

Lord of War 58

Chapter 58: .Earth Demon Spider

"It's the Earth Demon Spider!" When the first spider appeared under the coverage of Illumination, Alfred immediately recognized the identity of the spider.

The Demon Spider is an unusual beast.

This type of spider is only as big as the palm of an adult. Although it is larger than a normal spider in terms of body size, it is not so excessive. Generally speaking, they are no different from ordinary spiders. They are also divided into a cephalothorax and abdomen, with eight legs, chelated limbs and beard limbs in front. The main attack method is to jump to the target with a strong jumping force. Nail the cheeks into the target's body.

The Earth Demon spider does not have a poison gland, so there is no toxin that can kill you in one blow, but it can secrete a paralyzing liquid in its cheeks, paralyzing the target creature's ability to move, and there are already various perceptions in the target creature. In this case, eating directly with oral sharps is very different from the traditional way of eating by spiders that use digestive juices and then **** business liquids.

In addition, the Earth Demon spiders cannot spin silk, which means they can't use the silk to entangle and restrain the target. However, there is a layer of hard rock armor on the surface of the Earth Demon Spider. It is difficult to break this layer of rock armor with ordinary attacks. In addition, the Earth Demon Spider has a "small" size and powerful jump compared to other monsters. Power, and usually appear in groups, so even if the Earth Demon Spider is only the lowest-level first-level beast, there is absolutely no one willing to provoke these creatures without fighting.

If there is a choice, Alfred would rather face the human face spider.

Although the size of human face spiders is not in the category of normal spiders at all, and they have simple wisdom, they are not "beasts", but are still in the category of creatures. For people in this world, monsters and creatures are completely two concepts of creatures. Even smart creatures can be easily dealt with, and even stupid and weak creatures can be difficult to deal with.

"Too many!" Alfred said in a deep voice, "We should retreat now!"

"No need." Sean shook his head.

For people in this world, normal logic is indeed that they would rather face smart creatures than stupid monsters. But this is only for "in this world." For players like Sean who are not born from this world, he prefers to face Warcraft, because in the game, any kind of Known World of Warcraft has been thoroughly studied and understood by players, and whether it is its characteristics, strengths or weaknesses, it has long been no secret to players.

After all, in the player's world, fighting with warcraft and other players is the mainstream—any guardian who guards ruins, treasures, etc., is mostly warcraft, organs, and puppets. It will be fighting against npc creatures.

Earth Demon Spider, although it is a monster, it is only the weakest, only second-order strength.

"Don't be deceived by their illusion." Sean pulled Cecilia and pulled her behind him. At the same time, when his figure moved slightly, he and Alfred didn't even know about it. He exchanged positions, "The rock armor of the Earth Demon Spider is indeed very hard, but after all, they are still spiders. There are only those kinds of attack methods that can be used to come and go."

The first Earth Demon spider that was closest to Sean and others, finally took a leap and swooped.

Like the situation in Shaun's memory, the jumping ability of the Earth Demon Spider is still so terrifying, and the distance of more than eight meters seems to be completely non-existent to them.

And after the first Earth Demon spider jumped up, there were second, third, fourth...

Slices of Earth Demon spiders jumped up and attacked like an overwhelming sky, with a feeling of dark clouds over the city. Especially the shock formed by the speed that the Earth Demon Spider bursts out when jumping, and the shock generated in this narrow underground passage makes people feel an unexplained heart palpitation. The dense black shadows, even Alfred, who is accustomed to life and death and various dangerous scenes, suddenly had the illusion of goose bumps, let alone Cecilia.

Even though she had gone through many thrilling battles with Sean, this terrible sense of oppression really occurred for the first time.

The only person who remains indifferent is Sean.

"Skills activated." Sean said silently in his heart, "Adrenal gland stimulation."

【Activating this skill requires two proficiency points. Are you sure to activate it? 】

"determine."

Without the slightest hesitation.

【Adrenal Gland Stimulation: By forcibly stimulating the adrenal glands to make oneself in a state of excitement, the reaction ability will be fully increased by 50% for 3 minutes. After the effect disappears, it will enter a state of exhaustion, and the full capacity will be reduced by 70%. Auxiliary second-level normal, level 13, proficiency 14 . 】

This is an auxiliary skill that all [Physics] occupations can learn after the second level. Its function is very simple. It can only improve one's reaction ability. The so-called reaction ability includes reflex nerves, dynamic capture ability, movement speed, power control, etc.

In the game, the acquisition of this skill is not difficult. Almost any [physics] occupation will learn it at the second level, because this is a very important skill.

After activating this skill, there were some Demon spiders that could not catch the movement trajectory with the naked eye. At this moment, in Sean's eyes, they are playing in slow motion, and their movement trajectory in mid-air is clearly visible.

Shaun did not hesitate at all, his arm was slightly raised, and Charles' saber waved with Shaun's movements.

The sword's front swept up from bottom to top, cutting through the air barrier, but suddenly there was a sharp whistling noise in the clear and windless environment.

Faced with the terrible sense of oppression of the Earth Demon spiders leaping in groups, Alfred and Cecilia could feel that the awe-inspiring momentum of Sean's sword was more powerful!

The blade did not cut the Earth Demon Spider into two pieces as expected.

At the moment when the sword's edge swept to its extreme, as if someone had pressed the pause button, Xiao En's sword stopped abruptly in mid-air. As the sword that attracted the eyes of Alfred and Cecilia, because of this sudden stop, the two had a nausea.

The next second, the cold light flashed slightly.

The sword in Xiao En's hand suddenly pierced out, and a sword "pointed" to the position between the head, chest and abdomen of the Demon Spider.

This seemingly lighter sword actually penetrated an inch.

A hoarse scream came from the body of the Earth Demon Spider. The figure was still in mid-air, and it had already begun to sway rapidly, and the body that was completely out of balance fell to the ground in the next moment. However, the violent twitching did not stop there. As the body twitched continuously, the layer of rock on the Earth Demon Spider began to crack slightly, and small pieces of rocks began to fall off from its body, exposing. The light gray body wrapped in khaki rocks.

The encounter with this Earth Demon spider is not the only one, and it will never be the first.

At the moment the first Earth Demon spider fell from mid-air, the silver brilliance burst out like a storm under the envelope of the lighting technique.

It was a sword shadow equivalent to the flying Earth Demon spider.

That is a flower of death blooming in a narrow tunnel.

At this moment, Alfred seemed to see the situation facing him in the wine and the knife last night in a daze.

Shaun was still motionless like a reef, but this time it was not his aura that formed the waves, but the black Earth Demon spider in front of him. But this time, the slap of the waves did not

receive any effective results. When every silver-white sword shadow shone, there would be an Earth Demon spider falling from mid-air, and then twitching constantly, but they twitched more and more. Intense, the rock layer on the body will fall off faster.

What's even more incredible is that the frantic magical aura unique to Warcraft is constantly dissipating from the light gray Earth Demon spiders on the ground.

As a [physics] profession, Alfred may not know what this means, but Cecilia, as an apprentice magician, knows very well that this means that Sean's thorns in every sword They all accurately destroyed the crystal nucleus in the Earth Demon Spider's body. And this is the real cause of the death of these Earth Demon spiders, their twitching is only due to the severe pain of the broken crystal nucleus.

Dozens of seconds, maybe one or two minutes.

The silver storm that bloomed out finally disappeared in the narrow tunnel.

Dozens of Earth Demon Spiders, just under Sean's sword power, stopped here, and could not cause any substantial damage to the three of them.

And Sean also canceled the skill effect of adrenal stimulation in the first time, and a weak and feeble sense of exhaustion swept through immediately, which made him have to stand with the sword. Immediately afterwards, the soreness from his right hand also instantly made him feel a burst of intense pain. Under the stimulation of the adrenal glands, his movement speed was indeed greatly improved, but as a price, it was after the effect disappeared. Muscle strains caused by exercise will also be completely fed back.

"Head!" After Alfred was shocked, he also noticed Sean's strangeness for the first time, and immediately reached out to support him.

"I'm fine, it's just overexertion." Sean shook his head, "Did you see how I attacked?... The nucleus of the Demon spider is in the middle of the head, chest and abdomen. If you attack here, even if they Its rock armor is useless no matter how strong it is. It can be said that this is their biggest weakness, take this sword... if you really don't know how to stab them, then grab them and break them!"

If the power value reaches more than 30 points, the Earth Demon Spider can be broken. This was discovered by a player who was too idle in the game. Moreover, through this behavior, the

crystal nucleus in the Earth Demon spider can be retained. Although the crystal nucleus is only as large as a grain of rice, it can still be equivalent to a real first-level monster crystal nucleus if one thousand is collected.

Alfred's power value is only 27 points, but if Charles's saber is equipped, the power value will definitely exceed 30 points!

The only thing to worry about is Alfred's speed. After all, the Earth Demon Spiders flew in pieces. ;
