Chapter 258: Kill and Plunder

"This dumb man. Miss Xi said give her the manifest! Just give her the manifest!" Ma Ping immediately turned furious. How could this Gas question Lyca's words?

"Alright! Alright! But I am warning you. These people are not just some people that you can offend. You can actually do whatever you want, but don't you dare check their shipments. They have already passed the customs, and we are only waiting for them to get the shipments from here."

Lyca didn't say anything. She was aware that these ports were used to smuggle different types of goods to the country. Of course, most of these goods were illegals. After the man gave her the manifest, Lyca started reading it as she walked towards the base.

Meanwhile, the other people in the territory was still unresigned after what happened earlier.

"How dare that woman to treat us like slaves? Does she think lowly of us?" Matriarch Chu couldn't help but gnashed her teeth in anger as she thought of Lyca's actions. She then looked at the man next to her seat. "Your brother? Is he coming? You told me he could check viruses and toxins in our body? What about poisons? We needed someone expert in these types of things!"

"He is not a toxicologist but he is bringing an expert with him. Don't worry too much that woman would surely suffer once we found the cure for ourselves."

"Hmph! It is normal for me to worry, I own thirty percent of the businesses here. What if that woman decides to take care of my family? Did you see the look on that woman's face?"

"This is why I called my people." A man with a long mustache known as Mr. Clint uttered. "After this toxicologist, it is best that we talk to my people and give them direct orders to get rid of that woman." Mr. Clint added.

"An assassin?" Matriarch Chu immediately asked. However, Mr. Clint didn't have the time to answer her question as two people arrived inside the room of the mansion. It was the toxicologist that they were waiting for. "Hmph! Quick! Take everyone's blood and check, what kind of poison we have in our body!" Matriarch Chu quickly walked towards the two men who walked inside bringing their own pieces of equipment to examine their blood.

After a few minutes, the two men already gathered everyone's blood and immediately left so they could start with the long process of examinations.

"Now that it was fixed, it is time to decide what to do with those people." Another man known as Mr. Jiale said. His eyes were narrowed as she looked at the huge painting of war behind Matriarch Chu's seat. After the meeting earlier, everyone decided to continue the meeting in the Matriarch's mansion as this was the biggest and most secure place that they could find near the area where they had their meeting earlier.

"Kill them, of course!" the one who answered was the first person who drank the poison earlier. "How could we let her live? She was different than her husband. If my guess is right, Q is already dead. She was only showing her fangs because she is afraid that we would attack her once we know that her husband is dead."

"Even if he is not dead, he might be dying. Or that woman won't do such drastic measures to suppress us!" Matriarch Chu added. These people were all old foxes. How could they ignore Lyca's reactions earlier? Clearly, the woman seemed to be in a hurry to suppress them! Moreover, she was showing some signs of confusion from time to time. It was as if the woman knew nothing about the stuff that her husband does. "She might be good at killing but she is not very good at working with people like us." How could they let a woman in her early twenties act like that in front of them?

"She is courting death!" The man who drank the poison first or Mr. Ko gritted his teeth. He never once thought that he would one day lower her head to someone even younger than her older daughter! This is unacceptable! How could that woman even dream of suppressing someone like them who already survived in this cruel world for so long?

"I have a suggestion!" Mr. Clint said before he smiled. Then he looked at the huge door and said, "Enter." As soon as he finished speaking two people entered the room. One is a blond woman wearing black latex clothes that perfectly hug her slim body and another is a man with long hair that was neatly tucked in a ponytail behind him. "These two are my experts. I know everyone had their own experts too. So, I suggest we make our own people attack his businesses. Then once that woman panicked, we shall attack their house."

"I think this is a good idea!" Matriarch Chu immediately said. "But we needed to act as quick as possible. We need to surprise her and the people loyal to her." As someone who came from an old family in this City, the matriarch also had her own people that she could use to create some chaos.

The man with a ponytail suddenly snorted, making everyone turned their heads towards him. "If you want to attack someone then don't cause any damages to their businesses. It is better to directly kill them without damaging their property. After all, we can always plunder it and make it our own."

"You who are you?"

Mr. Clint immediately beamed when he heard the man speak. "This is Zar Clint, my only son. He is also the number one assassin in the Clint Family." After his father introduced him, he immediately added.

"I mean, I heard this Q had their own laboratory that manufactures their own bullets. I have no interest in other businesses of his. You can have the clubs and restaurants as long as the Clint family will have those bullets and weapons then I am good."
