

Read I'm Leveling Up Too Quickly

Chapter 951 – 1000

Brilliant and Great (1)

Chapter 951: Brilliant and Great (1) Chapter 951: Brilliant and Great (1) Although the Demon Boar Tribe had Earthly Immortal Patriarchs, there were only three or four of them. In the face of such a monstrous fire, even with their strength, they could not put out such a flame.

Therefore, these ancestors of the Demon Boar Race could only watch helplessly as the entire wild boar forest was burned by the flames, turning into ruins and no longer existing.

The same scene happened to many other races, such as the Ant Race, the Winged Race, and the Dog Race ... The important places of these races had also turned into a sea of dark flames. Although they might not be as important as the City of Angels to the Angel Race or the Mermaid Palace to the Mermen Race, losing them would still cause great losses to these races. It would be difficult for them to turn over a new leaf.

Humans were no exception!

At this moment, in the territory of the human race in Xia country, the residences of many important officials were surrounded by dark flames.

Those who had quietly released the Dark Flames were the gods that Zhu Wuyang had enslaved in the human race. Some of them were the gods of the families of these important ministers. However, at this moment, in order to achieve Zhu Wuyang's goal, they did not hesitate to attack their own people.

Under the effect of the Soul Controlling Technique, these people had already regarded Zhu Wuan's words as their highest goal and pursuit. They were willing to sacrifice everything for Zhu Wuan, even if it meant sacrificing themselves.

Unless one day, they were able to remove the control of the Soul Control Technique, then they would not be affected by Zhu Wuwan's orders.

Under Zhu Wuan's command, a large number of human gods quietly moved out and burned many important human ministers and important places into ashes, turning them into ruins.

This caused the human race to suffer heavy losses, but it also destroyed most of the malignant tumors in the human race. The pillars that really supported the survival of the human race were not damaged and still existed in the territory of China.

Although Zhu Wuwan wanted to severely injure the Human Race, he didn't want to destroy the Human Race. Therefore, when he attacked, he was still very restrained. At most, he would break some bones and leave the Human Race with a backbone.

The human race only looked a little miserable. In fact, they were not destroyed at all. At most, they were damaged.

Although it was a little unkind, Zhu Wuwan was not a member of the human race in the first place. Who cared if she was kind or not? Moreover, Zhu Wuwan was doing this for the sake of the human race. In the future, it would allow the human race to develop faster.

Therefore, the huge human race should continue to be destroyed!

“Boom boom boom...”

“Bang bang bang...”

“Crackle crackle...”

..

Scorching Dark Flames burned the sky of the human race, causing the huge Xia Country to fall into chaos. The gods stood by and watched. No one made a move.

Even True Immortals couldn't do anything to these dark flames, let alone a group of gods. If they went up, they would only be courting death.

The only thing that the Human Tribe could do now was to watch with wide eyes as many important places of the Human Tribe were burned to ashes. Even many of the important ministers of the Human Tribe were also dissipated in the sea of fire.

In order to earn as many breakthrough stones and the world's origin as possible, Zhu Wuyang had already thrown caution to the wind. There were no intelligent life forms in the Xuan Huang Great World that he cared about.

” Help! Hurry up and save them! Sensei Song has done so much for us humans! Hurry up and save their family! ”

” General Huang's family is also surrounded by the sea of fire. Who is so lawless and cruel to us humans? We humans are just a lower-class race. Is there a need to burn us with the Dark Flame? ”

“Could it be the work of the Angel Race? After all, the Angel Race is just to the west of us. It’s not that difficult to obtain the Dark Flame. Moreover, they’re eyeing us covetously.”

” The Palace of Zhi Shan is also surrounded by the Dark Flames. Let’s go to the Palace of Zhi Shan together to put out the fire. If we’re any later, I’m afraid the entire Palace of Zhi Shan will be finished. ”

..

In order to leave smoothly and carry out the following plan, Zhu Wuwan did not even let go of her own King Zhi Shan Residence. She also let it fall into a sea of dark flames.

However, after interacting with them for so many years, Zhu Wuwan still had feelings for some of the people in the King of Zhi Shan’s residence. Therefore, before she was thrown into the sea of fire, Zhu Wuwan pretended to risk her life and sent everyone in the residence out. Then, she pretended to be affected by the Dark Flames and disappeared into the sea of fire.

By the way, when he disappeared into the sea of fire, Zhu Wuyang gave out dozens of storage rings. These storage rings contained more than ten portions of Zhu Wuyang’s hundred-year harvest.

Seeing Zhu Wuyang disappear into the sea of fire, many of the people who were sent out by him cried.

“It’s not worth it, it’s really not worth it. How can our lives compare to your highness ‘life? We’re not worth you dying in a sea of fire just to save us.”

“Your Highness is too merciful. How can people like us be worth risking your life to save? Your Highness’s life alone is worth the lives of millions of humans.”

“Everyone, quickly think of a way to see if we can save His Highness. What exactly is this flame? Why can’t it be extinguished?”

“Look at these storage rings. The things inside are the hard work of His Highness over the years. Moreover, each of them can bring earth-shattering improvements to our human race. Everyone, quickly collect the scattered storage rings around us. Don’t let a single one go.”

..

Soon, someone discovered the abnormality of these storage rings. After flipping through them for a while, they immediately realized how much benefits these things could bring to the human race.

For a moment, these humans who had picked up the storage rings panicked and started shouting crazily, asking everyone to look for the storage ring that Zhu Wuyang had thrown out.

However, there was no need to do so because the things inside these ten storage rings were all the same. There was no difference, so as long as he could keep one storage ring, it was enough.

Moreover, even if he lost more than a dozen storage rings, Zhu Wuyang still had other trump cards. How could he let the treasures he left behind not play their proper role?

If they were really unlucky enough to lose these dozen storage rings, the god servants that Zhu Wuwan had arranged outside would also get a few more. They would definitely not let Zhu Wuwan's painstaking efforts be lost. They would let them play their due role and bring Zhu Wuwan the most world origin.

In addition to the glorious image he had established before his death, Zhu Wuwan believed that he would definitely become an important figure in the history of the rise of the human race. At that time, he would definitely have a far-reaching impact on the human race, and these impacts would be the endless source of the world.

If he was lucky, he might become a big shot on Earth like God and Nuwa, and influence the human race for all eternity. As for the contributions that Confucius Saint and the others would bring to the entire human race, it was nothing compared to Zhu Wuyan.

Chapter 952: Whose Pot (1) Chapter 952: Whose Pot (1) The intense Dark Flames burned half of the central continent in a short period of time. Basically, all the important places were covered in Dark Flames.

The spies of the Dark Clan who were monitoring the situation in the central continent were all dumbfounded when they saw the Dark Flames burning in the sky.

" Our Dark Clan has launched an attack on the central continent, right? It's not time yet, right? There are still other clans of the upper three ranks eyeing us covetously. I don't think it's a good time to launch an attack on the central continent. "

" There's so much Dark Flame. Who else can take it out except for our Dark Clan? And these Dark Flames are burning so fiercely. They don't seem to be ordinary Dark Flames. "

" Am I the person in charge of the intelligence department of the Dark Clan in the central continent? I don't even know when so many Dark Flames have fallen to the central continent. What is the intelligence department of the clan doing? Are they eating sh * t? "

“In the entire Mysterious Desolate Great World, it seems that only our Dark Clan can take out so many Dark Flames. This matter will definitely be blamed on our Dark Clan, but our Dark Clan really didn’t launch an attack on the central continent.”

” Do you still remember? A few decades ago, our Dark Clan lost a large amount of Dark Flames in the Flaming Plains. At that time, we thought that the Dark Flames had drifted into the underground fire river. Now, it seems that this is not the case. Someone had stolen them silently. ”

..

The intelligence agents of the Dark Clan were also confused. They tried their best to find out who did all this. When the news reached the territory of the Dark Clan in the west, the higher-ups of the Dark Clan were dumbfounded.

Speaking of which, they hadn’t prepared anything. How could the central continent be surrounded by the flames of the underworld? What exactly had happened?

Moreover, after the investigation of the Dark Clan, the power of the burning Dark Flames had been greatly enhanced. Apparently, some experts who knew the Dark Flames well had modified them.

However, in the vast Mystic Desolate Great World, it seemed that only the Dark Race could modify the Dark Flame to such an extent. In other words, even if the Dark Race did not want to blame him, they had to. It was difficult for them to distance themselves from it.

Then, the Dark Race began to panic. After all, so many races in the central continent had been burned by the Dark Flames. Many races would be destroyed because of this. This action would definitely anger many races in the Mysterious Desolate Great World.

After all, behind the Demon Boar Clan was the Demon Clan, behind the Merman Clan was the Sea Clan, and behind some demon branches was the Demon Clan... These races weren’t much weaker than the Dark Clan. In fact, they were even stronger than the Dark Clan.

Now that the Dark Flames had destroyed so many races, how could these races let the Dark Clan go? Even if they found out that it had nothing to do with the Dark Clan, shouldn’t the Dark Clan take responsibility for the loss of so many Dark Flames?

After all, everyone knew that the Dark Flames were the specialty of the Dark Clan. The Dark Clan couldn’t deny this no matter what. Now that so many Dark Flames had caused a destructive blow to the central continent, shouldn’t the Dark Clan bear some responsibility?

Some of the higher-ups of the Dark Clan almost collapsed. Although most of the races that were destroyed or severely injured weren't strong, at least compared to the Dark Clan, they had people backing them.

Before the raging Dark Flames burned out, many races sent letters of protest. Some even attacked directly. The Dark Race was also a bit troubled. They hurriedly sent people to put out the fire.

However, it was already a little too late. With the burning speed and destructive speed of the Dark Flames, it would only take two hours to achieve Zhu Wuyang's goal.

Moreover, by the time the fire extinguishing team of the Dark Clan arrived, the Dark Flames would have burned for several hours. It would be too late.

The City of Angels, the mermaid palace, the wild boar forest, the thousands of important places of the human race, the lair of the demon race, the lair of the ghost race ... Basically, they had all turned into ruins, and countless intelligent lives of various races had suffered heavy losses.

However, no race suspected the human race. On the one hand, the human race had suffered heavy losses in this disaster, and on the other hand, no race believed that the human race could do these things.

In the Mystic Desolate Great World, the human race was only a lower-tier race. The strongest among them was only a High-level Deity. There was not even a single True Immortal.

However, according to the investigations of various races, there were clearly a large number of Genuine Immortals involved in this matter, and there were even faint traces of Earth Immortals.

The human race was so weak. How could this be done by a human?

Therefore, the human race had perfectly removed themselves from this matter. Everyone's eyes were focused on the races of the middle three ranks, or the races with the upper three ranks as their backers. No one paid attention to the human race.

In the eyes of most races, the human race was too weak. If they were not lucky this time, they might have been completely destroyed. Even if the human race suffered such a heavy blow, it was still unknown whether they could survive.

Originally, the human race should have cried out in the face of such a great disaster, just as these races had thought. However, they could not help but have Zhu Wuwan cheat for them.

Before the human cultivators could cry, they received news that they had obtained an unprecedented treasure from King Zhi Shan of King Zhi Shan's residence, Song Fu.

The higher-ups of the human race immediately brought the treasure back to the ancestral land. Then, they opened the treasure and began to flip through it.

The improvement of food crops, the improvement of farming tools, eighteen sets of broadcast gymnastics, modern communication facilities, the improvement of panaceas ... All kinds of extremely practical information that could bring great development to the human race fell in front of them.

Zhu Wanwan had effectively used the knowledge and information he had learned from various worlds to improve all the crops that the humans of the Xuan Huang Great World could improve. There were also various farm tools that could effectively promote agricultural development, and there were even some new types of crops.

These crops could not only fill the human race's stomach, but they could also allow the human race to eat well. Their strength would increase faster, and their cultivation realm would increase even higher.

The gifts that Zhu Wanwan had prepared for the Human Race were basically the kind that could allow the Human Race to achieve great development. She ignored some of the mediocre ones. In other words, the ones that could bring about great influence, especially those that could obtain long-term influence.

There were even some gifts that had both positive and negative effects, such as a certain poison.

Although there were two sides to it, it was undeniable that any aspect could have a great impact on the human race.

Chapter 953: Scheming for a Hundred Thousand Years (1) Chapter 953: Scheming for a Hundred Thousand Years (1) Seeing these books, artifacts, and spirit pills that could play an unprecedented role in the development of the human race ... All the higher-ups of the human race were shocked. They were stunned and did not know where they were.

Time flowed by unknowingly. After an unknown period of time, someone finally could not help but exclaim.

"The thousand-year-old rice is too terrifying. A single grain of rice is actually the size of a human head, and the energy it contains is comparable to ordinary spirit pills. How did King Zhi Shan do it? He was actually able to nurture such a terrifying seed of rice."

"The most terrifying thing is still these eighteen sets of broadcast gymnastics. Each set corresponds to an immortal technique that leads directly to the True Immortal realm. It's

simply terrifying. Isn't His Majesty King Zhi Shan not in the True Immortal realm yet? How did he create such a terrifying immortal technique? With these immortal techniques, our human race will definitely be able to break through the bottleneck and advance to the ranks of the middle three powerful races. "

" Also, these farming tools and the necessary elixirs can last us humans for hundreds of thousands of years. King Zhi Shan's invention and creation will probably help us humans soar for nearly a million years. "

"With these treasures, our human race will definitely rise. The current blow is nothing. As long as we can survive this period of time, our human race will definitely have a place in the central continent in the future."

" Unbelievable, this is simply too unbelievable. King Virtue is basically using his own strength to allow us humans to leap dozens of realms. Next, as long as we humans digest the good things that King Virtue has prepared for us, we humans will be able to rise. "

..

All the higher-ups of the human race were pleasantly surprised and excited. However, after the excitement subsided, many of the higher-ups of the human race could not help but cry.

"Alas, the heavens are jealous of talents. If King Zhi Shan hadn't died, with his heaven-bestowed talent, how many good things could our human race have obtained? The heavens didn't bless our human race and caused our human race's great talent to fall just like that."

" In just over a hundred years, His Excellency King Zhi Shan has already prepared so many good things for us humans. If His Excellency King Zhi Shan was given another few hundred years, he might be able to establish the path for us humans to advance to the upper three ranks. What a pity. "

" If it weren't for the sudden invasion of the enemy, with King Zhi Shanwan's talent and aptitude, it wouldn't have taken long for him to become the first human to advance to the middle three ranks. It's a pity that King Zhi Shanwan had thrown himself into a sea of fire in order to save his people. "

" Those fellows aren't worthy of King Virtue sacrificing himself to save them. Although I shouldn't say such things, it's such a pity for King Virtue. Let alone them, even if we were all dead, King Virtue shouldn't be in trouble. "

..

These people were exaggerating Zhu Wuan a little. In fact, the things that Zhu Wuan had accumulated in his stomach that were useful to the human race of the Mystic Desolate Great World had already been emptied. Even if he was given another few hundred years, he would not be able to take out many good things.

Therefore, it was quite appropriate to retreat now. A hundred years was just right, allowing Zhu Wuyang to leave enough influence and reputation in this great world.

In order to thank Zhu Wanhao for her contribution to the Human Race, the higher-ups of the Human Race immediately announced this matter to the entire Human Race. However, they temporarily hid some of the more important good things that might arouse the covetous and worry of other races.

These high-level human leaders were prepared to wait until the corresponding things were effective before announcing that these were all good things that Zhu Wuwan had left for the human race. However, even so, with the announcement of this matter, it still caused a huge uproar in the human race.

Zhu Wuwan's influence began to soar, and the origin energy of the Mystic Desolate Great World leaked even more.

In the following years, as all kinds of good things were announced, Zhu Wuwan's influence on the human race and the Xuan Huang Great World would further ferment. Moreover, this would continue. These could also bring Zhu Wuwan a considerable amount of the world's origin.

Of course, the reason why all of this could go so smoothly was also due to the secret hands that Zhu Wuwan had left behind in the human race. Or rather, in order to ensure that all of this could be maximized, Zhu Wuwan had even specially established a relevant underground organization to protect all of this.

If there were no problems with Zhu Wuyan's plans and policies, all of this could continue until tens of thousands of years later. As for the future, Zhu Wuyan would not be too disappointed.

An organization that could last for tens of thousands of years after he left and continuously bring him the world's origin energy during this period was already very good. What more could Zhu Wuyang ask for?

By the way, the Shadow Tower still existed and had already been broken up. In the future, it would continue to exist in the entire central continent and even in many other places. It would continue to do things that would affect this great world.

Zhu Wuyang had specially formulated relevant policies to ensure that the Shadow Tower would exist for a long time. During this period of time, the things that the Shadow Tower had done would naturally be attributed to Zhu Wuyang.

Similarly, Zhu Wanhao's expectation for the Shadow Tower was that it would exist for tens of thousands of years. In these tens of thousands of years, it would continue to bring him the world's origin power. If it was longer, Zhu Wanhao would not have such extravagant hopes.

Moreover, Zhu Wuwan had also left a hidden hand in the minds of many other intelligent creatures. When the right opportunity came, it would explode and cause great damage and influence. All of this was Zhu Wuwan's credit.

Of course, if someone could get rid of the hidden hands that Zhu Wuyang had left in the minds of these intelligent life forms in advance so that these hidden hands would not be able to play their role, Zhu Wuyang could only blame himself for being unlucky and no longer hope that these hidden hands would play their role.

However, these should be the minority. Most of them would still be useful and bring some benefits to Zhu Wuyang.

In order to obtain more World Origin Power from this great world, Zhu Wuwan had left behind more than one or two trump cards in the past 100 years. They were not only spread throughout the central continent, but also spread to other regions.

Even if Zhu Wuyan left, these backup plans would be activated in the following period of time, bringing Zhu Wuyan benefits.

Moreover, some of the good things that Zhu Wuwan had left behind would probably continue to exist in this great world even if the human race was destroyed in an accident, such as those useful food crops, those convenient farming tools, some modern technology, and the internet...

These things that could bring great convenience and benefits to many races would definitely be passed down continuously. Of course, some things might undergo transformation and improvement, and then become completely unrecognizable. However, the source was left behind by Zhu Wuwan.

As long as it was remembered by future generations, it would be an influence.

Chapter 954: A World Breaking Record (1) Chapter 954: A World Breaking Record (1)
Facing a great world like the Mysterious Desolate Great World that was extremely beneficial to Zhu Wuwan and could unleash his greatest strength, how could Zhu Wuwan miss it so easily?

Therefore, Zhu Wuwan had basically done everything she could. It could be said that she had displayed her combat strength beyond her level, and the gains she had brought to Zhu Wuwan far exceeded her imagination.

The moment the Dark Flame Calamity erupted in various important places in the central continent, Zhu Wuwan was forcefully kicked out of this great world to avoid being discovered by the world's will of the Mystic Desolate Great World.

Zhu Wuwan, who had returned in a daze, did not have time to wake up before he sensed the world's origin surging over and instantly drowning him.

The number floating above Zhu Wuwan's head instantly broke through 10000 points, and then it flew forward at a speed far faster than before.

10000 points...10100 points...10200 points...10500 points...11000 points...

12000 points...13000 points...16000 points...

In the beginning, it was still a hundred points, but in just a few breaths, it began to increase by thousands. Many cultivators who were paying attention to Zhu Wuwan thought that they were seeing things. They couldn't help but rub their eyes again and again, wanting to confirm that everything was fake. Zhu Wuwan didn't earn that much World Origin.

However, when they were done rubbing their eyes, they saw that the number floating above Zhu Wuwan's head had soared by a large margin. The increase was even faster, so they were even more shocked and even a little shocked.

Zhu Wuyang's abnormality attracted more and more people's attention, especially as the exclamations continued to ring out. Zhu Wuyang's attention became even more intense.

Then, countless people were surprised to see that the number above Zhu Wuyang's head that represented the world's origin had already broken through 13000 points, and the speed of growth was not much slower.

"He broke the record!"

Ear-piercing exclamations came from the crowd. Many people suddenly realized that the amount of World Origin that Zhu Wuwan had earned had already broken the record that had been maintained for hundreds of thousands of years.

In the past hundreds of thousands of years, it was said that the high-level cultivator who had earned the most of the world's origin energy had only taken away more than 13,000 points of the origin energy of the three macro worlds. However, Zhu Wuwan had already earned 13,000 points of the origin energy of the macro world in the first macro world that she had transmigrated to.

No, it should be said that it wasn't just 13,000 points of the origin power of the great world, because the number above Zhu Wuwan's head that represented the origin of the world was still increasing at an extremely fast speed.

Looking at the skyrocketing number, not to mention the spectating cultivators, even the high-level cultivators who had sent one-third of their essence, energy, and spirit into the great world were stunned.

At this moment, the second-ranked high-level cultivator had only earned more than 6,000 points of world origin energy. Moreover, he had already entered three great worlds and was no longer qualified to enter them.

In addition, he had lost a third of his essence, qi, and spirit in one of the macro worlds. In order to make up for the loss, the high-level Cultivator had spent about 2,000 points of origin power of the macro world. In total, he had only earned 4,000 points of origin power of the macro world.

However, Zhu Wuwan had not only completed the mission but also obtained so much of the origin power of the great world.

By the way, the third-ranked high-level cultivator had only earned 3,000 points of World Origin Energy. However, he had entered the first great world with his main body. Although he had earned so much World Origin Energy in the first great world, he had died because he did not escape in time when he encountered danger.

Therefore, although he had earned more than 3,000 points of origin energy from the great world, he had not brought back any of it.

" Zhu Wanhao had deliberately suppressed the speed at which he was earning the World Origin. He was only waiting for the final moment to explode. However, this explosion was too exaggerated. He actually obtained so much World Origin after leaving. "

" Do you think Zhu Wuwan could have obtained more than 20,000 points of World Origin in this first great world? I think it's a little unlikely. About 15,000 points is already quite a lot. "

" Other high-level cultivators only earned a few thousand points of World Origin Energy in the three macro worlds. Some didn't even earn a few thousand points. The least they earned was a few hundred points. But Zhu Wuwan earned more than 10,000 points of World Origin Energy in one macro world. It's too exaggerated. "

" With so much Origin Power of the great world, it means that no matter how reckless Zhu Wuyang is, he will still be able to use the Origin Power of the world he earned in the first great world to recover from all his injuries even if he fails in the remaining two

transmigration opportunities and loses two-thirds of his essence, qi, and spirit. Moreover, he will be able to make a huge profit. ”

..

While some people were still discussing whether Zhu Wuyang could earn 20,000 points of the world's origin energy and clamoring that it was impossible for Zhu Wuyang to earn so much, the number above Zhu Wuyang's head had already broken through the range of 20,000 points and was soaring to an even higher level.

20200 points...20400 points...20600 points...21000 points...22000 points...

However, at this time, the speed slowly slowed down. It was not as fast as before, but it would occasionally increase by a few hundred points.

” It seems that Zhu Wuwan's last operation in the first great world is finally coming to an end. Her influence is almost there. The number has dropped so much. It seems that she won't be able to harvest much of the world's origin. ”

“According to my guess, at the current speed, Zhu Wuwan will eventually earn less than 23,000 points of World Origin, because the speed will become slower and slower. Although it seems to be fast and slow at times, it's clearly trending down.”

” It's finally over. Zhu Wuwan is too monstrous. She obtained so much World Origin Power in just the first macro world. It seems that when the 3,000 macro worlds are over, Zhu Wuwan will really take off. Or rather, she's not far from taking off now. ”

” Zhu Wanwan was able to obtain so much World Origin Energy in the first macro world, but it doesn't mean that he will be able to obtain so much in the next two macro worlds. You'd better not think too highly of him. Look, his World Origin has slowed down again. Occasionally, it will drop to a few dozen points. It looks like it will stop soon, haha. ”

“I didn't expect it to drop so quickly. If nothing unexpected happens, it should only break through 22,000 points. It looks like it won't break through 25,000 points. I almost thought it would break through 30,000 points just now. Now it seems like it's just a fool's dream.”

..

Chapter 955: My Heart Should Have Reflected on the Bright Moon (1) Chapter 955: My Heart Should Have Reflected on the Bright Moon (1) While many people thought that as the rate at which Zhu Wuyang was earning World Origin decreased, he probably wouldn't be able to earn too much World Origin in the future, what shocked all the onlookers was that the growth rate of World Origin above Zhu Wuyang's head actually maintained between tens to hundreds of times, and it lasted for several hours.

After such a long period of time, the number above Zhu Wuwan's head had unknowingly exceeded 23,000 points, 24,000 points, 25,000 points, 26,000 points...

The people who had been clamoring not long ago that the World Origin that Zhu Wuwan obtained was at most around 23,000 points and that it was impossible for her to break through 25,000 points were all silent at this moment.

It had already broken through 26,000 points, let alone 23,000 points. When would it stop?

What exactly happened? Were their eyes playing tricks on them?

What shocked them even more was that this time, Zhu Wuyang did not use the world's origin energy to increase his strength and realm. Instead, he used it on his talent and aptitude, which was also what everyone thought should be used the most.

Then, under everyone's shocked gazes, the Heavenly Martial Spiritual Root, which was already "close" to the limit of the human world, reached the limit of the human world at an unimaginable speed.

Then, under the effect of a large amount of world origin, he broke through the limit of the human world and transcended to another realm. Three words suddenly appeared in the minds of some knowledgeable and talented high-level cultivators.

Immortal Spiritual Root!

Above the Heaven, Earth, and Human grade spiritual roots, the legendary spiritual root that only immortals could possess had now appeared on Zhu Wanwan's body. This was also the strongest spiritual root known in Dongyuan Continent.

With the appearance of the Immortal Spiritual Root, there were instantly heavenly flowers falling from the sky, golden lotuses surging from the ground, a fragrance that spread for thousands of miles, and the appearance of the stars and the moon...Even the heavens and earth were celebrating for Zhu Wuyang. They were congratulating him on his talent and aptitude, which had surpassed the limits of the mortal world and reached a higher level.

It was said that when a cultivator advanced to the True Immortal Realm, such a phenomenon would be even more shocking. Of course, the phenomenon at this moment was only created by Zhu Wuyang using the world's origin. After all, his talent had long broken through the scope of the human world, but he had hidden it.

However, at this moment, since he wanted to have the corresponding talent and aptitude "logically", he naturally had to do some small tricks to avoid being suspected.

However, this action caused countless female cultivators present to widen their bright eyes and stare at Zhu Wanyou greedily. There were also many male cultivators among them. Of course, these male cultivators were greedy for their women.

With such talent and such immortal spiritual roots, if he could capture her and breed her, once she was successfully conceived, what kind of stunning children would he give birth to?

Although Zhu Wuwan's current talent and aptitude for the Immortal Spiritual Root meant that the chances of her getting pregnant were not high, it was still worth a try. Although doing so would make the women in the family suffer, in front of the Immortal Spiritual Root, which surpassed the human world's talent and aptitude, this little loss was nothing.

Moreover, if she did it many times, she might get pregnant one time. Who knew?

For a moment, countless onlookers looked at Zhu Wuyang with burning gazes.

"Our Red Jade Sect doesn't have many other things, but we have more beautiful female cultivators. If we can let Zhu Wanyou stay in our Red Jade Sect for a year and a half, we should be able to get some female cultivators of our Red Jade Sect pregnant. At that time, we will definitely be able to leave behind a talented monster for our Red Jade Sect. In that case, it's only a matter of time before our Red Jade Sect becomes a top immortal sect. Moreover, there's a high possibility that Zhu Wuwan will be tempted by my Red Jade Sect's three million beauties. She'll definitely come."

"Hurry up and count how many beautiful female cultivators there are in the clan. Count those who are married as well. Then, find an opportunity to bring them all to Zhu Wuwan and let him choose at will. He can choose whichever one he likes as long as he leaves a seed for our Song Clan. I'll also tell those whose wives have been chosen that it's their fortune to be able to become a father and let their wives get pregnant with the Immortal Root Spirit Seed. There's no need to make a fuss over this. Bring all three thousand of my beautiful wives over. Perhaps Zhu Wuyang likes this type of thing."

"It's a pity that Zhu Wuan is already a Quasi-Immortal in the Great Ascension Stage. If he was still below the Great Ascension Stage, I would definitely do my best to capture this guy alive and bring him to our clan. I would then breed him with the women in our clan every day. As long as he can give birth to a few Immortal Root Spiritual Seeds, our clan will definitely rise and become the number one clan in the world."

"As expected of a Celestial Grade Spiritual Root that transcends the mortal world. As expected, there are many phenomena. This should be the first recorded genius who has raised his talent to the rank of Celestial Grade Spiritual Root in the 3,000 major worlds. It's really unbelievable."

..

Zhu Wuwan, who was doing his best to improve his talent and aptitude, never expected that he would be targeted by many onlookers again. Moreover, in order to obtain his breeding rights, many forces had already come out in full force, including many top immortal sects. Only the super immortal sects were a little more reserved, but they were also prepared to exchange with Zhu Wuwan.

My heart should shine on the moon, but the moon shines on the ditch!

Zhu Wuwan had always wanted to be a devoted and devoted man, but reality often did not go as he wished. Just like now, he was targeted by so many forces again, and this time, there were even more forces targeting him.

This meant that if Zhu Wuyang was careless in the future, she might lose her innocence and might even have some illegitimate children.

Although he was a Dacheng stage quasi-immortal, he was not sure if he could escape successfully when facing the pursuit of so many females in the entire Dongyuan Continent. At that time, he might lose his virginity.

A cruel future was waiting for him, but Zhu Wuwan did not notice it at this moment. She was still excitedly improving her talent.

“Boom...”

It was as if the sky had collapsed and the earth had split apart. It was as if the sun had just risen. Accompanied by a rumbling sound that shook his entire body, Zhu Wuwan's talent had already broken through the category of third-grade immortal spirit root and stepped into the ranks of fourth-grade immortal spirit root.

Under the effect of a large amount of World Origin, Zhu Wuwan's talent and aptitude finally broke through another major realm and improved even more.

It was obviously a big hurdle to go from third-grade to fourth-grade Immortal Spiritual Root. It was not easy to cross it. Zhu Wuwan was able to break through brazenly under the effect of more than 10,000 points of macro world origin. The consumption was not small.

However, with the great advancement of the immortal spirit root, Zhu Wuwan could clearly feel that her body had become different. No matter if it was in every aspect, it had become different. It was far better than before. The two could not be mentioned in the same breath.

Chapter 956: Strongest Since Ancient Times (1) Chapter 956: Strongest Since Ancient Times (1) Innate Dao Body, the whole body was unobstructed, the meridians were naturally formed, and the dantian was tough ... All kinds of special physiques were revived in Zhu Wuyan's body, and the spirit root was the core of everything.

Under the effects of all kinds of special and magical physiques, Zhu Wuwan's subsequent cultivation speed would definitely soar, far surpassing the previous one.

To put it accurately, the number of breakthrough stones needed for Zhu Wuwan's cultivation to advance in the future would be reduced by several times. The number of breakthrough stones needed for each advancement would only be a few times more than that of ordinary cultivators, but the benefits it brought to Zhu Wuwan would be eighty-one times.

Under normal circumstances, if one wanted to reach Zhu Wuan's foundation and strength, they would have to spend at least hundreds of times more time and energy than cultivators of the same level. Only then would they be able to have a cultivation foundation that was 81 times stronger than those of the same level. However, Zhu Wuan only spent a few times more than the breakthrough stones of cultivators of the same level.

Under such circumstances, with the Breakthrough Stone that Zhu Wuan had at the moment, it was completely enough for him to raise his cultivation realm to the rank of Human Immortal. Therefore, Zhu Wuan had already decided to raise his cultivation realm to the rank of Human Immortal.

This was reasonable!

Although others thought that Zhu Wuan was wasting the natural resources again by using a large amount of the world's origin energy to improve his cultivation realm, that was not the case at all.

After his innate talent reached the rank of a fourth-grade immortal spirit root, there was still a large amount of world origin energy left. Zhu Wuwan continued to use it to increase his innate talent. Then, under the stunned gazes of many onlookers, his innate talent rapidly "soared".

First-grade low-grade immortal spirit root...First Grade Middle Grade Immortal Spiritual Root...First-grade high-grade immortal spirit root...Second-grade low-grade immortal spirit root...Second-grade medium-grade immortal spirit root...

Second-grade high-grade immortal spirit root...All the way to third-grade high-grade immortal spirit root!

Before the onlookers could react to what had happened, Zhu Wuyang's talent had broken through once again. It had already advanced to the third grade and reached the fourth grade.

This was also on par with the talent and aptitude that Zhu Wuwan currently possessed. In the future, he could also explain his own talent and aptitude logically. However, many onlookers were clearly still a little unable to accept it.

” So there are so many grades above the Immortal Spiritual Root, from the first grade to the ninth grade? Zhu Wuwan has a fourth-grade Immortal Spiritual Root. Damn, how terrifying. ”

“Such talent, such spiritual roots, such ... It’s unbelievable. Dongyuan Continent has never had such terrifying talent since ancient times. Zhu Wuyang is even more monstrous than a monster.”

“F * ck, I’ve lived for 108,000 years, but I’ve never seen such a f * cking cultivator. He actually has such terrifying talent. My talent hasn’t even reached the celestial-grade.”

” With Zhu Wuan’s current talent and aptitude, passing the Human Immortal Tribulation is nothing to him. The only difficult thing is whether he can overcome the shackles of the natural chasm and advance to the Tribulation Transcendence realm. However, the possibility of this is obviously not small. ”

..

Many of the onlookers could no longer be described as shocked. They were all cursing in their hearts and did not know what words to use to express their excitement.

The innate talent that Zhu Wanhao possessed at this moment should be the strongest in Dongyuan Continent since ancient times.

Then, under the watchful eyes of everyone, the number above Zhu Wuwan’s head that represented the origin of the world slowly crossed the range of 30,000. Only then did it rapidly slow down, and its speed was not as fast as before.

In the history of the 3,000 macro worlds, the most World Origin earned was more than 13,000 points, and it was all the gains obtained from transmigrating to the three macro worlds.

However, Zhu Wuwan had earned 30,000 World Origin points in the first great world, which was more than twice the record. Moreover, this number was clearly not the end. He did not know what that bastard Zhu Wuwan had done in the first great world, but there was still an endless stream of World Origin points surging in.

This was like piercing through the heavens of a great world. Otherwise, how could he obtain so much origin energy of a great world? Moreover, it was the kind that was continuous.

Many of the surrounding cultivators were envious and jealous. The high-level cultivators who had wanted to enter the 3,000 macro worlds were quite pitiful, and some of them were even gloating.

However, after seeing the speed at which Zhu Wuwan was earning World Origin from the great world, these people began to doubt their choice. Should they take the initiative to receive a quota to enter the 3,000 great worlds and then fight for the Origin?

However, when they saw the high-level cultivators who had lost one-third of their spirit and blood, they became obedient again and stopped having unrealistic thoughts.

Some things were done by others, and they did it very well, but it did not mean that they could do it well.

These spectating cultivators could not imagine what Zhu Wuwan had done in the first great world, the Xuanhuang Great World. Although he did not pierce through the sky, it was almost done.

The entire central continent had been set on fire by him, leaving behind the foundation for the future great power of the human race to rise up. Such an action was not inferior to piercing through the sky.

Furthermore, the future great power of the Xuan Huang Great World, the human race, was still prostrating themselves in worship of Zhu Wuan, the fellow who had stolen a large amount of the world's origin and caused the Xuan Huang Great World to fall. They were crazily thanking Zhu Wuan for his contributions to the human race, and then continued to exert influence, bringing Zhu Wuan endless harvest.

Most importantly, under the cover of the will of the Great Path of the world where the Dongyuan Continent was located, none of this was discovered by the will of the Great Path of the Xuanhuang Great World. They did not even notice the loss of the world's origin.

Only when the world's origin had been drained to a certain extent would the will of the Great Path of the Mysterious Barren Great World be able to discover it. This once again proved one thing-the will of the Great Path of the world where the Dongyuan Continent was located should have far surpassed the will of the Great Path of the Mysterious Barren Great World.

If not for this, the will of the Great Path of the world where the Dongyuan Continent was located would not have been able to hide from the will of the Great Path of the Xuanhuang Great World. However, Zhu Wuwan did not know the name of the world where the Dongyuan Continent was located.

Although he had read many ancient books, there was no description of the world where the Dongyuan Continent was located. However, this world was obviously not limited to the Dongyuan Continent. There must be a wider and more terrifying region. Otherwise, it would not be able to transcend the Xuanhuang Great World.

It seemed that he still had to wait for his strength to continue to increase and walk to a higher level. Perhaps he would be able to understand more about the inside story of the Dongyuan Continent.

Before that, he would focus on leveling up and preparing to enter the next great world.

Chapter 957: Huaman Multiverse (1) Chapter 957: Huaman Multiverse (1) In just a few hours, Zhu Wuwan had obtained more than 30,000 points of World Origin from the Xuan Huang Great World. Although he could still obtain a considerable amount of World Origin, it would take a long time to accumulate.

Under the effect of these 30,000 points of world origin, Zhu Wuwan's talent and aptitude soared to the peak of the fourth-grade immortal spirit root in one breath before slowly stopping. The further one's talent and aptitude went, the more difficult it would be to raise it.

By the way, Song Fu's wish in the Mystic Desolate Great World had already been fulfilled by Zhu Wuyan. Therefore, after Zhu Wuyan absorbed his soul, her soul had soared by a large margin, forming a torch that was even more dazzling.

Once he could survive the tribulation, his soul would be able to fuse with the Heaven's Origin and form an Essence Soul that transcended the mortal world.

Even at Zhu Wuwan's realm, after fusing with these parallel souls from the other world, it could still bring a lot of help to Zhu Wuwan's soul. It was as if it made up for some of the flaws in the soul of the main body, allowing the soul to undergo a qualitative improvement.

Zhu Wuyang didn't know much about the inside story of this situation, but it was obviously a huge good thing for Zhu Wuyang. In the future, Zhu Wuyang would be able to continuously improve her soul through this method.

Of course, the prerequisite was that he had to find a treasure that could allow him to transmigrate steadily. It was not like the World Mountain, where he could only transmigrate three times at most.

Even if such a transmigration failed and required a large amount of energy, Zhu Wuwan felt that it was not bad. To others, it was a danger and disaster, but to Zhu Wuwan, it was a good fortune and opportunity.

With the Special Encounter System and the Breakthrough Stone in hand, this kind of transmigration was the best way for Zhu Wuyang to improve her cultivation realm.

The benefits that the first great world brought Zhu Wuyan were beyond imagination. It also allowed Zhu Wuyan to break a series of records, shocking the entire Dongyuan Continent.

Therefore, during the second transmigration, Zhu Wuwan still chose to close her eyes and choose blindly. After all, the 3,000 macro worlds were all the same to Zhu Wuwan. It was better to hand it over to the will of the Great Path of the world where Dongyuan Continent was located. This way, it might be better to choose.

Moreover, they had earned so much World Origin for the world where the Dongyuan Continent was located. Zhu Wanwan had only obtained more than 30,000 points, but the world where the Dongyuan Continent was located could at least obtain more than 300,000 points, or even more.

It was said that although the world where the Dongyuan Continent was located could not compare to the small world in terms of taking a share of the 3,000 macro worlds, it was still more than ten times. This made Zhu Wuwan sigh.

If not for that, the 300,000 Origin Energy of the Great World would have been enough to raise his talent to a fifth-grade immortal spirit root or even higher.

He did not know if there was a way to avoid the will of the Great Path of this world and earn the world's origin. If there was, he had to make use of it in the future. Otherwise, it would be too ruthless.

After all, this was a monopolized way. The amount of commission was decided by the will of the Great Path of the world where the Dongyuan Continent was located. High-level Cultivators like them had no right to choose at all.

However, since he had earned so much World Origin for the world where Dong Yuan Continent was located, he should be able to obtain better protection. Therefore, he should be able to choose a good world in the next blind selection.

Zhu Wuwan smiled slightly and split a third of his essence, qi, and spirit into the next great world.

Huaman Multiverse, Milky Way Federation, Earth Star, Jiangnan Road, Lotus Picking District, Yellow Mountain Public High School, Grade One, Class 12, last row.

Zhu Wuwan slowly woke up. In just a few breaths, he had completely fused with the soul of the original Wang Debao. Wang Debao only had one wish, and that was to become the overlord of the students of Yellow Mountain Public High School and make everyone look at him in a different light.

What a simple wish. Zhu Wuyang expressed that he liked this wish very much because it wasn't difficult to complete. In fact, for Zhu Wuyang, this wish could be said to be a piece of cake.

After carefully flipping through the original owner's memories, Zhu Wuyang was surprised to find that he had actually transmigrated to a great world that was similar to the future world.

However, other than the advanced technology in this great world, the most powerful aspect was the cultivation of the mind. In this aspect, it could even be considered terrifying. It was not inferior to the martial arts level of the Mystic Desolate Great World at all. In many aspects, it was even better.

This was a world called the Huaman Multiverse. The so-called Hua was the Hua of Huaxia. There was also a China existence similar to Earth in this world, and it had created the embryonic form of spiritual cultivation.

That was why the name of this macro world began with the word "Hua". Man originated from an empire in the west and had made great contributions to spiritual cultivation, so the name "Hua Man" was formed.

And because this world existed in the form of a multiverse, it was named the Huaman Multiverse.

With the help of high-tech and spiritual cultivation systems, the humans of the Huaman Multiverse had already taken the initial step of conquering the entire Milky Way and formed the only force of the human race, the Milky Way Federation. Their footsteps had spread throughout the entire Milky Way, far surpassing the Earth where Zhu Wuyang was from in his previous life. The two were simply incomparable.

Not to mention spiritual cultivation, just in terms of technology, the difference between the two was tens of millions of years.

Furthermore, compared to the situation of the humans in the Mystic Desolate Great World, the humans in the Huaman Multiverse were the overlords of the world. They were unhindered in the entire Milky Way and were constantly expanding towards the galaxies outside the Milky Way.

At the same time, the Milky Way Federation was still continuously conquering the universe of other dimensions. It was not an exaggeration to describe it as a world, just like the difference between the world where the Dongyuan Continent was located, the 300 small worlds, and the 3,000 large worlds.

Zhu Wanhao even secretly speculated that since the world where the Dongyuan Continent was located could open a passageway to the Huaman Multiverse, it was possible that the Huaman Multiverse had also opened a passageway to the world where the Dongyuan Continent was located.

Perhaps in the future, when Zhu Wuyan's strength reached a certain level, she would be able to meet the humans of the Huaman Multiverse again.

Because Planet Earth was the origin of the entire Milky Way Federation, it had a special status in the Milky Way Federation. Moreover, Planet Earth had a magical place, which was that it could be connected to other dimensions. Therefore, the universe passages in the entire Milky Way were basically on Earth, and there were very few outside.

Myriad World Heavenly Sphere!

This was what Planet Earth was called in the Huaman Multiverse. It meant that it was a celestial body that connected the myriad worlds. It was said that thousands of cosmic passageways had appeared on Planet Earth, and every cosmic passageway was connected to another universe. It was unknown whether this was true or not.

Chapter 958: Breaking the Limit of the Mind (1) Chapter 958: Breaking the Limit of the Mind (1) In the Milky Way Federation of the Huaman Multiverse, all humans focused on spiritual cultivation.

The so-called spiritual cultivation was to promote the improvement of all aspects of the body by improving the spiritual realm. The improvement of the spiritual realm could also promote the improvement of all aspects of the human race. This special system was quite mysterious.

Through the original owner's memories, Zhu Wuwan learned that when one's spiritual cultivation reached a certain realm, they would also have strength that was not inferior to the Earth Level Deities and Heaven Immortals of the Xuanhuang Great World. They might even surpass the Earth Level Deities and Heaven Immortals.

Summon the wind and rain, move mountains and seas, pick up the stars and the moon ... It was an ordinary thing, and it could even destroy many stars with a thought. It possessed incredible power.

After understanding this, Zhu Wuwan took out the Spirit Sutra Version 9.0 from the original owner's desk, which was the foundation establishment treasure that all the humans in the Milky Way Federation would cultivate in the first few major realms.

Through the description in the book, Zhu Wuwan knew that the Galaxy Federation's Spirit Sutra had gone through nearly a hundred versions, and each version would become stronger and stronger. Version 9.0 was improved by the combined efforts of all human scholars a few years ago. It was said that it was close to perfection and could lay the best foundation for human cultivation.

Basically, all humans could cultivate the Heart Sutra. The power of the spirit that was cultivated through the Heart Sutra was the most suitable for the humans of the Milky Way Federation.

The brain was the most mysterious part of the human body. The cultivation of the mind was to affect the brain through the mind. Every time the cultivation of the mind

advanced to a higher realm, the brain would also be positively affected. At that time, every organ and every inch of muscle in the body would be strengthened.

Otherwise, one's spiritual cultivation would not be able to progress, and the development of one's brain would not be sufficient. No matter how many elixirs one had, they would not be able to improve one's overall quality after undergoing various genetic modifications. This was also a special feature of the Huaman Multiverse.

Therefore, the cultivation of the mind was the foundation. As long as the realm of the mind was raised, the cultivator would be able to obtain an all-round improvement. And in the Milky Way Federation, people were used to expressing the comprehensive quality and strength of cultivators with vitality.

For example, when Zhu Wuwan was on Earth, the vitality of an ordinary person on Earth was only about 0.55. The 100-meter sprint usually took more than ten seconds, and they could only pick up objects that weighed 100 pounds at most. The body's defense was limited.

However, in the Huaman Multiverse, due to years of nurturing, the vitality of ordinary people was generally around 0.7. They could easily break ten seconds in a hundred-meter run and could lift objects weighing hundreds of pounds. Their defense had also improved a little, and their overall quality had increased a lot. They were now several times more than ordinary people on Earth, almost equivalent to world champions.

And this was only the normal comprehensive quality of the ordinary people of the Huaman Multiverse!

In the Huaman Multiverse, the vitality of a typical police officer was 0.8. This was their overall quality, which included strength, speed, reaction, defense, and other aspects.

Some elite police officers even had vitality stats above 1. Such physical fitness could even tear apart tigers and leopards. Only a few human geniuses could achieve this.

It was said that if one's vitality was raised to around 3 points, one could even fight against a mech with one's body. Tearing down a house with one's bare hands would be a piece of cake.

Legend had it that as long as one's vitality could exceed 100, they could undergo human nuclear explosion experiments and possess unimaginable power.

In the Huaman Multiverse, every 0.1 increase in vitality meant that a person's overall quality was twice as strong as before. That was why one point of vitality did not mean that one was several times stronger than an ordinary person, but close to ten times.

In the high schools of Earth Star, or in the Yellow Mountain Public High School where the original Wang Debao was, most high school students had vitality stats of around

0.75. Only some geniuses had vitality stats above 0.8. There were basically no students who had vitality stats above 0.9.

As for the original Wang Debao's vitality, it was only 0.65 at the moment. It had not reached the level of an ordinary person. After all, he was only a first-year high school student. Although he cultivated all year round and even delayed the cultivation of his three sisters for his cultivation, having such vitality was barely considered good for his age.

The hope of the entire family was placed on the original owner, Wang Debao. Even though Wang Debao's talent was the worst among the four siblings, his parents' preference for sons over daughters and the fact that Wang Debao's family was not rich, all the cultivation resources were concentrated on Wang Debao.

It was said that in high school, if one's vitality could be raised to 0.9 or above, even if one's results in cultural studies were poor, one could still enter a first-class university in the Milky Way Federation.

If one could have more than 1 point of vitality in high school, they could directly enter the top universities in the Milky Way Federation to study.

After spending half a class, Zhu Wuwan finally had a general understanding of the current situation. Then, he took out the Heart Sutra and began to carefully read and comprehend it.

According to the description of the Heart Sutra, the realms of the heart were mainly divided into deep sleep, meditation, fetal breath, meditation, and other realms. Each major realm was divided into a different number of minor realms.

Take deep sleep as an example. This major realm was mainly divided into three stages. The first stage was to enter deep sleep through prolonged meditation, breathing, guidance, and so on.

The second stage was to enter deep sleep at any time and place, which was longer than the first stage.

The third stage was to enter a deep sleep during exercise. This stage allowed the cultivator to digest and absorb energy at an extraordinary speed, which was used to improve the overall quality of the cultivator.

As for the original owner's current spiritual realm, it was only in the first stage of deep sleep. It could only be occasionally reached when sleeping. In other words, it was slightly stronger than many ordinary people. This was the result of the original owner's years of bitter cultivation.

Such progress was simply jaw-dropping. Zhu Wuyang was also deeply moved by the original owner's talent.

Shaking his head, Zhu Wuwan spent two classes to thoroughly comprehend the Heart Sutra. At most, he could cultivate to the Embryonic Breathing realm. Any higher would require other books and scriptures.

Through the comprehension of the Heart Sutra, Zhu Wuwan's horizons were broadened. The path of spiritual cultivation was something he had never come into contact with before. Moreover, during the process of comprehension, Zhu Wuwan could vaguely discover that the main body of this spiritual cultivation path could be used as a reference, but it needed to be improved to a certain extent.

Or rather, this Heart Sutra could be moved to the Dongyuan Continent. At the very least, if it was modified properly, it could completely become a peerless technique that would bring great benefits to Zhu Wuyan's body. It could effectively promote the growth of Zhu Wuyan's Heavenly Yuan, Earth Yuan, and Human Yuan.

It had even helped Zhu Wuwan to transcend the limits and possess a cultivation foundation that was 81 times stronger than those of the same rank!

Chapter 959: Future Sexist (1) Chapter 959: Future Sexist (1) In addition to helping Zhu Wuyan build a stronger cultivation foundation, the Heart Sutra could also allow Zhu Wuyan to master a special power that the cultivators of Dongyuan Continent had never seen before.

In the face of such an unheard of power, many cultivators in Dongyuan Continent would be at a disadvantage. At that time, Zhu Wuyang would have another trump card.

As expected, it was another great world that was extremely beneficial to him, Zhu Wuyang thought with satisfaction.

Then, he began to cultivate the Heart Sutra. The Heart Sutra was mainly divided into nine levels, which corresponded to the nine minor realms of the heart. Every three minor realms corresponded to a major realm.

The original owner had long cultivated the Heart Sutra to the beginner level, so as long as she consumed the breakthrough stone, she could upgrade the Heart Sutra.

100 Breakthrough Stones!

What Zhu Wanhao didn't expect was that he would need a total of 100 Breakthrough Stones to advance the Heart Sutra from the Beginner Stage to the First Level of Perfection. This was enough for him to advance from an ordinary person to above the Refinement Stage in one go in the Dongyuan Continent.

As expected of a great world, as expected of a special cultivation system. The consumption of breakthrough stones was really high, and it did not start from the breakthrough point at all.

Fortunately, Zhu Wuyang had enough Breakthrough Stones, so these Breakthrough Stones were nothing.

Zhu Wanwan poured a hundred breakthrough stones into the Heart Sutra and easily raised it to the first level, completely stabilizing the first stage of deep sleep.

Zhu Wuwan revolved it for a while, and after a while, he entered a deep sleep. In the deep sleep, the excess energy in his body was being digested at an extremely fast speed, improving Zhu Wuwan's overall quality.

In just a short period of time, all the excess energy in his body had been digested, including some excess fat, which directly increased Zhu Wuwan's vitality to 0.66.

It seemed like only a 0.01 increase, but it was already very terrifying. Under normal circumstances, an ordinary student would need to cultivate for at least a few months to increase their vitality by 0.01.

However, Zhu Wuwan had only spent one lesson. It was clear how powerful the first stage of deep sleep was.

Feeling her empty stomach, Zhu Wuwan felt a little helpless. Just as she was about to use the breakthrough stone to replace the energy, she suddenly thought of something. In this high-tech era, there were countless monitoring devices. If anyone was slightly abnormal, they might be discovered.

If the original owner improved too quickly in a short period of time, it would inevitably cause some trouble. Therefore, it was better not to improve too quickly. In that case, he would first increase his vitality to 0.76, increasing it by 0.1.

At the thought of this, Zhu Wuwan no longer hesitated. As she entered deep sleep, she poured some breakthrough stones into various parts of her body to promote the improvement of her overall quality.

The cultivation of the spiritual realm was not synchronized with the cultivation of life force at the initial stage. Only after reaching a certain realm could it be synchronized with the cultivation of life force.

Therefore, when Zhu Wuwan was leveling up, she had to first raise her spirit realm before she could raise her vitality.

If his spirit realm couldn't be improved, then his vitality wouldn't be improved either. The two were related in sequence.

Under the effect of the Breakthrough Stone, Zhu Wuyang's vitality increased at an extremely fast speed. In just a few minutes, Zhu Wuyang's vitality increased from 0.66 to 0.76, which was double the previous amount.

Zhu Wuwan could clearly feel the improvement in her overall attributes. Strength, speed, reaction, defense...All of them had increased by quite a bit, and their physical fitness had reached 0.76. It was definitely outstanding among the first-year students. It was not bad even among the second-year students.

If it increased by another 0.04, Zhu Wuwan would be considered an elite among the third-year students and would be able to attend some second-rate or third-rate universities.

The Host's parents 'greatest hope for the Host was that one day, the Host would be able to attend a second-rate university. However, the Host had a good mentality and thought that her talent was good. In the future, she would definitely be able to cultivate her vitality to above 0.9 and enter a first-rate university in the Milky Way Federation.

After the upgrade, Zhu Wuwan flipped through the high school textbooks here and realized that the Host was not only bad at cultivation, but she was even worse at cultural studies.

He did not know who gave the Host and her parents the courage to be so arrogant. Fortunately, he came. Otherwise, the hope of the Wang family would be destroyed forever.

"Ding, ding, ding..."

Hearing the familiar yet unfamiliar ringtone, Zhu Wuwan was a little speechless. What era was the Huaman Multiverse in now? To still use such a school bell? He really had not changed his mind.

Picking up the Host's bag, Zhu Wuyang walked out of the school according to the Host's memory.

At this moment, hundreds of meters away from the original owner, the original owner's three sisters, Wang Fengjuan, Wang Gainan, and Wang Panpan, were tugging at each other.

From the names of the three sisters, it could be seen that the original owner's parents were very sexist. Other than the first daughter's name, which was a little normal, the names of the other two daughters were related to hoping for a boy.

Wang Gainan hoped that his next child would be a boy and not a girl, but the third child would still be a girl.

Therefore, the third girl's name was Wang Panpan. She hoped that the boy would come soon. This time, her dream came true and she indeed gave birth to a boy. Hence, she had the original owner's name.

Wang Debao!

The Wang Clan had finally obtained a treasure. It was truly not easy. It simply made one shed tears.

Zhu Wanwan was also quite speechless at these names. However, although the names of the family were a little low and had a strong local flavor, they were not futuristic at all. Regardless of whether it was the original owner or his three sisters, they were all quite good-looking.

The eldest sister, Wang Fengjuan, was fair and gentle, the second sister, Wang Gainan, was cold and pure, and the third sister, Wang Panpan, was lively and cute. Unfortunately, the three girls were born rather thin and weak, and their cultivation progress was very poor. Their vitality was only a little higher than the original owner, but they were two or three years older than the original owner. They were considered to be relatively poor among their peers.

Not only the Host's three older sisters, but even their parents were rather thin and weak. The money saved by the whole family was used on the Host's cultivation.

As the saying goes, the poor are scholars and the rich are martial artists. In this future world, it was the same. In order to support the original owner's cultivation, the family often ate the free food provided by the government. The nutrition contained in these foods was only enough for an ordinary person's daily needs. If they were to be slightly active, they would not have enough nutrition, let alone cultivation.

The original owner's family was just an ordinary family. It was already not bad to be able to support four children. Moreover, there was a cultivator among them. Their lives would naturally be a little tight, and they would be a little unfriendly to girls.

At this moment, the three sisters were discussing the original owner, Wang Debao. Among them, Wang Gainan and Wang Panpan were obviously very annoyed.

Chapter 960: Repented (1) Chapter 960: Repented (1) "It wasn't easy for me to save up some pocket money. I originally wanted to take you to eat spicy hotpot. Why did I call that bastard!"

Wang Panpan pursed her lips with a face full of reluctance. Clearly, she was quite dissatisfied with her eldest sister Wang Fengjuan's request.

Wang Gainan also nodded and said, "Pan Pan and I saved money for more than half a month. We only saved a few dozen credits. It's just enough for the three of us to eat. Once we call that bastard Wang Debao, no one can eat much."

"Yes, yes." Wang Panpan said angrily, "Every time there's delicious food, Wang Debao will snatch it. We didn't have much originally and gave him most of it. He still wants to snatch ours, causing us to often not be able to eat it. I hate this little bastard the most."

Wang Fengjuan smiled bitterly. "Actually, my younger brother is also quite miserable. You know our family conditions. Even if his parents dote on him, he only slightly improves his diet every month. Most of the time, he eats the same as us."

"Moreover, in order to make him successful, his parents are so strict with him. In fact, he has suffered no less than us. Since there's such an opportunity, let's call him."

"Humph ... What kind of suffering is Wang Debao suffering? It's not even as much as the suffering we suffer when we go to work part-time on the weekends." Wang Gainan's eyes widened. "And we can also endure that kind of hardship. Big Sister, your talent is the best, several times better than Wang Debao. If you were to walk the path of cultivation, your current achievements would definitely far surpass Wang Debao. You might even be able to get into a second-rate university."

Wang Panpan also nodded in agreement. "That's right. Which one of us three sisters is not more talented than him? In the end, he embarked on the path of cultivation. What else is he dissatisfied with? He always bullies us and wants to snatch everything from us. Mom and Dad have always been biased towards him. Now, many people are saying that the three of us are Voldemort."

"Sigh ... What kind of Lord Voldemort are we? Our daily food and clothing are basically given by our parents, and we didn't give anything to our brother." Wang Fengjuan said helplessly as she continued to try to persuade her two younger sisters who had a lot of opinions about the original Wang Debao. "Voldemort is the kind of person who gives most of his money to his younger brother after working, or even worse. We don't have jobs, and it's not easy for our parents. It's already good enough for our family to support one Practitioner. How can we afford to support a second one?"

"You all know how hard it is for our parents to support our younger brother's cultivation. They often go to work part-time in the middle of the night. It's dirty, tiring, and dangerous. Even if we can't share our parents' worries, at least we won't cause trouble. Our younger brother is still young. As his elder sisters, we should give in to him more. In the future, when he grows up, he will be sensible."

After listening to the elder sister's earnest persuasion, Wang Gainan and Wang Panpan were a little soft-hearted and could only agree helplessly.

” Alright, alright. We’ll let him off the hook again. Forget about how he always steals our pocket money and food money. This time, we finally managed to improve our lives, but he’s going to exploit us. ”

“I’m just afraid that if we keep giving in to him, he’ll get worse. I hope he can become more sensible in the future.”

..

As they spoke, the three sisters went to look for the original owner, Wang Debao. In fact, most of the time, Wang Gainan and Wang Panpan were unwilling to leave school with Wang Debao. Only the eldest sister, Wang Fengjuan, was mellow and kind, and had the demeanor of an elder sister. She always took care of the original owner without complaint. The original owner often stole her lunch expenses and occasionally got a little pocket money.

The original owner had the demeanor of a freeloader at such a young age. If Zhu Wuyang hadn’t transmigrated, she would definitely be the nightmare of the three Wang sisters in the future. Perhaps it would be difficult for her to escape from Wang Debao’s shadow for the rest of her life.

Fortunately, Zhu Wuyang had transmigrated. He would correct some of the original owner’s actions and let the original owner’s wishes buried in her heart be successfully realized, far exceeding the original owner’s imagination.

Before she reached the school gate, Zhu Wuyang saw the three cheap sisters chasing after her. Some bad things that the original owner had done naturally appeared in her mind, and she couldn’t help but smile.

Fortunately, the original owner was still young and hadn’t become such a jerk. At least, in his wish, he was quite friendly to his three sisters. Otherwise, Zhu Wuyang would have to do something that he didn’t think highly of.

“Little Treasure, let’s get out of school together.”

The eldest sister, Wang Fengjuan, ran over quickly and walked to Zhu Wuyan’s side. Wang Gainan and Wang Panpan followed reluctantly.

Seeing the three people’s actions and expressions, Zhu Wuyang vaguely guessed something. He smiled and shook his head.”No need. I’m going to the park to cultivate. You guys can go back first.”

“Uh ...”

Zhu Wuan's words surprised the three sisters. Did the sun rise from the west today? Wang Debao actually knew how to cultivate. Moreover, his actions and demeanor seemed to be a little different from usual.

"We're going to eat spicy hotpot. Do you want to join us?" The eldest sister, Wang Fengjuan, took out her trump card. Usually, as long as she said that she wanted to eat delicious food, Wang Debao would definitely be the first to respond and do his best to finish all the delicious food, leaving only some leftovers for his three sisters.

Zhu Wuan's reaction was once again beyond the three sisters' expectations. "You guys go eat. I'll go home for dinner after I finish cultivating."

"Ah..."

This time, the three sisters felt that there was something wrong with their ears. Wang Debao actually said such words. Did he really not want to eat spicy hot pot anymore? Had the greedy bastard changed his personality?

Wang Gainan frowned. "Wang Debao, did your parents give you a large sum of pocket money again? Are you planning to do something bad with it? That's why you don't want to eat spicy hotpot with us."

"That's right. This is not the usual you. Tell me, how much pocket money did you get from your parents? Did you use cultivation as an excuse to cheat them over again?" Wang Panpan also thought of this possibility and questioned Zhu Wuyang along with Wang Gainan.

Zhu Wanhao was a little speechless. It seemed that the change had happened too quickly in such a short period of time that the three cheap sisters were not used to it.

After some consideration, Zhu Wuwan suddenly said, "I'm sorry about what happened before. Someone reminded me today and let me know that I did a lot of things wrong in the past, so I've come to my senses. I'm prepared to cultivate well in the future and do my best to get into a first-class university. You don't have to worry about me in the future."

Although such an excuse was a little stiff, the three cheap sisters were only teenage high school students. They shouldn't have seen through any flaws, let alone think that their younger brother had already changed.

As for the original owner's cheap parents, there was no need to mention them. They had always had deep expectations for Wang Debao and believed that Wang Debao would definitely become a talent. Now, Wang Debao suddenly realized that it was normal for him to study hard.

Read I'm Leveling Up Too Quickly Chapter 961 - 961 Hypnosis (1)

Chapter 961: Hypnosis (1) Chapter 961: Hypnosis (1) Under the shocked and dumbfounded gazes of his three sisters, Zhu Wuwan quickly got on the flying bus and rushed to the nearby park.

It wasn't until Wang Debao had left for a long time that the three of them regained their senses. They looked at each other and saw the shock in each other's eyes.

"What the hell is Wang Debao doing? Just a few words can make him repent. Is he playing with us, or has he thought of some scheme?"

"I feel that it's a little unbelievable. Could it be that he was defeated by someone? Or did he accidentally fall and hurt his head? Will Wang Debao really repent one day?"

"The heavens have eyes. It seems that my younger brother is indeed like what my parents said. He's not an idiot. It's just that because he's younger, he hasn't erupted with his potential. Now that he's awakened, he might be able to soar up to 90,000 miles in the future."

..

The last sentence was obviously said by the elder sister Wang Fengjuan. Wang Gainan and Wang Panpan couldn't help but roll their eyes at her expectations of the original Wang Debao.

The eldest sister was obviously influenced by her parents who valued boys over girls. It was really unbelievable that she would have such thoughts.

Even if Wang Debao was really lucky enough to wake up, with his cultivation talent, unless he fell into the legendary epiphany, how could he soar to the sky in one go?

At this moment, Wang Gainan and Wang Panpan still felt that it was more likely that the Host had encountered something good than suddenly waking up.

However, Wang Debao's departure was obviously a big surprise, causing the two girls to cheer.

"No matter what, that bastard Wang Debao didn't want to go this time, so we can enjoy ourselves. I haven't eaten Tian Xiang Mala Tang for half a year. I really miss the Mala Tang there."

"It's a pity that Big Sister's pocket money was taken away by that bastard Wang Debao. Otherwise, we could have bought two cups of milk tea and enjoyed it together."

..

Wang Fengjuan felt helpless when she saw her two younger sisters had such a strong opinion of her younger brother. Thinking about it carefully, her younger brother had indeed gone overboard. However, they were siblings after all. As an older sister, she had to give in to her younger brother.

When his younger brother grew up, perhaps he would be able to understand his elder sister's good intentions and would never be like this again.

As for waking up and becoming especially good, Wang Fengjuan didn't really think about it.

The three sisters happily went to Tian Xiang Spicy Restaurant to enjoy a rare meal. Zhu Wuwan first went to the nearby park to practice and adapt to her soaring physical fitness. At the same time, she tailor-made a set of boxing techniques for herself according to her physical condition.

Fist of Life!

As the name suggested, this was a set of fist techniques that could fully unleash the advantage of vitality. It was also the most suitable for Zhu Wuwan's body to use. Although it was called a set of fist techniques, it actually included leg techniques, footwork, saber techniques, and sword techniques...It formed a complete system.

With the help of this Life Fist Technique, Zhu Wuyan's combat power could at least sweep across those of the same level. Such a fist technique was considered top-notch in the entire Milky Way Federation. At least, compared to the previous few realms, it was the best fist technique.

In the future, Zhu Wanhao would also learn more about the cultivation techniques and ancient books of this great world. She would spend some time perfecting the following set of fist techniques. Most of the time would naturally be spent on comprehending and fusing with the main body, ultimately achieving the sublimation of the main body.

Looking at the time, it had already been about three hours. On his personal terminal, his parents and elder sister had called quite a number of times. However, Zhu Wuyang had been so engrossed in creating this Life Fist Technique that she hadn't paid much attention to it.

Zhu Wuyang took out her personal terminal and replied to the three people's messages before rushing home.

As an ordinary family, they still had to support their three daughters and the cultivator, Zhu Wuyan. The family's conditions were obvious. They lived in a low-rent house

provided by the government and did not have a house of their own. Moreover, it was a small three-bedroom apartment that was only a few dozen square meters.

One of them was for his parents, one for his three sisters, and one for Zhu Wuyang herself. This was a testament to Zhu Wuyang's status in the family.

When he returned home, Zhu Wuyang realized that everyone in the family was waiting for him to come back for dinner. No one had touched their chopsticks.

The original owner's parents were a pair of middle-aged men who looked slightly old. Their expressions were a little ugly at first, but when they saw Zhu Wuwan return, they immediately revealed smiles.

"Baby, you're back. Come over and eat quickly. Mom made your favorite conch meat today. After eating it, have a good night's sleep. Your physical fitness will improve a lot tomorrow."

"Come over and eat. We've been waiting for you for a long time."

..

Zhu Wuyang smiled and sat down. She looked at the cold faces of Wang Gainan and Wang Panpan and started eating.

After eating a few mouthfuls, Zhu Wuwan felt a little helpless. The original owner's parents had poured a small plate of conch meat into his bowl, and there was basically not much left for the others. This bias was too exaggerated.

She wanted to stop him, but the conch meat had already been poured into the bowl. She couldn't just pour it back. Moreover, from the expressions of her three sisters, it was obvious that they were already used to it.

Forget it. He didn't have to care about such a small matter. Soon, he would be able to earn money for his family. By then, it wouldn't be too late to improve the living conditions of his family.

After dinner, Zhu Wuwan returned to her room, took out her personal terminal, and went online to check on the cultivation methods of hypnotists.

The Milky Way Federation's network was extremely developed. Most of the knowledge could be found on the Internet, including many cultivation methods, and even some rather powerful cultivation methods.

Hypnosis was one of the most profitable and respected professions in the Milky Way Federation. Naturally, there were many people on the Internet who were posting about

the cultivation method of hypnosis. Of course, those who had some practical information had to pay to watch.

Fortunately, the fees weren't expensive. Zhu Wuyang still had some money. The Host originally wanted to save this money to recharge a certain game, but now it was cheap for Zhu Wuyang.

Zhu Wuyang spent a few hundred credits to understand hypnosis in detail. After he finished understanding it, he successfully learned the basics of hypnosis. After cultivating for half an hour, Zhu Wuyang had cultivated hypnosis to a certain level.

According to the Milky Way Federation's classification, with Zhu Wuyang's hypnosis skills at this moment, he could definitely obtain the certificate of a low-level hypnotist.

However, even though he had successfully mastered hypnosis, Zhu Wuyang's mental state was still a little too low, which was not conducive to the use of hypnosis and the spread of fame. Therefore, Zhu Wuyang was prepared to increase his mental state and vitality a little more. This would be quite beneficial for his next money-making plan.

Chapter 962: The Third Stage (1) Chapter 962: The Third Stage (1) In the Milky Way Federation, hypnosis was not like on Earth, where it was mainly used to treat illnesses and save people. The power of hypnosis here was far greater than on Earth, and it had all kinds of incredible power.

It was said that some experts who had cultivated hypnosis to the extreme could hypnotize the dead into living people, hypnotize the living into dead people, and even make animals and plants walk, sit, and sing like humans.

The main driving force of the hypnotism here was the power of the spirit. It used the power of the spirit to hypnotize everything, coupled with some movements, expressions, and words ... It was the effect it should have.

Moreover, when hypnotism reached a certain level, there was no need for words or actions. With the spread of spirit force, a large number of people could be hypnotized.

The reason why hypnosis could become one of the most profitable occupations in the Milky Way Federation was mainly because hypnotists could hypnotize others into deep sleep mode, thereby effectively absorbing the excess energy in the body and promoting the improvement of vitality. It was almost like a panacea.

Moreover, most of the miraculous pills would cause future problems after taking them, but the hypnosis of a hypnotist almost had no future problems. Therefore, many families wanted their children to be hypnotized and then absorb the energy in their bodies to obtain all-round improvement.

Even some cultivators who could enter deep sleep needed hypnotists to hypnotize them into a deeper sleep mode to obtain greater benefits.

There was no limit to the cultivation of the mind, so there was no limit to the need for hypnotists. Even some experts needed the help of hypnotists to force them to advance to a higher level in a short period of time to rest and sleep. From there, they could obtain benefits in all aspects.

In the Milky Way Federation, according to the market, a low-level hypnotist could hypnotize an ordinary person from a non-deep sleep state to a deep sleep state for a few hours. The fee could be more than 1000, and depending on the effect, the highest fee could be 10000 credits.

One credit point here was close to three yuan in China on Earth. One could imagine how shocking the income of hypnosis was.

The Host's parents only earned three to four thousand credits a month after working so hard. However, if Zhu Wuyang's hypnosis skills were good enough and her hypnosis ability was strong enough, she could hypnotize one person every day and her income would be comparable to the sum of her parents' income in a month, or even two to three months.

It was said that hypnotists did not lack money, even the lowest-level hypnotists.

Since he was going to do it, Zhu Wuwan naturally didn't want to be the lowest grade hypnotist. A hypnosis session could only earn one to two thousand credits. If he wanted to do it, he would have to be the strongest among the low-grade hypnotists. A hypnosis session would cost at least a few thousand credits.

With the infusion of the Breakthrough Stone, Zhu Wuyan's spiritual cultivation began to soar. He carefully experienced the improvement and characteristics of his spiritual cultivation, thinking about how to improve it so that it could be suitable for his main body's cultivation and allow his main body to grasp another trump card.

After spending nearly a thousand Breakthrough Stones, Zhu Wuwan finally raised her spiritual cultivation to the third stage of deep sleep. Deep sleep during exercise meant that she could sleep deeply even when she was exercising. Moreover, there would be no problems with her every move.

For example, reaching this stage of deep sleep would allow Zhu Wuwan to fall into a deep sleep while walking. She would constantly absorb excess energy to increase her vitality, and she would be able to avoid all kinds of dangers while walking.

This kind of evasion was far better than ordinary people. It was much more agile than ordinary people. It could even respond to some familiar greetings, but it would not work if it was more than that.

Once one's spiritual cultivation reached this level, the cultivator would be able to cultivate non-stop for twenty-four hours and obtain a huge improvement.

Zhu Wanhao was currently at this stage, and he would use the reason of enlightenment to explain why he entered this stage in such a short period of time. This explanation was very normal in the Milky Way Federation. At most, others would be envious and would not suspect that he had obtained any treasures.

This was because examples like Zhu Wanhao's would happen on Planet Earth every year. The only difference was the length of time they had an epiphany and the size of the benefits they obtained.

Although it was a little shocking to have an epiphany from the beginning to the third stage of deep sleep, there was a precedent of an epiphany on Planet Earth that crossed several small realms. In comparison, Zhu Wuyang wasn't too monstrous. At most, she was just a little outstanding in Yellow Mountain High School.

When the realm of his spiritual cultivation base was exposed, his vitality would naturally soar.

The third stage of the deep sleep spiritual cultivation could be said to complement each other when used to activate the low-level hypnosis technique. It could display the best effect of the low-level hypnosis technique. Of course, the low-level hypnosis technique had to be upgraded to a certain level.

With Zhu Wuyang's comprehension ability and the help of some breakthrough stones, Zhu Wuyang's low-level hypnotism quickly reached its current limit, and he would definitely be able to obtain a considerable effect.

However, Zhu Wuwan didn't dare to immediately use hypnosis to earn money. He still needed to successfully obtain a low-level hypnotist certificate first. Only then could he go out and hypnotize others to earn the corresponding fees. Otherwise, it would be illegal and he would be punished by the Milky Way Federation's Police Security Bureau.

At that time, not only would he not be able to earn money, but he would also be sent in.

Only two to three hours of deep sleep at night was enough to make up for Zhu Wuyang's consumption for a day. The rest of the time was used by him to learn all kinds of knowledge about the Milky Way Federation.

Compared to the previous macro world, it was easier and more convenient to study in the Milky Way Federation. The only drawback was that many of the more advanced knowledge was not cheap, and some of them could not be learned.

The Milky Way Federation was not as generous as the humans in the Mysterious Desolate Great World. Many large forces had the habit of keeping their treasures to

themselves. The most profound and powerful things would be hidden and would not be easily spread.

The human race here was not facing a catastrophe like the human race in the Mysterious Desolate Great World. The human race here was the ruler of the Milky Way Federation. External conflicts were not the main conflict. On the contrary, there were more internal conflicts, which led to the fact that many forces liked to hide.

However, in Zhu Wanwan's opinion, the knowledge that could be seen and bought online was enough for him to cultivate and comprehend for the next hundred years. Moreover, he couldn't remember all of it. There was too much knowledge in the vast Milky Way Federation. It wasn't an exaggeration to say that it was endless.

Under such circumstances, even with Zhu Wuyang's comprehension and photographic memory, it would be difficult for her to grasp all the knowledge, not to mention that she only had a hundred years.

Zhu Wuwan happily wandered in the sea of knowledge, completely unaware of the passage of time.

Chapter 963: Making a fuss (1) Chapter 963: Making a fuss (1) The night passed very quickly, so quickly that Zhu Wuyang had already rushed over before she could react to what had happened.

Zhu Wuwan had already discovered that there were many good things in the Huaman Multiverse that were useful to his main body, and there were many of them.

Zhu Wanhao also discovered that among the worlds conquered by the Huaman Multiverse Milky Way Federation, there were worlds similar to the Dongyuan Continent. Moreover, in terms of level and power, they were not inferior to the Dongyuan Continent. Of course, this did not include the worlds outside the Dongyuan Continent.

After all, the macro world that the East Yuan Continent was located in was extraordinary. There was more than just the East Yuan Continent. Many of the worlds that the Huaman Multiverse had conquered were of a much higher level than the East Yuan Continent.

By the way, over the past tens of thousands of years, the Milky Way Federation had established nearly a thousand cosmic passages on the Myriad World Heavenly Sphere and Earth Star. They had conquered hundreds of worlds, and among these hundreds of worlds, the knowledge and classics of several worlds were useful to Zhu Wuwan, and very useful.

These worlds that had been conquered by the Milky Way Federation had their books plundered. Basically, they were all put online for free viewing or sold. Very few of them were treasured.

After all, the body structure of the humans in the Milky Way Federation was different from the races in these worlds. Most of the cultivation techniques and classics that were suitable for these worlds were not suitable for the humans in the Milky Way Federation.

However, that didn't mean that it wasn't suitable for Zhu Wuyang's main body!

Zhu Wuyan could calmly absorb these knowledge and books to prepare for the next step of his main body's development. Through these books and cultivation techniques, Zhu Wuyan could even vaguely see through the path ahead, which was extremely beneficial to his subsequent cultivation.

Today, Zhu Wuyang didn't go to school. Instead, she applied for leave to go to the Hypnosis Guild to get a low-level hypnotist certificate.

Zhu Wuyang didn't tell the original owner's parents and three sisters about this. She would tell them after everything was done, lest they thought it was fake and had to explain for a long time.

On the way to the Hypnosis Guild, Zhu Wuwan suddenly thought of something. In the entire Yellow Mountain High School, there didn't seem to be a single student who had obtained a low-level hypnotist certificate. Even among the teachers, there were very few who had obtained a low-level hypnotist certificate.

Being a hypnotist here was not easy, and the difficulty of the assessment was also very high. It was ten times or a hundred times more difficult than on Earth, which was why it was so popular and the income was not ordinary.

The Hypnosis Guild was dozens of stations away from Zhu Wanyou's house. It was quite far away and was located in the city center. It occupied an area of thousands of square meters and looked extremely imposing.

From the building of the Hypnosis Branch, one could see how wealthy the Hypnosis Guild was. It was definitely not something an ordinary organization could compare to.

The front desk was filled with young and beautiful girls. They were at least 80 points good-looking and had good academic qualifications.

Although the salary of the front desk of the Hypnosis Guild was not too high, it could not withstand the contact of a large number of official hypnotists. Every official hypnotist was a symbol of tall, rich, and handsome. Even the lowest level hypnotist only charged 1,000 credits for one hypnosis.

A thousand credits per session was enough to hypnotize him at least three times a day. Even if he hypnotized him three times, it would still cost 3,000 credits. In a month, he could easily get close to 100,000 credits. On Earth, he would have a monthly salary of

more than 200,000 and an annual salary of more than 2,000,000. One could imagine how attractive he was.

Even in the huge Jiangnan District, with a population of over a hundred million, the status of hypnotists was above the middle and upper levels. This was only a low-level hypnotist. The status of a mid-level hypnotist was far higher than that of the rich people on Earth.

Under such circumstances, there were naturally a large number of high-quality girls who wanted to become the girlfriend of a hypnotist or even marry a hypnotist. One could imagine the attractiveness of the front desk of the Hypnosis Guild.

When they saw Zhu Wuan walk into the Hypnosis Guild, they saw that he was young, handsome, and dressed in average clothes. Most of the receptionists looked rather calm, and their eyes lit up slightly. Although the chances of such a young boy being an official hypnotist were very, very small, almost negligible, it was still possible to not stand up to his appearance, but it was also pleasing to the eyes.

“Welcome!”

A greeter smiled and invited Zhu Wuyan in. Zhu Wuyan nodded and went straight to one of the counters. There was a pure girl sitting behind it. “I want to apply for the low-level hypnotist assessment. Can I do it today?”

“Ah...” The young lady at the counter was stunned, as if she hadn’t heard what Zhu Wuyang said. Zhu Wuyang asked again before she came back to her senses. She looked at Zhu Wuyang’s high school uniform in disbelief. “You... Do you really want to apply for the low-level hypnotist assessment?”

“Yes.” Zhu Wuwan nodded.

“Are you sure?” The young lady at the counter confirmed again. She had been working for several years and had never seen such a young candidate.

Although there would occasionally be some people who did not meet the requirements to try their luck, those who tried their luck basically had a certain level of strength. If they did not have any strength and wasted the time and energy of the Hypnosis Guild, they would be punished. The Hypnosis Guild was not a small force in the entire Milky Way Federation, and no one dared to offend them.

Zhu Wuan was a little speechless. “I’m sure. I’m sure. Hurry up and fill in the form.”

“Okay, okay, okay. I’m sorry. You’re too young. I can’t believe it.” The young lady at the counter hurriedly took out a form and handed it to Zhu Wuyang, who began to fill it out.

When the counter ladies at the side saw this scene, they were surprised. Many of them revealed mocking gazes. Clearly, they did not believe that Zhu Wuyang, who was so young, had the strength to take the low-level hypnotist examination. They thought that he was here to cause trouble. When the time came, they would probably suffer a little.

However, although they thought so in their hearts, no one said it out loud. Everyone had this bit of professionalism, but soon their expressions became a little strange.

There was no other reason. The chattering of the pure and innocent counter lady surprised the idle front desk staff.

“Seventeen years old. You’re only seventeen years old this year. You’re still in your first year of high school. You’re really too young...You’re young.”

“My spiritual cultivation has already reached the third stage of deep sleep. I can enter deep sleep even when I’m exercising. Moreover, I’m about to break through to a higher realm. Is this true, you ... You can’t write this kind of information randomly, or our Hypnosis Guild will punish you ... You didn’t write anything?”

“Oh my god, even among all the high school students in Jiangnan District, there shouldn’t be many who can achieve such a spiritual cultivation. I don’t think I’ve ever heard of such a powerful high school student. Your spiritual cultivation base is so terrifying, so your vitality should have reached an extremely high realm, right? No wonder you can take the hypnotist certificate.”

..

Chapter 964: You Never Came In (1) Chapter 964: You Never Came In (1) The words of the pure and innocent receptionist made more than a dozen beautiful and pure receptionists pricked up their little ears and listen to what was happening here.

However, very few people showed a surprised expression. Most of the front desk’s expressions were skeptical and speechless. They wondered if this freshman was here to provoke their Hypnosis Guild. He actually provided such unreliable information.

However, under Zhu Wanwan’s insistence, the pure department counter lady still brought the information to the assessment instructors’ office behind them and handed the information to one of the assessment instructors. This assessment instructor was an official low-level hypnotist, and he was even a relatively powerful one. His spiritual cultivation had also reached the third stage of deep sleep.

After reading the information, the assessment instructor named Ma Jingang widened his eyes.” It’s true. Someone isn’t deliberately causing trouble. A seventeen-year-old candidate, a first-year student, and his spiritual cultivation has reached the third stage of deep sleep? ”

" Yes, I've confirmed it with him again and again. I also told him clearly that there would be punishment if he filled in fake information, but he still wrote it and asked me to submit it. " The innocent counter lady said seriously, and at the same time, she tried to shirk all responsibility.

"It's been a long time since anyone dared to mess with our Hypnosis Guild like this." Ma Jingang smiled. " If it's another one who lied to us, I won't show mercy even if he's a high school student. I must punish him today. Let him come to the assessment room. "

The pure and innocent counter lady nodded and went to call Zhu Wanhao in.

Zhu Wanhao followed behind the counter lady of the pure department and arrived at the assessment room. The moment she entered, she saw the cold-faced examiner, Ma Jingang."Hello, Examiner Ma."

"Is it the certificate you want to take the low-level hypnotist examination for?" Ma Jingang asked.

Zhu Wuyang nodded.

" Is the information you submitted true? " Ma Jingang asked. " Your spiritual cultivation has already reached the third stage? "

"Indeed." As she spoke, Zhu Wuwan's spirit force fluctuated and she instantly fell into a deep sleep. At the same time, she was practicing a set of boxing techniques that she had to learn in high school.

Ma Jingang was stunned when he saw Zhu Wuwan's actions. He immediately widened his eyes and observed carefully for a moment. He was shocked to find that Zhu Wuwan had indeed entered a deep sleep while exercising. This was something that could only be done when one's spiritual cultivation had reached the third stage of deep sleep.

Zhu Wuan was not lying. He indeed had such a powerful spiritual cultivation base. It seemed that not only was it not inferior to him, but it was even slightly stronger than him.

Ma Jingang had spent nearly a hundred years to enter the third stage of deep sleep a few months ago. He had also improved his low-level hypnotism to the next level. Every time he went out to hypnotize, he could get a high price of eight to nine thousand yuan.

Even so, he felt that it was not bad. However, compared to Zhu Wuwan, who had raised her spiritual cultivation to the third stage of deep sleep at the age of seventeen, it was really nothing.

"Hiss..."

Ma Jingang couldn't help but gasp. He said excitedly, "" Alright, alright, that's enough. I didn't expect you to be able to raise your spiritual cultivation base to such a level at the age of seventeen. It's simply unbelievable. "

" Such a cultivation of the spirit has indeed reached the prerequisite of mastering hypnosis. However, even so, it is not easy to truly master low-level hypnosis. Otherwise, those who have reached a certain level of cultivation of the spirit can become hypnotists. Now, you can hypnotize me. Let me confirm your cultivation of hypnosis. "

Zhu Wuyang smiled but did not say anything. He did not answer Ma Jingang's question, nor did he use hypnosis. He just looked at him quietly.

What did he mean?

" What? " Ma Jingang was a little stunned. " Student Song, why aren't you using hypnosis? Why are you standing there? "

"I've already used it." Zhu Wuyang said with a smile.

" What? " Ma Jingang was stunned. " You've already used it? But why don't I feel anything? "

No matter how weak a hypnotist was, they would at least cause some commotion. However, he clearly did not detect any signs of spiritual fluctuations, let alone any other feelings.

Could it be that this guy was playing with him?

Before Ma Jingang could get angry, he saw Zhu Wuyang in front of him smile slightly and make a gesture of invitation. Then, while Ma Jingang was dumbfounded, another Zhu Wuyang walked in from outside. The two Zhu Wuyangs looked exactly the same, like twin brothers.

No, even if they were twins, they would not be so similar. They could no longer be explained as twins. They were clearly the same person.

Ma Jingang was enlightened. He looked at Zhu Wuyang in disbelief, who had just walked in from outside. "You...You hypnotized us from the beginning?"

"Yes." Zhu Wuwan smiled and nodded. " I activated the hypnosis spell when the receptionist entered. Actually, I didn't enter the assessment room. It was all you guys talking to a phantom. "

As he spoke, Zhu Wuyang released Ma Jingang's hypnosis. Ma Jingang watched helplessly as Zhu Wuyang, who he had been talking to, disappeared like a bubble.

F * ck!

Ma Jingang was a little dumbfounded. What kind of hypnosis was this? It could actually hypnotize a low-level hypnotist like him.

Didn't this mean that Zhu Wuyang's hypnosis skills were above his? She was already the strongest among the low-level hypnotists. Otherwise, he wouldn't have fallen for it either.

One had to know that it was much more difficult to hypnotize other hypnotists, especially those of the same level. However, Zhu Wuyang had hypnotized him so easily without him noticing.

With such hypnotism, not to mention an official low-level hypnotist, he would probably become an intermediate hypnotist very soon after his spiritual cultivation increased.

Ma Jingang was speechless for a moment. This was a seventeen-year-old low-level hypnotist, and a first-year student at that. His hypnotism skills were so amazing. In the entire Jiangnan District, there were probably not many people who were as monstrous as him.

Once he reported it, the guild would definitely reward him.

At the thought of this, Ma Jingang couldn't help but take a deep breath and give Zhu Wuwan a thumbs up. "" Impressive, impressive. You've successfully passed the test. We'll go through the procedures to become an official hypnotist now. From now on, you'll be an official member of our Hypnosis Guild. "

Ma Jingang could not help but start to use honorifics when facing a prodigy like Zhu Wuwan. He did not feel much jealousy and was quite a decent person.

If it were any other hypnotist, they would have thought of something else when they saw how amazing Zhu Wuyang was. They might even do some petty tricks. It was inevitable that they would be envious, jealous, and resentful. However, Ma Jingang clearly did not.

Chapter 965: 8888 Chapter 965: 8888 When Zhu Wuyang was talking to Ma Jingang through hypnosis, the dozen or so receptionists of the Lotus Picking District Hypnosis Guild saw Zhu Wuyang leave. They couldn't hold it in any longer and exploded.

" I can't take it anymore. I can't take it anymore. Lord Ma Jingang is going to teach Huang Ning a lesson this time. He actually brought such a little guy to cause trouble. Lord Ma Jingang is probably going to be so angry that his nose is crooked. "

"A seventeen year old low level hypnotist, although our Milky Way Federation has such a record, which one doesn't appear once every few decades or centuries? How could it just happen to appear in our lotus picking area, it's a little too unbelievable."

“It would be fine if it was everyone’s background, but from that guy’s clothes, it’s obvious that he doesn’t have such a prominent background. He’s just an ordinary family. How could he nurture such a prodigy?”

” However, he said it so confidently that Huang Ning was stunned. Just thinking about it makes me want to laugh. ”

..

The group of receptionists were teasing each other when they heard footsteps behind them. They quickly shut their mouths and winked at each other. They were all thinking, Look, he came out so quickly. Clearly, he had been exposed by the assessment instructor, Ma Jingang. They wondered how he had been dealt with.

“Student Song, please wait for a moment. We will immediately apply for your low-level hypnotist certificate. We won’t make you wait any longer. Next, you will be able to walk as an official hypnotist. Thank you for becoming a member of our Hypnosis Guild.”

Ma Jingang’s slightly respectful voice came from behind at this moment, causing the expressions of the ten or so beautiful receptionists to change as they widened their eyes in disbelief.

This ... What was going on?

Could it be that the little fellow had passed Teacher Ma Jingang’s assessment and had truly advanced to become a low-level hypnotist? How was this possible?

Although they didn’t believe it, they still watched as Ma Jingang personally applied for Zhu Wuyang’s official hypnotist certificate and came out on the spot. He didn’t let Zhu Wuyang wait for three days according to the procedure.

Not only that, but in the information that was given to Zhu Wuwan, it was written that Zhu Wuwan was an expert whose spiritual cultivation had reached the third stage of deep sleep. Her hypnosis skills had already reached the peak of a low-level hypnotist.

Just this comment alone was enough to make the cost of Zhu Wuyang’s hypnosis skyrocket to more than 8,000 to 9,000, or even the peak of 10,000.

Upon seeing all of this, the entire Hypnosis Guild’s front desk fell silent. For a moment, no one made a sound. Many of the young and beautiful front desk staff looked at Zhu Wuan with colorful gazes.

This wasn’t a Diamond Huang Laowu. This was clearly a walking banknote!

Rich, young, handsome, with a bright future...She really wanted to kneel under his jeans.

If Ma Jingang wasn't by Zhu Wuyang's side, these beautiful receptionists would have already rushed up to add him as a friend. Unfortunately, Ma Jingang didn't give them the chance. Seeing Ma Jingang personally send Zhu Wuyang away, the receptionists sighed helplessly.

It was a pity that he did not seize such a good opportunity. He really regretted it just now.

After obtaining the approval of the Hypnosis Guild, Zhu Wuyang immediately posted her information on the official website of the Milky Way Family Tutor to accept employment related to hypnosis. As for the cost of one employment, Zhu Wuyang marked it as "

8888!

In other words, hypnotizing a person would cost 8888 credits, which was only a little more than 1,000 credits away from the peak of 10,000 credits.

This price was already the highest among the low-level hypnotists in the lotus-picking area. Those who could exceed this price were the low-level hypnotists who had been famous for a long time, or the intermediate hypnotists who were above the low-level.

However, Intermediate Hypnotists basically didn't take on jobs that were below 10,000 yuan. They hypnotized people who had reached a certain realm. What they needed wasn't deep sleep, but hypnosis that allowed the Intermediate Hypnotist to hypnotize them to a higher spiritual level for a short period of time.

That kind of hypnosis was called meditation hypnosis!

The hypnosis that Zhu Wanwan had just used was called sleep hypnosis. It was to hypnotize the employer into a deep sleep mode, and in the deep sleep, the employer would efficiently absorb the excess energy in the body to achieve the growth of vitality.

After hanging up, Zhu Wuan originally thought that no one would hire him for a short period of time. After all, in his information, he was only seventeen years old.

However, Zhu Wuyan had clearly underestimated the evaluation of the Hypnosis Guild in the information. Although Zhu Wuyan was only seventeen years old, the information that Zhu Wuyan posted had the Hypnosis Guild's evaluation of him. This could be found on the Hypnosis Guild's official website.

Because of this evaluation, only three minutes later, someone placed an order for him. Zhu Wuyang's personal terminal immediately received the message.

Half a minute later, another person placed an order. As long as Zhu Wuyang clicked to accept the order, she would receive half of the deposit. After the order was completed,

she would receive another half of the deposit. The Galaxy Education Network only charged a small handling fee.

In less than ten minutes, six people had placed their orders. As long as they completed these orders, Zhu Wuwan would be able to earn nearly 40,000 credit points, which would also be the income of the original owner's parents for one to two years.

In just one day, he had earned the original owner's income for one or two years. One could imagine how much money a hypnotist made.

Zhu Wuyang, who had originally wanted to go home and continue learning, decided to finish these orders first. She would talk about other things after she had money in her hands. She wouldn't panic if she had money in her hands. Only when she had money could she live comfortably and be able to browse some advanced knowledge online.

Zhu Wanhao immediately took the flying transport to the first employer's house. At the same time, she instantly calculated a suitable and convenient path that would allow her to visit all six employers.

Soon, they arrived at the first employer's house. This was a well-to-do family. The person who wanted Zhu Wuwan to hypnotize was their daughter, who was still in the third year of junior high school. They wanted their daughter to work hard and get into a good high school as soon as possible.

Seeing that Zhu Wuyang was younger and more handsome than they had imagined, the parents of this family were a little suspicious. Only the eyes of the girl who was ready to be hypnotized began to shine.

Zhu Wanhao didn't waste any time. He came up and smiled at the girl. The girl couldn't help but be stunned for a moment before she fell asleep with a smile. The girl's parents were a little stunned when they saw Zhu Wanhao let their daughter fall asleep so easily.

The girl's father reacted faster. He quickly took out the device to test the quality of his daughter's sleep and stuck it on his daughter's forehead. Immediately, a number that shocked the couple appeared on the device.

96 points!

Sleep quality was divided into 0 to 100 points. According to the Milky Way Federation's classification, 80 points and above was considered deep sleep. The absorption and digestion effect was quite good, not to mention 96 points!

Chapter 966: Spoiling (1) Chapter 966: Spoiling (1) The middle-aged couple was stunned when they saw the numbers on the device. In their memory, their daughter had never gotten such a high-quality deep sleep.

Even though they had once asked a low-level hypnotist to hypnotize their daughter, their daughter's deep sleep quality had only reached 90. Even so, the couple was already very happy.

However, the hypnosis expert that the two of them had hired, who looked to be only in his teens, actually managed to hypnotize their daughter to a deep sleep of 96 points.

Even in the vast lotus-plucking area, there were probably not many low-level hypnotists who could achieve such strength.

The couple, who had thought that the hypnosis was too fast and that the quality might not be good, were speechless at this moment.

After a moment, he came back to his senses and hurriedly thanked Zhu Wuwan.

"Thank you, Mr. Wang. Mr. Wang is really amazing. He can actually hypnotize such a high-quality deep sleep in an instant."

"We will often place orders for Mr. Wang in the future. Mr. Song, please accept it."

..

Zhu Wuwan nodded and accepted the rest of the money. She left the place and headed to her next employer.

Everyone knew that the better the quality of deep sleep, the faster and better the absorption of energy during the process of deep sleep. Naturally, the faster one's vitality would increase, and the foundation would be quite stable.

Therefore, a powerful hypnotist could earn far more than the normal market.

With Zhu Wuyang's current mastery in hypnosis, even if he wanted to hypnotize a hypnotist of the same level, Zhu Wuyang could make the quality of the deep sleep reach above 90, let alone hypnotize some ordinary students. The quality of the deep sleep was at least above 95.

Although the quality of deep sleep was theoretically 100 points, even if a high-level hypnotist were to do it, it would be very difficult for him to make an ordinary person have a deep sleep with a quality of 100 points. Most of them would only be around 98 points.

As for the low-level hypnotists, it was needless to say that they could reach 90. The number 96 was something that they could only dream of. Only the top batch of low-level hypnotists could reach it.

In other words, Zhu Wuwan's mastery of hypnosis had already reached the peak of the beginner level, and she was only a step away from the intermediate level of hypnosis.

However, the improvement of hypnotism did not only depend on skill, but also on one's own strength. Before one's spiritual cultivation reached the fixed realm, it was basically impossible for Zhu Wuwan to become an intermediate hypnotist.

Soon, they arrived at the second employer's house. This employer was a fat businessman. The person he wanted to hypnotize was his little lover. He hoped that his little lover would be able to break through the dust together in the third year of high school and get into a good university.

When he saw how young Zhu Wuwan was, he was still rather suspicious of Zhu Wuwan's strength. However, when he saw Zhu Wuwan hypnotize his little lover so casually, and after the test, the quality of her sleep was also as high as 95 points, the middle-aged fat merchant was also extremely shocked. He immediately placed a second order and also placed it on Zhu Wuwan.

Then, the fat merchant even enthusiastically wanted to ask Zhu Wuyang to stay for dinner, but Zhu Wuyang, who was busy making money, ignored him and rushed to the next place.

After spending a few hours, Zhu Wuyang completed ten orders. During this period, most of the time was spent on the road. Otherwise, Zhu Wuyang would definitely be able to hypnotize more people.

However, the completion of these ten transactions had brought Zhu Wuwan more than 80,000 credit points. It was equivalent to three to four years of her parents' savings. It was definitely not a small amount in the Wang family.

After receiving the money, Zhu Wuyang looked at the time and saw that it was already noon. Usually, the original owner's parents would go home for lunch at noon so that they wouldn't have to spend money to eat at the factory. It was just nice to go back and improve the life of the family.

Zhu Wuyang could also take this opportunity to show off her strength. It would be much more convenient for her to do many things in the future.

When he returned home with an income of more than 80,000 yuan, he saw the surprised eyes of the original owner's parents.

"Baby, why are you back? Aren't you in school today?"

"Did something happen? Baby, let Mommy take a look. Are you hurt?"

..

Looking at his parents' dotting looks and listening to their worried words, Zhu Wuwan felt a little helpless. The original owner's parents really doted on Wang Debao too much. No wonder Wang Debao had developed such a personality. There was a reason for this.

If it weren't for the fact that the Wang family's conditions were ordinary, Wang Debao would definitely have become a profligate son of a rich family, or even worse, given how much the original owner's parents doted on him.

Even so, the current Wang Debao often bullied his three sisters, cheated money, stole money, and caused trouble. He was also not a good guy.

Under such circumstances, the original owner's parents still doted on him to the extreme, allowing him to do whatever he wanted. They really doted on him to a certain extent.

Fortunately, the original owner was finished and Zhu Wan'an had come over. Otherwise, the Wang family's future would definitely be very difficult, and the subsequent development would not be what the original owner's parents wanted to see.

"There's something I want to tell you."

Zhu Wuyang looked at the Host's parents and said seriously.

"What is it?" The original owner's mother asked hurriedly. The original owner's father also looked at Zhu Wuyang with a puzzled expression.

"When I was in class yesterday, I was scolded by some classmates and was provoked. I accidentally fell into an epiphany and was enlightened for a few classes in one go," Zhu Wuwan said.

"During this period of time, my spiritual cultivation base skyrocketed and I reached the third stage of deep sleep in one go. In other words, I can sleep even when I'm exercising, and I'm only half a step away from a higher level.

"Other than that, I've also mastered the basics of hypnosis that I've learned before during my epiphany. I've reached the peak of a low-level hypnotist. Today, I went up to get an official hypnotist certificate."

..

As soon as she finished speaking, the original owner's parents were stunned. After a moment, both of them laughed.

"Baby, what are you talking about? Why can't we understand? Don't joke with us. Hurry up and finish your meal. We still have to go to work later."

“Those bastards in your school scolded you. Mom will take a leave of absence in the afternoon. We will go to school to look for them and let the teacher judge them. Our baby is so honest and hardworking. Why did those guys scold our baby and even provoke him? ” And what are your three sisters doing? How dare they let others scold you? Aren’t they in the same school as you? Why aren’t they here to protect you and teach those bad guys a lesson? No, I’ll call Wang Fengjuan and Wang Gainan right now and ask them to stand up for you in the afternoon and teach those bastards a lesson.”

..

Chapter 967: The Heavens Have Eyes (1) Chapter 967: The Heavens Have Eyes (1)
Seeing that not only did the original owner’s parents not believe him, but they also flew into a rage and wanted to stand up for Zhu Wuyang, Zhu Wuyang was also a little speechless. She thought to herself, How could you not know the original owner’s personality? How could you not spoil him so much? No wonder the original owner became like that.

To be honest, although the original owner’s so-called epiphany was a lie, it was true that she was often scolded by others. After all, the original owner’s personality was relatively bad, and she often bullied her three beautiful sisters in front of many classmates. Naturally, she would be hated.

However, on the other hand, it was precisely because they knew that the Host’s three sisters were as beautiful as flowers that the other boys would control themselves when they bullied Zhu Wuwan. They wouldn’t bully her too harshly. At the very least, they would leave her with a chance to breathe and not cripple her.

Therefore, Zhu Wuan’s explanation was half-true and half-false, and it was extremely credible. It also explained the reason for his subsequent personality change.

Seeing that the Host’s parents didn’t believe him, Zhu Wuyang took out her personal terminal and transferred 40,000 credits to him. “If you don’t believe me, take a look at your personal terminal.”

His parents had already heard the notification of the transfer. They looked at their personal terminal and were surprised.

“Baby, this...Where did you get so much money?”

“Did you do something illegal this morning? Otherwise, where would you get so much money? Didn’t Baby tell you to tell us if you needed money? We’ll sell everything we have to support you, but you can’t do anything illegal.”

..

Zhu Wuyang took out the certificate of low-level hypnosis and handed it to the original owner's parents. "I went to take the hypnotist assessment this morning. After the assessment, I started taking orders and earned more than 80,000 credits. So, you guys don't have to work so hard in the future. The income I earn every day is enough for our family to live a good life."

"Let the three sisters start cultivating in the future. I'll pay for their cultivation fees. As for me, you don't have to worry. With my current ability, it's easy to earn money. After my epiphany, my cultivation speed has also increased very quickly."

Seeing these certificates, the Host's parents were struck by lightning and were speechless for a moment. After an unknown period of time, the Host's father cried tears of joy. "It's true. It's actually true. The heavens have eyes. Baby is finally going to soar into the sky."

"I've long said that our baby is not a fish in a pond. He'll definitely be able to get into a second-rate university in the future. He was just a little playful before, so he didn't work hard. Once he starts working hard, he'll definitely shock everyone." The Host's mother was in tears. "Baby did not disappoint us. His epiphany lasted for a few hours. I'm afraid he's already ranked at the top of the epiphany records. Moreover, he's also cultivated low-level hypnosis to such a high level. Our Wang family is finally going to be able to escape from the hard times."

"Wuwuwu ... They all said that we doted on our baby too much, but our baby was definitely worth it. We finally saw the light of day and made them not dare to scold our baby anymore. Oh right, I'm not dreaming, am I? Let me pinch you to see if it's true."

..

After confirming the truth of the matter, the original owner's parents finally couldn't take it anymore. They started jumping, crying, and making a fuss. The grievances and sadness that had accumulated for many years suddenly exploded, making Zhu Wuyang sigh a little.

Even though Zhu Wuwan in Parallel World had become like this because of her parents, they really loved the original Wang Debao. That was why they were like this.

Unfortunately, due to the limitations of some traditional ideas, the education of the original owner was not very good. If this continued, the original owner would definitely bite the hand that fed her in the future, and even break the family apart.

Fortunately, Zhu Wuyang had replaced the original owner's identity at this time. With his help, the Wang family would at least not fall apart and would live a much better life than before.

As for his relationship with the Host's family, Zhu Wuyang didn't intend to maintain it too well. He had to leave this place eventually, and his relationship with the Host's family would gradually fade. This way, when he left, the Host's family wouldn't be too sad.

This was also considered Zhu Wuyan's care for the Host's family. As for loving each other like real family, Zhu Wuyan couldn't do it.

Having lived for so many years and experienced so many things, Zhu Wuwan, who had already reached the peak of Dongyuan Continent, could no longer be like those innocent teenagers who would immediately forget their relatives on Earth and acknowledge the people here as their relatives when their parents treated them a little better after transmigrating.

At most, Zhu Wuyang would only fulfill the original owner's wishes and repay those who treated the original owner and him better. Then, she would mainly do her own things.

While she was crying tears of joy, the Host's parents could not help but call their three daughters and ask them to come back quickly. Something big had happened at home.

Although they were quite puzzled, the three filial sisters still hurriedly asked for leave from their parents and returned home.

Seeing their parents still in tears and the calm Zhu Wuyan, Wang Panpan and Wang Gainan, who had always been hot-tempered, exploded again.

"Wang Debao, what did you do this time to make Mom and Dad so sad? Can't you do something proper all day long?"

"Dad, Mom, what's wrong? Did Wang Debao get into trouble again?"

..

"Uh ..." Zhu Wuwan shook her head and thought to herself that the original owner was really not much in the hearts of her three sisters.

The Host's mother raised her hand and slapped Wang Gainan and Wang Panpan's buttocks. "What are you two talking about? The baby is so filial. How could he make us angry? We're happy. We're so happy today that we can't help but want to cry."

"Yes, yes, yes. We are happy." The Host's father nodded and wiped his tears. ""The baby has grown up. We are happy, so we called you back."

The three sisters were stunned speechless. They looked at Zhu Wuwan in disbelief. The doubt in their eyes was clear and full of disbelief.

At the same time, a thought appeared in his mind. Could it be that Wang Debao was lying to his parents again? That was why his parents were so happy. He must have some ulterior motive.

However, what was it that made his parents so excited? It shouldn't be an ordinary matter, let alone the fact that they were so excited that they called the three sisters back.

Moreover, it seemed that his parents were not going to work in the afternoon. This matter was a little big.

So, did Wang Debao do a good thing, or was he doing a bad thing?

Chapter 968: Can't Finish (1) Chapter 968: Can't Finish (1) His younger brother had an epiphany!

A seventeen-year-old prodigy in the third stage of deep sleep!

A seventeen-year-old official hypnotist!

..

The most important thing was that the hypnotism cost 8888 credits, which was equivalent to two months 'worth of his parents' salary. Moreover, the employer was eager to hire him, and his daily income was about 100,000 credits.

The three Wang sisters felt as if they had been struck by lightning. They couldn't believe their ears, and they couldn't believe what they had experienced.

Then, his mother, Shi Huifang, gave him a few hard slaps on the butt. Only then did he come back to his senses and look at Zhu Wuyang in disbelief.

"Little brother, you...Are you lying to us? Is what you said true?"

"Impossible, this is impossible. My little brother can't be so powerful."

"Although this little brother is a hidden dragon in the abyss, but ... But isn't this flying too fast? Is this true?"

..

Looking at her three daughters' incredulous expressions, Shi Huifang smiled and took out Zhu Wuyan's official hypnotist certificate and handed it to her three daughters. "If you don't believe me, you can take a look at this. It's definitely authentic. After you see it, you won't doubt it anymore."

“You can also go to the official website of our Lotus Plucking District Hypnosis Guild and the official website of Milky Way Education to check. There is information about your brother inside.” His father, Wang Tie, also smiled and echoed.

The three sisters hurriedly took the certificate. After looking at it for a while, they logged into the Hypnosis Guild and Galaxy Education’s portals respectively. When they saw Zhu Wuyang’s information on the official website of Galaxy Education, especially after the hypnosis charge of 8888 credits, the three sisters also went offline.

After an unknown amount of time, Wang Panpan was the first to regain her senses. She screamed and rushed towards Wang Debao.” It’s true, it’s true. I didn’t expect you to soar to the sky in one go. I always thought that Dad and Mom were talking nonsense and that your life was over. But I didn’t expect you to be so amazing. You could actually comprehend for so long and obtain such great benefits. ”

“A seventeen year old low level hypnotist, and one of the strongest low level hypnotists. In the entire Yellow Mountain High School, no, in the entire lotus picking area, or even in Jiangnan Province, there probably isn’t a single overwhelming prodigy like him.” Wang Gainan also cheered. ” This means that we won’t have to live a hard life anymore. With this little brother’s strength, we will be able to buy a good house very soon. We won’t have to live in this small and dirty place anymore. ”

Wang Fengjuan cried tears of joy. ” This little brother is too amazing, too amazing. I also said before that this little brother would rise up sooner or later. Now, it seems that it’s true. In the future, our Wang Clan will definitely be able to prosper and live a good life. ”

The three sisters hugged Zhu Wuan and jumped around and made a scene, making Zhu Wuan a little speechless. When the family finally calmed down, Shi Huifang waved her hand and brought the family to a restaurant for a good meal.

During the meal, Zhu Wuwan once again expressed her thoughts. She wanted the three cheap sisters to cultivate together. After all, if there was a chance, who would not be willing to embark on this path of cultivation?

Once he achieved some success, his physical fitness would increase, but the most important thing was his lifespan.

In the Milky Way Federation, the stronger the vitality of a person, the longer their lifespan would be.

The life force of an ordinary person in the Milky Way Federation was around 0.7, which meant that their lifespan was around 100 years. Once it reached 0.8, their lifespan could be increased to around 110 years. A life force of 0.9 meant that their lifespan was around 125 years, and a life force of 1 meant that their lifespan was around 150 years.

Every time one's vitality increased, the cultivator's lifespan would also increase. The higher one's vitality increased, the greater the increase.

Therefore, if possible, who wouldn't want to have a stronger body, a longer lifespan, and a higher status? Even in this high-tech society, the level of vitality often represented the level of status.

It was precisely because of this that when Wang Tie and Shi Huifang forced the three sisters not to cultivate and used all their resources to supply the original owner, the three sisters were so unwilling.

If it were some families with poor sibling relationships, they might have lost their lives.

After all, someone once said that preventing one from living forever was like killing one's parents.

Since the original owner didn't have that ability, Zhu Wuyang helped him complete these things and accepted his soul and body at the same time.

After the meal, the estrangement between the three sisters and the original owner had almost completely disappeared. After all, they were all biological siblings. The three sisters were not vengeful people. Under the guidance of their parents, those conflicts seemed to have disappeared.

Of course, this was also because the few of them were still young and did not have much conflict. Otherwise, it would be difficult to resolve.

After enjoying a good meal, Zhu Wuwan hypnotized the whole family into a deep sleep. They began to digest the excess energy in their bodies, and their physical fitness improved at an extremely fast speed.

Zhu Wuyang continued to surf the Internet, hungrily learning the knowledge on it and making it his own resource.

It was a pity that the physical objects from the foreign world could not be brought to the Dongyuan Continent. Otherwise, Zhu Wuwan would have stored a vast amount of knowledge about the Huaman Multiverse and brought it all back to the Dongyuan Continent to read.

Zhu Wanwan no longer held any hope of mastering all the knowledge in the Milky Way Federation. At the moment, he was only able to see and remember as much as he could. He tried his best to pick out the knowledge and memories that were useful to his main body.

However, there were simply too many good things in the Huaman Multiverse. Even with Zhu Wuyang's comprehension and memory, he would not be able to remember much in a hundred years, even if it was just the good things that were useful to him.

This was one of the best worlds that Zhu Wuwan had transmigrated to. There were good things everywhere, and there were things that were useful to him everywhere.

By the way, because Zhu Wuwan was able to connect with the main body through the special encounter system, her memory and comprehension ability had also inherited the main body's strength. One could imagine how powerful she was.

But even under such circumstances, Zhu Wuyang felt that there was not enough time. There were too many good things in the Huaman Multiverse, and there was simply no way to finish them all.

The Milky Way Federation wasn't the only world in the Huaman Multiverse. There were many other worlds, and there were a lot of good things that could be useful to Zhu Wuyang in those worlds.

These good things were not only about knowledge, but also about breakthrough stones, world origin, and soul power...After all, Zhu Wuan's soul could be brought back to the Dongyuan Continent.

Previously, in the Mystic Desolate Great World, Zhu Wuwan had strengthened his soul by quite a bit, which was the power of his soul. Unfortunately, he did not bring it back completely, but he had brought back about half of it, allowing Zhu Wuwan's main soul to obtain considerable benefits.

Chapter 969: Extraterrestrial Demon (1) Chapter 969: Extraterrestrial Demon (1)
Compared to the Mysterious Desolate Great World, the Huaman Multiverse clearly had more good things. After all, the Huaman Multiverse had many universes to explore, and these universes all had more or less some things that were beneficial to the soul.

Moreover, the improvement of his spirit force also had a promoting effect on his soul. This was one of the benefits that Zhu Wuwan could obtain.

That night, apart from studying, Zhu Wuwan also took on some orders nearby. It took her more than an hour to complete them and she earned tens of thousands of credits.

The next day, Zhu Wuyang continued to ask for leave. Other than not being able to learn much in school, the most important thing was that Zhu Wuyang wanted to earn enough credits as soon as possible so that she could move out of this narrow house and fulfill the original owner's wish as soon as possible to prepare for the follow-up plan.

Although he had only been at work for a day, Zhu Wuyang's reputation had clearly spread. When he woke up the next day, Zhu Wuyang was surprised to find that there were already dozens of orders waiting for him to receive.

The price of a single session of hypnosis seemed expensive, but that was only for ordinary families. For a well-off family, it was fine to use it occasionally. For a small rich family, it was enough to support it once every half a month.

For those wealthy families, hypnosis only cost 8888 credits per session. Ten sessions would only cost about 80,000 credits. Was 200,000 credits a lot?

One had to know that a deep sleep could last for at least ten hours. It could bring a considerable improvement to the hypnotized person. It was really worth it to only increase it by a few thousand credits.

In particular, the quality of Zhu Wuwan's hypnosis was above 95 every time. Basically, there was no hypnosis that was lower than 95. This naturally brought greater benefits to the hypnotized person, so it was very normal for so many people to place orders.

Of course, the most important thing was that there were many people with high spiritual cultivation, but there were only a few people who could obtain a hypnotist certificate, especially those who had reached Zhu Wuyang's level of hypnotism.

The supply was in short supply.

Zhu Wuyang took some orders that were closer to him. In total, there were more than twenty orders.

This number was taken by Zhu Wuwan according to his physical condition. Although his soul power was quite strong, it was limited in other aspects. Although hypnotism mainly relied on spiritual cultivation, it also required the cooperation of other aspects in order to achieve better results.

With Zhu Wuyang's current spiritual cultivation, soul power, and physical strength, hypnotizing twenty people a day was just right. It would not delay him from doing other things.

If too many people were hypnotized, it would inevitably lead to exhaustion of energy. At that time, there would be no way to learn other aspects of knowledge.

Of course, as Zhu Wuwan's vitality increased, the number of people he could hypnotize would increase, and naturally, the credits he would receive would also increase.

Zhu Wuyang could also use the Breakthrough Stone to recover her depleted energy. In this way, she could hypnotize even 200 people a day, let alone 20 people.

However, Zhu Wuwan would not do this if she had no other choice. That would be too eye-catching and would easily arouse suspicion.

By the way, after revealing his strength to his family, the Host's wish had been mostly fulfilled. From this, it could be seen that although the Host was willful and selfish, his family was still very important to him.

If not for this, Zhu Wuyang's actions would not have allowed the Host's wish to be fulfilled so much. This allowed Zhu Wuyang to reach more than 70% of the Host's soul in one go. Only 20% was left to completely fuse with the Host's soul.

Next, as long as Zhu Wuyang's reputation spread and the entire school knew about it, they would look at Zhu Wuyang in a new light. Then, this wish should be fulfilled. At that time, Zhu Wuyang would be able to fuse about 99% of the original owner's soul.

At this point, Zhu Wuyang and the original owner had basically merged into one, and no one would suspect her and bring her death.

After all, the Huaman Multiverse was connected to hundreds of worlds. Many worlds had been conquered or even destroyed by the Milky Way Federation, so it was inevitable that some would slip through the net.

In order to take revenge, these fish that escaped the net would often come to the Milky Way Federation to cause trouble or cause bloodshed. This caused the Milky Way Federation to attach great importance to the possession of other worlds.

Regardless of whether those people from the other world were here to destroy the Milky Way Federation or to spy on the Milky Way Federation, it was obviously not a good thing.

The most important way to distinguish between visitors from other worlds was to check their soul compatibility. Generally, those with a soul compatibility of less than 50% were basically visitors from other worlds.

Even if the soul compatibility was around 80%, it was still possible that they were visitors from another world. Only when the soul compatibility was above 90% could one be sure that they were not visitors from another world.

This was the experience of the Milky Way Federation over the years, and it was also a bloody lesson.

The reason why Zhu Wanhao wanted to fulfill the original owner's wish so quickly was naturally because of this consideration. It was to avoid being discovered if he was unlucky. At that time, he might be treated as a visitor from another world and then killed.

After spending a few hours and completing 20 employment missions, Zhu Wuwan finally returned home with more than 100,000 credits.

The average price of a house in the lotus-picking district was around 3,000 credits. If one wanted to buy a better house, it would cost about 5,000 credits per square meter.

The three-bedroom and two-living-room houses were all over 100 square meters. The down payment was 30%. Whether it was the first or the second house, they would have to save up more than 200,000 credits.

With today's harvest, the money at home was basically enough, so they could go to see the house next.

Zhu Wuan transferred the hundreds of thousands of credits to the Host's mother, Shi Huifang, and told him that this was the income for today. They could start looking at houses today.

When she learned that Zhu Wuan had earned more than 100,000 credits today, Shi Huifang was dumbfounded and could not help but tear up. Many of her colleagues around her were stunned and did not understand what had happened.

After Shi Huifang explained with tears in her eyes, many colleagues around her said, "Fuck." They didn't expect that Shi Huifang's stupid son would suddenly become so powerful.

He earned nearly 200,000 Credits a day. In just two days, he had earned enough to pay the down payment for a three-bedroom apartment in the lotus-picking district. Did he have to be so exaggerated? Was he really Shi Huifang's son and not someone else's son? Why did it feel like a fantasy story?

Many colleagues naturally didn't believe it after hearing it. However, as Shi Huifang took out the photo and the information about Zhu Wuyang on the official website, many people gradually began to believe it.

Then, Shi Huifang got busy again, and Zhu Wuyang was targeted by many girls in this textile factory again...

Chapter 970: What a Pity (1) Chapter 970: What a Pity (1) As the saying goes, people who are not envied are mediocre.

Also, behind every outstanding man, there was a group of women chasing after him!

The always outstanding Zhu Wuwan once again encountered the troubles of many worlds. Girls who pursued him began to appear again, and the growth rate was shocking.

He was still a seventeen-year-old child, but these people still wouldn't let him off. They wanted to break his deep love and single-mindedness and make him walk the path of a scumbag again.

Fortunately, Zhu Wuyang had enough self-control, especially when she thought about how she might not be able to return to these great worlds after a hundred years, which meant that she would not be able to meet her family and friends here again. Zhu Wuyang felt that her heart was as clear as ice, and there was not the slightest ripple in it.

However, if he could come back, Zhu Wuyang might really not be able to grasp it.

After completing today's money-making mission, Zhu Wuyan returned home and began to study hard again, absorbing the essence of the Huaman Multiverse.

After her cheap mother, Shi Huifang, had finished showing off to her colleagues, she called her husband, Wang Tie, to show off all this to him. Coincidentally, Wang Tie's colleagues heard it, so Zhu Wuyang's reputation spread even wider.

After carrying the infamy of being the parents of a good-for-nothing son for more than ten years, Wang Tie and Shi Huifang could finally hold their heads up high. Therefore, the two of them did not hesitate to show off, as if they wanted to vent the anger in their hearts.

There were also the three Wang sisters in school. The eldest sister, Wang Fengjuan, naturally had the same thoughts as her parents. Although the second sister, Wang Gainan, and the third sister, Wang Panpan, were a little embarrassed, they couldn't help but want to share such good news with their classmates.

However, when they heard the three of them sharing, many of the students revealed disdainful expressions.

"Impossible. How could your useless brother become a genius all of a sudden? I don't believe that someone like him could fall into an epiphany."

"You must be joking with us. A few days ago, your brother was still crippled. He didn't even have 0.7 vitality. He was still in the first stage of deep sleep, but now he's in the third stage of deep sleep. He's even an official hypnotist. Isn't this a fantasy?"

"How can it be so easy to have an epiphany? Even if you can really have an epiphany, it's very difficult to improve so much in one go. Pan Pan, you must be playing with us to clear your brother's name. Speaking of which, don't you hate your bastard brother very much? Why are you suddenly speaking up for him?"

..

After hearing what the three Wang sisters said, it was expected that there would be a large number of voices of suspicion. Even though the three Wang sisters opened the official websites of the Hypnosis Guild and Galaxy Education and let them see Zhu Wuan's information to prove this matter, there were still people who were skeptical and even complained that hackers had hacked into these official websites.

The three Wang sisters felt very tired and didn't want to say anything for a moment. However, this matter spread like the wind throughout Yellow Mountain High School. Even some teachers began to hear about it.

Among them, there were teachers who had acquaintances in the Hypnosis Guild and Milky Way Education. After seeing the information on the Internet, they couldn't help but call to ask. Then, they received a piece of news that shocked them.

This was all true!

A seventeen-year-old official hypnotist!

At seventeen, he had already reached the third stage of his spirit cultivation!

Moreover, the hypnotism charge was 8888 credits, and employers were scrambling for it!

..

This news was like a whirlwind, spreading to all the teachers in an instant. Then, it spread even faster to the entire Yellow Mountain High School.

When they received an affirmative answer from the teachers, the students who suspected the Wang Sisters were all stunned. The original owner's classmates and teachers were even more shocked. They never thought that the vampire Wang Debao would actually have a chance to turn the tables.

After confirming this matter, the school's higher-ups held an emergency meeting. On the same day, they followed the three Wang sisters and rushed to the Wang family.

Soon, a few senior executives of Yellow Mountain High School met Zhu Wuyang, including the Host's form teacher, Teacher Wu Xiaoxia.

After a round of home visits, Yellow Mountain High School confirmed this matter once again, and there was no longer any doubt about it. At the same time, Zhu Wuyang also received preferential treatment from Yellow Mountain High School. In the future, the school would no longer care about taking leave and rest.

Because with the strength that Zhu Wanhao had displayed, she could definitely enter any top university in the Milky Way Federation. Her spiritual cultivation had reached the

third stage, and she had even become an official hypnotist. Such an ability was rare even in top universities.

At the same time, these senior executives of Yellow Mountain High School also learned the reason for Zhu Wuwan's sudden rise. It was indeed because of an epiphany. This epiphany lasted for about three classes. During these three classes, Zhu Wuwan underwent a world-shaking transformation.

In order to confirm this, the school even asked the students around Zhu Wuyang at that time. From them, they learned that before Zhu Wuyang's epiphany, there were indeed people who mocked him for being the vampire in the family and would definitely kill his three sisters and family in the future.

After that, Zhu Wuwan stayed in his seat for three classes. During this period, no one paid attention to him. After all, Zhu Wuwan had never been liked by her classmates.

Now that the cause and effect were clear, and Zhu Wuyang's performance at that time was indeed that of an epiphany, the leaders of Yellow Mountain High School no longer had any doubts.

Moreover, they also learned a piece of news that surprised them greatly from Zhu Wuwan's mouth. That was, during the process of enlightenment, Zhu Wuwan's brain had also been developed, and her comprehension had increased quite a bit.

This made the senior executives of Yellow Mountain High School a little confused. They didn't expect Zhu Wuwan to improve so many things in this epiphany. Her spiritual cultivation, hypnosis, and brain...All of them soared.

However, thinking about it, it was normal for him to have comprehended so many things after such a long time. It was not that similar situations had never happened before, but it was just that they were relatively rare.

Moreover, this situation wasn't necessarily good. After all, if Zhu Wuwan's epiphany was in one aspect, she would definitely be able to achieve greater growth in that aspect. For example, if Zhu Wuwan's epiphany was in spiritual cultivation, she might already be an expert in the meditative state now and not still lingering in the third stage of deep sleep.

It was a pity that he could improve himself in all aspects, but it was not a good thing to lack depth.

The leaders of Yellow Mountain High School were both regretful and envious. However, most of them were regretful. According to Zhu Wuyang, his spiritual cultivation had just reached the perfection of the third stage of deep sleep during his epiphany. He was only half a step away from entering the fixed state. This was an extraordinary pity.

Of course, if the epiphany this time was all about brain development, it would also be a great thing. This meant that Zhu Wuwan's talent and aptitude would be able to soar greatly, and not just obtain a portion of the benefits.

Read I'm Leveling Up Too Quickly Chapter 971 - 971 Holding Her Head High (1)

Chapter 971: Holding Her Head High (1) Chapter 971: Holding Her Head High (1)
Therefore, in the eyes of the higher-ups of Yellow Mountain High School, Zhu Wuyang's epiphany this time was quite regretful. It diluted the feelings of envy and jealousy, and more and more people felt that Zhu Wuyang was a pity.

However, no matter how unfortunate it was, this epiphany had made Zhu Wuwan jump from the bottom of Year One to the top of Year One. Even among Year Three students, she was still the top. It could even be said that her overall strength was ranked in Yellow Mountain High School.

It was just that because her vitality had not increased yet, she was still a little lacking in persuasiveness. However, everyone knew in their hearts that with Zhu Wuyang's spiritual cultivation base in the third stage of deep sleep, it was only a matter of time before her vitality increased.

Before they left, the group of senior executives of Yellow Mountain High School reminded Zhu Wuyang again and again.

"Student Wang, now that your spiritual cultivation has improved and you have mastered a money-making divine skill like hypnosis, you should buy more things that are beneficial to the improvement of your vitality and increase it as soon as possible."

"In recognition of Student Wang's hard work, the school has decided to give you a scholarship of 100,000 credits to help you increase your vitality as soon as possible. At the same time, we will open up all the school's books to you. Some of them can't be learned online and belong exclusively to our Yellow Mountain High School."

"If you have any doubts about the improvement of vitality, you can call me at any time. I will explain it to you immediately to ensure that you won't go astray."

..

The school leaders of Yellow Mountain High School weren't stupid. They clearly knew that with Zhu Wuyang's current strength, it was only a matter of minutes before she could get into a first-class university in the Milky Way Federation. Even the top universities would extend an olive branch to Zhu Wuyang.

Zhu Wuyang was destined to be the seed of a top university in the future!

Facing such a promising student, Yellow Mountain High School naturally wanted to win him over so that he could bring glory to Yellow Mountain High School in the future.

This was also to prevent Zhu Wuwan from being pulled away by other high schools. Even in this era, the competition between schools was still extremely fierce, especially in high school. Or rather, it was even more intense than before.

If they could nurture a student who could get into a top university, it would be an honor even for the top high schools in Jiangnan Province, let alone Yellow Mountain High School.

Especially since Zhu Wanhao had just entered Year One, and her spiritual cultivation had already reached such a level. She had even mastered hypnosis. She would definitely not lack funds for her future cultivation.

This meant that Zhu Wuyan would definitely be able to advance rapidly. In more than two years, with Zhu Wuyan's spiritual cultivation, her vitality would at least be able to increase to around 1.

With such vitality, coupled with the fact that Zhu Wuyang had mastered hypnosis, if she was lucky, she might be able to raise her spiritual cultivation to the meditative state before she entered university.

If that was the case, with Zhu Wuyan's comprehensive strength, she would definitely become one of the candidates for Jiangnan Dao's top scorer, or even the global top scorer. If she succeeded, Zhu Wuyan's high school would definitely become famous.

Under such circumstances, any high school would want to have a student with potential like Zhu Wuyang, and Yellow Mountain High School was no exception. Therefore, in order to protect Zhu Wuyang, Yellow Mountain High School had invested a lot.

Although 100,000 Credits was not a lot, it was not considered a small amount either. To an ordinary family, that was a few years' worth of savings. At least, before this, it would have been difficult for Zhu Wuyang's family to save up so much money in ten years.

However, to a hypnotist, even the lowest level hypnotist, it was nothing.

The credit points reward was just icing on the cake. The main reward of Yellow Mountain High School was to provide comprehensive guidance and open all the school's classics to Zhu Wuyang for free.

This meant that Zhu Wuyang would be able to save a lot of credit points. At the same time, he could also obtain a lot of knowledge that could not be found on the Internet, which was quite disadvantageous for his future cultivation.

Apart from that, Yellow Mountain High School would also provide Zhu Wuyang with some actual combat practice and special rewards. In total, they had already surpassed any genius student in Yellow Mountain High School.

Even Zhu Wuwan was a little surprised by his boldness. She didn't expect Yellow Mountain High School to be willing to invest so much for him.

However, this was obviously a good thing. The leaders of Yellow Mountain High School were very sincere, so Zhu Wuyang decided to leave Yellow Mountain High School even if she had to go to university. It was also an honor for Yellow Mountain High School.

After the various school leaders personally confirmed it, the news that Zhu Wuwan had broken through to the third stage of her spiritual cultivation during her epiphany and had even mastered hypnosis was completely confirmed. It quickly spread throughout Yellow Mountain High School and was recognized by everyone.

I'm impressed!

Raise one's head high!

Return with honor!

..

When Zhu Wuyan returned to Yellow Mountain High School a few days later, she was warmly welcomed by thousands of teachers and students. The original owner's wish was completely fulfilled at this moment. 99% of her soul had fused into Zhu Wuyan's soul.

In the future, even if the Milky Way Federation's top equipment were to detect it, they would not be able to detect that Zhu Wuyang was an alien life form. They would only treat him as a native life form.

This was something that the other universes connected to the Huaman Multiverse could never do, as they did not possess the ability to cross over to a parallel world. Thus, even if they possessed a body and were compatible, their soul fusion would not reach more than eighty percent.

Under such circumstances, it was very easy to discover abnormalities and capture them as otherworldly demons.

However, with the help of the more powerful world where the Dongyuan Continent was located, Zhu Wanwan had transmigrated and fused with her own body in the parallel world. Once she fulfilled her wish in the parallel world, she could increase her soul fusion to more than ninety-nine percent.

Under such circumstances, the instruments of the Huaman Multiverse naturally wouldn't be able to detect Zhu Wuyan's abnormality, and Zhu Wuyan could live on with Wang Debao's identity without worry.

Although no one had used equipment to test Zhu Wuyang now, as Zhu Wuyang's reputation grew and his influence grew, there would definitely be such tests in the future, especially in those more critical locations, or when Zhu Wuyang needed to obtain some more important information.

According to Zhu Wuwan's plan, he would definitely be in a more important position in the future, and he would also obtain some more confidential information, so such a check-up was essential.

Therefore, Zhu Wuan had to resolve the hidden danger before that. Otherwise, once it was discovered that Zhu Wuan's soul fusion with the original owner was less than 80%, he would definitely be thought of as an otherworldly demon. At that time, the best outcome would be to be captured and imprisoned.

This wasn't what Zhu Wuwan wanted!

Chapter 972: Pushing Forward (1) Chapter 972: Pushing Forward (1) When the soul fusion rate reached more than 99%, it was basically considered a complete fusion. Zhu Wuwan continued to increase her vitality.

Now that he had enough money, he did not choose to use breakthrough stones to increase his vitality. Instead, he spent money to buy a lot of high-quality spirit beast meat. He used the third stage of deep sleep and spirit beast meat to increase his vitality.

Not only would such an increase not consume Breakthrough Stones, but it would also earn a lot of Breakthrough Stones. Moreover, the increase speed was not slow, and it would not arouse suspicion because it was too fast.

Other than the spirit beast meat, Zhu Wuwan also bought some suitable spirit pills and pills. They were consumed together with the spirit beast meat, which allowed Zhu Wuwan's vitality to increase even faster. It was improving at a speed visible to the naked eye every day.

At the same time, Zhu Wanwan used hypnosis to earn about 200,000 credits every day. Very quickly, she saved up enough to buy a house. Then, she bought a large house that was nearly 200 square meters for her family, completely improving their lives.

His three sisters and his parents also embarked on the path of cultivation. With the help of Zhu Wuyang's hypnosis, the family improved rapidly, and everything was developing in a good direction.

Since she had taken over the original owner's body, Zhu Wuyang would return the original owner's kindness. This way, she wouldn't feel guilty when she left a hundred years later.

Moreover, if Zhu Wuyan's speculation was correct, Wang Debao from the parallel world was himself. This was considered doing something for him.

In just a month or so, Zhu Wuyang's vitality had soared to 0.9 points. This vitality was ranked among the top in the entire Yellow Mountain High School. She could definitely get into a first-class university.

The strong vitality also brought more energy to Zhu Wuwan, allowing him to learn faster and master more and more knowledge and classics.

Other than vitality, Zhu Wuyang did not neglect her combat skills. The combat skills that she had tailored for herself were also the best in the Huaman Multiverse, which could maximize Zhu Wuyang's combat power.

Everyone in Yellow Mountain High School gradually accepted Zhu Wuyang as a genius, and their attitude toward him had undergone a 180-degree change. Now, Zhu Wuyang was one of the top scorers in Yellow Mountain High School and was valued by the entire school.

However, even the school had never expected that the spiritual cultivation of the third stage of deep sleep, combined with spirit beast meat, spirit pills, and so on, could erupt with such astonishing power. In just a short month, Zhu Wuyang's vitality had soared so quickly.

It seemed a little unexpected, but on second thought, it was within expectations. This was because the third stage of deep sleep could at least support about 1.5 vitality points, but Zhu Wuyang's vitality points had only reached about half before.

Previously, Zhu Wuwan had not eaten much spirit beast meat, let alone spirit pills and elixirs. Now that he was suddenly using it, it could naturally produce an astonishing effect, allowing Zhu Wuwan's vitality to soar.

To be honest, this was not Zhu Wuwan cheating. During this period of time, other than using the breakthrough stone to increase his vitality a little, he had also used spirit beast meat and spirit pills to increase it.

The rapid growth of his vitality had also surprised him, so even though he had been discovered, Zhu Wuwan didn't panic.

0.9 Not to mention in school, even in society, it was considered not bad to be able to easily apply to become a police officer, and an elite one at that.

Although the technology and cultivation of the Milky Way Federation were advanced, most people were still ordinary people. Their vitality was only around 0.7. There were not many who reached 0.8, let alone 0.9.

After his vitality stat reached 0.9, the improvement from consuming spirit beast meat and spirit pills was not as fast as before, but the speed was not slow either.

Other than the necessary cultivation time, Zhu Wanwan spent most of her time studying various ancient books and knowledge. Right now, she was just memorizing them in a hurry, preparing to slowly comprehend them when she had time later, or to put some good things in the next great world to comprehend.

After all, Zhu Wanhao only had this one chance to enter the Huaman Multiverse. If possible, he would naturally try his best to obtain more knowledge and books. Otherwise, he would not have another chance.

He would first take note of all these good things and slowly comprehend and integrate them later on. There were too many good things in the Huaman Multiverse, and even with Zhu Wuyang's strength, she couldn't remember too many.

In the process of learning and cultivating, Zhu Wuyan could obtain a lot of breakthrough stones. With the lesson from the previous great world, Zhu Wuyan did not deliberately expand his influence and earn breakthrough stones and the world's origin. Everything went with the flow.

Even so, Zhu Wuyan's speed of earning the world's origin was not considered slow. At least, her speed was considered average among all high-level cultivators.

While learning, Zhu Wuwan was also looking for ways to exert influence on a large scale and pry open the world's origin. This way, before she left, she could give this great world a shocking surprise.

However, the Huaman Multiverse's level of martial arts was also extremely high, and it was not below the Xuan Huang Great World. In just a hundred years, Zhu Wuwan was not confident that he could cultivate to the peak of the Huaman Multiverse.

Therefore, if he wanted to exert influence, he had to take a path similar to the Mystic Desolate Great World. He could not be like those small worlds before, where he would stir up the wind and rain without any scruples and do something shocking at the end.

Since he could not dominate the world with his martial arts, Zhu Wuyang was prepared to use some more elegant methods, such as leaving behind some extremely useful and influential manuals and cultivation techniques for the human race in the Mystic Desolate Great World. In the end, it would have a shocking impact on the Mystic Desolate Great World.

The conditions of the Huaman Multiverse were much better than the human race in the Xuan Huang Great World. The advanced communication meant that Zhu Wuwan's achievements in classics, cultivation techniques, culture, and other aspects could be easily spread throughout the universe. Of course, the prerequisite was that it had to be useful and of quality. Without quality, it would not be able to spread far.

Once it could be spread throughout the Huaman Multiverse, the results would definitely have a huge impact, allowing Zhu Wuyang to obtain a considerable amount of world origin.

Of course, there were other aspects of research that could produce results. Whether it was good research or bad research like drugs, it would eventually bring about shocking influence and stir up the world's origin.

Zhu Wuwan did not care whether the research would bring benefits or disadvantages to humanity. As long as it had an impact, it was fine. Moreover, Zhu Wuwan had transmigrated to a few worlds, and there were some special treasures in those worlds that could be produced in the Huaman Multiverse.

If they succeeded, they could also bring a lot of influence and stir up a lot of the world's origin.

Chapter 973: The Best Edge (1) Chapter 973: The Best Edge (1) For Zhu Wuwan, no matter which world she transmigrated to, the most important goal was only one, and that was to bring influence and stir the world's origin.

At most, she would take care of the Host's family and friends during this process and fulfill the Host's wish. As for whether this would have a negative impact on the world, that was not within Zhu Wuyang's consideration.

Moreover, to put it bluntly, ever since Zhu Wuyang set foot on this great world, she was destined to harm this great world in order to pry open its most fundamental thing, which was the power of origin.

Zhu Wuyan's life was full and busy. Unknowingly, another few months had passed, and the first year of high school was about to end.

At this moment, Zhu Wuyan's vitality officially broke through 1 point, reaching the level of an instructor. It also surpassed the admission score of the top universities in the Milky Way Federation.

In addition to her strength in hypnosis, Zhu Wuyang's results in cultural studies also soared and reached the level of first place in the grade. Zhu Wuyang had completely established her position as the first in Yellow Mountain High School.

During this period of time, many high schools came to rope in Zhu Wuyang and offered good conditions, hoping that Zhu Wuyang could study in their schools. Among them were the top high schools in the lotus-picking district and Jiangnan Road.

However, Zhu Wuyang didn't agree to it and continued to stay in Yellow Mountain High School. At the same time, she also received more preferential treatment from Yellow Mountain High School.

Everyone in Yellow Mountain High School had unanimously agreed that Zhu Wuyang would definitely be able to surpass everyone else in the college entrance examination two years later, bringing great honor to Yellow Mountain High School and allowing it to obtain considerable benefits.

However, neither Zhu Wanwan nor Yellow Mountain High School expected that the first year of high school hadn't ended yet. There were only a few days left, and a series of special admission notices had arrived one after another. Moreover, these special admission notices were all from top universities, and the worst was a first-class university.

Zhu Wuwan felt that he was already very low-key, but his sharpness was like a firefly in the dark night. No matter how hard he tried, he could not hide it and was still leaked by his classmates and teachers.

When those first-class universities learned that Wang Debao from Huangshan High School in the lotus-picking area had just entered Grade 10, and his vitality had already exceeded 1 point, and he was also an official low-level hypnotist. Moreover, he was one of the stronger ones among the low-level hypnotists. These universities were also shocked.

This was because even among their students, there were not many who could have the strength of Zhu Wuwan. Moreover, they were basically all students in their third or fourth year.

However, Zhu Wanhao was only seventeen years old and was still in high school. She actually possessed such comprehensive strength. Who wouldn't want to eat such a fragrant cake?

Even though Zhu Wuyang was only a first-year high school student now, everyone understood the principle of striking first to gain the upper hand. Who would leave good seedlings for them until the end?

Therefore, before the first year of high school ended, many universities that had confirmed Zhu Wuyang's strength and ability had already extended olive branches.

Of course, the reason why Zhu Wuyang's reputation spread so quickly was also because his hypnotism ability in the lotus picking area was well-known. The information on Milky Way Education was too shocking, attracting the attention of many customers.

Among these clients, there were some who graduated from first-class universities. After understanding Zhu Wuyang's situation, they were naturally very interested. They couldn't help but tell the people in the school, and then they were targeted by people with ulterior motives.

That was why Zhu Wuyang's reputation could spread so quickly. Many universities knew about it and could not sit still.

The arrival of these special admission notices and the arrival of some university recruitment leaders changed some of Zhu Wuyang's plans. He had originally wanted to settle down in high school for a while, but when he saw such a good opportunity, he had other ideas.

It wasn't just Zhu Wuyang. Even some of the leaders and teachers of Yellow Mountain High School had other ideas. After all, if Zhu Wuyang was specially recruited by a top university in her first year of high school, it would definitely cause a huge sensation and bring a lot of benefits to Yellow Mountain High School.

Other than that, with Zhu Wuyang's growth speed, she could reach this level in the first year of high school. Who knew what level she could reach in the second and third year of high school?

At present, there were already Jiangnan Road's top high schools trying their best to rope Zhu Wuyang in. It was easy to imagine what other high schools would target Zhu Wuyang in the future.

The higher-ups of Yellow Mountain High School also knew that although Yellow Mountain High School was not bad in the lotus-picking area, it was only ranked in the top few. Not to mention Jiangnan High School, which was ranked first in Jiangnan Road, it was still quite inferior to No. 2 Middle School, which was ranked first in the lotus-picking area.

Therefore, the leaders of Yellow Mountain High School were also terrified. They were very worried that Zhu Wuwan would be roped in at any time. After all, many high schools offered conditions that even they were quite tempted to see, let alone Zhu Wuwan, a high school student.

They were also worried that Zhu Wuyang would lose control and throw herself into the arms of another high school. In the end, Yellow Mountain High School would end up with nothing.

Therefore, most of the leaders of Yellow Mountain High School were supportive of the early special enrollment. After seeing this situation, some of the leaders of Yellow Mountain High School even deliberately added fuel to the fire and sent Zhu Wuyang's information to more top universities so that Zhu Wuyang could get a better school as much as possible.

All of a sudden, Yellow Mountain High School was surrounded by Zhu Wuyang, and it became a storm.

Many high school students were also drooling with envy. After all, they were still working hard and hoping to get into third-rate and second-rate universities in the future.

However, it was different for Zhu Wuwan. There were still two years before the college entrance examination, and there were already so many first-rate universities and top universities that wanted to specially enroll him so that he would not have to go through the bitterness of high school again.

It was really like comparing people to death and comparing goods to throw them away.

Zhu Wuwan also began to consider this matter. He was prepared to choose a university that was most beneficial to him so that he could obtain the greatest benefits from it.

Based on Zhu Wuwan's current situation, he was more inclined to choose a university that stored a large number of ancient books and cultivation techniques. Of course, research knowledge was also essential. This way, he could ensure that he would obtain benefits in all aspects.

However, such universities were all the top universities in the Milky Way Federation, and they were basically ranked in the top ten. With Zhu Wuwan's talent and ability, she was temporarily unable to obtain the special admission notice from these universities.

Therefore, Zhu Wuyang still needed to wait a little longer. However, something that happened next made Zhu Wuyang completely change her original thoughts. She was prepared to choose a university that wasn't ranked in the top ten of the Milky Way Federation. At most, it would be ranked in the top 100 of the Milky Way Federation. Sometimes, it would even fall out of the top 100.

However, compared to other universities, this university had an advantage that Zhu Wuwan could not refuse. This advantage would definitely bring Zhu Wuwan unimaginable power of the world's origin, and Zhu Wuwan could not help but drool.

Chapter 974: World Passage (1) Chapter 974: World Passage (1) That night, after Zhu Wuwan completed her last order, she rushed home from Huaxi New Town.

After working for a few months, Zhu Wuyang had earned more than ten million credits. This amount of money was enough for Zhu Wuyang to buy a car and a house.

Therefore, he bought himself a mid-to-high-end aircraft. It was more convenient for him to travel and his work efficiency was also higher.

Of course, the ample income also allowed Zhu Wuyang to experience many good things unique to the Milky Way Federation. From there, she could earn a lot of breakthrough stones and obtain a certain amount of the world's origin.

When they passed by a nameless lake nearby, Zhu Wuwan suddenly sensed something and frowned slightly.

After thinking for a moment, Zhu Wuwan decisively got off the aircraft and came to the vicinity of the small lake that was hundreds of square meters. She carefully sensed it.

Then, Zhu Wuwan was stunned to discover that two World Origins were faintly fluctuating around this small lake.

This strange fluctuation could only be caused by the fact that Zhu Wuyan had absorbed a lot of the world's origin and had the support of a wisp of soul from the main body of Dongyuan Continent. Of course, the most important thing was that this wisp of soul had also been nourished and nurtured by the world's origin.

It was also under such circumstances that Zhu Wuyan was able to sense the fluctuation of the world's origin. Moreover, the fluctuation was extremely weak. If Zhu Wuyan had not happened to pass by here and had an extraordinary sensitivity after the soul fusion, he would not have discovered it.

To put it bluntly, this kind of special and weak fluctuation, even if the top masters of the Milky Way Federation passed by nearby, they would not be able to sense it unless they had some understanding of the world's origin and had been nourished.

In the vast Earth Star, there were probably not many people who could sense this fluctuation, even if they passed through the small lake.

In other words, Zhu Wuwan was probably the first person to discover this fluctuation. Through this fluctuation, many ancient books that Zhu Wuwan had read during this period of time and what she had seen in other worlds appeared in her mind. She could vaguely confirm one thing.

That was, this small lake was very likely to be the opening of the next world passageway. As for whether the world that was connected to it was strong or weak, Zhu Wuwan was still uncertain.

However, Zhu Wuwan was certain of one thing. Once he destroyed the world passageway and made it impossible to open, he would definitely obtain a huge influence and earn a lot of world origin.

After all, the opening of each World Passage would have a significant impact on the Milky Way Federation and even the entire Huaman Multiverse.

Therefore, if Zhu Wanhao could close this world passageway, it would be impossible for her not to obtain a massive amount of the world's origin.

However, Zhu Wuyang didn't know how to close the World Passage yet, so he had to learn about this.

And the one with the deepest knowledge in this area was not the top ten super universities in the Milky Way Federation, but Kunlun University, which was only ranked first on Planet Earth. It was barely in the top hundred in the entire Milky Way Federation.

Kunlun University used to be the strongest university in the Milky Way Federation's original planet. It was also the first university to start researching the Myriad Worlds Heavenly Sphere and Earth itself. It was also the first to develop a cosmic passage, allowing the Milky Way Federation to embark on the path of conquering various worlds.

However, with the expansion of the Milky Way Federation, Kunlun University, which focused on the study of the cosmic passage, gradually fell behind. It was surpassed by other universities in terms of cultivation and technology, becoming a university that focused more on research than cultivation.

In terms of research alone, Kunlun University was able to rank among the top ten in the Milky Way Federation.

However, in the current era, research was not the main theme of society. Cultivation and technology were the main theme of society. Therefore, the universities ranked at the top in these two aspects gradually surpassed Kunlun University, causing Kunlun University's comprehensive ranking to continuously decline.

However, to Zhu Wuan, his main purpose in this great world was not to cultivate, but to study and research, and then earn a large amount of world origin.

Therefore, Kunlun University was one of the most suitable universities for him. At the same time, as the first university to study the Heavenly Sphere and the universe passage, Kunlun University's strength in this area was simply terrifying, far surpassing any university in the Milky Way Federation.

This was what they urgently needed.

After realizing this, Zhu Wuyang made up her mind immediately. Even if she had to accept the special admission, she had to accept the special admission of Kunlun University.

Kunlun University was the university that could bring him the most benefits. It was even better than the other top three universities.

After considering it, Zhu Wuwan smiled and rushed home, ready to accept Kunlun University's special admission notice tomorrow.

As the number one university on Planet Earth, even though it was more focused on research than cultivation and technology, its intelligence was still quite good. It also knew that Jiangnan Province had an amazing senior, so it had just sent over the special admission notice two days ago.

However, Kunlun University obviously didn't have much hope of specially enrolling Zhu Wuyan. After all, among the universities that were preparing to specially enrol Zhu Wuyan, there was already a university ranked in the top 30.

Therefore, Kunlun University didn't send a special recruitment teacher over. Therefore, when Kunlun University received the news the next day that Zhu Wuwan had accepted their special enrollment and was preparing to enter Kunlun University to study next semester, many of the senior executives of Kunlun University were a little dumbfounded.

It wasn't just the upper echelons of Kunlun University. Even Yellow Mountain High School and Zhu Wuyan's friends and family were a little confused by Zhu Wuyan's choice.

After all, with Zhu Wanhao's current situation, not to mention Kunlun University, which was ranked around the top 100, even the top universities could join. Didn't you see that there were already special admission notices from the top 30 universities?

This university was far superior to Kunlun University in both environment and strength. It also had all kinds of generous treatment. No matter how one looked at it, it was much better than Kunlun University.

Moreover, as time passed, there would definitely be more and better universities that would send Zhu Wuyang special admission notices. Even if you wanted to accept, you should wait for the right price and make your choice at the last moment.

Perhaps one of the top ten super universities in the Milky Way Federation would send a special admission notice. If that was the case, once they joined, they would definitely become dragons and phoenixes in the future. Wouldn't that be good?

Now that he had confirmed it so early, and it was not the best university that had mailed the special admission notice, what was Wang Debao thinking?

Moreover, wasn't Wang Debao a prodigy in terms of spiritual cultivation and vitality? Logically speaking, he should have taken the path of cultivation, but Kunlun University wasn't good at this.

Chapter 975: A Pity (1) Chapter 975: A Pity (1) Almost everyone objected to Zhu Wuyang's choice.

Even Wang Tie and Shi Huifang, who were paying more and more attention to his opinion and slowly treating him as the pillar of the family, expressed their opposition and hoped that he would consider it carefully.

Needless to say, the leaders of Yellow Mountain High School were also very surprised. They were puzzled by Zhu Wuyang's choice and tried to persuade him many times.

Zhu Wanhao had specially explained this to everyone, telling them that the biggest improvement he had in that epiphany was not his spiritual cultivation or hypnotism, but in the development of his brain.

As a result, his comprehension ability had increased by leaps and bounds. Moreover, he had a photographic memory. Zhu Wuwan even performed on the spot, causing all the teachers and students to be dumbfounded. They almost could not believe what they were seeing.

His parents and three sisters were also stunned. They began to understand Zhu Wuyang's choice.

After all, with Zhu Wanhao's ability in brain development, it was obvious that the path of research was the best. Moreover, there was a greater possibility of achieving brilliant achievements in the future.

However, such a choice would undoubtedly make people feel that it was a pity. At the same time, they also felt that it was not worth it for Zhu Wuyang.

After all, taking the path of research meant that Zhu Wuwan wouldn't be able to cultivate for too long. When that time came, her lifespan wouldn't be too long, and she would lose a lot of things.

Of course, if those who walked the path of research could reach a certain height, the Milky Way Federation would provide them with a huge amount of resources and treasures to allow their vitality to soar, so as to prevent them from running out of life and leaving early.

Every day that such a genius lived was a huge fortune, and the Milky Way Federation would not give up so easily.

However, the researchers who could reach this level were all professors. Although Zhu Wuwan had a photographic memory and her comprehension was beyond imagination, it was equally difficult to reach this level.

Although there were still many regrets in his heart, Zhu Wuwan had already made his choice. His talent seemed to be more suitable for this aspect. His family and school had also begun to accept this matter.

This matter was soon made known to Kunlun University's recruitment agency, and they were overjoyed. They didn't expect Zhu Wuwan to have an even greater advantage in comprehension and research than just cultivation and hypnosis.

On the same day, the leader of Kunlun University's student recruitment agency rushed to Huangshan High School in a hurry. He personally signed the admission agreement with Zhu Wuwan and gave her a large number of rewards at the same time.

If these rewards were converted into credits, they would be worth at least a few million. There were even some conditions that could not be bought with money, such as being able to read many exclusive knowledge and classics of Kunlun University.

These were what Zhu Wanwan needed. It would be of great benefit to him in earning the world's origin and increasing his main body's strength. After confirming the agreement, several senior executives of Kunlun University's recruitment agency specially invited Zhu Wuyang's family and the senior executives of Yellow Mountain High School for a meal to thank them for nurturing such a good seedling like Zhu Wuyang.

Although he still had some regrets that Zhu Wuwan didn't get into the top ten universities in the Milky Way Federation, he thought about how these universities had yet to send out any special admission notices. Kunlun University was, after all, the number one university on Earth, and it was also on the same planet as Yellow Mountain High School. Both parties had a certain connection, so the upper echelons of Yellow Mountain High School could be considered to have accepted it.

After confirming the universities they needed to join and signing the official agreement, the senior executives of Yellow Mountain High School finally couldn't wait to start promoting this matter.

Although Kunlun University could only be ranked in the top 100 in the Milky Way Federation, for Yellow Mountain High School, it was still a prodigy that could only be produced once every few years. Naturally, it was worth promoting.

Moreover, Zhu Wuyang's special enrollment quota was extremely valuable. Because Zhu Wuyang rejected the top 30 universities to join Kunlun University, coupled with Zhu Wuyang's identity as a first-year student, it naturally caused a huge uproar.

This matter spread throughout the entire lotus-picking district at an astonishing speed, and then spread to Jiangnan Road. Regrettably, although it made Yellow Mountain High School famous, it also attracted a lot of criticism, especially from those high schools that failed to recruit Zhu Wuwan.

"Yellow Mountain High School is really amazing. A good seedling from one of the top ten super universities in the Milky Way Federation was forced into Kunlun University. With Wang Debao's attainments in spiritual cultivation and hypnosis, he is definitely a peerless genius in cultivation. It is only right for him to enter the top ten super universities."

"What a pity, what a pity. If Wang Debao was a student of our Jiangnan High School, we would at least send him to the top three universities. He deserves such treatment. What a pity, Yellow Mountain High School is misleading the students."

"He's clearly a genius in spiritual cultivation and hypnosis, yet he has to say that he's a genius in research. No matter how good his research is, can he catch up to becoming a cultivation expert himself? Wang Debao has been ruined by Yellow Mountain High School."

"If we knew this would happen, we would have tried our best to rope Wang Debao into our high school. At most, we would compensate Yellow Mountain High School with some resources. It's really a pity."

..

Amidst the sighs, Zhu Wuwan returned home and began to use the large number of treasures that Kunlun University had rewarded him to cultivate, increasing his vitality. He was prepared to use this opportunity to increase his strength by a large margin.

With the help of a considerable amount of natural treasures, Zhu Wuwan's vitality growth rate soared again. It could be said that it was visible to the naked eye, and the Life Fist Technique was also improving.

Although he had decided to take the path of a researcher in the future, this didn't mean that researchers didn't need combat strength. They had to be wary of others, not to mention that the path that Zhu Wuwan took wasn't a peaceful one.

For the sake of her own life, and most importantly, for the sake of earning the world's origin, Zhu Wuwan also wanted to increase her strength.

By the way, not only did Zhu Wuwan not spend many breakthrough stones in the past few months, but he had also earned a large number of breakthrough stones. These breakthrough stones were helping Zhu Wuwan improve her body refinement cultivation.

If nothing unexpected happened, after the trip to the 3,000 worlds, Zhu Wuyan's Qi Refinement and Body Refinement cultivation should both reach the Great Mahayana Realm.

At that time, when the two of them overlapped, let alone a Human Immortal at the early stage of the Dujie realm, even a Human Immortal at the middle stage of the Dujie realm would be nothing in front of Zhu Wanhao.

Without the threat of the Mysterious Desolate Great World, coupled with the various advanced detection equipment of the Milky Way Federation, Zhu Wuwan basically did not use many Breakthrough Stones to increase her strength.

Now, just by relying on his own strength, Zhu Wuyang's comprehensive combat strength was already soaring. If he used the breakthrough stone again, it would be a little too exaggerated and it would inevitably attract suspicion.

Chapter 976: It Makes Sense Again (1) Chapter 976: It Makes Sense Again (1) Of course, even though Zhu Wuyang did not use the Breakthrough Stone to increase his strength, he would not foolishly hide it when he really encountered danger. He would still use it when it was necessary.

However, according to the path of research he had chosen, there would not be too many times when he would encounter danger. Zhu Wuwan would continue to hide her strength. If someone really wanted to attack him, Zhu Wuwan would prepare a big surprise for them.

Studying took up most of Zhu Wuyang's time. Only a small portion of it was used to cultivate vitality and improve his strength. Even so, in just a month or so, Zhu Wuyang's vitality increased by 0.2 points, reaching 1.2 points.

This number didn't seem like much, but it meant that Zhu Wuwan's overall quality had increased by four times on top of the instructor level, which was equivalent to thirty-two times that of an ordinary person.

Such physical fitness would be a superhuman existence on Earth. It could even be considered extraordinary on Planet Earth. It could easily kill a large group of ordinary people and possessed terrifying combat strength.

The cultivation of the Huaman Multiverse's life force system brought unimaginable benefits to the cultivators. In many aspects, it had even surpassed the immortal cultivation system of the Dongyuan Continent, and its scientific nature was also far superior to the immortal cultivation system of the Dongyuan Continent.

To put it bluntly, if the upper limit of cultivation in the Huaman Multiverse was similar to the world where the Dongyuan Continent was located, Zhu Wuwan would be more willing to choose the cultivation system here. Moreover, the cultivation environment of

the human race in the Huaman Multiverse was obviously better. Even the Southern Wasteland, which was currently singing and dancing, could not compare to the Huaman Multiverse.

In Zhu Wuyan's opinion, his improvement speed was only so-so. However, in the eyes of ordinary people, Zhu Wuyan's cultivation speed could be considered a top-notch prodigy. Of course, it was also worthy of his spiritual cultivation in the third stage of deep sleep. It would not attract too much suspicion.

Zhu Wuyang's strength in all aspects was increasing rapidly, and the speed was beyond imagination, especially in terms of knowledge and breakthrough stones. After all, mastering knowledge could also quickly obtain breakthrough stones.

Moreover, Zhu Wuyan's main body still had all kinds of influences on Dongyuan Continent. Even though Zhu Wuyan had entered the 3,000 macro worlds, the policies and laws he had left behind were still operating in an orderly manner. These were also constantly bringing Zhu Wuyan a lot of breakthrough stones.

There was no need to talk about knowledge. The knowledge of the Huaman Multiverse was beyond imagination, and it was enough for Zhu Wuyang to indulge in it.

During this period of time, Zhu Wuyang's actions had also begun to ferment in the lotus-picking area. At the same time, it had also spread to Jiangnan Road and other areas. These were all influences, but at the same time, they were also the source of the world.

The number above Zhu Wanwan's head jumped a little faster. At this moment, it had already reached more than 36000 points. It continued to lead the way, making all the onlookers speechless.

At this moment, the second-ranked high-level cultivator had only earned about 6,000 World Origins. However, Zhu Wuwan had earned six times as much. The high-level cultivator who had earned about 6,000 World Origins had already crossed three great worlds.

Many onlookers were already a little numb. Many people also speculated that the reason why Zhu Wuwan could obtain more than 6,000 points of World Origin in such a short period of time was mostly from the first great world.

Even though Zhu Wuwan had already left the first great world, the influence he brought continued to ferment in the first great world, providing him with an endless source of the world's origin.

Moreover, since he was in the World Mountain, the Will of the Great Path of the world where the Dongyuan Continent was located gave Zhu Wuwan the same share as before, just like how he had been divided in the first macro world. He could obtain a considerable amount of the world's origin to the greatest extent.

However, once Zhu Wuan left the World Mountain, the share of the will of the Great Path in the world where the Dongyuan Continent was located would be much smaller. Zhu Wuan was rather speechless about this.

Big brother, you are the will of the Heavenly Dao of such a powerful world. Can you not be so stingy? Can't you give me more? This way, I will work harder for you in the future.

Even if I can't get more points, at least I can maintain the proportion of the share in the great world. This way, I feel a little better. You slashed too hard.

He hoped that he could find other ways to earn the world's origin energy in the future. That way, he would not be exploited too badly.

Many of the onlookers' attention was no longer on Zhu Wuan. Because Zhu Wuan was in the limelight too much, the others didn't even have room to compare themselves. So, what was the point of looking at him? It was better to pay attention to those who were a little weaker. It would be more exciting if they chased after him.

As for the guys who had originally thought of targeting Zhu Wuyang, they no longer had such thoughts because Zhu Wuyang had started to "do it" again.

Under their stunned gazes, the World Origin that Zhu Wuyang had earned did not continue to improve his talent and aptitude. Instead, it began to improve his body-tempering cultivation. Then, they watched helplessly as Zhu Wuyang's body-tempering cultivation 'soared' without any flaws under the effect of the World Origin.

With about 6,000 points of the origin power of the great world, Zhu Wuyang's body-refining cultivation base had been naturally raised to the early-stage Body Integration Realm in one go. All the onlookers were a little dumbfounded.

However, after they recovered from their shock and recalled Zhu Wuan's previous actions, these dumbfounded people returned to normal. They were also very speechless when faced with a guy like Zhu Wuan who did not take the usual path.

There were naturally many people who felt it was a pity, and there were even more people who complained. However, the world's origin belonged to Zhu Wuyang, and Zhu Wuyang could use it however she wanted. No matter how many opinions they had, it was useless.

Just like that, Zhu Wuan's "way of doing things" was to use the world's origin source to increase her body refinement cultivation after she had finished improving her Qi Refinement cultivation. Other than reducing suspicion, this also carried some of Zhu Wuan's evil interests.

At the same time, he could also hide his strength and talent. It could be said that there were many benefits. Why would Zhu Wuyang not do it?

He could take this opportunity to improve his Qi Refinement and Body Refining cultivation “naturally” and establish his unshakable position in the Dongyuan Continent.

If possible, it would be best if he could pass the tribulation at the last moment and step into the Human Immortal Realm. That would be perfect. At that time, he would definitely establish his position in Dongyuan Continent.

Moreover, as long as he could enter the Crossing Calamity Stage, Zhu Wuwan would have more than 70% confidence in taking down the entire Dongyuan Continent. At that time, he would use the entire Dongyuan Continent as his hunting ground to earn Breakthrough Stones.

The Southern Wasteland alone was enough to bring Zhu Wuwan so many breakthrough stones, let alone the vast Dongyuan Continent.

Isn't this good?

Chapter 977: Like a Star (1) Chapter 977: Like a Star (1) Seeing Zhu Wuan's cultivation level soar with the help of the Origin Power of the great world and thinking of Zhu Wuan's age, many of the surrounding cultivators felt inexplicably sad.

After all, in order to break through a small realm, they often had to put in a lot of effort, even risking their lives. Even so, the probability of failure was far greater than the probability of success.

However, Zhu Wanwan was on the other hand. She was unstoppable all the way. Whether it was a major realm or a minor realm, she was able to achieve it in an instant. She had basically never failed. The effect of the origin power of the great world was incomparably domineering.

Most importantly, even though he had squandered so much of the origin power of the great world on his Qi Refinement and Body Refinement cultivation, it still did not hinder the improvement of Zhu Wuwan's talent.

Zhu Wuan had already raised his talent to the point of transcending the human world and reaching the ranks of immortal spiritual roots. He could be said to be the number one in the world.

How could the surrounding cultivators not cry bitterly?

Of course, they weren't the ones suffering the most. Instead, it was the high-level cultivators who had entered the three thousand macro worlds like Zhu Wuwan. They were all trembling in fear of an accident that would damage one-third of their essence, qi, and spirit, which would affect their foundation and cultivation.

However, Zhu Wanwan's gains in a great world had reached a record breaking level. She was no longer afraid of losing one-third of her essence, qi, and spirit. Moreover, she had earned a lot and obtained such huge benefits.

Zhu Wanwan still took the initiative to enter the 3,000 macro worlds. It was obvious that he treated the 3,000 macro worlds as an opportunity to seek benefits for himself. It was completely different from their fear and trepidation. The environment that the two sides were in could be said to be completely different.

Comparing people would kill you, and comparing goods would kill you.

Now that more than a hundred days had passed, half of the high-level Cultivators had lost the chance to enter the three thousand macro worlds. Or rather, they had finally escaped from the feast with an astonishing failure rate.

Among the high-level cultivators who had escaped, less than ten of them had really benefited from the 3,000 macro worlds. Even if they had not made any losses, only about 20 to 30 of them had. The rest had suffered losses, and the probability was more than 90%. One could imagine how dangerous the 3,000 macro worlds were.

Of course, some of them had already died. There were only two of them. Even so, the high-level cultivators whose souls were still in the 3,000 macro worlds were shocked and their hearts trembled.

After all, even in the Dongyuan Continent, the number of high-level cultivators who died each time was very small.

The other high-level cultivators were so miserable, but Zhu Wuwan was doing well. Naturally, many people were envious and jealous.

Fortunately, Zhu Wuyang's strength had already increased, so she didn't care about these people's other thoughts.

Of course, at this moment, the Great Zhu Immortal Dynasty, which received the news, had already become a sea of joy. This was because with Zhu Wanwan advancing to the Great Vehicle Stage, she had stepped into the ranks of the Great Vehicle Stage Quasi-Immortals. This also meant that the Great Zhu Immortal Dynasty of the Southern Wilderness had stepped into the ranks of the top immortal sects.

If they were lucky enough to enter the ranks of Human Immortals, the Great Zhu Immortal Dynasty would become one of the few super immortal sects in the Dongyuan Continent.

Such a grand occasion, how could the people of the Great Zhu Immortal Dynasty not be overjoyed?

However, if they knew that Zhu Wuan's comprehensive combat strength was already comparable to a Human Immortal undergoing tribulation, and he had even enslaved a Human Immortal undergoing tribulation, who knew what they would think.

Because Zhu Wuan's performance was too shocking, and there were many cultivators watching, it was inevitable that the situation here would spread. Therefore, although Zhu Wuan appeared to many people to be coming to the Central Plains for the first time, his reputation was like a tide, rising wave by wave.

World Plunderer Zhu Wuyang's fame was like a star. It began to radiate light in the sky of Dongyuan Continent, and gradually moved toward the bright moon and red sun.

When he merged with his other identity, Zhu Wuyan would definitely shake the Dongyuan Continent and become the strongest person in the Dongyuan Continent.

Everything was going well, and everything was going according to Zhu Wuyan's plan. As time passed, Zhu Wuyan would slowly surpass any cultivator in Dongyuan Continent, and he would no longer be afraid of any wind, frost, rain, or snow.

To be able to achieve today's results, it seemed that it did not take much time, but Zhu Wuyan walked extremely steadily. It could be said that he walked step by step. Basically, he did not advance recklessly because of greed.

Many times, Zhu Wuyan was even very careful. Sometimes, taking risks could bring greater benefits, but as a cultivator, he could not take risks forever. There would be a day when he would capsize.

Zhu Wuan wasn't the son of destiny, nor was she the protagonist of the world. She could turn misfortune into fortune and pass through safely no matter what danger she encountered.

Under such circumstances, how could Zhu Wuan dare to act recklessly? Moreover, even some of the Soul Formation elites and high-level cultivators who had made great contributions to the world where the Dongyuan Continent was located in the past would also die at that moment.

This allowed Zhu Wanhao to clearly see that in the world where the Dongyuan Continent was located, there was no so-called Son of Destiny who would not die no matter what happened and could turn misfortune into good fortune.

Since that was the case, Zhu Wuyang naturally had to be careful. It was okay to be a little cowardly. Being able to survive was the greatest victory.

Zhu Wuwan, who came from Earth, didn't mind being treated as a coward, and she didn't have those old-fashioned thoughts. In many laws on Earth, people had the right to

do things that were subservient or even against their principles in order to survive. They wouldn't even be punished by the law.

Life was the most important thing. If he lost his life, what else could he say?

Therefore, even though he had reached this point today and became one of the top ten powerful cultivators in Dongyuan Continent, if he encountered danger, Zhu Wanhao could still do some shocking things.

So what if he abandoned his subordinates? It was fine even if he gave up on the Great Zhu Immortal Dynasty. As long as he could protect the lives of his family, it didn't matter if he lowered his head a little.

This was the difference between Zhu Wanhao and many local cultivators in Dongyuan Continent.

Zhu Wanhao clearly knew what she wanted and would work hard for it. She wouldn't change her mindset because of other things.

Feeling the messy gazes around him, Zhu Wuwan clearly sensed a lot of negative gazes, but he turned a deaf ear to them. He focused on working with his clone to memorize a large number of books and knowledge, preparing for his future development.

The others only saw Zhu Wuyan's rapid advance, but they had no idea what kind of effort Zhu Wuyan had put in to be able to fly and advance.

It seemed simple, but it was actually the condensation of a large amount of Zhu Wuyan's blood, sweat, and energy.

Chapter 978: One Person Becomes the Dao (1) Chapter 978: One Person Becomes the Dao (1) Other people thought that Zhu Wuyan's advancement was too easy, but in fact, Zhu Wuyan's advancement wasn't as difficult as theirs.

It was not just his main body in the Dongyuan Continent, but also his parallel clone in the Huaman Multiverse.

Zhu Wuyan's parallel identity, Wang Debao's cultivation progress was still unstoppable. Zhu Wuyan had effectively used the reward given to him by Kunlun University to increase his vitality at a speed beyond ordinary people's imagination.

In just over two months of summer vacation, Zhu Wuyang had raised her vitality to 1.5, and she was about to reach the peak of the third stage of deep sleep.

If he wanted to continue improving in the future, then his spiritual cultivation would need to reach a higher level. Only then could he continue to improve his vitality.

The mind came first, followed by life. Without sufficient cultivation of the mind, one's life force would not be able to rise to a sufficiently high level. This was also a special law of the Huaman Multiverse.

Spirit cultivation was the limit of an intelligent lifeform's vitality. Only when one's spirit cultivation broke through the limit could one's vitality break through the limit and reach a higher level.

At the same time as his vitality increased, Zhu Wuwan gained even more in terms of learning. With the help of his main body and the overall quality of the clones here had also increased, Zhu Wuwan's learning speed was simply fast.

Unfortunately, his mental power could not penetrate his body yet. Once he could do it, he only needed to scan it once, and Zhu Wuyang would be able to memorize a book or even scan multiple books at the same time. This way, the speed of absorbing knowledge was the fastest.

Fortunately, there was the internet here. Zhu Wuyang could easily narrow down a lot of knowledge on the webpage and then scroll through it rapidly. To others, Zhu Wuyang did it as if it was a joke, but in fact, Zhu Wuyang had already memorized everything clearly without missing anything.

This was because Zhu Wanhao's speed of mastering knowledge was not slow. It could even be said to be very fast. Although she basically memorized everything first, the more things she memorized, the more she naturally comprehended many things. Among them, there were many good improvements and improvements.

After all, apart from mastering the knowledge of the Huaman Multiverse, Zhu Wuwan had also obtained knowledge beyond imagination in other worlds. After comparing the two, she could always find some gaps and make reasonable improvements.

These improvements included the Heart Sutra, which had not been updated for many years. This was also known as the human race's number one foundation establishment treasure book, and it was also the most suitable treasure book for the human race in the Milky Way Federation.

Before this, Zhu Wuyan had actually made some improvements to his own condition, so the Spirit Sutra that Zhu Wuyan cultivated brought him greater benefits.

However, the improvements that Zhu Wuwan had made before were all based on his own situation. He had not made any general improvements to this. This was the first time. Although the improvements were not big, it would definitely cause a stir if word got out.

Zhu Wanwan had also experimented with it. This kind of improvement could increase the power of the Spirit Sutra by one-tenth. Once it was thrown out, it would definitely be able to change the Spirit Sutra into a new version.

However, after thinking about it for a moment, Zhu Wuyang decided to hide her true strength for the time being. Otherwise, it would be too unbelievable. It would be easy to be suspected, or rather, it would definitely be suspected.

However, it would be a pity to give up on improving it just like that. Therefore, after some consideration, Zhu Wuwan decided to improve one of the sentences on the third level. From there, the third level of the Spirit Sutra would become more stable and less prone to accidents. Moreover, its power would also increase.

The reason why he did this was naturally to obtain better treatment and attention at Kunlun University. This way, Zhu Wuwan would have more authority and come into contact with things related to the Myriad World Heavenly Sphere and the universe passageway.

Otherwise, how could Kunlun University's researchers accept him so easily when Zhu Wuwan had not displayed any advantages?

Other than revealing this aspect, Zhu Wuyang was also prepared to learn some knowledge about the cosmic passage and then make some useful suggestions. This would also be more beneficial for him to approach this project.

Zhu Wuyan would not choose something too shocking. Otherwise, if the influence was too great, it would easily stir up too much of the world's origin. Zhu Wuyan did not want to leave such a good great world early.

After he entered Kunlun University, Zhu Wuwan would selectively reveal some of his research results. From there, he would gain the attention of Kunlun University step by step reasonably and reasonably, and get what he wanted.

All of this was a piece of cake for Zhu Wuyan. If Zhu Wuyan was willing, she could now give some research results that would bring about significant changes to the Milky Way Federation.

At that time, he would definitely be able to easily earn 1,000 points of World Origin. However, 1,000 points of World Origin wasn't what Zhu Wuwan wanted. Tens of thousands of points was still acceptable.

At the thought of this, Zhu Wuyan continued to immerse herself in her studies. However, to the outside world, Zhu Wuyan had been diligently studying and practicing, but Zhu Wuyan had only spent a small portion of her time on cultivation.

While Zhu Wuan was improving her strength and knowledge, she did not forget about her family. It was still the same sentence. Since she had used the original owner's identity and obtained a lot of benefits from the original owner, she had to settle his karma.

Therefore, Zhu Wuan also contributed money and effort to help Wang Debao's family improve their cultivation. With the large amount of wealth brought by hypnosis, coupled with Zhu Wuan's generosity in using hypnosis to help Wang Debao's family improve their cultivation, Wang Debao's family's vitality was also soaring.

With spirit beast meat, spirit pills, and a deep sleep hypnosis mode with a score of 95 points and above, coupled with Zhu Wuwan's guidance, it was impossible for Wang Debao's beauties not to improve rapidly even if they wanted to.

In just a few short months, the three Wang sisters' spiritual cultivation had reached the second stage. They could enter deep sleep at any time, which allowed their vitality to increase rapidly. Not only had they reached the level of ordinary people, but they had also surpassed most of their classmates, reaching more than 0.8.

With such vitality, coupled with the three sisters' good grades, they could definitely get into a second-rate university in the Milky Way Federation. If they worked hard in the future, they might even be able to get into a first-rate university.

The whole family had never thought that their lives would change so much in just a few months. They were all crying tears of joy and were extremely happy that Wang Debao had suddenly realized his mistake.

Unknowingly, Zhu Wanwan had completely fused with the original owner's soul. Once she returned to her main body, it would definitely allow the original owner's soul to obtain a considerable improvement.

It seemed that he had only fused about 1% of the soul, but the chemical reaction after the complete soul fused with the main body was even greater, and the benefits it brought were far greater than before the fusion.

Chapter 979: Fainted (1) Chapter 979: Fainted (1) It was just like how Wang Debao's soul from Parallel World was less than a millionth of Zhu Wuyan's soul from Dongyuan Continent. However, once it fused with Zhu Wuyan's soul, it could cause Zhu Wuyan's soul to undergo a huge increase. It could at least double or even multiply.

The doppelganger's soul in Parallel World seemed to have made up for some of the flaws in the main body's soul, making the main body's soul more complete. That was why it could produce such a chemical reaction.

Moreover, after fusing with his own souls from several worlds, Zhu Wuwan could clearly feel that her comprehension had become stronger.

This was also the greatest benefit that the soul of the parallel world had brought to Zhu Wuwan. It far exceeded the benefits in other aspects.

Especially after fusing with his complete soul in the parallel world, Zhu Wuwan would be able to obtain even more benefits. Therefore, if possible, Zhu Wuwan would do her best to fulfill all the wishes of the original owner. Only then would she be able to fuse with the original owner's soul and allow Zhu Wuwan to obtain the greatest benefits.

Because the original owner's three sisters were young, their talent and aptitude were not bad. They were slightly stronger than ordinary people, so they improved quickly with the help of Zhu Wuyang.

However, the original owner's parents were a little slower. After all, the two of them were old. Even if they had more resources, they could only increase their vitality to more than 0.8 in a few months.

The original vitality of the Host's parents was above 0.7. After all, they were both adults and their physical fitness was at its peak.

However, because the Host's three sisters were young, their lives weren't very good. Before this, their vitality stats were only a little over 0.6.

However, in a short period of time, their vitality had increased to more than 0.2. However, the original owner's parents had only increased by about 0.1.

Even so, the original owner's parents were very satisfied. They had never even thought that they could obtain such an improvement at such an old age.

Of course, the most important thing was that the only male heir in the family, Wang Debao, had become a talent. He was no longer the idiot that others had called him. He had even become synonymous with genius, receiving the envy of countless people in the lotus-picking area.

Moreover, the three girls of the Wang family had also embarked on the path of cultivation that they had always dreamed of. They no longer had to be forcefully deprived of their qualifications to cultivate by their parents in order to provide a good environment and conditions for their younger brother.

To be honest, Wang Tie and Shi Huifang valued boys over girls, but if their families were really rich enough, how could they not let their three daughters embark on the path of cultivation?

Everyone knew that this path had endless benefits. Whether it was the increase in lifespan or the improvement of status, it was a major event that concerned a person's life.

If it weren't for their poor family conditions, Wang Tie and Shi Huifang also hoped that their three daughters would also take this path so that they could live better in the future.

However, the Wang Clan did not have such conditions in the past. Therefore, the husband and wife, who valued sons more than daughters, could only let their three daughters walk other paths and only let their only son, Wang Debao, walk the path of cultivation.

However, even though they were biased, the couple still treated their three daughters very well. Wang Debao received the best treatment in the family, the three daughters were second, and the couple was the worst.

Basically, it was the leftovers left behind by the children after they finished eating. This was what the husband and wife wanted to eat. In order to save money, the husband and wife ate the worst and wore the worst, but their children were much better than them.

As their children grew up, the clothes they wore were either left behind by their children or modified from their children's clothes.

It was precisely because of this that even though the three daughters knew that their parents valued sons over daughters and were a little too biased towards their younger brothers, they still felt sorry for their parents and did not go too far. The eldest sister, Wang Fengjuan, was even more considerate of her parents and younger brothers.

Now that the family's conditions had improved, the husband and wife naturally would not stop their daughters from embarking on the path of cultivation. In fact, they were extremely supportive. The relationship between the family had also improved unprecedentedly, becoming much more harmonious.

According to the current situation, even if Zhu Wuyan left, with the abilities of Wang Tie, Shi Huifang, and the three sisters, the Wang family would be able to live a good life in the future.

Therefore, Zhu Wuyan could go to Kunlun University without worry and fight for what she wanted. Of course, some people might say that there were still a hundred years left. As long as Zhu Wuyan supported her a little, the Wang family would definitely be able to live better.

However, Zhu Wuyan wasn't prepared to do that. He would try his best to provide as little help as possible to the Wang family in the future to prevent the Wang family from being a small family. If they suddenly became rich, it would be easy for them to become mentally unstable and bring about some irreparable consequences.

It would still be like now, where Zhu Wuyan would only provide a portion of the help to the Wang family. After that, they would have to work hard on their own to slowly improve their quality of life and slowly adapt to a better and better life.

This way, they would have a sense of accomplishment and not have too many problems.

Moreover, Zhu Wuyang was going to leave this great world eventually. When he left, not to mention the three sisters, even Wang Tie and Shi Huifang might not have left.

After all, in the Milky Way Federation, the average life expectancy of ordinary people was about 100 years old, not to mention the people of the Wang family who had a vitality of more than 0.8. They had at least a life expectancy of more than 100 years.

As their strength increased, their lifespans would also increase. Therefore, after a hundred years, it was inevitable that they would send Zhu Wuyang away.

When the time came, Zhu Wuyan would find a reasonable way to avoid affecting the Wang family as much as possible. This was also what Zhu Wuyan could do for herself in the parallel world.

Having transmigrated many times, Zhu Wuyan was getting more and more adept at handling these things.

In the future, he would also slowly fade his presence in the Wang family. There were still a hundred years left, which was enough for Zhu Wuyang to complete this matter.

After it was completed, Zhu Wuyang could leave with a peace of mind with a full harvest.

After thinking about this, Zhu Wuwan smiled and started packing. Otherwise, there wouldn't be much for him to pack because the original owner's parents had already prepared everything that needed to be prepared. If it wasn't for Zhu Wuwan not wanting to bring so many things, he would have hired a cargo aircraft to transport his things to Mount Kunlun.

This time, Zhu Wuwan was prepared to fly her own flying transport to Kunlun University. Jiangnan Road was not far from Kunlun University, only a few thousand miles away. According to the speed of the flying transport, they could easily arrive in one or two hours.

It was said that every new student would be given a chance to look down at Kunlun Mountain when they entered Kunlun University. Those who were lucky could even take this opportunity to enter an epiphany. Zhu Wuyang was definitely the one with better luck.

Chapter 980: Kunlun Tour (1) Chapter 980: Kunlun Tour (1) Compared to Earth's Kunlun Mountain, Earth Star's Kunlun Mountain was even more magnificent.

There was Kunlun Mountain on Earth, and there was Kunlun Mountain on Planet Earth. There was the Milky Way around Earth, and there was also the Milky Way on Planet Earth. This made Zhu Wuyang suspect the relationship between the two.

This was a parallel world that had many similarities to Earth. It brought a lot of familiarity to Zhu Wuwan, and it also made it easier for him to move.

This should be one of the reasons why the macro world where Dongyuan Continent was located helped him enter this macro world. It was obviously beneficial to Zhu Wuwan.

More than an hour later, Zhu Wuwan arrived in the sky above Mount Kunlun, which was ten thousand meters tall. Looking at the magnificent mountain range that was far more magnificent than Earth, Zhu Wuwan was a little surprised.

However, Zhu Wuwan had seen many mountains in Dongyuan Continent that were much larger and more spectacular than this place, so she didn't take it to heart. She slowed down a little to understand the terrain and environment of Mount Kunlun before rushing toward Kunlun University, which was located on the main peak.

The main peak of Mount Kunlun was tens of thousands of square kilometers. Kunlun University was located on the peak. It was beautifully constructed and was once known as the world's number one university.

Even now, Kunlun University was still one of the most beautiful and spectacular universities in the Milky Way Federation.

It was said that many students chose Kunlun University every year mainly for the beautiful scenery here. One could imagine how beautiful the scenery of Kunlun Mountain was.

After Zhu Wuan had a look, he had to admit that even in Dongyuan Continent, the beauty of Mount Kunlun was among the best.

Besides the natural scenery, there were also man-made scenery on Mount Kunlun, which was incomparable to Dongyuan Continent.

Arriving at the main peak of Mount Kunlun, Zhu Wuyang parked the Red Star Flying Device in the parking lot near Kunlun University before walking towards the school gate.

Today was the first day of school at Kunlun University, and there were many students. Zhu Wuwan had specially chosen this day to come to school.

Zhu Wuwan observed carefully and realized that all the new students would pause when they entered Kunlun University. Some would even be stunned for a moment. When they woke up, these new students would look surprised. Zhu Wuwan knew what was going on.

Kunlun Travel!

If Zhu Wuwan's guess was correct, the freshmen who had paused for a moment when they entered Kunlun University should have already traveled all over Kunlun Mountain in that moment. At the same time, they also experienced a special feeling of emptiness.

This was unique to Kunlun University. All the freshmen who held the admission notice of Kunlun University would resonate with the special aura accumulated over the years through the admission notice when they first entered Kunlun University, and they would fall into a special state.

In this state, the new spirit could travel around the entire Kunlun Mountain in a short period of time and enjoy the magnificent scenery of Kunlun Mountain. If he was lucky, he might even enter an epiphany during this period of time. This state could greatly increase the probability of epiphany.

Regrettably, it would usually take several decades for a freshman to fall into an epiphany. The probability was quite high.

Zhu Wuwan was prepared to use this special state to pretend to have an epiphany again and let his abilities in all aspects "soar" once. It would be quite beneficial for his subsequent development.

At the same time, in the depths of Kunlun University, which Zhu Wuwan did not see, nearly a hundred teachers whose vitality had reached a certain level were chatting while observing the situation at the school gate through their spiritual power.

"Hundreds of new students have already entered. The biggest benefit they gained from the Kunlun Tour is only a small increase in their spiritual cultivation. None of them have entered the state of epiphany. It's a waste of so many admission notices."

"Enlightenment can only be encountered by chance. It's already very good for a freshman to improve in Kunlun. If you don't like it, then give it to me. I definitely won't dislike them."

"What are you thinking about? Choose a general from the dwarves. Anyone who can obtain benefits from Kunlun can be considered a young hero. We also want them. It's a pity that our Kunlun University is no longer as grand as it used to be. It's said that a thousand years ago, our Kunlun University was one of the top ten super universities in the Milky Way Federation. Anyone who can join us is a prodigy, one in ten thousand."

Therefore, every time new students start school, there will definitely be people who fall into enlightenment. I really want to see such a grand occasion.”

“If you want to watch it, go to the library’s reference room. There are plenty of videos in this area. It’s enough for you to watch for ten days and ten nights. Don’t delay our observation of the new students. Although it’s already very difficult to recruit new students who have entered an epiphany with the help of Kunlun Travel, there are still some who are slightly inferior. As long as they’re not too bad, it’s fine.”

“I want to see it with my own eyes, not watch some video. Get out of my way. Don’t disturb me from observing the new students.”

..

A group of first-year teachers argued endlessly. They were helpless about the current situation at Kunlun University. Anyone who could enter an epiphany in Kunlun depended on luck, but they also needed a certain amount of talent and aptitude, unless they were especially lucky.

However, as one of the top 100 universities in the Milky Way Federation, it was very difficult to recruit geniuses of this level. That was why it took a long time for new students to have an epiphany.

If it was the top ten super universities in the Milky Way Federation, the chances of the freshmen there having an epiphany through the Kunlun Tour would be much higher.

The teachers of Kunlun University also knew the reason. However, even though they knew, they still felt indignant. After all, Kunlun University had been so glorious in the past. It had even been hailed as the number one university of mankind. Now, it had declined to such a state.

At this moment, Zhu Wuwan walked towards the main entrance of the school with a calm expression. Because the body Wang Debao had transmigrated into was quite good-looking and should be able to score above 80 points, it attracted the attention of several senior sisters.

As for the group of teachers, basically no one paid attention to Zhu Wuwan. They only swept their eyes over him. Their main focus was still on the students who had fallen into Kunlun.

Zhu Wuwan vaguely sensed something and stepped into the school. The moment Zhu Wuwan stepped into the school gate, the special admission notice on her body resonated with an inexplicable power of Kunlun University and surged into Zhu Wuwan’s spirit.

Zhu Wuwan only felt her mind go into a trance as she fell into a special state. She was calm, her heart was as clear as ice, and there were no distracting thoughts. The sky was clear for thousands of miles...He had actually experienced some of the special aspects of the meditative state in advance.

Then, his spirit left his body and roamed the entire Kunlun Mountain under the guidance of a special power.

This was the Kunlun Tour, and it was also a good opportunity for all the freshmen who entered Kunlun University. As for whether they could grasp it, it all depended on the individual.

Read I'm Leveling Up Too Quickly Chapter 981 - 981 Enlightenment (1)

Chapter 981: Enlightenment (1) Chapter 981: Enlightenment (1) Zhu Wuwan had originally wanted to use the Kunlun Tour as an opportunity to create a scene of enlightenment and logically increase his all-round strength.

However, what Zhu Wanhao did not expect was that perhaps because his comprehension was strong enough, he actually fell into an epiphany during this Kunlun tour.

However, thanks to the main body's assistance, Zhu Wanwan was actually able to control the direction of the avatar's epiphany. In other words, if he wanted to comprehend his spiritual cultivation base, he could comprehend his spiritual cultivation base. If he wanted to comprehend hypnosis, he could comprehend hypnosis, or he could develop his brain to comprehend it.

There were all kinds of aspects.

After a brief consideration, Zhu Wuwan first focused on the enlightenment of his spiritual cultivation base. Accompanied by a strange power fluctuation, a spiritual power between heaven and earth swarmed toward Zhu Wuwan.

Zhu Wanwan's spiritual cultivation base began to improve at an astonishing speed. In an instant, she broke through the bottleneck and advanced to the meditative state.

The so-called meditation was when one's spiritual cultivation reached a certain realm, one would be able to get rid of their inner demons, eliminate all distracting thoughts, and enter a special state with clear skies.

In this state, one's potential could be developed to the greatest extent, and one's vitality could grow rapidly.

They could even communicate with each other through their minds. When a spiritual will shot out, they could instantly connect with the minds of others and see each other's thoughts and thoughts.

Meditation was also divided into three stages, namely Small Concentration, Great Concentration, and Permanent Concentration. The growth limit of the spiritual cultivation base of Small Concentration was 3, the growth limit of Great Concentration could be cultivated to 7, and the growth limit of Permanent Concentration could be cultivated to 10.

If one's spirit cultivation base could not be improved, then one's life force could forget about improving.

After advancing to the meditative state, the abnormalities around Zhu Wuwan became even more obvious, and the fluctuations of his spirit force became even more intense.

Dozens of seconds had already passed, and people had already begun to notice Zhu Wuyang's abnormality. The more than a hundred first-year teachers who were paying attention to the situation at the main entrance of the teahouse were also surprised.

"That freshman is strange. The surrounding energy fluctuations are a little powerful, it seems ... It seems to be the fluctuation of spirit force. No, it should be the improvement of spirit force brought about by enlightenment, right?"

"It can't be. I just said that it has been many years since a new student has been able to gain enlightenment in Kunlun. Could it be that one will appear in the blink of an eye? Is it such a coincidence?"

"It's indeed a little long, but there were many freshmen who stood for so long before this. Some of them were simply unable to withstand the shock, so they were dumbfounded. Some even lasted for a few minutes, so this might not be an epiphany."

"Let's observe him a little more. I feel that the energy fluctuations around him are a little strange. No, this is the fluctuation of entering the meditative state. Even if it's not an epiphany, to be able to enter the meditative state at this time, he must be one of the top geniuses among the freshmen. Our Battleship Academy wants this freshman."

..

When they realized that Zhu Wuyang might have broken through to the meditative state, the group of teachers panicked a little. They didn't even bother drinking their tea. They turned into streams of light and rushed toward Zhu Wuyang's location. Soon, they chased away the surrounding freshmen to prevent them from affecting Zhu Wuyang.

As the distance got closer, the group of teachers could clearly feel the energy fluctuations around Zhu Wuyang. They were indeed the fluctuations of enlightenment.

"It's true. This is really an epiphany. It's a genuine epiphany. There's absolutely nothing unusual about it. It's been decades. Kunlun University has finally produced another student who can have an epiphany in Kunlun. It's really rare."

"I see that this student has delicate features. With such a small cultivation base, he has already broken through to the meditative state. Clearly, he is very suitable to study the universe's mineral resources with me. In the future, he will be a new student of our Mining School."

"Damn, where did you see that he's suitable to study cosmic mineral resources? What does spiritual cultivation have to do with cosmic mineral resources? I think he's more suitable to study mecha."

"Don't say anything else. Biology is the most suitable for him. The higher one's spiritual cultivation is, the more powerful creatures he can capture."

..

After the group of teachers ensured that Zhu Wuwan would not be disturbed, they started fighting over her. However, the reason they gave was really unreasonable, making the surrounding freshmen dumbfounded.

Meanwhile, Zhu Wanhao, who was in a state of enlightenment, was still soaring in his spiritual cultivation. Moreover, in half an hour, he had soared all the way to the Great Determination Realm, causing the onlookers to stare blankly once again.

Initially, he thought that Zhu Wuan's epiphany was about to end. However, he did not expect that Zhu Wuan still did not wake up and was still in the midst of epiphany. However, this time, the epiphany did not seem to be related to his spiritual cultivation. From his unconscious movements, it was obvious that he was in the midst of epiphany regarding hypnosis.

Very soon, Zhu Wuyang's hypnosis skills had reached the level of an intermediate hypnotist. If such hypnosis skills were to be described as money, one session of fixed hypnosis could earn at least 100,000 breakthrough stones. With a little more fame and a little more skill, it was even possible to earn more than a million or even more.

With Intermediate Hypnosis, Zhu Wuyang would become a billionaire in minutes.

Many onlookers were already a little dumbfounded. It was fine if a new student who had just entered the school had raised his spiritual cultivation to the fixed realm in Kunlun. Even his hypnotism had been raised to the level of an intermediate hypnotist. Could it be so exaggerated?

"I know who he is. He should be Wang Debao, a high school prodigy who was personally recruited by the higher-ups of the student recruitment office at Yellow

Mountain High School a few months ago. It's said that when he was seventeen years old, he had an epiphany and raised his spiritual cultivation to the third stage of deep sleep. He also mastered low-level hypnosis, and his attainments are quite high. He even has a natural talent in perception, which is why he chose Kunlun University."

"It's said that this guy left some of the top 30 universities in the Milky Way Federation and didn't join them. In fact, after a while, even the top 10 super universities in the Milky Way Federation might throw him an olive branch. However, he only took a fancy to Kunlun University. Even many of the higher-ups of the university knew about this and were happy for a while."

"He's been silent for seventeen years, yet he fell into a state of epiphany the moment he was awakened. Then, he soared into the sky. He's simply a model of motivation. I didn't expect that he would fall into a state of epiphany again after coming to Kunlun University just a few months ago. I've never heard of his strong perception."

"Most importantly, the duration of his epiphany this time is a little too shocking. It has been almost an hour, and he is still in the midst of epiphany. Most people only have an epiphany for a few minutes at a time. It is rare for it to last for more than half an hour, let alone close to an hour, and it is still continuing."

..

Read I'm Leveling Up Too Quickly Chapter 982 - 982 All-round Enhancement (1)

Chapter 982: All-round Enhancement (1) Chapter 982: All-round Enhancement (1) The group of teachers who were watching were all shocked. Many freshmen and seniors were also attracted over. They looked at Zhu Wuyang, who was still in a state of enlightenment, in astonishment.

They also gradually noticed that Zhu Wuyang's hypnosis was rapidly improving, and they could not help but shout. If it were not for the enchantment set up by the teachers around them, they would have woken Zhu Wuyang up.

"No way. This student looks very young. He should be only 17 or 18 years old. He actually mastered low-level hypnosis and has now reached the rank of an intermediate hypnotist. Moreover, he is still improving rapidly. Can it be so exaggerated?"

"With this kind of hypnosis, our new classmate's life will not be bad in the future. He has even surpassed most of the graduates. Even in the top ten super universities in the Milky Way Federation, this kind of hypnosis can be considered powerful."

"He's already mastered a money-making technique that even graduates from a super university can't. Our school is going to produce another big shot. Even if his hypnosis

can't improve in the future, intermediate hypnosis is enough to ensure that he can enter the upper echelons of society. ”

“I really didn't expect that Kunlun University would be able to recruit such a prodigy this year. I thought that such prodigies would usually go to those super universities.”

..

Amidst the exclamations, Zhu Wuyang's hypnotism continued to improve. Not only did it completely stabilize the strength of an intermediate hypnotist, but it had also vaguely reached the peak of an intermediate hypnotist.

With just a little training, this kind of hypnosis could be charged for about 10,000 yuan at a time, and there was no need to worry about not having any business.

Then, the speed at which Zhu Wuyan's hypnosis improved began to slow down. Just as everyone thought that Zhu Wuyan's epiphany was about to end, something unexpected happened again.

Zhu Wuyang's surroundings were once again filled with the fluctuations of enlightenment!

This time, he was clearly enlightened in the area of brain development. He had actually gained enlightenment in three areas again, and gasps could be heard around him.

“This ... It's already been an hour and a half, and he can still continue to have an epiphany. Is it so exaggerated? Speaking of which, which freshman has the longest epiphany in Kunlun University's history? How long did he have an epiphany at that time?”

” If I remember correctly, the freshman with the longest time of enlightenment in Kunlun University's history is Chen Dong. Thousands of years ago, he had a total of six hours of enlightenment during the Kunlun Tour. Compared to Chen Dong, Wang Debao's one and a half hours doesn't seem to be much. ”

” That's true. It's just that it's been a long time since such a Heaven's Favorite has appeared. That's why it's a little surprising. However, an hour and a half is getting shorter and shorter. Moreover, Wang Debao's epiphany is clearly still continuing. ”

” It's just a pity. The epiphany this time is still multi-directional. If Zhu Wanhao had been enlightened in the aspect of spiritual cultivation, she might have been able to advance her spiritual cultivation to the state of constant stability this time. There's even a possibility of breaking through to constant stability. That would be amazing. ”

” I also feel that the epiphany of hypnosis is a bit of a pity. I was about to break through the category of intermediate hypnosis and enter advanced hypnosis, but the epiphany

changed my direction. Once I can master advanced hypnosis, I will definitely be a big shot in the Milky Way Federation in the future. What a pity. ”

..

The group of students and teachers were either regretful or regretful as they continued to wait for Zhu Wuyang. Zhu Wuyang’s epiphany regarding brain development this time lasted especially long.

This was naturally to prepare for the subsequent research and explanation of his own perception. At the same time, Zhu Wuwan also discovered something to her surprise. The avatar’s epiphany towards the development of the brain could actually affect the main body.

The main body’s brain development had already reached a certain level, but under the effect of the avatar’s epiphany, it actually began to improve again, allowing Zhu Wuwan’s comprehension to improve further.

As the time of enlightenment increased, so did his brain development.

Unknowingly, another half an hour had passed. There were even more teachers and students watching. All of them could not help but reveal shocked expressions.

” It’s been two hours. It’s already been two hours, and he hasn’t stopped yet. Such an epiphany time can be ranked in the top 100 in the history of Kunlun University. ”

” I just checked. He should be ranked in the 160s. I didn’t expect Kunlun University to have so many geniuses in the past. I thought Wang Debao was already powerful enough. I didn’t expect there to be even more powerful geniuses before. ”

” Kunlun University used to be the number one university in the past. No other university could compare to it. However, because it took the wrong path and focused on studying the Myriad Realms Heavenly Sphere and the cosmic passage, it gradually declined.

” Although it’s not strong enough in terms of cultivation and technology, Kunlun University’s research ability is unparalleled in the world, especially in the study of the universe passageway and the Myriad Realms Heavenly Sphere. It has reached an unimaginable level. It’s not completely useless. ”

..

Amidst the chatter, Zhu Wuwan’s enlightenment time went from two hours to two and a half hours, surpassing dozens of new records and gradually advancing toward the top hundred.

" It's been quite a long time since he had the epiphany of brain development. It seems like he has improved quite a bit. This is definitely a great thing for us researchers. No wonder Wang Debao chose Kunlun University. It's obvious that he knows that he has the talent in this area. "

" It's said that the epiphany at Yellow Mountain High School lasted for about three classes, which was about three hours. Most of the time, the epiphany was in the development of the brain, so Wang Debao's comprehension is definitely beyond imagination. "

" The last epiphany lasted for about three hours. With Kunlun Tour's bonus, we should be able to have an epiphany for a longer time. So, two hours is nothing. Let's just continue watching. We might be able to enter the top dozens of historical records. "

" That's right. He was able to have such a long epiphany before, and it was in a messy classroom. The conditions weren't too good. This time, with the addition of Kunlun Tour and our guardians, he has created a better environment around him, allowing all kinds of spiritual qi and special forces to become more active. He will definitely be able to surpass the previous epiphany and make another record in the top 100 in history. "

"How can it be enough to be in the top 100 in history? I have to at least reach the top 50. It's only about four hours. It depends on whether Wang Debao can do it this time. If he can do it, it will be extremely beneficial for his future development. I really didn't expect that such a top genius would appear in the blink of an eye."

..

Chapter 983: Poaching (1) Chapter 983: Poaching (1) The time Zhu Wuwan spent in her epiphany continued to increase, and the surrounding discussions gradually began to change.

After three hours of Zhu Wuwan's epiphany, someone started to exclaim.

" It's been three hours. You're in the top 100 in history. You're amazing, bro. "

"D * mn, so strong."

..

When Zhu Wuwan's epiphany lasted for more than four hours, the exclamations became even louder.

" He's about to surpass the top 50 in history. Wang Debao is really strong. He's actually able to comprehend for such a long time. "

" Kunlun University is finally going to produce a decent prodigy. The heavens have opened their eyes. "

..

Amidst the exclamations, Zhu Wuwan's epiphany lasted for four and a half hours.

" He hasn't stopped yet. He should be ranked around the top 30 in history. "

" What he has been enlightened for so long is brain development. How much can Wang Debao's brain development improve? In the future, Kunlun University will produce another research genius. "

..

By the time Zhu Wuyang's epiphany had lasted for more than five hours, some of the surrounding students were already a little numb.

" I couldn't even comprehend it for a minute, but this guy managed to comprehend it for more than 300 minutes in one go. How much benefit can he get? "

" It's a pity that it's not in the aspect of spiritual cultivation. Otherwise, wouldn't this epiphany raise his spiritual cultivation to the Embryonic Breathing realm and make him one of the experts in a single leap? "

" The energy fluctuations around Zhu Wuyang are already a little abnormal. His epiphany should be coming to an end soon. "

" Top 20 in history. Wang Debao is really strong. "

..

Finally, when the epiphany time reached the top ten in history and lasted for five hours and more than twenty minutes, Zhu Wuwan's epiphany ended.

At this moment, his ability in brain development had increased by more than ten times. If he combined it with his main body's comprehension ability, his speed would be much faster than before.

Just as Zhu Wuan stopped, the barrier around him was opened. Then, a large group of teachers swarmed over and completely drowned Zhu Wuan.

"Student Wang, why don't you join our Cultivation College? You've already reached the Great Determination Realm at such a young age. You're definitely an overwhelming prodigy in cultivation. With the help of our Cultivation College, your vitality will increase

to 5 points in minutes. You'll have superhuman combat strength and a long lifespan. The Cultivation College is your best pursuit."

" Student Wang should know very well how the Cultivation College of Kunlun University is like. If you wanted to learn cultivation, you wouldn't have come to Kunlun University. You should choose our Battleship College. We can research and build the strongest battleships in the Milky Way Federation, conquer planets and worlds, and become the supreme king of science for mankind. "

" Welcome to the Myriad World College. Student Wang, our Myriad World College is the strongest research institute in the Milky Way Federation. We have basically discovered all the cosmic passages on Planet Earth. The benefits that these cosmic passages bring to humanity are well known. Once a new world is discovered, a large portion of the benefits that the Milky Way Federation obtains from it will be divided into you. At that time, you will be able to enjoy endless glory and wealth. If you want to cultivate, you can cultivate. If you want to pilot a battleship, you can pilot a battleship. You can realize any dream. "

" There are many beauties in the School of Humanities. If Student Wang agrees to come to our School of Humanities to do research, I can send all three thousand beauties to you. You can order them around and use them to study the study of Humanities. I guarantee that you won't be lonely. "

..

" F * ck, " Zhu Wuwan almost vomited blood when she heard the teachers 'persuasion. " Do you have to be so exaggerated? " Although everyone knew that Kunlun University's School of Humanities had many beautiful women and all kinds of peerless beauties were everywhere, were you sure you could make the decision for them?

Although Zhu Wuyan also liked to study the human world with the stunning beauties, compared to this, Zhu Wuyan liked the origin of the world more, so she would rather decline.

Zhu Wanhao was currently considering which academy to choose. The Myriad Realms Academy was a must, so there was no need to think about it anymore.

However, before Zhu Wuyang could make a decision, some teachers had already started to make their move.

" What's there to fight for? The student recruitment office has already agreed to send Wang Debao to our biology department. With Wang Debao's attainments in brain development, it would definitely be better for him to come to the biology department to study superweapons. Who knows, he might even be able to create a special army in the future. Don't push me, let me in. F * ck, you're still pushing me, I'll push you too. "

"He has just entered the academy and his spiritual cultivation has already reached the Great Determination Realm. He is definitely a cultivation genius. He will definitely go to our Cultivation College. No one can snatch him from us. Take this punch."

"If you dare to touch me again, I'll drive the battleship over. When the time comes, I'll blow you all up. The Battleship Academy is related to the direction of the entire Milky Way Federation. Student Wang, you must choose our Battleship Academy."

"Don't push me anymore. Let me go in and have a word with Student Wang. Although our dance academy is a little small and has a small number of students, most of the students are stunning beauties. Moreover, their bodies are super soft, and the female students are also super open. You can come and have fun."

"Damn it, are you still teachers? Do you have to promote your own academy like this? Aren't you afraid that those female students will scold you when they hear it? Student Wang, why don't you come to our Education Faculty? There are many girls in our Education Faculty, and each of them is an expert in education. When you have children in the future, you will definitely be able to educate your children into talents."

..

In order to compete for Zhu Wuyang, these teachers no longer cared about their reputation as teachers. They tried their best to bring out the most presentable things from their respective academies to tempt Zhu Wuyang, hoping that Zhu Wuyang would join them.

Even though he knew that with Zhu Wuyang's strength, he might have his own reasons for choosing Kunlun University, as long as there was a certain possibility, it was enough. Perhaps Zhu Wuyang would be tempted and decide to join a certain college.

Many freshmen and seniors were dumbfounded. This was the first time they had seen such crazy teachers. When they first entered the school, let alone being fought over, it seemed like they didn't even get to see the teachers.

By the way, Zhu Wuyan had already chosen her major and college in advance, which was the Myriad Realm College.

But even so, these teachers were still fighting to the death. After all, changing majors and colleges was just a piece of cake for them.

As long as Zhu Wuyang was willing, they could help Zhu Wuyang move to their academy in minutes. So, even if he had a home, they had to poach him over.

A student like Zhu Wanhao had a very high chance of bringing great influence to their respective academies in the future. Who wouldn't want to snatch her over?

Chapter 984: Rich (1) Chapter 984: Rich (1) Facing the teachers who swarmed over, Zhu Wuyang was also a little speechless. It was not easy to get rid of them, but she was still firm in her previous choice.

The teachers of the Myriad Realm College were like generals who had just won a battle. They surrounded Zhu Wuyang as they walked towards the Myriad Realm College. As they walked, they couldn't wait to give Zhu Wuyang generous treatment.

"Debao, our Myriad Realm Academy will definitely not disappoint you. As the most powerful research institute for cosmic passageways in the Milky Way Federation and the Human Race, our Myriad Realm Academy has discovered too many cosmic passageways on Planet Earth. To put it bluntly, half of the cosmic passageways on Planet Earth are discovered by our Myriad Realm Academy. Therefore, our Myriad Realm Academy can receive a huge amount of wealth from them every year. "

"That's right. Our Myriad Fields College is the richest college in Kunlun University. Even in the entire Milky Way Federation, our Myriad Fields College is also one of the richest colleges. Here, you can obtain most of the natural treasures of the Milky Way Federation. Of course, what you lack is the most advanced cosmic research data of the Milky Way Federation. "

"Debao, we also know that your cultivation base is not bad and your talent in this aspect is very strong. Although our Myriad Realms Academy isn't a cultivation academy, the key to cultivation is wealth, partners, law, and land. Wealth is clearly ranked first and is also the most important. At the same time, this is also the greatest help our Myriad Realms Academy can provide you."

"That's right, because our Myriad Realms Academy doesn't have many geniuses in the cultivation field. However, the quantity of heavenly resources is extremely high, and the supply has always exceeded the demand. We can give you all of these for you to use. Now, we can bring you to choose some. During your research, you can use these heavenly resources to increase your strength. It can really be said to be killing several birds with one stone. Why not? "

..

Several teachers unceremoniously made all kinds of conditions, which made Zhu Wuwan a little stunned. Such treatment could no longer be described as generous. It was simply treating him like his own son.

However, Zhu Wuwan was also very clear in her heart. Perhaps it was just as these teachers said. The Myriad Realms Academy could provide him with many heavenly and earthly treasures, but the best batch still required Zhu Wuwan to pay a certain price and produce a certain amount of research results before he could obtain them.

If one didn't have enough merit points, even the higher-ups of the Myriad Realms Academy wouldn't dare to give too precious treasures to Zhu Wuyang. Hence, one had to be tough to forge iron.

Only when Zhu Wuyang displayed enough strength and ability and made corresponding contributions could he obtain the best harvest.

However, it was true that the Myriad Realm Academy's treatment was generous. In just an hour or so, Zhu Wuyang had obtained dozens of heavenly and earthly treasures from the various warehouses of the Myriad Realm Academy. All of these could bring him considerable benefits.

As for the admission procedures, the teachers naturally handled them. In order to allow Zhu Wuyang to cultivate and study better, the school had even specially set aside an independent small courtyard for him so that he could live more comfortably.

In this small courtyard, the various facilities weren't inferior to many teachers. There was even a laboratory that was worth no less than a few million credits. It could be seen that the Myriad Realms Academy treated him well.

Of course, if Zhu Wanhao hadn't displayed her talent and luck at the school gate, which allowed her to gain enlightenment for more than five hours, and even managed to enter the top ten in Kunlun University's history, she wouldn't have been able to obtain such generous conditions.

There was also Zhu Wuwan, whose epiphanies were basically all about the brain, which was of great use to research. Some of the school's higher-ups even secretly speculated that after these two epiphanies, Zhu Wuwan's brain development should have reached the forefront of Kunlun University.

Zhu Wuwan did a test in private and was surprised to find that his brain development had reached 26%. If converted to IQ, it was more than 200.

Everyone on Earth knew that Einstein's brain development was only around 15%. Zhu Wuwan's brain development was almost twice that. If he added the help provided by his main body, Zhu Wuwan's brain development would probably reach more than 50%.

Of course, this fifty was a flawed fifty. There were some aspects that Zhu Wuyang couldn't do.

Even so, Zhu Wuyan's brain development and intelligence had reached the highest level in Kunlun University's history. Even without the main body, Zhu Wuyan's brain development and intelligence were still ranked in the top few in Kunlun University.

However, Zhu Wuan did not reveal it. This could be considered a trump card. Moreover, the wind would destroy the tree that stood out in the forest. Once this matter was spread, it would easily attract the attention of those races that hated the human race.

Zhu Wuyang's vitality was still relatively weak right now, and she wouldn't walk the path of fighting and killing in the future, so it was better to keep it a secret.

In the next few days, Zhu Wuyang basically didn't learn anything. She went around paying visits to the higher-ups of the Myriad Realm Academy and was encouraged and given gifts by them. These gifts were enough to fill Zhu Wuyang's storage ring.

This storage ring was given to him by the vice president of the Myriad Realms College. It was worth tens of millions of credits, and the space inside was as big as several basketball courts. It was a treasure obtained from another world.

Just the value of this storage ring alone was already extraordinary, comparable to the entire net worth of many teachers. One could imagine how much importance the Myriad Realms College placed on Zhu Wanhao.

In addition to the treasures in the storage ring, Zhu Wuwan's net worth soared to more than 100 million in just a few days. She was a true billionaire.

Zhu Wanwan didn't expect that the demonstration at the school's main entrance would actually reap such astonishing benefits. He had also somewhat underestimated the horror of having an epiphany for more than five hours.

However, Zhu Wuwan had no choice at that time. She had wanted to pretend, but she did not expect to really fall into an epiphany. When she felt the feeling of the avatar and the main body improving at the same time, Zhu Wuwan was also intoxicated. After all, this was probably the only chance.

When Zhu Wuwan left this great world, without the special structure of the clone, even if the main body could enter an epiphany, it would probably not be able to obtain huge benefits like brain development.

The main body of the Dongyuan Continent certainly contained a lot of potential, but the potential of the brain was not as shocking as the humans of the Huaman Multiverse.

The brain development of the Dongyuan Continent was Zhu Wuwan's power of heaven essence. When it increased, it broke through the limits again and again, advancing towards a higher level. It was not similar to developing one's own potential.

However, if the humans of the Huaman Multiverse fully developed the potential of their brains, it would be far more difficult for them to break through the limits than for the cultivators of the Dongyuan Continent.

Chapter 985: Whirlpool (1) Chapter 985: Whirlpool (1) With a full harvest, Zhu Wuyan threw herself into learning.

Unlike other students, Zhu Wuwan didn't study with her teacher. Instead, she spent most of her time in Kunlun Library.

The enormous Kunlun Library was nearly 100 square kilometers in size and had nine floors. All kinds of knowledge and materials were stored inside. It was one of the largest libraries of the human race.

In addition to all kinds of books, there were also a large number of discs, memory cards, photon processors, and so on. The amount of knowledge stored here was ten times or a hundred times more than that of Dongyuan Continent. The two were simply incomparable.

If one had to make a comparison, it would be that the knowledge and information stored in this library were tens of thousands of times more than all the knowledge and information on Earth.

There were so many things, and even if only a small portion was useful to Zhu Wuwan, it would still be an astronomical figure. It would be very difficult for Zhu Wuwan to learn all of them.

Therefore, Zhu Wuyang could only choose the knowledge and materials that were most useful to him. Some of these knowledge and materials were of a higher level and required a higher level of authority. This required Zhu Wuyang to make corresponding contributions and so on in order to increase his authority.

However, because of the epiphany at the school gate, Zhu Wuyang had already obtained the two-star authority of the Kunlun Library. For the time being, two-star authority was enough.

Zhu Wanhao was immersed in it hungrily, completely unaware of the passage of time. During this period, many teachers wanted to teach him personally, and some teachers asked him to learn with everyone.

However, when Zhu Wuwan revealed the knowledge she had mastered, these teachers fell silent. This was because when the other students had just started learning the general knowledge, Zhu Wuwan had already learned more than half of the first-year knowledge. Moreover, her mastery was not inferior to the teachers.

Under such circumstances, it would be a waste of time to let Zhu Wuhao learn with other students. Therefore, the teachers only considered it for a moment and allowed Zhu Wuhao to learn by herself.

This was also the fastest way for Zhu Wuyan to grow. A large amount of knowledge and information surged into Zhu Wuyan's mind and became Zhu Wuyan's resources, allowing Zhu Wuyan's clone and main body to obtain considerable benefits.

In fact, it only took half a month for Zhu Wuyang to master all the things that needed to be learned in four years of university. She even surpassed some teachers.

What Zhu Wuyan learned next was something that was not part of the curriculum. Some of the projects she studied were comparable to some professors, but Zhu Wuyan temporarily hid it and did not dare to expose it.

After all, the epiphany at the school gate had an astonishing influence. Not only did it bring benefits to Zhu Wuwan, but it also brought some negative effects. Some of the enemies from other races lurking among the human race had already targeted Zhu Wuwan.

If it wasn't for the fact that Zhu Wuwan had been staying in Kunlun University and never left the school gate, someone would have already made a move.

Even so, if Zhu Wuyang revealed even more terrifying abilities, some races would rather take a huge risk to come in and kill Zhu Wuyang.

Therefore, Zhu Wuwan would hide 99% of her abilities appropriately and prepare to accumulate them. When she left this great world, she would give everyone a huge surprise.

Zhu Wuyang had done this kind of thing many times, so she already had a wealth of experience. It could be said that she was familiar with it and it was very simple to do it.

Other than avoiding the danger of being destroyed by the wind, Zhu Wuyang didn't relax in his cultivation either. With the abundant resources provided by the Myriad Realms Academy, even if Zhu Wuyang only spent a portion of his time and energy on cultivation, his vitality was still rising rapidly.

In just half a month or so, Zhu Wuyang's vitality had already reached 2 points, and it was still soaring at a high speed.

With Zhu Wuwan's current spiritual cultivation base, she could support more than 7 points of vitality. Therefore, Zhu Wuwan would continue to improve rapidly for a long time.

This speed of improvement had also reached Zhu Wuwan's current limit. At least, it was the limit on the surface. If it was any faster, it would be easy to be suspected.

In any case, Zhu Wuyang wasn't going to dominate the world with martial arts for the next hundred years, so he didn't need to be so powerful. Therefore, it was quite good to maintain his current speed to avoid causing more trouble.

However, in the eyes of others, Zhu Wuyan's vitality was increasing at a rapid rate, far surpassing any prodigy of Kunlun University.

However, because Zhu Wuwan rarely appeared in front of others, not everyone had mastered powerful detection techniques, so not many people knew about it.

Zhu Wuwan's greatest gain was still knowledge. A lot of Kunlun University's knowledge could bring him considerable benefits, and it was also beneficial to his main body.

Zhu Wanwan's main body had already successfully created a way to activate the power of the spirit through the classics and cultivation techniques of the two worlds. He had also improved the Dongyuan Continent's version of the Spirit Sutra, allowing his main body to embark on the path of spirit cultivation.

Although the spirit force of the Dongyuan Continent was not as powerful as that of the Huaman Multiverse due to the laws of the world, it was still far from what ordinary cultivators of the same level could compare to.

However, his spirit force was still too weak at the moment. He needed Zhu Wuwan to cultivate and improve it well in the future. Otherwise, it wouldn't be of much use.

Time passed bit by bit. Zhu Wuwan was completely immersed in a large number of books and cultivation techniques, gradually disappearing from everyone's sight.

This action gave Zhu Wuwan a lot of free time to master what she wanted. At the same time, she also researched many things that were useful for earning the world's origin, but it slowly made many people suspicious.

After all, the commotion caused by Zhu Wuyang's enrollment was too big. Everyone was still waiting to continue watching his performance, and there was no lack of envy and jealousy among them.

Many student organizations also wanted to invite Zhu Wuyang to join them, but they were all rejected by Zhu Wuyang. The reason was also very blunt, which was to avoid wasting time.

This undoubtedly caused some organizations to be dissatisfied with Zhu Wuyang. In addition, Zhu Wuyang had basically not attended a single class since he entered the school, so no one knew about his progress. Therefore, some rumors began to slowly form.

The source of these rumors was basically those who hated Zhu Wuyang, and there were also some organizations that did not recruit Zhu Wuyang. Time passed day by day, and half a year had passed unknowingly.

In this half a year, the treatment Zhu Wuyan received was simply astonishing. Naturally, it also affected the interests of some of the students of the Myriad Realms College. Even the interests of some teachers were affected.

As a result, when the rumors began to spread, it immediately attracted the people whose interests were affected. A wave of people targeting Zhu Wuyang began to appear.

Chapter 986: Proof (1) Chapter 986: Proof (1) “I originally thought that a peerless genius had arrived from the Myriad Realms Academy. But now, it seems that this isn’t a peerless genius, but a peerless idiot. It’s been half a year, but Wang Debao hasn’t done anything. I wonder what he’s been doing all day. The school’s higher-ups must have seen wrongly this time.”

” Some of the new geniuses who received far less treatment than Wang Debao had already produced research results. However, Wang Debao, who received such generous treatment, not only did he not produce any results, but his cultivation realm did not seem to have improved much either. At least, I haven’t heard anyone say that his vitality has broken through to more than two points. ”

“He’s still a cultivator at the Great Ding Realm, and he’s even received so many resources from the Myriad Realms Academy. If he can’t even break through two points of vitality, then he’s really too stupid. Not to mention, the increase in vitality isn’t the most important thing to our Myriad Realms College. Research is the most important. Even if Wang Debao can’t produce any powerful research results, it’s good that he can produce some ordinary ones. At least we’ll know that he doesn’t live up to his reputation.”

” That’s right. Wang Debao has already obtained so many benefits from our Myriad Realms Academy. He should at least take out something. This way, we can also shut up Youyou’s mouth. If we say that we haven’t gained anything in the past few months, then so be it. But it’s already been half a year, and we still haven’t gained anything. It doesn’t make sense to anyone, right? ”

..

The gossip began to spread throughout Kunlun University, and it was obvious that they were targeting Zhu Wuan. After all, these people who disliked Zhu Wuan were not very intelligent. Many of them were just ordinary students. If they inadvertently joined forces, they would be able to stir up a storm.

To be honest, with Zhu Wuyang's situation, it was not as exaggerated as they had made it out to be. Kunlun University had many cases where there were no results for years or decades, but there were cases where they became famous overnight. Zhu Wuyang had only been silent for half a year, so it was nothing at all.

It was just that everyone had high hopes for Zhu Wuyang, and the Myriad Realms College was too good to him. In addition, Zhu Wuyang basically didn't socialize usually, which caused such a storm.

Although the school's higher-ups, and even the higher-ups of the Myriad Realm College who had sacrificed a lot for Zhu Wuyang, didn't care about this, as more and more people discussed this matter, Zhu Wuyang also felt that it was a little troublesome.

Therefore, after some consideration, Zhu Wuwan decided to come up with something to shut these people's mouths so that she could have some peace.

And the results that Zhu Wuwan had produced were only ranked below the 100th among the research results he had produced since he had transmigrated to the Huaman Multiverse. It was also an improvement to the first level of the Heart Sutra.

Although he had only improved a few sentences and added a sentence, it could make the cultivation of the first level of the Heart Sutra more stable, and its power could also increase by about 1%.

It didn't seem like much, but almost everyone in the Milky Way Federation cultivated the Spirit Sutra, and there were no less than a trillion of them. If everyone cultivated the improved first level of the Spirit Sutra, their overall strength would increase by 1%. How big would that be?

Of course, those who had already cultivated it might not have such a great effect, but it could also slightly increase the power of their Heart Sutra. It was also useful to them.

Moreover, Zhu Wuwan had only improved the first level of the Heart Sutra, which was considered the most basic cultivation of the heart. It could be explained as an accidental flash of inspiration, and it would not arouse any suspicion.

It wasn't that such a situation hadn't happened in the past. Moreover, the research on the improvement of the best and most fundamental Spirit Sutra of the human race wasn't a small matter even in the top ten super universities of the Milky Way Federation, let alone Kunlun University. It could bring about a huge impact.

Zhu Wanhao had also carefully considered the results of this research, which was why he had chosen this research result. In fact, this research result was a simplified version. In fact, Zhu Wanhao had improved the first six levels of the Spirit Sutra, and even the last three levels had some improvements.

Once he took all of them out, it could completely increase the overall power of the Heart Sutra by more than three times. At that time, the influence it would bring would be a piece of cake for him to pry a thousand World Origin points, let alone a thousand.

The complete research results of the Spirit Sutra were ranked in the top ten among all of Zhu Wuwan's research results, and their influence was one of the best. However, Zhu Wuwan didn't dare to casually take them out for the time being. It was better to wait for a suitable opportunity in the future before taking out the complete improved Spirit Sutra.

Or rather, he could wait until Zhu Wuwan left before he took out the research results of the Spirit Sutra. Otherwise, if the influence of the move was too great and he directly obtained more than 10,000 World Origins, Zhu Wuwan would be speechless.

After some consideration, Zhu Wuwan brought the results of his research on the first level of the Heart Sutra to his freshman counselor, Song Jiangxing.

"Debao, why are you here today? Aren't you studying in the library? How is it? Do you need any help?"

When he saw Zhu Wuyang, Song Jiangxing welcomed him with a smile. There was nothing unusual on his face, and he did not take what had happened during this period of time to heart.

Although many teachers and students said that they were wrong, Song Jiangxing still believed in his own judgment. Moreover, it had only been half a year. There were many students who had no research results, so Zhu Wuyang was not a big deal.

Moreover, even if the students had research results, those research results were very ordinary. At most, they could only enjoy it in school and could not take it out at all.

Therefore, no matter how many research results there were, most of the teachers didn't care much. What they cared about were the research results that could bring changes to the entire human race, or even a portion of humanity.

Some people might say that although the current research results were a little poor, it also showed the potential of these students. It could prove that they were not inferior to Wang Debao. The treatment given to Wang Debao by the academy was too high, so they had to fight for it.

Although this made some sense, it was not universal for everyone.

"Teacher Song, I have a research result that needs to be reported and applied for the corresponding patent."

Zhu Wuwan said with a smile. Although he had only improved a few sentences on the first level of the Spirit Sutra, he could definitely apply for a corresponding patent. In the future, as long as someone practiced the Spirit Sutra that Zhu Wuwan had improved, it would bring Zhu Wuwan a certain amount of income. There were so many humans in the Milky Way Federation, and it was definitely not a small number.

Later on, when Zhu Wuyang improved the entire Heart Sutra, he would be able to obtain even more benefits, far more than now. Unfortunately, Zhu Wuyang would have already left by then, so he could only obtain some breakthrough stones and the world's origin.

Chapter 987: Good Results (1) Chapter 987: Good Results (1) Research results?

Patents!

It wasn't surprising that Zhu Wuwan had produced research results. After all, Zhu Wuwan's perception should be very strong. When she had an epiphany, she had spent so much time focusing on developing her brain. It was impossible for her to not be strong.

However, it was hard to say exactly how strong it was because Zhu Wuyang had yet to produce any research results.

However, if a research result could be filed for a patent, it would definitely not be an ordinary research result. At the very least, it could bring a lot of benefits. Otherwise, if there were no benefits, filing for a patent would be a joke and would be laughed at by others.

After all, there was a fee to apply for a patent. This was to make the researchers more cautious when applying for a patent. Moreover, doing so would take time.

Even with Kunlun Academy's endorsement, the time and energy consumed were not small, unless they took the school's special passage.

However, if the research results were average, Kunlun University would not allow them to go through a special passage.

"Alright, let me take a look first."

Although he had a lot of doubts in his heart, Song Jiangxing was still prepared to take a look at the research results first. Perhaps Zhu Wuwan had really developed something good. After all, his perception was so strong.

Zhu Wuwan smiled as she took out the first level of the Heart Sutra and handed it to Song Jiangxing.

“Uh ...”

Song Jiangxing wanted to say, “Isn’t this the first level of the Heart Sutra? Don’t tell me this is the result of your research? That’s a little ridiculous.”

However, he immediately thought of something. Song Jiangxing hurriedly opened the book and found that there was a page that had been deliberately folded. Song Jiangxing opened the page and saw that the middle section of the page had been red-marked and deleted.

Although it was only a few words, it made Song Jiangxing’s entire body tremble. He looked at Zhu Wuwan in disbelief. “This ... This ... Did you improve the first level of the Heart Sutra?”

“Not bad.” “That’s right.” Zhu Wuwan nodded. “After such improvements, the first level of the Spirit Sutra will be much safer to cultivate. Its power will also be slightly improved.”

“Hiss... No one has been able to improve the first level of the Heart Sutra for many years.” Song Jiangxing couldn’t help but gasp. He lowered his head and looked at it carefully, then tested it in his body.

A few minutes later, Song Jiangxing tested it many times and proved that there was no problem with Zhu Wuyang’s improvement. Moreover, it really had a positive effect.

This ... Amazing!

Song Jiangxing’s face was filled with excitement. “Treasure, this ... Did you really improve it?”

“It’s the real deal.” Zhu Wuwan smiled. “Previously, when I was cultivating, I had a flash of inspiration. However, I was limited by my knowledge at that time, so I didn’t gain much. Now that I’ve arrived at university, I’ve studied in the library for a few months. I finally grasped the flash of inspiration at that time and improved the first level of the Heart Sutra.”

“Alright, alright, alright.” Song Jiangxing repeatedly agreed, and he was so excited that he couldn’t control himself. “Although it’s just a few sentences, after some improvements, every word is like a gem. Once it’s released, it will definitely cause a sensation. It’s been a long time since Kunlun University has produced such amazing research results.”

“I really didn’t expect that you would be able to produce results in cultivation before you even produced results in the study of the cosmic passage. This result will definitely bring a lot of benefits to the cultivation of the Milky Way Federation. We must inform the school leaders immediately.”

Without thinking too much, Song Jiangxing immediately sent a telepathic message, informing the upper echelons of the Myriad Realm College of this matter.

“Swoosh swoosh swoosh swoosh swoosh swoosh swoosh swoosh...”

Along with a series of air-piercing sounds, dozens of leaders of the Myriad Realm Academy rushed over at high speed. Among them were the principal and vice principal of the Myriad Realm Academy.

“Teacher Song, is what you said true? Did Debao really improve the first level of the Heart Sutra, and it’s very effective? Is it possible to promote it to the entire Milky Way Federation?”

” It can’t be. The current version of the Heart Sutra is full of pearls and pearls, and there are no loopholes. Countless experts and masters in the entire Milky Way Federation have studied it for years, but they still haven’t found any mistakes or areas worthy of improvement. Now, they have found the treasure. ”

” Don’t talk nonsense. Let’s try it out first and see if it works. If it works, then it means that the improvements to Treasure are successful. Otherwise, it’s a failure. ”

“Yes, yes, yes. It’s best to find a few more youths who have just started cultivating the first level of the Heart Sutra and let them cooperate with us to experiment. I’ll go find them now.”

..

There were quite a number of humans living around Kunlun University. Very soon, several youths who had just started cultivating the first level of the Heart Sutra were found and began to cultivate the improved first level of the Heart Sutra in front of the school leaders of the Myriad Realms College.

Although they had already tested Zhu Wuyang’s improvements earlier, to ensure that there were no problems, it was better to let the young man at this stage cultivate.

When these youths were cultivating the improved first level of the Heart Sutra, the tens of higher-ups of the Myriad Realms Academy had been paying close attention to them. Their spirit force was constantly monitoring their bodies, and after a thorough cleansing, they discovered that the improved Heart Sutra was useful to everyone. It allowed their cultivation to become more stable, and the spirit force they cultivated became stronger.

“Good, as expected of the overwhelming prodigy who created Kunlun’s history again. His first research result is to improve our Milky Way Federation’s most famous Soul Book, and it’s very effective. This will definitely establish his position in the research world.”

“He’s really amazing. He’s only been in university for about half a year, and he’s already able to produce such amazing results. If Debao was given a few more years, who knows what kind of results he would be able to produce. Those scoundrels are also very shameless. They don’t have the ability and can’t bear to see others do well. They came up with some short procedures. Next, we have to teach them a good lesson.”

“That’s right. The combined research results of those guys are not as powerful as the research results of those few words, let alone the influence. This can definitely be applied for a patent. When the time comes, I’ll take it out and embarrass them. I’ll let them know what it means to be blind.”

“If nothing unexpected happens, this research result should be able to rank in the top ten among the research results of Kunlun University in recent years. You have to know that these research results include the research results of many old scholars and old professors in our university. The comprehension ability of De Bao is really too shocking. Those people have been complaining that we spoil De Bao too much. In a while, I’ll let them know what it means to be worth the money. De Bao’s strength is definitely worthy of such preferential treatment, and there’s no doubt about it. ”

..

Chapter 988: Bloom on Both Sides (1) Chapter 988: Bloom on Both Sides (1) The various leaders of the Myriad Realms College were also shocked by Zhu Wuchang’s research results. They immediately went through a special passage and applied for a patent for Zhu Wuchang on the same day.

Most importantly, this patent was also bought by the officials immediately. In the future, if anyone cultivated the improved first level of the Heart Sutra, Zhu Wuyang would be able to receive an official reward. It could also be considered an alternative share.

After all, the Heart Sutra was a free cultivation manual in the Milky Way Federation. Everyone didn’t need to spend money to cultivate it. The officials could only give Zhu Wuyang the share they deserved through rewards.

Moreover, if the adaptability and advantages of the improvements were proven in the future, perhaps another version of the Heart Sutra would be released soon. Once it was successful, Zhu Wuyang would definitely be famous all over the world.

Even so, this matter had a huge impact on Zhu Wuwan. In a short period of time, the World Origin had soared by hundreds of points, and it was still increasing.

Fortunately, Zhu Wuwan knew her limits and didn’t improve too much. Seeing that the speed of the world’s origin didn’t increase to a certain extent, Zhu Wuwan heaved a sigh of relief.

He had also calculated based on the influence of his previous actions, and then exposed such a research result. Not only could it reduce a lot of trouble for him, but it would also not allow his world origin to improve too quickly, avoiding irreparable consequences.

It turned out that Zhu Wuan had a better grasp of propriety. Even so, the crowd of spectators from Dongyuan Continent were still dumbfounded.

At that moment, the total amount of World Origin that Zhu Wanhao had earned from the three thousand worlds had already exceeded forty thousand points. Of which, thirty-eight thousand points came from the first great world, the Xuan Huang Great World, while the remaining thousand points came from the Huaman Multiverse. The World Origin brought about by this research result accounted for the majority.

Although he had been away for more than a year, Zhu Wuwan's influence in the Mysterious Desolate Great World was still growing, bringing him an endless stream of breakthrough stones.

This situation could still continue. After all, some of the things that Zhu Wuyang had done in the Mystic Desolate Great World had a shocking lasting influence. It was definitely not something that could end in a few years or decades.

At the very least, this influence would not end until Zhu Wuyan left the Huaman Multiverse. As for how much World Origin it would ultimately bring to Zhu Wuyan, Zhu Wuyan could not be sure for the time being.

Of course, during this process, Zhu Wuyang was still obtaining an endless stream of breakthrough stones. It could be said to be killing two birds with one stone.

Moreover, because Zhu Wuyan had "sacrificed his life" for the human race, it could be said that he had "died a great death." Under normal circumstances, people were more tolerant of the dead and would give more honor. After all, these honors were for the dead, and the dead could not compete with them for benefits.

Therefore, Xia Country and the human race had given all the honor they could. These were all due to their influence. Moreover, as the human race developed, Zhu Wuyang's influence would grow, and the world's origin would be shaken.

Moreover, the many inventions and creations that Zhu Wanhao had given to the human race in Xia Country were all practical. Most of them could bring considerable benefits to the human race in Xia Country and make them stronger and stronger.

Of course, there were also some who caused endless harm. In addition to harming the human race in China, they also harmed other races.

These could also stir up a lot of the world's origin, allowing Zhu Wuwan to obtain more of the world's origin.

Although Zhu Wuan was no longer in the pugilistic world, his legend was still circulating in the pugilistic world.

Now, Zhu Wanhao's influence in the Xuanhuang Great World was relatively large. Naturally, he could bring him an endless source of the world's origin. The speed of his growth made the onlookers dumbfounded. They did not know what to think.

Speaking of which, what kind of crazy things did Zhu Wanwan do in the first great world before she left? Why was she still able to obtain so much World Origin after leaving for so long?

Moreover, looking at the speed at which Zhu Wuyan's world origin source was growing, this was clearly not the limit. He could still obtain a lot of world origin source in the future.

However, when he looked at the other high-level cultivators, all of them were miserable. They were so happy that they could escape from the 3,000 major worlds in one piece. However, Zhu Wuwan was good. Not only did she escape in one piece, but she also obtained so much world origin energy.

Even if Zhu Wuan failed consecutively, no, he should have failed in the third Great World, he would not suffer any losses or harm his foundation.

This was because Zhu Wuwan had already earned 1,000 points of World Origin in the second macro world. In theory, Zhu Wuwan could leave the second macro world at any time, unlike others who were still struggling for 1,000 points of World Origin. To be able to earn about 10 points of World Origin every year was already enough to cry tears of joy.

However, how knowledgeable was Zhu Wanhao? Why was he able to adapt so quickly after entering a macro world? Or was it because the will of the Heavenly Path of the world where Dongyuan Continent was located favored Zhu Wanhao, so every macro world that he entered was more suitable for him?

Perhaps it was both. This was also the most likely. It was probably because of this that Zhu Wuyang was able to harvest so many World Origins in every great world.

At this moment, only half of the high-level Cultivators were still struggling in the three thousand macro worlds. The other half had already experienced three macro worlds and had no chance. Many of them had lost about two-thirds of their spirit, energy, and spirit. They might not have any hope of advancing in the future, and even their lifespans had been reduced.

The surroundings of the World Mountain were filled with gloom. Even the high-level cultivators that Zhu Wuwan had brought with him had mostly come out of the three thousand macro worlds. Only one of them had earned some of the world's natural source. The others had all lost. The most miserable one had lost more than two-thirds of his essence, qi, and spirit. He was currently healing with all his might and would not be able to recover for another one to two thousand years.

As for letting Zhu Wuyan heal them, unless he used the world's origin, ordinary heavenly treasures would not be effective. Therefore, Zhu Wuyan would not use the world's origin to heal them, but he would give them other heavenly treasures.

His true form in Dongyuan Continent had shocked the entire Dongyuan Continent, causing all the immortal sects and sects above the first-class level in Dongyuan Continent to be shocked.

At the same time, Zhu Wuyang's clone in the Huaman Multiverse had also used the patent to improve the Spirit Sutra, causing a sensation throughout the entire Myriad Fields College and Kunlun University. The students and teachers who had previously called Zhu Wuyang a good-for-nothing, an idiot, and the upper echelons of the Myriad Fields College blind fell silent, as if they had lost their souls.

They had just been spreading rumors about Zhu Wuyang in an attempt to bring him down. In the end, in just a few days, Zhu Wuyang had used absolute strength to give them a hard slap.

Chapter 989: Stable (1) Chapter 989: Stable (1) "Is this for real? Teachers, are you mistaken? Wang Debao is only a teenager. How could he find the flaws in the Heart Sutra and make excellent improvements? This is a bit of a fantasy."

"That's right, that's right. A few years ago, the cultivation world said that the current Heart Sutra was full of gems and basically couldn't be improved. What did Wang Debao do to actually be able to improve such a Heart Sutra? I'm afraid he's lying."

"What's there to lie about? Even the patent has been published. In other words, the people in the patent office have recognized Wang Debao's improvement of the Heart Sutra. This means that this is the truth. What's there to doubt?"

"Wang Debao is deliberately slapping our faces. We were just saying that he let down the school's preferential treatment for him, but in the end, he came up with such a result. It's obvious that he's making things difficult for us."

..

Amidst the uproar, the gossip that was against Zhu Wuwan from Kunlun University had basically disappeared. Faced with such a research result, not to mention the students of Kunlun University, even the professors of Kunlun University could not help but sigh.

Zhu Wanhao had also used such a research result to completely establish her position in Kunlun University, and even in all the universities in the entire Milky Way Federation.

In the entire Milky Way Federation, there were very few who could contribute such a research result in their first year of university. It was a rare occurrence in decades, so one could imagine how precious this research result was.

It seemed like just a few words, but it could actually bring a lot of progress to the cultivation world of the entire Milky Way Federation. To put it bluntly, with just this research result, even if Zhu Wuyang had no other results in the next few years, no one would say anything.

With the emergence of such a research result, Zhu Wuwan received more and more attention from Kunlun University. Even some of the higher-ups of the Milky Way Federation turned their attention to Zhu Wuwan and began to provide him with some convenience and resources to make Zhu Wuwan's studies and research more successful.

By the way, while the other students and teachers were complaining about Zhu Wuyang's lack of progress, Zhu Wuyang's vitality had already quietly broken through 6 points. Her overall combat strength was thousands of times stronger than before.

Such vitality was enough to be ranked at the top of the top few cultivation colleges. It was far from what the students and teachers who spread rumors about Zhu Wuyang could compare to.

At the same time, Zhu Wuwan's spiritual cultivation base had also silently broken through to the State of Tranquility. It could support more than 10 points of vitality at most. In other words, Zhu Wuwan's vitality would continue to soar at an extremely fast speed until it broke through 10 points.

Spirit cultivation determined the level of vitality. Without sufficient spirit cultivation, it was impossible to support enough vitality.

Zhu Wuan's spiritual realm did not use the Breakthrough Stone to improve. Instead, he relied on his own strength to cultivate and had already cultivated to the Perfection Realm of Changding.

If there were no accidents, it would not be long before Zhu Wuyan could cultivate to the Embryonic Breathing realm.

In the process of cultivating here, Zhu Wuyang did not consume many breakthrough stones. On the contrary, he had accumulated a large number of breakthrough stones. These breakthrough stones had already become the resources of the main body, bringing the main body to improve at an astonishing speed.

If it was possible, Zhu Wanhao was prepared to accumulate enough breakthrough stones to advance to the Dujie stage so that his main body could advance to the Dujie stage and lead the entire Great Zhu Immortal Dynasty to become a super immortal sect.

At that time, the Southern Wasteland and the Great Zhu Immortal Dynasty would completely reverse the strange gazes cast on them by almost all the immortal cultivators in the Dongyuan Continent. They would become the undisputed kings of the Southern Wasteland, and no other powers would dare to easily shake them.

At that time, Zhu Wuyang would invade the large immortal sects and make them work for him to help him earn a lot of breakthrough stones.

The improvement in his combat strength did not slow down either. Although he had only fought a few times in actual combat, Zhu Wuwan had already completely grasped his own strength and could easily defeat his enemies by crossing a small realm.

Having been through so many worlds, Zhu Wuyang's mastery of combat had already reached the grandmaster level. The combat in the Huaman Multiverse was not complicated, and it was even simpler than in other worlds, so it was a piece of cake for Zhu Wuyang to master it.

Zhu Wuyang, who seemed to be standing still, was actually improving and growing in all aspects. However, few people knew about it. No one even knew Zhu Wuyang's true strength.

After using the research results of the Heart Sutra to establish his status, Zhu Wuwan did not use this opportunity to establish his status and influence. Instead, he spent more time on learning, research, and other aspects. All kinds of knowledge and classics were like a great river that constantly surged towards Zhu Wuwan.

Zhu Wuyang was immersed in it, completely unaware of the passage of time.

Kunlun University was the number one university on Earth, and also the oldest super university in the Milky Way Federation. The information and classics it had were beyond imagination.

The research results of the Heart Sutra had also allowed Zhu Wuwan's status in Kunlun University to soar. She had more privileges and could read and learn more good things.

The reason why Zhu Wanwan submitted such a research result was partly to obtain greater privileges so that she could master more knowledge and classics.

As time passed, many people had basically forgotten about Zhu Wuyan's contribution to the Heart Sutra. More and more students had produced good research results. Zhu Wuyan submitted another research result.

This research result was related to the cosmic passage, and it had effectively resolved a small problem in the stability of the cosmic passage. Its importance was no less than the research result of the Heart Sutra that was previously proposed, and to a certain extent, it was even more important.

However, in terms of influence, it wouldn't be as good as the last time. However, it would still bring Zhu Wuwan quite a lot of benefits, allowing her to have more resources and wealth.

Of course, the most important thing was that this research result allowed the teachers and leaders of the Myriad Realms College to see Zhu Wuyang's talent in the study of cosmic passages. They decided to give him more information in this area. At the same time, Zhu Wuyang also obtained the qualifications to conduct field research and experiments.

In other words, Zhu Wuyang could go to the vicinity of the many cosmic passages on Planet Earth at any time to conduct research on the cosmic passages. She could even receive protection from the military.

This would undoubtedly be of great help to Zhu Wuyan's subsequent plans.

Chapter 990: The Mission Is Too Light (1) Chapter 990: The Mission Is Too Light (1)
The Grass Race's passageway!

As the name suggested, this passageway was related to the Grass Tribe. Or rather, the world it connected to was the Grass Tribe. It was a world made up of flowers and plants, especially the Grass Tribe. They had the most numbers in this world and basically controlled the entire world.

The flowers and plants in this world all had intelligence. They were born with intelligence. In the beginning, they could only stay in place and not move. After a few months, they would be able to move. Although the speed was very slow, it was definitely very stable.

Unfortunately, the combat level of the Grass World was extremely low. The strongest person's vitality was only about 5 points. Let alone the Milky Way Federation, Zhu Wuyang alone could sweep through the entire Grass World.

Therefore, compared to the Milky Way Federation, the Grass World could be said to be one of the safest worlds. However, it was very valuable because many of the flowers and plants inside had good medicinal effects. They were essential for the Milky Way Federation to refine most of the elixirs.

The first cosmic passage that Zhu Wanwan studied was the Grass Race's passage. This was also for his safety. After all, the worlds connected by some cosmic passages were not easy to deal with. It was common for cultivators from other worlds to sneak

into the Milky Way Federation through the cosmic passage. If they were not careful, they would face a disaster.

Looking at the verdant universe passageway in front of him, Zhu Wuwan smiled slightly. He followed behind several teachers and entered the universe passageway. He began to carefully experience the wonders of this universe passageway.

Although the teachers had brought Zhu Wuyang along for practical training, they also had the responsibility of protecting Zhu Wuyang. Most of the teachers were in the field of combat and did not do much research. Their main purpose was to protect Zhu Wuyang. It was obvious how much Kunlun University valued him.

Through this cosmic passageway, Zhu Wuwan quickly arrived at a world filled with verdant flowers and plants. The air was exceptionally fresh, and all kinds of flowers and plants were walking and interacting everywhere. There were no trees or animals.

Feeling the strangeness of this universe, Zhu Wuwan was also somewhat surprised. He did not expect such a world to exist. Moreover, it was aloof from the world and rarely had battles and killings. It was far more peaceful than the human world.

Zhu Wuwan only enjoyed this strange world for a while before he devoted his energy and time to studying the passage of the Grass Tribe.

Through his research on the Grass Race's passageway, Zhu Wuwan discovered that the universe passageway here was somewhat similar to the universe passageway of the 3,000 major worlds. It had an advantage that the universe passageway of the 3,000 major worlds did not have.

Of course, the universe passageway of the Three Thousand Major Worlds also had many advantages that the Grass race's passageway did not have. If the two could be effectively combined, it would certainly cause a huge change in the Huaman Multiverse's universe passageway, far surpassing what it was now.

It just so happened that Zhu Wuyan's main body was in the World Mountain. Through the powerful power of heaven essence, she could effectively sense and understand the universe passageway of the World Mountain. From there, she could absorb the essence of the universe passageway of the World Mountain and use it on the grass race passageway.

Of course, what Zhu Wanhao cared about the most was how to destroy the universe passageway. It would be best if he could nip it in the bud before the universe passageway opened.

Through the research and comparison of the two universe passages, Zhu Wuwan specially proposed some research results to make the Grass Race's passage more

stable and reduce the energy consumption. Moreover, it could be used on other universe passages.

With the successive advancement of several research results, Zhu Wuyang's status in the Myriad Realms College became even higher. At the same time, the Myriad Realms College and the Milky Way Federation also gave Zhu Wuyang more power.

Amongst these powers, it included the knowledge of how to destroy the cosmic passage. However, how to destroy the cosmic passage at the time of the Germinal Organization was something that even the Myriad Realms College wasn't good at. Hence, Zhu Wuwan still needed to study it properly.

However, Zhu Wuwan quickly learned how to slow down the opening of the cosmic passageway in its nascent stage. She also applied it to the cosmic passageway in the nameless lake near Yellow Mountain High School.

1000 points!

This action had brought Zhu Wanwan a total of 1,000 points of World Origin. It had to be known that Zhu Wanwan had only slowed down the opening time of this universe passageway by two years, but it had actually brought him so much World Origin. If he completely closed this universe passageway, he would have obtained at least 10,000 points of World Origin.

Once again, Zhu Wuwan felt the impact of the opening and closing of these cosmic passages. This strengthened his determination to study this aspect.

Because it was very difficult to discover a budding cosmic passage, the Myriad Realms Academy was more proficient in destroying cosmic passages that were in the open state. However, they weren't that proficient in this aspect.

Fortunately, with the research results of the Myriad Realms College, Zhu Wuwan didn't have to start from scratch. Instead, she started from how to destroy the opened Tongzhou passage and deduced how to destroy the budding cosmic passage.

Of course, Zhu Wuwan had always been conducting research in this area in secret. Otherwise, if the Myriad Realms College found out that he had spent most of his time and energy on this research, they would definitely suspect his motives.

In order to avoid being discovered, Zhu Wuyan would also bring up some research results from time to time. However, these research results were not big, and the impact they could bring was limited.

Even so, in just a few short years, Zhu Wuwan had obtained more than a thousand World Origins. The number of Cosmic Origins he had obtained from the Huaman Multiverse was now close to four thousand.

This made Zhu Wanhao feel a little helpless. The will of the Great Path of the world where Dongyuan Continent was located was really stingy. Why did it set the mission at 1,000 World Origins? That way, he could only obtain 10,000 World Origins at most.

If the Will of the Great Path of the world where Dongyuan Continent was located set the task as 10,000 World Origins, then he could obtain 100,000 World Origins from these worlds at most. In that case, he would not have to be as cautious as he was now, fearing that his actions would have too great an impact and thus obtain too much World Origins.

It was a pity that this mission was not enough to fill the gaps between his teeth.

If the high-level cultivators in the outside world knew what Zhu Wanwan was thinking, they would probably spit on Zhu Wanwan. A 1,000-point World Origin mission was already enough to make them want to die. The failure rate was as high as 80%, or even more.

If the task required 10,000 points of World Origin, at least 99% of these high-level cultivators would fail. Basically, no one would be able to complete it.

The 3,000 worlds had been open for so many years, and the most people who had ever earned World Origin was only around 13,000 points. If the World Origin required for the mission was really increased to 10,000 points, basically no one would be able to complete it.

Except for Zhu Wuyang!

Read I'm Leveling Up Too Quickly Chapter 991 - 991 Embryonic Breathing (1)

Chapter 991: Embryonic Breathing (1) Chapter 991: Embryonic Breathing (1) Zhu Wuan was complaining that the will of the Great Path in the world where Dongyuan Continent was located was too petty. The mission target he set was only 1,000 World Origins in a macro world.

However, the other high-level cultivators were in extreme pain because of the 1,000 points of World Origin. It was as if they had fallen into hell.

The days of studying always passed very quickly, especially in this great world where one could only come once in their lifetime. Zhu Wuwan cherished every minute and second more, so she felt that time passed even faster.

Perhaps some people felt that learning was so boring and boring. It was not interesting at all.

However, if one had enough strength to instantly memorize thousands of books and enjoy the feeling of knowledge surging in, perhaps one would not feel this way.

Especially after mastering this knowledge, with the help of the power of perception, he could use this knowledge to increase his overall strength at an astonishing speed. In that case, he would not feel that time passed too quickly.

Unknowingly, Zhu Wanhao discovered that his spirit realm had already reached the Embryonic Breathing realm. This was under the condition that he did not spend much time to improve his spirit cultivation.

The so-called Embryonic Breathing was a state of suspended animation. The mind, spirit, heart, soul, and breathing of the cells were all in a special state, absorbing nutrients and energy from the outside world through the cells.

In the Embryonic Breathing state, one could perfectly shape the body, making the body perfect, the bones tough, the muscles firm, the organs strengthened, and condensed into biological energy to interfere with matter.

Once one's spirit cultivation reached the Embryonic Breathing realm, one would be able to condense a Sacred Embryo.

The Holy Embryo was a combination of mind and energy. The Taoists called it the Nascent Soul, while the Western sects called it the Holy Spirit.

After forming the Sacred Embryo, one's spirit and spiritual energy of heaven and earth would fuse together, allowing one to directly appear in the material world. This was the divine ability.

However, after forming the Holy Fetus, if the Spiritual Qi of Heaven and Earth was not injected at all times, the fetus would die in the womb. Only by practicing the correct cultivation method could the Holy Fetus be formed. The Heart Sutra was undoubtedly one of the most suitable cultivation methods for the Human Race of the Milky Way Federation.

Not to mention that Zhu Wuyan's Heart Sutra had been modified by him and was extremely compatible with his body. This allowed the power of the Heart Sutra to increase drastically from its original foundation. It was several times stronger than before and could be called one of the top divine techniques in the Milky Way Federation.

The condensation of the Sacred Embryo was a physical change, and it was also the first step to connect the mind to the physical world. The first step to connect the mind and energy was a big experiment. It was very meticulous and rigorous, even more rigorous than all kinds of scientific experiments.

There were many types of Sacred Embryos, and there were also many ways to condense them. The resulting power was determined by martial arts, energy composition, and equations.

The Holy Embryo was a person's second life. Once it was born, it would determine the future.

The Heart Sutra was undoubtedly one of the best cultivation techniques to condense a Sacred Embryo, not to mention the Heart Sutra that had been modified by Zhu Wuyang. The condensed Sacred Embryo of the Heart was extremely compatible with Zhu Wuyang and could unleash all of Zhu Wuyang's combat power, even beyond his usual limits.

Zhu Wuyan called it the Wuyan Holy Fetus, which meant that it was tailor-made for Zhu Wuyan. This Holy Fetus had amazing recovery and defense, far surpassing its offensive power.

The reason for this was naturally Zhu Wuyang's deliberate intention. As a researcher, he did not need to fight and kill too much, so he naturally improved the growth direction of the unharmed holy fetus in the direction he needed.

The Sacred Fetus of the Mind created by the original Heart Sutra was extremely balanced. Its defense, attack, speed, and recovery were almost the same. It was the most peaceful Sacred Fetus in the Milky Way Federation. The only thing it was good at was its lifespan, which could allow cultivators to have a longer lifespan.

Due to this, many higher-ups of the Milky Way Federation chose to cultivate the Heart Sutra and use it to form a Sacred Embryo. One could imagine how powerful the Heart Sutra was.

As the king of all scriptures, the advantages of the Heart Sutra were extremely obvious.

Advancing to the Embryonic Breathing realm was a person's overall change, and it was closely related to heaven and earth. According to research, advancing to the Embryonic Breathing realm in the presence of powerful heaven and earth power would improve all aspects.

In the process of advancing to the Embryonic Breathing realm, humans and the world would blend together, and they would comprehend the nature of heaven. They would intertwine and influence each other, and there would be a deep imprint engraved in one's heart.

After cultivating the Embryonic Breathing, one could use the power of the spirit to pull the spiritual energy of heaven and earth from other dimensions to their own dimension and absorb it to improve.

In other words, the territory of the Milky Way Federation did not have any spiritual energy of heaven and earth. The environment here was not suitable for the cultivation system that required spiritual energy of heaven and earth from the beginning.

However, the environment here was extremely suitable for the cultivation of the spirit system. He would start with the spirit system first, and then transition to the system that required the spiritual energy of heaven and earth.

Although this method seemed a little troublesome, it was easier than the spiritual energy cultivation system in Dongyuan Continent. Moreover, it was the most suitable path.

This was because the Milky Way Federation's region contained special energy, which was extremely suitable for the cultivation and improvement of the spiritual system. It was not like the spiritual system where one could not even walk, let alone improve one's strength.

When one's spiritual cultivation reached a certain realm, they would be able to pull in the spiritual energy of heaven and earth from other dimensions to increase their strength, or use the spiritual energy to refine elixirs and the like.

Of course, the spiritual energy of heaven and earth could also be pulled into the territory of the Milky Way Federation to nourish the humans of the Milky Way Federation. The spiritual energy of heaven and earth that existed in the Milky Way Federation was pulled over from other dimensions by cultivators above the Embryonic Breathing realm.

Moreover, the power of the Heaven and Earth Spiritual Energy here was far greater than that of the Dongyuan Continent. It brought greater benefits to intelligent life, especially in terms of vitality. The nourishing effect was better.

Embryonic Breathing was also divided into three realms, namely Thought Breath, Divine Breath, and Mixed Energy Breath. Cultivators in the Embryonic Breathing realm could liquify the spiritual energy of heaven and earth through their spiritual power and inject it into the bodies of others, allowing them to cleanse their hair and marrow, build their foundation, and form their cores. They had the ability to mass produce Golden Core cultivators, but this required a lot of time and energy. Under normal circumstances, cultivators in the Embryonic Breathing realm would not easily do this.

This was also the power of the spiritual cultivation system. At least in the Dongyuan Continent, cultivators in the Nascent Soul Realm could not mass produce cultivators in the Aurous Core Realm. However, the cultivators here could do it, and the side effects were not great.

However, cultivators in the Embryonic Breathing realm also had a flaw. That was, the amount of spiritual energy they could absorb every day had a certain limit. Under normal circumstances, they could not exceed this limit. Otherwise, it would cause problems in their bodies.

If it was serious, it might even cause the body to explode and die. There were still many side effects that needed to be carefully weighed.

Chapter 992: One Finger (1) Chapter 992: One Finger (1) Before reaching the Embryonic Breathing realm, a cultivator's vitality could only reach 15 at most. It was impossible to go any higher.

Only by reaching the state of Will-Breath could the human race of the Milky Way Federation increase their vitality to 15 and above, while the Divine Breath could increase their vitality to 20 and above, and the Mixed Energy Breath could increase their vitality to 50 at most. The deviation would not be too big.

Of course, there were some special lifeforms in the Huaman Multiverse where the Milky Way Federation was located. They could raise their vitality to a higher level in the same spiritual realm. However, there was a loss. In other aspects, they might not be as good as humans.

Experts in the Embryonic Breathing realm could live up to 500 years at most, but their physical bodies could be preserved for thousands of years or even more than 10,000 years.

Such a lifespan was much worse than that of the cultivators of the Dongyuan Continent. From this point alone, the world level of the Dongyuan Continent was definitely far superior to the macro world of the Huaman Multiverse. Of course, the world level was not only divided by this aspect, but also in many other aspects.

The main method Zhu Wuan used to determine the level of a world was to look at how long a day in the world where the Dongyuan Continent was. However, this was not necessarily correct. When Zhu Wuan was in the 300 small worlds, a day in the Dongyuan Continent was also a year in the 300 small worlds. However, those small worlds were obviously far inferior to the Xuan Huang Great World and the Huaman Multiverse. Therefore, he was not sure about the level and time flow of each world. Zhu Wuyang still had many doubts.

However, this did not affect Zhu Wuyan's smooth advancement to the Embryonic Breathing realm. Her vitality, which had been stagnant for a long time, began to soar again. At the same time, Zhu Wuyan was also experiencing the abnormalities of the Holy Embryo and the Nascent Soul, absorbing the influence he wanted from them to further increase the strength of his main body.

No matter what, the strength of the clone was just a passerby. Only the main body was eternal. What Zhu Wuyang had to do now was to do his best to absorb nutrients from any macro world to increase the strength of the main body.

From the birth and peculiarity of the Holy Embryo, Zhu Wuyang had a deeper understanding of the cultivation system of this world. His main body could also absorb useful things from it and further perfect Zhu Wuyang's cultivation system.

It was a pity that the time Zhu Wuyan could stay in this world was limited. Otherwise, if he was given enough time to climb to the peak of this macro world bit by bit, the benefits Zhu Wuyan would obtain would definitely far exceed what he had now.

A hundred years ago, he thought that it was quite a long time. Now, it seemed that not only was it not long, but it was also a little short. Zhu Wuwan shook her head and continued to feel the condition of her body. At the same time, she absorbed the spiritual energy of heaven and earth from other dimensions to increase her vitality.

The Huaman Multiverse, as its name suggested, was a multi-dimensional world. The dimension where the spiritual energy of heaven and earth resided was a two-dimensional dimension, filled with endless spiritual energy of various attributes. The spiritual energy had a certain level of intelligence, but it was very low, making them look a little silly and cute. Therefore, the Huaman Multiverse mangaka created a two-dimensional world based on the characteristics of the spiritual energy. It attracted many readers and sold well in the entire Milky Way Federation.

Thanks to the cuteness of the two-dimensional spiritual energy, Zhu Wuwan could easily absorb it. The spiritual energy was lively and rich in nutrients. To a certain extent, it had already surpassed the spiritual energy of the Dongyuan Continent.

Under the effect of the spiritual energy of heaven and earth, Zhu Wuyan's vitality grew at an unimaginable speed. It far exceeded what it was before, and it was comparable to the time when he absorbed some good quality natural treasures.

The shackles of vitality were quickly broken. Zhu Wuwan's vitality broke through to more than 15 points, and her strength, speed, and reaction speed all soared.

After stabilizing his current spiritual realm and vitality, Zhu Wuwan spent half an hour adapting to the sudden increase in strength. Very soon, he was extremely familiar with it and was able to fully display all his strength, and it was the kind that exceeded his limits.

The Fist of Life had long been deduced by Zhu Wuyan to the top level of the Milky Way Federation. It allowed Zhu Wuyan's combat power to sweep across those of the same level and even cross one or two small realms to fight enemies. Moreover, it covered all aspects.

He had unintentionally used Life Detection. Zhu Wuwan calmly discovered that a Shadow Bug Assassin from the Bug Tribe had infiltrated the vicinity of his exclusive laboratory, waiting for the moment he left to launch a fatal attack on him.

Zhu Wanhao had encountered this situation many times before, but none of them had been stronger than this one. This was because the Shadow Bug's strength had already reached the level of the Divine Breath, or rather, it was comparable to a cultivator of the Divine Breath. Its vitality was above 20.

Among the previous attackers, the strongest one had only 13 HP. Now that it had suddenly increased by so much, it could be seen that the Zerg wanted to kill him.

Of course, other than the Zergs, there were other races who had attacked before, but none of them had succeeded.

This was the first time an assassin with a vitality of more than 20 had entered Kunlun University to assassinate him. The Zergs really valued him. If he had not just broken through to the Embryonic Breathing stage this time, he would have been in danger.

Zhu Wuwan sneered. He swung his hand and opened the door of the laboratory. The Shadow Bug Assassin arrived in an instant as if it was invisible. However, before its sharp claws could pierce Zhu Wuwan's head, Zhu Wuwan's finger force had already pierced through its vital insect core.

This expert who had been lurking in Kunlun University for many years and was ranked in the top hundred among the spies on Planet Earth had fallen just like that. Even for the Bug Tribe, it was a big loss.

Kunlun University was the number one research institute of the Milky Way Federation. There were countless important things inside, so the Milky Way Federation's protection of it could be said to be impregnable. Not to mention the Zerg Assassins with 20 vitality points, even Zergs with less than 10 vitality points would find it difficult to sneak in. Especially the stronger the strength, the lower the chance of sneaking in, because many of Kunlun University's defense measures were aimed at enemies with more than 10 vitality points.

This Shadow Bug Assassin was sent to Kunlun University at a huge price by the Zerg. If it wasn't for the A-rank researcher Zhu Wuyang, who had been the most popular assassin in recent years, they wouldn't have let it go.

Unfortunately, even though this Shadow Bug Assassin was extremely well-prepared, it was still discovered by Zhu Wuyang first and killed it while waiting for its prey. Moreover, the difference in vitality between the two sides was about 6 points.

It was unknown what the Shadow Bug Assassin was thinking when it died. It had thought that it would definitely succeed in its attack, but it did not expect it to end up like this.

However, although Zhu Wuyang had successfully survived this calamity, he wasn't very happy because he had also suffered heavy injuries.

Chapter 993: So Bitter (1) Chapter 993: So Bitter (1) 1600 points!

This was the amount of World Origin that Zhu Wuyang had obtained from this matter. After Zhu Wuyang killed this Shadow Bug Assassin, she had already destroyed the corpse and tried her best not to let this matter spread.

However, Zhu Wuwan didn't expect that this Shadow Bug Assassin would actually carry the most advanced transmission equipment of the Milky Way Federation. Therefore, the moment it was killed by Zhu Wuwan, the image here was transmitted to the nest of the Zergs.

The Insect race immediately knew that Zhu Wuan, who was only in his twenties, had already broken through to the Embryonic Breathing realm. Moreover, his combat strength was also very strong. Perhaps he was already half a step away from the Divine Breathing realm.

He had already achieved such amazing results in his research, but he did not expect that he would have such amazing combat strength in terms of cultivation. One could imagine what kind of sensation he had caused in the Insect race.

Perhaps they felt that it was better to be happy alone than to be happy together. Of course, the most likely reason was to make the other races raise their vigilance and send enough powerful cultivators to assassinate Zhu Wuyang the next time. Therefore, the Bug Tribe directly spread the news everywhere.

Hence, as the youngest A-grade researcher in Kunlun University, Zhu Wanhao had also cultivated her spiritual realm to the Divine Breath realm. The news of her being able to instantly kill a Divine Breath realm Shadow Bug Assassin was like a torrential wave that swept through the entire Earth Star, the entire Milky Way Federation, and even many worlds.

Zhu Wuyang had not graduated yet and had just entered his senior year. However, he had already been promoted to an A-rank researcher with his outstanding research ability and dozens of research results.

In the Milky Way Federation, researchers were mainly divided into nine levels, SSS, SS, S, A, B, C, D, E, and F. There was only one way to divide the levels, and that was to talk about the research results.

The difficulty, influence, and role of the research results determined the level of a researcher. Under normal circumstances, graduates of Kunlun University could basically become the lowest level of F-level researchers. F-level researchers were further divided into three sub-levels: F-, F, and F+. The other levels were the same.

To be able to become the lowest level F-researcher and easily get a good job with a monthly salary of more than 10,000 after entering society, one could imagine how

powerful researchers were. They were also protected and supervised by the Milky Way Federation.

In order to become a teacher at Kunlun University, except for some special colleges, one basically needed to have the strength of a C-level researcher. Elite researchers were generally at B-level.

Once one could become an A-rank researcher, they would basically be able to obtain the title of professor. In other words, with Zhu Wanhao's current research level, he could directly become a full professor at Kunlun University after graduation, with a monthly salary of more than ten million credits.

This was still a low amount. If Zhu Wuyang was willing to leave Kunlun University and find a job outside, her monthly salary would be at least hundreds of millions. One could imagine how powerful an A-rank researcher was.

The hundreds of millions of credits in the Milky Way Federation would be billions of dollars on Earth, far more than any celebrity or internet celebrity.

In fact, Zhu Wuyang didn't want to level up so quickly. However, the information he needed had a high requirement for the researcher's level. Helpless, Zhu Wuyang could only speed up the advancement of the researcher's level and obtain the knowledge and information he wanted. Otherwise, it would be a waste of time.

This would also allow Kunlun University and the Milky Way Federation to provide him with better research conditions, which would be extremely beneficial to Zhu Wuyan's subsequent plans. However, Zhu Wuyan had also suffered a lot of risks for this, such as being frequently assassinated and ambushed by various human enemies.

In order to protect his own life, Zhu Wuyan had never left Kunlun University in the past few years. Even so, he had encountered danger several times, and this time was the most dangerous.

If only this Shadow Bug Assassin had arrived a few days earlier, he might have been able to successfully assassinate Zhu Wuwan. However, he had arrived just as Zhu Wuwan had advanced to the Embryonic Breathing realm, allowing Zhu Wuwan to kill him easily.

However, this incident also exposed Zhu Wuyang's talent in cultivation. In just a few years, not only did she become an A-grade researcher, but she also raised her cultivation realm to the realm of Divine Breath. Did it have to be so exaggerated?

One had to know that even among the top ten super students in the Milky Way Federation, as long as the graduates of those cultivation students could reach the Small Concentration Realm, they could easily graduate. Moreover, such results were relatively good.

Most of the graduates only needed to reach the third stage of deep sleep and have a vitality of around 1.5. These super universities would also allow them to graduate. This was considered passing.

Only those who were more outstanding and favored by the heavens could have the cultivation realm of Great Peace or Eternal Peace when they graduated, and their vitality could reach several points or more.

However, Zhu Wanwan was a nerdy researcher who was focused on his studies. He wore it in the laboratory and library every day. Basically, he didn't spend much time on cultivation, but he actually had the strength of the Divine Breath realm.

That's a little too exaggerated, Brother. Our specialized cultivation students are more than ten times worse than you. Do you have to be so ruthless?

By the way, in the Cultivation College of Kunlun University, as long as one had the spiritual cultivation of the second stage of deep sleep and had a vitality of about 1.2, they were qualified to graduate.

Although Zhu Wanwan's vitality was not as exaggerated as everyone had said, with a value of more than 20 points, it had still reached more than 16 points, which was more than ten times the requirement for graduation from the Cultivation College.

In just four years, Zhu Wuyang had achieved such fruitful results. One could imagine how much of a sensation it had caused.

It had to be known that Zhu Wuyang was already dazzling enough to improve so quickly in the research field. Now that she had talent in cultivation, it was only natural that she would have a huge impact.

It was as if a cup of bitter wine had been poured into his throat, making Zhu Wuwan feel rather uncomfortable. He had been suppressing the speed at which he was earning the world's origin, but he did not expect this matter to actually bring him so much world's origin.

If it hadn't been for this matter, Zhu Wuwan would have applied for a few more research patents and raised her researcher level. That way, she would have been able to obtain more authority and benefits.

But now, she didn't dare to do that at all. Zhu Wuwan felt bitter in her heart.

Didn't those idiots from the Bug Tribe feel ashamed? They had failed to assassinate him so many times. This time, they even sent out a Shadow Bug Assassin from the Divine Breath realm. If they failed, so be it. They actually spread the news everywhere.

They were indeed a shameless race. In order to achieve the goal of assassinating Zhu Wuyang, the Zergs had gone all out, but they had brought Zhu Wuyang so much trouble.

Chapter 994: S-rank Researcher (1) Chapter 994: S-rank Researcher (1) Zhu Wuyang was quite dissatisfied with the Zerg's shameless actions. Therefore, in order to punish the Zerg, Zhu Wuyang specially developed a poison that was specifically targeted at the sufficient amount.

Pesticide!

Previously, Zhu Wuwan only had an idea about this pesticide, but she didn't put it into action. However, because of the Zergs' actions, Zhu Wuwan specially spent half a year to develop this pesticide, which could effectively kill all kinds of Zergs.

Any Zerg at or below the Embryonic Breathing realm would basically be impossible to save after being poisoned by the Innocuous Pesticide. Even if they wanted to save them, the price they had to pay was too high. The Zerg could save one or two, but they could not save all of them.

With this pesticide, the Milky Way Federation would be like a tiger with wings when dealing with the Zerg universe. Those Zergs at or below the Embryonic Breathing realm basically wouldn't be of much use, and most of the Zergs were at this level, accounting for more than 99% of the Zergs.

The Zergs had always relied on the Zerg Sea tactic to win. Now, the Unharmful Pesticide had perfectly cracked the Zerg Sea tactic. It could basically help the Milky Way Federation get rid of the Zerg that had been a threat for many years.

With this pesticide alone, Zhu Wuyang's level could be upgraded to an S-grade researcher, with more power and resources.

However, this pesticide could at least bring Zhu Wuwan thousands of points of World Origin, or even more.

Therefore, after a brief consideration, Zhu Wuwan sealed the research results and prepared to take them out when she was about to leave. Otherwise, she wouldn't be able to earn too much good stuff if she left too early.

The development of this pesticide also gave Zhu Wuwan more ideas. After all, his original body could be said to be a grandmaster among poison grandmasters in Dongyuan Continent, and he was the most proficient in poison.

Then, should he develop more poisons that could help the humans of the Milky Way Federation kill the natives of various worlds, or even help the humans kill the humans?

It would be best if there was no antidote for these poisons. As long as one was poisoned, there was no cure. They could only wait for death.

There were specializations in every field. With his attainments in poison, Zhu Wuwan believed that he should be able to develop quite a number of such deadly poisons. When the time came, it would definitely cause a significant impact on the Huaman Multiverse.

In the future, whether it was used by humans to poison other races or by other races to poison humans, it would be of great use.

Furthermore, it would be best to publicize the formulas of these poisons and let all intelligent life know. When the time came, they would poison each other. These were all influences that could shake the world's origin.

Thinking of that scene, Zhu Wuwan was extremely moved. As for whether doing so would cause serious damage to the Huaman Multiverse, that was not something that Zhu Wuwan wanted to consider.

Those who were not of his race would have different intentions. What did the Huaman Multiverse have to do with him? So what if it was destroyed? The most important thing was to earn the world's origin.

At the thought of this, Zhu Wuwan no longer hesitated. Other than studying the universe passageway, she spent a lot of time studying the poisons that targeted various races. She was prepared to leave a surprise for this great world when she left.

When the time came, everyone would poison each other. It would definitely be a spectacular sight. It would be impossible not to have a great influence.

No matter how sensational a matter was, as time passed, it would slowly cool down. This matter was no exception.

Due to Zhu Wuwan's low profile, and the fact that Kunlun University and the Milky Way Federation had deliberately suppressed these rumors, this matter gradually passed.

However, the rapidly increasing levels of the bodyguards around Zhu Wuyang and the more powerful enemies from other races clearly told everyone that Zhu Wuyang's identity was completely different from before.

Regardless of whether he admitted it or not, Zhu Wuyan was already one of the leaders of the younger generation of the Milky Way Federation. Moreover, she was the kind who was well-versed in both martial arts and martial arts.

Not only was he good at research, but he also had such amazing talent in cultivation. It was impossible for people not to pay attention to him.

Because of Zhu Wuyang, Kunlun University's defensive measures had been upgraded to another level. One could imagine how influential Zhu Wuyang was.

Kunlun University had also reappeared in front of the world because of Zhu Wuyang. Although they hadn't been compared yet, with the ability that Zhu Wuyang had displayed, he could basically suppress the students of any university.

The kind from freshman to senior year!

The days that followed were dull and fulfilling. Soon, Zhu Wuyan graduated and chose to stay in school to become another full professor at Kunlun University.

At the same time, with the support of Kunlun University, Zhu Wuwan became one of the youngest S-grade researchers in the Milky Way Federation. She had greater power and more generous treatment.

The Milky Way Federation was not Earth. The environment here was especially good for researchers and scientists. All kinds of treatment and privileges were beyond imagination. The income was far from what internet celebrities could compare to, not to mention the huge advantage in status.

To put it bluntly, a single sentence from an S-grade researcher could make most of the stars in the Milky Way Federation cry and beg to sleep with him, including the top stars.

The power and influence that Zhu Wuan wielded was already comparable to half a Dao Master to a certain extent.

There were fifty-six roads on Earth, and each road was as big as several provinces of China on Earth. Jiangnan Road was almost one-third of China's territory on Earth. One could imagine how big a road was and how shocking the power of half a road master was.

At this moment, the people responsible for protecting Zhu Wuyang were actually the experts of the Forgetfulness Level that the Milky Way Federation had specially sent over. Moreover, there were four of them, and all of them were terrifying existences of the Forgetfulness Level.

If they wanted to kill Zhu Wuyang under such protection, they would have to send out a Legendary powerhouse who was at least sitting and forgetting. However, as long as such a powerhouse got close to Planet Earth, it would immediately trigger the defense network of Planet Earth. It was basically impossible for them to get close to Mount Kunlun, let alone Kunlun University.

Kunlun University had been established for tens of thousands of years, but no Legendary powerhouse had ever been able to approach it silently. Therefore, Zhu Wuwan was basically invincible here.

Unless Zhu Wuyang was courting death and insisted on leaving Kunlun University or Planet Earth, it would be very difficult for her to be in danger.

Zhu Wuyang was obviously not such an idiot. The books and knowledge that Kunlun University had were enough for him to study until he left. Zhu Wuyang would not be so stupid as to go out and seek death.

Perhaps the enemy would use some means to force Zhu Wuyang to leave Kunlun University, or even Earth Star, so that there would be a better chance.

However, Zhu Wuyang wasn't a fool. She didn't have much desire for power and wealth, so the saying, 'If you don't have any desires, you'll be strong', was also applicable here.

Chapter 995: Big Shot (1) Chapter 995: Big Shot (1) Not only was he strong without desires, but most importantly, Zhu Wuwan was now afraid that his influence would be too great and that he would stir up too much of the world's origin. It would be especially disadvantageous for him to earn more of the world's origin and obtain more benefits.

Therefore, Zhu Wuwan would rather give up many opportunities that others thought were good to stay in Kunlun University and quietly study the results one by one. She was just waiting to release them before she left and bring a huge surprise to the world.

Even so, there were still people with discerning eyes. Kunlun University and the Milky Way Federation never stopped protecting Zhu Wuyan. Instead, they were even more attentive.

This was because a real researcher should be like Zhu Wuwan, not greedy for fame and fortune, so as not to waste time on these things and delay their own research.

However, there were still some things that even Zhu Wuyang couldn't get rid of. The Host's three sisters were getting married.

Moreover, because of the small agreement between the three of them and the fact that the three of them were looking for boyfriends at about the same time, the wedding was also set on the same day.

Previously, Zhu Wanhao had already rejected many summons from her family. Ever since she entered Kunlun University, she had never returned to the original owner's home. At most, she would send some money and provide some convenience.

Now that the three cheap sisters were getting married on the same day, it would really be unreasonable if he did not return.

Moreover, even if Zhu Wuwan didn't go back, his three sisters had already said that they were going to move the wedding to somewhere near Kunlun University, so he had to attend.

Under such circumstances, how could Zhu Wuyan refuse? Hence, after some consideration, Zhu Wuyan decided to agree.

Although he had deliberately played down the relationship between him and the Host's family, some things could not be separated.

Jiangnan Road, Misty Rain District, Haijiao Hotel.

The wedding of the three sisters was held here, and a few days before the wedding, the Milky Way Federation had already sent a large number of cultivators to guard the surroundings and investigate all suspicious places.

The officials of Jiangnan Dao and Misty Rain District also got busy. They were all focused and did their best to ensure Zhu Wuyang's safety.

An S-rank researcher's status was so high that it had already surpassed a Dao Master's, not to mention a young S-rank researcher like Zhu Wuwan who had the strength of a Divine Breath or above.

One could imagine how bright the future of such a peerless genius would be. No Dao would neglect him.

Not to mention the Yanyu District, the entire Jiangnan Road was busy because of this. The hygiene, safety, and other work were carried out in advance, afraid that Zhu Wuyang would be dissatisfied.

The day before the wedding, the Cape Hotel was filled with plainclothes. These plainclothes included but were not limited to the police, the security department, the special forces, and the hunting park's experts ... They formed a three-dimensional security system that included land, sea, and air. They had to ensure Zhu Wuyang's safety.

Although they were not very clear about this, with so many cultivators patrolling the surroundings, many people were still aware of the abnormality. Many of the guests attending the wedding naturally felt it more clearly.

"I feel that there's something strange about the Haijiao Hotel today, especially the atmosphere around the Flower Hall where we are. There's a particularly oppressive feeling. Do you guys notice it?"

" I feel it too. The atmosphere in the entire Haijiao Hotel is a little strange. The people walking around give me a very scary feeling. It's as if every one of them can easily kill us. "

" This atmosphere seems to be that of a high-ranking dignitary coming out for a tour, but I haven't heard of any dignitaries living around the Haijiao Hotel. The Haijiao Hotel isn't a five-star hotel, and those dignitaries usually don't choose to stay here. What's going on? "

"I heard that the younger brother of the three brides is a big shot in the Milky Way Federation. He is going to attend the wedding personally today, which is why this happened. I don't know if it's true or not."

..

Because Zhu Wuyang had deliberately kept a low profile and had repeatedly reminded his family, the Wang family had consciously concealed a lot of news about Zhu Wuyang. Basically, not many people knew Zhu Wuyang's true identity and status.

The husbands that the three Wang sisters found were not from wealthy families. The best son-in-law was only a millionaire with a net worth of hundreds of millions. The other two sons-in-law were only worth tens of millions, barely worthy of the Wang sisters.

However, the Wang family did not expect them to climb up the social ladder. As long as it was someone they liked, it was fine.

Even the three sons-in-law of the Wang family had learned about their brother-in-law's exact situation from their fiancée in the past few days. They were all extremely shocked and almost thought that they were dreaming.

They had never thought that the Wang family would actually have a true dragon to suppress their luck. They thought that it was an S-grade researcher, a full professor at Kunlun University, and an expert in the Embryonic Breathing realm. Just thinking about it made them dizzy.

To them, such a big shot only existed on television and in the newspapers. They didn't even have the right to get close to him. However, they didn't expect that such a true god was hidden in the house of their fiancée.

They could also sense the abnormal situation around the Haijiao Hotel and immediately knew what was going on. They were also muttering in their hearts. Their brother-in-law hadn't even arrived yet, and the situation was already like this. They wondered how elegant their brother-in-law was.

This wife was really the right one to marry!

Seeing that the wedding was about to begin, the other guests were basically all here. However, Zhu Wuyang did not show up for a long time, and the few sons-in-law were also a little anxious.

"Fengjuan, isn't my brother-in-law here yet? Isn't he coming today? Our wedding is about to begin."

"I can't believe that my brother-in-law is actually an S-rank researcher. That's an S-rank researcher. His status is not inferior to the leader of Jiangnan Road. In fact, his influence is even greater. It's unbelievable that such a big shot is actually my brother-in-law."

"Pan Pan, you should have told me about this earlier. If I had known earlier, we might have been able to get that business and take our company to the next level. But it's not too late now. With my brother-in-law's care, it's impossible for our company to not develop in the future."

..

The three sons-in-law were all very excited. It was inevitable that they would have some messy thoughts, but they were quickly suppressed by the three Wang sisters, telling them not to have those unrealistic thoughts.

In the past few years, Zhu Wanhao had already explained her intentions to the three sisters of the Wang family. She only hoped that the Wang family could develop and improve steadily. She didn't need to be rich or noble, and she wouldn't help them too much.

It was good to be safe and sound. It was a blessing to live a rich and peaceful life.

Chapter 996: Wedding (1) Chapter 996: Wedding (1) Time slowly passed. Seeing that the wedding was about to begin, Wang Tie and Shi Huifang became a little anxious.

"What's the baby doing? Why isn't he here yet? It'll be a little late if he doesn't come soon."

"This rascal is really heartless. He hasn't come back since he entered university. Now that his three sisters are getting married, he's still delaying it. When he comes, I'll definitely teach him a lesson."

..

However, without anyone knowing, dozens of masters who were above the level of sitting and forgetting had already infiltrated the wedding venue. They quietly investigated and eliminated all suspicious situations. Of course, the most important thing was to see if there were any enemies with ill intentions hidden in the crowd.

There were naturally some suspicious people among them, but these people had been taken away silently. Even so, it still caused a small commotion.

Fortunately, the guards of the Milky Way Federation who entered were more professional and used excuses to brush them off. However, it still caused low discussions around them.

"I keep feeling that this wedding is a little strange. Many of my relatives and friends are very unfamiliar. I originally thought that they were all here to find a way to make friends with the Wang family's younger brother, but now it seems that's not the case."

"Do you think those people who were taken away are enemies of the alien races? If nothing goes wrong, those who took them away just now might be the official plainclothes of the Milky Way Federation."

"If that's the case, the identity of the Wang family's little brother as an S-rank researcher should be real. Otherwise, the atmosphere wouldn't be so strange."

"Clear the area. This is clearly clearing the area. We'll clear out all the enemies with ill intentions and then let the Wang family's younger brother attend the wedding. What a grand arrangement. It's incredible."

..

Gradually, some people with discerning eyes saw the clues. It was not that the Wang family's younger brother did not want to attend the wedding as soon as possible, but the environment did not allow it.

The abnormality at the wedding scene once again confirmed one thing for the guests. The identity of Wang Debao, the younger brother of the Wang family, was indeed extraordinary. Those rumors about him should be true.

Many people became nervous and excited. Even the three Wang sisters, Wang Tie, and Shi Huifang stopped complaining and began to worry.

The abnormal situation here also made the family confirm one thing. Unknowingly, their little brother Wang Debao seemed to be from a different world from them. The distance between the two sides was getting further and further.

What seemed normal to them might be dangerous to Wang Debao.

The three Wang Sisters suddenly realized something. Wang Debao had deliberately distanced himself from them all these years not because he was selfish, but because he was thinking for them.

After all, with his current status, he could be assassinated at any time. If he was really close to them, the foreign tribes would definitely make a fuss about them or even take revenge on them.

That was why Wang Debao had deliberately distanced himself from them, to prevent the Outsiders from spreading their hatred to them, so that they could be safe and happy.

The reason why his little brother told the family to keep a low profile as long as they were calm and stable was probably because he didn't want the family to be in the limelight and attract the attention of the alien races.

Thinking of this, the Wang sisters, Wang Tie, and Shi Huifang suddenly felt a little guilty. Perhaps they shouldn't have forced their little brother to attend the wedding this time. What if they encountered an assassination or something like that?

As long as his lackey sent his blessings, he could video call him. Why did he have to come to the wedding venue?

Just as she was thinking about this, she saw a handsome figure in a suit walk in from outside the Flower Hall. He looked extremely familiar, and the three Wang sisters felt a sense of familiarity.

To the left and right of the handsome figure, there were two middle-aged men with cold expressions. Even though they had already suppressed it, they still emitted a vague but terrifying aura.

The two middle-aged men should be the guards of Wang Debao. The Wang sisters, Wang Tie, and Shi Huifang's eyes reddened as they rushed towards Zhu Wuyang.

"Chi..."

However, at this moment, an undetectable blade suddenly appeared in front of Zhu Wuyang and headed straight for Zhu Wuyang's head.

When ...

Just as it was about to stab into Zhu Wuyang's head, another cold middle-aged man appeared out of thin air and blocked the blade. He then dragged the owner of the blade away from the wedding venue and flew into the sky to fight.

The aura emitted by the two of them was so powerful that only experts with over 100 vitality stats could reach it. The terrifying pressure caused the entire Misty Rain District to tremble slightly.

A great master of sitting and forgetting!

Even an ordinary person could guess that the two people fighting above should be great masters of the Meditation Realm. Otherwise, there would not be such an astonishing aura and momentum.

If a random bodyguard had the strength of the Meditative State, then wouldn't the two bodyguards standing beside Zhu Wuwan also have the same strength? Moreover, who knew if there were other great experts of the Meditative State hiding in the dark?

At the thought of this, many guests at the wedding couldn't help but gasp, deeply aware of how high Zhu Wuwan's status was now.

Just the bodyguards alone had the strength of the Meditative State, and there was more than one Meditative State bodyguard protecting Zhu Wuyang. Not to mention the mayor of the Misty Rain District, even the Dao Master of Jiangnan Dao could not achieve such treatment.

But thinking about it, this was normal. A Dao Master was easy to nurture. Even if he died, there would be a large number of leaders who wanted to take over. However, if something happened to an S-grade researcher, it would not be easy for others to replace him.

Every researcher who had reached grade S and above could be said to be a precious asset of the Milky Way Federation. Once they were lost, it would be a loss even for the Milky Way Federation. It was normal for the Milky Way Federation to value them so much.

Moreover, Zhu Wuyang was still so young and had a bright future ahead of her.

The assassination attempt by the Meditative Oblivion Expert in front of them made the Wang Clan members realize the danger of Zhu Wuyang's current position once again. They regretted letting Zhu Wuyang return even more.

However, Zhu Wuwan was all smiles as she walked towards her long-lost relatives. There was not the slightest bit of abnormality on her face. After experiencing such assassinations many times, she would not take it seriously.

Moreover, Zhu Wuyan's true form had experienced even more bloodshed. Compared to that, the assassinations in the Huaman Multiverse were nothing.

"Long time no see!"

Zhu Wuyang welcomed a few of his relatives and hugged them. He told them about the parting of these days. Wang Tie and Shi Huifang's tears flowed down, making Zhu Wuyang feel a little sad.

Although they weren't her parents, Zhu Wuyang had inherited the original owner's memories, so there were still some feelings.

Chapter 997: Dealing With Future Trouble (1) Chapter 997: Dealing With Future Trouble (1) The wedding began with Zhu Wuyan's blessings. The atmosphere was happy and serious.

Not only did the cultivators who were protecting Zhu Wuyan not affect the wedding, but they also made the wedding even more solemn.

This solemnity was just right because marriage was not only a joyous thing, but also a serious thing.

Because after marriage, life was no longer about love and love. There was also daily necessities. When you were in love, you just needed to be relaxed and happy, but after marriage, you needed more responsibility.

In the wedding march, the original owner's three sisters all entered the wedding hall. Wang Tie and Shi Huifang often glanced at Zhu Wuyang, as if asking when Zhu Wuyang would get married so that they could have grandchildren.

However, if nothing unexpected happened, Zhu Wuyang would not get married in this great world to avoid hurting others and herself.

Zhu Wuyan was destined to be a passerby in the Huaman Multiverse. A hundred years might seem long, but it was not a lifetime for the cultivators here.

The Wang Clan members who had been treated by Zhu Wuyan could live to at least two hundred years old.

Furthermore, although it was difficult for the cultivators in this world to extend their lifespans, and the increase in cultivation level was far inferior to that of the Eastern Yuan Continent, the Huaman Multiverse had many secondary dimensions and worlds. It was inevitable that there would be some good things in these dimensions and worlds that could increase their lifespans.

Zhu Wuyang had also given some to his family before, which made Wang Tie and Shi Huifang's lifespan incomparable.

In the future, Zhu Wuyang would also get more good things for her family. Although she could not satisfy the original owner's family in other aspects, Zhu Wuyang would not let them suffer too badly in terms of material benefits.

After the wedding, Zhu Wuyan chatted with the husbands of the three cheap sisters and used some of her power to help them. She also warned them not to be too arrogant in the future.

However, there was no need for Zhu Wuyang to elaborate. The incident of the Meditation Expert killing Zhu Wuyang had already sounded the alarm for them. Although their brother-in-law was very powerful, his enemies were also very powerful.

If he wanted to develop peacefully for a long time, it was better to keep a low profile so as not to attract trouble.

Before leaving, Zhu Wuyang gave five agreements to the original owner's parents and three sisters. In this agreement, Zhu Wuyang gave the original owner's family the first successful patent application.

The original owner's parents each received 35% of the profits, and the other 30% was divided equally between the original owner's three sisters, each with 10%.

It seemed like only one patent, but the amount of wealth that could be distributed to Zhu Wuyang every month was as high as millions of credits. In a year, that would be nearly 100 million credits. This was definitely not a small number for the Wang family.

This was also the last fortune that Zhu Wuyang gave to the Wang family before she left. She did not dare to give too much, as it was easy to get into trouble if she gave too much. Zhu Wuyang thought about it again and again before deciding to give this patent to the Wang family.

Zhu Wuwan still had several patents like this. There were even more that had not been applied for as patents. There were no less than a hundred, but Zhu Wuwan would not take them out easily.

Even so, after learning about the profits of this patent, Wang Tie, Shi Huifang, the three Wang sisters, and the others were extremely shocked. They were somewhat nervous and did not dare to accept this gift.

However, under Zhu Wuan's persuasion, the Wang family still managed to get it. With this patent, there was no need to mention glory and wealth in the future. At the very least, the Wang family would be able to live the lives of upper-class people. They would basically have freedom of wealth.

After all, the expenses of the Wang family were not large. Their annual income of nearly 100 million yuan was hundreds of millions of yuan on Earth. It was enough for the expenses and cultivation of the Wang family.

After leaving behind such a long period of wealth, Zhu Wuyang bid farewell to her family. Under the protection of many guards, she left Jiangnan Road in Yanyu District and returned to Kunlun University.

Along the way, there were specialized small warships to protect them. There were even super-large warships in the sky that were paying attention to the situation here to prevent any accidents from happening to Zhu Wuyang.

Even so, they still encountered assassinations along the way. Moreover, they were assassinations from dozens of races. They were all experts in the State of Meditation. If Zhu Wuyang had not learned how to pilot a warship in passing and skillfully controlled the warship at the critical moment, killing most of the experts in the State of Meditation, Zhu Wuyang would have been finished this time.

Although he had successfully escaped, Zhu Wuyan's identity as a battleship master had also been leaked, causing a huge uproar among the higher-ups of the Milky Way Federation, not to mention Kunlun University.

No one had expected that apart from being a research genius and a cultivation genius, Zhu Wuyang was also a genius in piloting warships. Just based on the skills that Zhu Wuyang had displayed when he piloted the warship and killed several great masters of meditation, calling him an ace pilot would be a little modest.

This allowed Zhu Wanhao to obtain hundreds of World Origin points. Zhu Wanhao was quite helpless about this. He even explained that he had learned his warship technology through virtual games.

Although it was a little unbelievable, there were indeed geniuses in this world. Although Zhu Wuwan had never actually piloted a warship, who said that the piloting skills of a warship would be very poor under such circumstances?

Geniuses were unreasonable, just like Zhu Wuyang.

Fortunately, these things were just a small problem. After explaining, Zhu Wuyan continued her peaceful and fulfilling life of learning and research. Her main body and clone worked together, and Zhu Wuyan developed more and more good things.

After the wedding, the Wang family's status had been greatly improved. Coupled with the share of profits from the patent, the Wang family had become a small aristocratic family in Misty Rain District.

The families of the three Wang sisters' husbands also respected them. After witnessing the power and strength of the Wang family's younger brother, these families felt honored to be able to marry the three Wang sisters.

After Wang Tie and Shi Huifang saw their grandsons, they slowly stopped urging Zhu Wuyan to find a partner. Especially after their eldest sister adopted two of the boys to the Wang family and made them the descendants of the Wang family, Wang Tie and Shi Huifang gradually put their thoughts on their two grandsons.

This matter was naturally Zhu Wuyan's doing. He knew very well that he would not get married in the Huaman Multiverse. In order to avoid Wang Tie and Shi Huifang's loneliness and regret, he had contacted his cheap elder sister and brother-in-law, who had given birth to many children, to help him.

Wang Fengjuan naturally had no objections to this. Her brother-in-law was eager to have a better relationship with Zhu Wanhao, so she naturally had no objections.

Chapter 998: Vitality Breaking Through 100 (1) Chapter 998: Vitality Breaking Through 100 (1) Since she already had a grandson, Wang Tie and Shi Huifang stopped urging Zhu Wuyang to get married and have children for a long time. They gradually began to forget about this matter.

Zhu Wuyang also slowly distanced himself from the Wang Clan, trying his best not to have too much interaction with the Wang Clan. He even used some secret techniques of the foreign races to make the Wang Clan slowly forget about him.

In the long river of time, the Wang family gradually forgot about Zhu Wuyang. It was as if the Wang family did not have such a person. As the Wang family's grandson and adopted grandchildren grew up, the whole family forgot about Zhu Wuyang even more.

Zhu Wuwan worked hard in Kunlun University silently, allowing time to pass by like sand between his fingers.

Ten years had passed unknowingly...Fifteen years had passed...Twenty years had passed...Thirty years had passed...Sixty years had passed...

Eighty years had passed...

At this moment, Zhu Wanhao was already a veteran SS-rank researcher at Kunlun University. She was also one of the highest-ranking researchers at Kunlun University. After all, there were only two SSS-rank researchers in the entire Milky Way Federation. One of them was from Kunlun University, but he was currently studying the secrets of the universe in the sun, so an SS-rank researcher was already the highest-ranking researcher at Kunlun University.

Although Zhu Wuyan could push herself to the rank of an SSS-level researcher with her strength and hidden research results, the impact of doing so was too great. It was easy for Zhu Wuyan to earn more than 10,000 points of World Origin and no longer be able to stay here, so Zhu Wuyan did not do so.

Being an SS-rank researcher was enough for Zhu Wanhao to obtain 99% of the knowledge and books she wanted. Even if she were to go up another level, it would be difficult to obtain the remaining 1% or so.

Since that was the case, for the sake of safety, it was better to continue staying in the SS-class.

The SS-level researcher Zhu Wuwan already had enough status and status. She was one of the high-level researchers of the Milky Way Federation and had great power and influence.

As for his strength, Zhu Wuwan had also improved a lot. He had already reached the state of forgetting himself. After the Embryonic Breathing, it was the state of sitting and forgetting. Sitting and forgetting were divided into three states: forgetting oneself, forgetting oneself, and forgetting the world.

The so-called sitting and forgetting was to forget one's body, abandon one's intelligence, get rid of the shackles of body and intelligence, and fuse with the Great Dao.

In fact, it was what the Buddha had said, the form of no self, no man, no sentient beings, and no longevity.

If a person cultivated to the realm of sitting and forgetting, the powerful mind could be combined with the orbit of the planet. Heaven and man would become one, and everything would be forgotten.

The body was no longer a body, but a planet. With boundless power added to the body, it was almost equivalent to a person possessing endless divine arts. It was easy for one's vitality to exceed 100.

This was because their bodies were a part of the void, and they could absorb the power of the universe for their own use.

With a single thought, the wind and clouds changed, snow covered the mountains and rivers, and the seas and mulberry fields moved.

The practitioners of the Meditation State could draw energy from all dimensions, and it was endless. It was a kind of special divine power.

Dimensional space was known as a heavenly space in the east, a plane in the west, and a multiverse in modern science.

The power of a god art was limited, and it would be used up after a little use. However, the power of the dimension was endless. Once one advanced to meditation, as long as one used a little mental power, they could extract all kinds of elements from the dimension. It was endless.

This was a different kind of connection between heaven and earth. It borrowed the power of heaven and earth, just like the cultivators above the Soul Formation Stage in

Dongyuan Continent. They could connect with all kinds of spiritual energy in heaven and earth through their powerful spiritual consciousness, and then burst out with amazing power.

But in the Huaman Multiverse, the so-called connection between heaven and earth was through the power of the spirit, connecting with the power of other dimensions and unleashing astonishing power. In many ways, it was completely different from the Dongyuan Continent.

This was also limited by the world's environment, and it was unique to the Huaman Multiverse. However, there were many aspects that Zhu Wuyang's main body could borrow to further enhance his overall strength.

The magical equipment refined by the practitioners of the Meditation State was directly refined by the gravity of the entire planet. These magical equipment would have some characteristics of the integration of Heaven and man.

The experts of the Forgotten World could create fifth grade space, which was the space folding technology that the Institute of Science and Technology had not developed.

Cultivators at the level of the Forgotten Realm could condense small worlds in their bodies to store energy. Cultivators at the peak of the Forgotten Realm could condense countless small worlds and turn them into runes. When the runes condensed into nomological laws, they would become saints.

The vitality of a cultivator in the state of selflessness was around 70. The vitality of a cultivator in the state of forgetting oneself could easily exceed 100, and the vitality of a cultivator in the state of forgetting the world could reach hundreds.

At that level, the so-called moving mountains and overturning seas was just a matter of passing one's fingers. It was also easy for one to blow up a planet with one punch. The combat strength was almost comparable to that of a Human Immortal in the Tribulation Transcendence State on the Dongyuan Continent.

In other words, this was a different kind of Human Immortal. It was also a Human Immortal whose cultivation base was on par with that of Qi Refinement. His combat strength was beyond imagination.

At this moment, Zhu Wanhao had already relied on his own comprehension and ability to forcefully cultivate to the state of forgetting himself. He basically did not consume any breakthrough stones. Instead, he had earned a huge amount of breakthrough stones.

These Breakthrough Stones were almost enough for Zhu Wuyang to break through the current bottleneck and advance to the ranks of Human Immortals. Therefore, Zhu Wuyang was prepared to earn a large number of Breakthrough Stones next, and then raise her cultivation realm and truly step into the ranks of Human Immortals.

Zhu Wuwan, whose vitality had broken through 100, was also one of the top researchers in Kunlun University. Few researchers could surpass him in terms of vitality. Even with the Life Fist Technique and all kinds of poisons he mastered, even cultivators in the Forgotten World Realm could not do anything to him. They might even be killed by him.

This kind of vitality could allow Zhu Wuyang to easily live for thousands of years. After reaching the Forgotten World Realm, it was even possible to live for more than ten thousand years.

Of course, if he could take a step further and break through the realm of sitting and forgetting, reach the Prominent Divine stage, and grasp the power of laws, Zhu Wuyang's vitality would soar again, reaching more than tens of thousands of years.

However, there was not much time left. Zhu Wuyang no longer had any hopes of transcending beyond meditation in the Huaman Multiverse. If that were the case, he would have to consume a large number of breakthrough stones, which he had to save for his main body.

After all, time was still a pity. If he could break through to the realm of meditation here, it might bring a lot of benefits to his main body. The Prominent Divine stage grasped the power of rules. When the cultivators of Dongyuan Continent advanced to a certain level, they might also need to master the power of rules.

Chapter 999: 80,000 Origins (1) Chapter 999: 80,000 Origins (1) According to Zhu Wanhao's understanding of Dongyuan Continent's cultivation system and some speculations, if nothing unexpected happened, the realm after transcending the tribulation should be the True Immortal realm.

The so-called True Immortal realm, as the name implied, was to become a true immortal. They had an unimaginable lifespan and controlled unimaginable power.

Genuine Immortals had immortal bodies, immortal vitality, and primordial spirits. They were three in one, far superior to cultivators in the human world and transcended another realm.

If there were no accidents, there might be Earthly Immortals and Celestial Immortals above Genuine Immortals. However, even Earthly Immortals and Celestial Immortals should not be involved in the cultivation of rules. Only when they reached a higher realm would they be involved in the cultivation of the power of rules.

From this, one could see how terrifying the power of rules was. In Dongyuan Continent, it was beyond the Earthly Immortals and Celestial Immortals, reaching an unfathomable level.

If he could understand and control the power of the natural order in the Huaman Multiverse, it would definitely be extremely beneficial to Zhu Wuwan's future cultivation.

Regrettably, it was still the same sentence. There were too few breakthrough stones, and Zhu Wuyang could not afford to raise it.

In more than eighty years, Zhu Wuyan's research results had reached an astonishing level. If they could all be released, it would definitely bring unimaginable influence to the Milky Way Federation and even the entire Huaman Multiverse.

Zhu Wuyan would also become the greatest researcher, inventor, and creator in the history of the Huaman Multiverse. It caused the structure of the Huaman Multiverse to change drastically.

However, Zhu Wuyang was still hiding all of this. She was only waiting for the moment she left to unleash everything to bring her the greatest benefits.

The preparations in this area were almost complete. The inventions, creations, and improvements left behind by Zhu Wuwan were basically enough for him to gain enough influence, so it was time to consider another matter.

That was to find the embryonic form of those universe passages!

With Zhu Wanhao's current status, she had casually found an excuse to enter seclusion in the laboratory to study and activate various defensive measures and arrays around her. In fact, she had already left Kunlun University silently and traveled to various parts of Planet Earth to search for the embryonic form of the universe passageway that had not yet been activated.

Zhu Wanwan's vitality had already exceeded 100, and her perception was extremely shocking. She had even specially researched some treasures that could increase the perception of the embryonic form of the universe passage. However, even so, she still needed to be within a hundred miles of these embryonic forms of the universe passage to be able to sense them.

This was already astonishing. In the Huaman Multiverse, many cultivators who were far more powerful than Zhu Wuyan would not be able to sense the fledgling universe passageways even if they were within a few hundred meters of them. Only those who had special opportunities or had personally experienced the effects of the various world origins could sense them.

Or perhaps, they would only discover the abnormality when the embryonic form of the universe passageway was about to mature or even when it had already formed.

Zhu Wanhao transformed into an ordinary cultivator of Planet Earth and walked through the various regions of Planet Earth. He did his best not to cause any impact as he searched for the whereabouts of the embryonic form of the universe passageway.

In the past eighty years, even though he had tried to suppress it, the total number of World Origins he had obtained from the Huaman Multiverse had already exceeded nine thousand points. With another thousand points, he would be forcefully sent out of the Huaman Multiverse.

This was obviously something that Zhu Wuyan did not want to see. Therefore, she would try her best to keep a low profile. There were still more than ten years to go, so Zhu Wuyan did not dare to be reckless anymore.

At that moment, the number floating above Zhu Wanhao's body had already exceeded 80,000. Other than 9,000 points from the Huaman Multiverse, the remaining 70,000 points came from the Xuanhuang Great World.

Many cultivators on the Dongyuan Continent were dumbfounded by this number. Was this even human? He had collected more than 70,000 points of World Origin from a macro world, which was more than 70 times the mission requirement. Moreover, it seemed that the number was still increasing. Did it have to be so exaggerated?

What did Zhu Wanwan do in the first macro world that made him so influential that he could last for so long? Did he destroy the first macro world or shake its foundation? That's why he still obtained so much World Origin even after leaving the first macro world.

Thinking back to when Zhu Wuyan had just left the first great world, many people thought that Zhu Wuyan could only obtain about 20,000 World Origins at most. In the end, it had exceeded 30,000.

They had thought that 30,000 was the limit and that no matter how powerful the next increase was, it would only increase by a few thousand points. However, it actually increased by more than 40,000 points one after another, breaking records one after another. The other high-level cultivators were dumbfounded.

What was even more foolish was to see Zhu Wuwan's strength rising steadily. Whether it was her Qi Refinement cultivation or her body refinement cultivation, they were all soaring and advancing rapidly, reaching the perfected Mahayana realm.

However, no one said that Zhu Wuyan was an idiot, an idiot, or that he was wasting the origin energy of the great world. This was because Zhu Wuyan had earned too much of the origin energy of the world. These world origins were completely enough for him to increase his talent and aptitude, as well as his strength and realm.

No, in Zhu Wuan's case, she should be improving her talent and aptitude at the same time as she improved her cultivation realm.

Immortal Spiritual Roots were already the limit of the human world. As for what level of spiritual roots were higher, most people did not know, but it should not have reached the end.

The high-level cultivators who had been enslaved by Zhu Wuyan were also extremely excited at this moment. They felt honored. After all, it was clearly their master who had earned so much world origin energy.

Everyone knew clearly that after this trip to the 3,000 macro worlds, Zhu Wuwan would definitely soar to the sky and reach an incredible level. She might even take this opportunity to break through to a higher level and become a Human Immortal.

Once Zhu Wuan could break through to the Human Immortal Stage, the Great Zhu Immortal Dynasty would become one of the super immortal sects in the Dongyuan Continent. It would also be the first super immortal sect in the Southern Barbaric Land in so many years, and the only super immortal sect.

Before this, no one had expected that Zhu Wuyang would be able to obtain such amazing benefits from the trip to the 3,000 major worlds. Not only had her talent and aptitude increased to the extreme of the human world, but her cultivation realm had also increased by so much.

The cultivators who were looking at Zhu Wuyang were all silent because there was nothing else to say. Other than opening their mouths in surprise, there was no need for any other actions.

Following that, Zhu Wuyang was just as some people had speculated!

Chapter 1000: Five Elements Tribulation (1) Chapter 1000: Five Elements Tribulation (1) The Huaman Multiverse's clone was busy searching for the embryonic form of the universal passage, and then placing the timed Barrier-Breaking Stones into the embryonic form of the universal passage.

When Zhu Wuyang was about to leave, these Barrier-Breaking Stones would detonate and completely destroy the embryonic form of these universe passages, making them impossible to open in the future.

The Barrier-Breaking Stone was the harvest of Zhu Wuwan's decades of hard work. It could effectively destroy the embryonic form of the universe passageway. After many improvements, only one Barrier-Breaking Stone was needed to destroy the embryonic form of a universe passageway, and it would never be opened again.

The opening of the universe passageway usually took a long time, at least dozens of years or more, or even longer, so it was enough for Zhu Wuyang to prepare.

Of course, there were also some universe passages that would open in a few years or so. Zhu Wuyang did not place any more Barrier-Breaking Stones for them. These Barrier-Breaking Stones were targeted at the embryonic form of the universe passage, and they were not very effective against the completed universe passage.

Although it was a pity, in order to obtain more of the world's origin, Zhu Wuwan could only do this.

If it weren't for the fact that those formed universe passageways were heavily guarded, Zhu Wuyang would really want to destroy those formed universe passageways as well. That way, the benefits would be even greater.

However, Zhu Wanhao didn't give up. She was prepared to choose some universe passages with weaker defense measures to place treasures that could destroy universe passages before leaving. She would destroy these universe passages and obtain the greatest benefits as much as possible.

As for what kind of impact this would have on the Milky Way Federation and the other races, it had nothing to do with Zhu Wuwan.

The Milky Way Federation already had all kinds of weapons and treasures to destroy the formed universe passages. After all, if some universe passages were connected to worlds of high levels and could pose a huge threat to the Milky Way Federation, they would definitely find a way to destroy them, such as the world where the Dongyuan Continent was located.

After all these years of understanding and learning, Zhu Wuwan was shocked to discover that tens of thousands of years ago, a cosmic passageway had indeed appeared on the Myriad World Heavenly Sphere and the Earth Star. The world connected to the cosmic passageway was very likely the world where the Dongyuan Continent was located.

Because according to the records, the cultivation system of the cultivators in that world was exactly the same as that of the Dongyuan Continent. At least, the part of the human world that Zhu Wuyang was familiar with was exactly the same.

As for the departments above that, they were called True Immortals, Earth Immortals, and Celestial Immortals. There were even mighty figures who had mastered the power of the natural order, far surpassing the cultivators of the Huaman Multiverse, even if everyone also mastered the power of the natural order.

When they discovered that this world possessed such a powerful being that the Huaman Multiverse could not withstand, the humans of the Huaman Multiverse

decisively destroyed the cosmic passageway and no longer dared to communicate with it.

However, the humans here would not know that even though the cosmic passageway was gone, the world where the Dongyuan Continent was located had invaded the Huaman Multiverse through another method.

Of course, Zhu Wuwan was not 100% sure about this matter, but the possibility was still very high. Unfortunately, the Milky Way Federation had obtained very little information and classics from that world. There was not even any information that involved True Immortals or above, which made Zhu Wuwan quite speechless.

It seemed that the world where the Dongyuan Continent was located was very powerful. Even a tyrannical world like the Huaman Multiverse had been beaten to such a state and had not obtained much. It was obvious that the difference in strength between the two sides was quite large.

In the process of searching for the embryonic form of the cosmic passage, Zhu Wuwan also discovered something to his surprise. There were very few people like him who were searching for the embryonic form of the cosmic passage. Although the Milky Way Federation had an organization that specialized in searching for the embryonic form of the cosmic passage, the number of people was small and the strength was low. They were basically just doing errands.

After understanding it, Zhu Wuwan realized that it was too difficult to discover the embryonic form of the universe passage. Even if they could discover it, they could at most take measures in advance to prevent the alien races from coming out from inside to cause harm to the Milky Way Federation.

However, in order to speed up the formation of the universe channel, although the Milky Way Federation had the strength, it would consume too many resources and treasures. It was not worth it. Therefore, it was better to let them open slowly.

Moreover, the Milky Way Federation had already mastered so many universe passages, and the demand for universe passages was not that great. Therefore, they were not very enthusiastic about opening up new world battlefields.

Since he couldn't speed up, he would just let nature take its course. If he really opened a world that he couldn't deal with, he would just destroy the universe passageway.

The response of the corresponding department of the Milky Way Federation provided Zhu Wuwan with a lot of convenience. Of course, it was also because of this that Zhu Wuwan was unable to obtain much information about the prototype of the universe passage from the Milky Way Federation.

There were gains and losses in this way. However, Planet Earth wasn't very big, and it would only take Zhu Wuwan a few years to walk once, so it wasn't too troublesome.

While the clone was busy searching for the embryonic form of the universe passageway, Zhu Wuwan's main body was already prepared to break through the shackles of the Crossing Calamity Stage.

The so-called Dujie stage, as the name implied, was to pass through three tribulations. These three tribulations were the inner demon tribulation for Tianyuan, the five elements tribulation for Earthly Yuan, and the heavenly thunder tribulation for Mortal Yuan.

The Inner Demon Tribulation was the most difficult to overcome, followed by the Heavenly Thunder Tribulation. The Five Elements Tribulation was relatively weak, so the cultivators of Dongyuan Continent usually started from the Five Elements Tribulation.

After passing the Five Elements Tribulation, he would further improve his overall quality. Then, he would pass the Heavenly Lightning Tribulation, and finally the Inner Demon Tribulation.

The so-called Five Elements Tribulation was the five types of tribulation that belonged to metal, wood, water, fire, and earth. They were the tribulation of Gengjin, the tribulation of Yimu, the tribulation of Xuanshui, the tribulation of Lihuo, and the tribulation of thick earth.

They had to suffer various attacks from the five basic energies of metal, wood, water, fire, and earth. The target of the attack was the power of the earth element. Only by withstanding the power of the earth element could they be considered to have passed the Five Elements Tribulation.

The Five Elemental Tribulations sounded like a lot of tribulations, but these five tribulations could be overcome separately. They could be overcome one by one, and there was no need to overcome all of them in one go. This way, the difficulty of the Five Elemental Tribulations would plummet, far less than the Heavenly Thunder Tribulation and the Inner Demon Tribulation.

This was because the Heavenly Thunder Tribulation and the Inner Demon Tribulation had to be completed in one go. Either they passed it smoothly, or they died. The chances of survival were very small.

Therefore, in the cultivation world of Dongyuan Continent, all the cultivators who had reached the peak of the Mahayana Stage and the Quasi-Immortal Stage basically started from the Five Elements Tribulation. Only those who were especially stubborn would choose to start from other tribulations, or they had special treasures that targeted other tribulations.
