

Lazily 264

Chapter 264: Detonate

"What do you mean you know?" Ronan frowned. "What does that mean? Are we prepared if they come here? This ranch is on the outskirts of Kong City. This belongs to Santa's territory. That man might not help us in case an attack happens. " Santa and Boss Q had a good relationship but it wasn't to the point that one would want to offend all the powers in this city to protect the other.

After all, this relationship was purely businesslike. It wasn't personal at all!

"Let them come," Lyca said as she stood at the door of her lab. "Just buy enough body bags." She turned towards Ronan. "Don't disturb me. I am very busy." She still had a lot of toxins to process and Lyca couldn't really ask Lai Su about this matter simply because he wasn't trained at all! Toxins and venoms are very dangerous. "I will be out in four hours," Lyca uttered and went inside her lab without waiting for Ronan's answer.

Four hours should be enough time to complete at least half of her remaining work. Then, she was planning to cook something for Shen Qui to make him sleep again. After that, she needed to sort out some stuff with Cleo and Rue as well as Ma Ping and his company. Then, she can finally talk to Ronan about this attack.

Ronan could only sigh as he stared blankly at the door. Lyca and Shen Qui were truly opposites. While the boss liked to plan ahead, Lyca is clearly nonchalant and had her own way of handling things. Of course, he knew that both people have very effective methods. Still, Ronan would prefer Shen Qui's planning more than Lyca's. After all, he was someone who prefers planning too.

After a few minutes of standing there, Ronan realized that Lyca doesn't really have a plan on talking to him right now. So, he walked back towards his computer room to check all the details that Lyca wanted to have earlier. However, he still couldn't help but wonder about the things that Lyca was doing in that lab.

Ronan remembered how Lai Su told him that he was already in his last stage of research which was obviously about radioactive energy. This made him wonder if Lyca was the person who wanted Lai Su to do the research. If that is the case then was she planning to create a nuclear bomb!?

Ronan stopped walking. How could that woman create something so dangerous? He looked back at the lab, wondering if he would ask her about it. In the end, he realized that Lyca would probably not

tell him anything even if he politely asked her. She would be too lazy to explain. Therefore the best course of action would be to ask Shen Qui!

With this in mind, Ronan tried to knock on Lyca and Shen Qui's door. Unfortunately for him, Shen Qui was sleeping and couldn't hear him.

Meanwhile, Lyca was staring at the chip that Lai Su created. "It's done?"

"Yes, just as you instructed."

"But it's only half a day? How come it's already done?" She was honestly expecting him to use a week at most to adjust the components of her small bomb. After all, he can't rush things when it comes to these radioactive materials.

"This is what I have been doing in the last few years of my life. I didn't change anything aside from the number of components inside. Instead of targeting the cells, it would be big enough to target the whole body instead. Once this chip would enter the body, through the mouth and would be exposed to stomach acids, it would slowly dissolve and once the components inside will be exposed in the acid it will explode." Lai Su said. "I haven't tried it though."

"So, it will explode in minutes? What about the surrounding people? Are they going to be exposed to radiation too?"

"Of course! That is obviously the case."

"Hmmm," Lyca continued staring at the chip like a tablet. This tablet could be very dangerous as it would also expose everyone to radiation. The best course of action is to use this while she wasn't with her target. Meaning, she couldn't use this product carelessly or when she was torturing people. "Then, I want you to create more chips like this."

"Without the radioactive components?"

"Yes."

"Are you planning to put something else in " Lai Su didn't continue his words when he met Lyca's eyes. "Alright, I will do it."

"If you lack funds"

"I have a lot of funds, no need to worry about this." All the stuff that Lyca earned when she was pretending to be Xi was used to buy materials. Moreover, there was also the percentage from the bullets. Shen Qui said that this was Lyca's share because she basically created it. Those bullets were bought by clients overseas! And it was said that their list of clients was actually increasing every week! Meaning, Lyca's share was also increasing. How could they lack funds?

"Alright, you have to accompany me tomorrow. I am buying some more materials."

"Alright!" Lai Su's enthusiastic voice was the exact opposite of what he felt inside. To be honest, Lai Su doesn't want to leave this place anymore. He doesn't feel the need to go out and look at the world. To him, this laboratory was enough. However, In front of Lyca, he simply couldn't say no. After a few minutes, Lai Su left Lyca alone as he needed to start making this chip like tablets.

"Poisons," Lyca mumbled as she looked at the chip. In her previous world, there is no such thing as technology so using stuff like this was not possible. However, this world is different. With the help of technology, Lyca could actually create a bomb like a tablet that is full of toxins!

He could basically let everyone drink it and just detonate it once they offend her!

With this in mind, Lyca started smiling.
