

Last Building on Earth Chapter 241-245

Chapter 241

This time, even Wang Xuan stopped. From the buildings in the row on the left, many people poured out and looked out of the city.

The appearance of totems was originally rare, not to mention that this white giant rhino appeared outside the central city, looking at the posture, it was directed at the central city.

This giant rhino took a step and approached the central city in an instant. Everyone was in a cold sweat when they saw it. Although the defense of the central city was strong, the opponent was a totem. No one knew whether it could stop it.

This giant rhino was much taller than the city wall of the central city. It suddenly bent over and lowered its head. The white single horn hit a metal pillar on the city wall.

The two metal pillars felt threatened, white electric arcs erupted on them, and there was a crackling sound, and two white lights shot out, hitting the giant rhinoceros.

Even if it is one of the most powerful totems in this world, it is still pierced by these two white lights, and two huge wounds are still pierced on the surface of the body. The bone can be seen deep, and the wounds appear burnt black.

The giant rhino's mouth let out a painful roar, white light appeared on its fur, and the white giant horn hit one of the metal pillars.

The metal pillar was vibrating violently, and more white arcs of light erupted from it, all of which were stuck on the head of the giant rhinoceros as big as a house.

Although the head of the giant rhinoceros was firm and fleshy, protected by a gleaming white light, it was still unable to withstand it. There were huge wounds on it, each of which was extremely deep, even hurting the bones inside. There was a burnt odor.

The people who were originally standing on the city wall jumped back one after another, and the scene in front of them made everyone feel their scalps numb.

Wang Xuan looked at the terrifying and crazy light in the eyes of this giant rhinoceros, and knew in his heart that this giant rhinoceros totem should be the one that hated humans among the seven totems that Xu Jian said that day.

The totem of the third-layer world has a different stance. Like the ancient tree before, it is in a neutral state towards humans. As long as humans do not provoke it, it will not deliberately attack humans.

And this giant rhinoceros totem stood on the enemy side of humans. When it saw a large number of humans in the central city, it first drove a group of giant rhinos to attack. As a result, it not only failed to break the central city, but suffered heavy casualties. After anger, it finally came in person.

The city wall of the central city was making a huge rumbling sound, which was the sound of being hit by a giant rhinoceros.

Although the city wall seemed to be unbreakable, it could not withstand the impact of the totem force, and countless tiny cracks began to appear on the surface.

When everyone saw this, they understood that as long as the giant rhino rammed a few more times, the city wall might collapse suddenly.

And the metal column that was hit by it has already tilted inward, but the arc that erupted from it became more and more terrifying. In only ten seconds before and after, a large number of terrible wounds appeared on the surface of the body of this white giant rhino, and it was fresh all over. It was **** and looked terrible.

If they hadn't witnessed it with their own eyes, no one would have believed that a totem attacked the central city and was injured so heavily by the self-defense attack of the central city.

Another white light appeared, swept across the forehead of the white giant rhino, and slashed along its forehead.

This blow was very heavy, and the white giant rhino finally swayed back and stopped attacking.

As it retreated and opened up the distance from the central city, the arcs on the surfaces of the two metal pillars also converged accordingly, and gradually fell silent.

This white giant rhino was seriously injured. It seemed that it couldn't even support its huge body. It staggered and started to turn around and left along the way it came.

The countless giant rhinoceros outside the city receded like a tide with their totems.

This giant rhino was seriously injured, and when it left, it was much slower. It took about ten minutes before it completely disappeared in the distant forest.

Only then did Wang Xuan let out a sigh of relief. He had just seen the giant rhino attack the Central City, and a cold sweat broke out in his hand.

Gu Manyao and Tie Jun beside him were dumbfounded.

It was the first time they saw the totem, and their hearts were full of shock.

"Wang Xuan, is this the totem you said before?" Gu Manyao came back to her senses and hurriedly asked. She remembered that Wang Xuan had talked about some of the strongest creatures in the third-layer world before, and they were called totems. .

Wang Xuan snorted and said, "This should be a totem that hates us human beings. Maybe it considered the area around the central city as its forbidden area. Now we appear and lead it out."

As Wang Xuan spoke, he looked at the metal pillar that had been knocked over, and was secretly shocked. On the one hand, he was naturally shocked by the strength of the defense of the central city. On the other hand, he could not admit the horror of this totem. Hold on for a while, maybe the Central City can't guard against it.

With the departure and disappearance of the white giant rhino, the people who had gathered began to talk a lot, talking about the totem of the giant rhino, and then dispersed one after another.

Wang Xuan and Gu Manyao entered the "skill" building together, while Tie Jun went to the "build" building alone, ready to find a way to create a golden scale armor, so that his set of golden scale equipment would be ready.

He believed what Wang Xuan said. With his current strength, he was not suitable for entering the "skill" building for the time being. At least he had to break through to the top level of the super state before he was suitable for entering the "intermediate skill" Shimen.

Wang Xuan took Gu Manyao into the "skill" building, and there was basically no one here at this moment.

It has been a day since the leaders of the hundred towns entered here, and everyone who can enter with crystal scales has also entered. Now basically all the major leaders are starting to leave the central city one after another, frantically trying to find ways to earn crystal scales, and even some town leaders have begun to move. With a crooked mind, he plans to raise the price of the whole people in the town he manages, and the number of crystal scales that each person needs to pay doubles.

Wang Xuan walked in front of the "intermediate skill" Shimen, and put in a hundred medium-sized crystal scales. The stone door in front of him began to emit white light, and he walked in.

Watching Wang Xuan enter, Gu Manyao also took out the hundred medium-sized crystal scales that had been allocated this time, and walked in.

With previous experience, Wang Xuan entered here, and he knew the way, and avoided all monsters with other attributes of energy crystals. Only when he encountered monsters with similar attributes such as black iron lizards with metal energy crystals, would he shoot and kill them.

After an hour had passed, he appeared in the hall with a hint of joy on his face.

This time, he has harvested 27 intermediate metal energy crystals.

By absorbing these twenty-seven metal energies, not only can the beast grow and evolve further, but he feels that there is hope to comprehend the intermediate skills of hatching beasts.

Soon Gu Manyao also appeared, with an excited look on her face.

In the just one hour of hunting, she avoided monsters with other attributes according to Wang Xuan's tips, and only looked for monsters with water crystals. Twelve Intermediate Crystals.

Fusion of these twelve water crystals, even if she can't understand the intermediate skills of hatching beasts, can at least make her monster chi grow further and become stronger.

With the gradual mastery of the power of blood erosion, the power of blood erosion that can be exerted is getting stronger and stronger. With the addition of a full set of Qinglian equipment, Gu Manyao's current combat power is equivalent to the level of the first super state. Growing up, she can be regarded as a strong person among the top super-states.

Wang Xuan fused the intermediate metal energy crystals one by one, feeling the changes of the magical beasts in his body, especially the surface of the four metal tentacles. , his metal tentacles are undergoing metamorphosis.

When the twenty-seven intermediate metal energies were completely fused, his metal tentacles had undergone earth-shaking changes, with profound light flowing on the surface, and what was even more amazing was that these four metal tentacles actually gave birth to an aura of life, and the metal tentacles seemed to be completely alive. come over.

This is the intermediate skill of the hatching beast: active metal.

Compared with the "metal toughness" of the primary skill, this "active metal" is much stronger. The four metal tentacles seem to have life, as if they have truly become part of his body, like four more arms, and now they are like arms. The movement of the mind can be perfectly controlled, not a little bit, this kind of touch is simply unsatisfactory.

In the past, he needed to control the metal tentacles to perform various actions, but now he can do whatever he wants, just as simple and convenient as using his own arm.

"Amazing... This is active metal..." Wang Xuan showed a satisfied look on his face. It seemed that the change was not big, but it was actually a qualitative improvement. It used to be a weapon tool that he needed to control to use, but now it is a part of his body. , both flexibility and response speed have been amazingly improved.

It can even be said that wherever his thoughts turn, the metal tentacles can reach, and the reaction speed is a bit terrifying.

After Wang Xuan tried it a few times, he immediately understood the power of this active metal.

Gu Manyao fused and digested twelve intermediate-level water crystals, and her demon chi strength further grew, but she was unable to comprehend the intermediate-level skills of hatching beasts for the time being.

Wang Xuan looked at the third stone gate with "Advanced Skills" written on it. With his current strength, he could completely enter this stone gate for training. Unfortunately, one thousand medium crystals were needed to enter this stone gate.

"If you rely solely on tasks, you should earn 50 medium-sized crystals every day on average, and it will take 20 days for 1,000 crystals." Wang Xuan frowned slightly. If you want to get enough metal energy crystals and comprehend skills, it is definitely not enough to enter only one trip, at least several trips are

required. After this calculation, if you want to enter this "advanced skill" Shimen to comprehend advanced skills, I am afraid that it takes a month or two to complete the task.

"It's too slow, the best way is to enter the Hell Tower again." Wang Xuan made a decision in his heart. Looking at Gu Manyao next to him, he was about to speak when suddenly an anxious voice came from outside.

"Everyone immediately rushed to the No. 9 safe zone!"

"The No. 9 security zone was attacked and the situation is critical. Everyone rushed to the No. 9 security zone immediately!"

The voice came from a distance, Wang Xuan was slightly startled, and immediately left the building, but in the center of the square in the distance, a man wearing a full set of golden scale armor, holding a sound transmission crystal in his hand, just walked out of the transmission channel, while running towards this side, shouting loudly, asking everyone to rush to the No. 9 safe area immediately.

Wang Xuan recognized that this person was Wang Yu from "Ling Town".

There are not many people still in the central city. Most of them have already received the material tasks and went down to Baizhen to complete the various tasks required for the construction. The number of people still in the central city will not exceed 50.

At this moment, hearing Wang Yu's notification, they rushed out of various buildings, and some who had a good relationship with Wang Yu immediately shouted loudly: "Wang Yu, what's going on? What's wrong with the No. 9 security zone?"

"Quickly go to the No. 9 safe area, where it is attacked, it will be too late!" Wang Yu looked very anxious.

Seeing their appearance, everyone stopped asking questions, and immediately ran towards the No. 9 safe area at full speed.

This No. 9 security zone connects the central city and the hundreds of towns below. Now this is the last of the ten security zones. It can be said that it is extremely important. If there is a problem, it will be over.

Wang Xuan swayed, and immediately accelerated, rushing towards the transmission channel at full speed.

Instantly surpassing a group of people, he entered the teleportation channel, followed by a group of people who squeezed over, a red circle appeared around, Wang Xuan stretched out his hand to hold the number nine, and the red light around it rose, covering them, etc. The red light disappeared, and he and this group of people had already appeared in the teleportation passage of the No. 9 safe zone.

As soon as he arrived at the No. 9 safe area, he immediately saw the mask fluctuating violently.

Wang Xuan looked up and took a deep breath.

In the rumbling sound, he saw a three-meter-high God troll, they were madly smashing towards the ground on the edge of the mask, and the ground was shaking.

Behind this group of God trolls, there are also groups of green Aden and winged Agatha, waving their claws and black sharp blades, and the iron-winged demon owls rushing down from the sky, as well as the surging tree demons and mushrooms. Wait for the monsters to fight together.

These monsters such as iron-winged owls, tree demons, mushrooms, and piranhas hated humans, but compared to humans, these humanoid monsters such as trolls and green Aden were regarded as intruders by them.

Although in terms of quantity, they are far more than the God Troll, Green Aden and Winged Agatha, but in terms of strength, they are too far behind.

Ala Troll and Green Aden are both super-state top-level strengths, and Winged Agatha is even more powerful in super-state top level.

There were only a dozen monsters last time, but this time, the three monsters that appeared together, the number is less than a hundred.

Inside the mask, although dozens of people gathered, all of them looked anxious and could only hide in the mask frantically, and then attacked these humanoid monsters, not daring to rush out at all.

After all, these are hundreds of beings with super-state top-level strength.

These hundreds of humanoid monsters are very smart. They seem to know that it is difficult to break the mask by purely attacking the mask, so the target of their attack has now become the ground.

A group of God trolls smashed a huge pit on the ground. If they want to destroy the rune stone carvings on the ground, as long as the rune stone carvings on the ground are destroyed, the mask will naturally fail.

Without the protection of the mask, the hundreds of elevators and the central teleportation array would be completely exposed to these monsters, and the consequences would be unimaginable.

Wang Xuan just glanced at it and understood that the situation was critical.

Following the notification of Wang Yu's entry into the central city, dozens of people from the central city entered here through the teleportation channel, and many others rushed to different elevators and entered the hundreds of towns below, wanting to send those who are doing tasks in the towns below. The town chief was called.

Gu Manyao followed Wang Xuan and walked out of the teleportation channel, looking at Wang Xuan in front of her, she was about to speak, and Wang Xuan had already shot out.

Xiaoguo summoned to come, suddenly turned into a rainbow light, attached to his body, and entered a state of fusion with him.

Feeling the powerful surging power in his body, Wang Xuan was the first person to take the initiative to rush out of the mask.

As people from the central city came one after another, the number of people gathered in the mask at this moment gradually reached seventy or eighty people. They continued to harass these trolls through long-range attacks, but the effect was not great. Most of these people are supernatural. With medium and high-level strength, even if there are one or two super-level tops, they would not dare to rush out in the face of hundreds of humanoid monsters.

Suddenly seeing Wang Xuan rush out at this moment, everyone's eyes fell on him, and he couldn't help but let out a soft cry.

"Don't go out, it's too dangerous!"

In this group of people, a petite woman suddenly saw Wang Xuan rush out of the mask and couldn't help crying.

She is Xi Muxue from "Sand Town". She has entered the primary skill Shimen, her strength has been improved, and she has also comprehended the primary hatching beast skills. Now she already has a super state, and even purely lethality, she is already a top level.

She was holding the Gatling machine gun in her hand, and through the mask, she was frantically shooting at the God trolls outside.

The power of this Gatling machine gun has been improved, and now it is more terrifying, and the loud noise of the bang is endless.

Those God trolls didn't dare to carry it hard. A few winged Agathas rotated their bodies, forming huge hurricanes, blocking them in front of these God trolls, and barely blocked the Gatling machine gun.

She suddenly saw Wang Xuan rushing out. Although she knew that Wang Xuan was very strong, how could Wang Xuan be able to resist these hundreds of superhuman-like monsters? I am afraid that as soon as I rush out, I will be torn to pieces by these monsters.

Xi Muxue's cries didn't stop, Wang Xuan had already rushed out single-handedly, and immediately an God troll roared, stepped forward, raised a pair of bronze-colored arms, and smashed Wang Xuan, who rushed out of the mask. come over. UU Reading www.uukanshu.com

Another green Aden swayed, and five sharp claws stretched out from the palm, shaped like steel hooks, and grabbed towards Wang Xuan's belly.

The two super-state tops joined forces to strike, how terrible, and outside, there are more God trolls, green Aden, and winged Agatha looking here, but they did not shoot.

With the combined blow of Ala Troll and Green Aden, they should be able to kill this human being, and they don't need to take another shot.

Wang Xuan saw that the ground outside the mask was destroyed and a deep pit was created. These monsters are not stupid, but they want to destroy the rune stone carvings from below, and then disintegrate the mask.

Feeling the surging power in his body, Wang Xuan took a deep breath, and the four metal tentacles protruded out like a living thing.

Chapter 242

With a "no" sound, the Ara troll who swung his arm in front of him and the green Aden who was grabbing with his claws on the other side suddenly shuddered and froze in place.

The two metal tentacles protruded by Wang Xuan quickly retracted. There was a huge blood hole in the middle of the forehead of the troll and the green Aden, which went straight to the back of the head.

Only one face to face, this is comparable to the super-state top powerhouse Ala Troll and Green Aden, whose heads were pierced by metal tentacles, and even their brains were punched out, and they died immediately.

Seeing the bodies of the God troll and the green Aden fall straight down, two groups of white rays of light appeared and did not enter Wang Xuan's right hand. The group of God trolls, the green Aden and the winged Agatha made a commotion, The terrifying roar of filial piety sounded, and these humanoid monsters immediately surrounded him frantically.

Seventy or eighty people in the mask all opened their eyes wide, showing a hint of surprise. They all knew that Wang Xuan was powerful, and even killed the terrifying Ara troll elite before, but at this moment, he killed two so easily. Humanoid monsters, they still felt the surprise.

This group of human-shaped monsters rushed towards Wang Xuan, but all of them were empty. Wang Xuan entered the ghost sneaking, and his body was interspersed with ghosts. The foreheads of the four humanoid monsters pierced through their heads.

When the four metal tentacles retracted, an God troll, two green Adens, and a winged Agatha had lost their breath of life and fell down.

Once again, four white rays of light poured into his body and were absorbed by the ghost wings. The second ghost wing on the left appeared automatically, fluctuated violently, and showed signs of growing again.

In an instant, he killed four humanoid monsters again, and everyone in the mask was in an uproar. Wang Yu, who followed back from the central city, also showed a surprised look in his eyes. He showed his hatchling beast iron cavalry. With a giant mechanical motorcycle, he rides on it and integrates with his body. He doesn't need to rush out of the mask. Together with Xi Muxue, he starts to provide long-range firepower support, and frantically shoots those giants who want to destroy the rune stone carvings. magic.

Above the void, there was a sudden loud bang, and many people were busy looking up, but they saw a giant descending from the sky on the mask above.

This giant has four arms, bronze skin, and a terrifying breath all over his body. He is the Ara troll elite.

This God troll elite opened its mouth and let out a loud roar, stepped on the mask with both feet, the mask was fluctuating violently, its body soared into the sky, jumped twenty or thirty meters in one jump, and then fell to the light with a bang. on the ground outside the hood.

At this moment, Wang Xuan has already plunged into the group of human-shaped monsters facing him. Two metal tentacles wrapped around his arms and turned into giant arms of beasts.

After comprehending and mastering the intermediate skill "active metal", not only does the metal tentacles seem to have life and become a part of his body, but the power of the giant arm of monsters formed by the fusion of metal tentacles is also enhanced.

The original monster arms were half-flesh and half-metal, like a part of his body, and like mechanical metal, with a jerky and heavy feeling. Until this moment, this jerky feeling completely disappeared. A part of his body blended with his flesh and blood, and when he thought about it, his body slanted out, and the giant beast arm in his right hand swung an God troll across his waist.

This troll roared wildly. Although it had a strong defense, it couldn't resist Wang Xuan's monster arm.

A blue dim light lit up from the giant arm of the beast, and the Ala troll was taken by Wang Xuan's giant arm of the beast and flew backwards, and then hit the other Ala troll behind.

The sound of broken bones and rotten flesh sounded, and Wang Xuan had already jumped up and threw himself into the big hole formed by the destruction on the ground.

He needs to stop these God trolls and let them continue to destroy, this rune stone carving may be dangerous.

Two white rays of light appeared, submerged in his body, and were absorbed by the ghost wings in his body. Finally, the ghost wings fluctuated violently and grew again, reaching one meter eight.

Not far away, the ground shook, and the four-armed God troll elite descended, and it let out a low roar, and these groups of God trolls, green Aden, and winged Agatha began to spread out, running around the mask. , scattered into groups, and began to destroy the ground from different places, trying to dig out the rune stone carvings.

No matter how strong Wang Xuan is, and his clones lack skills, it is impossible to stop these humanoid monsters at the same time, so he can only rush towards the nearest place first.

The God troll elite roared filial piety, jumped up again, and stood in front of Wang Xuan.

In the elevator, the leaders of various towns appeared from time to time, and Jiang Mingtai from "Feng Town" appeared. He opened his third eye on his forehead. When he saw the scene in front of him, he was shocked and rushed up immediately.

He Jiankui from "Fire Town", Mou Xing from "Sand Town", Wei Zixuan from "Wang Town" and others appeared one after another.

As strong men appeared one after another, they began to rush out of the mask, trying to stop these humanoid monsters.

Above the sky, one figure after another was falling, hitting the mask, fluctuating violently.

All these appearances are God Trolls, Green Aden and Winged Agatha.

At this moment, everyone raised their heads, and they finally saw clearly that these humanoid monsters appeared from the cracks hundreds of meters high and kept falling down. Soon there were dozens of humanoid monsters on the mask.

Suddenly, a shrill and long whistling sounded, and there was a screeching sound on the mask. The mask seemed to have endured a terrifying force and collapsed, followed by a green figure that rose into the air and jumped dozens of times. Rice, and then fell heavily to the ground.

This is a green Aden, but it is different from the general green Aden. On the surface of its green skin, there is a faint layer of green fluorescent light flickering. The most striking thing is undoubtedly its forehead is in the middle. With a vertical eye, it looks a bit like Jiang Mingtai's third eye.

When Jiang Mingtai saw it, the third eye glowed, and he immediately captured the information of the green Aden with three eyes, and immediately shouted: "This is the three-eyed Aden, it is all the green Aden's. leader--"

Before he could finish his words, the three-eyed Aden had already soared into the air again, attacking Wang Xuan from the other side.

It seemed to see how terrible Wang Xuan was.

At this moment, Wang Xuan, facing the attack of the Ara troll elite, the beast's arms confronted the arms of the troll elite. After a series of blue dim lights, the power of the blue crystal scales was activated, immediately suppressing the power of the Ara troll elite.

There was a look of shock in the eyes of the Ala troll elite. He raised the other two arms that had been tucked behind him, and just smashed them out, wanting to attack, suddenly two metal tentacles appeared in front of them, like two giant pythons. It tangled up along these two giant arms.

Wang Xuan flipped his hands and grabbed the other two giant arms of the Ala troll elite, and a terrifying force surged forward. The Ala troll elite had no resistance, he was swung up by him, and he slanted towards the just now. The three-eyed Aden smashed.

The third eye of the three-eyed Aden flickered, as if capturing the trajectory of Wang Xuan's attack, and the Ala troll elite who smashed over only swiped by the side of the troll elite. Five claws stretched out, and they reached Wang Xuan. on the belly.

As long as he is caught by these claws, no matter how strong Wang Xuan's three-layer defense is, his claws can easily tear his body apart in an instant.

But Three-Eyed Aden didn't expect Wang Xuan's two metal tentacles to wrap around the other two giant arms of the Ala troll elite. At this moment, they pulled sideways, and the body of the Ala troll elite that had fallen down immediately smashed sideways.

This time, even the three-eyed Aden couldn't dodge. With a muffled groan, it was hit by the body of the God troll elite. Purely in terms of physical strength, the three-eyed Aden was not as good as it. .

It can make the metal tentacles activate in an instant, wrapping the arms of the Ala troll elite and smashing them horizontally. Activate at will.

Three-eyed Aden just fell to the ground, when Wang Xuan's two metal tentacles wrapped around the body of the Ala troll elite, used them as weapons, and smashed them again.

The three-eyed Aden let out an angry roar, and was busy turning over to dodge, not wanting Wang Xuan's hands to grab the arms of the Ala troll elite, change direction again, and smash in the direction it was dodging.

Just like just now, Three-Eyed Aden could not dodge once again, and was hit by the body of the God troll elite. This time, there was a cracking sound in the bodies of both sides. Three-eyed Aden opened his mouth and let out a scream, Blood spurted out of it, and it rolled and fell towards the front.

Wang Xuan grabbed the arm of the Ala troll elite with his hands and two metal tentacles respectively. The movement direction of his hands and metal tentacles could be changed at any time. Even if the three-eyed Aden had a third eye, he could not fully capture it. The demon elite was hit by the body.

This troll elite is barely in human form. The poor three-eyed Aden has been smashed into a lake of flesh and blood, and the bones in his body are basically broken. Finally, he fell to the ground like a pool of mud, and lost his resistance and struggle. the power of.

As Wang Xuan lifted the body of the Ala troll elite for the last time and smashed it down to the three-eyed Aden, which was like mud, the three-eyed Aden could not even scream, and the body completely exploded, killing him immediately. And the body of the God troll elite has also become tattered, not far from death.

Only then did Wang Xuan let go and punch out, smashing the head of the Ara troll elite and killing him.

Two groups of white rays of light appeared, and these two groups of white rays of light glowed with dazzling white light, which were completely different from ordinary Ala trolls or green Aden.

Wang Xuan doubts that the strength of the Ala troll elite and the three-eyed Aden should be comparable to the powerhouses at the peak of the super state.

If it is true, how powerful is his current strength?

During the thought, the unwilling consciousness in these two white rays of light was erased by invisible power, turned into pure energy, and absorbed by the ghost wings in his body.

After absorbing these two white rays of light that contained powerful energy, his ghost wings immediately grew again, reaching 1.9 meters.

Now, his two ghost wings, at a rough look, have almost become about the same size, only the last ten centimeters away, his second ghost wing will grow to be exactly the same size as the first ghost wing.

At that time, his ghost car strength will inevitably have a qualitative leap.

Although he killed the three-eyed Aden and the Ara troll elites in a row, the number of humanoid monsters around him has increased. In just a short time, there have been more than 200. What is even more amazing is that above the mask, with the boom A loud noise, from above the sky, descended into a powerful existence again.

Wang Xuan looked up, two Ara troll elites, two three-eyed Aden, these are four existences that are comparable to the peak of the super state.

At this moment, among the hordes of humanoid monsters, Wei Zixuan and He Jiankui were doing their best.

They were originally powerful, and they entered the central city. With the mastery of the skills of the hatching beasts, their strength has been raised to a new level.

The current Wei Zixuan's strength is not inferior to the Ala troll elite and the three-eyed Aden, and even stronger.

In a short period of time, at least two God trolls and one winged Agatha died under his king's golden sword.

He Jiankui was like a **** of fire, wherever he went, the red flames swept through.

Although they are powerful, there are too many humanoid monsters, each of which is comparable to the top superpowers, and there are even stronger humanoid monsters.

Seeing the appearance of two more Ara troll elites and two three-eyed Aden, Wang Xuan knew something was wrong, and immediately ran towards the mask. No matter how quick the battle is, I am afraid that this rune stone carving will be destroyed by them.

Do you really want to use the Book of Giants?

Inside the mask, more and more people appeared. In a short period of time, there were more than 150 people. However, most of them did not have the courage to rush out of the mask. They were originally the leaders of the towns and belonged to the most common people. The super-moderate powerhouse, entering the central city this time, has the opportunity to enter the skill building, master the skills of hatching beasts, and the strength can be greatly improved.

But Rao is so, they are only the super-superior level now, and they are not opponents of these humanoid monsters at all.

After the arrival of the two God troll elites and the two three-eyed Adens, another figure appeared silently behind them.

This figure looks like Agatha with wings, but the normal winged Agatha has only two wings, but it has four wings.

It looks stern, has a full breast, and looks at the figure, it is female.

When Wang Xuan saw it, he immediately understood that this must be the leader of Winged Agatha, and his identity should be similar to that of the God troll elite and the three-eyed Aden.

They landed on the mask, the mask was fluctuating violently, and they rose into the air. Agatha, who had four wings, spread her four wings. From a distance, it looked like an archangel descending, faintly carrying an inexplicable charm.

Wang Xuan understood that if he could kill the five powerful beings in front of him and absorb their white light, his second ghost wing would surely be complete.

With a thought, the two metal tentacles reached seven meters in length. They volleyed them first, followed by him like a ghost, and approached the two elite Ara trolls in front.

The two God troll elites were separated from left to right, roaring from their mouths, bronze-colored rays of light all over their bodies, and their arms stretched out.

There were two crisp snaps, and the two metal tentacles he drew slammed onto the giant arms raised by the two God troll elites.

Suddenly, a blue light flickered inside, and the strength of these two metal tentacles increased sharply.

The two God troll elites opened their mouths and let out a scream. They were horrified to find that the huge arm they raised to resist the metal tentacles was twisted and deformed, and there was a cracking sound of bones inside.

Wang Xuan seized the opportunity and jumped up. The giant arm of the monster in his right hand appeared in the air with an afterimage, and when it reappeared, it smashed into the head and face of one of the elite Ara trolls.

The face of the Ara troll elite collapsed and twisted, and then exploded from the back of the head, a large amount of blood mixed with the brain, and the bones that shattered into pieces shot at a rapid rate.

A mass of white light appeared, immediately submerged into his body, and absorbed by his ghost wings.

Another Ara troll elite was killed, and the two three-eyed Aden screamed in anger, jumped up, and walked around from the rear.

Although Wang Xuan killed these powerful humanoid monster leaders in a row, the number of humanoid monsters gathered around the mask was increasing, and the situation was getting worse and worse.

Although the number of people inside the mask is also slowly increasing, most of them dare not walk out of the mask. They can only hide in the protection of the mask and attack outside, hoping to stop these trolls and green Aden. Monsters destroy runestone carvings.

Wang Xuan looked at the two three-eyed Aden surrounded by the back, and was about to fight back, when a cloudy wind suddenly hit his head, which was extremely fast, and his heart froze slightly, and a ghost wing appeared and covered it.

With a "no" sound, the ghost wing was attacked as soon as it protected it, and a force as heavy as a mountain hit the ghost wing from above, causing the ghost wing to collapse into a deep pit.

Wang Xuan snorted lowly, took a step back, and another ghost wing followed, slapped it fiercely, a hurricane blew up, and a blue light appeared on the surface, just about to pounce from behind. Three-eyed Aden didn't feel good, so he was busy retreating and dodging.

The ghost wing swept down diagonally like a steel blade, and it was only a short while before its body could be cut open~www.mtlnovel.com~ Wang Xuan put away the ghost wing above, but saw one with four The winged Agatha swept across the sky, landed ten meters away, and then turned around.

The strength of this four-winged Agatha is even more terrifying than the leader of the God troll and the three-eyed Aden.

Wang Xuan restrained his ghost wings and was about to make a move when suddenly a long howl came from the forest in the distance.

The whistling sound was extremely loud and continuous for a long time. It appeared from the distant forest and sounded all the way here. It seemed that the person who made the whistle was running at a very fast speed while whistling.

The whistle attracted everyone's attention, and even the four-winged Agatha who was about to attack Wang Xuan turned her head.

However, in a short period of time, the whistling sound appeared in the canopy of a towering tree within a few dozen meters of the crowd, and a figure suddenly appeared.

The man almost stepped on the canopy, and when he got close, he jumped down from the canopy.

Chapter 243

The tree canopy is no less than forty meters from the ground, and this man just volleyed down, only to hear a thud. impact.

It is conceivable what level of tyranny his body has reached.

As soon as he landed, he jumped up again, like an arrow from the string, rushing towards here.

After him, in this forest, people appeared one after another, men and women, old and young, all wearing the symbols of the five major forces, riding various mechanical beasts, whistling.

In the blink of an eye, hundreds of people poured out.

No one would have imagined that so many humans would suddenly appear in the forest in the distance. Wang Xuan turned his head and saw that the man headed by him was about thirty years old. He jumped down from the canopy of the tree, and then jumped up. The speed was as fast as lightning, and he landed in the blink of an eye. In the distance between a group of winged Agathas.

The speed was so fast that Wang Xuan's heart moved, and the town leaders in the mask suddenly cheered in unison: "Five Cities!"

"It's from the five major cities!"

The sound rang out, and the more than 100 people inside the mask were all boiling, and one after another began to rush towards the outside of the mask.

Wang Xuan understood that the hundreds of people who poured out from the distant forest were from the five major cities.

The people of the five major cities finally appeared.

The man at the head uttered a loud roar, carrying an indescribable terrifying air wave, and the momentum was appalling. Wang Xuan saw him slamming into those winged Agathas. These Agathas are not weak, comparable to the top super-states. He was a strong man, but when he encountered him, he became as vulnerable as a paper lake, his bones and flesh were rotten, and they fell to both sides, feathers flying all over the sky.

More than 200 humanoid monsters began to riot. They did not expect that so many human powerhouses would rush out of the distance.

Wang Xuan heard someone in the mask whispering softly, "That's Mei Xiaosen."

Hearing this name, Wang Xuan's heart moved, and he immediately thought of following Xu Jian to this third-layer world that day, and he mentioned Mei Xiaosen's name to himself.

This Mei Xiaosen is from Xuancheng, but he has already gone out independently and established his own business. He has gathered a group of super-powerful people and is the leader of one side.

Of course, in name, he still belongs to the "Xuancheng" banner, and is still a person from the five major cities.

A sharp whistling sounded, these turbulent humanoid monsters, not to be outdone, immediately a group of winged Agatha began to spin, blowing up hurricanes, these hurricanes gathered, want to unite, put this Mason was strangled.

Mei Xiaosen sneered, waved his right hand, and made a "snatch" sound. A large flag fell from the sky and inserted into the ground. The flagpole was cast iron with a dragon embroidered on it.

It's strange to say that when this iron cast dragon appeared, the hurricanes that swept in one after another seemed to be suppressed by an invisible force, and began to sway, trying to disperse from it. The speed of these wings of Agatha slowed down, like a Carrying a heavy load on his back, his movement became sluggish.

Mei Xiaosen swayed and circled the dragon flag. One wing after another, Agatha slammed into the air, and each wing Agatha's neck was cut in half from the throat, just a little bit. Their heads will fall off.

In this circle alone, at least seven or eight wings of Agatha died, and groups of white rays of light emerged, submerging into Mei Xiaosen's body.

Wang Xuan saw this scene from a distance and took a deep breath. On the one hand, he was shocked by Mei Xiaosen's power, and on the other hand, he also aroused a little fighting spirit. The power of the blue crystal scales in his body suddenly opened up, the ghost wings vibrated, and his body was slumped. The arc was ejected, and the giant arm of the demon beast in the right hand was rendered bright blue light.

The three-eyed Aden was shocked by the performance of Mei Xiaosen in the distance. He was a little lost. Even with the third eye, he couldn't catch Wang Xuan's attack. Without a sound, its head blossomed and was hit by Wang Xuan's giant arm of monster. , died instantly.

Absorbing the white light from the three eyes of Aden, Wang Xuan felt the second ghost wing vibrating violently behind him. This ghost wing was only one step away from perfection.

The other three-eyed Aden let out an angry scream, stretched out a pair of claws, and sprayed two air streams from his back, rushing towards Wang Xuan at an extremely fast speed, while the four-winged Agatha turned around, With a vertical motion of his feet, he rose into the air, appeared above Wang Xuan's head, and two sharp black blades stabbed down.

Wang Xuan's two ghost wings were fully opened, and suddenly disintegrated, turning into branches of steel feathers. The eyes can capture the trajectory of the opponent's attack, and it has an amazing effect at this moment. The steel feathers that have been shot are avoided by it, and the four-winged Agatha who flies to the top swings the black blades of both hands away, forming a black cloud. , the wind and rain were impervious, and the black cloud waving out from the steel feather thorns shot by the storm was immediately bounced back.

With a "no" sound, the two metal tentacles shot out and suddenly retracted and disappeared. The three-eyed Aden, who had just avoided all the steel feathers, froze, his eyes shot an unbelievable look, looking at Wang Xuan, on his forehead A transparent blood hole appeared, with fresh blood and white brains flowing down the blood hole to its face.

It fell to the sky, and no matter what, he could not have imagined that he even avoided the steel feathers that were shot like a storm, but he couldn't avoid the metal tentacle.

This is the horror of hatching beast's intermediate skill "active metal".

The current metal tentacles, under the power of "active metal", move according to Wang Xuan's will, and the steel feathers burst into the sky, just to distract them, with the strength of the four-winged Agatha and the three-eyed Aden, this The steel feathers shot violently, and it was difficult to cause fatal damage to them, so his real killing was these two metal tentacles.

A metal tentacle shot head-on, instantly piercing the three-eyed Aden, piercing its third eye together with its head to create a blood hole, and the other metal tentacle was seven meters long, forming a semi-arc trajectory in the air. It bypassed the defensive black cloud swung by Agatha's black sharp blades on the upper four wings, hit its forehead from the side, passed through it, and shot it from the other side of the forehead.

Blood splashed, and the four-winged Agatha's face became stagnant. The metal tentacles swayed on its head, and with a crisp sound, half of its head was cut off, and then retracted and returned to Wang Xuan's right hand.

Watching the four-winged Agatha lose half of her head and fall from the air, Wang Xuan felt the power of "active metal". Just as he guessed, this ability was used in battle, and it was extremely powerful.

And this is only the intermediate skills of hatching beasts, then, what are the advanced skills of hatching beasts, and how powerful will they be?

On the other side, hundreds of super-powerful people from the "five major cities" turned over and got off the mechanical beast one after another, entering a state of integration with the mechanical beast, like a sharp arrow, inserted into more than two hundred humanoid monsters, these There is almost no weak person in the super strong state, the weakest can reach the super state upper level, especially the dozens of people in the lead, each of them is extremely powerful, depending on the speed of their rushing and rushing over, any one The strength will not be weaker than the four-winged Agatha and the God troll elite.

These people rushed into this group of humanoid monsters, almost crushing them, all kinds of rumbling noises were heard, and one after another humanoid monsters were blown away or beheaded with miserable roars.

Wang Xuan killed Four-Winged Agatha and Three-Eyed Aden, and once again absorbed two groups of white rays of light. He only felt the energy fluctuations in his body. The white rays of light in his right hand no longer absorbed energy. Only his second ghost wing was like The long whale drew water and sucked in the energy of the two white rays of light. The ghost wings vibrated, and there were faint signs of growing again.

Wang Xuan understands that as long as he draws some more energy, the second ghost wing will be completed immediately.

He rushed into the group of human-shaped monsters facing him, and swung out two giant arms of beasts, hitting an God troll and a green Aden respectively, knocking their bodies into the air, and then smashing at the other human-shaped monsters behind him. .

On the other side, Wei Zixuan from "Wang Town" held a pair of golden swords and rushed into a group of Winged Agathas. Although these Winged Agathas were powerful, they couldn't resist his golden swords and were slashed by him. kill.

He Jiankui is like a **** of fire. Wherever he goes, the crimson flame burns. Apart from the "five major cities" that appeared, among the people from each town, Wang Xuan, Wei Zixuan and He Jiankui were the most famous. the most striking performance.

Among the three or four hundred people from the five major cities that rushed out, many people noticed the performance of Wang Xuan and the three of them, showing their surprised expressions. It seems that they did not expect that among the leaders of the hundred towns, such a situation would appear. characters.

After all, the vast majority of those sent to the town below to become leaders are relatively weak and super-powerful superpowers.

In the forest behind the 300 or 400 strong men from the five major cities, more and more people appeared one after another. Approach here.

They didn't make a move. They obviously understood that there were hundreds of people who could easily kill these humanoid monsters. They no longer needed to make a move.

Those more than 20 people who are supported by the stars and Gongyue in the center are riding huge mechanical beasts. Wang Xuan can understand at a glance that the six kinds of crystals possessed by these mechanical beasts have reached the middle state. Huge shell, his little boy, only half of the six crystals are in the middle state, and the other half is still in the initial state.

These more than 20 people riding giant mechanical beasts are shrouded in black robes, even their faces are covered, only a pair of eyes are exposed, full of mystery.

Seeing that they were protected by the stars and Gongyue, Wang Xuan knew that these talents were the real core members of the five major cities. Thinking of the elders and the five people sitting on the blue stone seats that "Xuancheng" saw, they were also covered Wearing a black robe, he has some comprehension in his heart. These more than 20 people may have been attacked by hatched beasts, and they have become half-human and half-beast terrifying, so they are wrapped in black robes, and they don't even have a face. exposed.

It seems that the elites of the "Five Cities" have basically arrived.

More than 200 humanoid monsters were quickly killed by both sides. Wang Xuan did not know how many monsters he had killed. He continued to absorb the white light, the energy in his body was boiling, and the second ghost wing kept shaking. Finally, the second ghost wing grew again, from one meter nine to two meters, becoming exactly the same size as the second ghost wing.

This second ghost wing has finally grown to its limit.

With the completion of the growth of the second ghost wing, the power between the two ghost wings has finally reached a balance. It is not like before, one is strong and the other is weak. Every time you fan, you need to separate your mind. To master the balance, whether it is sprinting speed, jumping up or down will be affected.

At this moment, all these problems will be solved. When the second ghost wing grows, he **** the two ghost wings again, creating a huge driving force. Floating up, whether it is the height or distance of the jump, or the speed, it has obtained an amazing improvement.

When he fell between the two wings of Agatha and a green Aden, he turned around, and the two ghost wings turned out sideways, with a light sound, the two wings of Agatha and a green Aden were on the body. A terrible wound crack appeared, and the upper body was separated from the body and flew out.

Their bodies were cut horizontally by these two ghost wings.

As hundreds of people from the five major cities gathered around, some of the remaining humanoid monsters were killed, and not even one was able to escape. Wang Xuan retracted his two ghost wings, but saw a hundred ghosts in the mask. Many people came up one after another, and everyone couldn't hide their excitement on their faces.

These days, the No. 8 elevator has broken down, and everyone can't find the five major cities. There are no leaders in the group. Most people are full of fear and anxiety. The two tasks they gather are one of repairing the teleportation channel and entering the central city, and the other The main task is to find the five major cities.

Now that people from the five major cities have taken the initiative to appear, how can they not be excited.

Seeing that the humanoid monsters were basically cleaned up, Mei Xiaosen made a move with his right hand, and the falling iron cast dragon flag rose into the air and disappeared suddenly. After that, he retreated to the crowd behind him, looking inconspicuous.

If he hadn't just seen his astonishing performance, no one would have believed that such a very ordinary man with a public face hidden in the crowd would be so powerful.

In the distance, groups of super-powerful people appeared, supporting more than 20 people in the center, slowly approaching, maybe there are too many humans gathered here, the tree demons, mushrooms, piranhas and forest giants in the distance. The wolf and other monsters are all retreating, not daring to come forward easily.

In just a short period of time, the number of people gathered here has exceeded a thousand people.

Wang Xuan saw acquaintances in the crowd, Wan Qianying, Xu Jian, Huang Qingzhi, Chu Boyu and others all appeared, but Tang Ruoyu never appeared, and more and more leaders of Baizhen appeared from the elevator. It was all Wen Xun who came, but it was too late, and the battle was over.

The group of people covered in black robes walked to the edge of the mask and began to separate from each other. They were soon divided into five teams. Wang Xuan knew that he had guessed correctly. This group of people should be the elders of the five major cities and other core leaders.

After these people separated, they each took out a small flag from their storage belt and put the flag on one side of the ground. There were five flags in total. The embroidered patterns on them were different, and they represented the five major cities.

The people who gathered from all directions gathered towards different flags according to the faction they belonged to.

Xu Jian called Wang Xuan and Gu Manyao, and walked with him toward one of the flags embroidered with black bracelets.

There are six people in black robes beside the flag. Wang Xuan understands that these should be the elders of Xuancheng and the five people who once sat on the blue stone seats, that is, the real core of "Xuancheng" figure.

Among the leaders of the hundred towns, all the leaders belonging to Xuancheng gathered over and saluted the six people together. Behind the six people, they were all people from "Xuancheng", including people like Mei Xiaolin who were independent from Xuancheng, and now they are all gathered.

The same goes for the other four cities.

"You don't need to be more polite." One of the six black-robed people said, and Wang Xuan heard the same voice. This was the voice of the "Xuancheng" elder he had seen.

But when I saw him that day, he was immersed in the potion of the glassware and looked like an octopus monster. Now he was wrapped in black robes, but he couldn't see anything unusual.

These leaders belonging to the Zhenxuan Gang can naturally hear the elder's voice, and immediately stand respectfully and wait for the elder's instructions.

Wang Xuan and Gu Manyao also stood silently on the side. He didn't see Tie Jun. He guessed that Tie Jun should have taken on some task. He didn't know where he went.

"The five major cities have suffered changes. I believe you all know that. The No. 8 safe area was destroyed, and the No. 8 elevator failed to use."

"Although many people have been killed or injured in the five major cities, it is fortunate that we have finally arrived here. The No. 9 safe zone has opened. In the next days, we need to rebuild the five major cities here, and..."

When the elder Xuancheng said this, he raised his head and looked at the ten glass pillars of several hundred meters in the No. 9 safe area, and said slowly: "The damage to the No. 9 safe area is not too serious, and the glass pillars have been repaired. I hope that if the glass pillar can be repaired, we will be able to reopen the way up~www.mtlnovel.com~ After saying this, everyone in all directions is shocked and their eyes are shining.

Are there any hope of repairing the ten glass columns in the No. 9 safe zone?

"If you want to repair these glass cylinders, you need to pour blood. The stronger the monster's blood contains, the stronger the energy. These monsters are not weak, and their blood is the most suitable."

With the order of the elder "Xuancheng", everyone around them quickly moved, carrying the corpses of these humanoid monsters, and began to move towards the ten glass cylinders.

Only at this time did Wang Xuan know that the energy contained in the monster's blood could not only repair the rune stone carvings of the teleportation passage, but also the glass cylinder, and it might even open the elevator passage leading to the fourth floor.

The elders of the other four cities issued similar orders, and the bodies of more than 200 humanoid monsters were quickly brought in, and their blood was poured on the bottom of the ten glass cylinders.

Chapter 244

Wang Xuan noticed that the glass cylinder would really slowly absorb the blood of these monsters, and saw that the blood-red silk thread appeared on the glass cylinder, slowly extending upward and intertwining, like a dense blood-red silk screen. .

As a large amount of blood was drawn in, these blood-red silk threads continued to extend upwards along the glass cylinder.

Wang Xuan saw that these elders also knew how to use the blood of monsters to repair the buildings in the safe area. It seems that the transmission channel in the center of the No. 8 safe area could not be repaired before.

Among the four black-robed men belonging to "Rakshasa City", a black-robed man suddenly swayed, and suddenly he came to the glass cylinder. He saw that the black robe swelled and stretched out a few tentacles with suction cups. Using the tentacle suction cup, **** on the smooth surface of the glass cylinder and start climbing up.

The surface of this glass cylinder is too smooth, and it is difficult for ordinary people to climb up.

Many people gathered under the glass column, looked up and looked up, watching the figure of the black-robed man keep getting smaller, his speed was very fast, and after a while, he followed the glass column to several hundred meters. in mid-air.

Wang Xuan understood that the man in black robe climbed up to observe the restoration of the glass cylinder.

Almost all the blood of the corpses of more than 200 humanoid monsters was squeezed out by them, and all of them were poured on the bottom of this glass cylinder.

It is too difficult to completely repair the ten glass cylinders, so everyone wants to repair one of them first. In fact, as long as they can repair one, it is enough for them.

Wang Xuan noticed that more and more people gathered around. The number of people in these five major cities was beyond his expectations. Of course, these people also included many large and small forces that had been independent. Now there is an accident. These independent forces, big and small, have returned to the five major cities again.

The black-robed man observed it, and then slid down the glass cylinder, the speed getting faster and faster, until it was about tens of meters down, and then he used the tentacle sucker again to offset the downward impact, the original falling speed. Slowing down, it finally fell steadily to the ground.

"How is it?" One of the black-robed men who belonged to "Rakshasa City" asked.

"The effect is not great. If you want to repair it, you must find a more powerful monster." The man in black robe retracted the tentacles with suction cups and replied in a low voice.

Hearing this, these black-robed people breathed out softly, more or less disappointed in their voices.

"The energy needed to repair the upward passage is unimaginable. It's really impossible to rely on these monsters..." One of the black-robed men from "Phoenix City" spoke slowly, listening to the voice, it was obviously a woman, and then she turned around on a giant mechanical horse and said solemnly, "Let's go, let's rebuild the 'Phoenix City' first."

After she finished speaking, she rode the giant mechanical horse and started running towards the outside of the mask.

A few people in black robes followed closely, and then a group of super-powerful people belonging to "Phoenix City" supported them and ran towards the forest outside.

"We are also going to rebuild the 'Xuancheng'!"

With an order from Elder Xuancheng, he brought five men in black robes, and then Mei Xiaosen and other super-powerhouses. Xu Jian said excitedly: "Rebuilding Xuancheng, I understand, the elder decided to stay in the No. 9 safe area. With the protection of the five major cities, these monsters can no longer easily destroy the mask."

Wang Xuan and Gu Manyao followed Xu Jian, and together with a group of Xuan Gang leaders from various towns, they followed behind everyone and headed towards the oncoming forest.

Wang Xuan noticed a detail. The directions chosen by the five major forces were different. Basically, the No. 9 security zone was centered and divided into five directions. Ancient ruins, these five forces will each choose an ancient ruin to settle down and rebuild the five major cities. As Xu Jian said, the five major cities will be guarding the No. 9 safe area. If there is an accident here, they can immediately detect it.

This is also the reason why the five major cities were located around the No. 8 safety zone.

There are many buildings in this area, and it is not difficult to find five habitable ancient cities, although these buildings are completely covered by plants and integrate with this virgin forest.

But with everyone's ability, these plants can be easily removed.

Soon I found a building closest to the No. 9 safe area. It should be equivalent to a worm town in scale. It can only be regarded as a small town. There are many towering trees growing in it, and the surrounding walls, including the buildings inside, are covered. The plants are submerged, and it can only be seen from the appearance that this is an ancient town.

With the order of the "Xuancheng" elder, hundreds of super-powerful people took action together and began to cut down trees, remove weeds, and clean up vines and other plants that were crawling on the walls.

Wang Xuan and Gu Manyao also followed to help, clearing the vines that were crawling all over the wall in front of them. Gu Manyao showed the demon chi knife in his hand, and it was cleared very quickly.

Xu Jian on one side was even faster. He showed four animal arms on his back, plus his own pair of arms, making a total of six arms, each holding different weapons, such as chopping claws and vegetables, and easily smashed the large ivy in front of him. chopped down.

At this moment, a young man came over, looked at Xu Jian and Wang Xuan, and said, "You two please come with me, the elder wants to see you."

Wang Xuan was slightly startled, and looked up, only to see that six people in black robes were still riding on the backs of the mechanical behemoths, one hundred and ten meters away. It was Elder Xuancheng who was looking at them at the moment.

Xu Jian was a little surprised, he hurriedly put away his six weapons, retracted his beast arm, and said, "Wang Xuan, let's go, it should be because your performance just now was too good, the elder must have noticed it, so he wants to see us. "

Xu Jian smiled and walked over while talking, but Wang Xuan didn't say anything and followed.

Under the leadership of the young man, the two came to the six men in black robes and saluted the elders.

Beside them, there were also several leaders of the Xuan Gang from the town, including Su Tang from the "Beast Town" he was familiar with, and Chu Dong from the "Sand Town". They were all leaders of the "Xuan Gang" in their respective towns. And was called by the elders.

Su Tang's strength was not weak at first, but now he has entered the central city again, and has learned the basic skills of hatching beasts, and his strength has been further improved.

Xu Jian has self-awareness and understands that he is only ordinary among a group of Xuan gang leaders, not outstanding. Now that he can be called by the elders together, most of them have taken Wang Xuan's light.

The elder stretched out an arm wrapped in black cloth from under the black robe, raised it slightly, indicating that they don't need to be more polite, and then asked what happened after they discovered that the elevator No. 8 was malfunctioning.

The leaders of the Profound Sect took turns telling the story, and the elder listened quietly, occasionally nodding slightly.

When they heard that they had discovered the No. 10 safe area, after entering the central city through the teleportation channel, many people around had a look of surprise on the faces, but the elder and the other five people in black robes could not see because they covered their heads and faces. expression.

Xu Jian mentioned that under Tang Ruoyu's prompt, they repaired the transmission channel from the No. 9 safe area to the central city. In fact, he was very curious and wanted to ask the elders about Tang Ruoyu's situation. Unfortunately, there were too many people here and the timing was not right.

After listening to the leaders of their mysterious gang, the elder nodded slightly and said, "You guys are interested."

After that, the leaders of the Xuan Gang all retreated and continued to help clean up the plants covering the surface of the ancient town, but the elders let Wang Xuan stay.

"Wang Xuan, I just saw that your performance was excellent. In just a short period of time, you have already entered the peak of super-state and possessed a strength close to the limit."

The elder said in a very gentle tone, "I heard that there are three stone gates in the central city, and you can obtain basic, intermediate to advanced hatching beast skills. You have obtained intermediate skills now."

Wang Xuan thought that the elder's eyes were really poisonous, and he could see that he had obtained the intermediate skills of hatching beasts, so he nodded and admitted, thinking that he was evaluating himself as close to the super-state limit, but when the elder just appeared, he actually did not fully explode. Power, so he has such an evaluation, if he exploded all his power, would it be regarded as the real super state limit?

"But don't enter the stone gate with advanced skills for the time being."

Hearing the elder's words, Wang Xuan was startled and couldn't help but say, "Why?" He had planned to enter the Hell Tower this time, and harvested enough crystal scales to enter the high-level skill stone gate.

The elder said: "Because this is a great opportunity to help you break through the super-state limit. After becoming super-state, if you want to grow your own hatching beast, it is completely different from before. You must let your hatching beast reach the peak of super-state. With strength, there is hope."

"Of course, the stronger the strength, the greater the hope of breakthrough, so I hope that you can let your strength reach the super-state limit, and then enter this advanced skill Shimen, there is hope that you can take advantage of the opportunity to comprehend this advanced skill to break through the super-state in one fell swoop. ."

After listening to the elder's words, Wang Xuan understood that above the super state, the hatching beast can grow to a higher state, and there is hope only if the strength reaches the peak of the super state, and the probability of breaking the super state limit is naturally higher than the peak. big.

"I understand, thank you elder for reminding me." Wang Xuan nodded, very grateful, feeling the elder's care for him, but thinking of the instinctual unease of the beast when he first saw the elder that day, he guessed that his strength might be far away It's not as good as the elders. When the opponent is strong, the instinct of the monster will naturally produce uneasiness.

But now that he is strong enough, he is not afraid even in the face of this elder, but for some reason, the faint uneasiness of this monster's instinct still exists.

"Work hard, Xuancheng's future depends on you." The elder said here, slightly tilted his head, and looked at Mei Xiaosen, who had been standing on the other side.

Mei Xiaosen laughed, walked out, and said, "Your name is Wang Xuan, right? It's a good performance. We can get close."

While talking, he suddenly took three steps in a row, and suddenly approached Wang Xuan.

Wang Xuan's heart suffocated, and he immediately felt a huge pressure. This invisible force was shrouded in all directions, and suddenly it was as heavy as a mountain on his back. If you can't stand it, you kneel on the spot.

However, Wang Xuan remained silent, secretly activated the power of the blue crystal scales in his body, combined with the power of his monsters and ghost cars, and exploded together, fighting against this increasingly powerful force, but nodded with a smile on his face. Said: "Yes, I hope to give more pointers in the future."

"Haha, I can't tell you what to say, we are all from Xuancheng, and we will be brothers in the future. It's okay to point each other." Mei Xiaosen was all smiles, and it seemed that he saw something interesting and became more and more excited.

Outsiders looked at them with a peaceful look on the surface, but no one could tell. In fact, they were already fighting in secret. Only the elder of Xuancheng and the five people covered in black robes seemed to see something and looked at their faces together.

Wang Xuan felt the more and more powerful power from Mei Xiaosen, and he could only keep improving his own strength to fight. He always had a smile on his face, but his heart was secretly shocked.

This Mei Xiaosen's strength is simply unfathomable, at least it is the existence of the super-state limit, and it is even possible to surpass the super-state.

All of a sudden, this force all flowed back and disappeared suddenly.

Wang Xuan breathed a sigh of relief, but Mei Xiaosen looked at him carefully before nodding and said, "It's really not bad, a rare good seedling, no wonder the elders are so fond of you."

There was no more casualness in his tone, but a hint of admiration. This admiration was obviously from the heart.

The two competed in secret. Although it was impossible to see who would win and who would lose, Wang Xuan was able to keep calm and let a proud person like Mei Xiaosen express his appreciation. This was shocking enough that the elder and the five black-robed men watched in the eyes, the heart knows.

"If this trip can repair the upward passage, you are all people who have a chance to go up." When the elder said this, he suddenly seemed to have touched some emotions. He sighed and looked up at the sky, with infinite in his voice. Sigh.

Then he waved his hand, indicating that Mei Xiaosen and Wang Xuan can move freely.

Wang announced his resignation and left, and turned back to find Gu Manyao and Xu Jian. Five or six hundred super-powerful people shot together. It still took a long time to finally completely remove all the plants in this ancient town. The ancient town, which has been submerged in the forest for many years, has once again revealed its true appearance.

Despite the vicissitudes of life, the buildings of the ancient town are still relatively intact. There is a sealing altar in the center of the ancient town that looks like a pagoda. However, this sealing altar has long been destroyed, and there is nothing inside.

A man in black robe held a flag with a black bracelet in his hand, followed the pagoda to seal the altar, quickly ascended, and soon reached the top of the altar, and planted the flag representing "Xuancheng" on the top. On the top, this means that this ancient town will be the "Xuancheng" among the five major cities in the third-layer world.

After that, hundreds of people began to clean up the buildings in the ancient town. Wang Xuan and Gu Manyao were both super strong, and they belonged to the "Xuancheng". They were qualified to choose their own buildings here, but they all needed their own Do it yourself to tidy up.

When hundreds of people were busy, Wang Xuan saw a group of people led by Elder Xuancheng, but they stood in front of one of the walls and opened the gate of the ancient town that had been closed for many years. What are they waiting for, including Elder Xuancheng, the five men in black robes, and Mei Xiaosen are all there.

"Strange, what important people are you waiting for? Could there be other people in this Xuancheng?" Wang Xuan saw it from a distance, and was intrigued. Soon he saw a movement in the distance, and a group of iron roses rose from the forest. Winged Demon Owls, but these iron-winged Demon Owls are just hovering in the air, as if they want to attack downwards and are afraid of something.

Afterwards, Wang Xuan saw that inside the opened door, groups of people riding giant mechanical beasts began to pour out from the outside.

The elder led a group of five people in black robes and retreated to the side. More and more people came in. Many people heard the movement and came out of the building that was being sorted out.

In a short period of time, at least a thousand people poured in from the outside. Wang Xuan understood a little when he saw this. The hundreds of people led by the elders were only the vanguard of "Xuancheng". "Xuancheng" is the real big army.

"It should have been thought that the five major cities should have existed for a long time, and there are still a large number of independent forces of different sizes, similar to this Mei Xiaosen also led a group of people to go out independently, and now these independent forces have gone out. The forces have also returned, how can there be only five or six hundred people together?"

After Wang Xuan thought about it clearly, he was not surprised. As the thousands of people entered, behind them, carriages pulled by giant mechanical beasts appeared, all covered with animal skins, except for the four exposed ones. It was hard to see what was loaded on the carriage. Wang Xuan guessed that it might be the materials originally in Xuancheng, and the storage belt might not fit, so he used these carriages to transport it.

As more and more people entered, this new "Xuancheng" became more and more lively and began to become vibrant. Although Wang Xuan did not see the other four cities, the situation should be similar to here.

Although this forest is full of monsters, it may be because there are too many human beings, and the strong are like clouds. These monsters feel their powerful breath and know that they are not easy to mess with, but they did not appear to harass them, but retreated. .

Seeing that the night was getting dark, Wang Xuan decided to return to Insect Town to rest temporarily, so that he could enter the Hell Tower early in the morning.

Leaving the Xinxuan City, Wang Xuan walked towards the No. 9 safe area, and soon saw people coming and going in the safe area. Many people were entering various elevators to go down to Baizhen, and some people were passing through the central transmission channel. , enter the central city.

Looking at the surrounding area, the five new cities began to gather a large number of strong human beings, and the monsters such as tree demons, mushrooms, piranhas, and forest wolves that had been wandering around all disappeared.

There are five major cities guarding this No. 9 safe area~www.mtlnovel.com~ Unless there is an irresistible cataclysm, ordinary monsters alone are not enough to destroy and threaten this place.

Wang Xuan looked at the rune stone carvings on the ground in the safe area, and the large pits in the ground that were destroyed were also filled up, and everything seemed to have restored the former stability and harmony.

The mask of the No. 9 safe area disappeared and disappeared. Just as Wang Xuan approached, he saw that the elevator door belonging to "Insect Town" suddenly opened, the figure flashed, and Tie Jun rushed out of it anxiously.

In today's battle, Tie Jun has never appeared. Wang Xuan guessed that he should go on a mission, and he didn't know the news here, so he didn't come up, but he didn't want to appear at this moment.

"Brother Tie?" Wang Xuan immediately called out when he saw him.

Seeing Wang Xuan, Tie Jun's eyes lit up, and he hurried over: "There's something big in Worm Town!"

With Tie Jun's composure and steadfastness, Wang Xuan's heart sank, and he was able to be so anxious and panic, and immediately understood that this must be a very serious event.

Chapter 245

"What's up?"

Wang Xuan immediately greeted the iron army.

Tie Jun said anxiously: "It's the king bug, it suddenly appeared outside the town of insects, and now the whole town of insects is in a panic, and I just found out, it turns out that Zhao Lei and Zhang Haofei really entered the insect country before, it has been several days. Now, I haven't returned, and the king insect suddenly appeared outside the town of insects, I'm afraid..."

He didn't say anything later, Wang Xuan's heart sank, and he understood that what Tie Jun wanted to say was Zhao Lei and the others.

After all, the king insects who had been sleeping in the depths of the north all appeared outside the insect town, but Zhao Lei and others who had gone deep into the insect country a few days ago had no news at all. This situation is not good.

"Let's go." Wang Xuan didn't say much, just swayed and walked towards the elevator of "Insect Town".

Tie Jun followed closely, and the two entered the elevator and soon returned to Worm Town.

As soon as I walked out of the elevator in Insect Town, I saw a large number of people gathered in the square of Insect Town. The city walls in the north were densely populated with people, and people from the five major forces appeared.

A strange whistle of the king insect came from the north, and everyone felt their heart skip a beat when they heard it.

Wang Xuan raised his head, and through the high wall of Insect Town, he saw Wang Insect's huge body from a distance, which looked like a black hill from the front.

With a flick of his body, he suddenly opened the distance from the Iron Army and charged towards the north of Bug Town at an astonishing speed.

Tie Jun ran with all his strength, but couldn't catch up with him.

Wang Xuan remembered that when he left with Zhao Lei and others, he once told them to enter the northern insect country. With their strength, there is hope to break through the "life and death barrier" and advance to super status.

But I didn't expect that the king insect would change abnormally, and it would come to the town of insects. Even in the last insect wave, the insect king was not so close to the town of insects.

This thing is abnormal.

Wang Xuan swept his body, and quickly jumped over the ten-meter high wall. When he reached the wall, he realized that Wang Zong was less than one kilometer away from Zong Town, and the distance between the two sides was still close.

On the high wall, everyone's faces are very ugly. In this second-layer world, the strength of human beings is limited, but the strength of these monsters and Zerg will not be limited. The power of the king insect is like the **** of this second world.

If the king worm is really approaching the town of worms, with its terrifying body, if it is afraid of a light collision, it can directly smash the high walls of the town of worms, push down these buildings, and destroy the whole town of worms, even if two or three of the towns of worms are destroyed. Thousands of people united together, can not stop it.

Wang Xuan thought about the safety of Zhao Lei and others, and without thinking much, he jumped into the air, fell outside the high wall, left the town of insects, and rushed towards Wang Zong, who was less than a kilometer away from each other.

There are two or three thousand people in the town of insects, and he dares to take the initiative to rush out of the town of insects. He is the only one who is close to the king insect.

Wang Xuan had enough confidence to face the king bug because the Book of the Giant God was really forced to do so, so he decided to use the Book of the Giant God to solve the king bug.

In Wang Xuan's heart, no matter how strong Wang Zong is, it is impossible to fight the Book of Giants.

On the high wall, many people saw a figure flickering in the distance, and their sharp eyes recognized that this was Wang Xuan, the legendary figure of Insect Town, and there was a commotion immediately.

Tie Jun climbed the high wall a step later than Wang Xuan, and wanted to jump off the wall like him, when suddenly a voice came from afar: "Brother Tie, you stay in Worm Town and wait for my news."

He heard that this was the voice of Wang Propaganda coming back.

He has always believed in Wang Xuan very much. Since Wang Xuan let himself stay in Insect Town and not follow into the Northern Insect Kingdom, he naturally has his intentions.

Tie Jun is self-aware and understands that although his strength has improved a lot, compared to Wang Xuan, he can't help him at all except to be a drag on him.

So suddenly hearing Wang Xuan's voice, he couldn't help but stop and look into the distance.

The sky was getting darker and darker, and Wang Xuan's figure was rapidly shrinking, and it soon merged into the night.

As he kept approaching the king bug, Wang Xuan felt an unprecedented sense of oppression.

This sense of oppression is like an invisible mountain, pressing him from all directions in an endless stream, making him breathless, and like carrying a mountain on his back.

This kind of feeling is a bit like in the third-layer world before, facing Mei Xiaosen, Mei Xiaosen suddenly tried to test his strength.

The power in his body was continuously released, and against the increasingly terrifying pressure around him, Wang Xuan's face became more and more solemn, and gradually even the power of the blue crystal scales burst out, and the two ghosts behind him. Wings open.

In front of him, the 100-meter-long, incomparably tall pitch-black giant insect was getting closer and closer.

The mouthparts of this giant insect are as big as a house, and there is a constant whistle inside. Around it, countless insects are like a tide, densely packed, and the number is as many as one million, submerging everything.

Wang Xuan's heart was heavy when he saw the army of insects.

Zhao Lei, Zhang Haofei, Li Haotian, Bai Yan, Yu Shanshan, Yao Tianyao and Duan Chen went deep into the insect country a few days ago, and now seeing this army of millions of insects, with the strength of Zhao Lei's seven people, once they encounter these insects army, do not need the king insect to dispatch, they will die without a place to be buried.

Thinking that Zhao Lei and the others listened to their own words, and then went deep into the insect kingdom, Wang Xuan felt a sense of guilt and an indescribable anger.

With his left hand stretched out, the Xumi mustard space has been opened, and the Book of Giants appears in his left hand.

Although his current strength is one of the best in the super state, it is still far from enough to face the existence of the king bug. To deal with the king bug, there is only the Book of the Giant God.

Wang Xuan slowed down, he had already appeared within 100 meters of Wang Zong.

With a distance of 100 meters, I felt the hugeness of the king insect more and more. Purely in terms of size, the size of the king insect even exceeded the totem of the third-layer world. The power that Wang Xuan was bearing at the moment was unimaginable.

In all directions, more and more insects appear, such as armor bugs, giant armor bugs, red bullet ants, bullet giant ants, five-star spiders, elite giant ants, ghost mantis, giant mantis...

Countless insects came in like a surging tide, and soon surrounded Wang Xuan in this tide of insects.

But it is strange that although these insects surrounded him, they did not attack him.

The king bug, which was a hundred meters away, moved slowly, raising his head and screaming from time to time. When Wang Xuan got close, he realized that there was something wrong with the king bug.

From its open mouthparts, black juice was continuously sprayed out. On its huge head, there were two huge compound eyes, and a stone pillar was inserted into one of the compound eyes.

The stone pillar penetrated into its head along the compound eye, and black liquid continued to flow out along the stone pillar.

When Wang Xuan saw this, his heart trembled slightly, and he finally understood that this king bug was seriously injured.

"What's going on? In this second-layer world, who can hurt the king bug?"

Wang Xuan was in shock, watching the king worm constantly raising his head and whistling. At this moment, he was getting closer and closer to the king worm, and he could hear that there was pain, anger, despair, and a kind of madness in the whistling.

"It keeps looking at the sky above the insect town, and it's sad that it was seriously injured. Is it related to the crack that broke above the insect town?"

Although the king insect moved slowly, it was constantly approaching, and the distance between it and Wang Xuan soon shortened to fifty meters.

Wang Xuan stopped, feeling a huge and incomparable emotion emanating from Wang Zong's body.

Perhaps because of the heavy damage, the king insect was almost mad, and this approached the town of insects.

"What to do? Do you want to use the Book of Giants to stop it? Who is it that can severely damage the king bug?"

Wang Xuan's thoughts turned, and several thoughts flashed at the same time, watching Wang Zong approaching, he had to retreat, and not far behind him was Zong Town.

Once the king worm enters the worm town, it will be a real disaster.

Countless insect armies supported Wang Insect and followed it. Wang Xuan frowned when he saw that none of the insects attacked him.

Since the king insect is close to madness, it dominates the army of these insects, but why doesn't it attack itself?

While thinking about it, Wang Xuan squeezed the Book of Giants tightly, watching the king bug getting closer, finally slowly raised his left hand, took a deep breath, and only needed to spray a mouthful of

blood on the golden paper. You can activate the Book of Giants and summon the existence that sleeps at the end of the endless darkness.

At this time, the king insect that was pushing within a few dozen meters of him suddenly stopped its painful whistling. It lowered its body slightly, and the huge mouthpart that was originally opened closed. It faced Wang Xuan and made a strange sound. move.

This action looks like bowing his head, and then his mouthparts are slightly opened and closed, and there is a strange sound like a whimper.

For some reason, Wang Xuan suddenly felt a sense of consciousness, and suddenly he understood.

The king bug is begging for help.

"Does it know that I have the Book of Giants? It wants me to use the Book of Giants to save it?" Wang Xuan just had a thought in his mind, and then he saw the king bug lying on the ground, and he kept making something like this Nodding, it seems to be able to feel what Wang Xuan is thinking.

The army of insects scattered in all directions also had a strange scene at this moment. All the insects knelt down, as if they were worshiping their supreme king, but this time, they were not worshiping Wang insect, but Wang Xuan.

Wang Xuan stood there in a daze, motionless, holding the Book of Giants in his left hand, looking at the king bug in front of him.

For a long time, the insect tide brought by the king insect is the biggest threat to the residents of the insect town. A few months ago, if the five cities above paid a huge price and helped, the insect town would have been destroyed by the insect tide. .

From this point of view, the king bug and their human beings are enemies rather than friends, and can even be said to be the biggest enemy of the second floor.

But for some unknown reason, Wang Xuan always felt that the insect wave summoned by the king insect did not seem to be entirely for the purpose of destroying human beings, otherwise he would not be able to explain it. With the terror of the king insect, he really wanted to destroy the town of insects, how could it be thousands of them? Can stop?

"It seems that the emergence of king insects and the formation of insect tides are mainly for the purpose of cultivating and exercising super-powerful people. It is like a set rule..."

Wang Xuan's thoughts flashed through his mind, and Wang Zong, who was dozens of meters away, suddenly raised his head, his mouthparts opened wide, and his obese body that was 100 meters long bowed upward at once, becoming very excited.

Almost at the same moment, a tree root suddenly hung down above the 100-meter sky.

The root of this tree is extremely huge, and it hangs down from the sky like a giant python that reaches the sky. It falls on the stone pillar inserted in the head of the king bug, like a giant python, and immediately wraps the stone pillar tightly.

All this happened so quickly that Wang Xuan opened his eyes wide and saw Wang Zong raised his head and whistled.

The tree root wrapped around the stone pillar, slammed up, and with a "chi" sound, black liquid splashed out, the tree root wrapped around the stone pillar and pulled it out of the head of the king insect, together with the compound eye that had been pierced. out.

Suddenly, Wang Chong opened his mouth in pain, his body twitched violently, and he couldn't stop screaming.

The stone pillar that was pulled out must be 20 to 30 meters long, and there are signs of rupture at both ends. The tree root wrapped around the stone pillar and shrank to a height of 100 meters, as if it wanted to drag the stone pillar away.

Wang Xuan saw Wang Zong howling in pain, but suddenly understood in his heart that this tree root was saving Wang Zong.

At this moment, an iron anchor flew over the rotten bow in the crack of the sky above the town of insects.

This iron anchor looks corroded, tattered, and looks like a claw. It is attached to an iron chain that is also rusted. It appears in the sky, traverses the void, and suddenly hooks the stone pillar entangled by the roots.

At this moment in Insect Town, the five major forces, whether it is a strong person, an adult, or a newcomer with a sub-body, more than 2,000 people are gathered there, looking up at all this, everyone is stunned, showing difficulty. Shocked look of confidence.

Even the iron army, who was already a super strong, stood on the city wall at this moment, trembling all over, watching in horror as the iron anchor appeared on the bow of the ship, and hooked the worm that was pulled out from the compound eye and head of the king worm. The stone pillar covered with the black blood of the king worm was taken away from the sky of the worm town.

The army of millions of insects below screamed together, and the sound was earth-shattering.

The roots of the tree in the void entangled the stone pillar without giving an inch. The iron anchor and the tree root pulled each other, and the stone pillar vibrated a hundred meters above.

Suddenly, a terrifying sound sounded, like a thunderstorm. In the pulling of these two terrifying forces, the iron anchor overwhelmed the root of the tree, and immediately pulled the stone pillar to the top of the insect town, pulling it completely into the crack above.

In an instant, the stone pillar was pulled into the crack a hundred meters above, and it was about to be pulled into the crack and disappeared.

At this moment, the wailing king worm suddenly bent up, and then slammed into the sky. The huge body with a length of more than 100 meters rose into the sky, spanning a distance of more than 1000 meters, and suddenly reached the top of the insect town. At a height of 100 meters, with a mouthpiece, at the moment when the stone pillar is about to be completely dragged into the crack above, it bites.

More than 2,000 people in the entire Insect Town saw this scene, and it was the first time they saw the King Bug at such a close distance. , Everyone was so frightened that they retreated around.

The king worm bit the broken stone pillar, the huge body bowed, and pulled down desperately, as if trying to regain the stone pillar that had destroyed one of its compound eyes before.

Wang Xuan was rushing towards Insect Town with all his strength, and he did not expect these amazing changes.

From the preliminary view, whether it is the king bug, the tree roots in the sky, or the iron anchor that appeared on the rotten ship, their target is this broken stone pillar.

However, why did they **** this broken stone pillar?

From Wang Xuan's point of view, he couldn't see anything special about this broken stone pillar.

The tree root sticking out from the void also clings to the broken stone pillar. This time it has become a three-way snatch. The king bug and the tree root have a tendency to join forces. The iron anchor has already pulled the stone pillar into the 100-meter sky. In the crack of the tree, it was pulled out again by the king bug and the tree root.

The three forces confronted each other, and the terrifying air waves and oppression fell, affecting the entire insect town, and countless insects went mad and rushed towards the insect town.

However, they did not attack the crowd, they were simply rushing into the town.

Under the oppression of these three forces, the entire worm town began to vibrate. What is even more terrifying is that with the pulling of the three forces, the cracks that appeared in the void became larger and larger, and the rotten bow suddenly went in again. sink in.

This part of the sinking, in the rotten bow, countless human-shaped shadows are struggling desperately and frantically, trying to escape from the seal on the bow.

The dull sound of rumbling continued to sound, and the competition over 100 meters became more and more intense. Above the void, a second tree root suddenly stretched out.

As soon as the second tree root appeared, it immediately took the initiative to wrap around the rotten iron anchor and began to pull it down.

The sound of "Chasing" was endless, and the cracks in the space that appeared 100 meters above the sky were getting bigger and bigger. The rotting ship head lost its endurance and suddenly fell down.

There were countless exclamations in the insect town, and they started desperately fleeing in all directions.

Once the rotten bow really fell from the sky, it just hit the worm town below. With the terrifying energy contained in the rotten bow, the worm town was torn apart immediately after the collision~www.mtlnovel.com~ There are two or three thousand people in it. , all suffer, I am afraid that all will die.

Wang Xuan held the Book of Giants in his left hand and was constantly coming to Insect Town. He did not expect such an amazing change. The rotten ship in the sky would suddenly fall down and hit Insect Town below.

Before he could think about it, Wang Xuan immediately opened his mouth and spat out a mouthful of blood.

Even if he could not save Bug Town, there were two or three thousand people in Bug Town, including Tie Jun, Meng Lian, Cheng Aiguo and others who he cared about more. He would never sit back and watch them and this bug anyway. The town was hit by the bow of the boat together, and then vanished.

Blood was sprayed on the Book of Giants, and the golden paper immediately began to emit light, forming a pentagram looming out of Wang Xuan's body. There was a sound of nothing.

"The master of ancient power... the womb of the underworld... the king of munayin... the master of the pentagram..."

The entire world became pitch black in an instant.
