

Last Building on Earth Chapter 221-225

Chapter 221

"What do you mean?" Chu Dong glanced at her, and then looked at the monster baby in the distance. It seemed to be bigger, and it was rushing into the group of green foxes. Its speed was too fast, and these green foxes couldn't catch it. In the middle of the tree, it began to rot immediately, unable to stabilize the body on the canopy, and fell down.

"Because these green fox beasts are descendants of the totem, this monster baby killed the leader of the green fox beast, which may anger the totem."

Wan Qianying had just finished explaining that the monster baby in the distance had killed at least ten green fox beasts, and these hundreds of green fox beasts began to make a mess, jumping off the canopy one after another, trying to escape from below.

The team became chaotic, and the fox roars were constantly issued, and they were calling for rescue.

The monster baby followed them and rushed down from the tree canopy. From time to time, a green fox screamed. Suddenly, a huge blue tail appeared on the forest in the distance.

This cyan tail suddenly appeared and was dozens of meters long. Following everyone, they saw a cyan fox with a head and tail of more than 100 meters appearing on the tree canopy. His eyes were faintly glowing with divine light, and he looked very handsome, like a god.

It strolled above the tree canopy, seemingly leisurely, but its actual speed was astonishingly fast. In the blink of an eye, it appeared in the area where the green fox beast was chaotically fleeing.

When everyone saw this scene from a distance, they all stopped instinctively, and they saw this god-like azure fox descending in the distant night, and the azure tail behind him stretched out into the sky, suddenly reaching into the towering tree below, When it was raised again, the base of the tail was curled, and a black figure was curled inside, which was the monster baby.

Although the monster baby is powerful, it can easily corrode the blue fox leader and take his life, but at this moment, facing this blue fox with a length of more than 100 meters, he did not even struggle to resist, and was caught in an instant.

"Great..." Wang Xuan whispered softly.

Yokai blinked, eager.

He longed for this absolute power.

The cyan fox grabbed the monster baby and began to walk along the canopy towards the distance. Everyone saw that the direction it was walking was the area where the distant giant ship was located, and their goal was the same this time.

Everyone didn't know if it was a coincidence or another reason. After being surprised, they came back to their senses and chased away the mechanical beasts, rushing towards the distance, following the cyan fox in the distance.

Wherever the cyan fox went, the monster turned away. It really wanted to continue heading towards the giant ship. It was undoubtedly the safest for everyone to follow it far behind.

It's a pity that they couldn't catch up with the speed of the cyan fox. Although they ran all the way, they still watched the figure of the cyan fox become smaller and smaller. Fortunately, in the night, it was shrouded in green light, which was very conspicuous. Not lost.

Perhaps because of the appearance of the cyan fox, everyone did not encounter any monsters along the way. They ran with all their strength. After half an hour, everyone no longer needed to climb the canopy of the tree, and they could see the giant towering sky in the distance. ship.

They have approached the area where the giant ship fell. Although it was at night, everyone drank the water of night vision. At this moment, looking at the giant ship from a distance, the more they looked, the more they felt like the super luxurious cruise ship on the earth, but the earth There has never been such a huge ship on the sky, more than a kilometer from the sky to the ground, and for this ship, it has not been fully revealed.

Soon the building appeared in front of the crowd.

This used to be a castle building, but now it seems to have been crushed by some kind of force and completely collapsed, leaving only the ruins and rubble.

Seeing this, everyone was secretly shocked, and immediately worried about the situation of the five major cities.

Running along this broken wall, I saw a lot of broken or uprooted trees along the way, and from time to time, completely destroyed buildings can be seen.

It was getting closer and closer to the giant ship, and the cyan fox stopped on the canopy of a towering tree in the distance. It raised its head and looked up at the giant ship that fell from the sky. It seemed to be caught in some kind of thinking. .

The cyan tail behind it still curled the monster baby.

A cyan fox with a length of 100 meters, shrouded in bright azure light, in the night, staring up at a giant ship that fell from the sky for more than a kilometer. When Wang Xuan noticed it, he felt that this scene was frozen in time. There, like a heavy-colored oil painting, there is an indescribable beauty of strange dreams.

As the distance approached, Wang Xuan could already see that there were many dense windows on the giant ship, representing a room between rooms. Through the windows, it could be seen that the rooms on the giant ship had as many as nine floors.

The cyan fox looked up for a long time, suddenly raised the cyan tail behind him, and slammed it out.

The monster baby wrapped in it was thrown away by it and flew in the direction of the giant ship.

This move was beyond Wang Xuan's expectations. He saw it from a distance, and with a light moan in his mouth, he saw that the monster baby couldn't help but flew out into the air like a cannonball. Among them, disappeared.

Throwing out the monster baby, the cyan fox kept on walking, stepping on the tree canopy below, changing its direction, and walking towards the distant forest. , disappeared.

The cyan fox left, and the invisible power that was originally shrouded in totem disappeared. Everyone instinctively let out a sigh of relief, and the originally dead forest suddenly became active again.

The monsters and alien beasts in the forests that had been suppressed and dared not move have begun to show up again.

"Why didn't it kill the monster baby, but threw it on the giant ship?"

Everyone was full of doubts, Huang Qingzhi muttered to himself, and then looked at everyone, hoping someone could answer him.

Xi Muxue interfaced: "Does it know that it can't kill the monster baby? Or throw it at the giant ship and want to use its ability to rot to destroy the giant ship?"

Wang Xuan said: "There is also a possibility that this baby may have some relationship with this giant ship?"

Wan Qianying glanced at him and said: "Yes, think about the modern building in the deep pit just now, the skeleton with forty teeth inside, this baby is suspected to be its descendant, if those buildings are the same as that Like this giant ship, the skeletons all fell from the sky, so this baby is really related to the giant ship, at least from the same place."

Yukai said: "It makes sense to hear what everyone said. If this baby can really make the giant ship rot, maybe something interesting can happen."

He was talking about this, and around them, among the ruins of the destroyed buildings, suddenly there were black shadows flashing, followed by jumping out one by one. It was a creature similar to an ape, about two meters tall. Many, with four arms, when they saw Wang Xuan and other fourteen people, they immediately opened their mouths and let out a low roar, making a sound of demonstration, and surrounded them in a fan shape.

Wang Xuan opened the eyes of the illustrated book and captured their information.

Four-armed ape, six-star danger.

Seeing the speed at which these four-armed devil apes rushed over, everyone understood that their strength is not weak, about the same as those green fox beasts. Although they are both six-star

dangerous, their strength is stronger than that of tree demon, piranha and mushroom man. It is much more powerful, comparable to the strength of the super-moderate powerhouse.

A group of four-armed magic apes rushed up and spread their arms. Some of the magic apes were holding relatively simple weapons, or stones, or thick branches, and of course some metal iron tools. picked up from the building.

The Gatling machine gun appeared on Xi Muxue's right hand, and opened fire at the group of four-armed apes rushing over from a distance.

Followed by Zhu Han, summoning ice beasts and launching ice arrows for long-range attacks.

Mou Xing's star ball also blasted past.

"Let's go!" Wan Qianying shouted, riding a mechanical giant bear, and continued to run towards the area where the giant ship was located in the distance. run away.

Wang Xuan was in control of four metal tentacles, as long as the four-armed devil ape approached within seven meters of him, he was immediately attacked by the tentacles.

The four-armed magic ape that is comparable to the super-moderate and medium-strength is not simple. Whether it is speed or strength, it is very amazing. The ice arrows shot by Zhu Han are basically dodged by them. They smash the weapons in their hands into the air, carrying The whistling wind was not weak, and everyone did not dare to be careless, so they could only dodge.

They are much stronger than the tree demon and other monsters, and it is difficult for everyone to kill them in an instant, but Wan Qianying, Youkai and others who are rushing in front are blocked by them.

As powerful as Yukai launched a volley of rock giants, the power was amazing, but they were blocked by two four-armed apes, and they just vomited blood and fell out, suffering heavy injuries, but did not lose their lives.

Xu Jian's six arms joined together to form a fist mark. Although he knocked back a four-armed demon ape that jumped up, he also flipped back, his chest surging with qi and blood, and he suffered a small loss.

Everyone failed to rush out immediately, and was soon surrounded by groups of four-armed devil apes, attacked in all directions, and everyone immediately felt the pressure.

It must be known that the strength of each four-armed ape is slightly weaker than that of the super-moderate powerhouses like Xu Jian and Huang Qingzhi. So many four-armed apes gathered around and attacked together, which immediately caused great trouble for them.

"These guys are so strong, trouble!" Su Tang said while waving his pair of transparent hands, the four-armed demon ape couldn't catch it, and banged one of the demon apes flying.

The four-armed demon ape that was knocked flying spurted blood from its mouth and was injured, but after falling to the ground, the injury was healing at an alarming speed, and it quickly got up again.

Among the crowd, Xi Muxue's machine gun was the most difficult to defend. The bullets were swept out with great power. Most of the apes could only dodge and hide. It did not die immediately, but staggered and approached. Tang Ruoyu was right next to Xi Muxue, and immediately swung a two-meter giant sword, turning it into a sword wheel, cutting it past, and beheading the severely wounded four-armed ape.

Wang Xuan on the other side also rushed out, and the four metal tentacles lit up blue dim light, two of them wrapped around his arms, flesh and metal fused to form a giant arm of beast, and the other two metal tentacles extended out to protect him. Around the body and above the head, can be used for defense or attack.

He jumped down from Xiaojiao's back, and with a "bang", the giant arm of the beast hit the four-armed ape facing him.

The demon ape opened his mouth and spurted blood, his chest was shattered, and his body flew upside down.

Just like Wang Xuan, You Kai, Su Tang, Mou Xing, and Tang Ruoyu all exerted their strength to the extreme. The formation of the team was changing. They were the strongest and rushed to the front.

Although these four-armed demon apes were powerful, they couldn't resist, and they were quickly dashed out of a **** path by several of them.

The others followed closely behind, Gongyang Xuan kept summoning the glass mirror to resist the four-armed ape chasing behind.

This four-armed devil ape is powerful, and the white scales in its body contain powerful energy. Every time Wang Xuan kills a ghost wing, he can harvest a powerful energy, and there are faint signs of growth, which makes him gradually excited.

Yukai followed him, watching Wang Xuan's outburst of power getting stronger and stronger, secretly startled, but not to be outdone, he also exploded his own power to the limit.

The current Wang Xuan has faintly reached the extreme level of the super-high-class, and has touched the bottleneck between the high-class and the top-class. The current Youkai is in this delicate state.

Groups of four-armed devil apes blocked in front of everyone, and they couldn't stop Wang Xuan, You Qi, and Tang Ruoyu, who were all bursting out.

Like Wang Xuan, Tang Ruoyu is constantly absorbing the energy of the white scales, and her strength is gradually improving. Just as Wang Xuan guessed, as long as she can absorb enough energy, she can continue to grow from the superior growth to the top powerhouse in the super state. Even a more powerful peak level.

All the way to the front, nearly a hundred four-armed demon apes that appeared were killed by everyone, and the rest finally broke up and fled.

Everyone breathed a sigh of relief, but saw the ruins appear again in front of them. Many buildings and trees and forests in this area were destroyed. The giant ship that fell from the sky has appeared within two kilometers of everyone. Looking so close, everyone stopped.

The giant ship went down vertically, destroying a large number of buildings and trees, and inserting into the ground. There were huge cracks crisscrossing the ground in front of it, which shows the violent impact.

Everyone can probably imagine that the giant ship fell from the sky that day, and the huge shock wave generated by its impact on the ground destroyed all trees and buildings within a radius of one or two kilometers, and the ground was torn apart by huge cracks like a spider web.

The monster baby that was thrown into the giant ship by the cyan fox did not know where it entered and disappeared. Everyone was attracted by the giant ship. The shock caused by this close observation was indescribable. Compared with this giant ship, they all felt it. own insignificance.

The giant ship stood silently in the darkness of the night, and the surroundings seemed silent. Everyone watched as the radius of one or two kilometers turned into ruins, and their hearts felt like a piece of lead.

If this is really the No. 8 safe area, and now it is hit by a giant ship, not only the No. 8 safe area, but also the five major cities that exist around it and various forces that are independent from the five cities will basically be destroyed.

Looking at the huge cracks that were hit on the ground, everyone understood that no matter how strong the powerhouses in the five major cities were, they would immediately be wiped out, and it was impossible for them to survive.

"The five major cities... are they gone?"

Yukai muttered to himself.

Xu Jian's face was a little pale, and his six beast arms were tightly clasped together, as if he wanted to vent the depression in his heart, but he didn't know how to vent it.

The expressions on everyone's faces were more or less ugly.

Wang Xuan lacked a sense of belonging to the five major cities. At this moment, witnessing this excision was shocking, but the feeling in his heart was much better than everyone else.

Wan Qianying didn't say a word, suddenly mounted the mechanical giant bear again, and rushed towards the oncoming giant ship.

The others didn't speak anymore, mounted their respective mechanical beasts and rushed up.

Regardless of the facts, the only thing they can do now is get close to the giant ship and see what happens.

The distance of one or two kilometers, at the speed of the mechanical beast, arrived quickly.

Everyone carefully avoided the huge cracks that appeared on the ground. As they approached the giant ship, an invisible pressure began to appear in their hearts.

The head of this giant ship has been inserted into the ground and disappeared. When everyone looked up, they could see the magnificent ninth-floor cabin with a large number of tightly closed windows, but they didn't know what was inside.

With such a severe impact, the ground shattered and many buildings were destroyed, but the giant ship appeared to be unscathed.

Everyone was about a hundred meters away from the giant ship, and slowly started to stop. For this mysterious giant ship, there was an instinctive fear in their hearts. Wang Xuan noticed that there were many corpses on the ground ahead~www.mtlnovel.com~ Everyone As I approached slowly, I found that these corpses were the four-armed demon ape. A large number of four-armed demon ape corpses fell to the ground. No wounds could be seen. They seemed to have died silently. It seems a little weird.

"Everyone, don't approach casually, it's a little weird here." Wang Xuan suddenly spoke. He assimilated with monsters, and his instinct was far superior to everyone else. The closer he got to the giant ship, the stronger the sense of uncertainty in his heart. A large number of corpses fell in the place, and they immediately stopped everyone from getting closer.

Although Wang Xuan didn't talk much in the team, the strength he showed along the way faintly overwhelmed You Kai, so that everyone dared not underestimate him, and immediately stopped when they saw him speak suddenly.

Wan Qianying said, "Yes, don't get too close, let's go around the edge and take a closer look."

Under her suggestion, everyone rode the mechanical beast and began to walk around the giant ship at a distance of 100 meters.

Everyone quickly discovered that the corpses lying on the ground were not only the four-armed devil ape, but also a large number of corpses of green fox beasts with similar strength to the four-armed devil ape. At first glance, there were hundreds of them.

Like the four-armed demon ape, they couldn't see any corpses. It seemed that they died without warning just because they approached the giant ship.

"Could it be that there is some kind of terrifying power hidden in this giant ship, as long as you get close, you will die?" Huang Qingzhi's face changed color, and when everyone saw this, they were more afraid to approach casually.

Mou Xingweng said angrily: "It's hard to say, just in case, don't get close, by the way, no wonder the cyan fox threw the monster baby to the giant ship, if this giant ship really has such a strange ability, the baby will be thrown away. If you go in, will you die too?"

Chapter 222

Yukai said: "One holds the power of decay, and the other can cause creatures to die silently? If it is true, it may be wonderful to meet these two, but unfortunately we can't see it."

Everyone walked around the giant ship from a distance, constantly observing that the ground was full of giant cracks crisscrossing each other. Looking down through the cracks, it was dark inside, and it looked like black clouds had accumulated inside, which looked a bit different from ordinary ground cracks. different.

Along the way, I saw the corpses of monsters from time to time. In addition to the four-armed magic ape and the green fox beast, I also saw the corpse of the iron armored bear beast. This iron armored bear beast is a giant bear covered in pieces of iron armor. It can reach three meters, and its strength is infinite. In terms of strength, it even exceeds the four-armed demon ape.

But at this moment, there are a large number of bodies of iron-clad bear beasts lying there, silently, and no fatal wounds can be seen.

Everyone was afraid and did not dare to approach. When they circled to the other side of the giant ship, the fourteen people stopped again.

They saw the giant glass cylinders that were broken and fell to the ground, saw the twisted elevator that was smashed out of the glass cylinder, and saw the rune stone carvings appearing on the ground in the distance.

When they saw this scene, everyone's heart shook violently.

With so many glass columns and elevators, as well as the rune stone carvings on the ground, this is really the No. 8 safe area.

If this is really the No. 8 safe zone, then, are the five major cities that were originally surrounded by the No. 8 safe zone really completely turned into ruins?

Everyone felt as if they had been punched hard, and for a while, some of them were out of breath.

Xu Jian's face turned pale, and he murmured, "Impossible..."

Wang Xuan didn't say a word, looked around, suddenly slapped the little girl, and accelerated towards the destroyed safe area.

Tang Ruoyu followed closely behind.

No matter how serious the consequences, now that they have happened, the only thing they can do is to look carefully.

"These fallen glass cylinders seem to be more numerous than those in the No. 8 safe area. This is not necessarily the No. 8 safe area." Wang Xuan's voice came from a distance, which lifted the spirits of everyone who had suffered a heavy blow.

Wan Qianying quickly came back to her senses and said, "Yes, I remember that the ten glass cylinders before the No. 8 safety zone have always been severely damaged, and several of them are only half-sized, which is quite different from the ones in front of me. The glass cylinders on the ground don't seem to match."

If there are fewer glass cylinders destroyed on the ground in front of you than in the previous safety zone No. 8, it can also be explained that some glass cylinders have been destroyed, but it is absolutely impossible that these glass cylinders fell to the ground more than those in the safety zone No. 8. This is totally unreasonable.

The only explanation is that this is another safe area, and the ten glass cylinders in this safe area are relatively intact, so now it has been hit and fell to the ground, which makes it look better than the glass of the No. 8 safe area that was damaged before. Many columns.

Suspecting that this is not the No. 8 safe area, everyone felt a little more relaxed. As they approached, Wang Xuan saw a crack in the ground extending to the rune stone carving on the edge, and cut the rune stone carving from it. Obviously, this rune The stone carvings must have been destroyed.

In front of everyone, huge glass columns were lying on the ground.

These glass cylinders were either broken, or cracked, and fell to the ground. Some of the elevator doors on the surface were still intact, and some were twisted and collapsed inward, looking severely damaged.

"If this is not the safe area of No. 8, what is the safe area of No. 8?" Xu Jian expressed his doubts.

Wan Qianying said: "I heard the elders say that the safe area before No. 8 was destroyed a long time ago. You can see that the traces of the destruction are relatively new. It should have been destroyed in the past few days."

As soon as she said this, Wang Xuan looked at her and said, "So, this safe zone can only be one of the eighth, ninth, and tenth safe zones?"

Wan Qianying nodded towards him and said, "Yes, since we have excluded the No. 8 safe area, and it is not the No. 9 safe area, then only the last answer is left, this is the No. 10 safe area."

Wang Xuan's guess was the same as hers. Hearing her say it, he took a deep breath.

Xu Jian's face changed color and he said, "Is this the spare No. 10 safe area?"

Wan Qianying said: "The most reasonable one is the No. 10 safe area, because it is a backup, so the glass cylinder has not been damaged, so it will be more complete than the glass cylinder in the No. 8 safe area, and the traces of damage have only appeared in the past few days. Of course, this is not the No. 9 safe area, it can only be the No. 10 safe area."

Yukai said: "So, if the No. 9 security zone is destroyed, this No. 10 backup security zone will not be used?"

"Not bad." Wan Qianying said: "The current No. 9 safe zone is the last channel that can be used. If the No. 9 safe zone is also destroyed, we will be completely trapped here, let alone go up, even back down. No town can do it."

When everyone heard this, they all felt a little chilly on their backs. They originally thought that there was still No. 10 safe area for backup. Even if there was an accident in the No. 9 safe area in the future, there were still No. 10. Only now did they know that it was ten. The safety zone No. 1 was even more completely destroyed. The ten glass columns that reached the sky were all broken and collapsed. Obviously, the elevators leading to the towns could no longer be used.

Tang Ruoyu suddenly accelerated and walked towards the center of these collapsed glass cylinders. Wang Xuan's heart moved, and he followed her closely.

In the central area of the ten collapsed and broken glass cylinders, there is a ring formed by rune stone carvings with a diameter of about four or five meters on the ground. Tang Ruoyu carefully looked at the ring on the ground and the rune stone carvings.

Wang Xuan remembered that Tang Ruoyu had said before that there was a teleportation channel in the center of each safe zone, but the previous No. 8 safe zone and the No. 9 safe zone they entered this time were damaged and could not be used.

At the moment, although the glass column and hundreds of elevators in this No. 10 safe area are almost destroyed, the ground rune stone carvings in the central teleportation passage seem relatively complete, but I don't know if they can be used.

Others saw Wang Xuan and Tang Ruoyu looking at the small rune stone carving in the central area of the safe area, and they all gathered around.

Wan Qianying said: "There is also a similar small rune stone carving in the center of the No. 8 security zone, but it has been destroyed long ago. According to the elder's guess, this small rune stone carving should be a transmission channel, and it may be very early. At that time, the previous safe areas have not been destroyed, and they can be transmitted to each other through this transmission channel."

Wang Xuan heard what she said and glanced at her, thinking that what she said was different from what Tang Ruoyu said before, but she also said that this was just the guess of the elders of the five major cities, and it seemed that Tang Ruoyu was more accurate.

"The teleportation channel between several safe zones... If this thing can be activated, can we directly teleport back to the No. 9 safe zone?" Zhu Han said, "Unfortunately, I don't know how to activate it."

Tang Ruoyu did not speak, but carefully observed the runes on the ground. After watching for a while, he finally said, "This transmission channel should not be damaged, it may be usable, but it requires powerful energy to activate it."

Hearing Tang Ruoyu say this, everyone was stunned, and Wan Qianying's eyes flashed a strange look: "Do you know how to activate this transmission channel?"

This time Tang Ruoyu didn't hide it intentionally, but nodded slightly and said, "Yes, it only needs to inject powerful energy to activate."

As she spoke, she stretched out her left hand, and a sword appeared in her right hand, cutting it towards her left hand.

Huang Qingzhi asked, "What do you mean by powerful energy?" He just asked here, and he immediately understood when Tang Ruoyu cut his hand.

These super-powerful people, their skin and flesh contain energy, and their blood is powerful energy.

Blood flowed from the wound on Tang Ruoyu's left hand.

She dripped the blood on the rune stone carving on one side. The blood penetrated into it and was immediately absorbed by the rune stone carving. On the surface of the rune stone carving with the blood dripping, there was a faint red light flickering.

However, relying on her blood alone, it is obviously difficult to completely dye this rune stone carving red.

Seeing this, the others also came over, cut their hands one after another, and drenched blood on the rune stone carvings around them.

Everyone started working together, and a lot of blood was poured. The surface of the rune stone carvings with a diameter of four or five meters began to appear red light. A red circle of light appeared, floating slightly from the surface of the rune stone carving.

Seeing this scene, everyone was a little excited. This teleportation array is really not bad and can be used.

"Does it need blood every time it is activated?" Wan Qianying asked, wanting to completely fill the rune stone carving with blood, which requires a lot of blood. If it requires so much blood every time it is used, it will be really troublesome.

Tang Ruoyu shook his head and said: "It doesn't have to be our blood, as long as it contains energy, such as the blood of monsters. After activation, these energies can be maintained for a period of time, and blood is not needed every time."

Wan Qianying nodded, if the monster's blood is fine, that's acceptable.

Xu Jian said: "Although the teleportation channel here is good, the teleportation channel in the No. 9 safe zone has not been activated, right? Can it be teleported to the No. 9 safe zone now? Is this teleportation random or can I choose which safe zone to teleport to? "

He still thought that this teleportation array could teleport people to other safe areas.

"It's not a safe zone, it's the central city."

Tang Ruoyu finally explained a sentence, and then saw the red light circle appear, and immediately stepped in.

When she entered, the red light circle that had been slightly suspended rushed up, and enveloped her in it. With a sigh of relief, everyone saw Tang Ruoyu trembling slightly, and it turned into an afterimage, and then disappeared. .

"It's so amazing?" Everyone was amazed in their eyes.

Xu Jian wondered: "Where is the central city?"

It's a pity that Tang Ruoyu has disappeared, and no one can answer him.

Wang Xuan didn't say a word, and followed closely.

Like Tang Ruoyu, he was shrouded in the red halo and disappeared instantly.

Seeing that the two of them entered and disappeared one after another, they walked in one after another. Although it was the first time everyone heard of Central City, Tang Ruoyu and Wang Xuan walked in without hesitation. There is such a transmission channel in the center of the district. This central city must be very special and important, and they will not miss it anyway.

The rest of the people walked in, and as the red circle of light rose, they disappeared here.

When Wang Xuan entered the teleportation channel, he only felt a slight flash of red light around him. When the red light disappeared, he saw that the surrounding scenery had changed.

He saw that Tang Ruoyu was five or six meters in front of him, and there was a similar small rune stone carving under his feet, four or five meters in diameter, almost exactly the same as the teleportation channel he saw in the safe area.

Around this rune stone carving, there is a central square similar to the insect town, which looks several times wider than the central square of the insect town.

In this central square, there is a huge column, but unlike the glass column in the center of the insect town, this column has no elevator, and a large number of runes are engraved on the surface, which seems to have a special purpose.

There are groups of buildings around the square. Compared with the town of insects, these buildings are much taller. The most striking one is the surrounding city walls. Meter.

These eight columns are the same as the column in the center of the square. There are a lot of runes on the surface. The top of the nine columns is interwoven with a lot of metal keels to form a semi-circular metal mesh that covers the city. At first glance, the city Like a prison, it makes one feel uncomfortable.

Wang Xuan looked at the surrounding environment, it was quiet here, no one could be seen, Tang Ruoyu was also observing the surrounding situation.

He slowly walked out of the teleportation channel, followed by Wan Qianying, Xu Jian, You Kai and other twelve people, all of them appeared. Everyone was stunned when they saw the city in front of them. They slowly walked out of the teleportation channel and walked towards Look around.

"What the **** is this central city? It looks bigger than our town, but why is there such a metal mesh above it? It looks so weird, like a prison."

Wan Qianying looked at Tang Ruoyu and said, "What exactly is this central city? Why don't the elders of the five major cities know?"

Tang Ruoyu said: "A place similar to Insect Town, but the transmission channel is broken, and it is hidden in the depths of this forest, so it has not been discovered."

Hearing Tang Ruoyu's explanation, everyone was stunned. Looking around, it turned out that all of them were towering trees with a height of 40 to 50 meters. This city was hidden among these towering trees, and it should be very far away from the five major cities. The elders of the five major cities did not know.

If they didn't come to the No. 10 safe area because of the giant ship, the central transmission channel just happened to be intact, and they would not have found it here.

After Tang Ruoyu finished speaking, he walked towards the row of buildings facing him.

The others were amazed and followed closely. No one would have imagined that in this third-layer world, outside the ten safe zones and the five major cities, there is such a central city hidden in the depths of the forest, and There are teleportation arrays leading to this central city in these ten safe areas. Obviously, it is reasonable to say that the people below have come to the third floor, and it should be easy to enter the central city through the teleportation array. Destruction, this central city hidden in the forest, has not been discovered.

Tang Ruoyu could know the secret that even the elders of the five major cities didn't know. Everyone looked at her and felt her mystery, but no one dared to force her to say anything. And go.

Before they got close, everyone saw the words hanging on these buildings, and immediately understood the purpose of these buildings, and also understood why Tang Ruoyu said that this place was like a worm town.

There are horizontal plaques hanging on the buildings with words written on them. They are lined up all the way. They are "weapons", "armor", "materials", "tasks", "exchange", "tavern", "forging", "skills" and so on. Looking at it all the way, most of it is similar to the trading area in the town on the second floor. Of course, there are also a few obvious differences.

Seeing these words, everyone rushed forward immediately, with excited expressions on their faces.

"It turns out that the function of this central city is really similar to that of the town on the second floor. The equipment and materials sold here must far exceed the second floor."

Chu Dong, Zhu Han and the others cried out excitedly and excitedly.

Wang Xuan was equally excited. What he most wanted to know was what grade of weapons and equipment were being sold in the central city on the third floor.

Although excited and excited, the first time everyone entered this central city, they were still full of vigilance, in case there was anything strange.

So the fourteen people gathered together, and no matter how excited they were, they did not spread out and act without authorization, but followed Tang Ruoyu.

Tang Ruoyu walked into the building representing "armor".

Everyone followed her in.

The layout of this building is similar to that of Insect Town. There are two rows of self-service vending machines, which can accommodate many people at the same time, but at the moment there are only fourteen of them, and it looks empty.

In the self-service vending machine in the left row, everyone looked all the way, and immediately felt familiar, because the metal equipment of the third-order ordinary quality was sold here, and there were also such equipment for sale in Hundred Towns on the second floor. They are very disappointed not to see such equipment.

Everyone followed and looked at the self-service vending machine on the right. The five-piece suits of the third-order excellent quality were sold here~www.mtnovel.com~ Wang Xuan looked over and saw that there were "ghost suits" of the third-order excellent quality, and there were "Silver Scale Suit", and "Blue Shadow Suit".

The price of each piece of armor is ten medium-sized crystal scales, and a set of five pieces is fifty medium-sized crystal scales.

Seeing this price, many people nodded secretly. Although it is worth a lot, it is indeed worth the price for third-order high-quality equipment.

However, if you can become a super-powerful person, you basically get five sets of suits by hunting monsters, and you don't need to spend money to buy them.

"I didn't expect these equipment to be sold..." Xu Jian and others were disappointed. They have all the equipment of this third-order excellent quality. It is useless to them. Of course, for those who are on the second floor, these Equipment is baby.

After that, everyone began to look all the way. There are also two large rows of self-service vending machines in the building that sells "materials". The materials sold here are more comprehensive and higher-end than the town, and the most attractive ones are undoubtedly various crystals.

Chapter 223

For Baizhen on the second floor, all kinds of crystals can only be obtained by doing quests and hunting monsters, and here, most of the crystals can be purchased directly.

For example, crystals such as explosion crystal, smoke crystal, tracking crystal, sound transmission crystal, flame spar, etc., but unfortunately the most precious defense crystal is not available.

The fourteen people looked around like watching flowers on a horse. They were not in a hurry to buy, and they were ready to look at all the buildings before making a move.

After reading the "Materials" once, I entered the "Mission" building, which is similar to the "Mission Row" in the town on the second floor, but the danger level of the parchment paper that can be purchased is higher.

In addition, a special material task was added. Everyone looked at it, and there were a lot of dense materials listed above. Just select the required materials, and then put in the crystal scales, and then you can buy the parchment for the related material tasks.

Everyone looked at the densely packed various materials, such as blood gallstones, dragon tendons, turtle scales, earth dragon crystals, etc., all of which did not know their purpose.

Everyone watched all the way, including the "exchange" and "tavern", which were similar to the town below, but the scale was larger. After that, fourteen people came to the building with the "Made" banner.

In the town on the second floor, there was an unbuilt shop, and everyone was a little curious, wondering what this "built" would be.

Walking in, there is a very huge hall in this building. There are three giant instruments similar to gossip furnaces facing the hall. They must be three or four meters high, making them very huge.

There are eight screens around each giant instrument, and behind the three giant furnace instruments, deep in the hall, there is a larger furnace, the volume is larger than the three furnaces combined, and the surface is painted with Lots of rune patterns.

Fourteen people gathered around curiously, and clicked on the screens on the three stoves in front of them, wanting to see what happened.

Wang Xuan selected the stove in the middle and touched one of the screens, which immediately lit up, showing a line of text.

"The golden scale suit is made."

Looking at the following, it is divided into five parts of the suit, namely "Golden Scale Helmet", "Golden Scale Armor", "Golden Scale Gauntlets", "Golden Scale Knee Pads" and "Golden Scale Boots".

Wang Xuan casually clicked on the "Golden Scale Helmet", and a line of detailed introduction immediately appeared.

"To create a golden scale helmet, the main material: silver scale helmet, auxiliary materials: golden scale skin, blood gallstone, cost: 20 medium crystal scales"

Looking at the introduction of the Golden Scale Armor and Golden Scale Knee Pads, they are all the same, the difference is that the required accessories are not exactly the same. Each piece requires twenty medium crystal scales.

"It turns out that the so-called 'build' means that a third-order fine-quality silver scale suit can be made into a golden scale suit. I don't know what attributes this golden scale suit is."

While talking, he continued to check on the screen, and soon saw a detailed introduction to this golden scale suit.

The types of attributes enhanced by the golden scale suit and the silver scale suit are the same, the difference is that the increase rate is increased by 5%, each piece of the silver scale suit is increased by 25%, and the five pieces together are 29%.

The single-piece golden scale suit is increased by 30%, and the five-piece suit is 34%.

"Five golden scale suits can activate the special skill 'Golden Scale Body'."

Seeing this introduction, Wang Xuan's heart moved.

"After you have the five-piece set, can you still activate a special skill? The body of golden scales? The name looks good."

Wang Xuan was greatly moved, not to mention that this golden scale suit can improve various attributes by 5%, as well as skills, this third-order flawless quality suit will have a qualitative leap compared to excellent.

Everyone else saw these introductions, and they all showed surprises on their faces.

Wang Xuan is busy looking at the detailed forging method. The method is very simple. First, you need to determine which piece of equipment to build, put 20 medium-sized crystal scales, and put the required main and auxiliary materials into the forging furnace. You only need to wait five minutes to complete the build.

Only now did he understand why there were various special material quests in the building that sold various quests before. It turned out that all kinds of auxiliary materials were needed to create third-order flawless quality golden scale equipment.

He went to the forging furnace on the left. The "ghost suit" was created here. The process is similar to that of the "gold scale suit". The main material is the ghost suit, and the auxiliary materials are slightly different. Can activate a special skill called "Ghost Sneak".

The "Qinglian suit" is built in the forging furnace on the right, which is also of third-order flawless quality.

What everyone is wearing now is basically one of the three suits of "Ghost", "Silver Scale" and "Bi Ying". It can be said that there are all the main materials, but only those auxiliary materials are missing. Upgrade its crafting to a Tier 3 flawless quality set.

After reading these three forging furnaces, everyone walked to another giant forging furnace at the back.

Wang Xuan approached one of the screens and opened it. Only then did he realize that this forge was quite special. It could make all kinds of third-order fine-quality weapons into flawless quality, but because everyone had hatched beasts, they still needed to use weapons. It is extremely rare, so most people will not buy a third-order excellent quality weapon, let alone spend energy to create a flawless quality weapon.

After reading this, everyone was a little excited. After walking out, they continued to check the building with the "skill" plaque hanging there.

There is no such thing in the town on the second floor. Everyone is more or less excited when they see these two words.

"Skill... but I don't know what skill it is. Is it a place to learn skills?"

Everyone walked in with similar doubts and curiosity.

This building is different from all the previous ones. Inside is a semi-circular hall, which looks very empty. There are three tall stone doors on the semi-circular wall facing the front. Each stone door is inlaid with a screen in the center. In the card slot, from left to right on the stone door, there are plaques with "primary skills", "intermediate skills" and "advanced skills".

Everyone walked in and looked at the three stone gates. Wang Xuan and Wan Qianying came to the stone gate with "intermediate skills" written in the middle. Wan Qianying stretched out her hand to touch the screen, and the screen immediately lit up.

"100 medium crystal scales, you can enter the experience for one hour."

The lower card slot is naturally where the crystal scales are placed.

Wan Qianying was busy clicking the screen again to check the detailed explanation recorded on it.

"Entering this stone gate, there is a certain probability to obtain and comprehend the intermediate-level hatching beast skills."

Wang Xuan already understands when he sees this, because the eye of the illustrated book is an auxiliary item for hatching beasts, which can be used to equip hatching beasts, and these three stone gates should be able to obtain the skills used by hatching beasts, but the cost is really high. Too high, he only has 225 medium crystals in total, and he can only enter the stone gate, which represents the intermediate skill, for two hours, and according to the above introduction, it is not 100% obtained, but a certain probability.

The stone gate on the left represents "primary skills", and it takes ten medium-sized crystal scales for one hour, while the stone gate on the right representing "advanced skills" is even more frighteningly expensive, requiring a thousand medium-sized crystal scales for one hour.

After everyone watched it, they looked at each other, except that the primary skills were still cheap, the intermediate and advanced skills of Shimen were too expensive to enter.

"Entering Shimen, there is a chance to obtain the hatching beast skill..."

Most people turned their attention to the primary skill Shimen. Ten medium-sized crystal scales could enter for an hour. They were still able to afford these ten medium-sized crystal scales, and they were a little excited.

Although everyone's hatching beasts have grown to a super state, and the auxiliary props of hatching beasts like the Eye of the Pokédex have been obtained by a few of them, but the hatching beast skills have never been seen, let alone obtained, all at this moment. Heartbroken.

"What do you say, do you want us to go in and have a try together? Ten medium crystals are not too expensive. I think we can go in and try it out." Mou Xing looked at the crowd.

Originally, everyone was very excited to see the third-order flawless quality equipment, but they all knew that in order to create flawless equipment, all kinds of auxiliary materials were needed, and it was not easy to collect these auxiliary materials. It was estimated that it would take a lot of time. As long as you can afford ten crystal scales, you can immediately enter the stone gate that hides the skills of hatching beasts.

Seeing Mou Xing's question, Youkai smiled and said, "Why don't you ask? Of course, you have to go in and see, this central city is much more powerful than the ghost town, it is indeed the third floor of the building, think about the elders of the five major cities, how unexpectedly Never found it here."

Wang Xuan was moved when he saw everyone, and he was also moved. He even wanted to take out a hundred medium-sized crystal scales and enter the middle-level skill Shimen to have a look. However, considering that he still didn't know what was going on in the Shimen, he decided to join everyone. , first spend ten medium crystal scales, go to the primary skill Shimen to see the situation.

Seeing that everyone nodded in agreement, Yukai smiled and said, "That's the decision. Let's go out first to see if there is any other place, and then come in together."

"Okay." Xu Jian, Huang Qingzhi and the others all nodded in agreement.

After that, fourteen people walked out and came to the last building in the row. There was also a horizontal plaque on the building, but there were no words. The door was also closed, and everyone could not open it. , a message was sensed in his mind.

"You need the horn of the thundering beast to enter."

"You need the horn of the thundering beast to enter. I don't know what is in this building. Is it more special than that skill?" Yukai pondered.

Xi Muxue said, "Maybe it has something to do with the King's Certificate."

When Wang Xuan heard her talk about the King's Certificate, he thought of the northern area on the first floor before, and he couldn't enter it. He needed Cerberus' Teeth to enter, which could activate the mission of the King's Legend. It is very likely that the King's Certificate is hidden inside. Xi Muxue probably guessed based on this.

Several people nodded slightly, feeling that Xi Muxue's guess was accurate.

"No matter, no one knows where this thunder beast is hiding, let's look elsewhere first."

Yukai said as he walked towards other buildings,

Wang Xuan nodded in agreement, and the others did not object. The next fourteen people took a look around the central city. The main buildings here are similar to those of Baizhen on the second floor, but they are larger and more magnificent. The most important function is concentrated in the row of buildings that everyone has just seen.

After confirming that there were no other discoveries, the fourteen people turned back and headed towards the "skill" building together.

Fourteen people walked in and went straight to the stone gate with primary skills on the left. They took out ten medium-sized crystal scales one after another. Fortunately, everyone was basically the leader of each town, and they were not short of money. I dare not say about a medium-sized crystal scale, these ten are still available.

Yukai was the first to put ten of his medium-sized crystal scales into the card slot below. After that, the rune on the surface of the stone door glowed slightly, and soon the entire stone door turned into a door-shaped white light. Yukai walked in, it just melted into this white light and disappeared.

After he entered, the white light dissipated and turned into a stone gate again.

After that, everyone put their ten medium-sized crystal scales into the card slot one by one and entered the stone gate.

Wang Xuan entered the stone gate for the third time. After passing through the white light that the stone gate turned into, his eyes turned into a vast expanse of white. After the white light subsided, he turned into a stone room with a length and width of about ten meters.

You Kai and Mou Xing, who had entered before him, were not here, and they did not see anyone entering after that. Wang Xuan immediately understood that although they entered Shimen at about the same time, they entered an independent space and would not be able to appear in the same place.

This stone room is very empty, about five meters high. Except for a stone door at the end, it is empty and there is nothing inside.

Four metal tentacles appeared on Wang Xuan's right hand, guarding the surrounding area, and slowly walked towards the stone door at the end.

He had just walked to the central area of the stone room, and suddenly there was a slight noise above. Wang Xuan immediately swayed and moved three meters, but saw a white light shining down from above. When the white light subsided, a figure appeared in front of him.

This is a giant wolf as big as a buffalo, with a few fiery red scales covering its forehead, a slight growl from its open throat, and a faint smoke of fireworks from its mouth.

Wang Xuan immediately opened the eye of the illustrated book to capture the information of this giant wolf.

"Name: Fire Territory Giant Wolf, Race: Wolf Race, Dangerous Degree: ★★★★★★ (six stars), the Fire Territory Giant Wolf has the special ability to breathe fire, and the fiery red scales on its forehead are a kind of fire energy. Crystal, which stores a large amount of fire energy. The organ that emits flame is hidden in its throat, which can form a 'fire domain'. By killing the giant wolf in the fire domain, you can obtain fire crystals, and hatching beasts fuse fire crystals. Master the special skill 'Fire Domain'."

After capturing this information, Wang Xuan's spirit was lifted. It seems that these ten medium-sized crystal scales really have no white flowers. Killing this giant wolf in the fire domain will have a chance to obtain the skill "Fire domain".

The giant wolf in the fire domain let out a roar, and smoke and smoke came out of its mouth. It rushed forward, Wang Xuan dodged to avoid it, and his right hand controlled the metal tentacles. He was about to attack, and suddenly saw the fiery red scales on its forehead suddenly emit a fiery red light. , it spewed out a large group of flames from its open **** mouth.

Although this giant wolf in the fire domain can spray flame, its reaction and speed are only equivalent to the level of ordinary powerhouses in the super state. Wang Xuan is much faster than it. Almost as soon as it sprayed the flame out, he has moved to On its side, a metal tentacle in the right hand wrapped around his right arm, turning into a giant arm of a monster, with a faint blue light appearing inside.

With a "no" sound, the punch hit the Fire Territory Giant Wolf's forehead, and its head covered with a few fiery red scales shattered.

A white scale appeared, submerged in his right hand, and was swallowed and absorbed by him. Wang Xuan watched the giant wolf in the fire domain fall to the ground, and the fiery red scales on the forehead peeled off, a total of five.

This is the Fire Crystal, and fusion has a certain probability to obtain the "Fire Domain" skill.

Wang Xuan picked up the five fire energy crystals, held them in his right hand, and began to use the white light in his right hand to absorb and merge.

The fire crystals cut his right hand, and blood flowed out and penetrated into the five fire crystals. The fire crystals glowed slightly red, and slowly merged and penetrated into his skin. The white light engulfed it.

The energy of the fire crystal was absorbed and fluctuated endlessly in the white light. Wang Xuan narrowed his eyes slightly, hoping to find something. Go out and dissipate along the back of his hand.

Wang Xuan watched the fiery red energy seep out from the back of his hand and dispersed in the air, with a disappointed look on his face.

He failed to comprehend the "fire domain" successfully, and his magical beast characteristic seemed to reject this fire energy crystal.

"Is the attribute wrong? My magical beast seems to be very repelled from this fire crystal."

Wang Xuan shook his head, daring not to delay, and was busy walking towards the stone gate at the end. These ten medium-sized crystal scales could only enter here for an hour, and he was reluctant to waste them casually.

Pushing open the stone gate at the end, Wang Xuan walked in.

Here is also a huge stone room ten meters long and five meters high, with a stone gate at the end, almost exactly the same as before. He just walked to the center, and suddenly two white lights were cast above, the white lights converged, and a giant wolf in the fire domain appeared inside each.

This time, two giant wolves in the fire domain appeared.

His brows were slightly wrinkled. With his previous experience, Wang Xuan didn't let them attack at all. He took the first step, showing the giant arms of beasts on both arms, and quickly killed the two giant wolves in the Fire Region.

This time, he harvested ten fire crystals and tried to fuse them again. Unfortunately, as before, his monsters rejected the energy of this fire crystal, and looked at the fire energy that was repelled from the body~www.mtlnovel.com~Wang Xuan Can only helplessly shook his head.

He failed again, and Wang Xuan could only continue to walk towards the stone gate at the end.

Inside this stone gate is another stone room, and this time, three giant wolves in the fire domain appeared at one time.

For Wang Xuan, it is not difficult to kill this kind of super-normal level of the Fire Territory Giant Wolf. He quickly killed the three Fire Territory giant wolves and harvested fifteen Fire Crystals.

Looking at the fire energy crystal in his hand, he hesitated.

Should I wait for more fire crystals to be gathered and try again, or should I try to integrate it now?

"The first ten pieces were useless, and these fifteen pieces probably won't work. Let's wait and see."

Wang Xuan quickly made a decision, first put away the fifteen fire energy crystals, and then walked towards the stone gate at the end.

This time, when the stone door was opened, the stone room inside became a little different.

Chapter 224

The length and width of this stone room reached 15 meters, and the height reached 10 meters. It was much larger than the previous stone rooms. This time, there was not only a stone door at the end, but a stone door on each side of the wall.

The three stone gates were all tightly closed, Wang Xuan frowned slightly, his arms were in the state of giant monster arms, and two metal tentacles protected the top of his head and the surroundings, and walked towards the center.

A white beam of light shot down from above soon appeared in front of him, the beam converged, and a monster appeared inside.

This monster is a huge bear, its whole body is faintly glowing with a faint green light, exuding bursts of rotten stench, and a dark green crystal is inlaid in the middle of its forehead, emitting a faint green light.

Saliva flowed from the open mouth of the blood basin, and there were bursts of rancid stench. Wang Xuan frowned and covered his nose, opened the eye of the picture book, and captured its information.

"Name: Carrion Corpse Bear, Race: Bear Clan, Dangerous Degree: ★★★★★★ (six stars), Carrion Corpse Bear's whole body is poisonous, and its teeth contain poisonous carrion, once bitten by it, It will rot and die in a short period of time. The source of its toxin is the poisonous spar in the middle of its forehead. Kill the rotten corpse bear, get the rotten spar, and fuse it into the hatching beast. There is a certain probability to comprehend and obtain special skills' Rotten Corpse Fang'."

Wang Xuan frowned slightly.

Looking at the ugly and stinky appearance of the rotten corpse bear in front of him, he was a little disgusted. If he realized that this "rotten corpse tooth" became similar to it, it would not be worth the loss.

But after thinking about it, Wang Xuan still quickly launched the attack when the poisonous corpse bear appeared.

A metal tentacle was drawn in the face, and a faint blue light appeared on it, ready to kill it with one blow.

This rotten corpse bear is also a six-star danger, and its strength should be similar to that of the giant wolf in the fire domain.

But after watching the rotten corpse bear move its huge body and narrowly avoided it, Wang Xuan realized that the rotten corpse bear in front of him was much stronger than the giant wolf in the fire domain.

Its strength is at least comparable to the super-moderate powerhouse, and its movement speed will not be inferior to Xu Jian and Huang Qingzhi.

The carrion corpse bear opened its **** mouth, revealing its fangs.

The fangs stretched out of their mouths, each of which was a foot long, with a green light on it, and there was a faint flow of venom, which looked very hideous and terrifying.

In the face of an opponent that is comparable to the super state and medium strength, Wang Xuan immediately broke out the true power of the blue crystal scales.

A dazzling blue light shone from the two giant arms of the beasts, Wang Xuan suddenly accelerated, almost staggering past the carrion corpse bear that rushed over.

Without a sound, the rotten corpse bear fell into the air, and when Wang Xuan turned around, the giant arm of the beast was thrown out sideways, hitting its back from behind.

The body of the rotten corpse bear rang out with the sound of broken bones, and the huge body fell forward.

The metal tentacles controlled by Wang Xuan immediately stretched out, wrapped around his neck from behind, and started to entangle and strangle him. Pulling back, the body of the carrion corpse bear was pulled into the air and flew backwards. on the ground on one side.

The ground shook violently, and when he let go of the metal tentacles, the poisonous corpse bear fell to the ground, motionless, his neck was broken, and he died out of breath.

The rotten poison spar on its forehead peeled off, Wang Xuan approached and picked it up, hesitated for a while, or tried to merge into the white light.

Although he doesn't like using poison very much, especially the appearance of this rotten corpse bear makes him shake his head, but if he really masters this skill "rotten corpse tooth", maybe at a critical moment, he can get miraculous effects, which is also It is a trump card that cannot be missed.

It's a pity that this rot spar was fused into it. Like the previous fire energy crystal, it was repelled by monsters, and was quickly repelled by the white light, disappearing into the air.

"What's going on here, doesn't it mean that there is a certain probability? Why does it keep failing?"

"The fire crystal is repelled, and the rotten spar is also repelled. What is this for? Is it possible for Warcraft to be selective?"

Wang Xuan pondered slightly, without delay, he ran straight towards the stone gate at the end of the road.

Pushing open the stone door, there is a similar stone room inside. This time, I encountered two carrion corpse bears.

Seeing the appearance of the two poisonous corpse bears, Wang Xuan did not attack them, but turned back, returned to the original stone room, and ran straight towards the stone gate on the left.

Pushing open this stone door, there is also the same stone room inside, fifteen meters long and ten meters high, with a stone door on each wall.

A white beam of light appeared, and when the beam converged, a monster appeared inside.

This is also a wolf, and its shape is similar to the giant wolf in the fire region encountered before, but it has no hair on its body, and its bare skin is like green bark, which is indescribably weird. The huge vine-like tail has a green spar at the neck.

Seeing its appearance, Wang Xuan let out a sigh of relief, opened the eye of the illustrated book, and captured its information.

This is a six-star dangerous monster called the Tree God Wolf. If you kill it, you will be able to get the tree energy crystal around its neck. The hatching beast fuses this tree energy crystal, and there is a certain probability that you can comprehend and master passive skills. "Tree Skin".

Observing this information, Wang Xuan vaguely understood in his heart. From entering here to now, he has encountered three types of monsters, namely, the Fire Territory Giant Wolf, the Carrion Corpse Bear, and the Tree God Wolf in front of him. They seem to have different attributes. Maybe This was the main reason why his magical beasts couldn't fuse those energy spar before.

"It seems that it should be related to attributes. Only by finding an energy spar with similar attributes to your own magical beast can it be possible to fuse and master the skills of hatching beasts."

While thinking about it, Wang Xuan jumped up and attacked.

The strength of the tree **** wolf is slightly weaker than that of the rotten corpse bear, and he was quickly killed by him to obtain the peeled tree energy crystal.

I tried to fuse the tree energy crystal again, but it still failed.

"It seems that this ability is not suitable for Warcraft either."

This time, Wang Xuan ran towards the stone gate on the right side of the stone room, hoping to encounter new monsters and obtain new spar.

The energy spar of these three monsters before was not suitable for his Warcraft.

There seems to be an endless variety of stone chambers, and there are various monsters hidden here. Wang Xuan probably understands the rules here.

When he rushed into the new stone room and found two tree **** wolves inside, he resolutely took a detour and didn't waste time fighting with them.

This time he encountered the fourth type of monster he entered here.

Storm Tiger Beast, the same six-star danger, kill Storm Tiger Beast to get wind energy spar, there is a chance to comprehend the passive skill "Strengthening of Wind".

Killing this storm tiger beast and harvesting a wind energy spar, still failed, the beast couldn't absorb the wind energy inside and repelled it.

"What kind of spar can be merged with this magical beast..." Wang Xuan was a little helpless, he really didn't know, and now he can only try the same thing.

Unlike some people's hatching beasts, it can be seen at a glance. For example, Wan Qianying can control cold fire and must be able to integrate those fire energy crystals, and Huang Qingzhi can control wind. The wind energy spar of this storm tiger beast should be suitable for him.

"I don't know how they are now and what monsters they have encountered."

Wang Xuan left quickly while thinking about it and entered a new stone room. This time he encountered a flame demon lion. He did not challenge the fight, but quickly fled and entered another stone room.

Since his Warcraft can't fuse the Fire Crystal, there is no need to waste time here.

Next, he encountered an ice leopard and obtained an ice energy spar, which still could not be fused by the beast.

Soon, more than half an hour had passed, and Wang Xuan understood that the end time was not far away, and he finally encountered the ninth type of monster he encountered when he entered here.

Mechanical ghosts with a six-star danger level can obtain metal energy crystals after killing them, and have a certain probability to comprehend the passive skill "Metal Toughness".

After capturing this information, Wang Xuan's heart moved slightly, his body slammed into it, and he activated the giant arm of the beast, with two punches, to kill the mechanical ghost. When he saw the metallic spar on its forehead, it automatically peeled off and immediately reached out and picked it up.

"I can't believe that there is such a metal energy crystal..." Wang Xuan knew for the first time that there were metal energy crystals. He had a feeling that his monsters might need this kind of metal energy crystals. After all, the monsters showed them. The four tentacles are formed by a large number of metal sheets, and even the giant arm of the demon beast he appeared is also a fusion of its own flesh and metal, turning it into a half-flesh, half-metal appearance.

Dripping his own blood on the metal crystal, holding it tightly with his right hand, he immediately sensed the slight fluctuation of the white light in his right hand, creating a suction force that completely absorbed the energy in the metal crystal. The metal can be crystallized into fine powder and sprinkled on the palm of his right hand.

This energy poured into his white light, and was easily absorbed and merged by the white light immediately, and the entire white light became slightly brighter.

Sensing the change in the white light, although the change was not obvious, and he did not comprehend the passive skill "Metal Toughness", Wang Xuan understood that this was because there was only one metal energy crystal, and the energy contained in it was too weak. If he can find more metal energy

crystals, he should be able to comprehend and master this passive skill. He can also know from the name. This passive skill can strengthen the metal tentacles of his monsters, making them tougher and able to withstand stronger forces. break out.

"It's really amazing, and I have a feeling that if a lot of metal energy crystals are fused, my Warcraft will definitely be strengthened and become stronger, no wonder ten medium-sized crystal scales are needed in one hour, this is only elementary. Shimen, you will definitely be able to obtain more powerful metal energy crystals and skills in the intermediate and advanced level."

Wang Xuan was a little excited, and with a sway of his body, he immediately rushed towards the stone gate facing the wall, hoping to meet the mechanical ghost again.

Passing through the stone gate and entering a new stone room, two beams of light appeared, and when the beams converged, there was a mechanical ghost in each beam.

There was a hint of joy on Wang Xuan's face, he kicked his feet and swooped up instantly, two metal tentacles stretched out and pulled towards one of the mechanical ghosts, with a faint whistling of the wind, forcing the mechanical ghost to stop. Dare to block hard, and was busy dodging, but he launched the giant arm of the beast himself, with two punches in a row, almost a face-to-face, killing the mechanical ghost.

After that, he singled out another mechanical ghost and killed it quickly.

This time, I harvested two metal energy crystals in a row.

Immediately fuse the two metal energy crystals into the body and be swallowed by the fusion of white light.

The white light in the right hand became more dazzling, and the exposed metal tentacles seemed to have a layer of metallic luster. Although it was extremely thin, it was a change visible to the naked eye.

Wang Xuan wanted to continue, but suddenly a message appeared in his mind, but it reminded him that an hour was up. A white beam of light was cast above, covering him directly. When the white beam disappeared, he had already left the stone room and appeared in the hall. In the circular "skill" building, around him, You Kai, Mou Xing, Tang Ruoyu, Wan Qianying, Xu Jian, and Huang Qingzhi appeared one after another.

Everyone entered the stone gate at about the same time, and now that the time has come, they have been teleported out one after another.

The look on each face is different, or regret, or excitement, or disappointment, or excitement.

And the most excited among them was Yukai, who suddenly laughed: "It's done, it's finally done!"

Sun Yaofei and Yi Wu were teleported out. Hearing that You Kai was so excited yesterday, he immediately said, "Brother Kai, what happened? Could it be that the bottleneck has been broken?"

"Yes, haha." Youkai was in a good mood, haha laughed: "I just learned a style of rock fist, but this is only a primary skill, the power can only be said to be so-so, not as good as my strongest attack, but the most powerful. The important thing is that those earth energy crystals that have just been integrated into the 'rock king' can actually make the 'rock king' grow further, allowing me to break through the bottleneck. It's not a dream anymore."

Yukai said here, his eyes flooded.

Others listened to it and showed envious expressions.

Previously, Yukai was a top-level powerhouse in the super-state, but now he has successfully broken through the bottleneck, which means that his "rock king" has grown to a super-state top-level powerhouse.

Wang Xuan understands that Yukai is lucky, he must have entered Shimen, and he has encountered a large number of monsters with earth energy crystals, and he is in the bottleneck. In one fell swoop, he also comprehended the hatching beast skill "Rock Fist".

Of course, for him, it doesn't matter whether he understands "Rock Fist" or not, it can only be regarded as the icing on the cake. What is really important is the fusion of the earth energy crystals, so that his "Rock King" can further grow.

Everyone asked each other, and Wang Xuan found that most of the people's experiences were similar to his own, especially the super-medium-level powerhouses like Xu Jian and the others. Just fighting against the monsters that appeared, they had to be careful and go all out. You can't get a few spar in an hour, let alone a spar that matches your own hatching beast.

Wan Qianying said: "Now everyone should know that our hatching beasts can only absorb a certain type of spar, and other spar can only be wasted. I think we can take out the spar that everyone does not need, and then exchange it with each other. How about changing to the spar you need?"

Wang Xuan's eyes brightened slightly and nodded, "That's a good idea."

He happened to have 15 fire crystals that he couldn't use. He wanted to exchange metal crystals, but he didn't know if anyone else had obtained metal crystals.

Everyone took out their unnecessary energy crystals and began to exchange them. Wang Xuan exchanged two metal energy crystals, both obtained by Mou Xing.

Most of the people exchanged the energy crystals they needed. Wang Xuan held the two metal energy crystals in his right hand and slowly fused them.

The Warcraft has fused two more metal energy crystals, and the metallic luster on the surface of the extended metal tentacles was originally faint, but now it has been enhanced.

Wang Xuanneng can clearly feel that his demon beast has strong signs, although it is not obvious, but unfortunately there are still too few metal energy crystals, he needs enough metal energy crystals, if he can understand "metal toughness", there must be a strong strength improvement.

"This is just the primary stone gate. If there are a hundred medium-sized crystal scales, I really want to go to the intermediate stone gate." Youkai looked at the stone gate that represented intermediate skills, and regretted that he didn't have one hundred medium scales on his body. No. of crystal scales.

Although there are not 100 medium crystal scales, it is no problem to take out ten medium crystal scales. Youkai has just harvested a huge amount, and he can't hold back. After everyone exchanged crystals, he took out another ten medium crystal scales. Crystal scales, re-entered the primary skill Shimen again.

After that, Tang Ruoyu, Mou Xing, and Su Tang also entered one after another.

Wan Qianying, Xu Jian, Huang Qingzhi, Zhu Han, Chu Dong and the others did not enter again. It was not that they did not have ten medium-sized crystal scales, but it was more difficult for them to hunt down those monsters after entering. A monster that is comparable to a super-moderate powerhouse can only escape. A little carelessness, not to mention obtaining a spar, would be life-threatening.

So they didn't go in for a second time, but left here and went to the "build" place. They decided to find a way to create flawless equipment first, and then talk about it after improving their strength.

The fourteen people are now divided into two groups. The strong ones basically chose to continue to enter the primary skill Shimen to try their luck, while the weaker ones went to the place of "building".

Wang Xuan, like You Kai and Tang Ruoyu, also took out ten medium-sized crystal scales and entered the primary stone gate again.

Originally, he wanted to take a gamble~www.mtlnovel.com~ to enter the intermediate stone gate, but after considering it, he gave up temporarily. No one knows what kind of monster is hidden in this intermediate stone gate. If it is stronger than himself, then he will not only have a hundred coins The medium-sized crystal scales were wasted in vain, and there were dangers, so he planned to train in the primary stone gate first, and then enter the intermediate stone gate.

Entering the primary stone gate again, Wang Xuan reappeared in the stone room. This time he encountered a poisonous arrow snake beast. Killing it can get a highly poisonous spar, and there is a certain probability to comprehend and master the special skill "poisonous arrow".

With previous experience, Wang Xuan saw this poisonous arrow snake beast and rushed towards it without hesitation. The two ghost wings, one large and one small, spread out behind him, accelerating the sprint, but not attacking the poisonous arrow snake beast. , but bypassed it and rushed into the stone gate on the other side of the wall in an instant.

Ten medium-sized crystals can only last for one hour. Wang Xuan didn't want to waste time, and shuttled through the stone rooms at a very fast speed. As long as he encountered a monster that he didn't need, he would immediately dodge and rush into the stone door to leave. Go to the next stone room after a while.

In this way, he soon encountered the mechanical ghost he needed in the fifth stone room.

Chapter 225

He successfully killed the mechanical ghost and obtained a metal energy crystal, followed by rushing to another stone room, and encountered two mechanical ghosts again. Now he has three metal energy crystals.

He did not fuse the three metal energy crystals, but temporarily stored them. He planned to save a few more crystals for one-time use. Maybe the effect would be better.

After that, he encountered three monsters that he didn't need in the three stone rooms, but they all left quickly, basically not wasting any time, and then encountered two mechanical ghosts again.

This time, for an hour, Wang Xuan didn't waste a bit of time. He kept traversing the stone chambers quickly. Only when he encountered the monster he needed would he kill it, harvest metal crystals, and encounter other monsters. Dodge and escape as fast as you can.

At the end of an hour, Wang Xuan was teleported out and returned to the original semicircular hall.

This trip, he has gained a lot, and he has obtained seventeen metal energy crystals.

He did not fuse the seventeen metal energy crystals in the stone gate, but kept them all.

He walked out of the stone gate and saw that the hall at the moment was actually empty and empty, neither Wan Qianying, Xu Jian and others, nor Yu Kai and others.

You Kai and Tang Ruoyu entered the Shimen earlier than him, and now they are about to enter again. After all, this Shimen is too tempting for them. Unless they have less than ten medium-sized crystal scales on their bodies, they will not stop.

Looking at the seventeen metal energy crystals, Wang Xuan dripped his blood on them without hesitation.

As the blood penetrated and merged, the energy in the seventeen metal energy crystals began to be continuously absorbed by his magical beasts, and the white light in the right hand suddenly fluctuated violently.

The white light became brighter, and as the seventeen metal energy crystallized into powder and sprinkled from his palm, the four metal tentacles on Wang Xuan's right hand extended out, each reaching the limit of seven meters long, with a metallic luster flowing on the surface. Then, there was a faint creaking sound inside, like a transformation.

Just now, he felt a new force pouring out of these four metal tentacles, and the toughness of each metal was greatly improved.

Two of the metal tentacles wrapped around his arms, fused with flesh and blood, and turned into two huge beast arms.

The surface of the half-flesh, half-metallic beast arm also has a faint metallic luster flowing, but compared to the metal tentacles, the beast arm contains the breath of life, not exactly a cold metal touch.

Just now, he finally succeeded in comprehending the passive skill "Metal Toughness".

This skill does not need to be used, but permanently increases the toughness of the metal of Warcraft. Wang Xuan feels that this toughness has at least doubled, which means that his metal tentacles and giant arms of Warcraft can withstand and explode more powerfully. energy of.

Although he has grown to a super state, the energy of the blue crystal scales still cannot fully explode, because he can't bear it, and now with the understanding of "metal toughness", the strength he can bear has increased again, and he can explode even more powerful The energy of the blue crystal scales, the improvement of this strength is unimaginable.

"No wonder Yukai excitedly said that he broke through the bottleneck and became a super-state top powerhouse... I feel that I am almost there. This breakthrough, I am at least a super-state top level. If you use the mechanical god's left arm, you should be able to hit Power beyond the top."

His strength has increased, and the tide has risen. If he unites Xiaojiao and the Mechanic God Crystal to launch an attack, his strength will also increase accordingly.

The hall was silent, and Wang Xuan took out ten medium-sized crystal scales again and entered the primary stone gate again.

With stronger strength and more experience, this time Wang Xuan harvested more metal energy crystals, a total of twenty-seven.

This time he also encountered the second type of monster with metal energy crystals, the snapping beetle, a giant tortoise with a crocodile head covered in metal pieces.

However, after killing the metal energy crystal obtained by the snapping beetle, what you may comprehend after absorbing it is still the passive skill "Metal Toughness".

At the end of an hour, look at the twenty-seven metal energy crystals, and fuse them into the body again.

This time, I have absorbed so many metal crystals, but the effect is very small. It seems to Wang Xuan that the effect is not as obvious as the previous fusion of two or three metal crystals.

"It seems that getting this metal energy crystal here has no effect on me."

Wang Xuan pondered slightly and looked at the Shimen with "Intermediate Skills" written on it.

After a little hesitation, he finally took out a hundred medium crystal scales and walked towards the stone gate.

Throwing a hundred medium-sized crystal scales into it, the stone gate turned into a white light, and he passed through the white light and walked in.

Different from the stone chambers in the primary stone gate, there is a huge karst cave in the eye. The karst cave is a bit dark, and only a faint white phosphorous light appears around it.

There is a hole around the cave, and there is a light curtain blocking the hole.

Wang Xuan released the metal tentacles and guarded them around, stepping on them carefully.

The first time he entered here, he was still very cautious.

As he stepped forward a few steps, the ground at eight or nine meters in front suddenly bulged upward, and soon turned into a monster formed of rocks, forming a giant ape, opened his mouth, and let out a slight growl, violently. He jumped on the ground, jumped seven or eight meters, and waved his arms to hit him.

This punch came out, with a faint whistling of wind breaking through the air, so fast that Wang Xuan's heart shuddered.

His eye of the book has already captured the information on the monster in front of him.

"Name: Gibbon, Race: Ape, Danger: ★★★★★★ (six-star), although the risk of Gibbon is only six-star, it is the most powerful of the six-star dangers. One of the existences, it has a rocky body, invulnerable to swords and guns, and infinitely powerful. The middle of its forehead is inlaid with an intermediate earth energy crystal. It kills the gibbon stone ape, and the intermediate earth energy crystal obtained can be fused into the hatching beast, and there is a certain probability to comprehend and master it. Hatching Beast Intermediate Skill: Rock Skin."

Sensing the information, Wang Xuan swayed, took the initiative to meet him, and the giant arm of the beast appeared.

With a "bang", the two sides confronted each other head-on. Wang Xuan wanted to test his current level of strength. Without borrowing the blue crystal scales, he failed to knock back the stone ape with one blow, but he was shocked. Shake back.

The gibbon stone ape let out a low roar, and another punch followed closely, towards his face. If this punch was to be solid, even Wang Xuan's brain would burst and he would die immediately.

Wang Xuan took a light breath, the two ghost wings on the back stretched out, the ghost wing on the right was two meters long, and the ghost wing on the left had grown to one meter two without knowing it.

Although this gibbon stone ape is as dangerous as the monsters it has encountered before, it is a six-star, but its strength is very different. It is much stronger than the fire domain giant wolf or the storm tiger beast encountered in the primary stone gate before. , Wang Xuan preliminarily estimated that its strength is comparable to the superior powerhouse in the super state.

If Xu Jian and Wan Qianying encountered it, it would be difficult to escape.

The thought moved slightly, and the two ghost wings stirred. Almost at the moment when the fist of the gibbon was about to hit him, he suddenly moved a foot to the right and narrowly avoided it. This time the gibbon was exhausted. It was too late to take it back. Wang Xuan opened his left arm, and a blue dim light lit up on it, as if a photoelectric was turned on.

The energy of the blue crystal scales was stimulated, and the giant arm of the beast he swung out suddenly disappeared, leaving only an afterimage in the air, and when the fist reappeared, it had already hit the face of the gibbon stone ape, smashing its Brain shattered.

Because the intermediate earth energy crystal contained powerful energy, it was not damaged, but flew out.

Wang Xuan jumped up and chased after him, grabbing it with his right hand.

He couldn't use this intermediate earth energy crystal, so he put it away, and a white scale appeared, submerged in his right hand and the ghost wings, and the energy fluctuations were a bit violent.

This kind of monster is comparable to the super-high-level powerhouse, and the effect of killing one is better than killing ten ordinary six-star monsters.

Without stopping, Wang Xuan rushed towards a nearby hole, and soon passed through the light curtain at the hole and entered another similar giant karst cave.

The ground of this giant karst cave trembled slightly, and two figures bulged, but two gibbon stone apes appeared.

This time, Wang Xuan did not fall in love again, but changed his direction. The two ghost wings flapped and circled at a faster speed than them. .

"It seems that the situation here is similar to that in the primary Shimen, but the monster is much stronger, and the energy spar has become an intermediate level, and the skills that can be understood have also become intermediate."

One hundred medium-sized crystal scales can only be entered for an hour. How could Wang Xuan be willing to waste it and run with all his strength. He soon encountered a second type of powerful monster. Its strength is similar to that of the arm stone ape, and the whole body is pitch black. With an intermediate dark energy crystal, the hatching beast fuses, and there is a certain probability to comprehend the intermediate skill "Dark Erosion".

Obviously this is a hatching beast suitable for dark attributes.

Wang Xuan quickly bypassed, and when the dark demon approached him, he unfolded his ghost wings and ran with all his strength. He quickly threw it away and rushed into the new giant cave.

After so many times, when he rushed into the sixth giant cave, he finally encountered the monster he needed.

The black iron lizard has a six-star danger level. The whole body is made of black iron, glowing with the black light of black metal. The middle of the forehead is inlaid with the intermediate metal energy crystal, and the fusion has a certain probability to comprehend the intermediate skill "living metal".

Finally meeting the monster he needed, Wang Xuan showed a hint of excitement, and immediately rushed forward with all his strength. A powerful blue light erupted from the giant arms of the monster. With the further improvement of his strength, he was now able to stimulate more powerful energy. The power of the colored crystal scales exploded, and the blue dim light in the arms became brighter, which made the speed and power of his giant beast swing to an astonishing level, and there was a faint sound of sonic boom in the air.

With a bang, the giant beast arms of his arms disappeared together, and the head of the black iron lizard that rushed up suddenly exploded and exploded. After Wang Xuan's disappearance, the giant beast arms reappeared and hung down, with a bright blue light on the surface. When it converged, the black iron lizard turned into a headless corpse and fell down slowly.

This black iron lizard, which is comparable to the super-high-level powerhouse, didn't have time to exert its powerful strength, and its head was blown up.

A white scale appeared and did not enter Wang Xuan's right hand. He went straight forward and picked up the intermediate metal crystal that fell to the ground.

With the previous experience, he did not immediately merge and absorb it, but put it away, and only waited for an hour to end before using it together. The more metal energy crystals there are, the greater the possibility of comprehending skills.

Shaking his body, he rushed towards the oncoming hole.

This time, he encountered two black iron lizards, borrowing the power of the powerful blue crystal scales, and with the increasingly powerful ghost wings, he easily eliminated the two black iron lizards and harvested two intermediate metal energy crystals again.

Next, as before, when he encountered a monster that he didn't need, he immediately accelerated to leave and entered another cave. Only when he encountered a metal monster he needed would he shoot and kill and harvest intermediate metal crystals.

When the hour was over, he was teleported out and returned to the semi-circular hall. This time there were two more people in the hall. It was Mou Xing and Su Tang. They were standing aside and the two were talking.

Suddenly seeing Wang Xuan appear, they looked up together.

"Wang Xuan, how's the harvest?" Su Tang asked with a smile on her face.

Mou Xing also looked at him.

They see Wang Xuan's strength in their eyes. They are both polite and fearful towards Wang Xuan, and they dare not underestimate him.

Wang Xuan nodded towards them and said, "Not bad." As he spoke, he took out the fifteen intermediate metal energy crystals that he had just harvested in the intermediate stone gate for an hour. Slowly merge into your own monster.

When they saw the energy spar in Wang Xuan's hand, they thought it was just the primary energy spar obtained from the primary stone gate. There was nothing strange about it. They all had high-level combat power before and entered the primary stone gate. After a few times, I was basically familiar with the process inside. This time the harvest was great, so it is not surprising to see Wang Xuan take out so many energy spar.

Wang Xuan completely absorbed the fifteen intermediate metal energy crystals into the white light. This time, the white light in his right hand became extremely bright and dazzling, with violent fluctuations.

Wang Xuan felt the changes in the white light. The energy contained in the fifteen intermediate metal crystals was extremely powerful. This metal energy was completely absorbed by the monsters, and the white light was continuously digested.

This energy extends through the white light to the metal tentacles that he can manifest, almost without his summoning, a metal tentacle appears, with a metallic luster on the surface, this metal tentacle is extremely thick, Wang Xuan feels that he has just absorbed it. The metal energy of all turbulently entered this metal tentacle and was continuously digested by it.

Each piece of metal that forms the metal tentacles is strengthening and becoming stronger, the energy contained in it is increasing, and a layer of black light is faintly appearing on the surface. If the metal tentacles were originally made of steel, now they are faintly towards the color of black iron. change.

It is a pity that this transformation has not been completely successful, but there are just signs of transformation, as if something is missing, the successor is powerless, and then everything is quiet.

Wang Xuan understood that fifteen intermediate metal crystals were still far from enough to transform his metal tentacles, and he failed to comprehend the intermediate skill "living metal".

"It seems that this intermediate skill must be extremely powerful, otherwise it would be impossible to need so many intermediate metal energy crystals. It's a pity..."

Wang Xuan felt the change of this metal tentacle. The surface was originally brighter, and a layer of black light appeared in the luster of steel. Compared with the bright luster of steel, this layer of black light was mysterious and seemed inconspicuous, but it was relatively inconspicuous. Compared with the dead thing with steel tentacles before, there are faint signs of living.

He understands that this is the intermediate skill "living metal". If he can fully master this "living metal", the metal tentacles he controls will no longer be just cold metal machinery like it is now, but like living creatures. It is conceivable that at that time Their flexibility and their own fit will be perfect, and their strength will be amazingly improved again.

"There are only 95 medium-sized crystal scales left, and there are five more to go in." Wang Xuan thought to himself, and put the metal tentacles back at the same time.

Su Tang and Mou Xing sensed the suffocating pressure from this metal tentacle just now. Although they didn't know what was going on, they also vaguely understood that the Wang Xuan in front of him was only getting stronger. .

"I don't know if anyone is still in Shimen now, but unfortunately I don't have a medium crystal anymore." Mou Xing shook his head as he spoke, and then walked outside.

Su Tang smiled at Wang Xuan and said, "I don't have it anymore, how about you?"

Wang Xuan also shook his head~www.mtlnovel.com~ and walked outside. Since he could no longer enter the intermediate stone gate, he also decided to go out and have a look. In addition to comprehending skills to improve his strength, another way to improve his strength is to wear a suit Tier 3 premium quality equipment is crafted to flawless quality.

In his current Sumeru mustard belt, there is also a quest about the legend of the ghost suit, and the content of the task is also about evolving the ghost suit into a ghost suit, but the address is in a ghost town, and he has never been there.

After walking out, they found that Wan Qianying, Xu Jian, Huang Qingzhi, Zhu Han, Sun Yaofei, Yi Wu and others were all gathered together, sitting on the ground, surrounded by mechanical beasts patrolling them, apparently they were resting and released the mechanical beasts. Beast Alert.

It was already the second half of the night. Everyone felt tired after working all night, so they gathered together to rest and waited for those who entered Shimen.

Most of them are only super-intermediate powerhouses. It is very difficult to enter the primary stone gate. They waste ten medium-sized crystal scales, and they can't get a few energy crystals. After the second time, they all gave up and decided to use the medium-sized crystal scales that were not much on hand in more valuable places.

Seeing Wang Xuan, Mou Xing, and Su Tang walking out, Wan Qianying turned her head and looked over.

Xu Jian let out a soft sigh and said, "Wang Xuan, you guys have finally come out."

Wang Xuan didn't see You Kai and Tang Ruoyu in the crowd. It seemed that the two of them should still be inside the stone gate.

"Yeah." Wang Xuan nodded towards them and walked over with Su Tang and Mou Xing.

Su Tang looked at the resting people and said, "What plans do you have next?"
