

Last Building on Earth Chapter 216-220

Chapter 216

Popular recommendation:

"Amazing, is she...a superior combat power?" Xu Jian looked at it with a look of surprise.

Mou Xing, Su Tang and the others went down the big tree, and the eighteen people joined together and started to kill into the forest.

There are more and more tree demons, mushrooms, piranhas and perennial vines appearing all around, but they are all unstoppable. in the direction of the ship.

As they went deeper into the forest, the number of monsters blocking the crowd gradually decreased, and the pressure on the crowd was greatly reduced.

Xi Muxue rode on the mechanical beast, holding the Gatling machine gun in both hands, becoming more and more insane. The eight gun barrels as thick as arms sprayed firelight, spun rapidly, and fired bullets like a violent storm. Whether it was a tree demon or a piranha, they were all beaten into a sieve, and the impact of the burst of bullets pushed these monsters backward and volleyed backwards. She rode a mechanical beast and rushed forward, but there was no monster that could stop her.

"I really can't tell, this woman is so petite and cute, but the attack of this hatchling beast is so violent, the contrast is too strong." Wang Xuan followed behind, controlling the metal tentacles to attack, while feeling the deafening sound of machine gun shooting, thinking that the five people from "Sand Town" entered the Hell Tower to obtain five **** clown masks, and none of them were damaged. He now vaguely understands the reason.

Just because the attack of Xi Muxue among the five people was too violent, this round of bullets was strafing wildly, and ordinary monsters couldn't stand it at all.

Soon everyone went deep into the forest for about five kilometers, bypassing the ancient ruins.

There was a battle between the ancient tree totem and the unknown antiquities before. The high wall of this ancient relic was seriously damaged, including the sealing altar in the center, which was destroyed and had no value. Everyone didn't want to waste time to enter and search slowly.

Along the way, monsters will be encountered from time to time. In this primitive forest, there are various monsters hidden, and each type of monster has a different territory. Once people break into it and alarm them, they will attract their attacks.

Everyone joined forces, and the combined strength of the eighteen super-powerhouses was extremely powerful, almost invincible, crushing them all the way. After half a day, they had completely penetrated this virgin forest, and even the ten glass cylinders in the No. 9 safe area were all lost. You can't see it anymore, unless you climb to the top of the tree canopy dozens of meters high.

Everyone climbed the canopy from time to time to determine the position of the giant ship that fell from the sky in the distance, and adjust the direction at any time.

"According to the current speed, I estimate that there is hope to get close to the place where the giant ship fell before it gets dark." Yukai climbed a towering tree with a height of 40 to 50 meters, stood above, overlooking from a distance, facing the A few people around were talking.

Along with him were Wan Qianying, Mou Xing, and Wang Xuan.

Wang Xuan looked at the giant ship that fell from the height of 1,000 meters in the distance. Now it looks much clearer and bigger. Obviously, they are much closer to where they are now.

"Yes, I hope to be able to arrive before dark." Wan Qianying also had a glimmer of hope in her eyes, and then a few people slid down the trunk of the big tree.

"Everyone is tired, let's rest for a while." Yukai suggested, looking at the corpses of the giant forest wolves on the ground not far behind.

Just now they broke into the territory of a group of giant forest wolves and encountered hundreds of six-star dangerous forest giant wolves. , at least hundreds of forest giant wolves were killed, and the remaining giant wolves broke up and fled due to serious losses.

Everyone came here all the way, but also felt tired, ready to rest on the spot for a while before starting.

Several people took out the advanced nutrient solution from the storage belt and drank it.

Originally, after drinking this advanced nutrient solution, it could manage the nutrients needed for two days, but now everyone has grown to a super state, and they need more and more nutrients every day, especially in battle, the loss is more serious, this bottle of advanced nutrition The liquid is basically only needed for one day.

Wang Xuan leaned against the tree to rest, and Xiaojiao lay quietly beside him. Originally, among this group of mechanical beasts, Xiaojiao had the largest body and the strongest strength, but now the mechanical giant crocodile sitting on Muxue is not inferior to Xiaojiao. It was obviously equipped with a medium powertrain and casing. Among the eighteen mechanical beasts, her mechanical giant crocodile and Wang Xuan's little girl were the strongest.

After resting for a while, the physical energy that everyone had just lost gradually recovered. Wan Qianying stood up first. She was about to speak when her brows suddenly wrinkled.

She suddenly smelled a strong rancid odor.

Others also smelled the stench, and Wang Xuan immediately closed his breath to prevent the rancid odor from being highly poisonous.

"What kind of smell is this?" Youkai stood up, covered his nose, and said solemnly, "Everyone, hold your breath, just in case."

Wan Qianying had a vigilant look in her eyes, and kept looking around, hoping to find the source of the rancid smell.

Everyone stood up one after another, and there was a wind in the forest, and the wind carried this rancid smell like a rotting corpse.

Wan Qianying quickly determined the source of the rancid smell, which was the direction they were going to head to the five major cities.

"It came from here, but the corpses in this world will be eroded by the ground after a while, and basically there will be no corpses left to rot." Wan Qianying's voice contained a hint of doubt.

Yukai said: "Anyway, we have to go in this direction, let's go and have a look."

Xu Jian said solemnly: "Just in case, let's take a detour. No matter what the reason, we don't need to take a risk."

Youkai glanced at him, and Wang Xuan said, "Yes, we are mainly looking for the five major cities. This stench came suddenly, so it's better to avoid it."

Mou Xing and Su Tang also nodded one after another, agreeing with the detour.

Yukai smiled and said, "Okay, I respect everyone's opinion, then we'll go around."

After that, everyone rode on their mechanical beasts and began to circle to the left, trying to bypass the area where the rancid smell came from.

The speed of the mechanical beast was very fast, and everyone ran all the way to the left. Wan Qianying and You Kai, who took the lead, quickly felt that something was wrong, just because the stench was getting stronger and stronger, they originally wanted to detour to the left, but now it seems that Running towards the source of the rancid smell.

Wan Qianying hurriedly stopped and shouted, "Everyone, stop, this direction is not right!"

The crowd stopped one after another. Xu Jian covered his nose and said, "The stench is getting stronger and stronger. It seems to be coming from the front. We just turned to the left. It seems that this direction is not right."

Yukai said impatiently: "Why don't you go up and see what the **** is this monster?"

The so-called strong man has no fear, he is powerful, and he is at the bottleneck of breaking through. He is thinking about what special encounters he will have, and then he can successfully break through. They are trying to avoid abnormal places as much as possible.

Wan Qianying rode the mechanical giant bear back and said, "This smell is too abnormal, we don't need to take unnecessary risks, we should change direction."

Everyone basically agreed with her choice and followed her one after another. You Kai had no choice but to obey everyone's wishes.

Wang Xuan and Tang Ruoyu were together and mixed in the team. Tang Ruoyu had been silent all the time. Wang Xuan was not as urgent as everyone about whether he could find the five major cities. He had no sense of belonging to the five major cities.

For him, the most important thing now is to hunt down enough monsters, fully grow his second ghost wing, and at the same time let the monsters absorb enough energy to seek whether they can improve their strength again, it is best to find Tang Ruoyu. Speaking of the central city, see if the central city sells more advanced equipment.

This time everyone changed the direction and ran all the way, wanting to leave the rancid area first. Everyone covered their noses all the way, and they felt a little hard. Fortunately, the mechanical beasts were not really living creatures and did not need to breathe.

This time, after running for about three or four kilometers, everyone stopped again. Wan Qianying, who was at the front of the team, opened her eyes and looked at the ground in front of her. Yu Kai smiled coldly and said softly to herself, "It's interesting."

On the ground in front of them appeared the corpses of a pack of giant forest wolves.

These corpses are exactly the giant forest wolves they killed before. There are hundreds of them. Obviously, they ran all the way and returned to the original path, but the corpses of the hundreds of giant forest wolves showed serious signs of decay. The flesh and skin of many giant wolves were rotting, and maggots were vaguely seen wriggling in the flesh on the surface.

Now that he was getting closer, the strong rancid stench hit his forehead, and Wang Xuan felt that he was pinching his nose, but he couldn't completely stop the smell.

It hasn't been a long time since everyone killed these giant forest wolves, but the speed at which these giant forest wolves rot is a bit outrageous, which is obviously not normal.

Mu Xing, who was short and chubby, rode a mechanical beast and squeezed up, looking at the large number of rotting forest wolf corpses in front of him, he said in a loud voice, "What the **** is going on, how do these corpses rot so fast, and this The smell is not entirely from these rotten Timberwolves corpses, why does it feel like there are everywhere, is there such rotten corpses all around."

Wan Qianying looked up at the sky, then turned around again, and said, "Let's go to other places to see it and we'll understand. We don't even think about taking a detour. Let's choose the direction of the five major cities."

After speaking, she turned around and changed her direction again. This time, she chose the direction to go to the five major cities.

This time, after only running for a few hundred meters, everyone saw a large number of dead tree demon corpses on the ground in front of them. The dead tree demon corpses were severely rotted, and

a large number of white maggots were crawling inside. Even though I closed my breath, I felt a little dizzy.

"It seems that no matter which direction you go, you can't avoid it, let's go, go up and have a look." You Kai sneered, this time he ignored what Wan Qianying said, and rode directly on the mechanical beast, rushing up first.

Wan Qianying shouted softly, "Everyone, be careful!" As she spoke, she stretched out her right hand, and bursts of white light burst forth. She fired flames in succession, preparing to burn the rotting tree demon corpses in front of her, no matter how strange the corpses were. , whether it contains highly toxic, it is safest to burn these rotting corpses with a fire.

These white light bullets fell on the rotting corpses, and flames immediately rose, burning on these dryad corpses.

Several people saw what Wan Qianying meant, took out the flame spar and threw it out.

Huang Qingzhi let out a heck, stretched out his right hand, and the rune on his right palm spun, and immediately a gust of wind blew toward these flames.

The wind assisted the fire, with Wan Qianying's cold fire and the fierce flames that erupted from several flame spar, this area was quickly turned into a sea of fire, and all the rotting tree demon corpses were swallowed up by the flames.

Everyone rode on the mechanical beast, kept their bodies, bypassed this flaming sea of fire, and continued to run forward.

Although Yukai rushed the fastest and seemed reckless, in fact, he had already prepared a few times. The half-rock giant rising from his back had already appeared silently, and he was holding two defensive crystals in his left hand. In the event of a situation, he is ready to crush the defense crystal at any time.

I don't want everyone to bypass the sea of fire and safely pass through this area full of dead tree demon corpses, and there is no accident.

"Strange..." Wang Xuan frowned slightly. His magical beast instinct told him that the danger had not been lifted. Instead, there was a vague danger that seemed to accompany them all the time, but he could not find out where the danger was.

Although this rancid smell was pungent and unpleasant, it did not contain any poison, including the rotting tree demon corpse on the ground, which was also scorched by the flames, and there was no abnormality.

"It seems that this forest is far more terrifying than I thought. If it just hides some monsters like tree demons and piranhas, it's not so dangerous."

The four metal tentacles on Wang Xuan's right hand stretched out and protected him around his body, ready to deal with sudden danger at any time, but he didn't know where the danger was.

The monsters that appear are not scary, the real scary thing is not knowing where the danger is.

The crowd kept running forward, and the stench gradually faded. They seemed to have broken out of the area covered with stench, but the surrounding trees were a little unusual.

The trees in this virgin forest are all very lush, with green leaves, and they appear to be full of vitality, but at this moment, there are signs of decay on the surface of these trees.

In particular, the grass overgrown on the ground has now become withered and yellowed, drooping softly.

Yukai, who was rushing the fastest, suddenly sank and almost fell out. He was shocked to find that his mechanical beast's four hooves were caught in the withered and yellowed weeds below. The weight of him and the mechanical beast sank in an instant.

Wan Qianying, who followed closely behind, wanted to hold back the mechanical beast, and it was too late, so she rushed up, and the giant mechanical bear she was riding immediately sank and sank.

Between the large number of withered weeds in front, there was black living mud surging, and a stench suddenly erupted.

Yukai has been engrossed all the time, he reacted quickly, his mind changed suddenly, he let out a loud shout, and the rock giant on his back flew out into the air, with his arms outstretched, and blasted towards the living quagmire below.

There was a loud "bang", and the living mire blew up a large amount of living mud. With the power of this blow, he took advantage of the opportunity to press on the back of the mechanical beast, and his body flipped backwards in the air. At the same time, he summoned the mechanical beast and entered a state of fusion.

He reacted very quickly and flipped back in an instant, but Wan Qianying didn't have a reaction from him. Her mechanical giant bear suddenly fell into it. When she reacted, her feet were already in a quagmire.

Terrified, she was busy jumping up and trying to move up. This huge force acts on the back of the mechanical giant bear, causing it to be swallowed by the living mire at a faster speed, and she has strength because the mechanical giant bear is completely swallowed. Because he couldn't bear it, and his legs got stuck in the quagmire, he couldn't flip back in the air. He only stood up a few feet before falling down again.

Seeing that she was about to be swallowed by the living quagmire below with the giant mechanical bear, a metal tentacle appeared, wrapped around her waist, and dragged her to fly back, while a voice shouted: "Fit!"

Wan Qianying was not stupid, she immediately woke up, and launched a fusion with the mechanical giant bear.

The mechanical giant bear that was swallowed by the living mire turned into a rainbow light~www.mtnovel.com~ broke through the living mire and rushed up, attached to her body, and entered a state of integration with her.

It was Wang Xuan who made the sudden move.

He had been on alert all along, and the four metal tentacles were fully extended. Seeing that Wan Qianying was in danger, one of the tentacles stretched out violently, wrapped around her waist, and immediately pulled her back.

Wan Qianying was still in shock, and the others were busy drinking their mechanical beast to stop it from moving forward. In just a short time, the area of 100 meters in front was swallowed up by black living mud, and even the towering trees with a height of tens of meters began to start. Shaking, sinking down.

The crowd retreated one after another. Wang Xuan retracted the metal tentacles that wrapped around Wan Qianying's waist, and suddenly felt that Xiaogao was sinking. The originally hard ground softened and rotted into black mud at an astonishing speed.

Knowing something was wrong, Wang Xuan let out a loud shout, and the two ghost wings behind him, one large and one small, instantly opened, and they slammed into the ground, blowing a hurricane. He stood up diagonally, and the seven-meter-long metal tentacle in his right hand extended out like a javelin, and inserted it into a towering tree five meters away from him. .

At the same time, he activated the fusion, and summoned the little girl who had fallen into the quagmire, and attached it to his body.

In the blink of an eye, the ground in this area suddenly rotted and turned into a living quagmire. It was too late for everyone to escape. Everyone and the mechanical beast were sinking, and everyone was in danger of life and death in an instant.

With the help of the metal tentacles, Wang Xuan landed on one side of the big tree, and at the same time extended the other three metal tentacles, entangled Xu Jian, Huang Qingzhi, and Wan Qianying who were in danger, and then threw them towards the tree.

Chapter 217

As Xu Jian entered into the fusion with the mechanical beast, he shouted loudly. With the help of Wang Xuan, he successfully landed on a big tree. With his six arms outstretched, he looked like a humanoid spider with six claws. It fell on the trunk, and then rushed towards the canopy at a very fast speed, just because the big tree was slowly shaking and rotting, sinking into the living quagmire below.

Huang Qingzhi and Wan Qianying's reaction was similar to his, they fell to the tree trunk, and immediately rushed up at full speed.

Tang Ruoyu's strength and reaction are superior to them, and Wang Xuan's help is not needed. When she found the danger, just like Wang Xuan, she slapped the mechanical giant tiger with her left hand, and the mechanical giant tiger endured the power and accelerated to sink. , and with this strength, she rose into the air, the two-meter giant sword in her right hand appeared, and she volleyed it out.

With a snort, the giant sword was inserted into the trunk of a towering tree not far away, submerged nearly half way, and the tiger lying on it jumped out and turned into a four-meter-long white tiger. The white tiger jumped at Tang Ruoyu's feet, holding up her falling body.

Tang Ruoyu put a little on it's back, soared into the air again easily, and landed steadily on the giant sword stuck in the big tree.

Not only did Wang Xuan react in an instant, but he also saved Xu Jian, Huang Qingzhi, and Wan Qianying at the same time, but among all of them, it was not him, but Gongyang Xuan.

Gongyangxuan realized that his mechanical beast was sinking and the surroundings turned into a living quagmire. He immediately folded his hands together, fully activated his hatching beast, and summoned one glass mirror, and in an instant there were hundreds of them. Glass mirrors are laid flat on the surrounding living quagmire, allowing everyone to escape with the help of the flat glass mirrors.

Although he can only maintain a short moment, but with everyone's skills, this moment is enough.

You Kai, Gu Zijian, Sun Yaofei, Yi Wu, Mou Xing, Hao Yuantong, Xi Muxue and others stepped on the glass mirrors that were laid on the ground and rushed towards the towering tree on one side.

Although these big trees are also shaking and sinking, but these big trees are all forty or fifty meters high, even if they are completely swallowed by the living mire below, it will take some time. Big tree, escape this area that has been rotted into a living quagmire.

Gong Yangxuan also put on the glass mirror he had summoned and fell onto a big tree. He was just relieved when he heard a "boom". One of the glass mirrors he had laid on the ground suddenly suddenly rang out. Fragmented, a mass of black mud formed and shot out from the living mire below.

At this moment, Hao Yuantong among the crowd was stepping on this glass mirror and was just about to jump up. He never expected such a change. Under the shock, the black mud from below swept out and drowned him. Drag down.

"Damn it!" Hao Yuantong is not a weak person. He roared between life and death. The power of the hatching beast exploded to its limit. In his right hand, a ball of dazzling light suddenly opened, and he madly blasted the ball of light towards the bottom Go, every light ball explodes, bursting out dazzling white light, bursting with amazing power.

With the help of the reverse thrust of the explosion of the **** of light, the body that had been pulled down by the living mud suddenly rose again, and he wanted to rush towards a nearby tree.

At this moment, with a snap, a blood-red tongue sticks out from the living mud below. The blood-red tongue is covered with thorns and barbs. He licks it towards Hao Yuantong. The blood-red tongue was fully opened and retracted to the center, and Hao Yuan was swept in. With a thud, he dragged it into the living quagmire below and disappeared without a trace.

Mou Xing had just used the glass mirror and landed on a big tree not far away. When he turned his head, he saw Hao Yuantong being dragged into the living quagmire by a big blood-red tongue. He couldn't help screaming, "Hao Yuantong!"

He kept his body and ran at full speed towards the canopy above the towering tree.

Everyone understands that if they don't run away, once this place is completely rotted, everyone will die here.

Wang Xuan ran up the trunk of the tens of meters high tree. The tree was swaying and sinking. He turned his head and saw the amazing scene. The unknown monsters hidden in the living quagmire were swallowed up. In a short period of time, this area of several hundred meters was turned into a living quagmire. The quagmire area is still expanding.

All the people who fell on the trunk are running at full speed. At this time, everyone is in danger, and everyone needs to rely on their own abilities to escape.

Hao Yuantong had just been dragged into the living quagmire. Qi Yingzhi, one of the three from the "Beast Town", successfully landed on a tree. His hatched beast could turn his arms into two metal arms.

When he landed on the tree, he breathed a sigh of relief. He stretched out ten fingers, sharp as knives, and inserted them into the trunk. Using both hands and feet, he went up the trunk in front of him.

Not wanting to just rush up the tree trunk for less than ten meters, the tree shook violently, as if there was an infinite force in the living mire below pulling this towering tree.

The tree sank seven or eight meters down, Qi Yingzhi sucked in the cold air, and Zhu Han, who was climbing up faster than him, was caught off guard. The tree sank suddenly, he slipped and slipped straight down the trunk. , smashed towards Qi Yingzhi below.

Qi Yingzhi was slightly confused. Out of instinct, he immediately stabilized his body with his right hand and lifted his left hand to hold Zhu Han who had slipped down.

"Go up!" He snorted lowly and threw Zhu Hantuo up with his left arm.

He just held Zhu Han up, and he didn't want the big tree to sink a few meters down again. Originally, there was living mud under his feet. As soon as the big tree sank a few meters, he directly sank into the living mud.

Zhu Han stabilized his body again, and his heart was full of chills, but as a super strong man, he was still able to endure fear between life and death. The first reaction was to run for his life.

Qi Yingzhi, who was swallowed by the living mud, struggled below, and the living mud fluctuated violently. He stretched his head out from below, as if he wanted to speak, and suddenly made a grunt, as if being pulled by an invisible force, and was dragged in instantly. , this time he never appeared again, completely disappeared into the living mud.

In just a short blink of an eye, two super strong men disappeared into the living quagmire below.

Wang Xuan was the fastest, and with four metal tentacles, he quickly reached the crown of a big tree.

With the continuous evolution and growth, he now feels more and more that this metal tentacle is easy to use, no matter what kind of dangerous environment he encounters, this metal tentacle can handle it.

Four seven-meter-long metal tentacles wrapped around the branches above, and with a sway, they volleyed onto the canopy of another big tree.

The rotten area is getting bigger and bigger, and the towering trees are swaying and falling down continuously. Everyone runs at full speed, flying above the canopy of these big trees, and fleeing towards the periphery of the rotten area at full speed.

This kind of difference between life and death, the gap in the strength of everyone immediately appeared.

The fastest among them were Wang Xuan, You Kai, Tang Ruoyu, Mou Xing and Su Tang.

Youkai is already a super-class powerhouse, his strength has reached the bottleneck, he has already accumulated enough, and he may break through to become a real super-state top powerhouse at any time.

He uses both hands and feet, like an agile ape, constantly flying up and down the big trees, and can be distracted to help Gu Zijian, Sun Yaofei and Yi Wu, who belong to the same "ghost town", Gu Zijian almost When he fell into the living quagmire, he activated the half of the rock giant, stretched out his hand and swept him, slapped him sideways, and landed on a tree on the side, otherwise Gu Zijian would have followed Hao Yuantong and Qi Yingzhi's end.

Wang Xuan's four metal tentacles have a natural advantage in the face of this situation, especially the two ghost wings behind him. Although they can't really fly and soar in the sky, they are of great help to his soaring.

Although Mou Xing from "Sand Town" is not good-looking and has a short and fat stature, he is very secretive. All the way to this place, his performance is quite satisfactory. Jian and Wan Qianying are about the same.

It was not until this time that he showed his amazing skills. His hatching beast was similar to a sphere, about the size of a basketball. It looked like a star on the surface, and it had the color of a starry sky faintly inside.

When he was fighting before, he kept smashing the star-like ball out, and wherever it hit, it would explode, but now it seems that this is obviously just one of the abilities of his hatching beast. At this moment, he can step on it with his feet. This star-like hatching beast stagnates in the air for a short time. With this ability, he naturally does not have to be afraid of falling, and constantly flying between the big trees, the stars have been moving with him, appearing at his feet from time to time, Let him take advantage of it to fly.

Not only can he ensure his own safety, but he can also use the star ball from time to time to help Xi Muxue.

The Gatling machine gun in Xi Muxue's hand is of great power. There is basically no monster that can resist a round of strafing, but in the current situation, it is her shortcoming, and her hatching beast is useless.

Fortunately, Mou Xing helped him from time to time. Seeing that her situation was not right, Mou Xing pushed the Xingchen Ball over, so that she could use the Xingchen Ball to jump up and ensure her safety.

The last one who performed amazingly was Su Tang from "Beast Town".

Su Tang's hatching beast can turn his hands into a transparent substance. When his hands are transparent, they can stretch freely, and can even reach more than ten meters away, which is longer than the metal tentacles controlled by Wang Xuan.

Relying on these transparent hands that can be stretched freely, he easily grabbed the branches in the distance, jumped up, and swayed far between the big trees. In terms of escape speed, he even surpassed Su Tang.

After all, Wang Xuan occasionally took care of the safety of his companions when escaping, but Su Tang was not. He just wanted to escape and ensure his own safety first. Therefore, Qi Yingzhi, who was also in the "Beast Town" just now, fell and was swallowed by the living mud. It's too far, and it's too long to save.

Everyone ran along these canopies toward the distance, but found that the area around them was getting bigger and bigger, and it exceeded the speed of their rushing. After sinking, most of it was soon swallowed up by the living quagmire below, and now the crown above is less than twenty meters away from the living quagmire below.

More and more living mud began to surge, and from time to time, black mud up to tens of meters was thrown up and slapped towards the crowd, and the situation became more and more sinister.

Wang Xuan's Eye of Fear felt the intense fear emanating from everyone.

According to current trends, if this living quagmire continues to expand, none of them can escape.

There was an exclamation from the rear, Wang Xuan turned his head, and saw another black living mud rising into the sky, carrying a strong rancid smell, and slapped the few people fleeing behind.

The few people behind are Gu Zijian, Chu Dong and Wan Qianying.

Although Wan Qianying's strength is not weaker than that of Huang Qingzhi and Xu Jian, her cold fire is useless when flying between these big trees, while Xu Jian's six animal arms and the wind controlled by Huang Qingzhi are not enough. Can play a big role, so they escape faster than Wan Qianying.

Wan Qianying felt that something was wrong, and flicked out her right hand, bounced the flame towards the living mud below, and used the flame to burn the living mud below, hoping to make a difference.

Yukai just threw two explosive crystals into the distance, causing a huge explosion, but other than blasting out a large amount of living mud, it had no effect. Obviously, the explosive crystal was ineffective against the living mud.

The flame in Wan Qianying's right hand formed a huge flame python, which slammed out the living mud that was slapping at the back.

The flame python devoured this piece of living mud in an instant.

The live mud was stained with flames, and immediately burned violently, and the force of its slapping immediately weakened.

Wan Qianying understood in an instant, and immediately shouted loudly: "Quickly use the flame spar, these living muds are afraid of flames!"

Before, everyone was thinking about running away, but in the concept of everyone, this living mud is turbulent, and it can rot and swallow. No matter how you look at it, it is impossible to be afraid of flames, so you don't think about it at all.

Now that I can't escape, the situation is getting more and more sinister. Only then did You Kai try to use the explosive crystal, and Wan Qianying had a similar mentality to him, so he thought of trying to start the flame. The effect, immediately screamed in surprise and joy.

Hearing what Wan Qianying said, everyone took out their own flame spar and began to smash it towards the surging living mud below.

There are basically a lot of explosive crystals and flame spar in the storage belt of everyone. As the flame spar was thrown down, a violent flame immediately burned on the living mud, and the flame was raging. Going up, the big trees that were gradually sinking were also swallowed up, and this area immediately turned into a sea of fire.

"Everyone, be careful, don't throw it indiscriminately!" Xu Jian felt the heat wave and was busy shouting to remind everyone, and at the same time busy dodging, just now someone threw the flame spar below him, and the rushing flame almost burned him arrive.

As a large number of flames spread on the surface of these living muds, the live mud that was violently turbulent became much quieter. Everyone shuttled through these flames, trying their best to escape to the big tree that was not swallowed by the flames, all thinking about going early. escape from here.

At this moment, the burning living mud in this area suddenly sank, just like a huge black hole suddenly appeared below. It sank, and everyone just fell on the big tree, and then went down.

It happened suddenly, everyone was shocked, and they grabbed the big tree, but they found that the living mud below burned down and flowed down, showing one huge hole after another. These burning trees were instantly swallowed by the huge hole below. , the flame goes out immediately.

The wings behind Wang Xuan vibrated, but they couldn't fly up completely. His metal tentacles had nothing to borrow. All the big trees in this area were falling down, and there was no way for them to escape.

In just a short period of time, this piece of forest with a radius of at least one or two kilometers completely collapsed down to form a huge and incomparable deep pit. In this deep pit, the living mud was turbulent and continuously flowing down, showing a crisscross pattern. wall.

The living mud was running on these walls, and the stench was rotting into the sky.

As the ground continued to collapse, the sludge continued to flow down, and a huge building buried in the filth deep underground slowly emerged.

Everyone was horrified and inexplicable. No one would have expected such a change. They clinging to these big trees and sinking along the dirt, they saw a tall wall emerge from the dirt~www.mtlnovel.com~ The quick response immediately gave up the sinking tree and rushed towards these tall walls.

Wang Xuan had just stretched out his metal tentacles and put them on a wall, and was about to jump on it. Suddenly, a roar came from beside him. He looked around in surprise, but saw that about a dozen meters away from him, the ancient ghost from the "ghost town" Zijian stood up from the falling tree trunk, and just jumped up, not wanting to stick out a big blood-red tongue from the tumbling mud below.

The speed of the big tongue is too fast, Gu Zi is in the air, and he has no flying ability, how can he dodge?

In an instant, it was rolled up by the big tongue full of thorns and barbs, and it was dragged into the mud below with a bang.

Gu Zijian only let out a half-sounding scream, and the sound stopped abruptly, disappearing into the mud below.

"Zijian!" You Kai suddenly let out a roar, and the half rock giant behind him rushed down into the air with a bang, slamming into the tumbling mud below.

His reaction speed is definitely the top. Gu Zijian has just been dragged into the pollution, the rock giant slammed down, followed by blood spattering, a big blood-red tongue was hugged by the rock giant's arms, from Sludge came out.

When Wang Xuan saw this, the ghost wings on his back blew a dramatic wind and rushed towards him.

He is not entirely to save Gu Zijian, but more importantly to kill the unknown hidden in the filth, otherwise this hidden danger may threaten everyone.

Four metal tentacles protruded, extending to the limit of seven meters, chi chi chi sounded four times in a row, and inserted into the sludge.

Gongyang Xuan on the other side stretched out his right hand, and one side appeared in the glass mirror, laying it on top of it, helping Wang Xuan and You Kai to settle down.

Chapter 218

Wang Xuan placed his right foot on a glass mirror and rose into the air, with four metal tentacles entwined, instantly entangling the blood-red tongue held by the rock giant's arms.

"come out--"

With an angry shout, Wang Xuan's four metal tentacles all lit up with a blue light, and the blue crystal scales in his body exploded, pulling this huge blood-red tongue, and dragging out a behemoth from below the pollution.

This behemoth has no fixed shape, and it looks like a mass of black filth. The blood-red tongue suddenly burst with blood, but it is about to break the tongue and sink and disappear here.

Almost at the same time as the blood-red tongue was broken, Wang Xuan's left arm formed a giant arm of beast and swung it out in the air.

He was four or five meters away from the sinking ignorant and invisible thing, and the monster beast couldn't attack at all, but with the wave of his huge arm, white rays of light burst out.

The white light exploded, condensing and revealing metal parts one by one.

These metal parts with white light all over the body were combined in an instant, and there was a faint crackling sound inside, turning into a giant mechanical arm with a dazzling white light all over the body.

This arm is about two meters long, thicker than an adult's waist, and looks extremely sturdy. With Wang Xuan's arm swing, this giant mechanical arm flew out into the air, dragging a dazzling rainbow light.

The arm of the mechanical **** finally appeared.

This is the strongest blow that he can wield when he combines with Xiaojiao, gathers all the power of himself and Xiaojiao, and activates the crystal energy of the mechanical god.

There was an earth-shattering loud noise, and the mechanical god's left arm slammed into the ignorant and invisible object below, and immediately sank deep into it and disappeared, as if it disappeared into the black mud below.

After a moment of stagnation, the black mud suddenly surged and rolled violently, followed by dazzling white rainbow lights bursting out from the black mud below.

The black mud below bulged upwards, forming an instantaneous vacuum.

Wang Xuan saw the opportunity quickly, and after waving the left arm of the mechanical god, he was busy backing up, vibrating the ghost wings, waving out the metal tentacles, and jumping to the wall behind.

Yukai didn't know why, and was just about to launch the rock giant to strike again. He didn't want to suddenly expand and explode in the living mud below, and countless white rays of light almost drowned him and the rock giant.

The rock giant blocked the earth-shattering energy explosion for him and shattered immediately.

Although he was not directly impacted, he was still severely injured.

A white scale appeared and did not enter Wang Xuan's right hand. The energy contained in the white scale was extremely powerful. It entered his body and was divided into two parts. One half was swallowed by the white light in his right hand, and the other half was absorbed into his back. In the ghost wing on the left.

As this energy surged and merged into the ghost wing, there was a crunching sound from the ghost wing, like the transformation of a butterfly. The ghost wing, which was about one meter long, immediately grew to one meter one.

The further back this ghost wing is, the more energy it needs to grow. This white scale alone can make it grow from one meter to one meter. It is conceivable how powerful the energy contained in it.

This blow consumed most of Wang Xuan's physical strength. In addition to the previous physical energy loss, his physical strength was almost exhausted.

Stabilizing his body, he immediately took out a bottle of primary physical strength water and drank it.

After drinking this water of stamina, the stamina that was almost exhausted immediately recovered frantically.

When the others saw this scene, they all showed shock and looked at Wang Xuan.

The power of this blow from the Mechanic God's left arm is simply appalling, and has far surpassed the super-superior level, reaching a realm that they cannot measure.

You Kai was hit and fell out. His reaction was very fast. He immediately took out a bottle of primary healing water from his storage belt and poured it into his mouth. Can appear, after the ignorant and ignorant thing like a large amount of black mud was severely wounded by the left arm of the mechanical god, there were some rotten stumps left in it, everyone understood that Gu Zijian should never appear again.

A third victim appeared among them.

As this ignorant and ignorant thing dissipated, the black mud below surging, everyone watched the black mud around the sink sinking, and the huge building hidden underground gradually revealed its true

appearance. This is a suspected ancient city. The magnificent building was buried in the depths of the ground for unknown reasons, swallowed by living mud.

Now, as the living mud flows and disappears from below, this magnificent underground ancient city is gradually revealed.

The towering trees are sinking down the gaps between the buildings in this ancient city. The fifteen people who are still alive have now found the nearest wall to stabilize their bodies, watching the living mud that is constantly sinking around. Everyone looked embarrassed, covered in rancid filth.

Wang Xuan's eye of the illustrated book was always open, but unfortunately he couldn't capture the information of this ignorant thing. With the help of the shocking blow of the mechanical god's left arm, he defeated it, and he started to jump up and follow the blocked wall under his feet. Flying towards the edge, I want to escape from this area that has collapsed and formed a huge and incomparably deep pit.

Yukai exuded a white light all over his body. The primary healing water was effective. The injury he had just received was healing at an astonishing speed. The shattered rock giant behind him reappeared. He jumped into the air and landed on a wall. Standing still, looking down, thinking that Gu Zijian could not be rescued, and thinking of the shocking power of Wang Xuan's blow just now, this made his thoughts very incomprehensible, and there was an indescribable depression in his heart.

Suddenly, in the sinking sludge, a living creature appeared again, and there were signs of climbing and moving. This was somewhat similar to the ignorant thing that Wang Xuan had just killed, but it was not exactly the same. The ignorant thing was so huge, similar to a giant python, rolling in the filth, and suddenly slammed into a wall.

At this moment, Xi Muxue was standing on the wall. She was about to rush along the wall to the other side. The wall was hit and collapsed suddenly.

She was startled, and the clumsy and huge Gatling machine gun appeared in her right hand. She carried the machine gun and blasted towards the unknown object formed by the suspected python-like sludge that appeared below.

The eight arm-thick barrels began to rage, spinning at a high speed, the barrels spewed fire, and the roaring sound was like thunder, and a shuttle of powerful bullets poured down like a violent storm, slamming down.

At the same moment, Mu Xing waved his right hand, and a star ball appeared and landed at Xi Muxue's feet, helping her stabilize her body.

This round of shooting downwards, countless pits were shot below, and the muddy things like giant pythons tumbling in it immediately. The python appeared, volleyed down, swallowed up the churning giant python below, and burned violently.

Xi Muxue stepped on the star ball, jumped, and landed on another wall.

The buildings that are constantly exposed below are dilapidated, and only one thick wall can be seen, and everyone is flying on it, all wanting to escape first.

However, more and more unknown things formed from black mud appeared below. Xi Muxue and Wan Qianying joined forces to kill that giant python-like unknown. Although these foreign objects are not as huge as the ignorant objects that Wang Xuan just blasted away with the left arm of the mechanical god, they are not trivial. They can easily crash into the walls, destroy these buildings, and want everyone to fall together.

"Quick, run away!" Xu Jian shouted loudly while rushing towards the edge, reminding everyone not to fight.

The situation here is unclear, and the longer it stays, the more dangerous it is.

This area has a radius of one or two kilometers, and everyone flew along the walls toward the edge. More and more black mud objects appeared below, or looked like giant pythons, or like ligers, and others. Apes, bears, wolves and leopards, they either hit the wall and collapsed, or climbed up the wall and began to fly along the wall, chasing behind.

In just a short period of time, at least hundreds of these filthy things made of black mud appeared behind everyone, and they slowly flanked up in the shape of a fan. What was even more terrifying was that in front of everyone escaping, this filthy thing began to appear. Objects, intercepted in front, so that everyone could not escape and fell into the encirclement.

Fortunately, none of these filthy things are as powerful as the ignorant thing that Wang Xuan killed just now. Their speed and performance seem to be only stronger than ordinary super-states, which are roughly equivalent to the middle level of super-states.

Yukai rushed forward and shouted fiercely. The rock giant with only half of his body slammed it head on. A filthy object that had just climbed up was blown away, and it exploded into black mud and splashed all over the sky.

This kind of filth was blasted away, and no white scales appeared in it. Obviously, they were very different from ordinary creatures. It may be that some kind of force gathered together and formed, not a real individual.

Tang Ruoyu flew along a wall, and saw a giant python formed of black mud climbing up ahead rushing towards her, the two-meter giant sword in her right hand swept out, and suddenly flew out, the two-meter giant sword. The sword spun in the air, turned into a sword wheel, cut across it, and cut the black mud python from it in an instant.

She took a step forward, jumped over the cut black mud python in the air, grabbed the front, stretched out her right hand, and the two-meter giant sword drew a perfect arc in the air and landed on her right hand again.

Mou Xing held up the star ball in his right hand, the star ball was spinning in his hand, and he saw a liger monster formed of dirty black mud climb up the wall to block him, the spinning star ball suddenly glowed, and a starlight was like training. The blast shot out, like a laser, slammed into the liger monster, and immediately pierced it and exploded. The power was so strong that it was unstoppable.

Su Tang showed two transparent hands, each of which was more than ten meters long, and swept out in a volley.

These people all have powerful combat power, and the filth formed by these black mud cannot be stopped, and everyone rushed towards the edge at full speed.

Dirty things kept climbing up, and they were constantly being blasted away by the people at the forefront. The others just had to follow them and flee at full speed. cause harm to them.

Yukai, who was suddenly rushing in front, felt his heart skip a beat and stopped abruptly, blocking the rock giant in front of him for the first time.

Sure enough, at this moment, a big blood-red tongue appeared, broke the sludge below, and licked towards him. Fortunately, he responded quickly and blocked the rock giant in front of him.

The big blood-red tongue licked the rock giant, rolled both sides to the center, wrapped the rock giant, and dragged it down.

Yukai's face changed color, he flipped his left hand, and two explosive crystals appeared and threw them downward.

There were two loud bangs, and the black mud surging below was blasted into two gaps. In this gap, it was faintly visible that ignorant and invisible things were squirming, but this thing was different from other filthy things that formed, it had no fixed shape. , not tigers, leopards, bears, wolves, nor snakes and pythons.

It seems to be part of the black mud below, and the filth that floods the buildings below, one with the filth.

Wang Xuan accelerated towards this direction, his left arm of the mechanical **** had just defeated a similar ignorant and invisible thing, and he never thought that there was another similar terrifying thing hidden here.

Yukai's rock giant was dragged down, and while throwing the explosive crystal, he retreated, and suddenly the wall next to him collapsed with a bang, and another big blood-red tongue appeared, broke through the wall, and licked towards him.

He could never have imagined that there was a second blood-red tongue hidden underneath.

This tongue is covered with thorns and barbs, and it is extremely powerful.

Even if he was as strong as Yukai, he didn't have time to dodge, and was instantly licked by a blood-red tongue.

He let out a miserable roar, and the blood-red tongue wrapped around him and dragged it down.

He instantly disappeared into the sludge below and disappeared.

Wang Xuan had just landed on a wall. Witnessing this scene, his heart trembled. This You Kai was a powerhouse close to the top of the super state, so he died like this?

As soon as I had this thought, there was a loud "bang" in the mud below, and the black mud splashed all over the place. A rock giant with a height of two meters stretched his arms, and there was a faint glow on the surface of the body, which was in harmony with the rock. A figure overlapped the giant's body, and it was Yukai who was covered in blood.

Most of the mechanical shell and equipment on his body were smashed, and his flesh was rolled over. Several injuries were deep in the bones. Although he looked embarrassed, the expression on his face was almost crazy, and his eyes shone with terrifying light.

His body overlapped with the rock giant, and with a wave of his arms, the giant arms of the rock giant swung out at the same time, and there was another loud bang, and the surrounding mud was blasted open from it, forming a vacuum, which just wrapped him. The blood-red tongue was exposed from it, and a huge transparent hole was immediately blasted out.

Xi Muxue carried the Gatling machine gun, and dashed towards here at an extremely fast speed.

Mou Xing let out a low drink, raised his hands in the air, the star ball rose up, and spun violently, and suddenly, a starlight shot out like a pistol, shooting towards the bottom.

Everyone understands that this place should be the root of this rot. Just kill this ignorant and invisible thing, and you should be able to escape from here.

Wang Xuan, Tang Ruoyu, Gongyangxuan, Su Tang and others all began to accelerate towards here.

Wang Xuan waved out four metal tentacles, which lit up with blue dim lights, and stabbed towards the black mud that was slowly rising below.

Gongyang Xuan waved his right hand, and a glass mirror appeared under Yukai's feet, trying to help him out of trouble.

Youkai just blasted a blood-red tongue out of a transparent hole, and there were eight blood-red tongues, one after another, and each blood-red tongue was covered with fleshy thorns and barbs. The petals are in full bloom and open in all directions. Among the petals, there is a huge dark abyss, and the rotten smell rises into the sky. This is the real source of all the rotten smell.

Under the blood-red tongue with its eight **** open, black mud surged, a black mud as big as a small hill was rising up, and the black mud was constantly wriggling on the surface. The glass mirror summoned by Gongyang Xuan.

With a crisp sound, the glass mirror shattered. With this strength, he soared into the air and rushed towards the wall on one side.

The eight-lobed tongue was fully opened, and the black mud rising below suddenly protruded from the tumbling filth, like a giant python, slamming in all directions.

"Boom boom-"

With the loud noise, the surrounding walls kept shattering and collapsing~www.mtlnovel.com~ The people who were standing on the walls fell one after another.

"Damn it—" Xi Muxue shouted, and while falling down, he lifted the Gatling machine in his hand and fired frantically.

The machine gun roared, and the powerful bullets were like a violent storm, venting wildly, and a large number of holes suddenly appeared on the surface of the blood-red tongue that was open with eight petals, and blood splashed.

The eight-lobed blood-red tongue was injured and hurt, and it shrank down immediately. The entire black mud was shaking. It seemed that this ignorant monster also knew the pain.

Zhu Han, who was behind, raised his right arm and summoned the ice beast. The ice beast opened its mouth and fired ice arrows.

A sprig of ice arrows volleyed into the rising black mud below, forming frost on the surface.

Wan Qianying summoned the flames, forming an incomparably gigantic flame python, and sprayed towards the rolling black mud python, igniting it, and immediately the flames raged and burned violently.

The rune pattern on Huang Qingzhi's right hand was constantly spinning, and his right arm was swung out one after another, and the wind blades flew out one after another, cutting the black mud, leaving giant cracks one after another.

At this moment, most of the wall was destroyed by ignorant and invisible things. Everyone fell down. Gong Yangxuan shouted fiercely and shot with all his strength. Hundreds of glass mirrors suddenly appeared and spread out along the black mud below. , everyone fell and fell onto the glass mirror.

Although it can only last for a very short time, with the skills of everyone, in this very short moment, they all turned over and got up, ran at full speed, and rushed towards the place where the eight-lobed blood-red tongue appeared.

Everyone is not stupid. They understand that this is the core of this unknown thing. As long as this place is destroyed, it will definitely be able to kill it.

Chapter 219

A long whistle sounded, and the rock giant launched by Yukai slammed into the air, slamming into the retracted eight-lobed blood-red tongue.

Following Tang Ruoyu's appearance, she clasped the two-meter giant sword in her hands. She and the white tiger completed the fusion, and her strength had broken through and entered the super-high level. The two-meter giant sword appeared bright white light, suddenly. Lingkong flew out, turned into an incomparably huge sword wheel, and slammed into the shrunken eight-lobed blood-red tongue.

Blood splashed, and the eight-lobed blood-red tongue was hit by the rock giant and Tang Ruoyu's sword wheels, and immediately burst open, revealing the terrifying black hole that looked like a bottomless abyss.

Xi Muxue landed on a glass mirror and stabilized her body. The Gatling machine gun in her hand fired frantically, and the bullets that filled the sky slammed into the black hole in the center.

In addition, Huang Qingzhi, Xu Jian, Zhao Dong, and Sun Yaofei, who were far away, threw explosive crystals and smashed them all in one go.

The big explosions of "Boom Boom" sounded one after another, and the black mud was blasted into the sky.

Wang Xuan activated the mechanical god's left arm again.

A large number of glowing metal parts appeared, floating around his left arm, forming a mechanical god's left arm that was more than two meters long.

With a bang, the left arm of the mechanical **** shrouded in brilliance flew out into the air, and together with those exploding crystals, slammed into the black hole below.

A jet of black blood suddenly spewed out of the black hole, like a fountain, spewing tens of meters above.

Everyone was shocked, fearing that the black blood was poisonous, and they all avoided it.

However, the black mud that was wriggling below suddenly flowed down and melted, revealing the skeleton inside.

Everyone could not visually estimate how big the skeleton was, at least it could be calculated by more than 100 meters.

The surface of the skeleton was originally covered with a large amount of black sludge, but now the sludge melted and flowed down, revealing it.

In this skeleton, there is a mass of flesh and blood, like an egg cocoon. The original eight-lobed blood-red tongue took root from this mass of flesh and blood. Now these blood-red tongues and this cocoon-like giant flesh and blood have been blasted open. A lot of black blood spurted out of it.

Immediately after that, a mass of black matter wriggled and rolled out of the black blood that spewed out.

This mass of black matter looks a lot like a human embryo that is not fully developed, and there is an umbilical cord-like thing attached to this mass of blasted giant flesh.

No one knew what this was. When it appeared, there was a large amount of black sludge-like liquid flowing down the surface.

After seeing it, Su Tang immediately stretched out two transparent hands, stretched them to the limit of more than ten meters, and grabbed the black embryo.

Although he doesn't know what it is, he can be sure that this should be the core of the decay and mutation here. If he can catch and kill it, it will be of great benefit.

He shot very fast, but the black embryo was even faster, tumbling out of the tattered cocoon-like flesh and blood, and suddenly it bounced up. Su Tang hit the air, but saw the black embryo fall to the just exposed below. On the skeleton, it rose into the air again, and the umbilical cord that was originally connected to the egg cocoon and flesh was broken, and black blood spurted out of it.

Zhu Han shouted loudly, raised his right arm, the ice beast opened, and sprayed an ice arrow.

One after another, the ice arrows flew, and the black embryos kept flashing and rolling. They wanted to escape and avoided all the ice arrows. The Gatling machine gun in Xi Muxue's hand became powerful.

"Boom boom-"

The eight giant gun barrels that were spinning rapidly were shooting fire, and the bullets were venting wildly. Although the black embryo dodged a large number of bullets, it was still hit. There were immediately dense holes on the surface, and black blood was in every hole. flow.

It was shot, and the speed slowed down, and Zhao Jinsong, who happened to be from "Sand Town", stood in front of it.

At this moment, Wang Xuan's physical strength was almost exhausted. While putting away the left arm of the mechanical god, he took out the water of physical strength and just drank it. Although he watched the black embryo appear, he was unable to catch up.

You Kai and Tang Ruoyu landed on the skeleton below and stepped on the giant ribs that appeared on the skeleton. The curved ribs were like small arch bridges. They ran and chased along the ribs, but unfortunately they all slowed Zhao Jinsong. step.

Zhao Jinsong saw that the opportunity was coming, how could he miss it, he activated the hatching beast, and a white halo appeared on his right arm. The surface of each halo was faintly flickering with runes. His hatching beast was very powerful. Aura, each has a magical effect.

With a thought, the first white halo flew out. This is the control halo, which can trap the black embryos rushing over, and the second white halo flew out immediately. This halo contains the power of powerful runes. , you can drive the power of the rune into the enemy's body and detonate it from the inside.

After that, there are defensive halo, winding halo, and lightning halo, each of which has magical effects. He is confident that he will kill the injured black embryo and win this skill.

The first white halo instantly hit the black embryo that was rolling and rushed over, and it immediately came into play, with a huge change.

The second halo he launched followed closely.

At this moment, the black embryo covered by the white halo suddenly twisted and changed, and there were hands and feet sticking out. The shape of the embryo changes to the shape of a newly born baby.

In particular, a part of it was slightly lifted up and looked like a baby's head. The originally smooth surface was slightly sunk into a few holes, and it looked like a human's facial features and seven orifices.

All these changes happened in an instant, and when the embryo stretched out, the white halo that enveloped it snapped and shattered.

Zhao Jinsong opened his eyes wide, showing an incredible look inside.

He didn't expect that his control aura would shatter after trapping the enemy. This was the first time he had encountered it.

His heart was shocked, and it seemed that he had been hit by some kind of heavy blow. Another white halo controlled by his right hand fell, and it hit the head that evolved from a black embryo into a baby.

The baby raised his head, and in the hole like seven orifices, in the hole that belonged to the eyes, vaguely like two rays of light flashed away, the baby formed of black mud suddenly rose into the sky, and the white halo that hit its head shattered. It cracked, Zhao Jinsong was hit by it on his stomach, groaned, and his body was lifted up into the air by it.

Everyone saw the scene and looked shocked.

"Old Zhao—" Mou Xing, Chu Dong, and Xi Muxue all came from "Sand Town" like Zhao Jinsong. They were all the leaders of the five major forces in "Sand Town", and couldn't help but cried out, but at this moment they wanted to rescue all of them. It was too late, so I could only watch Zhao Jinsong being pushed into the sky by the baby formed by the black mud, at least ten meters high.

Zhao Jinsong was roaring, thinking about resisting and struggling, wanting to activate the defensive aura to protect himself, but unfortunately it was too late. When he and the baby fell down, the baby stretched out a chubby little hand, still dripping with filth, inserted into his open, roaring mouth.

From Zhao Jinsong's mouth, his skin and flesh rotted.

The speed of this decay is visible to the naked eye. When they fell to the skeleton below together, Zhao Jinsong had lost the strength to roar. The flesh on his face was completely rotten, and even the eyeballs fell off, revealing the skull inside. The neck and neck were also rotted down with white neck bones.

Watching Xi Muxue frantically firing the Gatling machine gun, the filthy baby grabbed Zhao Jinsong's rotting neck bone and threw it out.

Zhao Jinsong flew into the sky of bullets from the violent storm, and was immediately beaten into a hornet's nest, which made Xi Muxue panic and hurriedly stopped firing.

And the baby has shrunk into a ball again, bounced up, and flew two tens of meters away, faster than everyone else.

When Wang Xuan, You Kai, Tang Ruoyu, Mou Xing and the others came after him, Zhao Jinsong had already turned into a skeleton with rotting flesh and viscera, and the filthy baby had already escaped from here and disappeared.

The surroundings were quiet, and the black mud and filth below flowed into the underground cracks deep below and disappeared. In this deep pit with a radius of one or two kilometers, a city-like building was revealed. Although the surface looked rotten, but The main body is still relatively intact.

In the center of this building, there is a giant skeleton with a length of more than 100 meters. After careful observation, everyone found that the shape of this giant skeleton is somewhat similar to a human being.

It's just, how come there have been huge human beings over 100 meters high?

The fourteen people who were still alive stepped on the skeleton below, gasping for breath. In the end, Zhao Jinsong's death was chilling. To a trace of fear.

The mysterious baby who escaped and disappeared seems to be able to rot in an instant. Could it be that everything they have encountered before and now is dominated by its power?

What is its real origin?

The deaths of Hao Yuantong, Qi Yingzhi, Gu Zijian and Zhao Jinsong cast a shadow over everyone's hearts. Even You Kai's face was ashen at the moment, staring at the direction where the baby just disappeared, without saying a word for a long time.

"What now? Leave here?" Finally, Huang Qingzhi broke the silence.

After being delayed here for so long, everyone saw that the sky was a little cloudy, and they understood that it was impossible to reach the giant ship before dark today.

Wan Qianying licked her lips and said, "The buildings below are a little weird, do you want to go down and have a look?"

Mou Xing's voice was still stern, and said, "The trouble now is the thing that just escaped, it can easily kill Lao Zhao, and it looks like it has just been born, maybe it will continue to grow, if it targets us , the enemy is dark and we are clear, then it will be troublesome."

Mou Xing's words made everyone feel a chill, even Wang Xuan's brows furrowed.

Wan Qianying said slowly: "Looking at the situation just now, it seems to be the egg cocoon left in the skeleton, and the baby was born from this egg. If you count it like this, it should be the descendant of the skeleton, just such a huge skeleton. , what kind of creature..."

Several of them have the ability to observe and capture monster information, but unfortunately, including Wang Xuan, they can't see the information about the baby that just disappeared and the skeleton.

Huang Qingzhi said: "This skeleton looks like a human, especially these curved bones, like ribs, the center should be its vertebrae, it is really similar to us humans, but much larger, this guy may have been a giant in his lifetime, It would be great if we could find its head and see if it was really the same as a human head."

Yukai, who had been silent for a while, glanced at him and said, "It's easy to find its head." As he said that, he jumped up and down, and suddenly ran along the huge vertebralike bone, and soon reached the end. Then he jumped down and said, "Its skull is below, but it's as big as a house."

Youkai's voice came from below, and everyone gathered around. Wang Xuan flew along the suspected vertebrae, and soon at the end, he saw a giant skull that fell from below. This skull was huge, just like Yukai's. I mean, it has to be the size of a house.

Everyone looked over.

Wang Xuan looked at the skull, it was almost exactly the same as a human being, the only difference was that it was many times larger.

"It's really amazing. It's really exactly the same as our human skulls. Is it true that giants over 100 meters tall have lived here?" Huang Qingzhi looked surprised with a look on his face.

Zhu Han said: "There are indeed giants in the legend. If there is such a giant, why did they die here? Is the baby just now its descendant?"

"Unfortunately, I couldn't find any information. I don't know if I can find clues in these buildings." Xu Jian said while looking around.

All around are all kinds of buildings, but badly damaged.

Wan Qianying counted the teeth in the skull's mouth.

"Why do you count your teeth?" Huang Qingzhi asked curiously.

Wan Qianying ignored him. After counting all the time, she let out a small breath and said, "Do you know how many teeth it has?"

When she asked this question, everyone was stunned, looked at her, and then looked at the teeth of this giant skull, but didn't see anything special.

Wang Xuan reminded her, but she could see some differences. The teeth in the skull's mouth seemed to be very dense, and the number should be more than that of ordinary humans.

"Forty, it has forty teeth in its mouth." Wan Qianying looked at the crowd and said in a deep voice.

Yukai said, "What's wrong with forty teeth? What does it mean?" Most people thought the same thing as him.

Wan Qianying said: "Actually, most of us humans have twenty-eight to thirty-two teeth. We also know that the number of teeth has nothing to do with fate, but there is a saying in ancient times that the number of human teeth is related to fate. Get up, think that those who have thirty-four teeth can be named kings and lords, thirty-six teeth are emperors, thirty-eight are saints, and forty teeth are gods and buddhas."

Everyone was a little stunned when they heard this, and then looked at the giant skull beside him, and looked at the skull full of teeth.

"Of course, maybe it's just a coincidence, but I didn't expect that someone actually has forty teeth... According to the legend, this is the appearance of a Buddha, and this is a characteristic only possessed by gods."

Wan Qianying said softly, stretched out her hand, and gently stroked the teeth in front of her that were even bigger than herself.

Xu Jian said: "According to this legend, the original identity of this skeleton should be a **** and a Buddha."

Xi Muxue said: "So, the baby who escaped and disappeared should be the son of God or the son of Buddha?"

Yukai smiled coldly: "What kind of gods and Buddhas have such evil powers, can they make all rotten gods and Buddhas? As a result, he rotted here first and turned into a dead bone."

As he spoke, he threw a fist and suddenly punched the skull in front of him.

Although his strength is strong, the skull is hard. When he hit it, it was like hitting a piece of steel as thick as a mountain. The skull did not move at all. Instead, he felt faint pain in the palm of his hand. Obviously, he did not believe in gods and Buddhas.

Mou Xing opened his mouth and said, "It's pointless to worry about these things now. We must be prepared to prevent the escaped baby monster from reappearing and attacking us."

Fighting head-on, everyone is not afraid of it. What they are really afraid of is a sudden attack.

Wang Xuan has been looking around, his magical beast instinct makes him not dare to be careless, this area is vaguely shrouded in an uneasy atmosphere, suddenly, he finds something, he straightens his body, and soon arrives at a place under the building.

Although the building looks dilapidated, it can still be seen that it should have been a six-storey building. Judging from the main building of the building that remains now, it does not look like an ancient building. It's very much like the old, shabby six-story residential area in a modern city.

The original black mud flowed and disappeared along the cracks in the ground. Wang Xuan looked at the dilapidated building, walked around slowly, looked inside, and frowned.

The figures around him flashed, but Tang Ruoyu and Xu Jian appeared.

"How is it? Did you find something?" Xu Jian knew Wang Xuan better, and seeing him suddenly come here, he must have found something.

Wang Xuan stretched his finger to the ground and said, "Look at what this is?"

Xu Jian watched the sludge dissipate, and in this dilapidated six-story building, he saw something covered with sludge that looked like a chair and stool, and was placed on the ground like a jet-black table.

Xu Jian didn't see what it was for a while, Wang Xuan swung out a metal tentacle and slammed it on it.

There was a crisp sound, and the thing suddenly cracked open, revealing a white ceramic-like substance. Looking at a sewer pipe about ten centimeters in diameter that appeared on the ground, Xu Jian suddenly woke up and lost his voice: "Is this a toilet?"

He was greatly surprised. Everyone preconceived that this was an ancient town buried in the ground, but he didn't want to suddenly see a modern toilet here, which was completely unexpected to Xu Jian.

Wang Xuan nodded slightly and said, "Yes, look at the layout of this place, it should be a bathroom, look here again, this place was a kitchen before, this rotten thing is a range hood, but it has been soaked in the mud for too long. It's hard to tell if you don't look carefully."

"The stuff and the style here are very modern in any way."

When Wang Xuan said this, he took a deep breath.

Chapter 220

Xu Jian murmured, "Modern architecture...what the **** is going on?" He was busy walking to another building, and soon found that there were sofas, tables, chairs, and some appliances like refrigerators, washing machines, etc. Although the surface is covered with black mud and looks rotten, but with the discovery just now, the appearance is now compared, and they are quickly compared one by one.

Everyone else came over as well. Xu Jian told what he and Wang Xuan had found, and everyone looked surprised, and they all started to search around to check, hoping to find more.

"Come on, let's see what I find." Huang Qingzhi called out from the other side. He held a knife in his right hand and carefully removed the sludge on the surface of an object. It turned out to be a mobile phone. Looking at the mobile phone, he soon saw the familiar mobile phone brand logo. This logo is very familiar to him. It is a big-name mobile phone in China. This mobile phone actually appeared in this building.

Everyone has found a lot of similar evidence, which can show that this building belongs to a part of a modern city building. Although it is not known which city it belongs to, these discoveries are already amazing enough.

"Could it be that not only are we humans trapped here, but some cities on Earth, including these buildings... have also appeared here? Like the buildings in the sky, like the giant ships that fell from the sky? "

These discoveries made everyone look at each other and look at each other, and strong doubts arose in everyone's mind.

"Can you think of what this represents and why these buildings are modern?" Xu Jian looked at Wan Qianying, he had always admired Wan Qianying's brain, he could always think of aspects he couldn't think of, this is also a bug The main reason why several major town leaders are more convinced of Wan Qianying, otherwise, Wan Qianying's strength is simply not enough to convince them.

Hearing Xu Jian's question, Wang Xuan also looked at Wan Qianying, wondering what she would think. In fact, he always felt that Tang Ruoyu should know a lot of information, but unfortunately, she was shy and would not speak casually.

Wan Qianying was also thinking, hearing Xu Jian's question, she slowly shook her head and said, "There are many possibilities to explain this situation, it doesn't make much sense to think about it now, we have been delayed here for too long, and now the most important thing is The important thing is to find the five major cities first."

Hearing Wan Qianying say this, Xu Jian thoughtfully and nodded slightly, feeling that what she said made sense, and it is meaningless to guess the origin of these modern buildings in front of you now.

After listening to Wan Qianying's words, Mou Xing touched his fat face and said, "I have a guess, since the giant ship can appear from a kilometer high and fall down, will these buildings in front of you be? It also fell from the sky?"

Wan Qianying glanced at him and said, "It's all possible, we'd better leave here earlier, no one knows what will happen next here."

Xu Jian snorted and said, "Yes, let's go. It's cloudy, and it won't be long before it gets dark. It's only going to be more dangerous at night in this forest."

Huang Qingzhi sighed: "I finally understand why people in the five major cities have always been on the edge of the No. 8 security zone, and rarely go deep into the forest. The forest is really unsafe, not to mention super-moderate, even super-normal. The superior powerhouse, with the slightest carelessness, may die at any time."

Hearing what he said, many people were in a bad mood, thinking of the four people who had just died.

The strength of these four people is not weak. If you take out any one, it will be a strong one. Unexpectedly, they will die like this.

"Let's go." Youkai said as he jumped up and started running towards the edge of the one or two-kilometer-long deep pit. After the battle just now, Yukai's self-confidence was a little hit. He suddenly found that Wang Xuan His performance seemed to be even more amazing than his own, especially the

blow of the giant mechanical arm that appeared, so powerful that even if he tried his best, he couldn't match it.

This made him very suspicious that Wang Xuan was already the top powerhouse in the super state, but he was stuck at the bottleneck and had not been able to break through to the top level, which made him feel a little impatient.

The crowd did not stop any longer, and ran towards the edge of the deep pit. The rest of the way was not in danger. They soon reached the edge of the deep pit, and then climbed up the edge slope, left here again, and entered the forest.

After exiting the deep pit, everyone rested on the spot and regained their strength. After resting, Wang Xuan, You Kai, Wan Qianying, Mou Xing, Su Tang and others climbed up a big tree and climbed the canopy, so as to determine the orientation of the giant ship.

After confirming the orientation, everyone descended from the tree, all released from the fit state, re-summoned the mechanical beast, rode up, and the fourteen people continued to run towards the direction of the giant ship.

The sky was getting darker and darker, and night fell silently.

The people rode the mechanical beasts, galloping for a while, at least 30 to 40 kilometers away, and encountered two groups of monsters on the way. Both groups of monsters are six-star dangerous, and their strength is equivalent to the ordinary super-level level. Easily kill a **** path.

Seeing that the surroundings were getting darker and darker, everyone slowed down, and they all understood that they could not reach the place where the giant ship was before it was dark.

"What do you say? Should we continue on our way, or take a night's rest and leave tomorrow?" Mou Xing's voice sounded, asking everyone's opinion.

Wan Qianying said, "I suggest resting on the spot and hurrying on the road tomorrow morning. At night, the danger in this forest will increase, and many nocturnal monsters will appear."

Yukai said: "I think it should be not far from where the giant ship is. It is estimated that we will have a chance to get there in an hour or two. Why don't we stick to it for another hour or two? I'm afraid, everyone can solve it by drinking a bottle of night vision water."

"Brother Kai's words make sense." Sun Yaofei, also from "Ghost Town", immediately supported You Kai and said, "Although the danger in the forest at night will increase, we will also encounter danger when we rest here. In this case, We might as well try our luck, and as long as we are careful, there shouldn't be too much danger."

Yi Wudao: "If that is the No. 8 safe zone, the closer we get there, the less dangerous it may be. Everyone should know that the closer to the safe zone, the safer, and the farther away, the more dangerous. After all, we have already passed through the most dangerous area between the eighth and ninth safe zones, and it will only become safer and more secure in the future."

"That makes sense." This time, even Mou Xing nodded and said, "The rotten monster we encountered should be the most dangerous area. If that's the case, I agree to continue on our way and try to find the five major cities as soon as possible."

Seeing that Mou Xing agreed, Chu Dong and Xi Muxue also expressed their agreement to continue on their way.

Wan Qianying, who originally wanted to rest on the spot, saw that most of them agreed to continue on the road, so she could only nod her head in agreement.

Wang Xuan rode Xiaojiao and stood side by side with Xi Muxue.

The mechanical giant crocodile that Xi Muxue rides is very powerful, similar to Xiaojiao, which makes Xiaojiao and it naturally close. While running, the two mechanical beasts are naturally close together, vaguely like the core of many mechanical beasts.

Wang Xuan listened to everyone's discussion and was too lazy to speak. As night fell, the night around him gradually darkened.

Hearing that everyone agreed to continue on the road, he took out a bottle of primary night vision water and drank it.

This basic night vision water can maintain night vision ability for six hours. After drinking it, his eyes glowed slightly green, and the darkness around him became clear.

This kind of night vision water is not too precious, everyone basically has it, and now they have taken it out and drank it.

In such a perilous forest, everyone wanted to hurry in the dark, although everyone said it easily, they didn't dare to be careless.

"Let's go!" Seeing that Yu Kai had agreed, he was very satisfied. This time, everyone finally followed his wishes, slapped his mechanical beast and rushed forward.

On the surface of his body, the half of the rock giant was looming, overlapping with his body from time to time. He was always alert. If something went wrong, he could react in an instant.

Yu Kai took the lead, followed by Sun Yaofei and Yi Wu, who were also "Ghost Towns", and then Wan Qianying and Gongyang Xuan.

Wang Xuan originally wanted to go side by side with Tang Ruoyu, but while running, his little boy and Xi Muxue's mechanical giant always ran side by side, which made him very helpless.

Xi Muxue had looked at him several times, mistakenly thinking that he was intentionally approaching her side by side, wanting to get close to her.

The night fell completely, and the surroundings became very silent, only the sound of fourteen mechanical beasts stomping on the ground.

Running all the way, the speed of the mechanical beast increased to the limit. The silence of the forest at night only lasted for about ten minutes, and there was a sound from the night sky.

This is the cry of some kind of raptor similar to the eagle owl. It sounds like a strange cry. It is transmitted from a distance, and there is an indescribable horror in the ears.

As the howling sounded, a wolf roar came from the distant forest.

This wolf roar is followed by one after another roar, constantly coming from a distance, it sounds like hundreds of wolves are roaring together.

Everyone was on their way, listening to the wolf's roar from afar, and it seemed that the distance was slowly approaching. Although they said they were not afraid, they still felt a little awe-inspiring when they heard the sound.

Following the wolf roar, Wang Xuan raised his head and suddenly saw a large number of black shadows appearing in the night. Those black images fell from the sky, and the direction of the fall was the area where the wolf roar came from.

Immediately after, the chaotic sound of fighting rang out.

"Is this a bird of prey from the sky attacking a pack of wolves in the forest?"

Wang Xuan's heart moved, and while riding Xiaojiao to follow the team, he raised his head and suddenly saw a huge black shadow appearing in the sky in the distance.

He drank the water of night vision. Although he couldn't really see things as well as during the day, he could see clearly in the night, and soon saw that the huge shadow that suddenly appeared was actually a giant bird of prey. It looks like a golden eagle, but it is much larger than the largest golden eagle on the earth. The wings are spread out, I am afraid it is more than fifteen meters, and it looks like a small fighter jet from a distance.

The shape of this giant raptor was more than twice the size of the others. It was obviously the leader of this group of raptors. It swooped down with a group of raptors and disappeared into the distant forest.

Everyone rode the mechanical beast all the way, rushing towards the direction of the giant ship at full speed. Wang Xuan did not know how the battle was going after the giant raptor plunged into the forest. After only about half a minute, a sharp whistling sounded.

With the whistling sound, the giant bird of prey with a wingspan of fifteen meters suddenly rose into the sky and rushed into the sky from the forest. Wang Xuan turned his head to look and found that the bird of prey was rushing towards the sky while falling down. A lot of feathers, its back is like a black mass lying on its back, and its body is rotting at a speed visible to the naked eye.

In just a short breathing time, this giant bird of prey that fluttered into the sky, the pair of huge wings actually rotted to form bones, unable to support its huge body, and began to reverse in mid-air, falling down.

At this time, he finally saw clearly what the black mass lying on the back of this giant raptor was.

It was a baby formed by condensed filth. It was riding on the back of the bird of prey. A pair of small hands grabbed its neck. On its slightly raised face, a pair of eyes faintly glowed green in the night. Wang Xuan even felt like it was looking down at them from above, with the corners of its mouth slightly raised, like a smile.

It has grown a bit.

All this happened in an instant, the giant raptor rotted most of it, revealing its bones, and fell into the forest below with this filthy baby, and disappeared.

A large number of raptors in the distance are fluttering their wings and fleeing, appearing to be very flustered.

These birds of prey are the weakest and have a six-star danger level, which is not inferior to the general super-powers. If this giant raptor is their leader, then the strength is stronger, at least comparable to the first-class super-powers. , but now, it just fell down like this, dying silently.

Like Wang Xuan, there were several people who witnessed this scene, including You Kai, Mou Xing and Tang Ruoyu.

Mou Xing suddenly whispered, "That baby monster!"

There was a hint of fear in his voice.

Although he was powerful, he witnessed the scene just now and thought of what happened before. For some reason, a chill surged in his heart.

The person who didn't see it was shocked, Chu Dong said busily: "Mu Xing, that baby monster has appeared again?" The whole body was tense, and the hatching beast immediately appeared on the right arm.

Mou Xing's face was a little ugly, he shook his head, but did not speak, the mechanical beast was very fast, and quickly rushed into the distance.

Wang Xuan felt that the baby monster was looking for powerful monsters in the forest to start. It seemed to want to devour their power to evolve and grow. Once its strength was strong enough, would it attack him and others?

This possibility is very high, but the surrounding forest is too vast, and it is night. At its speed, if it does not take the initiative to show up, it will be too difficult for them to find its whereabouts.

No one knows the specific area of this virgin forest. The only thing that can be determined is that they climbed high and looked into the distance. The endless undulating forests were all undulating, and there was no end in sight. It seemed that the area of the forest was endless. In it, it seems indescribably small.

At night, all kinds of nocturnal monsters appear one after another in this forest, appearing to be much more active than during the day, and the beast roars continue to sound one after another. Those who dare to roar are powerful beings. They are not only demonstrating, declaring The commander of a certain area is still warning other monsters, and there will even be constant battles between monsters to compete for territory.

"howl--"

There was a sudden, earth-shattering roar in the distance. Everyone was a little shocked when they heard it. They looked up and saw the towering tree in the distance shaking, followed by a large number of cyan figures, jumping to the sky. on the canopy of the tree.

Everyone's eyesight is very strong, and after drinking the water of night vision, they can see that the cyan figures that appear are a kind of fox-like creatures.

This kind of creature looks like a fox, but it is as big as a buffalo, but it is much thinner than a buffalo. It has cyan fur all over its body. Their bodies are very light and can walk on the canopy of trees.

In the darkness of the night, green foxes kept appearing, and they climbed up the canopy of the tree. In the blink of an eye, at least hundreds of green foxes appeared in the distance. come in their direction.

"This is a green fox beast, each of which is comparable to a super-medium powerhouse, and appears in groups, it is very difficult to provoke, let's dodge!"

Wan Qianying immediately raised her voice and issued a warning.

It is comparable to the super-medium green fox beasts, and there must be hundreds of them. Everyone listened to it with awe~www.mtlnovel.com~ Immediately turned slightly in the direction, and tried to avoid direct contact with them as much as possible.

"Everyone remember, in case of encounters, avoid them if you can, and try not to kill them!" Wan Qianying added.

"Why?" Chu Dong couldn't help but ask, a little strange.

Although these green fox beasts are powerful, they are only better than numbers. If they have encountered them, they will attack them, so there is no reason not to kill them.

Wan Qianying was about to speak when she suddenly groaned, her eyes opened slightly, and everyone was similar to her. Almost at the same time, she noticed that there was a sudden commotion in the green fox emerging in the distance, but a black shadow rushed in and jumped. On the back of the last green fox, it was a blue fox headed by it, which was much larger than the other green foxes. The black figure suddenly jumped on its back and leaned on it tightly.

The body of the green fox began to rot. In just a short time, it rotted down from the back, and the vertebrae and the curved ribs on both sides were exposed. It could no longer keep running on the canopy, and immediately fell down. .

The black shadow lying on its back rose into the air, abandoned it, and rushed towards the other green fox.

The blue fox headed suddenly fell, and the hundreds of blue foxes in the back were a little confused. The other blue fox who was pounced wanted to struggle and swayed desperately, trying to shake off the black shadow lying on his back. I don't want my body to rot rapidly, and then fall down.

The other green foxes reacted at this time, and let out a loud fox roar, and a green fox man stood up, stretched out his claws, and wanted to attack the shadow.

"It's it again, that monster baby, it killed the leader of this group of green foxes." Mu Xing's face was ugly.

Wan Qianying murmured, "I'm afraid it's going to be unlucky this time."
