

## Last Building on Earth Chapter 191-195

### Chapter 191: The Confrontation of Transcendental Power

The king bug is slowly squirming, slowly approaching the crowd.

Around it, followed by dense insects.

Except for a few leaders, it was the first time that everyone saw so many kinds of bugs.

There are armor bugs, red bullet ants, seven-star spiders, kissing bugs, plum blossom mantises, giant wasps, snakes and dragonflies, jasper centipedes, human-headed scorpions, giant earthworms, and giant katydids...

Countless kinds of bugs support the king bugs, but compared with the king bugs, they are as small as a group of ants.

The king bug approached everyone within a kilometer, and everyone felt a terrifying aura sweeping across the sky, whether it was the five leaders who surpassed the state of being, or the powerful people in the state such as Tang Ruoyu, Chu Boyu, and Chen Daolin. The whole body was cold, and the back ridge was chilled.

Only Wang Xuan's face was slightly distorted, showing a look of difficulty.

Since the insect tide, his Eye of Fear has absorbed a lot of fear power. The fear energy released by thousands of people in Insect Town is so powerful that his Eye of Fear has a faint sign of evolution. If nothing else, this When the second worm wave ends, his "Eye of Terror" will evolve to be stronger.

But he didn't expect that the lord of green poison would summon the lord of green poison. The lord of green poison began to react, causing his eyes of fear to sense, and immediately used the spiritual soul of the lord of green poison as a medium to fight against the summoning of the king worm.

The power of fear fights against the power of the king insect, and the endless fear energy is wasted. Although Wang Xuan has just drunk a bottle of physical strength water, he still shows a tired look.

To the north of Bug Town, the Green Poison Lord was more like a chaotic mess. His body turned his back to Bug Town for a while, posing as a guardian of Bug Town, and for a while he faced Bug Town, as if he wanted to kill Bug Town.

It kept screaming in its mouth, which was an order given to the green poisonous scorpion.

This order is also completely different. For a while, let the green poisonous scorpion guard the insect town, and for a while let the green poisonous scorpion attack the insect town.

On the high walls around Insect Town, thousands of people witnessed this strange scene. They looked at the green poisonous scorpions in all directions. After a while, they all turned around and headed

towards Insect Town. They were about to attack them. With a clatter, he turned back and turned his back to them, like loyal guards gathered outside the town of insects.

Because these green poisonous scorpions helped them resist the attack of the ghost mantis before, so now after the ghost mantis retreated, although the green poisonous scorpion did not leave, thousands of people in Insect Town did not attack them, just watched their strange behavior, Confused and confused.

"Last time, the king bug also appeared in the end, and then it quietly receded, which means the end of the insect tide. Why is this time different? Instead, it seems to be approaching us?"

When the leader of the Justice League said this, there was a hint of fear in his tone.

This king worm is almost invincible in the world of insect town, not to mention that their strength is suppressed now, even if they are not suppressed, they are not the opponent of this king worm.

Xu Jian said slowly, "Let's see the situation. If we get close to us, retreat immediately."

Even in his heart, if Wang Zong continued to approach Zong Town, the only thing they could do was to flee back to Zong Town immediately and take the elevator to leave here.

Wang Xuan felt that the energy of the Eye of Fear in his forehead was constantly being depleted, and the king insect in the distance opened his mouthparts as large as a house and let out another whistle.

With this whistling, Wang Xuan suddenly felt a pain in his forehead, and the eye of fear seemed to have been hit by an invisible force, followed by a splitting headache in his head, as if a heavy mountain was pressing down, and his body felt as if in an instant. Falling into the ice cave, he seemed to be completely frozen from the inside to the outside. He couldn't even move a finger, not even blinking his eyes.

Hobby Chinese Network

"What ability is this?"

There was also a hint of fear in Wang Xuan's eyes. Even if he encountered the fearful king before, he had never encountered such a situation.

Of course, the fearful king at that time was sealed, but the king bug thousands of meters away was not.

Is this the true power of the king bug? It actually passed through the Green Poison Lord and directly used the Eye of Fear to attack Wang Xuan.

At this moment, Wang Xuan lost his connection with the Green Poison Lord, and the Green Poison Lord got rid of his fear.

A scream sounded, and the green poison lord screamed at the green poisonous scorpions around him. However, it did not attack the town of insects, but commanded the army of green poisonous scorpions and rushed towards the town of scorpions.

Obviously, the king bug regained control of it, but instead of ordering the green poison lord and the green poisonous scorpion army to attack the town, it let them return to the town of scorpions.

As the king bug slowly approached, everyone began to retreat, and soon they found that Wang Xuan was standing there, motionless.

"Wang Xuan, go back!" Xu Jian couldn't help but shouted in a low voice.

Facing the king bug, his heart skipped a beat, fearing that the loud voice would attract the king bug's attention.

When Wang Xuan heard Xu Jian's cry, he secretly complained.

He has now lost control of his body. The power of this terrifying king insect invaded his spiritual consciousness and confronted his Eye of Fear head-on. Now his spiritual consciousness has become a battlefield for both sides.

At this moment, even if he wanted to take out the Book of Giants and summon the existence hidden at the end of the bottomless darkness, he couldn't do it.

To summon that kind of existence, you must take out the Book of Giants, spray your blood on it, and use the blood as a guide to summon induction.

Seeing that Wang Xuan was motionless, Xu Jian rushed over, but found that Wang Xuan's face was stiff, as if the situation was not good.

"Wang Xuan!" Xu Jian snorted again, seeing that he still didn't respond, knowing that something must have been wrong with him, he immediately picked him up, and took him to retreat to Insect Town.

"Come on, let's go back to Worm Town!"

Wan Qianying turned around first and ran towards Insect Town.

Several leaders realized that this insect wave was very wrong. They wanted to return to Insect Town first. At this time, they saw the retreating green scorpion army from a distance.

"What's going on? The green poisonous scorpion from Scorpion City? How is this possible? Didn't the worms in the worm tide come from the northern country? Scorpions from Scorpion City also came?"

The leader of the dynasty couldn't help screaming. He had experienced the last insect tide, and he had heard people say about the previous insect tide. In all the previous insect tides, all the bugs that appeared came from the North Country, and this was the first time someone came from Scorpion City. scorpion.

Wang Xuan's body was stiff and unable to move. He let Xu Jian hold him. He could only see the sky 100 meters above him.

He had a splitting headache, and it seemed like it was about to explode from it. The competition between the power of fear and the power of the king insect became more and more fierce. Although he had strong spiritual and soul power, it was unbearable at the moment. The eye of fear on his forehead was squeezed by invisible power. , it seems to explode.

His heart was beating like a drum, and suddenly, blood was flowing out of his nostrils.

Xu Jian hugged him, followed Wan Qianying and others, and ran back all the way.

Originally, there were 31 of them, which can be called the strongest group in Insect Town. This time, the Insect Tide entered the Northern Kingdom. Up to now, 14 people have died, and only five leaders, Wang Xuan, are still alive. , Tang Ruoyu, Chu Boyu, Qiu Yuanfeng, Gongsun Xiaoyan, Chen Daolin and other seventeen people.

As for Insect Town, because of the protection of the green poison lord and the army of scorpions, the casualties were not serious. The actual number of deaths was no more than 400 people, and basically all of them were adults, and the strong ones were injured a lot. But not the dead.

Without the protection of the green poison lord and the army of scorpions, those ghost mantises who had entered the insect town before, even if the group was not destroyed, at least more than half of the more than 3,000 people would have suffered casualties.

On the fence, Gu Manyao, Zhao Lei and others were anxiously waiting. They all went all out in this battle, but fortunately there were no casualties.

When they saw everyone returning from a distance, they became excited, and when they saw Wang Xuan being held in Xu Jian's arms, they were all stunned, and immediately understood that Wang Xuan must have been seriously injured.

However, with Wang Xuan's strength, no matter how seriously injured, as long as he didn't die on the spot, it would be fine, so they were not too worried.

The people on the wall were busy making way for a gap, and the seventeen people who returned followed the mountain of worm corpses on the ground, and quickly passed through the wall and entered the town of worms.

Only then did Xu Jian let go of Wang Xuan.

"Wang Xuan!" Gu Manyao, Zhao Lei, Tie Jun and others were busy surrounding them.

You Ao, Xiang Jingnan, Liu Weijie and the others also came over to greet them, suddenly seeing that Mou Gang and Jiang He were not in the crowd, their hearts sank, and they looked at Qiu Yuanfeng and Gongsun Xiaoyan together.

Gongsun Xiaoyan's eyes were red and she shook her head at them.

These people immediately understood what was going on.

Xiang Jingnan and Jiang He had a very good relationship, and couldn't help but punch the ground, trembling slightly all over.

"What happened to those scorpions just now? The ghost mantis didn't attack the town of insects? What happened?" Wan Qianying and the leaders of the dynasty returned, and immediately felt that something was wrong.

Based on their previous experience, it took them so much time to kill the giant titan, giant mantis and mantis king, and the mantis army retreated. After such a long time, those ghost mantises will definitely enter the town of insects, not to mention It is reasonable to have at least half of the casualties in the Insect Exterminator Town, but in the current situation, the ghost mantis has not even attacked the Insect Town, so it is unreasonable to think about it.

After hearing that the green poisonous lord was commanding the green poisonous scorpion army, defending the town of insects and resisting the attack of the ghost mantis, these leaders were stunned.

"There's still such a thing? These scorpions in Scorpion City protected the town?" Wan Qianying's face was full of disbelief.

The dynasty leader's face showed a sudden look and said: "No wonder we saw so many green poisonous scorpions leaving when we just returned, and this is what happened."

Xu Jian put down Wang Xuan and saw that his muscles were stiff. The crystal eyeball that opened in the middle of his forehead was strange and inexplicable.

"So serious?" Xu Jian frowned, thinking of Wang Xuan's last shot, a giant mechanical arm glowing outside his left arm, the power of that blow had surpassed the state of being, and now it should be because of that The attack was backfired, but it was unexpectedly serious.

Gu Manyao and Zhao Lei both saw that Wang Xuan was in serious condition, and his face was nervous. Zhao Lei seemed to think of something, and immediately raised his head to look to the other side, only to see that Meng Lian and Cheng Aiguo had walked quickly towards this side.

"Meng Lian, hurry up, come and see Wang Xuan!" Zhao Lei called out.

Meng Lian nodded slightly at him, came to Wang Xuan, raised her right hand, and a small elf appeared from her right hand. The elf used to be only the size of a fist, but now it has grown to about a foot, with a lot of light fragments scattered all over her body, surrounding her. As Wang Xuan turned around, these fragments of light continued to merge into Wang Xuan's body.

Xu Jian glanced at Meng Lian and saw that her face was solemn, and her whole body exuded a sacred and pure aura, which made his eyes light up slightly. He did not expect that there was such a different girl in Worm Town.

Tang Ruoyu folded her arms and stood silently not far away, watching. She didn't seem to be interested in anything. This time, she was looking at Wang Xuan silently, and seemed to pay attention to Wang Xuan's life and death.

They all thought that Wang Xuan was attacked when he launched the giant mechanical arm to kill the giant mantis. No one knew that his body and soul were now a battlefield. The most brutal fight.

Meng Lian sacrificed an elf and continued to use the most powerful healing ability. She wanted to cure Wang Xuan, and soon a look of surprise appeared on her face.

She felt that Wang Xuan's body was like a bottomless abyss, devouring the energy of life released by the elves in an endless stream, but Wang Xuan's situation was no improvement.

At this moment, the eye of fear on Wang Xuan's forehead is bulging more and more seriously, and it seems that it can spurt out of his body at any time. Not only his nostrils, but also his eyes, mouth and ears began to flow out blood.

"Meng Lian, what's wrong with him?" Gu Manyao's face was full of anxiety, but she was helpless now, so she could only be anxious.

Meng Lian's face became paler and paler, and she didn't speak, she just pursed her lips, concentrated her mind, and controlled the elf.

Xu Jian took out three bottles of healing water and poured it into Wang Xuan's body at one time.

A terrifying whistling sounded again, and many people exclaimed from the wall, and some even instinctively retreated and fell from the ten-meter-high wall.

Seeing this, Xu Jian's heart froze, and he was busy climbing the high wall again, but found that the king insect was commanding the countless Zerg army, and it was already approaching within 500 meters of the town of insects.

This kind of situation has never been seen before. It is the first time that the king worm is so close to the town of worms. For the thousands of people in the town, it is the first time to see the true face of the king worm. The black maggots more than 100 meters long made everyone horrified, and there was a feeling of powerlessness in their hearts.

How can they resist such giant insects?

Wan Qianying and the new leader of Rakshasa also appeared next to him, watching the slowly approaching Wang Zong.

"What happened to this worm town? This worm tide is also more terrifying every time. The difficulty of the previous worm tide is at least within the range that can be resisted. The last time the worm tide was already surprising, or the top violated the rules and paid a huge price. , This saved the town of Insects, I didn't expect this time, there was no solution..." Wan Qianying muttered to herself, her eyes full of incomprehensible expressions.

"Let's go, we've done our best, but it's a pity Wang Xuan. I originally thought that this would be a new star with great prospects in the future, but it's a pity..." The leader of the dynasty also appeared and saw the slowly approaching Wang insect. , let out a sigh, full of regret.

"Insect Town is over, this is the first few towns..." Xu Jian's eyes showed a trace of reluctance, but also a trace of helplessness.

Several leaders made up their minds and decided to abandon Bug Town and leave here.

At this moment, Wang Xuan, he can feel that the powerful life essence is continuously released from Meng Lian's hatching beast spirit, and it is continuously injected into his body. Even a person who has just died, is infused with such a powerful life essence. , it is possible to revive the soul.

But this life essence is of no use to the current Wang Xuan.

The power of fear that his Eye of Fear had absorbed was almost completely offset by the power of the king bug, and then the power of the king bug devoured it wildly, trying to completely obliterate his soul consciousness.

He had the Book of Titans, but he couldn't use it.

The blood in his body boiled under the pressure of the power of the king worm, and continuously seeped out from his seven orifices.

Although the power of fear is not inferior to the power of the king bug, it was not long before Wang Xuan obtained the eye of fear. This eye of fear is in the most basic state, how can he resist the king bug?

The Eye of Terror was squeezed by the power of the king bug, and it could explode at any time.

Although Wang Zong's real goal is the Eye of Fear, which represents the King of Fear, it is not Wang Xuan, but now that Wang Xuan is the owner of the Eye of Fear, it means that the gate of the city is on fire, which will bring disaster to Chiyu, and he is the unlucky fish. .

The Eye of Fear was destroyed by the power of the king worm, and he couldn't bear the power of the king worm, and his body and spirit and soul would burst open together.

Meng Lian's beautiful face was covered in sweat. She had tried her best, but Wang Xuan gave her the feeling that the breath of life was getting weaker and weaker, and she seemed to die at any moment.

Wang Xuan was full of unwillingness. From the time he was trapped in the underground parking lot of Longmao Square to the present, he walked all the way, it was full of hardships, and he experienced many life-and-death crises. Finally, he arrived at Bug Town. No matter what, he was not willing to die there. here.

"I don't want to die, as long as I can move my hand, I can take out the Book of Giants...there is a chance to live..."

Wang Xuan desperately wanted to raise his arm~www.mtnovel.com~ mouth, nose, ears and eyes, when a large amount of blood spurted out suddenly, the Eye of Fear in the middle of his forehead made a screeching sound, and blood gushed from all around. When he came out, Wang Xuan only felt a rumbling in his mind, which sounded like a thunderstorm.

Wang Chong approached 500 meters from the town, and the five leaders were about to turn around to leave. Suddenly, Wang Chong stopped, opened his mouthpiece, and let out an earth-shattering whistle.

The invisible power of the king insect seemed to be overwhelming, rushing into Wang Xuan's body, smashing the eye of fear he possessed.

Perhaps knowing that he was about to shatter, the Eye of Terror was struggling violently.

In all directions, more than 3,000 residents of Insect Town, including the powerful five leaders, are now filled with endless fear because of the approach of the king insect and this terrifying scream.

Suddenly, this almost endless fear energy surged towards the Eye of Fear.

This is the fear from the hearts of more than 3,000 people. When they gathered together, the power of fear formed was extremely powerful, enough to collide with the power of king insects that came from overwhelming mountains.

These two almost detached forces collided in Wang Xuan's body. He who was originally stiff and unable to move suddenly opened his mouth and spurted blood madly. Endlessly unwilling, his right hand suddenly moved, instinctively clenched into a fist, he wanted to punch out all the power in his body, and wanted to destroy the remote king insect.

With a bang, the white light in his right hand exploded, and the wall of light that had absorbed how much energy from the white scales and became extremely solid suddenly exploded into thousands of fragments of light.

White light, broken.

## **Chapter 192:**

### Super State

The white light in the right hand suddenly shattered, and the energy contained in it surged out.

At this time, Wang Xuancai suddenly realized that he had regained control of his body at some point.

The energy in his right hand instantly filled his body, madly blending into his flesh, bones, and internal organs, strengthening every inch of his body.

In the right hand, a new white light is being re-condensed, and this new white light will become stronger, stronger, and can hold more powerful energies.

It was only at this time that Wang Xuan realized that he had actually benefited from misfortune. In the confrontation between the king bug and the Eye of Fear, at this moment of life and death, he made a breakthrough in danger, successfully surpassed the perfect state, and the beast evolved to a higher form.

At the same moment, in his forehead, the Eye of Fear, which was about to swell and protrude, absorbed the fear energy released by more than 3,000 people in Insect Town, concentrated it, and collided with the power of Wang Insect.

I don't want to be at this moment, the power of king insects, which had come from overwhelming mountains, actually receded like a tide.

Wang Zong, actually voluntarily backed down?

As soon as the power of fear was knocked out, and there was no opponent, it immediately sprayed out from the eyes of fear. In the eyes of everyone, seeing Wang Xuan's bulging crystal eyes that were about to burst open, a sudden spray shot upwards. The stock fluctuates if there is no air.

This is the pure power of fear, but compared to the power with strong destructive power, the power of fear comes from the soul, which is more similar to the spiritual power, cannot be touched, and is more difficult to witness.

At this moment, everyone can vaguely capture this faint fluctuation, and it is conceivable that this power of fear is powerful.

The five chiefs were about to turn around and escape, and took the elevator to leave Worm Town. They suddenly found that after the earth-shattering whistle of King Worm, it stopped. The Zerg army, which was surging like a tide, followed it and began to retreat.

"The king bug has retreated?"

On the high wall, countless people witnessed this scene, and their hearts suddenly cheered up. Even the five leaders who were about to flee stopped, with incredible expressions in their eyes.

They don't know what happened, they just feel that this time, there are too many unbelievable facts, never before.

In Worm Town, Wang Xuan, who had fallen to the ground and was motionless as if he was about to die, suddenly opened his eyes, clenched his fists tightly with both hands, and the eye of fear that was about to protrude on his forehead shot out a faint wave. , began to shrink back, the fear energy that was originally ejected, flowed back again.

This gathered the power of fear of thousands of people, how powerful, and at this moment, the eye of fear began to have new changes.

In the depths of the eyeball formed by the crystal, there are faint runes emerging, and Wang Xuan understands that this is because the Eye of Fear has absorbed enough fear energy and began to grow and evolve.

The original Eye of Fear is only the initial level form, with this time of growth and evolution, it will become more powerful.

At this moment, Wang Xuan's body is undergoing earth-shaking changes. The further the hatching beast grows to the back, the more intense the evolution will be. His limbs, internal organs, and five senses have all experienced an astonishing improvement.

In my mind, a new message appeared.

"Name: Warcraft, Form: Super Form, Extension Limit: Seven meters."

"Comprehension and mastery of new abilities, second division."

Feeling the information, the new ability was being grasped, Wang Xuan took a deep breath, only to find that Meng Lian, Gu Manyo, Zhao Lei, Zhang Haofei, Tie Jun, Cheng Aiguo and others were all surrounded by them. With his own Tang Ruoyu.

However, when Tang Ruoyu saw Wang Xuan suddenly sitting up from the ground, her eyes moved slightly, and as soon as she turned around, she quietly disappeared into the crowd, and soon disappeared.

"Wang Xuan!" Gu Manyo, Zhao Lei and the others were surprised and delighted, and gathered around together.

Wang Xuan nodded slightly towards them, and silently felt the changes in his body. He slowly closed the Eye of Fear on his forehead. As the Eye of Fear grew and evolved, he also had a deeper grasp of the power of fear.

Above the perfect state, the sixth form that the hatching beast has grown to is called the super state. His ability to comprehend is also very simple, that is, it can make two metal tentacles evolve and split again and become four tentacles, and each of them can be divided into four tentacles. The tentacle's maximum length will be increased from the original six meters to seven meters.

Now he can control four metal tentacles with a length of seven meters at one time.

Pushing his right hand toward the ground, Wang Xuan suddenly stood up, separated the crowd, and quickly climbed the ten-meter-high wall, looking into the distance.

At this moment, five hundred meters away from the town of insects, Wang Zong is turning his huge body, and most of his body has already turned over.

Suddenly seeing Wang Xuan appear, Xu Jian and the others were overjoyed.

"Are you all right?" Xu Jian hurriedly asked.

Wang Xuan snorted and looked at the departing king insect in the distance, and understood that this time the insect wave was over.

Just why did the king worm suddenly withdraw at the most critical moment in the fight against the power of fear? On the contrary, he fulfilled himself, successfully broke the "life and death barrier", broke through the state, and was promoted to the super state.

Logically speaking, even if he breaks through to the super state of the sixth form, it is impossible for the king insect to be afraid. This is not the reason for its withdrawal at all.

After all, in this insect town world, the supernatural power of human hatching beasts is suppressed and cannot be exerted at all.

What's more, looking at Wang Zong's huge body, Wang Xuan thought that even if the super state was not suppressed by the world power of this second-layer world, it should not be Wang Zong's opponent.

The departure of the king worm was the same as the appearance, and it was very slow. On the north wall, countless people watched the disappearance of the king worm and the Zerg army from a distance.

Even the people who originally guarded the other three walls, the Rakshasa, the Justice League, and the Phoenix, gathered here, wanting to see what happened.

Gu Manyao and Zhao Lei also climbed to Wang Xuan's side again.

"Wang Xuan, what happened to you just now?" Although Gu Manyao saw that Wang Xuan was all right, he was still worried.

Zhao Lei said: "I just felt like a very powerful energy aura suddenly gushed out of your body. Could it be that... you have broken through?"

He is also a powerhouse now, and his senses are very sensitive. At the moment of Wang Xuan's breakthrough, he sensed something, and he couldn't help but ask at this moment.

Wang Xuan didn't hide it either, and nodded slightly towards them.

Zhao Lei suddenly screamed in surprise and joy: "You really broke through the state?"

This sound immediately attracted Wan Qianying, Xu Jian and the others who were watching Wang Zong leave, and they all turned their heads to look at Wang Xuan.

Xu Jian showed a look of surprise, and immediately went to his side and whispered, "Wang Xuan, have you broken through to the perfect state?"

He suddenly thought that Wang Xuan's situation seemed very serious just now. Could it really be a blessing in disguise, because he launched the giant mechanical arm and backlashed, and at the critical moment of life and death, he successfully broke through the "life and death barrier" and promoted to super status?

Even now, he still thought that Wang Xuan was in a dangerous situation just now, because he used the giant mechanical arm to kill the giant mantis, and was attacked.

Wang Xuan looked at Xu Jian and nodded to him in recognition.

Thinking that he couldn't move before, it was Xu Jian who carried him all the way back to Insect Town, and the Rakshasa City incident was also firmly on his side.

"Okay, okay." Xu Jian was a little excited, and said two good words to him, then turned to look at Wang Insect who was leaving in the distance, and murmured: "It seems that this insect tide is also somewhat useful. At least we have another superstate in Bug Town."

Wang Xuan's heart moved, he really broke through because of the insect wave this time, and thinking that they had a total of 31 people to go to the north before, it can be said that these 31 people are the most powerful in the current insect town. At this level, it can be said that the savings are already enough. If you can pass the life and death test, you can be promoted to breakthrough. Unfortunately, of the fourteen people who died, no one can successfully break through.

More and more people gathered on the high wall, and the king insect ruled the Zerg army, and finally disappeared at the end of the north.

After confirming that the king worm has disappeared, the big stone in everyone's heart has really landed. This time, the worm tide is really over.

According to past practice, there should be an interval of about three months between the end of one insect wave and the next one, which means that they can live in the insect town for another three months, at least for the next two or three months. Worry about bugs.

The ground of this insect town world has a self-cleaning function. Although the bodies of various insects are piled up like mountains, they will be swallowed up and dissolved by the ground in a short time, and everyone does not need to clean the battlefield.

The people who were originally standing on the high wall returned to Insect Town one after another.

Wan Qianying, the leader of the Justice League, the leader of the dynasty, and the new leader of Rakshasa all walked towards the elevator in the center of the square.

This time, they won the insect wave and successfully resisted the attack of the insect race. They needed to report it as soon as possible.

Xu Jian did the same, but when he was about to go to the elevator, he stopped Wang Xuan and gave a low voice.

"Wait for me in Bug Town, I should come down to find you soon."

Xu Jian paused for a while and continued: "If nothing else, this report is over, and you are the new leader of the Xuan Gang."

Hearing Xu Jian finish speaking, Wang Xuan was slightly startled and said, "Me?"

Xu Jian nodded with a smile, with a look of relief on his face, and said, "Yes, it's normally like this, if a new super state appears, it will take over the position of the original leader and become the new leader.

In the future, the Xuan Gang will have a new super state. Birth, you can also pass on the position of this leader to him."

Wang Xuan did not expect that the birth of the leaders of the five major forces in this insect town would have such rules.

"Of course, what I said is not absolute, but generally speaking, it is like this."

After Xu Jian finished explaining, he hurried to the elevator and took the elevator to the higher floor.

Wang Xuan has now broken through and is also qualified to enter the higher floors, but listening to Xu Jian's meaning, it seems that he should not go up rashly for the time being, but wait for him to come back.

"Will I replace Xu Jian and become the new leader of the Xuan Gang? It's just that I have reached the super state, I will be restricted in this world, I can't exert the power of the super state at all, and it is difficult to find suitable monsters to hunt and kill, really it's a hassle to stay here all the time."

He now understands why Xu Jian has a relieved expression on his face. It seems that he does not really want to be the leader of the Xuan Gang.

"I just don't know what kind of world the upper floors are. The second floor is Worm Town, and the third floor above. At present, I know Rakshasa City, Xuancheng...the back of the Phoenix, Dynasty and Justice League. There should also be strong support, and it will definitely not be inferior to Rakshasa City and Xuancheng."

Wang Xuan returned to his three-story building and released the state of integration with Xiaojiao.

Gu Manyao, Zhao Lei, Zhang Haofei, Tie Jun and others all followed him back. In addition, there were six others including Cheng Aiguo and Meng Lian. Zhao Lei asked all the way, and kept asking 31 of them to leave Worm Town and go to The encounter after the insect kingdom.

Wang Xuan said roughly.

Although he said it lightly, everyone understood that 31 of them entered the north and only 17 returned alive, and they all understood the danger and cruelty of the process.

After listening to Wang Xuan, Zhao Lei let out a long sigh and said, "This worm tide is simply abnormal. If it wasn't for Wang Xuan's presence, I guess the five leaders would be tied together, and they wouldn't be able to beat the worm tide."

Zhang Haofei smiled and said, "Anyway, the insect tide has receded, and we can be happy for a while."

Tie Jun frowned slightly and said, "It is said that there is a worm tide all because of that king worm. If we can kill the king worm, it will be called a real once and for all."

Wang Xuan glanced at him and said, "It's easier said than done if you want to kill the king bug."

Although he used the Book of Giants to kill Wang Bug with confidence, he was afraid of the price of the suspected seven deadly sins, and he would never use it casually unless it was absolutely necessary.

What's more, Wang Zong made him have a strange feeling, and he didn't know if it was intentional or unintentional, but it made him break through.

"With its strength, it can easily destroy Insect Town, but it doesn't. Instead, it summons a large army of Zerg tribes to attack Insect Town. Speaking of which, this is really hard to understand. What is the real purpose of this king insect... .."

After experiencing the insect tide, everyone felt tired and wanted to return to rest. They stayed in the villa lobby, but after a while, they all said goodbye and left.

After everyone finally left, Wang Xuan went to the mission line.

This time, he completed two parchment tasks, a five-star difficulty "Insect Tide Hunter", and a six-star difficulty "Hunting the Seven-star Spider King".

After these two tasks are completed, you need to personally take the parchment and go to the task line in exchange for it.

Just experienced a terrifying insect wave, most of the people returned to rest, the street became a lot deserted, and there was no one other than him in this mission line.

Wang Xuan came to the self-service machine and turned on the screen. According to the instructions on the screen, he put the parchment of the "Insect Tide Hunter" first, and soon a rust treasure chest appeared below.

Take out the rust treasure chest, and then take out the parchment from the "Hunting the Seven-star Spider King" with a six-star danger.

This time in exchange for a bronze treasure chest.

Wang Xuan was overjoyed. He didn't see what was in the two treasure chests on the spot. Instead, he left the quest row and returned to where he lived. Only then did he take out the rust treasure chest and the bronze treasure chest, and open them. Inside the rust treasure chest were three treasures. The items are 300 small crystal scales, one primary explosion crystal, and one lighting crystal.

Looking at these three things, Wang Xuan shook his head slightly, the things that came out of this "rust treasure chest" were not very what he wanted.

Looking at the bronze treasure chest again, after opening it, there are four things inside, which are also 300 small crystal scales. In addition, there are three other items are the initial state mechanical shell crystal, the silver scale helmet, and a bottle of primary physical strength water.

Seeing these rewards, Wang Xuan finally showed a smile on his face~[www.mtlnovel.com](http://www.mtlnovel.com)~ This six-star danger level reward is far from five-star comparable.

Putting these things away, only the silver scale helmet was worn on the head, and the third-order ordinary quality alloy helmet was replaced.

Now all five pieces on his body have reached the third-order excellent quality, but the helmet and the other four pieces are not the same suit, so he can't make up the ghost set.

Just after putting on the silver scale helmet and putting everything away, I heard Xu Jian's voice.

"Sure enough, I came back very quickly." Wang Xuan stood up and just opened the door when Xu Jian appeared in front of him.

Xu Jian had an unconcealed look of excitement on his face, and said, "The above has approved it, and you are the one who will take over my position as the leader of the Xuan Gang."

Xu Jian continued with a smile on his face: "Of course, before you officially take over, you still need to go up there. After listening to your heroic deeds, they are becoming more and more curious about you. Now many people want to see you. look."

When Xu Jian said this, he stood up and said, "Go, get ready, I'll take you up."

Wang Xuan snorted and said, "I see, by the way, why would you be so happy to see you not being the leader of the Xuan Gang? Could it be that being a leader is tiring?"

If this leader is very tired, he would rather be a free man with no position and no power. He doesn't care about being the leader of the mysterious gang at all.

Xu Jian said: "I experienced the last bug wave, and now it's another bug wave. I've been in this town for more than three months, and it's been a long time. Who doesn't get bored?"

"Come on, let's go upstairs first."

Xu Jian said and walked outside.

## **Chapter 193**

### **The World Above**

Wang Xuan followed Xu Jian to the outside, and found that the sky was gradually darkening, and there was an insect tide at noon. It has now been half a day, and night is about to fall.

"Leader, if I don't want to be the leader of the Xuan Gang, can I refuse?" Wang Xuan thought about it and asked.

He is only half interested in being the leader of this mysterious gang, but he is more interested in the world above.

Xu Jian glanced back at him and said, "Of course you can, if you really want to be, no one can force you, but maybe you don't want to be."

He paused slightly when he said this before saying: "Actually, being the leader also has certain benefits."

"What's the benefit?"

Xu Jian smiled slightly and said, "You will know soon."

After speaking, he looked at the sky and said, "It will be dark soon, let's go."

Wang Xuan stopped talking and followed Xu Jian to the giant glass column in the center of the square.

Xu Jian opened the No. 8 elevator and walked in.

Wang Xuan noticed this detail very early, that is, when they entered the upper world, or got off from it, they were the eighth elevator. There must be a reason for this. Wang Xuan guessed that it might be the only elevator among the ten elevators. The eighth elevator is to the upper world, or to the upper world that these five major forces are familiar with.

Entering the elevator is the same as when you entered Bug Town that day. The inside of the elevator does not look much different from an ordinary elevator, but the space will appear much larger. Looking at the buttons, this is a building with three underground floors and nine floors above ground.

Xu Jian pressed the button to go to the third floor, and the elevator door closed quickly.

"Boss, I remember that to enter the town of insects, not only do you need to hatch the beast to grow into a sub-body, but you also need a clown mask as a pass. How about going to these three floors?"

Feeling the slight vibration of the elevator, it began to rise, Xu Jian said: "It's almost the same to enter the third floor, you need to hatch beasts to grow to a super state, it is said that there were other requirements in the past, such as entering the insect town, you need a clown mask as a pass, but now you don't need it. Now, just enter the superstate."

Wang Xuan asked curiously, "Why? The rules for entering the third floor have changed?"

Xu Jian shook his head and said, "It's not that the rules have changed, but that the system has malfunctioned."

Wang Xuan was startled.

At this moment, the slight vibration of the elevator stopped, and the elevator door in front of him opened.

Originally, Wang Xuan thought that it would be like entering the insect town before. There would be a white light curtain outside. This white light curtain would detect whether the people who entered met the standards. If they did not meet the standards, they would be blocked by this white light.

But now that I entered the third floor, I found that there was no white light curtain at the entrance of the elevator, and it was a bit gloomy.

Night has fallen quietly. It seems that the time on the third floor is the same as that on the second floor. It is night now.

Xu Jian walked straight out, and Wang Xuan walked out slowly, without any detection or prompt information, which made him frown slightly.

The elevator doors at the back closed silently, and the sight he saw was completely beyond Wang Xuan's expectations.

Originally, the third-layer world in his imagination should be more magnificent than the insect town on the second layer. At least what you can see should be a town much larger than the insect town.

But what I see now is a dilapidated scene. A large number of towering trees can be seen in the distance. Any big tree must be tens of meters high. At a glance at night, there are virgin forests in all directions. The scene, there is no end in sight, this third-layer world is actually an endless forest?

Looking up at the sky, it was dark and dark, and the top could not be seen. It was about 100 meters higher than the sky in the second layer of Insect Town. The sky in the third layer of the world looked more like the sky of the earth. The only difference was that there were no stars at night. It was dark.

Looking back at the back, it is even more amazing. There are giant glass pillars standing there, and ten elevators are inlaid on each glass pillar. If you look at the glass pillars on the second floor, this is a giant glass with elevators. The column should lead to the sky, and it should go to a higher level.

But now, most of these giant glass pillars have been damaged, as if they were cut off by some force, and there is no glass pillar that can lead to the end of the sky above.

Wang Xuan's heart skipped a beat when he saw it, doesn't that mean he can't take these elevators to get to higher floors?

"My Healing Game"

At this moment, he suddenly understood why Xu Jian had just said that the system had malfunctioned.

"Boss, this is..."

Wang Xuan's face was full of shock. They had to know that to them, the glass column and these elevators were part of the building. They were indestructible and could not be damaged at all, but now...

Seeming to understand why Wang Xuan was shocked, Xu Jian's face was relatively normal, and said, "When I first saw it, I was more surprised than you, this is the real appearance of the third layer of the world, you can probably see it, these elevators Most of it is destroyed, the third world is at the top, and we can no longer use the elevator to get to the higher floors."

"Don't ask me how I destroyed it, I don't know." Xu Jian shook his head and smiled bitterly: "There were originally ten glass pillars that reached the sky, and each glass pillar had ten elevators, a total of one hundred elevators, representing the Hundred Towns, Bug Town is just one of the Hundred Towns."

"But now, because the elevators are badly damaged, not only are the elevators completely incapable of going up, but there are also many elevators going down that fail to start, which means that these towns are already inaccessible. In addition, there are some towns that cannot carry Living in a disaster like the worm tide has been destroyed. I thought that the worm town would not work this time, but because of you..."

Xu Jian took a deep breath and said, "That's why the superiors attach great importance to you. Originally, I thought that it would be dark and I would bring you tomorrow, but I was a little excited and wanted to see you now."

Wang Xuan looked around. There used to be ten glass pillars that reached the sky and hundreds of elevators. Although they were seriously damaged, the area occupied was not small. In this area, the ground was barren, and it was completely occupied by virgin forests. For the third-layer world, the bare ones here are the most special.

Wang Xuan looked at the ground carefully and saw the traces of some glass columns that were completely destroyed, as well as some broken walls, which seemed to indicate that there should have been some buildings around here, but all of them were destroyed. This is the case, because this area is special. Manufacturing, there are still no plants such as grass and trees growing on the ground.

"Isn't there Xuancheng and Rakshasa City... Why, there are primeval forests all around, where is Xuancheng..." Wang Xuan looked around with an incomprehensible look on his face, and then saw two lines appearing not far away. The figure is slowly walking over.

They also saw Wang Xuan and Xu Jian, but they didn't seem to care too much. They just glanced at them, and then walked straight to the other side of the glass column, which looked like the elevator had not been completely damaged.

Wang Xuan saw that one of them was wearing a full set of ghost equipment, and the other was wearing a full set of silver scale equipment, and guessed that they should also be super strong like himself.

After all, those who can enter this third-layer world should be super-states.

They opened an elevator, walked in, and the elevator doors closed.

Wang Xuan looked and found a sign hanging on the elevator with the words "Fire Town" written on it.

Looking at other elevators, almost every elevator that is still well preserved has signs hanging on it, such as "Stone Town", "Beast Town", "Sand Town", "Witch Town" and so on.

Including the sign "Insect Town" written on the elevator they just walked out of.

Wang Xuan heard Xu Jian just said that this place used to be prosperous and there were as many as a hundred towns. Every elevator could go down to a town, and of course, it could also go up to a higher floor. Now, The passages up the ten glass columns were completely destroyed, and these elevators could no longer lead to higher floors.

Hearing Wang Xuan wondering about the location of Xuancheng and Rakshasa City, Xu Jian pointed into the distance and said, "It's not far away, there."

Wang Xuan carefully identified the direction he was pointing, and only then did he barely see that there really seemed to be a dark shadow of a city among the towering trees, just because the surrounding area was completely obscured by trees, and it was very dark under the night. , If you don't look carefully, it is really difficult to find that there is a city hidden there.

"Let's go." Xu Jian smiled and said, "You will soon understand everything about this third-layer world."

As he spoke, he took the lead and walked into the distance.

When he walked to the edge of this barren land, Wang Xuan suddenly found that there was a complex and huge rune pattern engraved on the ground. Looking closely, the rune pattern surrounded these elevators, with this as the center, a circle a huge circle.

"This is the safest place. These rune patterns are actually a special large formation that can protect us at critical moments."

While talking, he walked forward, and the rune pattern came out, and the ground was covered with weeds. These weeds were very deep, close to one meter. When everyone walked inside, most of their bodies were covered. If there was something hidden inside Monsters, hard to spot.

As soon as Wang Xuan entered it, he immediately became alert.

Xu Jian also grew four animal arms behind him, entering a state of alertness.

"It's not safe here." Wang Xuan understood when he saw Xu Jian's reaction, and immediately extended the metal tentacles.

Xu Jian said: "Normally speaking, it is relatively safe, but just in case, it is always good to pay attention."

In addition to this one-meter-high grass, there are also a large number of towering ancient trees that are dozens of meters high. Wang Xuan walked among them and felt very small. Compared with this forest, he and Xu Jian were too small.

After walking about tens of meters into the forest, I saw a wall.

This wall is about fifteen meters high, which is even higher than the ten-meter high wall in Insect Town, but when Wang Xuan got closer, he realized why he hadn't paid attention to the wall here before.

Just because the fifteen-meter-high wall is covered with all kinds of plants, all kinds of plants he doesn't know almost completely cover the wall, and there are some strange and huge flowers blooming on it, as if they have become this A part of the forest, so he was hidden in the forest just now, and the light was a little dim, so he couldn't notice it.

"No way, the plants here are growing too fast, these big trees, you don't have to cut them down. If you cut them down, they will only grow faster and grow bigger, so there is no way but to let go. They grow."

Xu Jian explained helplessly: "That's why the surrounding walls of Xuancheng are covered with plants. I cleaned it up a few times before, but then I had no choice but to leave it alone. The same is true for other cities, so if you didn't look carefully, you wouldn't be able to. It's really hard to find."

As he spoke, he grabbed an arm-thick ivy in front of him and climbed up.

Wang Xuan stretched out his right hand, and a metal tentacle appeared, which also entangled a green vine. As he ascended, he said, "We want to climb over the wall? Don't need to go through the city gate?"

Xu Jian smiled bitterly: "The city gate? Didn't you say it? The plants here are too developed, it's just crazy, the city gate has long been blocked by plants, and it was finally cleaned up, and it will only grow more the next day. A lot, and now everyone is too lazy to care, anyway, it's enough to get in and out of the wall."

Wang Xuan was stunned. What the \*\*\*\* is this third-layer world? Although there are various insect worlds outside of Insect Town, the inside of Insect Town is still normal. This third-layer world... began to make him a little bit at a loss for words.

Originally, he was full of fantasies about the third-layer world. At least in his senses, it must be much more formal, grand, and formal than Insect Town. Maybe it is not necessarily similar to an ancient city, and it must be very lively inside.

But now he has completely changed that feeling.

The two of them were very fast, and they easily climbed the 15-meter-high wall. The wall was very thick, over three meters, and it was covered with various plants. Standing on the wall, Wang Xuan noticed the area inside the Xuancheng. Not small, much bigger than Insect Town, there are a lot of buildings in it, and it looks more imposing than Insect Town. This is the first time he has felt the extraordinariness of this third-layer world.

However, no matter what kind of building it is, even on the ground, there are plants.

He saw that there was a tower-like building in the center of this Xuancheng. It had to be 20 to 30 meters high, and there were a lot of plants crawling on the outside. From a distance, it seemed like an ancient tower-shaped tree.

Other buildings around, no matter how tall or small, have some plants attached to them more or less.

Only a very few buildings were cleaned relatively cleanly, and they barely looked like they were inhabited.

"This is really Xuancheng?" Wang Xuan's face was a little complicated. It seems that this Xuancheng should have been very large in the past, but now it is seriously infested with plants. It can be said that most of it is covered by various plants. He saw some faint lights inside, and he really suspected that this was an abandoned city assimilated by the forest.

"Of course it's true, and it's not just Xuancheng, other cities are the same. Although we tried all kinds of methods, we couldn't solve the problem of the crazy growth of these plants."

As Xu Jian said that, he jumped and jumped off the 15-meter-high fence.

Wang Xuan didn't know what to say, so he could only jump down after him.

Falling into the city, stepping on the plants and ivy climbing on the ground, the two walked towards the front.

Wang Xuan looked at the buildings covered with plants, and found that it was dark and dark inside, unpopular, and no one seemed to live there.

"It looks like no one has lived here for a long time, right?"

Xu Jian said: "Yes, these are abandoned houses. I heard people say that Xuancheng used to be very lively, basically it was full of people, and there are not as many plants now, but now the number of people is getting smaller and smaller. Many houses are deserted, so there are more and more plants. Have you seen those houses that look cleaner? Basically, there are no plants outside, only those that live in people."

Wang Xuan snorted and said, "Boss, can I ask you a question?"

"Ask." Xu Jian responded while leading him forward.

"How long have you been in this world?"

Xu Jian was stunned, stopped, and then thought for a moment before saying: "It must have been more than half a year, the specific months... I don't know, but it should not be more than a year, what's wrong?"

"It's nothing, just asking." When Wang Xuangang said this, he suddenly felt something and raised his head, only to see a dark shadow in the dark sky above.

The black shadow had a pair of giant wings and looked like a big bird, hovering above, and was gradually approaching downwards.

"Hide away." Xu Jian also saw it, and said in a low voice, his body flashed, and he stuck to the wall of a house not far away, and stood against the wall.

Seeing this, Wang Xuan also followed, standing against the wall just like him.

"Don't move, so as not to attract its attention, we should have jumped over the wall and caught its attention just now~[www.mtlnovel.com](http://www.mtlnovel.com)~ Xu Jian lowered his voice and said softly: "It is called the Iron Winged Demon Owl, a very terrifying one. The strange bird can easily shred the powerhouse. Even if we encounter it in the super state, it is dangerous. Fortunately, it is only sensitive to living creatures. As long as we stand still, it will not cause it. Notice. "

Listening to Xu Jian's low voice, Wang Xuan noticed the sky above. In a short period of time, several iron-winged demon owls had appeared, hovering above, as if looking for something.

In the Xuancheng below, it was quiet and almost no one could be seen, only some faint lights could be seen faintly.

However, this kind of iron-winged demon owl seems to be insensitive to light. After circling for a while, they saw that they could not find it, and then slowly flew away and disappeared into the virgin forest.

After waiting for them to disappear, Xu Jian let out a sigh of relief and said, "This kind of fowl in the air is very troublesome, and you may encounter them occasionally, but fortunately there are lush trees here, so it's not difficult to escape them. are all familiar."

As Xu Jian spoke, he accelerated his speed, flashing continuously, and soon he arrived at a building. The building looked quite large, covering a large area. Apparently inhabited.

Wang Xuan followed Xu Jian closely, and when he saw that he opened the door and walked in, he followed.

When you enter your eyes, you can see a relatively soft light. These are several large flowers with soft light, which are inserted in a bottle. These flowers are like lamps, which can shine at night, but the light is not bright, it looks like Some are dim and dark, in this night, there is a little bit of weirdness, and some inexplicable gloom.

## **Chapter 194**

### Humans and Hatching Beasts

This is a very huge hall, ten meters high, more than twenty meters wide, and thirty or forty meters long. The layout inside is very simple, not as good as his three-story building in Bug Town.

A stone table was placed at the entrance, and on the table was a vase with some glowing flowers in it.

In the center of the hall was a huge round glass vessel. The glass vessel was four or five meters high and had a diameter of about two meters. It contained most of the liquid that seemed to be slightly eroded.

At this moment, there is something soaked in this liquid, Wang Xuan looked at it, and his heart was slightly shocked.

The liquid soaked in the glassware is like a half-human, half-octopus-like monster, with a half-human face and an octopus face, covered with huge octopus tentacles, which looks strange and ugly.

Around this giant glass vessel, there are eight stone pedestals carved out of cyan stones, five of which are seated with people. These people are all wrapped in black robes and have no faces. exposed.

Wang Xuan guessed that they should still be wearing heavy armor in their black robes, so from the outside, these five people were all bloated.

It was hard for Wang Xuan to believe that someone would like to sit on this hard and cold stone seat.

It was completely different from the meeting he had imagined. The strange scene in front of him made him feel inexplicably uneasy, whether it was the half-human, half-octopus monster soaked in glassware, or the five figures sitting on the cyan stone seat wrapped in body wraps. The people in the black robes gave him a strong aura of danger.

In this world, the power of the super-state will no longer be suppressed. The breath of the super-state powerhouse is completely released, covering the hall and intertwining with each other, making the air here faintly stalemate.

As Qiangru Wang Xuan walked in, he felt that his heart was suddenly pressed against a big rock, which seemed unspeakably heavy.

"Sword Comes"

"Elder, Wang Xuan is here." Xu Jian's voice sounded, he looked very respectful, and bowed to the half-human, half-octopus monster placed in the central glass vessel.

"Wang Xuan..."

A faint voice came over, and Wang Xuan immediately discovered that the voice came from the glass vessel facing him.

Although this monster is immersed in water, it can still make an intermittent sound, which should be one of its special abilities.

Wang Xuan did not expect this half-human, half-octopus-like monster to be the elder in Xu Jian's mouth? Judging from Xu Jian's reaction, this elder was obviously an important figure in "Xuancheng".

"The elder's hatching beast has a backlash. Now it can only be immersed in this specially prepared potion to suppress the backlash of the hatching beast."

Xu Jian seemed to know what Wang Xuan was thinking, and was busy explaining.

Hearing Xu Jian's explanation, Wang Xuan let out a slight sigh of relief. He had always had doubts about the hatching beast. He felt that the awakening consciousness of the hatching beast was getting stronger and stronger, and it was very likely to retaliate in the future. Appearance, obviously his conjecture is true, when the hatching beast grows and evolves to a certain level, it may backfire on humans and turn into a half-human, half-monster like an elder.

"Are you frightened by my appearance..." In the glass vessel, the body of the elder soaked in it floated slightly, and soon the half-human, half-octopus head emerged from the soaked potion, with a half-human face full of faces. It's a wrinkle, obviously he's not young anymore, while the other half of the octopus face is shaking constantly, looking a little hideous, watching his half human mouth open and close slightly, making a somewhat old voice, Wang Xuan's scalp is slightly hairy Ma, there is an indescribable strange feeling in my heart.

"No."

Wang Xuan forced a smile and said, "Is it true that the hatching beasts will turn back on us humans when they grow up?"

He thought of Gu Manyao, Zhao Lei, Meng Lian, Cheng Aiguo, and even Tang Ruoyu.

I have assimilated with Warcraft, so I don't need to worry about being attacked by Warcraft, but what about them?

"If you want to grow to the perfect state...you need to wake up the hatching beast. The awakened hatching beast is a huge hidden danger, and it may be backlash at any time..."

The elder's voice was faintly hoarse, and on the blue stone seat around the glassware, the five figures wrapped in black robes sat there quietly.

"The stronger the strength... the more serious the backlash..."

When the elder said this, he suddenly said: "All five of you, let him see..."

The five people sitting on the azure stone seat heard the elder's words, and all stood up from the azure stone seat, tore off the black robes wrapped around the surface of the body, and exposed the body inside.

Wang Xuan was shocked when he saw them.

Of these five people, one has black hairs all over his body and looks like a black orangutan. He can only barely tell from his five senses that he is still a human being.

One had two snow-white fangs growing out of his mouth, a long horn on his forehead, one half of his body turned into a rock, and the other was a woman, whose head and face were covered with bizarre sarcoid, which was slowly seeping out green juice.

It can be said that although their physical changes are not as serious as the elders soaked in the potion, they are all half human and half monsters.

Only now did Wang Xuan understand why they completely wrapped themselves in black robes. They all suffered serious backlash from hatching beasts and turned into terror.

"Is it easy to be attacked after entering the super state?"

Wang Xuan took a deep breath and forced himself to calm down. Thinking of the powerhouses he had seen before, there was no backlash, but now entering the third-layer world, he saw this terrifying backlash.

"Yes... Entering the super state, especially the stronger the person, the stronger the hatching beast will inevitably be, and the easier it is to have a backlash."

"When you are in the state, you can kill the three messengers of Rakshasa City in a row. Although the power of the super state will be suppressed in the second world, it is extremely rare that you can kill them. Now you enter the super state. state, it is bound to be stronger than the general super state..."

"So, the possibility of your backlash...will be far greater than that of ordinary people."

Hearing the elders say this, Wang Xuan already understood, it seems that they are afraid that they will also have a backlash.

"Isn't there a way to avoid this backlash?"

"There is no way. If you want to gain the powerful power of hatching beasts, this is the price we need to pay. Of course, if your willpower is strong enough, you may also backlash against hatching beasts, but this is very rare... Most people It's hard to fight against hatchlings."

"Then, if we choose not to evolve...don't let the hatching beast grow further, can we avoid it?"

"As long as the hatching beast is hatched, if it is deliberately not to hunt and kill the monster, it will not make it strong, but its existence requires energy to maintain its life. If it cannot draw external energy, it will slowly It absorbs the host's energy as nutrition, and eventually \*\*\*\* the host into a mummified corpse. Of course, it can't escape death, and the final result is to perish together."

Hearing what the elder said, Wang Xuan shuddered. This does not mean that as long as the hatching beast is hatched, the final result will either grow, and the final result will be swallowed by the hatching beast with a high probability, or it will not grow and will eventually be sucked by the hatching beast. Use all the nutrition of the body and die with the hatching beast.

"What the \*\*\*\* is this hatching beast, how can it be so scary..." Wang Xuan murmured, thinking that they were trapped in the underground parking lot that day and attacked by scale monsters. In order to survive, they could only kill these monsters. In turn, white scales are obtained.

If they get enough scales, they can naturally hatch hatching beasts. It can be said that if they are in it and want to survive, apart from hatching hatching beasts, there is no second way to choose.

At this moment, a thought flashed in his mind, the real purpose of this mysterious building's existence is to cultivate hatching beasts? So what is the real role of these human beings, just to parasitize the mother body of the hatching beast?

This feeling made Wang Xuan very uncomfortable, like a piece of lead stone.

"There must be a way... There must be a way to solve this problem..." Wang Xuan whispered slightly, his hands slowly clenched into fists.

He must not tolerate Gu Manyao and Zhao Lei eventually being swallowed up by his hatchling beasts and turned into monsters.

"It is said that somewhere in this third-layer world, there is a plant that can solve the hidden danger of being attacked by hatched beasts. Unfortunately, no one knows the exact location of this plant. Can't get it."

The elder soaked in the potion suddenly sighed, his tone full of helplessness.

Wang Xuan's spirit was lifted, he immediately raised his head, and said, "Is there a plant in this world that can solve this hidden danger?"

The elder nodded slightly and said, "I also accidentally found a notebook in a corner of Xuancheng that I don't know who lost it. There are records in it. You should have seen it when you entered here. Are the plants so lush and exaggerated? Even this mysterious city is almost completely covered."

Wang Xuan nodded and said, "Yes, this third-layer world is simply a primitive forest."

"According to the record, this world was once barren, and then a sapling was left here, and it evolved into such a world of virgin forest. This sapling, in the record of the note, is called the tree of the source, is the origin of all flowers, trees, and other plants. In the place where the sapling left and took root, a plant grows. Of course, no one knows what this plant looks like, only the essence of this sapling. As a result, this plant bears a kind of fruit. As long as humans eat this fruit, they can erase the soul consciousness of the hatching beast in their bodies, turning it into pure soul energy, which is absorbed by the human soul. The real assimilation of the beast not only has all the power of the hatching beast, but also no longer has to worry about being attacked by the hatching beast."

Wang Xuan's heart moved when he heard this. His current state is exactly what the elder said. He has assimilated with the beast, regardless of each other.

Unexpectedly, there is such a magical fruit in this world. After eating it, it can achieve the effect of assimilating humans and their hatched beasts.

"Of course, this is just the record in the notebook. I don't know if it's true or not..."

There was endless regret in the elder's tone.

Wang Xuan couldn't help but said: "Since this note describes the origin of this fruit in detail, doesn't it mention its whereabouts at all?"

"I mentioned it. It said that this kind of plant may exist at the source of this world, but there is not much difference between mentioning this sentence and not mentioning it..."

The elder shook his head as he spoke, apparently thinking that although this sentence mentioned the whereabouts of the plant, it actually didn't make much sense.

"The source of existence in this world..." Wang Xuan whispered softly, this third-layer world looks vast and boundless, and all that can be seen are towering trees, so where is its source?

Xu Jian replied: "We once suspected that this so-called source of the world might be the most lush place in the world. We can determine the approximate location based on this method, but we can't get in."

"Why?" Wang Xuan looked at him.

Xu Jian said: "Because the more lush the trees are, the more likely there are huge dangers hidden in it. Even a super-powerful person is difficult to penetrate. Wang Xuan, you didn't know that this world is far more dangerous than you think. Relatively speaking, the area we are currently in is much less dangerous because it is close to the safe area around the elevator, so all cities including Xuancheng are here."

Wang Xuan snorted, but kept the plant and fruit in his heart, and after thinking about it, he said, "Elder, I want to ask, if the elevator going up was destroyed, does it mean that we will never be able to enter the higher floor? ? Are we never going to get out?"

All along, he has been thinking that one day, he must find a way to get out of this building. He even suspected that when he could get to the highest floor, he would be able to leave, but now the elevator is inaccessible. On the higher floors, the way up was cut off, which was almost the same as ending his hope.

"Want to leave this building? Then you need the certificate of the king. As for the certificate of the king, it is said that each floor has one, so whether you can go out has nothing to do with whether you can enter the higher floors."

Hearing what the elder said, Wang Xuan's eyes glowed, and he said, "This king's certificate, there is one on each floor?"

Immediately, the northern area on the first floor flashed in his mind that day, and he wanted to enter it and automatically trigger the hidden mission, the legend of the king.

Could it be that it is really related to the certificate of the king?

With his current strength, he should be able to try it.

Thinking of this, his heart suddenly became hot.

No matter how strong he became, he never gave up the idea of going home.

"I heard that this is the case, but I have never seen anyone get it, nor have I seen it leave... Of course, maybe it's just me being ignorant..."

When the elder soaked in the potion said this, he seemed to become tired, and his voice was low, and said: "Wang Xuan, I want to see you because Xu Jian said a lot about you, and also mentioned this insect town. The particularity of the insect tide... He doesn't understand, but I have a feeling that the speciality of the insect tide this time may be aimed at you, especially when you broke through to the super state in the insect tide, which confirmed my conjecture... .."

"I have great expectations for you. Xu Jian has been the leader of the Xuan Gang for so long, and he has never been able to grow. I now hope that you can replace him and serve as the leader of the Xuan Gang."

There was a hint of hesitation on Wang Xuan's face, looking at the half-human, half-octopus elder in the glass vessel in front of him, then at Xu Jian, and the five people who had already covered their faces with black robes again.

He felt a terrifying aura in these five people, and understood that although they were attacked by the hatching beasts, they could still maintain this state. Each of them must be extremely powerful. Perhaps the elder and the five people in front of him were the true power of this Xuancheng.

"Did you break through the super state and want to become stronger, thinking that Insect Town can no longer satisfy you? So you don't want to be the leader of this mysterious gang?"

In the elder's remaining human eye, there was a ray of wisdom, as if he could see through all of Wang Xuan's thoughts.

The look on Wang Xuan's face became a little embarrassed. After he became a super-state, he continued to stay in Worm Town, and it was almost difficult to find a suitable monster for him. Although they said that the world on the third floor was dangerous, it was very dangerous. To his heart's content, he now needs more powerful monsters to sharpen himself.

"I just told you about the backlash of the hatching beast, because the stronger the person is, the easier it is to be backlashed by the hatching beast. Wang Xuan, as soon as there is a sign that you may be backlashed, you must come to me immediately, because according to your previous performance, you either do not have a backlash, once backlashed, it will be extremely dangerous, your hatching beast has grown too fast, and its foundation is unstable. This will be a huge hidden danger in the future. It is hope that you will be the leader of the mysterious gang. You can take it easy, you can take more time to stabilize the foundation, and you are the leader of the mysterious gang, and there is another biggest advantage, that is, you are relatively free, you can freely enter and leave all layers, because after you reach the super state, there are no special circumstances, generally it is strictly prohibited. Entering other floors, violators will be severely punished, which is also a protection for the newcomers on the lower floors."

Hearing the elder say this~[www.mtlnovel.com](http://www.mtlnovel.com)~ Wang Xuan's heart moved, this was a temptation for him.

After all, although he has reached the super state, he is still very concerned about the people in Insect Town, especially the task of the legend of the king on the first floor, which is suspected to be related to the certificate of the king, so he wants to try it even more.

"And becoming the leader of the Xuan Gang will not affect your coming to this third-layer world."

Hearing this, Wang Xuan finally nodded and agreed, and decided to replace Xu Jian as the leader of the Xuan Gang.

As for the fact that he has assimilated with Warcraft, he doesn't need to worry about backlash. He didn't say it. He only selectively believed the words of the elders and Xu Jian and others in front of him, but did not fully believe them.

Because of his assimilation with monsters, he acquired a special instinct of monsters. Although he still can't think of the reason, but for some reason, the instincts of monsters he possessed made him be wary of the people in front of him. It seemed that they You can't fully believe what you say.

This vague instinct made Wang Xuan feel an indescribable strange feeling in his heart, but he couldn't see where the flaw was for the time being.

"Why, it seems that the instinct of the beast is telling me... I can't fully believe what these people say, so I should beware of them."

Wang Xuan looked at the elder soaked in the glassware, and then looked at the five people sitting on the bluestone seat. Suddenly, a strange thought suddenly appeared.

If the hatching beasts have devoured them, gained their memories, and then disguised as human beings, how can others know whether they are human beings or have become monsters occupied by hatching beasts?

## **Chapter 195**

### **Totem**

Wang Xuan didn't know where his idea came from, but it suddenly appeared, and a chill appeared on his back.

Although he knew in his heart that this possibility should not be large, otherwise it would be too scary, not to mention that the elder is suppressing the backlash of the hatching beast through the soaking potion. If it has been swallowed by the hatching beast, it should not continue to soak in the It's in the medicine.

But he understands that the monsters are instinctively warning him. Although he doesn't know the reason, he is still a little more wary, and he doesn't dare to believe their words.

Seeing that Wang Xuan agreed to be the leader of the Xuan Gang, Xu Jian was very happy and said, "Wang Xuan, congratulations, from now on, you are the leader of the Xuan Gang of Bug Town."

"As for the specific handover work, Xu Jian, you have to do it well. If there is anything you don't understand, Wang Xuan, just ask Xu Jian."

"I have already let people handle the matter of Rakshasa City, Wang Xuan, since you are already the leader of the Xuan Gang, you don't need to worry anymore... Of course, in Worm Town, you should try your best to deal with the other four leaders. Good relationship...after all we're on the same page, we have a common enemy, and that's the building that traps us..."

After the elder said this, he slowly sank his head into the potion, soaking his entire body in it, and slowly closed his eyes.

Xu Jian bowed to the elder again and bowed his hands to the five people sitting on the blue stone seats, then pulled Wang Xuan and backed out.

It wasn't until he left the hall and closed the door again that Xu Jian let out a long sigh of relief. It seemed that he felt depressed in the hall just now.

Wang Xuan's heart was slightly relieved. Before, the instinct of Warcraft had always been uneasy. Now that he left the hall, this uneasiness disappeared.

This made him feel more and more that there seemed to be a problem with the elders and the five people in the hall. Otherwise, how could the instinct of the beast be so uneasy?

Or maybe this elder and those five people are too powerful to cause the unease of the beasts?

"Leader, where are you going now? Are you going back to Wormtown?" Wang Xuan looked up at the sky as it turned completely dark outside. If he hadn't seen a little star on it, he would have almost suspected that he was now on Earth. Somewhere in the primeval forest.

"Yes, of course you can get acquainted with Xuancheng." Xu Jian stretched his fingers around and said, "Look, those places covered with plants are all uninhabited places. The outside of the houses in this area looks relatively clean. They are all inhabited by people. Actually, Xuancheng is similar to Insect Town, and the organization is relatively loose, because basically there are no weak people who can enter Xuancheng. Everyone is relatively independent and does not like to have too many constraints. ."

"Is the elder the leader of Xuancheng?"

Xu Jian said: "Nominally yes, I heard that the elder has been here for many years, so he knows the most. If we have any questions, we will ask him for advice. If you want to live in Xuancheng, those abandoned houses, you can just pick a building and organize it yourself, you can live in it, and no one will care about you. It can be said that you are still very free here. Of course, the only thing you need to abide by is that you have entered this world, you can't go down casually, this one it is expressly forbidden, otherwise, if you are found, you will be severely punished."

Wang Xuan nodded and looked at Xuancheng, which looked very dark under the night sky. Compared to it, there was no lively insect town, and it was dead, so he didn't like it very much. Comfortable, said: "Then let's go down first."

"Okay." Xu Jian nodded and took him to the outside.

After walking for a while, several iron-winged demon owls appeared in the sky again, hovering above.

Xu Jian and Wang Xuan were leaning against the wall. He raised his head and muttered, "Tonight's Iron Winged Demon Owl is a little weird. It keeps appearing above this place."

Wang Xuan said softly, "Is it rare?"

Xu Jian said: "I come here occasionally, and I rarely meet them. It's rare to see them twice in a row tonight."

At this moment, a shrill scream came from afar. Listening to the sound, it was not far from here, maybe just a few kilometers away.

This kind of screeching is very strange. When you hear it, it is like a sharp needle piercing the eardrum, which makes people feel uncomfortable.

As the scream sounded, the iron-winged demon owls that were hovering above suddenly changed direction and flew towards the direction of the scream.

A surprised look appeared on Xu Jian's face, and he said, "Is something wrong over there?"

As he spoke, he quickly ran towards the high wall on the other side.

Wang Xuan was completely unfamiliar with this place, so he could only follow Xu Jian. At the same time, he heard voices coming from the other side, but it was a relatively clean building not far away. The doors of some houses were blocked from the inside. It was opened, and several figures appeared.

They were obviously also alarmed by the scream, and wanted to come out to check the situation.

Wang Xuan knew that although this Xuancheng looked lifeless on the surface, it seemed that there were not many people, but the people who could live here should basically be super-powerful people, and none of them dared to be underestimated.

He followed Xu Jian and climbed along the fifteen-meter-high wall, and soon reached the wall and looked into the distance.

There were a few other figures walking out of the house, their bodies swaying, everyone was moving very fast, and they also climbed the fence.

Wang Xuan followed the direction that the iron-winged demon owls flew, and saw a few kilometers above, there was a shrill scream again, and there was a faint fire between the towering giant trees that were dozens of meters high. The flickering is just because the trees are too lush, but each tree is still so tall, even if something really happened there, it was covered up, and everyone could only vaguely see the faint flickering firelight, and some seemed to be fighting. Sound, it's hard to see anything more valuable than that.

"It's about six kilometers away...it should be Mei Xiaosen's territory." Xu Jian murmured.

"Who is Mei Xiaosen? There seems to be a fight there, and the iron-winged demon owls all rushed down." Wang Xuan saw the iron-winged demon owls flying over the sky turned into small black spots, and then Lingkong fell, and soon disappeared into the virgin forest.

"Well, it should have been attacked. This Mei Xiaosen is a very powerful character. Before he came here, he was very similar to you. He is the type of genius that made a blockbuster. Of course, he is not from Bug Town, but from Ghost Town. Originally belonged to our 'Xuancheng', but he didn't stay in 'Xuancheng' for a long time, he took people out independently, and established his own power. It was in that place, and now it should be where monsters were attacked. attacked."

Wang Xuan was startled and said, "Can you still go out independently?"

Xu Jian said with a smile: "Of course, it is said that Xuancheng's organization is relatively loose, so many strong people have gone out independently and established their own forces. In this primitive forest, there are a large number of ancient city ruins, as long as you find a suitable If you pull a group of people who are willing to follow you, you can become an independent power, not only Xuancheng, but the actual five cities are almost the same. Of course, in name, you still need to respect the five major cities, and sometimes you will obey The order of the five major cities, if the five major cities are compared to five countries, then these independent forces, big or small, are a bit like those vassal states that were enfeoffed in the ancient Zhou Dynasty."

Wang Xuan nodded and hummed. Xu Jian's analogy made him understand a little bit.

"No wonder Xuancheng doesn't see many people, will most of them go out independently?"

"Yeah, there are not many people left in Xuancheng now, especially the elders have been attacked by hatched beasts. The situation is getting worse and worse. Basically, they are immersed in that potion every day, and they have no intention to manage Xuancheng anymore. , If it weren't for your special situation this time, he probably wouldn't see you either."

"The people who stay in Xuancheng now are mostly people whose bodies have been attacked by hatched beasts. Basically, they stay in the house and won't come out, so there are more and more people who go out independently. Some go out independently. On the contrary, his power surpasses that of Xuancheng."

Wang Xuan thought for a while and said: "After entering the super state, what is the proportion of the body's backlash?"

Xu Jian said: "It mainly depends on the strength, both of which are super-status, and are actually divided into several levels. The higher the level, the greater the probability of backlash. Otherwise, the probability is high, so most of the people who are backlashed are very scary, remember. The elder once said that, strictly speaking, the super state is divided into six levels according to the ability of hatching beasts."

"There are so many six levels?" Wang Xuan was a little surprised and said, "Which six levels?"

"The elder said that for the vast majority of people, hatching beasts can grow to a super state, and basically they have reached the peak. There is a huge gap in strength between them, and the lowest level is definitely the one that has just broken through to the super state, and there are not too many opportunities and adventures, it is the weakest one in the super state."

"The second level is medium. In addition to the hatched beasts it owns, there are some special abilities acquired by some adventures, or the talent is very sensitive to combat, or it is purely based on working years, and it has become a super state for a long time. , the strength will naturally gradually improve to a certain extent."

"As for the third level, it is the superior in the super state. These people generally have a certain period of time to become super state, have special opportunities, and have first-class talents."

"Going up, that's the limit of the top, the pinnacle and the legend."

"This kind of super state is definitely possible only with great opportunities, and it is impossible to rely solely on oneself or hatching beasts."

Hearing Xu Jian finish speaking, Wang Xuan was thoughtful, but he had obtained several opportunities, including the blue crystal scale, the left arm of the mechanical god, the ghost wing, etc., but he did not know that his current strength was in the six levels of the super state. belonging to the first level.

"Boss, what level do you belong to now?" Wang Xuan was a little curious.

Xu Jian smiled and said: "Don't call me the leader, you are the leader of the Xuan Gang now, Wang Xuan, as soon as I meet you, you can just call me by my name."

Wang Xuan said: "Well, you are older than me, I will call you Brother Jian."

Xu Jian smiled and said, "Also, you can call it whatever you want. As for me..."

He thought for a while and said, "It's definitely stronger than the average person who has just entered the super state. It's barely average. In fact, most of them can become super state. As long as there is time to hone, they can basically reach the middle level without major accidents. , As for going up, it's not just on your own, you also need some luck."

Wang Xuan understood that what Xu Jian said about luck was an adventure, just like how he could obtain special treasures like blue crystal scales and ghost wings if he didn't have enough luck.

But these treasures are hard to come by, and you need enough luck.

At this moment, there was a continuous sound of explosions in the distance, and it was faintly visible in the depths of the dark forest, and there were firelights flashing and exploding.

"Using so many explosive crystals in a row? It seems that the battle situation at Mei Xiaosen is very fierce." Xu Jian frowned slightly.

The few people who had climbed the fence with them saw the continuous explosion, and jumped into the air one after another. With a flick of their bodies, they disappeared into the towering trees.

Wang Xuan guessed that they should rush over for reinforcements.

"Brother Jian, do we want to go and have a look?" Wang Xuan first came to this third-layer world and was full of curiosity about this place. Especially here, the super state's strength will not be limited and he can play to his fullest. He also wants to know, super state. What kind of level will the real combat power of the strong state reach.

However, Xu Jian shook his head slightly and said, "It's better to have less than one thing. After all, Mei Xiaosen left Xuancheng and went out independently. Unless they actively ask for help, it's not good for us to go. The few people just now were just secretly investigating the situation. Yes, not to help."

"Forget it, let's go." Xu Jian just said here, suddenly there was a loud "bang" in the distance.

The sound was earth-shattering, like a thunderstorm. It happened so suddenly that even Xu Jian was taken aback. The originally lifeless Xuancheng also lit up a lot of light because of the loud noise. Obviously, many people in the house were startled. .

Wang Xuan opened his eyes wide and looked towards the distance where the loud noise was coming from, with a look of disbelief on his face.

In the depths of this distant forest, he saw a towering tree walking.

The height of this big tree is at least 100 meters. Because it is far away, it is impossible to see its specific appearance. Only Mohu can see that it is a huge black shadow like a big tree, with a huge canopy. Walking in the primeval forest.

Around this big tree, there are giant tentacle-like roots. Relying on these roots, they can be rooted on the ground and can be moved.

Xu Jian also saw it, and also opened his mouth slightly.

Wang Xuan was stunned and said, "A big tree that can move? Isn't that the tree of origin that the elders said?"

Xu Jian shook his head and murmured: "As soon as the Iron Winged Demon Owl appeared, I felt a little abnormal tonight. I didn't expect it to appear. It was a totem in this forest. It can be said that this virgin forest is its Territory, every once in a while, it will come out to patrol the territory at night, but fortunately, as long as you don't offend it, it won't hurt you, it is a relatively neutral existence."

"totem?"

"Yes, this third-layer world is unfathomable and almost boundless. In addition to us humans trapped in it, there are endless creatures and various ancient life forms hidden in it. The most powerful life form is called by us. For the totem, there are a total of seven I know so far, and what you see now is one of these seven totems, and we regard it as the ancient tree totem."

"These seven ancient totems have their own positions. Some are neutral, while others regard us as foreign invaders and hate us. Of course, they are also close to the totems of humans. We humans can survive here because we have obtained that A totem shelter close to humanity."

Wang Xuan listened to Xu Jian's explanation and looked at the depths of the forest. The ancient tree totem had already disappeared into the darkness and disappeared.

"Let's go, you'll find out later."

After Xu Jian finished speaking, he didn't stop, turned around and ran along the wall and ran into the distance.

Wang Xuan followed him closely, and the two quickly came to the direction they came from, and Xu Jian jumped down.

Jumping outside Xuancheng, Xu Jian ran towards those dilapidated glass columns 100 meters away.

Under the night, Wang Xuan noticed that there were faint white scales flickering on the rune stone carvings on the ground around here. From a distance, these white scales formed a huge ring with a diameter of about tens of meters.

"When you enter here, you will wait until the safe zone. In the future, in this third-layer world, if you really encounter danger, you can enter here. No matter how dangerous the monsters are, they can't enter here and hurt you."

Xu Jian pointed to the rune stone carvings around him and said, "These rune stone carvings are the nemesis of those monsters, they dare not approach, even the plants in this forest have such a terrifying vitality, but they have no strength to get here, so the ground is still here. It's bare."

As he spoke, he took Wang Xuan to the elevator with "Insect Town" hanging in it.

"Brother Jian, we were in Insect Town at the time. We got up from the eighth elevator. If we change to another elevator in Insect Town to the third floor~[www.mtlnovel.com](http://www.mtlnovel.com)~ will we go to a different place?"

"The ten elevators in Worm Town can go down to different first floors, but going up will always come to this third-layer world, but they will appear in ten different places in this third-layer world, and now there are seven in front of them. The place where the elevator goes has been completely destroyed and cannot be used. Only the place where the eighth elevator appears has not been completely destroyed, and it is relatively safe. The function has not yet been activated, unless the eighth elevator is completely destroyed and cannot be used, the ninth elevator will only be opened."

Hearing Xu Jian's explanation, Wang Xuan realized why the people who got off from the top appeared from the No. 8 elevator. To get here, they must pass through the No. 8 elevator.

"It turns out that the passages going up the seven elevators in front were all destroyed, so it seems that only if the previous elevator is destroyed, the next elevator will be activated."

"Yeah, thanks to so many spare elevators, otherwise we would have lost contact with Worm Town long ago."

While talking, Xu Jian pressed the button on the side of the elevator, the elevator door opened, and the two walked in.

Xu Jian pressed the button leading to the second floor, the elevator door closed, and with a slight shock, he began to descend.

Wang Xuan curiously tried pressing the button on the fourth floor and found that there was no response when the button on the fourth floor was pressed.

"It's useless. The upward passage is completely destroyed. It is impossible to take the elevator to other floors above the third floor."

Wang Xuan hummed and retracted his hand, but the elevator suddenly shook violently.

Suddenly, the two of them were slightly surprised when they stayed in the elevator.
