

Life at The Top – Chapter 1474

“I have a pretty good impression of Veronica.”

As Jasper said that, he recalled Veronica’s reaction after she saw Greg being hurt. One could not fake that kind of genuine concern and anxiety.

“However, you have to think about how you’re going to do this yourself. After all, you need to find a stepmother for your kids.”

Greg shook his head and said, “I just want to manage the company properly. I’m not thinking about other things right now.”

“It’s fine as long as you can decide for yourself. However, time waits for no man. If you don’t act now, women will eventually get snatched away by someone else. When that happens, no one will care even if you regret it,” mocked Jasper.

“Blau Mobiles has two offices. One is Cavern City, which we had initially chosen, and the other is in Nim City. Right now, we’re focusing on the R&D center in Cavern City. Eric will be in charge of this place. After the new year, I will move the office in Nim City over to that location,” Greg changed the topic and continued.

Jasper nodded and said, not expressing an opinion, “The company is not big right now, so it’s indeed not suitable to move. You will run into a lot of trouble if you choose to do so.”

“Cavern City is still rapidly developing. In the future, it will be the manufacturing and sales hub of many domestic electronic products. It won’t hurt to go over and make the necessary arrangements for the business there earlier rather than later.”

Greg nodded and sighed lightly. “In the beginning, you suggested that I go to Cavern City, but at that time, Blau Mobiles didn’t have anything, so naturally I couldn’t get any good deals.

“After all, the competition in Cavern City is fierce, and the people in Nim City are very sincere. So that’s why I put the administrative center in Nim City, leaving only one R&D center in Cavern City.

“However, it seems that this move was wrong.”

Jasper put the noodles in his mouth and said, “Not entirely. The geographical conditions of Nim City are not worse than that of Cavern City. It will also serve as the traffic operation center for the entirety of River City. Besides, it’s near the best port and near Waterhoof City as well. There are advantages to both of them, so you should think it through before you make your

decision.”

“Damn, you people started eating before we got here?”

Henry’s voice came from the door. Then, they saw him pushing the door open and striding in. Behind him was an unassuming man in his thirties.

This man was not tall and he looked ordinary. However, his eyes looked very alert. After he walked in, his eyes were fixed on Jasper.

It seemed that he could tell who the person he really wanted to meet was between Jasper and Greg.

“This is Todd Puller. He’s the person I told you about, the young master of Nawait Semiconductor Manufacturing.” Henry pointed at the man and said to Jasper.

Then, he picked up his fork to start chowing down some of the noodles. He said to Todd without turning his head, “This is Jasper Laine, my future brother-in-law and the boss of JW.”

“Hello, Mr. Laine. ” Todd was very passionate and courteous. He even looked a little respectful.

Jasper smiled, stood up, and shook his hand with Todd. He said, "I've heard about Nawait Semiconductor Manufacturing; Your father is also an exceptional entrepreneur in Nawait. I've been wanting to get to know him. This trip was not made in vain now that I got to see you, Mr. Puller."

Todd said in astonishment, "If my father knows about this, he would be very glad. You're very prestigious now, Mr. Laine, and everyone should learn from you."

"You're too courteous."

The two of them exchanged pleasantries and sat down to eat.

Meanwhile, Greg was stunned as he stood to one side. Anyone in the mobile phone industry or, more precisely, anyone in the electronic equipment industry would know about Nawait Semiconductor Manufacturing.

It could be said that under the restrictions of Western technology monopoly, Nawait Semiconductor Manufacturing was the only advanced semiconductor manufacturer that domestic electronics manufacturers could connect with.

Semiconductors and organic molecule chips were inseparable, especially when it came to things like mobile phones.

For example, the two largest domestic mobile phone manufacturers in the country, Fliegen and Goldie, were almost entirely dependent on the semiconductor equipment provided by Nawait Semiconductor Manufacturing.

It could be said that Nawait Semiconductor Manufacturing decided the fate of most domestic mobile phone manufacturers.
