

Last Building on Earth Chapter 71-75

Chapter 71

They have just obtained an iron box, and only 24 crystal scales. This fish scale knife needs 20 crystal scales. Zhao Lei knows that it is impossible to use 20 crystal scales to buy a knife for himself. He shook his head and said, "Forget it, let's just buy a weapon on the left, it's too expensive here."

Wang Xuandao: "Don't rush to buy it, we will read all these places before we talk about it."

After confirming that there was nothing missing here, everyone came out, and then opened the second door with "Armor" written on it.

Here is the same room, with two rows of self-service vending machines.

The self-service vending machines on the left sell inferior helmets, inferior leather armor, inferior knee pads, inferior gauntlets, and inferior leather boots.

Wang Xuan glanced at it and immediately walked to the front of the row of vending machines on the right.

This row of vending machines also sells five sets of armor, but it looks a lot more beautiful in appearance. It is no longer all made of yellow rhino skin, but has several materials with a layer of metal material attached to the surface. Up grade is completely different from those inferior leather armor and knee pads.

Wang Xuan clicked on the screen on the side, and the name of the five-piece suit appeared on it.

"Iron helmet, iron armor, iron lock knee pads, iron chain handguards, gray iron boots."

Looking at the names of these five-piece suits, Wang Xuan casually clicked on the heart-protecting armor to check the information.

"Name: Heart-protecting iron armor, iron armor made of gray iron and yellow rhinoceros, with nano crystals added to it, which can activate nano-crystals through blood. The dual defense of gray iron and yellow rhinoceros makes the heart-protecting iron armor quite good. Defense effect, It can completely resist the slashing of ordinary swords, and even a fine and high-grade sword is difficult to pierce it easily. Nano crystals have a very powerful automatic repair function. Before the crystal energy is completely consumed, the damaged area does not exceed three leather armors. One part can be repaired automatically. The heart area of the heart armor is inlaid with a specially manufactured energy crystal, which can increase the wearer's stamina recovery rate by 10%."

Looking at this information, this heart protection iron armor is much better than the inferior leather armor he is wearing now. It not only has double defense, but also improves the wearer's stamina recovery speed.

However, if you want to buy this armor, you need 30 crystal scales, which is more expensive than the fish scale knife that Zhao Lei had taken a fancy to.

After that, he checked the information of the other four pieces of armor one by one. It was similar to the heart protection iron armor, but the special functions were different. The iron helmet, like his current rhino horn helmet, can improve hearing by 10%. The iron lock knee brace contains special features. The energy crystal can directly enhance the physical strength of the human body by 10%. The energy crystal embedded in the iron lock guard's hand increases the strength by 10%, while the gray iron boots have a certain increase in speed.

It can be said that except for the iron helmet, he wants all the remaining four pieces, but all he needs are thirty crystal scales, so he can only shake his head and give up.

Everyone is looking at the armor information, with excitement and eagerness on their faces.

"It would be amazing if we could have a whole set of this kind of armor." Zhang Haofei licked his lips.

Zhao Lei said: "One set requires one hundred and fifty crystal scales, which is too difficult. We encountered such a powerful monster before, and we even got a treasure chest, and we only got twenty-four."

After reading it, everyone left here and opened the third door with the word "item" written on it.

There are still two rows of self-service vending machines, but unlike the previous two, there are many types of items sold here, from food to water, from ordinary clothes to towels, toothpaste, toothbrushes, toilet paper and other daily necessities, as well as ropes, Scissors, lighters, razors, disposable lighting and more are all there, like a giant grocery store.

Everyone was stunned, it felt like they suddenly broke into a binary store that is often seen in the streets and alleys, with all kinds of gadgets piled up.

Here, some ordinary daily necessities are sold in packages. Each package contains a dozen things, and only one crystal scale is needed, which can be said to be quite cheap.

Gu Manyao is a girl after all. She was trapped in the parking lot and had no conditions. No matter how dirty she was, she could only endure it. Now, seeing these daily necessities bags, her eyes were inevitably flooded with excitement.

Wang Xuan's attention was more focused on the vending machine that sold food.

It was said to be food, but it was actually a glass tube similar to a reagent, smaller than the little finger, and contained two liquids of different colors.

Wang Xuan checked the information and knew that these are called nutrient solutions. The cheapest is the primary nutrient solution, which is milky white. You only need to eat one tube every day to maintain the basic nutrients needed for a day, and you will no longer feel hungry this day.

"One crystal scale can buy 30 tubes, which is cheap enough to last a person for a month."

Wang Xuan whispered softly, and then looked at the intermediate nutrient solution.

This intermediate nutrient solution is light green, and the price is much more expensive. Only one crystal scale can be purchased for one tube, and each tube can maintain all the nutrients a person needs for three days.

"The primary nutrient solution can only provide the basic nutrients that the human body needs every day. This intermediate nutrient solution can not only provide the required nutrients, but also gradually enhance the body's physique. Unfortunately, it is too expensive."

Wang Xuan knew that this intermediate nutrient solution was much better than the primary one, but they had too few crystal scales to buy them casually.

Everyone stayed here for a while, and Wang Xuan basically checked the various items here. After that, everyone still did not buy any items, but left for the fourth door.

The word "rest" is written on the fourth door. According to previous experience, it should be a place to provide rest.

After pushing the door open, it was a little dark in front of everyone's eyes, and there was a long corridor, carpeted below, and doors on both sides. The first reaction everyone saw was to enter the hotel.

The six people walked in slowly, Zhao Lei looked at the doorway on both sides: "It seems that this is a room one by one, which can provide rest, similar to a hotel."

Wang Xuan saw that there was a small screen on the doorknob on one side, and there was a slot at the bottom of the screen. He opened the screen and saw the above introduction. He only needed to use a crystal scale and put it into the slot below to open the room. Door.

"A crystal scale can be used for twenty-four hours, which is really expensive."

Wang Xuan shook his head slightly.

Gu Manyao said excitedly: "Wang Xuan, since this is a place to rest, it looks like a hotel, there should be beds, hot water, etc., we can open a room to see what's going on inside, if there is hot water, We could take turns washing and bathing or something."

Zhang Haofei's eyes lit up and said: "Yes, open a room and get a good night's sleep, this is a good proposal, I haven't slept well for several days."

Zhao Lei said: "Looking at the current situation, we can't get out in a short period of time. As for the certificate of the king, we still have no clue. We really have to make preparations to live here temporarily. Gu Manyao's proposal makes sense. ,I agree."

Wang Xuan pondered slightly, and said, "We now have a total of twenty-four crystal scales, each of which must be used on the blade, and must not be wasted casually. Let's sum up what everyone needs to buy."

After the six people discussed it, they initially decided on the materials to be purchased, and returned to the first room where weapons were sold. Wang Xuan took out three crystal scales, and Zhao Lei, Tie Jun, and Li Haotian each chose the same weapon. As for the one on the right. The high-end weapons in the vending machine were too expensive, and the three of them could only sigh.

Zhao Lei and Li Haotian both chose stainless steel knives, while Tie Jun chose a pair of slotted thorns. This pair of thorns was considered a weapon and only needed a crystal scale.

"I used to like this kind of military thorn very much, and I practiced for a while." Tie Jun explained that Wang Xuan wondered why he chose this kind of military thorn.

After a few people entered the armor room, Wang Xuan took out eleven crystal scales and bought five inferior leather armors and six inferior knee pads.

Except for him who only needs a low-quality knee pad, the other five people each have a leather armor and a knee pad.

The clothes and trousers on everyone's body were all torn and tattered, almost unable to cover the important parts, and there was a risk of exposure at any time. In order to cover the important parts from being exposed, Gu Manyao also tied several pieces of the clothes of his dead companions. It's just that these clothes were all tattered, so she couldn't do anything about it, so she tore them into strips and tied them to her body to cover them up. By now, they were almost like a mummy.

With the leather armor and knee pads that can be repaired automatically, at least for the next period of time, there is no need to worry about the problem of exposure.

Gu Manyao took over the leather armor and knee pads, caressed it gently, and couldn't put it down.

"Let's go, and then go buy food." Zhao Lei took the leather armor and knee pads and walked out first.

Zhang Haofei first dripped his own blood on the leather armor, put it on himself, and said strangely, "Are you all wearing it?"

Gu Manyao glanced at him and said, "What's the hurry, if there are conditions in the rest room later, you can take a shower before wearing it."

Zhang Haofei was stunned for a moment, and said, "It seems to make sense." He took off the leather armor he put on.

Afterwards, Wang Xuan spent two crystal scales to buy 60 tubes of primary nutrient solution. Each person only needs one tube per day. These nutrient solutions can maintain their needs for ten days.

After buying it, 16 crystal scales were spent, and Wang Xuan still had 8 crystal scales.

"Now are we going to open a room to rest, or go to that corridor to see what's going on?"

While talking, Wang Xuan distributed the sixty tubes of primary nutrient solution to everyone, each of them divided ten tubes, and then opened a tube of nutritional solution~www.mtlnovel.com~ and drank it.

This nutrient solution has a milky fragrance, which is similar to milk. When it enters the abdomen, it immediately melts into a warm current, which is slowly moistened. Soon the whole body becomes warm, and the original hunger and thirst have disappeared, and the whole person is completely numb. Feel refreshed.

Everyone was so hungry that they took out a tube of nutrient solution and drank it.

"Let's rest first, after resting and feeling refreshed, go to the corridor to take a look. What do you think, Wang Xuan." Gu Manyao expressed his opinion.

Wang Xuan snorted, he also had this idea, and the others had no objection, so the matter was settled.

Zhang Haofei was still a little unfulfilled after drinking the nutrient solution. He licked his lips and said, "It's very good, but it's too little. Can such a small tube last for a whole day?"

Zhao Lei said: "The introduction said so, it should not be wrong, it is estimated that it was made by a special advanced technology."

Everyone walked towards the rest area while talking. Wang Xuan took out a crystal scale again and put it into the slot on one of the doors. He heard a jingle, the door lock opened, and he twisted the handle again. , pushed the door open.

Chapter 72

At the same moment, a twenty-four-hour countdown was displayed on the screen at the door. Once the countdown was over, they had to leave here.

As for what will happen if the time is up and they don't leave, everyone doesn't know.

A few people looked at the open door. As they had guessed, this room was similar to a hotel room in general. The area was not small, about 20 square meters. It was all good, there was a thick carpet on the ground, and the temperature inside was constant at more than 20 degrees, neither cold nor hot, everyone felt comfortable when they walked in, but because of the large number of people, they still felt good after they walked in. Got some crowded.

"Grandma, the outside world used to be the world of the rich, and with money, you can have all kinds of enjoyment. I didn't think of this damned place, but it's the same thing. I figured it out. Here, the crystal scales are money. Whoever has more crystal scales can enjoy it."

When Zhang Haofei saw the big bed, he was the first to lie down, his mouth was so comfortable that he was about to groan.

Gu Manyao saw him lying down like this, and immediately soiled the sheets, frowned immediately, but couldn't say anything.

Wang Xuan checked the entire room immediately, and after confirming that there was no danger, he said, "We take turns taking a bath and changing clothes. Gu Manyao, please wash first, and we will wait for you outside."

Gu Manyao glanced at him and nodded slightly, looking at the bathroom here, she couldn't bear it for a long time, she only felt itchy all over her body.

Zhang Haofei got up from the bed and said, "I think the men should take a bath first, Wang Xuan, I'm afraid you don't know that women are the slowest to take a bath, and I don't know how long it will take us. The man will probably be washed soon."

Hearing this, Gu Manyao was speechless, Zhao Lei smiled and said: "Okay, now we only have a girl in Gu Manyao, and Manyao doesn't need us to take care of him in other places, so let her take a bath first. Bar."

Gu Manyao bit her lip lightly and said, "Zhang Haofei is right. I may take a shower slowly, so you should wash it first. I'll be fine in the end."

After she finished speaking, she walked out holding her leather armor and knee pads.

Zhang Haofei was only half-joking, but Gu Manyao actually let him go, but he was stunned for a moment.

Wang Xuan glanced at him and said, "Then let's wash a few of us first, whoever comes first is the same." Afraid that it would be unsafe for Gu Manyao to be alone outside, he went out to accompany her.

Seeing him coming out, Gu Manyao said, "Do you think I'm angry?"

Wang Xuan shook his head and said, "You are not such a stingy person, I am afraid that you are not safe."

Gu Manyao showed a smile. In order to facilitate the fight, she always tied her hair up. Now she spreads her hair and said, "It should be very safe here. I wonder if you play games?"

Wang Xuan sighed: "I played a few games before, but I don't play much now."

Gu Manyao said: "There is a setting like a safe zone in the game. I think the place we are in now is quite like the safe zone in the game, so there should be no monsters."

There was a trace of contemplation on Wang Xuan's face, and said: "From the current point of view, it is a bit like, I am worried that you are not because of monsters, but people."

Gu Manyao was startled and said, "Human?"

Wang Xuan looked at the long corridor and said, "Look at the scale of this place, whether it is weapons and armor or the place we are resting, the scale is not small, there are so many vending machines selling the same weapons, it seems that it is for many people. prepared for simultaneous use."

Gu Manyao understood and said, "What you mean may not be just us here."

Wang Xuan nodded and said: "Yes, although I haven't seen it now, but I feel... there should be other people, including these rooms, maybe there are people resting in any room."

"In such a complex environment, without legal constraints, it is very scary and unpredictable, and we need to be extra careful."

Hearing what he said, Gu Manyao showed alertness on his face, then nodded seriously and said, "Wang Xuan, thank you, I understand."

Wang Xuan smiled.

After the five men showered one after another, they all put on leather armor and knee pads, and finally it was Gu Manyao's turn.

After taking a bath, Wang Xuan only felt light and refreshed, and his body seemed to have lost two pounds. In the past few days, after fighting repeatedly, he almost climbed out of the mountain of blood and corpses. This is the first time that he can relax so easily. .

Zhang Haofei had foresight, Gu Manyao spent nearly an hour tossing in the washroom before washing it.

After everything was washed, everyone locked the door and began to rest. The bed was given to Wang Xuan and Gu Manyao to rest, and the other four huddled together and slept on the carpet for the night.

Gu Manyao folded the quilt and placed it in the middle of the bed, dividing the bed into two. She and Wang Xuan slept on one side.

Although she has been fighting monsters every day for the past few days, she has almost forgotten that she is a woman, but she is still nervous and feels a little shy when she really wants to sleep in the same bed with a big man. Some.

Wang Xuan didn't think much about it. Although he was very physically strong now, he felt very tired in his heart and fell asleep soon after falling into bed.

I don't know how long I slept this time. When he woke up, he only felt full of energy. He couldn't help but wanted to stretch. When he opened his eyes, he suddenly found that Gu Manyao was resting his head on the folded quilt. own.

Suddenly realizing that Wang Xuan opened his eyes, Gu Manyao hurriedly turned his head and said softly, "Are you awake too?"

Wang Xuan snorted, twisted his neck, moved a little, the blood in the body swelled, and the bones all over the body made a slight noise, this is because after enough sleep, his physical energy and energy accumulation reached the limit of the body, it seemed will overflow.

Sitting up from the bed, he found that Tie Jun was also awake, but he was afraid of waking others, so he just sat silently on the side, closed his eyes, and turned slowly with a cigarette in his hand. The idea was abandoned in consideration of the crowd.

Zhang Haofei was lying on the ground with his mouth open and snoring like thunder.

Wang Xuan turned his head and saw that there were more than nine hours left in the countdown displayed on a small screen behind the door.

He was very curious, what would happen if they continued to stay in this room after twenty-four hours?

"It was a **** comfortable sleep..." Zhang Haofei, who was sleeping on the carpet, finally woke up.

Zhao Lei stood up and said: "There are still nine hours left in this room, but I think everyone has almost rested, there is no need to continue to waste time here, Wang Xuan, what do you think."

Wang Xuan hummed and agreed.

He is now full of excess energy, so he wants to go out and exercise to consume some excess energy.

Tie Jun opened his eyes, stood up, and said, "Yes, we should find a way to find the certificate of the king."

Zhao Lei said: "I don't know what the king's certificate is, and if we want to find it, there is nowhere to start. Now the only place we can go is to return to the underground three-story parking lot, and there is the 'corridor passage'. where to go."

Zhang Haofei immediately shouted: "I must go to the corridor, then I'm going to vomit when I see the parking lot below, so go?"

Zhao Lei said: "There's no way, as you said, everything is possible with crystal scales here. We have to find a way to find monsters like that giant toad, and kill one to get more than a dozen crystal scales."

Wang Xuan said: "Go to the corridor first to see what is there before making a decision."

Everyone tidied up in the room for a while, then opened the door and walked out.

There was still no one in the corridor outside, and he walked out of the corridor and returned to the rectangular hall.

This area is full of light, and everyone can't perceive whether it is day or night. When they entered here, they were all tattered, like a group of beggars and fugitives, but now the six of them are wearing leather armor and knee pads, just like the same The team of well-trained ancient soldiers, after a day's rest, the spirit is completely different.

Gu Manyao **** his long hair again so as not to affect the battle.

Returning to the original giant hall, the six of them walked straight towards the door that said "corridor passage".

When they reached the door, the two doors opened automatically, revealing a curved corridor inside.

"Everyone should be vigilant." Zhao Lei tightened the steel knife in his right hand, reminding everyone.

This curved corridor can't be seen to the end, which is completely different from the previous areas. In addition, no one knows where to lead, and they have no clue in their hearts. Without Zhao Lei's reminder, everyone showed an alert look.

It was still Wang Xuan who walked at the front, Zhao Lei followed closely, then Tie Jun and Li Haotian, and Gu Manyao and Zhang Haofei.

Walking along the curved corridor for about 20 to 30 meters, and turning a corner, Wang Xuan suddenly noticed a door on the wall of the corridor on his right.

The word "East District" is written on the door.

"East District, what does this mean? Does it mean the East District of Longmao Plaza?" Li Haotian showed a hint of surprise on his face.

Wang Xuan frowned, suddenly thought of something, and immediately took out the parchment from the leather armor. After unfolding it, he found the word "East District" on it.

Several other people also gathered around, looking at the parchment map, and then looking at the words "East District" on the door in front of them, they all understood.

"It turns out that the 'East District' on this treasure map refers to this place, then follow the red line marked on it to find the treasure chest. UU Reading www.uukanshu.com" Zhao Lei was a little excited.

Wang Xuan snorted, and Zhang Haofei said strangely, "What are the many rectangles drawn on it?"

Zhao Lei said: "Go in and see." He wanted to try to open the door of the "East District".

Wang Xuan rolled up the parchment again and said, "Don't rush in, let's figure out where this corridor leads to."

Hearing what Wang Xuan said, Zhao Lei withdrew his hand and said, "Okay."

After that, the six people continued to move forward along the corridor. After turning two corners, they found a door on the right wall again. The word "South District" was written on this door.

Zhang Haofei asked curiously, "There are East District and South District, but there will be West District and North District in front of them, right?"

Wang Xuan didn't speak, and continued to move forward. After walking about ten meters, he saw a third door with "Western District" written on it.

The total length of this curved corridor is about 100 meters. When they reached the end, they saw the fourth door again, which said "North District".

Chapter 73

Zhao Lei glanced at Zhang Haofei and said, "You guessed it right, this place is really divided into four districts, east, west and northwest. They should lead to different places. Let's go back to the 'East District' to have a look."

This time, Wang Xuan didn't raise any further objections, and the six went straight back, and soon returned to the door with "East District" written on it.

Wang Xuan stretched out his right hand and released the metal tentacle. The metal tentacle touched the door, and the door opened automatically.

Several people dispersed, ready to deal with emergencies at any time.

Watching the door open automatically, everyone stood outside and looked inside. The light inside was very bright. At a glance, they saw a row of containers with some goods scattered on them. Everyone just glanced at it and understood that this was a supermarket.

"This is the Xianfeng supermarket in Longmao Plaza." Zhao Lei showed a surprised look on his face.

Wang Xuan protected his body with metal tentacles and walked in slowly. All he could see were groups of containers.

Taking a closer look at these containers, he immediately noticed that unlike ordinary supermarket containers, these containers are fixed on the ground and cannot be moved.

When he saw these containers fixed on the ground, he took out the parchment again.

"It turns out that the rectangle drawn on it should refer to these containers."

Wang Xuan compared it with the parchment map, and immediately understood that the east area written on the top of the map should be facing this door. The red line starts from here, interspersed with a lot of rectangles, which means that you have to walk between these containers. .

The map was originally incomprehensible, but compared with the container in front of him, Wang Xuan immediately understood.

Zhao Lei looked at the containers on both sides and said, "It turns out that the so-called East District actually refers to Xianfeng Supermarket. Could the rest of the South District and West District refer to other parts of Longmao Plaza? For example, shopping malls or something."

The containers on both sides of the crowd were basically emptied, and there were only a few remaining goods, such as seasonings, monosodium glutamate, cooking oil, etc., which were not useful to the current crowd. Everyone just looked at them and had no interest in getting them.

"Follow me." Wang Xuan looked at the red line drawn on the map and wanted to turn left at the fifth container in front of him. Bento walked forward, counted to the fifth container, and then turned left.

Then he walked between the filled containers, following the red lines on the parchment.

Zhao Lei followed behind him and murmured, "I remember that the Xianfeng supermarket in Longmao Plaza is not that big, and the containers are not fixed. It seems that changes have taken place in this supermarket."

Wang Xuan ignored Zhao Lei, who was murmuring beside him. According to the instructions of the parchment, he quickly took the five people through a large number of containers around, and finally stopped in front of one of the containers.

This group of containers looks like the other containers, it is also fixed to the ground, with some plates and bowls on it.

According to the red line marking on the parchment, this is the end of the red line, but on the parchment, a treasure chest is drawn here.

Wang Xuan looked at the container in front of him and frowned slightly. Is there a treasure chest hidden here? But where is this treasure chest hidden?

"Wang Xuan, is this place indicated by the map? But no matter how you look at it, there is no treasure chest hidden here." Zhao Lei said while reaching out and shaking the container, hoping to find something.

Wang Xuan first tried the container, and found that the container fixed on the ground was motionless, so he squatted down and tapped the ground, and immediately found that the floor tiles under the container felt hollow when knocked.

"It's empty below." He was refreshed and carefully checked the tiles on the ground, and finally found the difference. The gap around one tile was slightly different from the gap between the other tiles, but because this tile was located in Under the container, it is usually blocked by the container, and most people will not notice it at all.

Wang Xuan touched the tile with his hand and was thinking about how to pick it up. He didn't want to exert a little force on his hand, and the tile sank silently.

There was a faint sound of machine turning on the ground below. The tiles in front of everyone sank one after another, revealing a pothole. Several people were busy looking over, but they saw a golden box in the pothole.

"I found it, there is actually a treasure chest." Zhao Lei looked excited: "It would be nice if there was a box of crystal scales in it."

Gu Manyao glanced at him and said, "Is it okay to be ambitious, what if it is something better than crystal scales?"

Wang Xuan released the metal tentacles, wrapped around the golden box below, and took it out carefully.

The golden box has just been taken out, and the sinking tiles below will automatically return to their original state. If there is no indication of the parchment map, outsiders just look at the ground and will not believe that there is still a golden box hidden here.

"Wang Xuan, open it quickly and see what treasures are inside." Zhao Lei smiled and said, "This golden box looks high enough, and the contents inside are definitely not ordinary."

Wang Xuan controlled the metal tentacles and carefully opened the golden box.

The box opened and three items were placed inside.

The six people gathered around and looked inside. The three items were a jet-black belt, a mechanical heart about the size of a fist, and a bottle of pale gold reagents. .

Wang Xuan used the metal tentacles to take out the mechanical heart. Among the three, this mechanical heart caught his attention the most. It looked very delicate and lifelike, but he didn't know what it was used for.

Holding it in his hand and observing it carefully, Wang Xuan wanted to see the function of this mechanical heart.

"It looks like it's a treasure." Zhao Lei reached out and picked up the bottle of pale golden reagent, and said, "Isn't this also a nutrient solution, a high-end nutrient solution?"

Wang Xuan was playing with the mechanical heart, and he didn't know which mechanism he touched on it. The mechanical heart suddenly made a slight noise, the gears on it turned, and soon cracked, and a crystal face list appeared inside. There were six on the list. Slots, one slot is at the very center, and the remaining five are surrounded, forming a pentagram shape. These six slots look like they are inlaid with something.

"What the **** is this? It's like some kind of special instrument, but I don't know what it's used for, and I can't see the information. Do I need a drop of blood to know?"

Wang Xuan pondered, thinking that all the equipment he obtained requires a drop of blood to activate. This mechanical heart seems to be extremely finely made, and it is simply ingenious.

With this idea, he gently slaughtered his left finger with the tip of the metal tentacle, and the finger oozes blood and drips onto the mechanical heart.

The blood dripped on it, and immediately penetrated into it, followed by a crunching sound in the mechanical heart. There were countless gears spinning inside, and a layer of light swept across the crystal face list. A dim light lit up in every slot, and at the same moment, a message appeared in Wang Xuan's mind.

"The heart of the mechanical beast, whether to activate the mechanical beast."

Wang Xuan sensed this message and confirmed the start.

Seeing that the heart of the mechanical beast in his hand was constantly changing, the lights appeared on the crystal face list, and they gradually converged into the groove in the center, and it seemed that there would be some kind of change.

"Lack of powertrain, the mechanical beast failed to start..."

With this message, the light gathered on the crystal face list converged and disappeared, and the mechanical heart returned to its original appearance.

The other five people watched silently.

Zhao Lei couldn't help it and said, "Wang Xuan, what is this?"

Wang Xuan let out a sigh of relief and said, "The heart of the mechanical beast can be used to activate the mechanical beast, but it lacks a powertrain and cannot be used."

Gu Manyao's eyes flashed, and he said, "Mechanical beast, does this name sound like a monster made of metal machinery like Transformers?"

Wang Xuan shook his head and said, "I don't know this. Only by finding the powertrain can we know what this mechanical beast looks like."

While talking, he put down the mechanical heart and picked up the black belt in the golden box.

I can't tell what material this belt is made of. The material is very soft and comfortable to the touch. On the left and right, I carry a waist bag that is only half the size of a palm, but these two waist bags are too small to even put a mobile phone in it. Barely enough to hold some crystal scales.

Wang Xuan still dripped fresh blood on it, and as the blood penetrated in, a faint light flashed across the surface of the black belt, and then disappeared again, but the whole belt seemed to have more spirituality, as if it had come to life.

At the same moment, a message appeared in his mind.

"Name: Sumeru Belt, Quality: Rare, a rare treasure that can only be opened from a treasure chest of silver or higher level, contains two small Sumeru mustard seed spaces, which need to be activated by blood to open, the main material of Sumeru's belt is The Xumi silk spit out by the Xumi insect contains the power of Xumi space, it is very tough, and it is almost difficult to be damaged, but once it is damaged, it cannot be repaired."

Sensing this message, Wang Xuan showed a look of joy and shock on his face. This Sumeru belt is so rare, it seems to be more rare than the mechanical beast just obtained.

"So it turns out, these two small pockets actually hide the space of Sumeru mustard seeds. It's unbelievable. Something that can only exist in myths and legends has actually appeared now."

Wang Xuan was pleasantly surprised, and immediately tied the Xumi belt to his waist. There was a buckle in the center of the belt, and it adjusted automatically after it was buckled, and it quickly fit perfectly to his waist.

Others can only look at it with envy. This parchment was obtained by Wang Xuan by killing the foreign object on the wall. Now, the treasure found according to the parchment is naturally his. He is also the only one in the crowd who has evolved the hatching beast to the beginning. People, everyone didn't have the idea of battling with him, but it was inevitable that their eyes were hot.

"It turns out that in addition to the helmet and leather armor, there is also a belt, but this belt doesn't seem to have any defensive function, is it purely for looks?" Zhang Haofei was jealous, and his words were inevitably sour.

Wang Xuan glanced at him, but did not speak, but put his hands on the sides of the left and right pockets, and immediately opened the pockets after sensing the belt of Xumi.

In his induction, he saw that in these two pockets, there was a space hidden in each, equivalent to the size of a ten square room, which could store a lot of things.

"This is the Xumi mustard space. It's only half a slap from the outside, but there is a room as big as a room hidden inside. It's incredible."

Wang Xuan felt the magic of this world more and more. This Xumi belt is indeed a rare treasure. With this, it is much more convenient. He put the heart of the mechanical beast and the eight crystal scales and nine tubes originally in a small bag. The primary nutrient solution is put into the left pocket.

At this time, everyone noticed the magic of this belt. The heart of a fist-sized mechanical beast and the bag containing the camp liquid could be put into such a small pocket?

Zhao Lei's mind turned fast, his eyes widened, and he suddenly said, "Wang Xuan, is this a space belt? There is a space hidden in it?"

Wang Xuan hummed.

Zhao Lei said: "I read an article in a science fiction magazine before, which said that when technological civilization has developed to the seventh level, it will reach the ultimate of cosmic civilization, which can also be called god-level civilization. All the mysteries of the universe are not bound by the rules of the universe, and can even create rules. This civilization can contain an almost infinite space into a grain of rice. At that time, these articles were just random creations by those people. Unexpectedly... Now it has become real."

Wang Xuan said: "That's not as exaggerated as you said. It can contain an almost infinite space in a grain of rice. This mustard space is the size of a small room, it can't hold many things, and its shape is not like a grain of rice. Small."

Zhao Lei handed him the bottle of pale golden reagent he had just held in his hand, and said, "It's amazing enough, for Earth Technology, it's already amazing, since you have such a magical belt, then all

of us will It's convenient, I'm having trouble knowing where to put these nutrient solutions with me, I'm afraid that I'll accidentally spill them when I encounter a monster, so I'll leave them all to you now."

As he spoke, he handed over a small bag hanging on the side of the leather armor to Wang Xuan, where there were nine tubes of primary nutrient solution.

Seeing Zhao Lei's actions, several others took out their nutrient solution and handed it over to Wang Xuan.

"You don't need to bring a backpack anymore, now it's much more convenient to fight." Tie Jun showed a rare smile. He was not jealous of Wang Xuan's obtaining such a magical belt, but felt happy from the bottom of his heart.

Wang Xuan saw the golden box on the ground. Although he felt that the box was useless now, he thought about it and put it in together.

As for the bottle of pale golden reagent, he didn't know its purpose, so he temporarily put it away and didn't dare to drink it casually, so he decided to look back and see the situation.

Zhao Lei said: "Wang Xuan~www.mtlnovel.com~ Now I have got the treasure chest hidden in the eastern district. Shall we go back to see the situation in the western and northern districts of the southern district, or continue to explore here?"

Wang Xuanwei pondered: "Let's take a look here first to see what else there is in the Eastern District."

Zhao Lei nodded, and the group of six continued to walk forward along the rows of shelves in the supermarket.

Zhao Lei suddenly thought of something and said, "Tie Jun, I remember that you have a strong sense of direction. You must remember the way, and you won't find the door to return."

Tie Jun said: "Don't worry, this supermarket is not complicated, as long as it doesn't change here, it's easy to go back."

In the underground parking lot before, the road conditions were constantly changing. No matter how strong his sense of direction was, it was useless to remember the road.

The six people walked between the rows of containers. When they finally reached the end, the front became a huge passage, and a **** smell came over.

Wang Xuan, who was headed by him, stopped.

He saw three people.

Chapter 74

In the front passage, there was a stream of blood on the ground, and a green-skinned humanoid monster was lying in the pool of blood. It looked like a dwarf, but it had four giant arms, which looked very weird.

The green monster's head split from it and fell to the ground motionless, dead.

Beside the monster corpse, a tall man stood, and two men were sitting on the ground.

All three were wearing a full set of five pieces of armor, ranging from inferior leather helmets and inferior leather armor to knee pads, gauntlets, and leather boots, covering their entire bodies, with only one face exposed.

Across the distance of twenty or thirty meters, they are looking at each other.

Wang Xuan saw that these three people were wearing a full set of armor, and he understood that these three people were not simple.

The green monster that fell to the ground should have been killed by them.

Seeing Wang Xuan and the six men, the two men sitting on the ground slowly stood up. One of the men, who looked thinner, held a knife in his right hand. He was also the only one among the three who held a weapon.

The fish-scale pattern looms over the blade, which looks very beautiful. Zhao Lei's heart skipped a glance, knowing that this was the fish-scale knife he saw in the weapon vending machine that day. It was a superior weapon, a knife. It is worth twenty crystal scales.

Unexpectedly, this skinny man was holding such a weapon.

The skinny man was holding a fish-scale knife, and the back of his right hand suddenly split open. There was no blood flowing out of the crack, but an eyeball appeared.

Eyes grew on the back of the skinny man's right hand.

This eye was slightly glowing with a dim light. Although there was a distance of 20 to 30 meters, Wang Xuan still felt a very uncomfortable feeling in his heart when he saw this eye. Being stared at by this eye, all the secrets inside and outside of his body are peeped by this eye.

"Could it be that this fellow's hatching beast can spy on other people's information?"

Wang Xuan's heart was slightly awe-inspiring, and he immediately thought of this possibility.

The faces of Zhao Lei and Tie Jun who were standing beside him also showed uncomfortable feelings. Like Wang Xuan, when they saw this eye, they had a strange feeling of being watched.

Wang Xuan saw that the thin man whispered something towards the tall man and another black-faced man beside him.

Although the voice was very soft, Wang Xuan's hearing was extremely strong now, and he could still vaguely hear it clearly.

"One budding, three prototypes, two unincubated."

When Wang Xuan heard this, his heart was awe-inspiring. It seemed that he guessed right. The eye on the back of this thin man's right hand can really see the state of their hatching beasts and their growth stage.

Hearing the thin man's words, the tall man nodded slightly, the corner of his mouth twitched, and there was an indescribable strange smile on his face, and he began to walk towards Wang Xuanliu.

Another black-faced man and a skinny man followed.

"The comers are not good, these three people are a bit weird, be careful." Zhao Lei stood beside Wang Xuan and said in a low voice.

Wang Xuan nodded slightly, and he didn't need Zhao Lei to remind him that something was wrong with the three of them.

The six of them stood there, watching the three of them quickly come within ten meters of them, showing a hint of alertness.

The thin man with an eye on the back of his right hand landed on Wang Xuan, looked carefully, and suddenly said, "You are the leader of this group, right, the belt around your waist looks good, it's a place that sells armor. There is no belt for sale, where did your belt come from?"

Wang Xuan frowned slightly.

He could hear a condescension in the skinny man's tone, but he couldn't see the level of strength of these three men now and was unwilling to conflict with them.

This skinny man can see the situation of his six people, and he can still use this tone and attitude. There is only one possibility. The hatching beast in his hands is at least in the beginning state, or even stronger.

The originally slightly wrinkled brows stretched out in an instant, Wang Xuan showed a friendly look, and said, "I found this belt. My name is Wang Xuan. I don't know what the three big brothers are called."

He took the initiative to report his name and released the goodwill of wanting to make friends with them. Now it depends on the attitude of the other three.

"Hey... Picked it up? You are lucky, my 'jieyan' told me that this belt is a treasure, no, it's not just a treasure, it seems that there are other treasures hidden in the belt, your name is Wang Xuan Right, since you called us big brother, how about taking this treasure out for our three big brothers to appreciate?"

As soon as these words came out, everyone's faces were full of anger, and Wang Xuan's face also sank. It seems that the other party used the "world eye" on the back of his right hand to see that he had a strange treasure and became greedy. That being the case, this conflict is unavoidable.

Zhang Haofei has a fiery temper. He has always been the only one who bullied others. How could he be bullied to the head by others? He couldn't help but shout, "Who are you, why should I show you?" A full set of armor, the strength is unknown, and he is afraid, otherwise he would have sworn.

The tall man said solemnly: "Shi Lin, don't talk nonsense with them, kill them all, if they attract other people for a long time, it will be troublesome."

As he spoke, he stepped, and suddenly he came close to Wang Xuan, and the speed was so fast that Wang Xuan's heart froze slightly.

Immediately following the tall man, the black-faced man who had been standing silently behind suddenly moved, and cooperated with the tall man to join forces to kill Wang Xuan.

Among the six people in front of them, only Wang Xuan deserves their attention.

"Okay!" The thin man he called Shilin laughed, suddenly raised the fish-scale knife in his right hand, and with a bang, he slashed towards Zhang Haofei.

"A prototype, dare to interject, I don't know the so-called waste!" Shi Lin laughed loudly, ignoring Zhang Haofei at all.

As soon as the fish-scale knife came out, Zhang Haofei was shocked. The speed of the other's knife made him dazzled. Although he was prepared, he still didn't have time to dodge.

With a loud "bang", a giant arm glowing with metallic color suddenly appeared, Shi Lin only felt a violent shock in his right hand, blood spurted out of the tiger's mouth immediately, and the fish-scale knife flew out of his hand in an instant.

He didn't even understand what was going on when he was hit hard in the head.

With a thud, the inferior helmet and his head burst into bloom, red blood mixed with white brains splashing everywhere.

Instant death.

This scene suddenly appeared, this scene was too shocking, for a moment, everyone was shocked.

It was Wang Xuan who made this sudden move.

When the tall man reminded Shi Lin to prepare to take action, he took the first step.

Since conflict is unavoidable, it's better to strike first, be sure to kill with one hit, and solve one first.

He suspects that the three people in front of him are all in the state of the beginning. With the current strength of the six of them, they will face the three. Six people join forces, or have the power to fight.

When he saw the tall man suddenly flashing in front of him, he ignored the tall man and the black-faced man who followed closely. Instead, he shot one second earlier than the two of them. Once he shot, he was the strongest. The "arm of beast" suddenly attacked the stone forest.

Shi Lin knew the strength of the six people in front of him. Only Wang Xuan had reached the initial state eyes.

Originally, he thought that Wang Xuan would be attacked by a tall man and another black-faced man.

Inadvertently and miscalculated, Shi Lin didn't understand what happened, and his head was blown up.

"Shilin--" The tall man reacted and let out a roar, his eyes widened, full of anger and killing intent, and there was a hint of shock and surprise.

The hatching beasts of the three of them have all evolved to the beginning state. Using their strength to deal with this six-member team with only one beginning, it is not as simple as crushing an ant. Power.

He didn't want to shoot because Wang Xuan was carrying a treasure, but also because he was about to break through from the initial state. If he could kill the same level of the initial Kai, there is a high probability that his hatching beast would grow again.

Compared to hunting monsters to seek growth full of uncertainties and dangers, killing people who know the details is the option with the least danger and the greatest reward.

The tall man roared with anger, his right hand mutated, and the surface was covered with black scales, which turned into a terrifying claws and grabbed towards Wang Xuan.

The black-faced man behind him didn't say a word. A metal spear nearly two meters long appeared in his right hand. With a flick of the spear, he stabbed Wang Xuan from another angle.

The speed of their shots is terrifying. Their hatching beasts are all in the same level as Wang Xuan. They have gone through many times of life and death to survive until now~www.mtlnovel.com~ No one is weaker than the other. Together, they wanted to kill Wang Xuan in an instant.

As for the others, there is nothing to fear.

Shilin's headless corpse fell to the ground, and a white light appeared in his right hand. The light fluctuated violently, and he seemed to be struggling to escape, but there seemed to be an invisible force pulling and crushing it. Under the crushing force of this force, the life of a wisp of consciousness immediately shattered and shattered, turning into a mass of pure energy, which was instantly sucked in by Wang Xuan's right hand.

The white light in Wang Xuan's right hand immediately fluctuated violently, and he felt an inexplicable joy in his heart, and his mood became very happy.

Murder is so pleasant?

Soon Wang Xuan came back to his senses and understood that this was because he had assimilated with the beasts. This should be because the beasts had absorbed the energy of the hatching beasts from the stone forest, which made him so excited, but now because the consciousness of the beasts has been swallowed up by himself, so he After the body has swallowed this energy, it will instinctively feel excited and happy.

All of this happened between lightning and flint. Just as Wang Xuan attacked and killed Shilin, the tall man's black-scaled claws and the black-faced man's spear went straight to his vitals.

Chapter 75

The tall man's black-scaled claws pierced the air faintly and made a strange sound. He had activated the special ability of hatching beasts. The power of this claws was simply unstoppable. Pierce it along with the leather armor and the body.

The metal spear in the black-faced man's hand danced, and it seemed to come alive, like a large python, attacking from an oblique side at an extremely tricky angle, but it actually bent in the air and stabbed to Queen Wang Xuan from behind. Heart.

Zhao Lei, Gu Manyao, and Zhang Haofei also shot, wanting to block one person for Wang Xuan to prevent him from being attacked by the enemy.

It's just that their speed is slow by a line, and it is simply too late.

As for Tie Jun and Li Haotian, the speed was even slower.

There was a smirk on the tall man's face, and he admitted that his claws were in good hands. Suddenly, there was a harsh sound, and an open golden box appeared in front of him at some point. Vibrate and cut, vibrate back and forth in the box, and scratch the surface of the golden box with sparks.

The tall man grinned, his expression extremely uncomfortable.

This is the special ability of the hatching beast he activated, called "Shock Cut".

The five sharp claws can vibrate with each other in an instant, cutting back and forth, the power is extremely terrifying, even ordinary concrete walls can cut terrifying gaps.

But now he has encountered a harder material. This golden box is indestructible. His "shock cutting" vibrated in the box. Not only did he not cut the box, but because the box was too small, the five sharp claws vibrated back and forth. This horror The forces collided with each other, almost shattering his five black-scaled claws.

When Wang Xuan suddenly attacked the stone forest, he had already quietly opened the left pocket with his left hand. When the tall man's sharp claws were about to catch it, he took out the open pocket that was originally placed inside the pocket. The golden treasure chest, used it as a shield to block the attack of the tall man.

The golden treasure chest was open. How could the tall man know that Wang Xuan would be like magic, and suddenly there was a golden treasure chest in front of him. The "Shock Cut" he launched with all his

strength just grabbed it into the treasure chest, not only did he fail to hurt Wang Xuan, My right arm was sore and numb from the shock of this "shock cutting".

With a loud roar, he hurriedly pulled his hands back in shock. Zhao Lei, Gu Manyao, and Zhang Haofei behind him shot at almost the same time.

"Go away—" he yelled, twisting his body violently, and turning his right claws around with a wave, Zhao Lei only felt a shock of the steel knife, and he couldn't hold it with his right hand, so he immediately let go and flew out.

The demon chi knife in Gu Manyao's hand slashed his thigh, cut open the inferior knee pads, and left a shallow wound on his flesh just now, and he punched Gu Manyao's lower abdomen with his left hand.

Gu Manyao groaned, the leather armor immediately collapsed into a fist mark, a mouthful of blood spurted out, and she fell back and fell.

Zhang Haofei's skeleton bone claws failed to catch the tall man's neck, but only his left shoulder. He couldn't afford to miss the opportunity, and immediately activated the terrifying grip of the skeleton. With a click, the tall man groaned, the bones in his left shoulder. Broken immediately.

His eyes shone terrifyingly, and his right hand had just shaken off Zhao Lei's steel knife. Before he could withdraw and attack Zhang Haofei, he suddenly lowered his head and rushed forward, hitting Zhang Haofei's face.

Zhang Haofei didn't expect that he would still have this trick. He screamed in agony, his nose bleeds, and tears spilled out. His originally straight nose collapsed immediately, and the nasal bones were completely broken, and he fell backwards in the sky.

On the other side, Wang Xuan used the golden box to block the attack of the tall man and exited the "arm of monster" state. The metal tentacles stretched out and spun violently, entangling the metal spear that the black-faced man stabbed.

One-on-one, he was not afraid at all, he pulled the metal tentacles, and at the same time launched "twisting and strangling", trying to twist the metal spear of the black-faced man.

The black-faced man couldn't see the slightest expression on his face. He clenched the metal spear in his right hand and kept shaking. A terrifying force erupted from the metal spear. Wang Xuan immediately felt that the metal tentacles were being pulled by an overwhelming force. "Twisted and Strangled" couldn't break the metal spear, and both of them were pulling their own weapons. They were evenly matched for a while, and neither could pull the other's weapon over.

Wang Xuan understands that the opponent is in the same state as himself, and it is difficult to kill the opponent in a short period of time.

Shi Lin was killed instantly by himself, more because of his carelessness and being caught off guard, not because his strength was really much stronger than the opponent.

The tall man punched Fei Zhang Haofei with one punch, ignoring the people in front of him, he quickly turned around and stood up, like a goshawk pounced on a rabbit, condescendingly, and attacked Wang Xuan.

Wang Xuan is the first person they want to kill.

At this moment, Wang Xuan's metal tentacles were entangled with the black-faced man's metal spear. Knowing that he could not kill the black-faced man in a short period of time, he immediately released the metal tentacles and wanted to dodge the tall man who attacked him from behind.

At this moment, he realized that his metal tentacles were actually sucked by the metal spear.

The black-faced man finally showed a smile on his originally expressionless face. He held a metal spear in his right hand, and the spear kept spinning in his hand. A special ability, once activated, the metal spear can rotate at an extremely high speed, producing a terrifying penetrating power.

In addition, this special ability causes the metal spear to generate a force of swallowing and sucking in the high-speed rotation. The spear was sucked and pulled in an instant, and he couldn't get rid of it in a short time.

The black-faced man relied on this special ability to absorb the metal tentacles, making Wang Xuan unable to escape in an instant, but after this moment of stagnation, it was too late for Wang Xuan to dodge or parry the attack of the tall man.

For them who have reached the initial state, the stagnation and mistakes in this moment are enough to separate life and death. The tall man once again launched the "shock cutting" of the black-scaled claws, and the five claws immediately fell to Wang Xuan. On the back, with the power of "Shock Cutting", he could pierce and cut his body in an instant, and even his internal organs were smashed and taken out.

The defensive power of the inferior leather armor became vulnerable when facing the black-scaled claws of the tall man. The five sharp claws broke through the leather armor defense, grabbed Wang Xuan's back muscles, and plunged into the abdomen.

Feeling the pain caused by the incision of the back muscles, seeing the flesh and internal organs of the body being cut and disintegrated, since entering this world, I have never been so close to death.

Between life and death, Wang Xuan's whole body was shrinking, his hair stood on end, his heart beat like a drum, and he could no longer worry about the terrible consequences. There was only one thought in his mind, and he tried his best to urge the blue crystal scales hidden in the white light of his right hand. the power of.

He fused the consciousness of magical beasts and blue crystal scales. The blue crystal scales were mastered by him, but because the energy contained in them was too strong, his current body could not bear it.

But now in the middle of life and death, where can I take into account the consequences, and immediately activated the blue crystal scales.

Almost with a thought, the white light in the right hand suddenly burst out with a faint blue luster, and the blue light immediately rendered the white light into a ball of blue light, dazzling, like the most shining one in the sky. stars.

The metal tentacles extending from his right hand suddenly lit up from the inside, and blobs of blue light shone from between the circles of metal sheets that formed the metal tentacles.

If the previous metal tentacles looked like a tentacle shape made of a large number of metal sheets, it was just a kind of machinery, then the current metal tentacles seemed to have real life suddenly.

It's alive.

Almost like a thought movement, Wang Xuan pulled his right hand, and the metal tentacles that were sucked by the extremely fast-rotating metal spear suddenly flew out.

The slight smile on the black-faced man's face suddenly turned into horror. He felt an unstoppable terrifying force coming from Wang Xuan's metal tentacles. This force pulled his metal spear and volleyed his body together fly up.

What happened at this moment was beyond his range, and he felt like he was flying in the air, hitting the ceiling of the roof above.

There was a sound of "porphyry", and a large group of blood flowers suddenly splashed on the ceiling, which was mixed with blood, mushy flesh and viscera, and wrapped in fragmented bones, which exploded together.

A mass of white light appeared, and in a flash, it was absorbed by Wang Xuan's right hand.

The tall man on the other side, with a ferocious face and a fierce look in his eyes, punched with all his strength, the sharp claws caught Wang Xuan's body, and he was slicing and slicing, and he was about to kill Wang Xuan in an instant. , successfully promoted to a stronger state, as for the remaining five, he can slowly kill.

Or you can leave that pretty chick alive for a while~www.mtlnovel.com~ and treat it as your own plaything. If you get tired of playing, it's not too late to kill.

This is not the first time he has done this kind of thing, he has done it once before.

He missed that feeling.

All these thoughts flashed through his mind. He watched as his claws broke through Wang Xuan's leather armor and grabbed into his body. Suddenly, the sly smile on his face froze.

He felt as if his claws were caught in the hard iron stone, not to mention tearing and cutting Wang Xuan's flesh and internal organs, even the shock cutting could not shake, and was forced to stop.

"What's the matter?" He couldn't help screaming loudly. This Wang Xuan was clearly made of flesh and blood, and was not made of gold and iron, so how could he not be able to cut it.

At the same moment, Wang Xuan turned around, the two of them were facing each other, and the tall man saw a pair of eyes.

These eyes are so calm that there is no human emotion at all, they are blue and deep, just like the starry sky in the universe that has existed since ancient times.

The tall man was suddenly frightened, and wanted to withdraw his black scales and claws, trying to escape.
