

Lazily 294

Chapter 294: Ye Bai

"Huang Qingyun, Long Family" Lyca nodded. "Very Good. I will definitely make you suffer a hundred times now." She gritted her teeth. Actually, Lyca's relationship with this side of the family can only be considered cordial. Again, she wasn't too close with her grandfather. However, using this type of poison against an old man is truly vicious.

She actually couldn't understand how the old man survived until now! Was it just luck?

Lyca squinted, suspicions swirling in her mind as she stood and walked towards the next room where her grandfather was lying. She slowly stared at the old man's bulky body. Despite her grandfather wearing a white hospital gown that was loose, his body was still undeniably robust. And it was pretty obvious.

Standing at approximately six foot three, her grandfather's body and muscles are all in the right places. Even at eighty, the man looked like he was still in his early sixties or even late fifties. Moreover, the man ate healthily and still loves to exercise despite his body schedule. Meaning, his body was still strong despite his age. However, this body shouldn't be enough to protect him from a potent poison like the seven treasures poison.

Were there any external factors involved?

That is impossible.

Even with the current technology, Lyca hasn't heard of any machine design to contain poisons. After all, in this world, using poisons was uncommon. Moreover, the fact that her grandfather is still alive until now even if he is not in the Long Family's building means that they didn't use any special methods to keep him alive.

Lyca walked closer. There can only be one explanation left.

Internal points!

Slowly, Lyca's hands landed on her grandfather's pulse. She then closed her eyes and sent some of her own spiritual energy into her grandfather's body. Using this method to examine her grandfather's body is very taxing. However, Lyca doesn't have a choice.

Unlike Shen Qui who was conscious when she touched him the first time, her grandfather is unconscious. Moreover, his body is extremely weak. If her grandfather cultivated his body before then suppressing the poison this long would also make his internal points weaker.

Lyca closed her eyes as she slowly sensed her grandfather's body and to her surprise, the man indeed cultivated his internal points. But it was just like Shen Qui. He only cultivated the one in his chest! Lyca opened her eyes, her gaze extremely complicated.

Before today, she always thought that what Shen Qui learned was something that was passed from his bloodline. However, it seems that this wasn't the case? If her guess was right, this should be something that was passed by his uncle! There is also the possibility that his uncle or the man that accompanied him in running away was also the person who taught her grandfather this technique.

Nevertheless, this is such a big revelation that gave her a lot of new ideas Ideas that she was too lazy to explore before.

"Are you alright?" Without knowing it, Lyca already left the lab and was already in her room. She looked at the man who asked her just now. It was, of course, Shen Qui. "You look a little pale," he added. Concern flashing in his eyes.

"I'm tired," she answered before sitting at the edge of the bed. Before all this, Lyca's life was really carefree. She grew up pampered by her parents. She didn't explore the world and just spent her time reading and experimenting, hoping to get back to her previous world. Because of this, she actually missed a lot.

If she had been a bit interested in the family business, then she would have known that her grandfather cultivated the same technique as hers. For some reason, she recalled the image on her grandfather's study. "I will go talk to mother and father, " she said before leaving. Seeing her current state, Shen Qui immediately followed her.

"Father, I have to ask you something." Lyca barged into Huang Sheng Hong's office. This underground facility is huge. It had enough rooms to accommodate fifty people and even give some private offices. Right now, Huang Sheng Hong and Tang Nini are occupying one of the rooms that were on the other side as Lyca's room. Aside from this, the room next to her parent's house was also

converted to an office where Huang Sheng Hong could freely analyze and suggest training plans for Ma Ping and the others.

"Did something happen?" Seeing Lyca's appearance, Huang Sheng Hong panicked. He immediately recalled his daughter being pregnant. "Why are you so pale? Do you need to go to the hospital? Where is " before he could finish his words, Shen Qui already walked inside his office. Just like him, concern was also written on his face.

"Do you remember the images on Grandfather's office? The people with white hair? Who are they?"

"That That was an old photo. It should be our ancestors."

"Ancestors?"

"Yes, our ancestors have white hairs." Huang Sheng Hong let out a sigh of relief. He thought something had happened. Turns out, Lyca was only curious about this thing. "Why are you asking? If you want to hear the history of our Huang Family, then I can tell you. After all, this is not found on the records. Moreover, the fact that we aren't from this country was also hidden."

"We're not from the country of Xu?"

"Our great-great- great- great grandmother is not from this country. She had white hair. Those images should be her side of the family. Originally, your grandmother was someone with a surname Ye. Her name was Ye Bai. She and her family came from another country not far from her."

It was as if lightning struck Lyca's head. Ye Bai? Princess Ye Bai was her name when she came back to that world! "Ye Bai? And you say the image on that office was her family?" Lyca asked.
