

Last Building on Earth Chapter 231-235

Chapter 231

"I believe that you should be able to break through to the super state soon. With your current strength, as long as you break through to the super state, you will at least be a medium or even superior powerhouse in the super state." Wang Xuan smiled.

I thought that although Xu Jian and others have reached the super state, they have not been able to fuse a few energy spar in the primary skill stone gate, let alone comprehend the primary skill, and Zhao Lei and the others are equivalent to merging at the perfect state level in advance. A lot of energy spar, and maybe even comprehend the skills of hatching beasts, which can be imagined for the improvement of hatching beasts.

Either they don't make a breakthrough, and a breakthrough is at least a medium-level super-state. It is not difficult to advance to a super-state level with more tempering. If they can go to the central city, put on a full set of third-order flawless equipment, and obtain a set of skills, their strength will inevitably increase. There will be a boost.

Of course, all of this is just a good idea. As for what level they can reach, Wang Xuan is not sure.

Zhang Haofei asked curiously, "Is there still many levels of this super state?"

Wang Xuandao: "Yes, it is said that it is divided into six grades, which are ordinary, medium, superior, top, peak and extreme."

Zhao Lei smiled and said, "Wang Xuan, what about you, which level of these six levels is it now?"

Wang Xuan smiled slightly and said, "It's hard to say."

Zhang Haofei immediately lowered his voice and said, "Is this a confidential matter?" While talking, he looked around. Fortunately, no one dared to approach or disturb them casually, and no one was eavesdropping.

Wang Xuan smiled bitterly and said, "It's not a secret. You misunderstood. I mean, I can't estimate which level I am now."

He didn't lie when he said this. In fact, in his opinion, the six-level division of this super state is relatively vague, and it is not considered a real realm. It is purely used to express the strength of combat, not like hatching. The various forms of beast growth are so straightforward.

For example, he knows that the current Yukai should be regarded as the top powerhouse in the super state, and he believes that his strength should be above Yukai, but in the end it is still the top, or the peak, or even the limit, no similar opponents appear, no It is not easy for him to compare a specific criterion.

The only thing he can be sure of now is that he is in a normal state, just using the power of Warcraft. His strength should be stronger than the general super state, and it seems to be slightly inferior to the top level, and it should be somewhere in between. a level of.

Once the power of the blue crystal scales is fully stimulated, his strength will have a qualitative leap, and the combat power must be at the top or even the peak level.

Of course, this didn't even count the power of the ghost wing, the eye of fear, and the left arm of the Mechanic God to fully activate the ghost car, so adding all these powers together, he can't estimate what level he is now.

When everyone heard Wang Xuan's words, they looked at each other in dismay, and gradually understood. It is estimated that Wang Xuan's current strength is a bit unimaginable.

After chatting for a while, Wang Xuan took them to the high wall in the north to observe the situation in the north.

The morning passed quickly, Wang Zong never made another whistle, and there was no movement in the north.

It seems that Tang Ruoyu was right. Last night, the king insect screamed, just because there was a hole above, the rotting ship appeared, which alarmed it. It was uneasy, not to summon the insect tide.

For safety's sake, after noon, everyone still stood there for two or three hours, making sure that there would be no worms, so they dispersed one after another.

Since there was no insect tide, Wang Xuan decided to go to Shizhen and Xingzhen to collect the required materials, and secondly, to inform the leaders of Shizhen and Xingzhen, and go to the No. 9 safe area on the third floor to gather the day after tomorrow.

Gu Manyao and Tie Jun wanted to be with him, and Wang Xuan agreed, so he took out the masks of two **** clowns and gave them to Gu Manyao and Tie Jun, one for each.

Gu Manyao and Tie Jun are not stupid either. When they saw this clown mask from hell, they thought of the clown mask that Shangworm Town needed at that time, guessing that it should be similar.

"You need this **** clown mask as a pass to go to the third floor." Wang Xuan said while looking at Zhao Lei, Zhang Haofei and the others: "I have prepared this kind of pass for you, and I will give it to you only when you reach the super state."

"So you have to work hard. Since you have the adventure of the underground ancient city and obtained a lot of spar, it should not be difficult to break through to the super state, but it is only difficult to break through in Scorpion City, you must find more powerful monsters. possible."

Zhao Lei said: "You mean to go to the insect country in the north?"

Wang Xuan nodded and said, "Yes, but don't be reckless. In short, be careful. If you join forces, as long as you don't act impulsive, it shouldn't be a big problem."

He knew that after Zhao Lei and a few people obtained the energy spar, the hatching beasts had grown in strength, and now they are at least the peak powerhouses in the state. .

"But don't go into the **** tower, it's dangerous even if you go in there."

Zhang Haofei grinned and said, "Don't worry, we all want to break through the supernormal state now. Grandma's, Tie Jun is actually one step ahead of me. How can you bear it?"

Tie Jun couldn't help but said, "Zhang Haofei, why can't I be one step ahead of you?"

Zhang Haofei laughed and said, "I'll just say it casually, Brother Tie, are you really angry?"

Li Haotian replied, "I don't think so. Brother Tie is not someone who gets angry easily. Zhang Haofei, you treat the belly of a gentleman with the heart of a villain."

Zhang Haofei glared at him immediately, as if he was about to make a move.

But now both sides are at the same level, Li Haotian is not afraid of him, and Zhang Haofei's staring appearance can't scare him.

Tie Jun shook his head and was busy getting between Zhang Haofei and Li Haotian, with a helpless smile on his face: "Hey, you guys, I really can't do anything about you."

Only then did Zhang Haofei laugh. He had a good time with Li Haotian these days, and he was just pretending, not really wanting to take action.

Yu Shanshan pursed her lips, took Gu Manyao's arm, and whispered to her in a low voice. The two have been together these days, and they have become good friends who can talk about everything. Now Gu Manyao wants to be with Wang Xuan. , they are going to be separated temporarily, and now they are saying goodbye.

Bai Yan remained silent, with no expression on his face.

Since Yao Tiande and Duan Chen joined later, their relationship is a bit worse compared to them. They are a bit like two outsiders in the team, but they have always been respectful to Wang Xuan, compared to Zhao Lei and Zhang Haofei. In other words, Wang Xuan was more like a friend than a leader, and the two of them really regarded Wang Xuan as the boss and leader, and they were his subordinates.

Wang Xuan looked at the group of them with a smile on his face. For some reason, he felt very comfortable and relaxed even watching them making noise. It seemed that he had never been with Wan Qianying, Xu Jian, and Huang Qingzhi before. This feeling.

Wang Xuan soon thought of the difference, Wan Qianying and Xu Jian were too serious, they always looked serious, and they always felt a sense of depression when they were with them.

"Then I'll take Manyao and Brother Tie up to have a look first, so hurry up." After Wang Xuan finished speaking, he raised his head and stared at the sky above again. He hoped that Zhao Lei and others could

break through the super state sooner, and he also thought of Tang Ruoyu's words, she It was said that there was a hole in the sky, and the rotting bow appeared, which represented some kind of terrifying dust collection, and even the king bug was awakened and screamed uncomfortably.

All this means that there may be some kind of change in this insect town, and no one knows what will happen next. The safest way at present is that they all break through to the super state as much as possible. If the situation is wrong, they can enter the third layer world.

Although the third-layer world seems to be chaotic, at least the No. 9 security area and Central City have strong defenses, especially the defense of Central City, which is almost impregnable. Even if there is a huge crisis, it should be able to withstand it.

After saying goodbye to everyone, Wang Xuan took Gu Manyao and Tie Jun on the No. 9 elevator and entered the third floor.

When they got out of the No. 9 elevator and entered the third-floor world, Gu Manyao and Tie Jun immediately opened their eyes wide, showing both curious and shocked expressions on their faces.

At this moment in the No. 9 safe area, the mask is activated to protect the safe area. Around the mask, there are a large number of tree demons, mushroom people, piranhas, perennial vines and some new monsters wandering. Impacting towards the mask, although it will be bounced off by the mask, but still enjoying it, seems to want to lose the energy of the mask.

Above the sky, a group of iron-winged owls hovered among the ten glass columns. Occasionally, iron-winged owls threw themselves into the broken building above, and then shattered and fixed there, and then slowly Disappeared.

There are several people in the mask, and they are in a hurry, walking towards the other elevators.

Wang Xuan saw that they were a little familiar, they should be some of the thirty-six people before, but he didn't know their names.

"This is called the No. 9 safe area. These ten glass columns were cut off from above, and now it is impossible to go to higher floors."

Knowing that Gu Manyao and Tie Jun were confused, Wang Xuan took the initiative to explain: "There is a mask to protect this place, and monsters outside cannot enter, while we humans can enter and exit freely. This time we discussed and decided to gather all the super-powerful people in Baizhen to repair it. The transmission channel in the center, and the search for the five major cities."

Wang Xuan took the two of them and walked towards the other glass column while talking, towards the elevator with the words "Shizhen" hanging above it.

On the way, he kept talking about the changes in the third floor and everything about the central city.

"I can't believe that there are a hundred towns like Worm Town. It's hard to imagine how many super-powerful people there are? Even if there are five leaders in each town on average, isn't that five hundred?" Tie Jun was a little shocked.

He broke through to the super state, and he was very proud at first. After all, the super state in the insect town can be said to be one of the best, but he didn't expect that there are as many as a hundred towns in these three layers. It seems that the super state powerhouse is not that rare. .

Wang Xuan said: "That's not true. I heard that many towns have been destroyed, and if you want to come up, you need a clown mask from hell. It's not easy to enter the **** tower to get this clown mask. Even the super strong can easily die there. Qiao Jingping, the former leader of the 'Justice League', was considered a super-moderate powerhouse, but he also died in the Hell Tower last time."

Gu Manyao said: "So you need super-high-level strength to enter the Hell Tower?"

Wang Xuan sighed: "It's not that you have to be high-class, but at least when you're in the high-class, entering the tower can be considered a bit of self-protection."

Tie Jun smiled and said: "Man Yao, you have obtained blood erosion, and a lot of energy spar, and you have learned a skill of hatching beasts. You ask Wang Xuan to help you to see which level in super state, I guess it is at least on the upper level. Wait or more."

Wang Xuan said, "I'll see later." As he spoke, he opened the "Stone Town" elevator and walked in.

The three entered the elevator, Wang Xuan pressed the button to the second floor, the elevator vibrated slightly, then stopped quickly, and then the door opened.

I walked in from the elevator, and when I saw it, I immediately saw a completely different style from Insect Town.

The buildings in this "Stone Town" are almost all made of bluestone. Looking up at the sky, there is a gap that is exactly the same as that of "Insect Town", revealing the corner of the rotten bow, and there are countless dark shadows faintly visible inside. Struggling, as if trying to escape.

"What's going on? Shizhen also has it?" Wang Xuan's face showed a look of surprise.

The buildings in "Stone Town" are different in style from "Insect Town", but the layout is similar. At this moment, a lot of people are gathering in the square. Suddenly, the No. 9 elevator is opened, and the first person who comes out is wearing a black suit. There was a faint light flowing, and he immediately understood that this person was not simple.

Wang Xuan took Gu Manyao and Tie Jun towards a building facing him. There was the area where the leaders of the five major forces lived. Because of Wang Xuan's particularity, he walked on the square and everyone looked sideways, showing vigilance. Dreadful look.

Because Wang Xuan wore the "Xuan Gang" logo on his body, he went straight to the place where the core characters of the Xuan Gang in Shizhen lived.

Several people from the Xuan Gang saw Wang Xuan's extraordinary bearing and the logo of the Xuan Gang on his body, and they were busy and respectfully greeted him.

"I'm from above, I'll pass your leaders over immediately." To avoid trouble, Wang Xuan directly reported that he was from above. Sure enough, these people were shocked when they heard that they were from above.

"My lord, the leader and the others went to the Hell Tower two days ago and have not come back until now."

The man at the head, Wang Xuan, saw that he was a strong man, and replied respectfully at this moment.

"Go to Hell Tower two days ago?" Wang Xuan frowned and said, "Did he go alone? Or with whom?"

"It was with the other four leaders. We don't know why."

Hearing this person's reply, Wang Xuan understood that the five people had a high probability of knowing that there was an accident in elevator No. 8. They entered elevator No. 9, learned that they needed a clown mask from hell, and went to the tower of **** together, but they haven't come back for two days. , It is very likely that all five of them died in the Hell Tower and will never come back.

"Understood, if they come back, say that we are from the five major cities above, pass through them, and take the No. 9 elevator the day after tomorrow to enter the third floor." Although Wang Xuan guessed that something had happened to them, he still warned him, seeing these The person respectfully responded, and he took Gu Manyao and Tie Jun away, turned and walked towards the north of this stone town.

He wants to make the ghost equipment into a flawless ghost suit. The two auxiliary materials he needs are "Purple Stone" and "Ghost Stone", which are produced in the north of Stone Town.

Not wanting to cause too much sensation, he didn't summon Xiaojiao here. He didn't summon Xiaojiao until he took the two of them out of the north gate of Stone Town, and then he summoned Xiaojiao, rode up, and took out two pieces of parchment by the way.

In Shizhen, many people looked at them curiously from a distance, but they did not dare to follow them out of the north gate.

Among the three, Gu Manyao also had a mechanical beast, so he summoned the mechanical fox. Only Tiejun did not have a mechanical beast. It was rare for someone to be as poor as him in the super state. Work hard, it will be there soon.

Gu Manyao mounted the mechanical fox and said, "What are we doing here?"

"I'll do two missions by the way. The ghost equipment I'm wearing is called the third-order fine-quality ghost equipment. It can be purchased directly in the central city on the third floor, but some materials can be used in the central city to create a higher flawless quality. Quality ghost suit."

Wang Xuan explained it roughly, and opened the parchment. The task of the material on this parchment was to find the purple stone. The address was the Misty Grotto in the north of Shizhen. At the end of the Misty Grotto, there was the Hell Tower.

Among the hundreds of towns, there are **** towers.

Let's look at another quest to find the ghost stone, and the address is also this misty grotto.

After looking at the contents of these two tasks, they were relatively simple, so Bento first rushed towards the Misty Grotto on Xiaojiao.

Gu Manyao and Tie Jun followed closely behind.

In the north of this stone town, it looks like there is a stone vein nearly 100 meters high from a distance~www.mtnovel.com~ undulating like a giant crouching dragon, on this stone vein, you can see countless holes of different sizes, surrounded by Shrouded in a faint mist, this is the Misty Grotto.

According to the red line on the map on the parchment and the surrounding scenery, Wang Xuan quickly found a huge cave and began to walk inside.

There were a lot of black bats hanging upside down above this cave, and they were alerted by their entry, and they were immediately attacked.

In this second-layer world, the super-state's combat power will be suppressed, and the limit of their strength that they can exert is the limit level of the perfect state.

Fortunately, these bats were not strong, and before Wang Xuan shot, Gu Manyao and Tie Jun rushed to the left and right to block the black bats for him.

Now Gu Manyao and Tie Jun seem to be reborn, even if they only exert their peak combat power, they can easily sweep this group of black bats.

Because these black bats are too weak, they don't need to use their real strength, and with the super state being suppressed, Wang Xuan can't see which level of super state their current strength belongs to.

The three of them killed all the way in, and there are caves one after another. If there is no map sign, it is easy to get lost.

Fortunately, with the guidance of parchment, Wang Xuan quickly found the purple stone he needed.

Considering that if Gu Manyao and the others have a ghost suit, they also need these materials if they want to build it, so he took some more purple quartz stones.

This cave was full of violet stones. Wang Xuan collected a lot, and determined that even hundreds of ghost suits would be enough, so he left and took out another piece of parchment. According to the red line mark on it, Go find another ghost stone.

Chapter 232

Along the way, they were attacked by monsters from time to time, but they were all rock-type monsters with a five-star or five-and-half-star danger, and the three easily crushed them.

Wang Xuan rode on the little boy and looked at the parchment in his hand from time to time. He hardly needed to shoot, and he could kill all the monsters that appeared with just Gu Manyao and Tie Jun.

Most of these rock-type monsters that appeared had crystal scales. Although there was only one small crystal scale, Gu Manyao and Tie Jun collected them all.

Along the way, Wang Xuan told them a lot about the third-layer world, especially the "building" and "skills" of the central city, so that they understood the importance of crystal scales.

Including Wang Xuan himself, he plans to find a way to earn crystal scales after completing these material tasks.

With enough crystal scales, he can continue to the "intermediate skill" Shimen or even the "advanced skills" Shimen.

An hour later, Wang Xuan finally took Gu Manyao and Tie Jun to find the "Ghost Stone" according to the map marking on the parchment.

This "ghost stone" also covered the entire huge cave. The three of them started working together, and they all collected a lot before leaving.

Of the five kinds of auxiliary materials, two of them were easily collected. This kind of material task is only time-consuming. For the current Wang Xuan, it is basically not difficult.

Returning along the original road of the map, out of the "Mist Grotto", ready to return to Shizhen, but heard a majestic and dignified roar from the depths of the "Mist Grotto".

This howling sounded suddenly, even Shi Xuan instinctively felt his heart sink and felt an invisible huge pressure.

The sense of oppression that this whistling brought him was like hearing the whistling of the king bug in the town of insects.

"What is this howling, this feeling is like a big rock is pressing on my heart." Tie Jun immediately showed a solemn expression.

Wang Xuan looked in the direction of the whistling, and suddenly, he felt that the ground was shaking slightly. He was surprised to find that the stone veins called the Mist Grottoes were shaking slightly, as if they had come to life, and the stone veins were slightly bulging. , really like a stone dragon lying on the ground, now waking up.

"Is there such a thing?" Surprised, Wang Xuan summoned Gu Manyao and Tie Jun, and immediately ran back towards Shizhen.

Back in Shizhen, you can see that many people in Shizhen climbed to the city wall and looked towards the misty grotto in the distance. Their faces were full of panic, and his eyes of fear felt an endless stream. The power of fear is constantly collecting these fear energies and slowly growing.

Back in the town, Wang Xuan saw a group of people approaching them. One of them was the powerful man from the Xuan Gang that he had seen before, with "Phoenix", "Dynasty" and "Justice" beside him. League" and "Rakshasa" powerhouse.

With panic on their faces, they bowed to them together.

The five leaders of Stone Town entered the Hell Tower for two days and did not return. Now they are left behind in Worm Town without a leader. Now they have encountered accidents. First, a hole appeared in the sky, with a suspected rotten prow sticking out from it, and then this misty grotto. The roar that came, made the whole Shizhen panic.

Now that the three of Wang Xuan appeared, they seemed to have found the backbone, and they all bowed to them collectively, hoping to get instructions from above.

Wang Xuan watched them bow and saluted him together, waved his hands so that they didn't need to be too polite, and said, "What's the matter with this howling?"

"This is the stone dragon beast sleeping in the depths of the misty grotto. It is said that once it wakes up, it will utter a roar, foreshadowing that there may be a disaster."

Wang Xuan pondered thoughtfully and said: "The five leaders of Shizhen have only entered the Hell Tower for two days, and maybe they will be back soon, you don't have to worry too much, you already know what's going on here, and you will have your own arrangements at that time. , As for the hole in the sky, it is not only in Shizhen, but also in many towns, and the above will come up with a solution."

Hearing what Wang Xuan said, these people's expressions softened a lot and they felt a lot more at ease.

All Wang Xuan can do now is to comfort them first, but he cannot tell them the truth.

After that, he took Gu Manyao and Tie Jun out of here, took the No. 9 elevator, and returned to the No. 9 safe area on the third floor.

When he reappeared in the No. 9 safe zone on the third floor, the sky in the third floor world was getting darker, and night was about to fall.

At this moment, there is no one person in the safe area, and the mask has disappeared. You can see a large number of monsters wandering in the forest in the distance.

Although night fell, Wang Xuan didn't want to rest in Huiworm Town, but took the elevator to Xing Town.

When the elevator door opened again and the three walked out of the elevator, they had already arrived at Star Town.

Looking at Xingzhen in front of them, the three of them were startled.

Under the night, the square of Xingzhen was full of shadows wandering around. Only in the sky, above a hundred meters, there were some stars faintly visible. It seemed that this was the origin of the name of Xingzhen.

Like Worm Town and Stone Town, a huge gap was also broken above the sky of Star Town, with a rotten boat protruding out of it.

A terrible low whistle suddenly sounded, and these shadows wandering in the square rushed towards them, but they were all monsters.

These monsters look like big spiders with four claws, their backs are covered with star spots, and their mouthparts are hissing.

Although in Wang Xuan's eyes, these four-clawed spider monsters are not strong, but they are only five-star dangerous, but at a glance, the entire Star Town is full of dilapidated buildings. There are monsters in between.

The entire Star Town could not see a single human being, and it became a world of monsters.

Gu Manyao stretched out his right hand, and the two-meter-long Yaochi knife shot and swept out horizontally. A blade of light flew out of the sky, and immediately cut off three four-clawed spiders that rushed over. The juice in these spiders flew horizontally.

Tie Jun stretched out his right hand, and a giant diamond shield came down with a bang, and with a wave of his head, the heavy diamond shield flew out and smashed two four-clawed spiders in a row.

"This place has been occupied by monsters, and all the people in Star Town are dead?"

Gu Manyao swung out the Yaochi knife and whispered, with a shocked expression on his face.

Wang Xuan took a deep breath. Although they had heard that some of the towns in the Hundred Towns were destroyed and there were no survivors, but after all, they only heard about it, and seeing it with his own eyes, he was still a little shocked.

Gu Manyao and Tie Jun joined forces, Wang Xuan called Xiaojiao out, and Xiaojiao rushed out to kill these four-clawed spiders that were rushing up incessantly.

Wang Xuan took out a piece of parchment, and one of the materials he needed this time, the star animal skin, was in this star town.

"Star beast skin, a kind of soft skin on the belly of star beasts living on the Xinghai island north of Xing Town, is quite precious and is an excellent auxiliary material for making armor."

Looking at the mission introduction on the parchment, according to the red line sign above, Wang Xuan turned over and rode on Xiaojiao, and started heading north of Xingzhen.

Countless four-clawed spiders appeared. He opened the eye of the illustrated book and saw that the name of this four-clawed spider was Star-spotted spider, with a five-star danger level. There were also some more powerful star-spotted elite spiders, whose strength could reach five and a half stars. .

However, for Wang Xuan and the others, these were all vulnerable. Gu Manyao and Tie Jun began to exert their strength to the extreme level of the state, clearing the way ahead.

Wang Xuan intends to give these monsters to them to sharpen them.

They have only broken through to the super state, and they need enough time to sharpen, familiarize and control the powerful abilities they suddenly acquired. The ultimate strength, in the face of hordes of monsters, in the long-term fight, they still feel that they have made great progress.

Among the countless star-spotted spiders, the three of them went all the way out of Star Town and headed north.

To the north of Xing Town is an endless sea, known as the Xinghai. There are islands of different sizes in this Xinghai. There is a chain bridge between each island, and the three-person subway chain bridge goes towards the nearest island.

There are star-spotted spiders, star-spotted elite spiders, and a star-spotted spider king with a six-star danger, but they were all killed by them, and finally encountered this time on the third island in the sea of stars. The target of the mission, the star beast.

This kind of star beast is very beautiful. It looks a bit like a goat, but it is much more beautiful than a goat. The whole body is faintly glowing with starlight, especially in the night, it looks like starlight sprinkled, and it looks indescribably beautiful and dreamy.

The star beasts are five and a half stars in strength. The three of them shot together and quickly killed a lot of star beasts. Wang Xuan carefully peeled off the soft skin on their stomachs. This was the star beast skin he needed.

After collecting enough star animal skins, the three left the star town and returned to the No. 9 safe area on the third floor before entering the ghost town.

Wang Xuan has decided to complete the task of collecting all five materials without resting tonight.

The five auxiliary materials, including the Heavenly Eye Ghost Spirit and the Skeleton Spirit, are all in the ghost town.

You Kai, Sun Yaofei and Yi Wu came from the ghost town. It was already midnight when Wang Xuan brought Gu Manyao and Tie Jun into the ghost town, and the whole ghost town seemed quiet.

As he had guessed, there was also a huge gap 100 meters above the ghost town square, revealing the rotten bow of the boat.

On the high walls around, there are inspectors, their main task is to monitor and observe the lack of goods above and the rotten bow, in case of any changes, they can immediately notify everyone.

Wang Xuan didn't know whether the three of You Kai returned to the ghost town, and he didn't know if he planned to visit them, but instead took Gu Manyao and Tie Jun to the north of the ghost town.

To the north of the ghost town is the "ghost cemetery", which looks eerie and eerie especially at night, but it can't scare Wang Xuan. According to the instructions on the parchment, he first found the ghostly beasts wandering in the depths of the "ghost cemetery". Kill it to get the Sky Eye Ghost, and then find a large number of skeleton beasts, after killing it, get the skeleton spirit.

In addition to these two tasks of collecting materials, Wang Xuan also got a piece of parchment before, which is the task of "The Legend of Ghost Suit", and the task location is also a ghost town. When it was killed, a bronze treasure chest was obtained in its body.

Open the bronze treasure chest to reward 15 medium crystal scales, a ghost helmet, a primary powertrain crystal, and a bottle of stamina water.

Wang Xuan was quite satisfied with the reward of this bronze treasure chest. The medium-sized crystal scales and the water of stamina were put away. The medium-sized crystal scales he had now became 85. Then he took out a heart of a mechanical beast and used the primary powertrain. Chengjing settled in and gave it to Tiejun.

Tie Jun took it over excitedly, dripped blood on it, activated the heart of the mechanical beast, and summoned a mechanical beast.

He now finally has his own mechanical beast.

And the ghost helmet was given to Gu Manyao.

Gu Manyao originally had a third-order excellent ghost boots, and now she has a helmet. She also has two third-order excellent ghost equipment on her body, and the other three are third-order ordinary alloy equipment.

After all the tasks in the ghost town were completed, Wang Xuan left with the two of them satisfied.

Now that the sky is getting brighter, the three of them haven't slept all night, but Wang Xuan's spirit is very excited. He wants to make the five auxiliary materials for the ghost suit into a flawless ghost suit.

Returning to Insect Town, Wang Xuan took them to the quest line. In one day, he decided to do as many quests as possible with Gu Manyao and Tie Jun to earn crystal scales.

In this task line, there are tasks ranging from the highest six-star task to tasks without a star. Among them, the parchment of the six-star task requires ten medium crystal scales to buy, and the difficulty span is very large, it may be relatively easy, and some It may be extremely difficult and not suitable for the current Gu Manyao and Tie Jun.

After that, there is the five-star quest. Each piece of parchment for the five-star quest requires 500 small crystal scales, and after completion, it can basically reward bronze treasure chests.

This five-star task is undoubtedly the most suitable for them now.

Gu Manyao and Tie Jun each spent 500 small crystal scales to buy a five-star difficulty parchment.

This five-star difficulty task is not difficult for them now, and the three decided to do the task separately and earn crystal scales earlier.

Gu Manyao and Tie Jun left, while Wang Xuan took out ten medium-sized crystal scales and bought two parchments of five-star difficulty before leaving.

Now he has only 75 medium crystal scales in total.

He originally had a five-star difficulty parchment on him for "Goblin's Redemption", and now he bought two more. At present, he has a total of three five-star tasks.

The addresses of these two parchment tasks are one in Centipede Island, and the task name is "Hunting the Silverback Centipede King", and the other is in Scorpion City, and the task name is "Sand Scorpion Hunter".

Wang Xuan left Wormtown, rode on Xiaojiao, and headed to Centipede Island in the south. With his current strength, he was simply crushing all the way, relying on the red line mark on the map on the parchment in his hand, plus Xiaojiao's amazing speed. , within half an hour before and after, he found the silver-backed centipede king, killed him, and cut out a bronze treasure chest from his body.

Open the bronze treasure chest, there are 10 medium-sized crystal scales, an initial mechanical shell crystal, and a bottle of primary night vision water.

Putting these three pieces away, he now has 85 medium-sized crystal scales and 12 bottles of primary night vision water.

After that, I rushed to Scorpion City. The task of this "Sand Scorpion Hunter" was simpler. You only need to kill three sand scorpions to complete the task.

For the current Wang Xuan, this is an extremely simple task, and he will soon complete the task and obtain a bronze treasure chest again.

There are also 10 medium-sized crystal scales in this bronze treasure chest, which increased Wang Xuan's number of medium-sized crystal scales to 95. In addition, there is a bottle of primary healing water and a flame spar.

Although "Goblin's Redemption" is also a five-star difficulty, because it still needs to go down to the first floor, it is better to continue to complete the task in Bug Town.

The combined time for these two tasks was only an hour. Wang Xuan immediately returned to the Insect Town quest line again. This time, he purchased more parchment paper with five-star difficulty and completed these tasks as quickly as possible.

Until the sky gradually darkened, he completed at least ten tasks today, and the medium-sized crystal scales he has now turned into 140. In addition, he also gained some stamina water and primary healing water. And explosion crystal and mechanical beast crystal, etc.

As night fell, Wang Xuancai returned to Insect Town. He didn't sleep last night. After doing so many tasks today, he felt tired, and after washing, he fell out of bed and went to sleep.

He slept soundly this time, and Xiaobei was silently guarding him like a faithful guard in case there was any danger.

When he woke up naturally, the sky was already bright.

The energy and energy that had been lost completely recovered, Wang Xuan felt refreshed again, and even the energy in his body seemed to have improved slightly.

Thinking that today is the day that everyone agreed to gather in the security area of No. 9 on the third floor~www.mtlnovel.com~ I immediately got up and washed.

After drinking a bottle of high-grade nutrient solution, he put away the little girl who had guarded him all night. When Wang Xuan went downstairs, Gu Manyao and Tie Jun were already waiting for him below.

"How was the harvest yesterday?" Wang Xuan looked at them with a smile.

Gu Manyao hummed softly and said, "Not bad, I now have thirty medium crystals in total."

Tie Jun said: "Me too."

"Not bad." Wang Xuan nodded towards them and said, "Let's go, let's go to the third floor."

He took Gu Manyao and Tie Jun and walked towards the glass column in the center of the square. From a distance, he saw Wan Qianying, Tang Ruoyu, Gongyangxuan, Xu Jian and Huang Qingzhi were all there. They didn't go up earlier, they were obviously waiting for him. .

Besides them, standing beside Huang Qingzhi was a handsome young man who looked about twenty-seven or eighty-years-old. It was Chu Boyu in the dynasty.

Wang Xuan accelerated and walked up.

Seeing that Gu Manyao and Tie Jun were still with him behind him, these people were stunned for a moment, and then reacted with a strange look on their faces.

"Have they broken through?" Wan Qianying looked at Gu Manyao and Tie Jun. She didn't have the powerful sensing ability after Wang Xuan assimilated monsters, so she couldn't sense the current strength of Gu Manyao and Tie Jun.

"Yes, they are also super-status now, and they are qualified to go up." Wang Xuan nodded and introduced the names of Gu Manyao and Tie Jun by the way.

After receiving a positive answer, Wan Qianying and several others let out a sigh of relief.

Huang Qingzhi smiled and said, "Yes, our team has become stronger again."

Wang Xuan's eyes fell on Chu Boyu beside Huang Qingzhi.

Chapter 233

His magical beasts are sensitive and can immediately sense the difference between Chu Boyu and before.

"By the way, let me introduce to you, Chu Boyu, he has also broken through to the super state." Huang Qingzhi was a little proud when introducing Chu Boyu.

Chu Boyu and Wang Xuan have known each other for a long time.

Wang Xuan looked at him and nodded slightly, Chu Boyu also smiled at him.

Huang Qingzhi said: "Brother Wang, when you went to the Hell Tower last time, do you have any extra **** clown masks? If not, you still can't go to the third floor today, Boyu." He looked at Gu Manyao and Wang Xuan who were following behind him. Tie Jun, I thought that Wang Xuan must have taken a lot of **** clown masks that day, otherwise Gu Manyao and Tie Jun would not be able to get on either.

President Wang Xuan didn't make a special trip to Hell Tower just for them.

Wang Xuan smiled lightly, opened the Xumi mustard space, took out a **** clown mask, and gave it to Huang Qingzhi.

Although he was not interested in Chu Boyu, the two sides had had conflicts before, but it was all in the past. With the passage of time, Chu Boyu didn't show any hostility towards him anymore.

What's more, their overall situation is dangerous now. One more super state means more strength. Naturally, Wang Xuan will no longer care about the previous conflict.

Huang Qingzhi was overjoyed, and hurriedly took it over, handed it to Chu Boyu, and said, "Why don't you thank Brother Wang?"

Chu Boyu took the **** clown mask, bowed respectfully towards Wang Xuan, and said, "Brother Wang, thank you."

Whether it's true or false, at least it looks very respectful on the surface. Wang Xuan smiled lightly at him and said: "It's right for everyone to help each other, let's go, it's getting late, it's time to go up."

Wan Qianying responded, opened the elevator door, and said, "Let's go, I hope I can gain something today, it's best to repair the teleportation channel." As she said that, she walked in.

The elevator was big enough to accommodate nine of them.

"Speaking of which, among the hundred towns, there shouldn't be any other town that has so many super states of us." Xu Jian looked at the crowd with a smile on his face.

Huang Qingzhi said: "That's hard to say, remember that there were six people in Huozhen the day before yesterday? He Jiankui, who is the leader, is not easy. I felt a heat wave when I approached him. This guy must have some kind of adventure. What kind of fire-type treasure, who knows if there will be more powerful towns today that can produce more super states."

Xu Jian smiled and said, "This also makes sense. After all, there are as many as a hundred towns."

During the chat, the elevator vibrated slightly, then the door opened silently, and the third floor arrived.

Before getting out of the elevator, everyone saw a group of people gathered outside, and various voices came from a distance.

Led by Wan Qianying, nine people filed out.

Among the nine people, Chu Boyu came up for the first time. He was curious and kept looking around. Although he had heard Huang Qingzhi's introduction before, he was still shocked by what he saw when he saw it with his own eyes.

At this moment, there are at least a hundred people gathered in the No. 9 safe area, and the appearance of so many people has caused agitation among the monsters such as the tree demon and the mushroom man on the outside. They are attacking frantically and aroused the mask of the safe area.

The masks fluctuated endlessly, resisting their attacks.

When I saw Wang Xuan and the other nine people appearing, a voice came from afar: "Here comes again!"

"Why are there nine people?"

"There are nine super states in Worm Town?"

Many people looked at Wang Xuan and the others with a look of surprise. They saw the words "Insect Town" on the elevator they walked out of. They knew that they were from the insect town among the hundred towns, but they walked out of nine people at once. , is indeed somewhat unexpected.

The town that had the most supernatural states before was "Wang Zhen", and it only had seven people, which was surprising enough, but I didn't expect that there are still more exaggerated than "Wang Zhen".

Looking at these people's astonished expressions, Wan Qianying, Xu Jian and Huang Qingzhi, who had attracted everyone's attention, felt a little bit of emotion and pride in their hearts.

They understand that most of this is due to Wang Xuan's credit. Without him, I'm afraid that the last time in the Hell Tower was not as simple as breaking a Qiao Jingping.

Wang Xuan looked at these people who gathered in large numbers. These people were standing or sitting, and they were talking with each other. Most of them were wearing third-order high-quality suits. Of course, there were also occasional incomplete suits. Basically, they are all new breakthroughs to the super state, like Gu Manyao, Tie Jun, and Chu Boyu, because there is not enough time to obtain such a sophisticated suit.

With the strength of the super state, as long as there is time, it is not difficult to put together a third-order excellent suit.

Wang Xuan saw a lot of acquaintances. You Kai, Sun Yaofei, Yi Wu and others from the "ghost town" greeted him.

They nodded and greeted each other. Although they saw three more newcomers among them, Yu Kai didn't care and didn't bother to ask their names. His main focus was on Tang Ruoyu and Wang Xuan. It can be said that he even Wan Qianying Can't even see.

"The number of people is almost up, at least more than 150 people. I feel that I can start, hurry up and repair the transmission channel. What do you think?"

Wang Xuan nodded in agreement, and looked around at these people. Among these people, the new breakthrough to the super state accounted for a small number, and most of them were the leaders of the five original forces of the hundred towns, and became super state for a while. Time, basically the strength has reached the super-moderate level. Of course, there are occasionally some special circumstances, such as Yukai, who is willing to come down to be the leader of the ghost town even though he has a strength beyond the medium.

Among the newly promoted people who have broken through to the super state, either they have enough savings, and it will come naturally, breaking the barrier of life and death to break through to the super state, such as Chu Boyu, or they have some kind of special chance, and their strength is inestimable, such as Gu Manyao and Iron Army.

However, although Wang Xuan's Warcraft was sensitive, he couldn't tell who was stronger and who was weaker among the more than 100 people. He could hear Wan Qianying, who was standing beside him, talking.

"There are so many people, we can really start, we can assign them, such as those who hunt monsters, those who transport corpses, and those who are responsible for pouring the blood of these corpses into the transmission channel, even if no powerful monsters are found. , the quality is not good, we use the quantity to make up."

Yukai nodded and said, "I think so too. I have already explained the reasons to these people who just came up, and now I just need to assign them."

When he said this, he suddenly raised his voice and said, "Everyone, be quiet!"

Hearing Yukai's voice, everyone who had been whispering or discussing each other stopped and looked at him together.

"I think people are almost here, and everyone understands what happened on the third floor. We gathered everyone today for two main purposes. One is to repair the transmission channel. Only by repairing this channel, We can easily get in and out of Central City."

"The other purpose is of course to find the five major cities, but after the repair of the transmission channel, we will not talk about it."

Mou Xing stood up and said: "Then let's start, after a few days of waiting, there are so many people today, the transmission channel can definitely be repaired!"

In the past two days, he has done a lot of tasks to earn crystal scales, so he thought about collecting a hundred medium-sized crystal scales. After entering the central city, he can go to the intermediate skill stone gate and try it.

More than 150 people stood up one after another. At this moment, three more elevator doors were opened, and people came out one after another.

These three elevators represent three different towns, and there are fourteen people together. They were slightly surprised when they saw so many people in front of them.

You Kai and Mou Xing immediately went up to greet them, and told a general story of what happened here. After the fourteen people understood, they walked over and joined the crowd.

After that, under the auspices of Wan Qianying, You Kai, Mou Xing, Su Tang, He Jiankui and others, they were divided into two teams, one team was responsible for going out to hunt monsters, and the other team was responsible for moving the corpses of monsters. The blood from the corpse watered the rune stone carvings at the centers of the ten glass cylinders.

To be fair, the two teams alternate every half hour.

Tang Ruoyu didn't need to go out to hunt or carry corpses, she just needed to stare at the rune stone carving to observe its restoration.

"Let's start!" Yukai shouted, and rushed out first.

Followed by a team of nearly 100 people, all of them are super strong, at this moment, the momentum is amazing.

They rushed out of the mask one after another, which caused the vibration of various monsters in this area, and immediately gathered here.

Dryads, mushroom men, piranhas, perennial vines, and some new monsters such as giant forest wolves and staghorn leopards quickly ran towards this side.

Compared with monsters such as Dryad and Mushroom Man, the forest giant wolf and staghorn leopard are slightly stronger.

Wang Xuan followed behind Gu Manyao and Tie Jun. It was the first time for Gu Manyao and the two to face a group of six-star dangerous monsters, and he was a little worried.

Gu Manyao showed a two-meter-long demon chi sword, and slashed towards the forest wolf that rushed up, and a blade of air flew out, both in speed and strength, and instantly killed the forest wolf.

Tie Jun's right arm was completely transformed into a vajra, holding a giant vajra shield, and rushed up with the crowd.

Groups of tree demons and other monsters fell down, and Wang Xuan felt relieved after only one glance. Now the iron army has a slightly stronger strength than the average super-modern level, whether it is speed or strength. Inferior to Xu Jian and Huang Qingzhi, or even better, the only thing lacking is experience and the perfect control of this supernatural power.

After all, in the second floor, the super-state power was suppressed, and he could not use this power to the fullest. Now that he is in the third-layer world, he is finally free from the suppression of the power of the world, without restraint, and he can play freely.

Both Tie Jun and Gu Manyao's strengths are now slightly stronger than the average super state, but Gu Manyao has not used the power of blood erosion. The energy contained in this blood erosion cannot even be perceived by Wang Xuan, which makes him immeasurable. What level will Gu Manyao's strength reach after launching the blood erosion?

Nearly 100 people were killed, and groups of monsters fell to the ground, and dozens of people following them began to move the corpses to the rune stone carvings in the center of the safe zone.

There are also some people left there, and their main task is to water the rune stone carvings with the blood from these transported corpses.

With the endless supply of blood being continuously poured, the rune stone carvings were completely covered with blood, Tang Ruoyu observed quietly on the side, occasionally looking up at the sky.

Wang Xuan controls four metal tentacles, waving them at will, each attack can kill several monsters at the same time, harvesting white scales, which are absorbed by his ghost wings.

Now the energy in the white light in his right hand is full, and all the white scales that entered his body are absorbed by his second ghost wing.

Headed by him, You Kai, Mou Xing, Su Tang and others, they gradually killed the giant forest wolf and the antlers. They all understood that the stronger the monster's strength, the better its blood effect.

Gu Manyao and Tie Jun are constantly fighting, and gradually become proficient in their mastery of supernatural power, familiar with new abilities and hatching beast skills. Their strength is advancing by leaps and bounds.

There was a scream from the sky, and soon a group of iron-winged demon owls came under the blackness.

These iron-winged demon owls rushed towards the bottom, causing a certain amount of pressure to everyone.

In the hundreds of elevators in the mask, occasionally the elevator doors will open, and a new super-powerful person will come out.

They are all leaders and superpowers from Hundred Towns. They were notified, but they came a little late.

They were a little stunned when they saw the scene in front of them. Fortunately, someone would soon introduce them to what happened here, and then they entered.

As people appeared one after another, the total number of people here gradually exceeded 200.

The Iron Winged Demon Owl is very strong, and rushing down in the air, although it caused pressure on everyone, it was a good thing for Wang Xuan and others. The energy contained in the blood of the Iron Wing Demon Owl must have surpassed that of the tree. Monsters and Mushrooms.

Half an hour later, the two teams exchanged. The one who originally fought the monsters retreated and started to carry the corpse, while the team that originally carried the corpse rushed out.

Wang Xuan controls four metal tentacles, which can roll up four corpses at one time. He came to the side of the rune stone carving, and put the four monster corpses aside, then looked at the rune stone carving on the ground, and asked Tang Ruoyu on the side: "Why? Like? What's the effect?"

"It has a little effect, but it is very slow. If it is at this speed, I don't know how long it will take..." Tang Ruoyu shook his head slightly as he spoke.

Wang Xuan frowned and said, "It seems that we still need to find more powerful monsters."

He thought of the giant mammoth rhino that appeared in the central city last time. The strength of this giant mammoth rhino is comparable to the top powerhouse in the super state. If he can get the blood of the giant mammoth rhino, maybe it can be repaired.

You Kai and Mou Xing also came over and asked about the situation. When they learned that the restoration was slow, You Kai frowned and said, "What should I do?"

Wang Xuan pondered slightly: "I have a way."

"What can I do?" You Kai and Mou Xing looked at him immediately.

"The giant mammoth rhino we encountered outside Canterlot before."

Yukai said: "This mammoth giant rhinoceros is really powerful, but it's too far away. Even if we find it there, kill them, and transport their bodies, the amount of work is too huge." He shook his head slightly, I feel that Wang Xuan's proposal is not a good idea.

Wang Xuan said: "There is no need to carry the corpses, you forgot that we have storage belts? We just need to buy more leather bags that can hold water, find these mammoth giant rhinos in Central City, fill these leather bags with their blood, put them in Just come in the storage belt, and there is no need to bring their bodies here."

Yukai's eyes lit up, and a smile appeared on his face immediately, and said, "Yes, it's not too troublesome to get down this way. It takes about two days to come and go without any accident."

He was rather impatient. Thinking of this, he immediately wanted to do it, saying, "How about we start organizing people to go now? These mammoth giant rhinos are not simple, they don't have super-superior strength, so it's best not to go, now. Among the two hundred people, I don't know how many are qualified."

As he spoke, he looked at the hundreds of people at the mask who were fighting with various monsters, and Mou Xing said, "It's definitely not difficult to gather more than a dozen people, then let's buy some more large ones that can hold water first. Leather bags, I remember that there are shops selling supplies in the town's trading house, and they are very cheap, and you can buy a lot of them with a medium-sized crystal."

Wang Xuan snorted, agreeing with their point of view, since they decided to do it immediately, otherwise they would continue to kill these monsters here. The progress of the restoration of the rune stone carvings is too slow, and they are unwilling to delay it any longer.

"Let's go, then let's go down and buy this kind of water bag first." As soon as You Kai said this, Wang Xuan suddenly murmured and looked up at the sky.

His ability to sense is the crown of everyone. When he senses, everyone doesn't know why, just to see him suddenly look towards the sky, and then look up.

Above the sky, above the ten glass cylinders that are hundreds of meters high, suddenly there are silhouettes one by one. These silhouettes slide down these very smooth glass cylinders at an extremely fast speed.

Suddenly seeing this scene, everyone was slightly taken aback. Those iron-winged owls who were circling in the sky and attacking everyone from time to time were also very sensitive~www.mtlnovel.com~ They immediately changed their targets and made a sound The screams began to dash towards the figures that were sliding down one by one.

These figures sliding down were extremely fast, and soon fell from the glass cylinders hundreds of meters high, smashed **** the mask that appeared below, and bounced back into the air.

At the same moment, Wang Xuan saw the appearance of these figures clearly.

There are half-human, half-bird humanoid monsters with a pair of wings, their whole body is covered with feathers, and their arms are mutated into a pair of black blades. There are giants full of muscles, bronze skin and a height of three meters. Skin, a humanoid monster with two rows of suction cups behind it.

It was almost identical to the three humanoid monsters they encountered before, the only difference being that this time there were no longer just three, but a group.

At a glance, he saw at least five three-meter giants, four humanoid monsters with wings, and six green-skinned monsters.

The fifteen human-shaped monsters bounced off the mask and were attacked frantically by the iron-winged demon owls. They whistled in their mouths, almost ignoring the attacks of these iron-winged demon owls.

Wang Xuan looked at the humanoid monsters with wings, covered his body with wings, and waved his arms that turned into black blades.

— — — — — off topic — — — — —

A few days ago, a book friend did privately say to help me smash the Silver League to increase my popularity. I thought it was a joke at the time, but I didn't expect that I actually smashed the Silver League. I was very excited. Thank you Ou Huangye for your great love. I can only take it slowly, now the 10,000 words are basically the limit every day

Chapter 234

Compared with humans, these iron-winged demon owls seem to hate these humanoid monsters more, including the dryads, mushroom people, forest giants, and those antler leopards who were frantically besieging everyone outside the mask.

When these fifteen humanoid monsters appeared, they immediately changed their targets and climbed up the mask like crazy, trying to attack these humanoid monsters.

Wang Xuan, You Kai, Mou Xing, and Su Tang looked at each other. Almost at the same moment, they turned around and rushed out of the mask.

Tang Ruoyu no longer monitored the situation of the rune stone carving, but stretched out his right hand, summoned his mechanical beast to appear, and entered a state of fusion, while revealing the two-meter-long giant sword.

"Everyone, be careful, these humanoid monsters on the mask are very powerful, they don't have the super-level strength, they all return to the mask!" Youkai shouted loudly, reminding everyone who was fighting with groups of monsters or moving corpses outside. .

Of these fifteen humanoid monsters, almost every one of them possesses the top-level strength in the super-state, and even if they are powerful in the top-level, in a one-on-one situation, Yukai has no absolute confidence to kill the opponent.

Hearing Yukai's stern shout, these talents woke up one after another and turned their heads to look at the mask.

In this short period of time, the fifteen humanoid monsters that had slipped down from the glass cylinder hundreds of meters high had already descended down the mask. He had already jumped off the mask and landed heavily in the air, making a loud bang.

Wang Xuan looked at these humanoid monsters, but his heart was filled with excitement and anticipation. He was worried that there was no blood from powerful monsters. The mammoth giant rhino was too far away. It would take at least two days to go back and forth. The monster appeared, just as he wanted.

Wang Xuan summoned Xiaojiao and entered a state of integration. Xiaojiao turned into a rainbow light and fell on him, and then extended to form a mechanical shell.

Wang Xuan accelerated, surpassing You Kai and Mou Xing, and two of the four metal tentacles reversed, wrapping around his arms and merging to form a giant arm of beast.

To deal with this kind of humanoid monsters that can be called the top of the super state, it is necessary to go all out, otherwise once they are allowed to smash into the crowd, it will cause great casualties.

Among the hundreds of people who were fighting with hordes of monsters outside, many people began to turn around and run towards the mask after receiving a sharp reminder from Yukai.

Seeing the astonishing speed of these humanoid monsters, they knew the terror of each other. Without enough self-confidence, who would dare to die easily?

Of course, some of these people heard Yukai's words, not only did not retreat to the mask to escape, but took the initiative to jump in, facing the five three-meter giants that had just appeared.

One of them was He Jiankui from Fire Town.

There was another person with He Jiankui, a young man who looked relatively thin. At this moment, a third eye was opened on his forehead, and there were faint runes flickering around the third eye.

When Wang Xuan noticed it, his heart moved, but he saw the thin young man say solemnly: "This is called Ara troll. It has great strength and defense. The disadvantage is that the reaction is a little slow, and the head and heart are the key points!"

Hearing the thin young man's words, Wang Xuan knew that the name of the three-meter-high giant monster was Ara Troll. The third eye on the thin young man's forehead was obviously very special. After capturing the information of this troll, you can also see its weaknesses and vital points.

Wang Xuan remembered that this thin young man came from "Feng Town". It seems that among the five super-powerful people in "Feng Town", he thought he was the leader, and his name was Jiang Mingtai, but because he didn't talk much, he didn't do much before. Noticed him.

He Jiankui listened to Jiang Mingtai's reminder and let out a wild laugh, his body suddenly accelerated, he got close, and attacked one of the Ara trolls earlier than Wang Xuan and Youkai.

Wang Xuan saw that a red flame suddenly rose from his whole body. Different from the flame controlled by Wan Qianying, the red flame burning all over He Jiankui gave people a terrifying atmosphere of destruction, and Wan Qianying's cold fire matched it. In comparison, it immediately becomes insignificant.

In this burning flame, he was as majestic as a **** of fire. The Ala troll who was attacked by him opened his mouth and let out a low roar. The demon didn't dodge, but raised his huge fist and slammed it down towards He Jiankui from top to bottom.

"Good job!" He Jiankui raised his arm with a mad laugh, and there was an earth-shattering loud noise, and a lot of flames splashed. He bounced up, and he pounced on the God troll, and the flames of his body stretched, as if controlled by an invisible force, like a huge hood, and immediately swallowed the God troll.

Seeing this scene in the eyes of Wang Xuan, You Kai and the others who were rushing towards here at full speed, their hearts moved, and they immediately understood that this He Jiankui was at least the top powerhouse in the super state.

It was Jiang Mingtai, who had a third eye, who followed He Jiankui's shot.

While reminding everyone of the strengths and weaknesses of this Ara troll, he raised his right hand. Wang Xuan noticed that he also had an identical eye on the palm of his right hand, with runes flashing around the eyes.

The rune around his raised right eye lit up, and a beam of light suddenly shot out.

With a "chi" sound, this light was blocked by another Ara troll who stepped up with a giant hand.

This troll giant's hand has faint bronze luster fluctuations. It has a strong defensive ability. When focusing, it concentrates its power on the giant hand. The reason for daring to use a giant hand to catch this incoming light.

A screeching sound was heard, and the troll God blocked the light. A strange color flashed across Jiang Mingtai's face. The troll God rose into the air, and with a bang, he came to Jiang Mingtai with another giant hand. Swing sideways.

Jiang Mingtai captured the trajectory of its attack ahead of time, evaded with a precise short body, and shot out with his right hand, hitting the belly of the Ala troll. Blue smoke appeared on it, and a hole was burned, and the Ala troll groaned. , swaying and falling back.

The two Ala trolls were blocked by He Jiankui and Jiang Tai'an, and the other three Ala trolls had already risen into the air, leaping more than ten meters, and jumped into the crowd retreating towards the mask.

Wang Xuan had already rushed within a few meters of them, and with a wave of his right hand, two metal tentacles appeared, and they volleyed over to intercept an Ara troll.

The other two Ara trolls were also blocked by several people who appeared in the group at the same time.

These few people who dared to attack Ara trolls are not simple super-powers, and their strength has reached the super-superior or even top-level level.

One of the men held a golden long sword in each hand. The golden long sword was engraved with the word "king", which faintly carried a strong royal atmosphere. The man was about twenty-five or six years old, with a calm demeanor. With a face like a crown of jade, wearing a suit of silver-scale armor and a mechanical shell on the outside, with two swords in his hands, every movement is very elegant, full of strength and beauty.

He didn't like to be in the limelight like He Jiankui, he rushed out first, but stayed in the crowd, until the three God trolls jumped into the crowd and in front of him, he finally shot.

Looking at his shot, it didn't seem like he was fighting desperately, but he seemed to be dancing.

But the pair of golden swords engraved with the word "king" in his hand was extremely terrifying. Wang Xuan couldn't help but turn his head to look after hearing the screams of the troll Ala, and then saw that he looked very handsome and shot. The pair of golden swords in the hands of the handsome man rose and fell, and the pair of giant arms of the Ara troll that rushed in front of him broke in the air and flew out.

This Ara troll had its arms cut off, and blood spurted from the wound. It roared and retreated. The man leaned down slightly, and stabbed the two swords in his hand together.

Wang Xuan saw that the characters "King" of different sizes engraved on the pair of swords were glowing with golden light.

Even Wang Xuan almost thought that the man's double swords were going to stab the heart and stomach of the retreating troll Ala, and the troll Ala was also dodging. The light flashed down, and the retreating Ala troll suddenly roared again, and the upper body fell backwards.

It had a pair of sturdy thighs that stayed where they were.

Just at this moment, its legs were cut off.

Even if he was stronger than Wang Xuan, he couldn't help but feel a slight suffocation in his heart, feeling an instinctual threat.

This seemingly harmless man is terrifying.

There seemed to be a faint smile on his face like a crown jade, and the sword in his right hand fell together, sweeping out like lightning, and the head of the troll Ala, whose limbs had been severed, suddenly rolled away from his neck. flew out.

At this moment, Wang Xuan could no longer take a closer look. Not far in front of him, following the five God trolls, six humanoid monsters with green skin all over their bodies appeared one after another. Rush with the crowd.

After them fell four winged monsters that were half-human and half-bird.

Six green humanoid monsters and four winged monsters rushed up together. Wang Xuan swung out two metal tentacles and volleyed them out. The power of the blue crystal scales in his body immediately increased to the limit he could bear.

Jiang Mingtai was dodging the attack of an God troll while still shouting loudly: "The green-skinned one is called Green Aden, and the two rows of propulsion organs on its back can make them change at any time even in the air. The direction, its claws can be freely retracted, be careful!"

Listening to Jiang Mingtai's words, Wang Xuan realized that the green-skinned monster was originally called Green Aden.

"The winged one is called Winged Agatha. Among the three monsters, it is the most powerful. The mutated black blades on its arms and the wings on its back can attack!"

Wang Xuan listened to Jiang Mingtai's warning, and the two metal tentacles he controlled had already volleyed towards a green Aden.

The blue dim light on the metal tentacles lit up in circles, and he raised his strength to the limit, and he did not dare to be careless against this monster that was comparable to the super-state top existence.

Following Wang Xuan, You Kai and Tang Ruoyu also rushed up, one pounced on the other green Aden, and the other slashed and slashed the wings of Agatha.

When the fifteen humanoid monsters slid down the wings of light and rushed into the crowd, among the ten glass cylinders, a humanoid creature appeared again on one of the glass cylinders. It had bronze skin and possessed Very developed muscles, three meters tall, and an God troll.

However, there are some differences between it and the five God trolls that just appeared.

It has four arms, and the developed and inflated chest muscles are also tattooed with patterns. Compared with the rough and crazy-looking Ala troll, its face is slightly thinner, like a knife and axe, with clear horns.

At this moment, it is sitting in the void with its legs crossed and its two huge arms hugging each other in front of its chest, condescending, looking at everything that happens hundreds of meters below indifferently.

The other two giant arms behind it spread out, hugging the glass cylinder, and using the frictional force generated by the two giant arms and the glass cylinder to control the speed of the body's descent.

The surface of this glass cylinder is extremely smooth, and I don't know what method it uses to firmly stick to the glass cylinder with its back and slide down.

There was a crisp "pop", and the two metal tentacles that Wang Xuan pulled out were slightly bounced, and the green Aden that was drawn by him popped out his claws with both hands, accurately blocking the metal tentacles he drew.

The force of the two sides collided, and the green Aden immediately felt bad. Although it slightly bounced the metal tentacles drawn by Wang Xuan, it felt that the power contained in these two metal tentacles was terrible, and it made its claws vibrate. , causing severe pain like breaking.

It knew something was wrong and reacted quickly, and immediately thought of retreating. Unfortunately, all this was already in Wang Xuan's precise calculation. The attack of the two metal tentacles could only be regarded as the first test. The surface of the giant arm of the beast was covered with blue light, and the energy shield on the body was turned on at the same time to prevent the monster from being able to fight back.

With a "bang", the giant arm of the monster on the right slammed into one of the arms of the green Aden who wanted to retreat, and immediately broke all the bones in his arm, and the giant arm of the monster on the left swept over, and snapped. Sweeping the middle green Aden's forehead sideways, hit the green Aden's body, the neck bone cracked and cracked, the forehead burst open, and immediately became bloody.

A mass of white light appeared, and there was a strong consciousness in it. He wanted to escape, but it was wiped out by an invisible force that descended from somewhere, and turned into a pure energy, which was absorbed by Wang Xuan.

Wang Xuan had just killed the green Aden, but he heard a scream, and the other green Aden's claws stretched out and grabbed the belly of a woman who wanted to escape.

This woman's strength is between average and medium. Even Wan Qianying and Xu Jian's strength is not as strong. How can she block the green Aden?

Just as the woman fell, Wang Xuan jumped up and rushed towards him.

Afterwards, Mou Xing and Su Tang rushed forward. They obtained a lot of energy spar from the primary skill Shimen in the central city, and they understood the primary hatching beast skill. Now their strength has almost reached the top level of super state. , barely able to fight with the green Aden.

An God troll who was swallowed by flames fell down, and a white light appeared in it, flying to He Jankui's right hand. He turned around with a wild laugh, and rushed towards Agatha, a winged wing that had just descended on the other side.

Although these fifteen humanoid monsters are terrifying, they are basically comparable to the top superpowers, but among the more than 200 superpowers, there are stronger existences.

In almost one or two face-to-face encounters, two God trolls died, one green Aden died, and everyone paid the price of a supernatural death, and another was seriously injured.

The green Aden that killed a super-state was blocked by Wang Xuan. The green Aden sensed that Wang Xuan was rushing too fast, and it felt a little bad. The two rows of suction cups on the back opened, and the air was ejected from it. Pushing its body rose into the air, wanting to attack Wang Xuan like a goshawk swooping at a rabbit.

Wang Xuan didn't even look at it. With a wave of his right hand, two metal tentacles popped up.

With a "snap", the two metal tentacles covered with blue dim light were like two violent boa constrictors, drawing towards it at a faster speed than the green Aden that rose up into the air.

It whistled in its throat, and the two rows of suction cups behind its back spurted airflow. With the power of this airflow, it could adjust its body in mid-air and dodge it. It bent forward, and the claws on both hands suddenly grew, facing Wang Xuan's head. caught.

Its attack and response are top-notch, but unfortunately it encountered Wang Xuan who was more perverted than it.

With a bang, the pair of ghost wings behind it opened, and suddenly turned into dozens of steel feathers and shot out.

Just absorbing the white light energy of the green Aden~www.mtlnovel.com~, the ghost wing on the left shows signs of growing, and the power of the ghost car in his body is stronger again.

Dozens of steel feathers came from all directions, this green Aden had no way to dodge completely, and could only watch as he was shot into a hedgehog. The power has been doubled compared to before, and suddenly burst out, Wang Xuan is confident not to say that he is a super-top powerhouse, even if he is close to the peak, he may not be able to dodge.

The steel feathers passed through the green Aden's body, then passed through the other side, then turned around, and continued to pierce.

After doing this several times, the green Aden was pierced into a sieve, and there were hundreds of huge blood holes on his body, and several holes were pierced through his head and face.

It opened its eyes and fell straight down from the air.

At this moment, when Wang Xuan launched the ghost wing attack, he had already turned around and rushed towards the other wing, Agatha, not far away.

A shrill scream sounded, and another Ara troll's head flew out, losing its huge body, staggering and falling.

The person who shot was the man with a pair of golden swords engraved with the word "king", with a face like a crown of jade, and he looked very handsome.

Among the God Troll, Green Aden and Winged Agatha, Winged Agatha appeared the least in number, only four, but it was the strongest.

Whether it is speed or the lethality of a pair of mutated black blades with two arms, and its ability to form a hurricane, it is the most terrifying.

The winged Agatha that Wang Xuan rushed towards, its opponents were Gu Manyao and Tie Jun.

Chapter 235

Tie Jun originally wanted to retreat into the mask, but when he saw Gu Manyao rushing out behind Wang Xuan, he couldn't escape back, so he could only hold the giant diamond shield and follow him closely. If something went wrong, his strong Defense can come in handy.

Gu Manyao is full of confidence in herself. She not only obtained a large amount of hydropower crystals in the underground ancient city of Scorpion City, which made Yaochi grow to an extremely powerful level, but also realized the passive skill "Origin Enhancement" of a hatching beast.

Her Yaochi can be fused with water crystals. With the passive skill "Original Enhancement", Yaochi's strength has been terribly improved. Now her own combat power is already faintly close to the upper level. The special treasure "Blood Eclipse", she is absolutely confident to fight these humanoid monsters.

She and the mechanical fox entered into a state of fusion. She followed Wang Xuan closely, and clasped the Yaochi knife in her hands. At the center of the giant machete like a black dragon, the blood ruby-like "blood erosion" began to activate, with it at the center, extending in all directions like a spider web of blood threads.

These bloodshots expand along the gaps between the black scales, and Gu Manyao's whole body is improving. She feels that her hands and this demon chi knife seem to be fused together. The strength of both sides resonates, whether it is strength, speed or facial features. Crazy ascension.

Suddenly, with a bang, she suddenly accelerated, stepped on the ground with both feet, and the ground sank into two footprints, and she was almost volleyed, locking on a wing Agatha who was about to attack other superpowers. , slashed out.

This winged wing, Agatha, opened her wings and just started to spin. The hurricane had not yet fully formed, and Gu Manyao slashed over with this sword.

A terrifying force ripped through the air, making a faint sonic boom.

With a "bang", the two-meter-long Yaochi knife slashed the barely formed hurricane in the air, and immediately chopped it open.

Suddenly, two black blades appeared, one left and one right crossed, taking advantage of the Yaochi knife to cut through the hurricane, its momentum was exhausted, and the crossing blocked it.

The two sides confronted each other head-on. Although Gu Manyao obtained the power of blood erosion, he could not play it perfectly, and the strength of this winged Agatha was absolutely powerful in the top super-state, stronger than the troll of God and the green Aden.

With the sound of metal hitting the ground, Gu Manyao felt her arms tremble. She couldn't resist it. The Yaochi Saber in her hand bounced back heavily, and her chest seemed to be hit by a huge force, and she almost couldn't come back in one breath.

And how terrifying the speed of the winged Agatha, it shook Gu Manyao away, the wings behind her fluttered, and the black blade on her right arm almost chased and stabbed Gu Manyao.

Gu Manyao's face changed. At this time, she realized that although she has mastered the powerful power of blood erosion, it does not mean that she can use it perfectly.

Seeing the black blade stabbed in front of him, he couldn't dodge.

Tie Jun growled lowly, seeing that Gu Manyao was in a bad situation, he used his feet to charge, and rushed up diagonally.

With a "bang", the King Kong giant shield hit the winged Agatha, but was swept by the huge hurricane, and was instantly swept in.

The Iron Army was terrified, and with the power of this hurricane, he could be crushed to pieces in no time.

Almost at the same moment, Wang Xuan came and saw that Tie Jun and Gu Manyao were in danger, especially that Tie Jun was involved, so he couldn't instantly kill Winged Agatha, and it was Tie Jun who died.

At this moment, he once again absorbed a mass of white light, and the powerful energy was surging in the body wind. The second ghost wing on the left back immediately grew again, from the original one meter four to one meter five, the ghost in his body. The power of the car is further improved.

It's just that the iron army was in critical condition at the moment, he didn't have time to think about it, and immediately activated the left arm of the mechanical god.

This is his strongest blow. Outside the giant arm of the demon beast on the left, a large number of metal parts formed by the condensation of light emerge, and the sound of "clack clap clap" can be heard. These metal parts combine to form a giant two meters long. The arms are bigger and bigger than the body of an adult.

With a "huh", the mechanical god's left arm volleyed out, and easily tore the whistling hurricane, from top to bottom, patted Winged Agatha's head.

The head of this winged Agatha immediately became meat sauce. All the way down, the skull, neck bone, ribs, vertebrae, and then the pelvis and leg bones below were all broken, and the two feathered wings exploded and flew out. .

This powerful wing, Agatha, was shot into a lump of flesh under the blow of the mechanical god's left arm.

This scene was seen by many people, and they all widened their eyes in horror.

Especially the Ara troll with four huge arms. It originally crossed his knees and hugged his arms, sliding down a glass column, looking down at the common people below, and it seemed that the old **** was there, until Wang Xuan's blow killed one in an instant. Winged Agatha, the muscles of its indifferent face twitched violently.

Unable to control the power of the slide in the absence of attention, he immediately fell down.

With a "boom", it slammed into the top of the mask below and bounced again.

A group of iron-winged owls rushed towards it.

It stretched out two huge arms, instead of attacking these iron-winged demon owls, it grabbed the steel claws stretched out by an iron-winged demon owl and pulled it down.

The iron-winged demon owl fluttered its wings desperately in panic, and barely took it to fly.

It was taken by the iron-winged demon owl and flew out for dozens of meters, and then pulled it violently, the iron-winged demon owl couldn't stabilize its body immediately and fell down.

It let go of the hand and fell steadily into the crowd. With a distance of 20 to 30 meters, a pair of eyes stared at Wang Xuan, the arrogance and indifference in his eyes disappeared, and there was a hint of surprise.

Even the handsome man who held a pair of golden swords engraved with the word "King" and easily killed the troll of God did not pay attention to it, but Wang Xuan just hit the mechanical **** with his left arm and shocked it.

After Wang Xuan's attack, his physical energy was severely depleted, so he immediately took out a bottle of physical strength water and drank it.

Feeling the rapid recovery of physical strength, a white light appeared, turned into pure hatching beast energy, and poured into his body. The energy in this winged Agatha's body was so powerful that it faintly surpassed that of Green Aden. The second ghost wing is like a long whale drawing water and swallowing it all up. The second ghost wing is vibrating endlessly, and there are faint signs that it is about to grow.

Wang Xuan looked at Gu Manyao and Tie Jun again, and both of them looked ugly.

"Go inside the mask!" Wang Xuan instructed, and rushed towards the other wing, Agatha.

Of the fifteen humanoid monsters that appeared at the moment, only one of the five Ala trolls had died, half of the six green Adens had died, and only four winged Agatha had died, leaving three remaining.

Tang Ruoyu was fighting alone with a winged Agatha at the moment.

I haven't seen her for two days, and her strength has risen to a new level. The white tiger she can unleash has grown to six meters in length. After merging with her, not only her strength will gain a

qualitative leap, but also her body. In addition, there is a phantom of a white tiger looming over her body, and her whole body is like a gust of wind, which increases her speed and strength.

The two-meter giant sword in her hand slashed continuously, and the winged Agatha was retreating, and even one of her wings was cut off by her, and she could be killed at any time.

The strength she shows now has surpassed Yukai.

Although Wang Xuan doesn't know what the gap is between the specific super peak and the top level, he can vaguely feel that the current Tang Ruoyu's strength is probably gradually surpassing the top level and approaching the peak.

However, thinking of the particularity of Tang Ruoyu, it was suspected that something had happened to the person on the higher floor and came down, so no matter how amazing her performance was, Wang Xuan was not surprised.

Of the remaining three wings, Agatha, except for the one blocked by Tang Ruoyu, one of the other two was swallowed up by He Jiankui's flames, but this winged Agatha was so powerful that the flames couldn't burn it for a while. Instead, it controlled the hurricane, forming a powerful flame hurricane that swept towards everyone around him, and even He Jiankui couldn't stop it for a while.

However, He Jiankui understood that this winged Agatha was already at the end of the battle and was struggling to the death. His flames could burn everything down, and this monster would not last long.

The other remaining wing, Gasha, rushed into the group, and was now blocked by Su Tang and another strong man from "Ling Town".

The strength of this strong man from "Ling Town" is between the super-superior and top-level, and he is at the bottleneck of breaking through. His name is Wang Yu. His hatching beast is extremely special, named "Iron Cavalry", which is a kind of mechanical. The hatching beast is fully revealed, like a mechanical motorcycle. He rides on it and can be perfectly combined with him. This "iron cavalry" has powerful firepower and can launch artillery shells with locking function.

He and Su Tang teamed up to provide fire support from a long distance.

Although the two joined forces, Su Tang was unable to resist and was losing ground.

When Wang Xuan saw it, he immediately jumped over and activated his ghost wings. Suddenly, dozens of steel feathers appeared, and they shot over like a violent storm.

At this moment, Tang Ruoyu on the other side succeeded and beheaded Agatha with one wing.

And the Ara troll who landed with four arms finally shot.

It was shocked by the power of Wang Xuan's left arm blow from the mechanical **** just now, but as soon as it made a move, the first target of its attack was Wang Xuan.

With a bang, it jumped up and jumped out twenty or thirty meters in a vertical direction. Its four arms spread out together, and its huge body descended into the sky, with a faint bronze luster all over its body, like a bronze statue made of bronze.

Wang Xuan had just activated his ghost wings when the four-armed Ala troll suddenly shot, and he instinctively sensed an immediate warning, reminding him of the horror of the four-armed Ala troll.

"Be careful, the four-armed troll elite called God—" At the same moment, Jiang Mingtai's voice came from afar.

As he spoke, he quickly stepped back and tried to distance himself from the Ala troll elite as much as possible. Obviously, he was very afraid of the four-armed Ala troll elite.

Wang Xuan launched the giant arms of beasts, and a bright blue light lit up on each arm. He exerted the power of the blue crystal scales to the limit that he could bear, and was ready to carry it hard. How strong is the magic elite.

There was a loud "bang", and the two sides confronted each other head-on. The four arms of the God troll elite smashed together on the arms of the beast raised by Wang Xuan. There was a terrible vibration. , it sank to the knees.

The ground and soil here are far harder than the soil in ordinary forests on the earth, but now they can't bear the oppression of this force. One can imagine how powerful this force is.

Although Wang Xuan was beaten down to his knees, the Ala troll elite did not take advantage of it, and his body rolled in the air and flew out.

At the same moment, Wang Xuan's ghost wings shot wildly into the hurricane formed by the winged Agatha, and the sound of chi chi chi was incessant.

Most of the steel feathers were blocked or shaken by the hurricane or the black blade, but the other half penetrated into the body of this winged Agatha and shot out with blood. Two artillery shells slammed into the hurricane, causing a huge explosion, which immediately blew up the hurricane, and the winged Agatha was covered in blood and was blown to pieces.

When the Ala troll elite landed, Wang Xuan lifted his foot from the soil and stepped forward. Dozens of steel feathers returned to his back, forming two ghost wings, one large and one small. The ghost wings were integrated into one. The fan formed a strong airflow, pushing his body towards the Ara troll elite who had just landed at extreme speed.

With a "huh", Wang Xuan's rushing speed was already as fast as lightning. He didn't want the retreating Ala troll elite to react slowly. He suddenly stretched out his arm and grabbed a man beside him who was about to retreat. He swung it up as a weapon and smashed it towards Wang Xuan, who was rushing over.

Although this man was a super-moderate powerhouse, he fell into the hands of the Ala troll elite like a chick under the claws of a goshawk. He had no resistance at all and flew towards Wang Xuan involuntarily.

Wang Xuan dodged with a flick of his body, wanting to bypass him and attack again, but found that the Ala troll elite grabbed him for half a second, and rushed into the crowd who wanted to escape on the other side. A punch shattered his head.

Wang Xuan was furious, and with the help of a pair of ghost wings flapping, he kicked his feet and rose into the air, condescending like a goshawk to a rabbit, rushing towards the Ara troll elite below.

At this moment, the last Ala troll among the five Ala trolls was successfully killed by the handsome man holding a pair of golden swords with the character "King". The God Troll Elite in .

Yukai paid the price of being caught in the chest and belly, and finally succeeded in killing a green Aden. He took out a bottle of primary healing water and drank it, while he jumped and began to rush towards the Ara troll elite.

Everyone can see that, among these monsters, the rest are not to be feared, and only the Ala troll elite is the most terrifying. As long as it is killed, this battle can be over.

The God troll elite just punched a super strong man, looked up and saw Wang Xuan volleying down, a strange smile appeared on his face, as if he had been waiting for this moment, and suddenly took the initiative to meet him , one of the arms grabbed the corpse of the super-powerful that was killed by its punch, used it as a weapon, swung it into the air, and smashed it towards Wang Xuan above.

Wang Xuan relied on the ghost wings behind his back, almost moving his body in mid-air, avoiding the corpse of the super-powerful smashing over, and the troll elite of God had already circled to the other side, rushing into the air not much slower than the corpse. Come up and raid from behind.

It calculated that Wang Xuan had two wings, and he was bound to be able to adjust teleportation in the air, so he deliberately used the corpse to force Wang Xuan to change direction in the air, and then attacked suddenly.

At this moment, no matter how strong Wang Xuan's ghost wings are, he can't change his direction again while flapping the ghost wings to move his body.

This God troll elite has extremely high intelligence. This time it is sure that it has used its real strength. The four giant hands are joined together, and all the fingers are clasped together to form a strange fist mark, flowing all over the body. Bronze luster, all gathered between the four palms.

This is its true strength, including the fact that when it attacked Wang Xuan in the air before, it began to lay out, intending to show weakness, just for this moment, it believed that at this moment, even if Wang Xuan wanted to launch a mechanical arm attack, it was too late.

With a bronze luster on their four hands, they attacked with all their strength, and they wanted to completely kill Wang Xuan in this attack, making him into a **** mass of meat sauce.

Among the crowd, only the terrifying power of Wang Xuan's left arm of the mechanical **** can threaten it. As long as Wang Xuan is removed, no matter how many of the remaining people are, it will not take it seriously.

Seeing it soaring into the air, making a full blow, as fast as an arrow from the string, at this moment Wang Xuan had just relied on the ghost wings to traverse the corpse of the super-powerful smashing in the air, and his body was falling, the ghost. Yi is at the point where his new strength has been exhausted, and his old strength has not yet been born. Although his monster arm is powerful, it is too late to turn around and defend against the volley of the Ara troll elite.

Everyone saw the danger of Wang Xuan, but the speed of both sides' shots was too fast. With such strengths as Gu Manyao and Tie Jun, they couldn't even exclaim in time~www.mtlnovel.com~ Only Tang Ruoyu, Tang Ruoyu and Tiejun could barely keep up with this speed. With Yukai's strength, no matter who it is, it's too late to save Wang Xuan.

At the moment of life and death, Wang Xuan's falling body suddenly rose one meter inconceivably, just barely avoiding the full blow of the God troll elite.

Unexpectedly, Wang Xuan can still violate the rules of physics and rise out of thin air. The eyes of the Ala troll elite widened, and an incredible look appeared on his face.

Not to mention that Wang Xuan's ghost wings had just flapped with all his strength, and the lateral movement had changed direction. At this moment, it was too late to flap again. Even if there was time to flap the ghost wings now, the ghost wings would not be enough for him to fly upwards if he couldn't take advantage of it.

When it saw two straight metal tentacles, it suddenly understood the reason.

Wang Xuan can now control four metal tentacles, two of which are combined with his arms to turn into giant arms of beasts, and two metal tentacles that stick to his body and have not been activated.

When he took off in the air, the two metal tentacles had silently descended down his body.

At the moment when the body fell, the two metal tentacles slammed down, reaching the limit of seven meters, becoming as hard as steel, and inserted into the ground, like two metal rods propped on the ground, supporting his originally fallen body He slammed up one meter, avoiding the full blow of the God troll elite.

The God troll elite organization did not think that Wang Xuan would have this hand. Its full blow suddenly failed, and all the surging power hit the air. The internal organs seemed to be turned upside down, and it seemed unspeakable and uncomfortable. At this moment, I thought It was too late to dodge or defend.

Wang Xuan raised his right arm, and a bright blue dim light lit up on the giant arm of the beast.
