

Last Building on Earth Chapter 206-210

Chapter 206

This kind of intense anxiety is even worse than facing the fallen one. The strength of the lost person in front of him is probably still higher than that of the fallen one.

Wang Xuan's body was tense, and the four metal tentacles opened silently. If the lost man attacked, he would not hesitate to fight back.

The empty eyes of the lost person seemed to stare at him, stopped in place, and did not move, with no intention of attacking.

Wang Xuan's brows furrowed slightly. Shuang Fang stood in the hall in the stone gate like this, as if they were facing each other. Wang Xuan waited for a full minute, but the other party didn't respond.

At this moment, he saw the end of the hall. There was a staircase going down. Going down the staircase should be the second floor of the **** tower.

"No wonder the legend broke into the ninth floor of the **** tower, and it is possible to obtain the certificate of the king. This first floor is so terrible, the ninth floor can be imagined, unless I use the book of giant gods..."

Thinking of the Book of Giants, Wang Xuan's face showed a hint of helplessness and vigilance. As he grew to a super state, the instinct of the monster he possessed became more and more sensitive, and his instinct gave birth to a sense of fear for the Book of Giants.

In his induction, this book of giant gods is like a bottomless abyss, quietly waiting for his approach, and may drag his soul into this bottomless abyss at any time, and it will never be transcended.

And every time he uses the Book of Giants, he will be one step closer to this bottomless abyss.

So he made up his mind, not forced, he would never use the Book of Giants again.

All these thoughts flashed through his mind in an instant, Wang Xuan no longer hesitated, and finally moved his pace again, slowly moving towards the pile of **** clown masks in the center.

And the lost person seemed to sense him, and slowly turned his body as he moved, but it did not show an attacking posture. The half-melted body was very strange, and the translucent viscous substance kept surging out. , flowing down like a pile of melted candles, and soon stuck to the corpse of a **** clown on the ground.

The corpse of the **** clown touched the viscous liquid, and immediately began to melt and fester when it touched the fiery ice and snow.

Wang Xuan silently looked at all this, accelerated his speed, and quietly approached the pile of **** clown masks. The four metal tentacles opened, rolled the pile of **** clown masks, and wanted to take them all away.

A once-in-lifetime opportunity, if Gu Manyao or Zhao Lei break through to the super state in the future, they need to go to the third floor, and they also need the **** clown mask. At this moment, take as many as possible, it will save a lot of trouble.

The masks of thirty or forty **** clowns were completely rolled up by him. No matter how light his movements were, some slight noises could not be avoided.

Hearing this sound, the lost person seemed to be awakened, and his whole body trembled, and a large number of translucent tentacles immediately appeared in the half of the melted body.

Wang Xuan almost thought it was going to attack him and was about to fight back, but calmly he restrained himself, and immediately realized that the lost man was not trying to attack him, those translucent tentacles were just waving unconsciously.

"This lost person really has no consciousness, is it just an empty shell? It only lives by instinct? But what is its instinct? Judging from its current reaction, it does not take the initiative to attack people, so many clowns in **** Killed by it, it should be the **** clown who took the initiative to attack it..."

While thinking about it, Wang Xuan retracted the four metal tentacles, and quickly moved the thirty or forty **** clown masks in front of him, then opened the Xumi mustard space and put all these masks in.

After all the masks were put in, Wang Xuan let out a sigh of relief and began to move quietly again. It would be perfect if he could leave quietly without disturbing it.

Step by step, Wang Xuan slowly backed away, staring at the lost person. If the other party had an abnormality, he was ready to throw a flame spar to block the other party, and turned around and ran away.

I don't want him until he quietly moved out of the stone gate. The lost person was only slowly turning his body in the face of his movement. He seemed to know his existence, but he never showed an attacking posture.

After leaving the stone gate, he found that the lost person also followed him slowly to the stone gate.

"What's wrong with this guy..."

Wang Xuan had a headache, so he could only move slowly in the direction of his return, to see if the lost person would walk out of the stone gate.

When it moved to the side of the stone gate, a large amount of translucent material seemed to swell in the half of the melted body, and tentacles protruded from it, sticking to the stone gate on one side, these tentacles seemed to have life, along the stone gate and The walls wriggled, and a large amount of viscous liquid flowed down.

Watching the changes in its body, Wang Xuan began to speed up slowly, and soon the distance between the two sides reached more than ten meters. Seeing that the lost person seemed to be interested in the stone gate and the wall, a large amount of translucent material squirmed out of his body, only in a short time, half of the stone gate was covered.

Without any hesitation, Wang Xuan immediately turned around, ran with all his strength, and quickly rushed out thirty or forty meters away. When he looked back and saw that the lost man still ignored him, he was studying Shimen. Run towards the exit of the Hell Tower.

He ran all the way without encountering **** clowns or fallen ones again. At his current speed, he soon reached the exit. Wan Qianying, Xu Jian, Gongyang Xuan, Huang Qingzhi and Tang Ruoyu were all waiting for him here. When he appeared, all five were a little excited.

"Have you got it?" Xu Jian hurriedly asked.

Wang Xuan nodded towards him.

"Go." Seeing this, Wan Qianying immediately followed the entrance **** and climbed up.

The six people filed out from the slope, returned to the entrance cave, and then walked out of the **** tower, and when they saw the 100-meter-high sky outside, they let out a long sigh of relief.

"The six clown masks are ready, and we can finally go to the third floor. It's really not easy." Xu Jian sighed.

Huang Qingzhi sighed and said, "It's a pity Old Joe."

Xu Jian hurriedly said, "How is it, did you alert the lost person?"

Wang Xuan smiled and said: "Fortunately, I didn't disturb it, it was a near miss, so the defense crystal is useless."

While talking, he took out the three defense crystals Gong Yang Xuan had just given, and gave them back to him.

Gong Yangxuan was slightly startled, showed a shy smile, and took it over.

Wan Qianying opened the storage belt, took out an intermediate storage belt, and said, "This is what Qiao Jingping left behind. What do you guys think?"

Huang Qingzhi said: "What else can we do, take out all the things and divide them into six parts, one for each of us, so it's not like returning these things to the Justice League, right?"

Hearing what Huang Qingzhi said, Wan Qianying nodded slightly and agreed, then opened the storage belt and poured out the contents.

As the leader of the Justice League, Qiao Jingping has a lot of supplies in his storage belt. In addition to daily necessities, the main ones are high-grade nutrient solution, explosive crystal, smoke crystal, water of physical strength and water of healing.

Although Qiao Jingping is the leader of the Justice League, there are only two defense crystals in total, which shows the preciousness of this crystal.

Wang Xuan distributed 20 medium-sized crystal scales, 3 bottles of primary stamina water, 2 bottles of primary healing water, 5 flame spar, 1 defense crystal, and a ghost helmet that he specially wanted.

The ghost helmet that Qiao Jingping was wearing had been damaged, but he still had a spare one in his storage belt. Wang Xuan just lacked a ghost helmet. Now that he has a ghost helmet, he has a ghost suit, which is complete.

Putting on the ghost helmet, all the increased attribute capabilities of this ghost equipment have been increased to 29%.

After dividing Qiao Jingping's relics, the six of them mounted the mechanical beast again and began to return to Insect Town.

Along the way, they were attacked by swarms of insects from time to time. Fortunately, the six people were powerful, and these insects could only harass them, but could not threaten them.

When they returned to Insect Town, it was getting late. Seeing that it was getting late, Wan Qianying decided to rest in Insect Town tonight and set off for the third-layer world tomorrow morning.

Everyone agreed. After all, where the No. 9 elevator leads to the third layer of the world, everyone has no idea. It is safer to go up during the day.

Wang Xuan returned to the place where he lived, but Gu Manyao, Zhao Lei and others still did not come back. They were silent all night. The next morning, he arrived at the No. 9 elevator early. Xu Jian was the first to arrive earlier than him.

After that, Wan Qianying, Gongyangxuan, Huang Qingzhi and Tang Ruoyu all came.

After a night's rest, everyone was full of energy, and everyone looked full of eyes and full of energy.

Wan Qianying nodded towards the crowd, and then opened the door of the No. 9 elevator.

The six people filed in, and Wan Qianying pressed the button on the third floor.

The elevator door closed, then vibrated slightly, and went up. When the slight vibration stopped, the elevator door opened, and a white curtain of light appeared in front of everyone.

With the previous experience, everyone was holding a **** clown mask in their hands. Wan Qianying took a deep breath and was about to be the first to go out. Gong Yangxuan suddenly stepped forward and walked in first.

Wan Qianying understood that Gongyang Xuan was afraid of danger outside. He was able to control the glass mirror and possessed powerful defenses, so he was the first to try the danger.

Watching Gongyangxuan's body melt into the light curtain and disappear, Wan Qianying walked in immediately.

Then Xu Jian and Huang Qingzhi entered one after another. Wang Xuan glanced at Tang Ruoyu and saw that she didn't move. This was to let himself go out first, so he also took the **** clown mask and walked out.

As he passed through the light curtain, he immediately sensed a message.

"Hell clown mask exchange for access to the third floor pass... to obtain permanent access to the third floor..."

Wang Xuan felt that the **** clown mask he was holding on his right hand had disappeared. He had already passed through the light curtain and stepped out of the elevator. Now he finally had the qualification to enter and exit the third floor at any time.

Tang Ruoyu was the last one, but she pressed the button on the fourth floor, but there was no response to the button. She frowned and walked out through the light curtain.

The six people passed through the light curtain and walked out of the elevator. The elevator door at the back closed silently. Everyone was watching the scene around them, and their faces showed incredible shock.

Wang Xuan raised his head and looked at the sky, the expression on his face was even more shocked than when he saw the ghost car bird and the white tiger fighting.

Around them, there are ten glass columns that reach the sky, and there are ten elevators in each glass column, and the elevator they just took is one of them.

Each of these ten glass cylinders is more than a few hundred meters high, and the sky above seems to have collapsed and shattered. A behemoth revealed the tip of an iceberg from the shattered and collapsed sky, pressing on the end of these glass cylinders, cutting them off. live.

Wang Xuan stared blankly at the behemoth, how it looked like a building, like a building as big as the sky, and it was broken from it. He even vaguely saw a huge floor-to-ceiling window above, saw the spacious balcony, and saw the broken The thick walls appeared from the shattered sky, pressing on the ten glass cylinders, as if the ten glass cylinders supported the huge building, preventing it from falling completely.

"What the **** is this!" Although Huang Qingzhi was the leader of the dynasty and a super-powerful person, he couldn't help but exclaimed at the moment.

Everyone can see that this is definitely not the previous No. 8 safe area. Although it is surrounded by towering trees, there are no five major cities such as Xuancheng and Rakshasa City, and there are no independent parties of various sizes. The power to go out.

"What is that thing that looks like a building? It's like falling from the sky, but it's supported by these ten glass pillars... It's not really a building, is it?" Xu Jian's face was extremely ugly. With an uncertain look, she looked at Wan Qianying, hoping that she could give herself an answer.

Among their leaders, Wan Qianying has the most extensive knowledge, which is why they trust Wan Qianying more.

Wan Qianying murmured: "There must be something we can't imagine happened here, Xu Jian, didn't you say that you used the elevator before, and then the elevator was attacked, and they fell to the third underground floor?"

"Yes, that has something to do with this?"

Wan Qianying nodded and said: "If I guessed correctly, it is possible that not only the No. 8 security area where our five major cities are located, but also the area here is attacked, it may be the building-like thing above it. If it was pressed down, it caused the elevator to malfunction, and the damage to the No. 8 safe area may be more serious, and this should be regarded as the No. 9 safe area, which is relatively better, at least these elevators should still be able to operate."

Xu Jian said: "If this is the case, the glass columns and the buildings above are so obvious, no matter how far away people from the five major cities are, they should be able to see them from a distance."

"Yes, maybe they'll find it here soon."

Hearing what Wan Qianying said, Xu Jian let out a soft sigh.

"There is of course a premise...that they are still alive."

Wan Qianying's words made Xu Jian's heart sink, and Huang Qingzhi cried out: "Boss Wan, what do you mean by that?"

Wan Qianying was wearing a mask, so everyone couldn't see her expression, but she could vaguely see the movement in her eyes, she was in a very uneasy mood and looked a little irritable.

"I don't know what happened at that time, nor what the building above the tip of the iceberg is... But since the No. 8 elevator is damaged, we can probably guess that the five major cities must have suffered a lot. Serious damage, the best case is that the elevator there is damaged, but the five major cities are not affected..."

"The worst case is... the five major cities have also been affected, and already..."

Wan Qianying didn't say any more, but everyone's heart sank, and they understood what she wanted to say.

"Impossible...impossible..." Huang Qingzhi murmured.

"I also hope it's impossible. I'm just talking about the best and worst possibilities. No matter what the real situation is, we must be prepared for the worst." Wan Qianying said, Taking a deep breath, she made herself seem calmer.

"Then what do we do next?" Xu Jian looked at Wan Qianying.

Gongyang Xuandao, who had been silent for a while, said, "The most important thing now should be to find the five major cities."

Wan Qianying said: "Yes, we need to determine the location of the five major cities. As long as the five major cities are found, the elders and the others will worry about the collapse of the sky."

"It shouldn't be difficult to determine the exact locations of the five major cities." Xu Jian said while taking out a crystal and said, "This is an intermediate-level tracking crystal, which I also obtained by accident. The primary-level tracking crystal can only track two crystals. The residual aura within fourteen hours, this intermediate-level tracking aura can be traced even if it is left behind three or four days ago. Wang Xuanda and I visited Xuancheng the day before yesterday, and we must have left our aura there, although it has passed It's been three or four days, but it should still be tracked."

He said that as soon as he activated the intermediate tracking crystal, a layer of white light appeared on the tracking crystal.

Wang Xuan also has two tracking crystals, but they are elementary and can only track the residual breath within 24 hours.

This kind of mid-level is very rare~www.mtlnovel.com~ Among the leaders, only Xu Jian got this one.

Xu Jian held the intermediate tracking crystal, and soon dense spider web-like cracks appeared on the surface. This intermediate tracking crystal was one-time use, and it would shatter completely after each tracking.

At this moment, he was tracking the aura that he had left in this world three or four days ago, and he kept receiving information from the tracking crystal in his mind. The cracks on the surface of the crystal became more and more obvious, and the sound of clap was incessant. Suddenly, the crystal cracked. Completely shattered.

Xu Jian looked at the broken tracking crystal in his hand and murmured: "How is it possible, the intermediate tracking crystal, how can it be completely broken and still can't track the slightest breath I left in Xuancheng three or four days ago? This makes no sense? ..."

Just now, he fully activated the special ability to track the crystal, but he did not track it until the crystal was completely shattered.

When everyone heard this, they looked at each other in dismay, Wan Qianying said, "If they can't be traced, unless Xuancheng has..."

"Impossible." Xu Jian stopped drinking immediately, preventing Wan Qianying from continuing, and said solemnly, "I didn't just leave a breath in Xuancheng. That area no longer exists, otherwise it would be

impossible to track it, and the only possibility is that there is some force here that interferes with the tracking of the tracking crystal."

Huang Qingzhi nodded and said: "Yes, this possibility is more likely, now it's troublesome, even this intermediate tracking crystal is invalid, how can we determine the orientation of the five major cities."

Wang Xuan opened his eyes of fear and wanted to sense the power of fear in the distance. There are a large number of human beings gathered in the five major cities. As long as some of them are afraid, he can sense the fear and determine the location.

Chapter 207

In the eyes of his fear, he felt that the four leaders around him had fear in their hearts. On the contrary, Tang Ruoyu's mentality was relatively calm, and there was no strong fear, and the power of fear around him seemed to exist in all directions. , and it seems that there is no, and the location cannot be specifically determined.

Even the Eye of Fear was ineffective. Wang Xuan could only put it away, stretched out his hand, and stroked the glass cylinder behind him. He found that the surface was not slippery. He originally wanted to climb up the glass cylinder. If you look far, you may be able to find something, and even move up to climb a few hundred meters to see the mind of the building that shows the tip of the iceberg in the air.

But this glass cylinder is too smooth to be damaged, and there is nowhere to focus, and there is no place to use strength. Unless it is a bird with wings, it cannot climb up even with their strength.

Wang Xuan just had this idea, and suddenly noticed a black spot in the sky in the distance. The black spot came quickly, and he quickly saw that it was an iron-winged eagle owl.

When everyone saw this iron-winged eagle owl, they immediately stood against the glass column. They were all afraid of this iron-winged eagle owl flying in the sky.

"It's the iron-winged eagle owl. This guy's strength is not inferior to that of a medium super-powerful, and he can fly in the air, which is very difficult to deal with. The most troublesome thing is that it will attract its companions. If you see it, you should avoid it. Alright." Huang Qingyi explained to Wang Xuan and Tang Ruoyu while standing still against the glass column.

"As long as he's standing still against a big tree or a wall or a rock or something, it's hard for this guy to spot us because he has poor eyesight and is only sensitive to things that move."

As Huang Qingzhi was speaking, the iron-winged eagle seemed to be attracted by the behemoth in the corner of the sky, and approached upwards.

Everyone showed a look of attention, watching the iron-winged eagle quickly rush to the junction of the ten glass columns and the huge building. At this moment, an incredible scene appeared.

This iron-winged eagle suddenly became like the shattered space, and the body merged into it, becoming a part of the shattered space.

This scene is very strange. The iron-winged eagle owl is like a painting, and it suddenly shatters into many pieces. It is permanently fixed on the void and no longer moves.

Seeing this strange scene, everyone felt chills on their backs and felt a kind of creepy feeling.

Looking at each other, they saw a trace of fear on each other's faces. Wang Xuan's eyes of fear felt the deepest, and immediately felt a strong fear energy in the bodies of the people around him.

"Who can tell me... what the **** is going on?" Huang Qingzhi raised his head and murmured.

The shy look on Gong Yangxuan's face also disappeared, it became solemn, and his hands were slowly rubbed together.

Wang Xuan looked at Tang Ruoyu.

Even several leaders felt deep fear, but Tang Ruoyu's fear energy was much weaker, which meant that she felt far less fear of what she saw in front of her than these leaders.

Tang Ruoyu seemed to know that Wang Xuan was looking at her, so he tilted his head slightly and glanced at him.

Four eyes exchanged, the two sides quickly avoided.

Wan Qianying was still calm and said, "No matter what, the most important thing now is to find a way to find the five major cities. Now there are signs that something incomprehensible must have happened here, and we don't have time to slow down here. Researched."

Xu Jian snorted, looked around, and walked towards the glass column, saying, "Since tracking the crystal is ineffective, let's find a way to see if we can climb up the glass column, of course not too close to the top, as long as you can climb It is enough to be taller than the surrounding trees, the surrounding trees are too high, blocking our view..."

As he spoke, he showed six animal arms, grabbed the glass cylinder, and wanted to climb up, but found that the glass cylinder was very smooth, and no matter how strong he was, he couldn't root on it, and he couldn't climb up at all.

Wang Xuan said: "This glass column is too slippery to climb up, so I can only find a big tree to try." , followed behind him.

Wang Xuan soon saw that on the edge of the ten glass cylinders, there were rune stone carvings on the ground, forming a circle, and the ten round glass cylinders were surrounded. According to Xu Jian and the others, this place belonged to No. In the area, it is said that there are monsters who want to approach here, and these rune stone carvings will play a role in protecting this place.

In the area protected by the rune stone carvings, there is no grass on the ground, but outside the protection circle of the rune stone carvings, there are weeds one meter high on the ground, and all around are densely packed with towering trees tens of meters high. The line of sight is blocked, and the situation in the distance cannot be seen at all.

Wang Xuan picked a tree that seemed to be the tallest in the surrounding area, at least 40 to 50 meters high, stretched out the metal tentacles, extended up to the limit of seven meters, and then plunged into the trunk, with the help of the power of the metal tentacles, he quickly go up.

Xu Jian showed six animal arms, like a six-clawed humanoid spider, climbing up the tree.

With the help of two metal tentacles, Wang Xuan alternated up and down. From the eyes of the following people, he seemed to be hanging in the void, rising straight up, like flying on the ground, while Xu Jian moved his six arms in unison, climbing like an ape. Climbing, the speed is not much slower than Wang Xuan, and the two of them quickly reached the top of the tree canopy.

The other four stayed under the tree, looking around from time to time, hoping to find something.

Wang Xuan stood on the canopy of the tree, climbed high and looked into the distance, looking into the distance, slightly startled.

Only at this time did he discover that in the depths of the forest in the extreme distance, there was a sky shattered from it. The sky shattered there was far more serious than theirs, and the extent of the spread was at least ten times that of here. In the shattered space, half a behemoth that looked like a giant ship appeared.

It was too far apart, and Wang Xuan couldn't describe how huge this giant ship was. The towering tree with a height of tens of meters below was almost negligible compared to this giant. Appeared, fell straight down, and plunged straight into the forest below, because it was too far away to see the destruction of the forest below.

"Wang Xuan, is that... is that a fallen aircraft carrier?" There was a faint trembling in Xu Jian's voice.

The scene they saw from afar was so shocking that they almost felt suffocated.

Wang Xuan murmured: "It looks like a super luxurious cruise ship, but it's too huge, I'm afraid it's ten times bigger than the largest aircraft carrier on earth, and the broken mid-air is at least 1000 meters above the ground. The ship fell from there, but could not see the end and the end, and this kilometer was just a part of its true form..."

Xu Jian took a deep breath, barely suppressing the shock and fear of the unknown, and said with some difficulty: "Wang Xuan, what are these things? What happened a few days ago? The giant ship that has fallen, I am now beginning to doubt... whether the five major cities are still there..."

Facing the building above his head showing the tip of the iceberg and the giant ship that seemed to have fallen from the Broken Void in the distance, he felt a sense of powerless despair in his heart, even if all the super-powers of the five major cities united, so what? Can you fight against this power beyond imagination?

Xu Jian's faith was shaken.

Wang Xuan was much calmer than him. After all, he had personally seen the existence represented by the Book of Giants, which made his endurance now surpass that of Xu Jian. He silently wrote down the direction of the giant ship in his heart, and then quickly moved towards it. Down.

"Brother Jian, come down."

Hearing Wang Xuan's voice, Xu Jian shuddered smartly, and then he followed him and slid down the thick tree trunk.

Falling to the ground, Wan Qianying hurriedly stepped forward to ask.

"How is it, have you found anything?"

Wang Xuan repeated what he had just seen, then stretched out his hand and pointed: "It should be in that direction, we can start there, if nothing happens, maybe there is the No. 8 safe area, just because this giant ship fell, Smashed the elevator there, so elevator No. 8 can no longer come up."

Wan Qianying and Huang Qingzhi were shocked when they heard it. After that, they couldn't help but climb up one after another, wanting to see it with their own eyes.

Xu Jian leaned against the tree trunk, gasping for breath.

Wang Xuan silently observed the surrounding situation to prevent accidents.

After Wan Qianying and the other four came down, Wang Xuan saw the expressions on their faces. Except for Tang Ruoyu who was barely looking better, the other three looked ugly as if they had seen a ghost.

"Wan Qianying, what do you say? Do you think the five major cities are still there?" Xu Jian looked at her.

Wan Qianying thought for a while before saying: "As Wang Xuan said just now, there should be the No. 8 safe area, because the giant ship fell and smashed the No. 8 safe area. On the bright side, the giant ship just smashed the area there. Elevators and glass columns, while the five major cities are in the forest outside the safe zone, should not be affected."

She paused for a while and continued: "I just took a closer look at the behemoth suspected of being a giant ship. Its shape is indeed very similar to a ship. It appeared from mid-air, and the bow fell down. It was this ship that appeared in mid-air. The body is the largest, but the bow down is relatively small, so looking at it this way, the area that the bow can hit should not be large, and there is a high possibility that the five major cities were not hit and damaged."

Hearing Wan Qianying's analysis, Wang Xuan glanced at her and thought that these leaders believed in her and listened to her words, which really made sense. He also saw the giant ship in the distance, but he didn't think so much as she thought. .

"And you should have noticed a detail, that is, the ship looks like it fell from the broken sky, and the sky seems to be missing a hole, which can support the ship and not fall down completely, then we can

completely. Suppose that the hull of the ship was stuck in the gap in the sky because it was too large and could not fall out. If this was the case, the bow of the ship might not have touched the ground. It was damaged, so the No. 8 elevator just couldn't go to the third floor, but it continued to run down, not completely destroyed."

After listening to Wan Qianying's analysis, everyone's mentality became much more stable. Huang Qingzhi said, "Anyway, we at least know the direction now. We can go there and see what's going on."

Wan Qianying nodded and said: "Yes, no matter how much analysis there is, it is better to see it with your own eyes and determine what is going on there, and then we will make the next step."

The others had no objection, and soon summoned their respective mechanical beasts to determine the direction in which the giant ship fell. The six of them began to ride the mechanical beasts, shuttle through the vast and boundless virgin forest, and set off towards the distance.

Wan Qianying took the lead, Gongyangxuan had powerful defensive means, followed by Tang Ruoyu, Xu Jian and Huang Qingzhi on both sides.

Wang Xuan was the strongest, but he fell to the back of the team.

Except for Xiaojiao, the other five mechanical beasts are all rushing with all their strength, and Xiaojiao can keep up with their speed as long as they are not in a hurry.

The six mechanical beasts are like six arrows from the string, stepping on weeds one meter high, bypassing the trees and bushes, and flying towards the distance.

Suddenly, a strange roar came from the distant sky.

Wan Qianying hurriedly raised her head and immediately shouted, "No, Iron Winged Demon Owl, everyone stand by the tree!"

Wang Xuan looked up and saw several iron-winged demon owls appearing in the sky, looking at the direction they were flying, they were coming towards them.

Apparently they ran all the way, and the high speed movement alerted them.

Everyone did not want to be entangled with these iron-winged demon owls, and they all rode the mechanical beasts to stop, close to the nearby big tree, and quiet down.

These big trees are dozens of meters high, with a giant canopy above them. Each big tree is so thick that it needs several people or even ten people to hug each other. Compared with these big trees, everyone is as small as a few small ants.

In just a short period of time, at least a dozen iron-winged demon owls gathered above and began to rotate above, apparently trying to determine the target below.

Wang Xuan narrowed his eyes slightly and saw that there were black shadows appearing in the distance. Obviously, more iron-winged demon owls were gathering here.

An iron-winged demon owl, with the strength to match the super-moderate powerhouse, is considered the real air overlord in this third-layer world. The most terrifying thing is that they act in groups, which are very difficult to deal with. Once provoked, they are almost immortal. endlessly.

When people like Wan Qianying and Xu Jian met, they would choose to avoid them as much as possible.

Wang Xuan rode Xiaojiao, close to a big tree, and Tang Ruoyu rode the mechanical giant tiger standing in front of him.

Wang Xuan looked at her back, and then raised his head to see that the iron-winged demon owls hovering in the sky were approaching twenty.

Although he didn't know where the danger came from, he still unfolded his ghost wings in an instant to protect his back, and the four metal tentacles on his right hand extended out to protect the front and the top of his head.

At the same moment, a few green shadows suddenly dropped from the top of the tree around him. It was just a few green vines, like a few giant pythons. They descended as fast as lightning, one wrapped around Tang Ruoyu's neck, and the other two were wrapped around each other. Her arms lifted her up in the air.

When the incident happened suddenly, Tang Ruoyu did not have the instinctive early warning ability of Wang Xuan, and he was caught off guard and did not even resist at all.

When her neck was entangled, she knew that it was not good. She wanted to resist, and reached out to break the ivy that was entangled around her neck. Her arms were also entangled, and the person was already suspended, and she could not breathe immediately.

Everyone was taken aback, Wang Xuan reacted quickly, and with a wave of his right hand, the four metal tentacles volleyed out at a faster speed.

There was a crisp sound, and the ivy hanging from Tang Ruoyu's neck was snapped off in an instant. Green juice splashed out of it. A two-meter-long giant sword appeared in Tang Ruoyu's right hand, and spun around in the air. The two vines holding her arms were cut off, and the white tiger lying on the giant sword rose into the air, turning into a white tiger three or four meters long, climbing and leaping along the towering tree, making a sound like The sound of cicadas sounded, and everyone saw a green monster bulging above a branch.

The monster's body is like a green caterpillar, climbing on the thick branch above, looking up from the bottom, because it is blocked by the branch, it is difficult to find it.

From both sides of its body, there are tentacles that look like ivy, with four on each side. Usually these ivy tentacles are wrapped around the branches. Everyone seems to think they are ordinary ivy. They don't pay attention at all, and no one knows. This is the fearsome weapon it uses to catch its prey.

The eight ivy tentacles on its body were cut off by Wang Xuan's metal tentacles. Tang Ruoyu cut off two of them and landed on the back of the mechanical giant tiger below. The white tiger she released flew up the tree trunk and rushed in the air , I want to tear this green monster to pieces.

Suddenly, ivy tentacles appeared one by one, and frantically beat the white tiger that came up.

The white tiger stretched out its tiger claws and grabbed a few in a row, but the dozen or so ivy tentacles were madly pulled out, and it couldn't stand it, and finally fell down, turned into a white rainbow light, and returned to Tang Ruoyu's giant sword superior.

A false alarm~www.mtlnovel.com~ Tang Ruoyu's face was a little pale. The six people saw that on the big tree they were leaning against, a root of ivy tentacles suddenly appeared and hung down from the sky. , all these green vines were hanging down, there were hundreds or thousands of them, and all of them were attacked.

No one could have imagined that the towering trees around here were actually covered with such green monsters, almost every branch, and the number was so numerous that the scalp was numb, and they were dormant before, until this moment, everyone They broke into their territory and stopped before they suddenly attacked.

Wang Xuan was also attacked by more than a dozen ivy tentacles above him in an instant. He opened the eye of the illustrated book at the same moment and captured the information of this monster.

"Name: Persistent vine, Race: Plant, Dangerous degree: ★★★★★★ (six stars), Perennial vine is a plant that likes to parasitize in the bodies of butterfly and moth larvae, and develop with such larvae As a symbiont, the seeds of the perennial vine will take root in the larvae, affecting the thinking that controls them, causing them to slowly fibrosis throughout the body and evolve into such special life forms between plants and animals. They are omnivorous. Creatures, attached to trees, can usually feed on tree sap. When a prey approaches, they will suddenly attack, relying on the eight perennial vines that grow out to hunt their prey. They have no teeth and cannot gnaw and shred their prey. When preying on prey, it will rely on the liquid secreted from the mouthparts to anesthetize the prey and slowly melt the prey and swallow it. Many prey are still alive when they are preyed on by them, but they can only watch their bodies melt and eat, and they eat very slowly. , a large prey, it may take a week or even half a month to be completely digested and killed by them."

Sensing this information, Wang Xuan's scalp felt numb.

Chapter 208

If caught by this kind of perpetual vine, it would be worse than death in the end, and I felt extremely disgusted with this kind of life, and the four metal tentacles controlled by the right hand volleyed out.

The crisp sound of "pop, pop" was incessant, and more than a dozen green vines hanging down were drawn and broken one by one, and a lot of green juice flowed and splashed.

The strength of a perennial vine is about the same as an ordinary powerhouse who has just broken through and grown into a super state. There are hundreds of thousands of perennial vines parasitic on the trees in this area. resist.

Wan Qianying raised her right hand, and white flames kept popping up. Her ability was just right to restrain this kind of perpetual vine. As long as it was contaminated with white flames, the perennial vine immediately burned. This place turned into a sea of fire, and a large number of perennial vines twisted wildly, turning into fire vines.

Nearly 20 iron-winged demon owls hovering in the void, let out a strange howl, and suddenly swooped down.

"Not good—" Wan Qianying was not afraid of the perpetual vines, but was afraid of the iron-winged demon owl in the sky.

Gong Yangxuan raised his right hand, revealing pieces of glass mirrors, sealing the sky above the six people's heads, wanting to defend against the attack of the iron-winged demon owl, but did not want these iron-winged demon owls who fell down to not attack them at all, but pounced around. Those towering trees that have not been swallowed by the flames, two eagle claws like steel hooks grabbed the head and tail of the perennial vine lying on the branch, and the sharp beak pecked on the back of the perennial vine, tearing it apart. Kaisu Shengteng's body took out a fist-sized mass of snow-white like jade, swallowed it into his mouth, and then threw himself at the second longevity vine.

The strength of this old vine is not weak, and the eight ivy tentacles it controls are attacking wildly. Even the super-powerful have to deal with it carefully, but after the jade-like substance in the body is taken away, it immediately seems to have lost its life essence. The tentacles of the ivy immediately drooped down softly and stopped moving.

Nearly twenty iron-winged demon owls all rushed down, madly rushing to eat the living vines, and observing closely, one could feel that the iron-winged demon owl was huge in size, with its wings spread out to seven or eight meters, and the whole body was like feathers. Made of steel, the entanglement of the ivy tentacles of the perennial vines can't hurt them at all, and their steel beaks and iron claws are so sharp that they can easily tear the perennial vines.

Just like the restraint between natural enemies, no matter how many these perennial vines are, they will have no power to resist when they encounter these iron-winged eagle owls.

"Let's go!" Seeing that all the hanging ivy tentacles of the perpetual vines were stretched out above, they wanted to resist the iron-winged eagle owls who counterattacked, and this group of iron-winged eagle owls were attracted by the perennial vines, it was their good chance to leave.

Wan Qianying let out a shout, and was busy riding the mechanical giant bear, rushing towards the distance.

The others followed, and the six mechanical beasts ran with all their strength, and quickly rushed out of this area where a large number of perennial vines were parasitized on the trees.

Taking advantage of the time when the iron-winged owls were attracted by the vines, everyone rode the mechanical beasts all the way. Ten minutes later, they were blocked by a green wall.

Wan Qianying, who took the lead, made the giant mechanical bear slow down, and soon stopped in front of the green wall.

Others also stopped.

Wang Xuan saw that the green wall was about fifteen meters high, and the surface was covered with green ivy plants. Because the surrounding trees were very lush, which affected the sight, everyone could not see how wide the wall was.

"This should be an ancient ruin. Should I go around and ignore it, or go in and have a look?" Xu Jian seemed familiar with the green wall in front of him, but there was a hint of surprise in his eyes.

Huang Qingzhi said: "This ancient ruin looks very big. Since you have encountered it, you must not miss it."

Seeing Huang Qingzhi looking at the wall covered with green plants, Wang Xuan asked with excitement, "What is this ancient ruin?"

Huang Qingzhi glanced at him and said: "I don't know how to explain it, I don't know the reason anyway, that is, there are many buildings submerged in plants hidden in this virgin forest, we call them ancient ruins, which means it may be a building left over from ancient times or something, including the predecessors of the five major cities are actually five ancient ruins."

Xu Jian replied: "Yes, there are many such ancient ruins in the No. 8 safe area, but basically they have been excavated. I never thought we would encounter one here. It seems that this No. 9 safe area there should also be many ancient ruins around, and the one we encountered is very large, almost no smaller than the five major cities."

Wang Xuan said: "There are treasures hidden in these ancient ruins?" Seeing that they were so excited, they could temporarily stop going to the five major cities and stay here. There is only one possibility. There must be huge benefits in these ancient ruins. is fatal.

"Yes, if it is an undiscovered ancient relic, there is a high probability that there are treasures hidden in heaven and earth. The bigger the ancient relic, the greater the benefits. We were lucky this time, and we came across such a huge ancient relic. , whether it can break through the medium super state, maybe rely on it." The more Huang Qingzhi said, the more excited he became, and he even forgot about the drastic changes in the third-layer world.

Wan Qianying nodded and said: "Although it is important to go to the five major cities, the accident in the No. 8 safe area was also three or four days ago. We are not in a hurry at this time. Let's take a look at the ancient ruins."

While talking, he turned over and got off the mechanical giant bear. With a move with his right hand, the mechanical giant bear turned into a rainbow light, merged into her chest, followed by the mechanical shell, and extended along her full set of ghost equipment. The outside of the suit forms a layer of mechanical shell protection.

Others have also entered a state of integration, even Wang Xuan is no exception.

"Everyone, be careful. Although this ancient ruin has great opportunities, it is also dangerous. If you are not careful, you may lose your life."

Wan Qianying came to the wall, stretched out her hands, grabbed the two vines above, and began to climb up.

With six hands, she easily climbed to the high wall, and when she climbed to the wall, Wan Qianying raised her hand to signal everyone not to act rashly. She stood on the high wall and carefully looked at the situation inside.

This ancient ruin is very huge, like an ancient city. The length of this wall is about three or four kilometers. In the ancient city, there are a large number of buildings of varying heights, but now they are all covered by plants, and some ground even grow a lot of. The towering trees, and now only the outlines of the green plants covered, can barely make out the appearance of these buildings.

A large number of vine plants are intertwined with each other, like giant nets stacked one after another, almost covering the place, and there is no place for everyone to go down.

"It's a little troublesome, it looks like it's too old, there are too many plants here, we have to clear a way first." Wan Qianying frowned.

"This is simple, you just need to burn these plants with flames." Huang Qingzhi expressed his thoughts.

Wan Qianying glared at him and said, "It's not difficult to burn these plants with fire, but I'm afraid that the ancient ruins will also be destroyed. Do you want a ruin?"

Huang Qingzhi was speechless by her words.

Xu Jian said: "Although it is a bit troublesome, the good thing is that no outsiders have come here. We are the first."

On one side, four animal arms appeared from behind, together with his own arms, he jumped up and down first.

There are dense ivy below, he reached out and grabbed it, pulling the ivy hard and falling down.

"It's up to me to clean up these plants." Huang Qingzhi smiled slightly, stretched out his right hand, a rune appeared on his palm, the rune rotated, and his right hand waved downwards.

Wind blades of different sizes flew out one after another.

The sound of "chichichi" could not be heard, and a large number of ivy plants crisscrossed below immediately broke off. In terms of cleaning speed, it was indeed far faster than Xu Jian.

"Let's do it too. First, clear a place to stay below." Wan Qianying jumped down after saying that, opened the storage belt at the same time, and took out two steel knives, holding one in each hand, towards the Cut off the vine plants on one side.

Tang Ruoyu showed a two-meter giant blade and swung it away. Like Wan Qianying, he jumped down and chopped down.

Everyone took action, Wang Xuan showed ghost wings, disassembled them, and turned them into steel feathers as sharp as knives. He controlled these steel feathers and cut them towards the surrounding vines.

The four metal tentacles stretched out, entangling the four longest steel feathers among them, using them as swords, swung them away, and swept them away, and the ivy immediately broke.

The six people shot together, and soon cut down the surrounding vines and a piece of shrubs below, clearing a place where the six people could stand.

Wang Xuan was very curious about what kind of treasures were hidden in these ancient ruins, which could make these leaders so excited.

Although the six of them stood on the ground, they were surrounded by dense vine plants. Wan Qianying held a knife in both hands and slashed while walking forward, trying to cut a path here.

Wang Xuan saw that her target was the central area of the ancient ruins. Huang Qingzhi cooperated with her and kept sending wind blades flying forward.

Wang Xuan followed behind, with four metal tentacles holding Steel Feather, but he didn't need to shoot, so he protected it around to prevent sudden danger.

He kept slashing like this and went deeper. Ten minutes later, Wan Qianying and Huang Qingzhi were tired and retired to rest. Tang Ruoyu and Xu Jian stepped forward to replace them. Xu Jian took the double sword that Wan Qianying gave him and cooperated with the four animal arms, faster than Wan Qianying.

Finally, Xu Jian stopped, wiped the sweat on his forehead, and looked up at the front.

At this moment, they have penetrated deep into the central area of the ancient ruins. In front of them, there is a building that looks like a pagoda. It is about tens of meters high. It is also the tallest building in the entire ancient ruins. At this moment, its surface is also climbing. It is full of various green plants, including white, yellow, red, and purple flowers of various colors.

"It's really quiet and weird here. I thought it would be dangerous, but I didn't expect to see a monster here." Huang Qingzhi looked around with a strange look on his face.

Wan Qianying's eyes flashed slightly and said, "This is the place, first clean up the plants here."

While talking, he took the initiative to step forward. This time, everyone took action together to clean up the plants covered on the surface of the dozens of meters in front of the building. A tower-shaped building formed by stacking slate.

Wang Xuan doesn't know what this building is. It looks a bit like a tower, but it is very different from the towers he has seen before. There are no doors and windows, but it looks like a tower, which is indescribably weird. .

"Sure enough, it is a sealing altar. If there is no accident, there must be that one hidden here, and considering the scale, it is not small." Wan Qianying tapped these bluestone slabs around carefully, listening carefully to the sounds coming from inside. , Soon she identified a bluestone slab, and Wang Xuan also heard it. When the bluestone slab was tapped, there was an empty sound inside, and there were slight signs of activity.

Wan Qianying first signaled everyone to stay away, then inserted the knife into the gap beside the bluestone slab, and carefully dug out the bluestone slab.

As the bluestone slab was dug out, there was a faint black gas inside. Wan Qianying hurriedly stepped back and said, "This is corpse gas, everyone be careful, don't inhale it."

The crowd had already distanced themselves, but when they saw this, they took a few steps back.

Wan Qianying looked at Wang Xuan and said, "Wang Xuan, your hatching beast can stretch far away. You can take off all the bluestone slabs around it according to the order I said. Remember not to approach it, so as not to inhale the corpse gas."

Wang Xuan nodded, extended the four metal tentacles to seven meters away, and began to carefully remove the surrounding bluestone slabs one by one according to the order that Wan Qianying said.

These bluestone slabs are stacked very solidly, and it is difficult for everyone to destroy them, but they can be taken off piece by piece according to the order that Wan Qianying said. Wang Xuan admires Wan Qianying more and more, and she knows a lot of things.

As more and more bluestone slabs were taken down, corpse gas continued to emerge from it, and everyone held their breath and left a distance.

It was not until one person was allowed to enter and exit that Wan Qianying asked Wang Xuan to stop.

After waiting for a while, it was confirmed that there was no more corpse gas inside, and a few people slowly approached.

"There is a corpse gas, is there a lot of corpses buried here?" Wang Xuan followed Wan Qianying with a hint of doubt and entered slowly.

Wan Qianying held an illuminating crystal in her hand, which glowed brightly, and was the first to walk in.

The interior space of this tower-shaped building is not small, with a diameter of more than ten meters. With the light of the lighting crystal in Wan Qianying's hand, Wang Xuan saw at least a dozen corpses piled up inside at a glance.

These are not human corpses, but all kinds of monster corpses, large and small, each one seems to be air-dried, skin-wrapped with bones, like a dozen skeleton mummified corpses.

Wang Xuan looked at these piled up monster mummified corpses, and was slightly taken aback. The treasures they were looking for were these things?

"A dozen...so many..." Huang Qingzhi saw it, and his eyes immediately showed a look of surprise.

Wan Qianying looked back at everyone and said, "It's our luck, so let's start now, each of us pick one, don't fight each other, do you agree?" Xu Jian and Huang Qingzhi both nodded immediately in agreement.

Wang Xuan said, "What is the purpose of these corpses?"

Wan Qianying explained: "These corpses that have turned into mummified corpses are born of the same origin as the hatching beasts we have. I don't know what the specific origins are. In short, this altar that looks like a tower-shaped building is really The function is to seal them here. After they die, their life essence will not flow away. Because they are sealed in the body, these life essences will form crystals in their bodies over time. We only need to cut open their bodies and take out With this crystallization, we can obtain the life essence left by them and strengthen our hatching beasts."

Wang Xuan's heart moved slightly. If what she said was true, are the crystals in these dried corpses somewhat similar to the primordial liquid in the hatching corpse?

Tang Ruoyu suddenly said: "I know, they come from outside this building."

After saying this, everyone looked at her together.

"From outside the building? How do you know?" Huang Qingzhi looked at her with a strange look.

Tang Ruoyu's lips moved slightly, but she didn't seem to know what to say. Seeing this, Wan Qianying said, "Forget it, everyone will first choose a corpse and take the crystals."

As she spoke, she walked to a monster mummified corpse with a human-like body, withered head and wings.

On the monster's withered head, there are also a pair of horns, like a deformed monster made of several creatures. Wan Qianying was holding a knife and was about to start, when suddenly the monster's pair of horns moved slightly~www. mtlnovel.com~ The incident happened suddenly, she was startled, she stepped back, and felt impossible, this must be her eyesight, after all, these are mummified corpses that have been dead for some unknown number of years, how could they still move.

"This is not right..." Huang Qingzhi suddenly shouted loudly, and pointed at a corpse in front of him, his face changed: "Look, this corpse is recovering!"

Needless to say Huang Qingzhi, other people also noticed that Wang Xuan was standing in front of the mummified corpse of another monster at the moment. It just turned into a mummified corpse and looked like a skeleton. At this moment, the dry skin turned out to be inflated and began to recover.

What was even more amazing was that the hair that had already fallen off began to grow at a speed visible to the naked eye.

The dozens of mummified corpses in front of them are recovering at a terrifying speed.

No one understood what happened. This scene was like a corpse transformation. Wan Qianying suddenly gritted her teeth and shouted: "No matter, kill them and cut their bodies apart!"

As he spoke, he held his knife and stabbed the dead-headed monster in front of him, wanting to cut open its body and take out the crystal of life in it.

Although the knife was barely inserted, with Wan Qianying's strength, it was difficult to cut it open. The monster's corpse was as hard as steel, and suddenly his arm tightened. The monster suddenly stretched out a hand and grabbed her holding the knife. arm.

Knowing that something was wrong, Wan Qianying was very decisive. As soon as her right hand was loosened, a flame rose up and devoured the monster in an instant.

Since this monster has become alive again, I am afraid that the crystals in its body cannot be obtained, so the only way is to burn it first.

Chapter 209

Wang Xuan and Wan Qianying had the same experience. Facing the mummified corpse of the monster in front of him, he was about to attack. He didn't want the other party's withered body to swell up like air, and even the hair on his body was growing and changing. To be bright.

He immediately turned his right hand into a giant arm of beast, and punched the monster's face, trying to smash it.

The skin of this human face, which was originally like a skeleton and mummified, is recovering its youth. It was originally black and wrinkled like tree bark. Now it is plump, and the flesh is regenerated. The skin has changed from the original black to white and tender, with wrinkles all over the face. is disappearing.

This scene looks very strange. How terrifying the blow of Wang Xuan's giant arm of the beast is, he can only hear a snort. The half-recovered face is shattered like a watermelon, and there is a large amount of blood-like translucent liquid sprayed inside. came out.

Obviously, the regeneration of flesh and blood is not so fast. There is more of this translucent liquid inside. It is this translucent liquid that fills their dry bodies and makes their appearance plump.

More than a dozen mummified corpses came to life in a short period of time, and a terrifying whistling sounded. Wang Xuan had just smashed the head of the monster with a tiger body and a human head in front of him, and was attacked by another monster that turned over.

This monster has the body of a horse, with stripes of tiger stripes growing on the surface, and a head like a rooster. At this moment, it has become as white as jade, and its tail is raised high, but it is red as blood, and its surface is like a faint flame. .

When Wang Xuan was hit, he felt as if he was being crushed by a tank. The force of the collision was outrageous. He let out a groan. Although he was in a fit state and had three layers of defense, he couldn't stand it, and he rolled instantly. He flew out, hit the wall with his back again, opened his mouth, and spat out a mouthful of blood.

"Go back!" Wan Qianying screamed while emitting a white flame, rushing towards the exit.

As powerful as Wang Xuan, he was knocked flying in an instant. The power of these dozen or so resurrected monsters was unimaginable.

Tang Ruoyu stood behind the crowd, closest to the exit, and rushed out first.

Followed by Wan Qianying.

Gong Yangxuan made a move with his right hand, and glass mirrors appeared, protecting them in front of everyone.

The clanging sound of "Korcha" and "Korcha" could be heard endlessly, and the glass mirror he summoned shattered continuously.

Wang Xuan fell heavily to the ground, and the monster with the head of a chicken and the body of a horse stepped on the ground, soared into the air, then fell, and stepped down towards him.

The ghost wings appeared and covered it up. Wang Xuan rolled on the ground, and a harsh voice sounded. The ghost wings were stepped on by the monster's horse hoofs. Wang Xuan felt that the ghost wings were crushed by a mountain, which was unbearable.

The energy of the blue crystal scales exploded, the surface of the ghost wing seemed to be illuminated with blue light, and the four metal tentacles extended out, and each metal tentacle lit up with blue light. He exerted his power to the limit, which was beyond The super-moderate power entangled the monster's hooves and pulled it hard.

The monster was pulled and slipped on the ghost wings, and flew out sideways, just hitting another monster that was swallowed by Wan Qianying's flames.

The two monsters collided together like a rolling gourd.

Wang Xuan stood up, only to see that Wan Qianying had already retreated, Huang Qingzhi had just retreated to the door, and more than a dozen monsters were resurrected together, the space here became narrow and crowded, everyone could not use it, and the exit was repeated every time. Only one person was allowed to enter and exit. As soon as Huang Qingzhi fled to the door, no one else could escape.

Xu Jian was pinned down by a bull-headed monster. He stretched out his six arms to block it. The monster's **** mouth opened up and bit down on his head.

Xu Jian's strength is not as strong as this monster, his body is suppressed, he just feels like his internal organs are about to spurt blood, and he can't resist it at all.

Seeing that he was in danger, Wang Xuan let out a low roar, the ghost wings behind him slammed into the air, a hurricane blew up, kicked his feet, and almost flew out into the air, showing the giant arms of the beast, and his fists were thrown together. With a bang, it hit the bull-headed monster.

This pair of fists struck with full force, and immediately blasted a huge hole in the belly of the bull-headed monster. A large amount of blood-like translucent liquid splashed out, blasting the monster into the air, hitting one side of the wall, making a huge rumbling sound. .

Wang Xuan had already opened the Eye of the Pokédex, but unfortunately all the information captured was unknown. The Eye of the Pokédex did not store any information about the resurrected mummies in front of him.

"Come out!" Wan Qianying yelled at everyone inside with a face full of anxiety, and took out several crystals in her hands. As soon as everyone escaped, she immediately threw them out.

While Wang Xuan blasted the bull-headed monster, a metal tentacle wrapped around Xu Jian on the ground and threw him towards the exit.

Xu Jian hit Huang Qingzhi at the exit, and the two rolled out together.

Now only Wang Xuan and Gongyang Xuan are left here.

Although all the glass mirrors launched by Gongyang Xuan were smashed, he bought a line of time for everyone and blocked these resurrected monsters for a few seconds.

While summoning the glass mirror, he hurriedly retreated in the direction of the exit.

Wang Xuan blasted the bull-headed monster, threw Xu Jian, and was attacked again.

This time, three monsters attacked him together. From Wang Xuan's point of view, the power of each of these monsters seemed to exceed the super-moderate level, stronger than leaders like Xu Jian and Huang Qingzhi.

Moreover, this is that they have not fully recovered to their peak state. If they fully recovered, how powerful would the original power be?

Wang Xuan knew he couldn't resist, but fortunately he was well prepared. When he threw Xu Jian, he knew that he would definitely be attacked. He took out a defensive crystal in his left hand and quickly crushed it.

No matter how strong these three monsters were, the light curtain that appeared from the defense crystal still blocked them for a second.

The retreating Gongyang Xuan also activated the defense crystal at the same time, blocking the attacking from above with a flame shrouded in flames all over his body.

This big withered monster is still surrounded by the flames launched by Wan Qianying, but the flames obviously cannot burn it to death in a short time.

Using the defensive crystal to block for a second, Gongyang Xuan stepped back and stepped out from the door.

Wang Xuan also moved quickly to the door at the same time, followed by taking out two flame spar with his left hand and threw it at it.

The two flame spar exploded into thousands of flames, and the place was turned into a sea of fire with a bang, and even Wang Xuan himself was affected.

But he was already prepared, the energy shield, the mechanical shell, the ghost suit, the triple defense can resist for a moment, followed Gong Yang Xuan, and successfully retreated.

Seeing that they all retreated, Wan Qianying immediately activated the defense crystal, used the light curtain to seal the entrance, and blocked a monster that was rushing over.

Gong Yangxuan activated the glass mirror and blocked the exit to prevent them from escaping.

Wan Qianying threw several crystals in her hand.

These are explosion crystals mixed with two flame spar.

Huang Qingzhi and Xu Jian, who fell out, got up. They were afraid that their power would not be enough, so they each took out several explosive crystals and threw them in together.

Only a loud bang was heard, so many explosive crystals exploded together, and the ground shook slightly. These monsters, which were completely swallowed by the flames, let out an earth-shattering roar, and were trapped in this small tower-shaped building. This kind of building The object is very sturdy and specially made, just to trap these powerful monsters, so many explosive crystals cannot destroy them.

Because of the narrow space, a violent explosion occurred inside. The power of the explosion could not be spread, and it was completely compressed inside. The power of the explosion to be endured inside was already incalculable. live.

The crowd activated three defensive crystals and Gongyangxuan's glass mirror in a row to block the exit, which barely blocked this round of explosions.

Through the light curtain, Wang Xuan saw the monsters roaring inside, and saw the bodies of these monsters being blown apart.

The six people outside all had ugly expressions on their faces. Originally, everyone thought they were lucky and met a great opportunity, but they never expected such a change.

After this round of big explosions, these monsters were blown to pieces, and then swallowed up by the flames, obviously they couldn't die any longer.

Everyone just breathed a sigh of relief, when Wang Xuan suddenly discovered that the power of the explosion was too strong. Although this tower-shaped building was specially made, it could not fully withstand it. There were a lot of cracks on the surface. The tower-shaped altar suddenly collapsed.

Everyone was taken aback, and they all stepped back and dodged.

The dust was flying, and the tower-shaped sealing altar collapsed and collapsed. The flames burning inside were not completely extinguished. It burned from the ruins of the collapsed sealing altar, and a large number of flames splashed around and fell on the surrounding plants.

Many of these plants are withered vines, which are flammable materials. After they caught fire, they burned violently, and the fire suddenly expanded.

The six people felt the heat wave coming from all around and retreated one after another.

At this moment, the ground was shaking slightly, and there seemed to be a gap under the ruins of the collapsed altar, and a large number of broken bluestones and soil collapsed and fell.

"What's going on?" Xu Jian immediately stopped, his eyes slightly opened, showing a look of surprise.

There is also a similar sealing altar in the center of Xuancheng, but it is not as big as the one in front of him, but the monster sealed in the sealing altar has long been taken away from the body's life crystal and no longer exists.

Xu Jian also heard about it. It is said that the elder who opened the altar was the elder of Xuancheng, so the elder's strength was unfathomable. The hatching beast was finally strong enough to turn him back, but he was too strong to fight against the hatching beast, maintaining the current status. This half-life state.

In the virgin forest around the No. 8 safe area, there are many buildings of different sizes, and most of them have similar sealing altars. Of course, the scale of sealing altars is also different. Some sealing altars may contain a monster. There may be two, but it is very rare to have four or five.

In front of this altar, there are more than a dozen sealed at one time, which is the first time I have heard of it, and it is even more unheard of that the monsters in the altar can be resurrected and wake up.

The six people who retreated stopped and watched the ruins of the altar falling down. With the altar as the center, the surrounding ground was continuously collapsing down, and thick stone pillars and beams appeared on the collapsed ground below. The beams are engraved with talisman patterns, it seems that there is another cave below the altar.

Even though he was as knowledgeable as Wan Qianying, he opened his eyes wide, showing a hint of surprise.

At this moment, there were translucent flesh-like and mucus-like objects climbing up along the beams of these stone pillars. Wang Xuan suddenly realized that the dozens of mummified monsters in the altar could suddenly be resurrected, all because there was something underneath. Fucking shit.

Just now, he saw this translucent liquid from the bodies of those monsters, and it was these liquids that made them come alive.

In just a short period of time, these translucent liquids rose like tides and swelled upwards, forming a huge translucent sphere. At this moment, the stone pillars erected from below and the beams suddenly glowed. .

The rays of light intertwined, forming a giant net, which contained the translucent fleshy liquid that was about to expand.

This translucent fleshy liquid struggled violently, and the ground was shaking slightly. I could imagine how terrifying the struggling force was, but no matter how hard it struggled, the light net completely sealed it, preventing it from escaping.

"So it is..." Wan Qianying muttered to herself.

Everyone is not stupid, and they already understand when they see this. The reason why this altar is very special is that an unimaginable ancient object is sealed under it. It is the one who just controlled the resurrection of those monsters. The purpose is to use them to help themselves escape. It was a pity that no matter how hard it struggled, the prison formed by the stone pillars and beams below was unbreakable, and it could not escape.

"We blew up the altar, should it be all right?" Seeing this, Huang Qingzhi spoke in a low voice, with a slight chill in his tone.

Although he didn't know what was sealed at the bottom, seeing the appearance of the translucent fleshy liquid struggling violently, there was an instinctive fear.

The prison formed by the stone pillars and the stone beams above is as big as a house, and the translucent fleshy liquid that expands from it is also the size of a house, and what is the real face of the bottom, no one knows. Dare to approach, unable to witness.

"I don't know yet, let's get out of here early." Wan Qianying's tone was very solemn, watching the light net appearing on the beams of the stone pillars being stretched to the limit, all the stone pillars and beams were shaking slightly, the surrounding sand and stones and Some of the remaining ruins of the sealed altar kept falling, and she felt uneasy.

The flames burning on the surrounding plants gradually became more intense. Wang Xuan suddenly found that in the falling altar ruins, there were fiery red rays of light. Liquid sucked in.

Immediately afterwards, among the burning plants around, there was a similar fiery red rainbow current, which was being absorbed by this fleshy liquid.

He suddenly realized that the existence imprisoned in the ground was actually absorbing the life essence of the surrounding plants and the monsters that had just been blown up.

It seems that it can't directly absorb the life essence of these plants or monsters. It must draw the life energy that will flow back to nature when the life of these monsters or plants dies.

Therefore, when the surrounding plants are covered with flames and burn, it can draw.

"No, everyone quickly put out the flames around, this thing can absorb the life essence of dead plants!"

When Wang Xuan woke up, he immediately started drinking heavily. He followed and rushed towards the nearby plants. Metal tentacles appeared and pulled them out, trying to put out the burning plant.

Everyone is not stupid, and after Wang Xuan reminded them, they all came to their senses.

Although I don't know what this imprisoned person is, it must be extremely terrifying and terrifying. Now that it absorbs the essence of plants and life around it, and continues to strengthen its power, it is possible to break through the seal. .

"Quick, cut off all the vines that are on fire, and don't let the burning range expand!" Wan Qianying looked at the rising flames around, and understood that it was impossible to put it out. The only way was to clean up the plants on the edge of the burning area. , in order to effectively stop the fire from continuing to expand.

The six of them shot together, and the ghost wings behind Wang Xuan appeared, from which four sharp steel feathers were separated and wrapped with four metal tentacles. Relying on these four steel feathers, they extended out, cut off the burning plants, and entangled them again. With these burning plants, they piled up in the central area, surrounding this burning area, and clearing a circle of open space without burning objects on the periphery.

The six of them shot together and went all out, and soon cleared a circle of open space around the surrounding area to block the flames from continuing to spread to the periphery. At this moment, the flames had completely swallowed the sealing altar, and the translucent fleshy liquid struggled violently in the flames. , Everyone watched as the stone pillars below were shaking, the stone beams covered in a checkerboard were also shaking, and the sand and stones were falling, and it seemed that they might be destroyed at any time.

Making sure that the fire wouldn't spread, Wan Qianying watched the stone pillar and beam tremble, and suddenly there was a "snap" sound, and in the light net that sealed the translucent fleshy liquid, a light suddenly broke with a crisp sound. .

Seeing this, Wan Qianying was horrified, she dared to hesitate, and immediately said, "Let's get out of here."

As she spoke, she released the fusion, and summoned her mechanical giant bear again~www.mtlnovel.com~ She turned over and rode on it, and immediately rushed into the distance.

Everyone did everything they could. Seeing that the light was broken, this monster was very likely to escape, and they would be the first to die. No matter how dared to stay, they disbanded their fusions, summoned mechanical beasts, and followed Wan Qianying towards them. Rush into the distance.

There was another crisp sound, and the second ray of light broke in the light net seal.

Wang Xuan rode Xiaojiao and couldn't help but turn his head, but saw that the translucent monster had stretched the light into a semicircle, and between the two broken lights, a translucent liquid extended outwards, like in this semicircle. Another sarcoma grows on the fleshy fluid of his body, which is indescribably terrifying.

Everyone returned along the original road, and soon returned to the city wall. The six jumped up and climbed the ivy on the city wall. The six mechanical beasts followed closely and climbed over the city wall. Everyone rode on the mechanical beast again. Start running along the wall.

Far away, everyone could no longer hear the movement in the central area of the ancient ruins, and they did not know whether the unknown monster broke free from the prison and rushed out.

After running for a few kilometers all the way, Wan Qianying slowed down until the ancient ruins were far away, and everyone stopped one after another, looking at each other, they all saw the expressions on each other's faces, and they had more seasons in their hearts.

"What kind of monster do you think it is?" Huang Qingzhi panted: "I have heard of ancient ruins, and I heard that people who found them have benefited, but today is the first time I have seen this situation, and we almost explained it all. there."

Xu Jian said: "This ancient ruin is too weird. By the way, Miss Tang, you said that the dozen mummified corpses in the altar came from outside the building? How did you know?"

When he asked this, everyone focused their attention on Tang Ruoyu's face.

Chapter 210

Tang Ruoyu saw that everyone was looking at her, so she said: "Those mummified corpses are the same as the hatching beasts we have. I have heard people say that the ancient ruins here all fell from the sky, and they must be imprisoned in the ancient ruins. It's also from outside..."

When she said this, she looked up at the sky and said, "It's like the building where the tip of the iceberg appeared in the broken sky, like the giant ship that fell from the sky..."

Huang Qingzhi nodded and said, "I've heard of this before. It is said that the ancient ruins in this primeval forest are indeed not products of this world. Have you heard the legend of the tree of origin? Later, because of the power of the tree of origin, these The ancient ruins are covered with plants."

"I feel that this third-layer world is becoming more and more weird, and I have a very ominous premonition." Xu Jian sighed softly.

Wang Xuan felt the same as Xu Jian. He had assimilated a magical beast, and his sensitivity was the crown of everyone. From the moment he entered this third-layer world, he felt like a lead stone was faintly pressing in his heart, and there was always a sense of impending disaster.

But what was the reason for this feeling, he couldn't say for sure.

"After all, we are still too weak. The hatching beast has grown to a super state. Although we are the most powerful in Worm Town, we are unable to do anything in this third-layer world." Huang Qingzhi shook his head. Medium, become super-high-class, and the result is empty and happy, and now I can only hope that the monsters in the ground will not get out of trouble, otherwise there will only be a disaster."

Although he didn't know what the monster in the ground was, he had no doubts that it was terrifying.

Xu Jian said: "It's useless to worry now, we still need to find the five major cities earlier."

Wan Qianying said: "You wait for me, I'll see the direction to the five major cities now."

She fled with everyone just now, away from the ancient ruins, and now needs to re-determine the direction.

She climbed up a big tree beside her. Xu Jian was afraid that she would be in danger alone, so he followed her up.

The two climbed to the canopy, looked into the distance, and quickly slipped down the trunk again.

"Go, go here." Wan Qianying determined the direction, got on the mechanical giant bear again, and took the lead in rushing out.

The other five followed closely behind on the mechanical beast, and Wang Xuan still took the initiative to cut off the back.

This time, the crowd ran for less than two kilometers before they were attacked.

On the towering trees, among the lush canopies like opening giant umbrellas, strange creatures suddenly appeared. These creatures looked like apes, with strange plants of green algae growing on their bodies, and growing on their heads. Pieces of green leaves, without legs, are replaced by a dozen root-like tentacles with sucker-like organs on the surface of the tentacles.

They rely on these tentacles to walk on towering trees and are more agile than apes.

They are usually hidden in the canopy of trees, and it is difficult to find them without careful observation. Until now when everyone broke into their domain, they were alarmed and jumped down from the top, attacking the six people below.

Wang Xuan opened the eyes of the illustrated book and immediately captured their information.

"Name: Dryad, Race: Tree Clan, Danger: ★★★★★★ (six stars), Dryads are a special race that parasitizes on big trees, they can use more than a dozen tentacles to **** on the big tree. They are very lazy. They find a suitable position on the big tree, they can be adsorbed on it for a long time without moving, and the energy loss is very small, so the nutrition of a big tree can be Feeding a lot of tree monsters, some tree monsters will slowly assimilate with the big tree as time goes by. At this time, the big tree will acquire some characteristics of the tree monster and evolve from a plant to a tree family. Although the tree monster likes to be quiet They are lazy, but don't like to be disturbed. Once they wake up, they will launch crazy revenge on the intruders who break into their realm. They have agile speed, strong forelimbs, and sharp claws. In groups of them, it will be very difficult to deal with, if anyone inadvertently breaks into the Dryad Domain, it will be very difficult for them to leave alive."

After capturing the information about the tree demons, Wang Xuan looked up at the towering tree dozens of meters above. At least a dozen tree demons jumped down and attacked them.

With a frown, four metal tentacles stretched out with two crisp snaps, and the two tree demons that fell above him were drawn and flew out sideways.

"Don't fight, follow me!" Wan Qianying shouted, and while letting the mechanical giant bear continue to run forward, white lights popped out one after another.

These white lights flew out, hit the tree demons that jumped down, and immediately exploded, rising white flames, and the cold fire was raging, swallowing the tree demons that jumped down.

The tree demon devoured by the flames screamed, and was not instantly burnt to coke, but with flames all over its body, madly rushed towards Wan Qianying and Xu Jian behind her.

"Looking for death!" Xu Jian showed his six beast arms, volleyed out, and with a bang, he punched a tree demon that had just been on fire and rolled in the volley and flew out.

Gongyang Xuan summoned a glass mirror that appeared above, and many tree demons who jumped down jumped on the glass mirror and were blocked by it.

Wan Qianying, who was rushing the fastest, was quickly blocked. In a short time, she saw tree demons appearing on the tree canopy in all directions, jumping down and down, and at least hundreds of them appeared in the blink of an eye.

"So much?" Her scalp tingled.

Although the tree demon is only equivalent to an ordinary super-powerful, one-on-one, and its strength is not as good as them, but there are too many people at this moment, and everyone's face has changed.

It was unknown how many tree demons were in front of them. The giant mechanical bear that Wan Qianying was riding was blocked by the tree demon, and she was attacked by several tree demons at the same time.

"Go away!" Wan Qianying shouted fiercely, stretched out her right hand, and a flame inside it stretched out and turned into a flaming python. The flaming python swept out sideways, swept the several tree demons that came up to it, and hit it. They fell out one after another.

Tang Ruoyu clasped the giant sword in his hands, waved it out, and then activated the white tiger attached to it.

The white tiger jumped out of the giant sword and transformed into a white tiger three or four meters long. The tiger claws stuck out and tore a tree demon apart, but it was also touched by several tree demons at the same time. His feet were entangled, and he couldn't resist it, and exploded from it.

The white tiger was shattered, Tang Ruoyu groaned, and was shaken, a trace of blood oozing from the corner of his mouth.

After Wang Xuan broke, he waved the four metal tentacles continuously, and all the tree demons that rushed up from behind were hit and swept away by him with the metal tentacles, but the number of tree demons was too large, and it was almost impossible for him to resist.

"Fast back, everyone!" Wan Qianying made a decisive decision. Seeing hundreds of tree demons appearing among the trees in front of them, she immediately understood that they couldn't get through. Once they were completely surrounded by these tree demons, they would all die. Here, the only way now is to step back and exit the territory where the dryad is located.

The left hand quickly took out two flame spar and threw it out, immediately bursting out a large group of flames, igniting the ground.

"Huang Qingzhi!" Wan Qianying shouted while throwing the flame spar.

Knowing her intentions, Huang Qingzhi shouted, "Come on!" A gust of wind was launched, and it blew towards these rising flames. The wind assisted the fire, and immediately burned into a sea of fire, like a huge wall of fire, which appeared in front of it. Hundreds of dryads blocked.

Most of the tree demons showed a trace of fear and stopped moving forward. Only a few tree demons who were not afraid of death would rush over with flames.

Everyone was busy changing directions and rushing towards the circuit. The number of tree demons that appeared on the circuit was relatively small. Everyone only needed to rush out of the territory where the tree monster was located, and it should be safe.

This time it was Wang Xuan who opened the way in front of him, and the four metal tentacles lit up with a blue light. He activated the energy of the blue crystal scales and cooperated with the four metal tentacles. The metal tentacles fused with the energy of the blue crystal scales struck with all their strength.

He could only hear the clanging sound of "pop, pop", as long as they were hit by the metal tentacles, these tree demons immediately opened their skins and burst open, and white scales appeared one after another, submerging into his right hand.

Each white scale contains powerful energy. In Wang Xuan's body, it is divided into two parts, half of which is swallowed by the white light in his right hand, and the other half is absorbed by the ghost wings on his back.

The energy absorbed by Ghost Wing was concentrated on the left side of his back, where a small steel feather grew. As the endless energy gathered, this small steel feather grew and became tough. Two steel feathers appeared.

Wang Xuan understood that as long as he absorbed enough energy, his second ghost wing could grow.

With so many tree demons in front of him, he was the most suitable target to hunt. At this moment, he was a little reluctant to flee immediately.

Everyone was a little surprised when they saw Wang Xuan's performance.

This kind of tree demon, which is comparable to the ordinary super state, was killed by him in a single blow.

Of course, they can also see that Wang Xuan is doing his best, it seems simple, but actually controlling these four metal tentacles, he exerted his power to the limit, and added the energy of the blue crystal scales, this lethality has been A powerhouse who has broken through the super-moderate level.

Such power is huge, but it consumes a lot of physical energy. No matter how powerful the existence is, it cannot last for long in the full attack.

"Wang Xuan, let's go!" Xu Jian couldn't help but cried out anxiously when he saw Wang Xuan take the initiative to rush into the group of tree demons.

Wang Xuan was not anxious, he had stored forty bottles of primary physical strength water in his Xumi mustard seed space, and it was ready to come in handy now.

"You go first, I'll break it later!" Wang Xuan calmly waved the four metal tentacles that were seven meters long, almost completely blocking a group of tree demons surging from behind, and let everyone flee first.

One by one, the tree demons were blasted by the powerful metal tentacles. Wang Xuan felt that the energy in his body was surging. Half of the energy absorbed was absorbed by the beasts, and the other half was continuously concentrated on the left back. In a short period of time. Three tiny jet-black steel feathers had grown from there.

Wan Qianying rode the mechanical giant bear and ran back wildly, and she was secretly horrified when she saw that Wang Xuan had used her own strength to block the dozens of tree demons from behind.

Further back, groups of tree demons bypassed the raging sea of fire formed by the flame spar, surging from both sides. These are hundreds of tree demons.

"Wang Xuan, don't be in love!" Wan Qianying turned around and saw that Wang Xuan was still fighting with those tree demons, so she couldn't help crying.

She understood that once these thousands of tree demons were completely surrounded, no matter how strong Wang Xuan was, he would definitely not be able to resist.

Wang Xuan replied, Xiaojiao's speed is faster than these tree demons, and when it is really dangerous, he can ride Xiaojiao to escape, so he is not anxious.

Seeing Wan Qianying and the other five rushing to the front more than ten meters away, Wang Xuan was about to keep up when suddenly there was an earth-shattering loud bang in the distance.

This sound came from a breakthrough. Although it was far away, everyone still felt deafening. In surprise, they turned their heads and looked into the distance.

The place where the sound came from was the ancient ruins they had entered before. It was five or six kilometers away from them. The loud noise was still shocking.

Especially Wang Xuan and six people, who were worried about whether the unknown antiquities under the ancient ruins would break through the prison, and now suddenly heard the loud noise, and all changed their faces.

The tree demons who rushed up frantically also seemed to be startled by the sudden sound, and stopped one after another, looking in the direction of the ancient ruins like Wang Xuanliu.

Although it was five or six kilometers apart, Wang Xuan could still see from a distance that a translucent mass of solid-like and liquid-like substance suddenly rushed out of the ancient ruins covered with countless green plants, which looked like a mass that could Flowing translucent flesh.

This time it rose into the sky, rushing 50 to 60 meters high, surpassing many tall trees around it, so that Wang Xuan and Wan Qianying could see it.

When Wang Xuan saw the translucent liquid object rising into the sky, he understood in his heart that the unknown ancient relics imprisoned in the underground of the ancient ruins were freed.

This translucent liquid object rushed out of the height of fifty or sixty meters, and then expanded in all directions, like a giant umbrella that suddenly opened. Under the giant umbrella, a huge translucent flesh column grew. Supporting the giant umbrella to rise into the air, the six people looked like a translucent giant mushroom from a distance, slowly rising into the sky.

Soon this translucent giant mushroom grows to a height of 100 meters, and it grows bigger and bigger. The diameter of the mushroom cover on the top has reached an astonishing 100 meters. What is even more terrifying is that this mushroom is even more terrifying. The canopy seems to be slowly rotating, and in all directions, countless forest trees, flowers, vines and other plants have dazzling luminous liquids. These luminous liquids rise up and gather into a white ocean, which slowly revolves around it. The mushroom umbrella covered with gussets formed a huge white vortex.

There seems to be a suction force in the mushroom umbrella cover, which is swallowing these white light fluids in an endless stream.

The trees, flowers, and vines with white luminous liquid rising from the surface are withering and dying at a speed visible to the naked eye.

The towering tree that was full of vitality, the green leaves turned yellow and fell down, and the flowers of various colors that were in full bloom converged, turned black and withered...

A terrifying scene appeared. These plants were being deprived of their vitality. Even if Wang Xuan and others were separated by a few kilometers, they could see clearly.

Everyone gasped and felt cold all over.

The ancient artifact that was originally sealed and imprisoned in the ground can only be intercepted and obtained the essence of life when the other party is about to die and the life is gone. essence of life.

Such monsters are not comparable to them at all. Wan Qianying woke up from the shock, and immediately shouted: "Go!" Her first reaction was to escape from here first, as far as possible.

Those tree demons were also disturbed by the drastic changes in the distance, causing riots. Now they have no intention of chasing and attacking Wang Xuanliu, and there are signs that they are about to collapse.

For this unknown horror, they also felt fear.

Suddenly, in the distant forest, another gigantic creature soared into the sky, but it was a towering tree. This tree has a trunk as high as 100 meters, and the thickest part must be at least ten meters in diameter. The canopy above is lush. pole.

Not only is it much larger than the surrounding trees, but it can also move, suddenly appearing from the forest in the distance, and approaching the ancient ruins at a very fast speed.

Seeing the 100-meter giant tree that suddenly appeared, the tree demons who were about to be scattered suddenly became excited~www.mtnovel.com~ Xu Jian cried out: "Totem!"

Wang Xuan was no stranger to the 100-meter tree that suddenly appeared. He entered the third-floor world for the first time and saw it once at night. At that time, Xu Jian introduced that the 100-meter tree was actually the third floor. One of several powerful beings in the world is regarded as a totem, and this virgin forest is equal to its country.

It has a neutral attitude towards human beings. It neither hates nor likes it. As long as it does not provoke it, it will never take the initiative to attack. It is a relatively Buddhist totem.

At this moment, it suddenly came, and it approached the ancient ruins at a very fast speed, and there was a faint anger in the air.

Wang Xuan's instinct was very sensitive, and he faintly felt this emotion.

This is the emotion released by the 100-meter tree.

It's angry.

It regards this virgin forest as its own country, and this huge mushroom is madly absorbing the life essence of the surrounding forest trees and all plants. For it, this is provocation and harm.

It can never be tolerated.

Hundreds of tree demons suddenly made a faint whistling sound, like a green tide, and suddenly rushed towards the ancient ruins bravely.

Their totems appeared, and in their minds, the 100-meter tree was a god, the **** of this virgin forest, and the **** of their tree demon family.

Wan Qianying, who originally wanted to escape, couldn't help but stop the mechanical giant bear, holding the mechanical giant bear tightly with both hands, feeling indescribably nervous and excited.

Being able to see the totem appear, and possibly even fighting the unknown antiquities, such a scene is a once-in-lifetime scene, and she doesn't want to miss it anyway.
