

Lazily 47

Chapter 47: A Dead Man

Xie Jun narrowed his eyes at the woman dressed in a pale blue knee length dress, sitting languidly in front of him. A light make-up could be seen on the woman's face, her hair was messily tied into a bun behind her head. Was she really a young miss of the Huang Family? Compared to her cousin, Huang Xiaoxuan, Lyca's face right now did not show that she was someone important!

Xie Jun immediately thought that Lyca was looking down on him! Women who stood next to him always wore extravagant make-up to attract his attention! Hmp! He snorted and approached the desk. He eyed the poison in front of him before looking at Lyca. This time, Lyca was staring at him. However, the excitement in her eyes immediately made him uncomfortable. "If I die, the Xie family will kill the whole Huang Family!" He spat. Of course, his words were not enough to change the expression in Lyca's eyes. "You Are you ignoring me?"

"She is waiting for you to drink it. Dummy." Shen Qui said. "If you are afraid just say it!"

Xie Jun's face contorted into an ugly scowl. "You're a dead man." He threatened.

"Survive this poison first before you say that." Shen Qui responded with a smirk. A flash of fear immediately glinted in Xie Jun's eyes. What did Shen Qui mean by his statement? Survive the poison?

"You"

"Young Miss, I think he will pee his own pants." Shen Qui ignored the man wearing purple and turned towards Lyca instead. "I think we should challenge him again after this one. I wonder what will happen if a student council member loses the ten points?" He raised an eyebrow and sent Xie Jun a provocative gaze. Seeing the man pale, Shen Qui could only laugh inwardly.

"Drink." Lyca said as she wondered what this man was waiting for. In response, Xie Jun finally brought his gaze back to the crazy woman's face. He gritted his teeth before he drank the poison without saying anything. He had already hired a group of doctors and a chemist to examine his body once something happened to him. There should be no problem anymore, he convinced himself.

Xie Jun was actually expecting to feel pain or discomfort anywhere. Contrary to his expectations, he felt nothing. Not an itch, ache or any discomfort. Nothing! Even the tablet did not have any taste.

The chemist said that this was a crystallized version of the solvent so it should have the same potency and taste. But this one doesn't have any taste at all.

His gaze turned accusatory towards Lyca. "If I die."

"We will bury you!" Lyca said. "Now shut up!" She started staring at Xie Jun then occasionally looked at the time. One minute and nothing happened. Lyca used the record button on her phone to record the result. Seeing her talk to her phone about the details of the poison, Xie Jun's face turned darker and darker. If they knew that this woman would use this opportunity to do an experiment, they would have created some rules against using poisons!

That damn Zhang Zhi who was Lyca's cousin, didn't inform them about this important matter! Because of that, they actually made the wrong calculation and immediately thought that their scheme would succeed. If this continues. Xie Jun's expression turned grave. They could not let this crazy woman continue!

He eyed the VIP room where Long Yi was staying. Surely, that genius Long Yi already figured out what to do with this woman right? Two minutes. Still nothing.

Xie Jun didn't feel any discomfort on his body. He eyed Lyca's excited eyes as she continued recording using her phone. This woman was indeed abnormal. However, the fact that she was still the future Mrs. Long is undeniable.

Now that Xie Jun thought about it, this would become a problem in the future. Right now, the Long Family and Xie Family were considered equal in power and wealth. However, if the Huang Family joins them especially with this crazy woman Lyca Huang. The Long Family would surely become more powerful. Moreover, this woman was highly abnormal and does not follow reasoning. What was more dangerous than opponents who did not think like a normal person?

Three minutes.

Xie Jun sighed. It seems that this poison does not have any effects on his body? He looked at Lyca and opened his mouth wanting to disturb her, however, his gaze was soon attracted to the man standing next to Lyca. The damnable Shen Qui was actually looking at him sternly. This man's mouth was the exact opposite of his beautiful appearance. Xie Jun decided against talking. After all, the five minutes were not up yet. Once it is done, he could always say every insult that he wanted to.

"Qui'er what will happen if a student council will run out of points?" Lyca asked Shen Qui. She hadn't read the rules because she was confident that Shen Qui would know about it.

"They will be kicked out." Shen Qui confidently said. This rule was clearly made to make it look like the Student Council was fair and just. They must have made it because they thought that no one would dare challenge them. After all, they were all from powerful families and they could always gang up on someone. Too bad, they meet the young miss who does not think like a normal person. Shen Qui could only laugh at their bad luck.

"Oh? And If they are kicked out who will replace them?" Lyca's eyes brightened.

"No one." Shen Qui answered. There were only two ways to enter the student council body and that was by inheritance and winning their various contests or point system. Aside from that, you cant just kick someone out and replace them.

As expected, Lyca's face immediately turned down-casted. She was looking for ways to become a member immediately. But it seems that she still needed to wait for more than a month. She eyed Shen Qui. Though this guy was an eye candy, he didn't know how to cook. It's not like she could eat his abs, right? A sigh escaped her lips as she then looked at the time. Four minutes and thirty seconds had passed since he drank the poison, she gave Xie Jun a beautiful smile and watched him fall from his seat with a loud thud.
