped up.

He opened his eyes wide and stared blankly at the huge black hole that appeared on the ground in front of him. The pentagram and the giant figure just fell into the black hole below and disappeared, and the black hole was dark and dark, without any light. With his eyesight, he could not see what was inside.

"impossible-"

His face was full of unwillingness, he suddenly reached out and took out a round spar from his pocket and was busy rubbing it. The round spar immediately released a strong light, like a small sun. After it was lit, he threw the round spar into the black hole in front of him, wanting to see what was inside.

The round spar, which was as bright as a small sun, just fell into the black hole, as if it was swallowed up by the invisible darkness, and disappeared in an instant. He didn't see anything.

"This is impossible..." The Rakshasa leader roared and took a step back. He tried his best to come here, trying to get the power of the gods, but the gods were swallowed up before they were fully resurrected?

At the same moment, the cold wind came from behind, and Wang Xuan's giant arm of monsters silently hit him.
