

Lord of War 67

Chapter 67: .The true purpose of the Medusa Chamber of Commerce

Medusa Chamber of Commerce, this chamber of commerce cannot be said to be pure evil, but it has absolutely nothing to do with kindness.

In the past, none of the tasks released by this chamber of commerce was kind. Either participate in the rebellion of this kingdom, or destroy the development of that chamber of commerce. You just need to do something that hurts others and self, but many of the tasks of the Medusa Chamber of Commerce are purely at the expense of others and are carried out entirely for the sake of chaos.

Until the real boss of the Medusa Chamber of Commerce appeared behind the scenes, the players did not understand.

Can you count on a demon to be lawful?

Those red horned triple-speed creatures from the abyss, their favorite is the chaotic world. Their reputation is even more notorious than the demons of hell-both for NPCs and for players.

So when Sean saw the snake painted on the back of the brown hooded robe on the magician, Sean knew the identity of the magician.

The emblem of the Medusa Chamber of Commerce is nine snakes entwined in a ball.

With the scale and strength of the Medusa Chamber of Commerce, it is naturally not a big problem to find a way to get so many crypt ice spider eggs. Although the price may be higher, if it can really catalyze a controlled The Crypt Ice Spider Queen, then this deal is definitely a profit. Most importantly, they also colluded with the Crypt Demon. In other words, they could cultivate a team of Ice Spider Knights absolutely loyal to the Medusa Chamber of Commerce.

Although this "Knight Order" is unlikely to fight on the ground, it should be enough to play a kingdom in the complex dungeon world. With the strength and character of the Medusa Chamber of Commerce, it's impossible to be obscured by a kingdom-scale dungeon power. Sean even guessed that the Medusa Chamber of Commerce even caused the chaos of many kingdoms on the surface world back then. Isn't it because you later controlled a sufficient scale of dungeon forces?

The magician who retreated from the tunnel under the protection of two crypt demon, cursed angrily. He waved the magic wand in his hand and shattered several frozen ice sculptures next to him. However, it seems that I still can't get rid of my hatred. I smashed a few ice sculptures again. There were only 4 ice sculptures that were originally 13 ice sculptures in an instant. Although I know that these people actually died at the moment they were frozen into ice sculptures, but Sean still feels that life is particularly fragile at this moment.

Freezing technique.

This is actually a tasteless magic in the game, but I didn't expect it to have such terrifying power in the real world.

Sean glanced at the magician, but did not believe that this magician was only good at freezing, because it was quite different from the nature of the Medusa Chamber of Commerce. The magician from this chamber of commerce is best at spirit in the soul energy system, summoning in the life system, undead and fire system in the elemental system, and earth system. Few magicians are good at other types of magic, even if they do. Learning to use it in other places should be used in the next scene, and will not specialize in this area.

It seems that the magician suddenly became furious. The previous crypt demon who was responsible for catalyzing the crypt ice spider also quickly ran aside and picked up the weapon placed there again. They still don't wear any protective gear, but Sean, who is familiar with the characteristics of the Crypt Demons, knows very well that the skin of these Crypt Demons naturally has the strength of a hard armor, and it is difficult for them to be damaged by slashing weapons. , On the contrary, blunt weapons have higher damage.

Of course, this only appears on the lower-level crypt demon, and the higher-level professional crypt demon also uses armor.

But no matter what kind of armor or weapon he uses, Sean doesn't really care. He has very sharp weapons. Unless it is also a magical equipment type of armor, it is difficult to resist the sharpness of Charles Sabre.

However, at this time, Sean did not attack rashly. He was still judging the opponent's profession through the opponent's crypt demon's weapons.

Six crypt demon, two of them seem to have suffered severe injuries, but they have not lost their combat effectiveness, but this is mainly because these two crypt demon are rare defensive occupations.

Because of their physical structure, the crypt demon's skin has a strong defensive ability. Therefore, in the crypt demon's tribe, there are very few professions specializing in defense type. Among the tribal groups, because professional defense occupations must lie in the protection of important figures in the forces. Generally, expellers rarely expel such occupations, even if they commit a felony, they will still be given a chance to change.

And the other four crypt demon, it seems that they really fit the characteristics of the crypt demon group: warlike.

The weapons in their hands are heavy weapons such as tomahawks and epees. It is not difficult to wield such heavy weapons with their physical strength, and there are indeed very few humans with the same level of strength under normal circumstances. It can withstand it, and the cave is large, and there are no terrain limitations when using this type of weapon, so it can display the real combat effectiveness of the Crypt Demon.

At this moment, the six crypt devils crowded around the magician, and directly opened the battle formation, seeming to be guarding something.

In fact, as far as Sean is concerned, he did not pay attention to the six crypt demon, because he is too familiar with the crypt demon's fighting style. In the game, he did not run into the dungeon world. He also led the guild to directly take down the power of a crypt demon, so he said to Cecilia that one can play five is not a joke, but it is really possible to do so.

If Alfred and Cecilia were added, it would not be a problem to clean up these six crypt demon.

The real problem is still with the magician.

At this moment, there was a slight noise suddenly behind him. As soon as Xiao En wanted to make a move, he immediately woke up. At this time, he could approach him from behind, and the sound of his footsteps was so steady that it would never be someone else. He changed from lying on his stomach to half-kneeling, then turned and looked at Cecilia and Alfred who had already canceled the lighting technique and walked from the corridor, frowning slightly: "Why are you here?"

"Worry about you." Cecilia said naturally.

She walked to the entrance of the cave and lay down like Shaun. After a moment of careful observation, she opened her eyes wide and said, "They actually want to catalyze the Crypt Ice Spider?"

Alfred didn't understand this, but seeing that both Sean and Cecilia were so cautious, he also lay down. But after only glancing at the spider eggs for a few moments, he fixed his gaze on the crypt demon and the magician, as if they were still observing something, and did not ask.

"Yes, what do you think will be catalyzed?" Sean also leaned back, and then asked Cecilia.

In fact, Sean really doesn't know much about magic, even if he is a player.

"At least it's also the Queen of the Crypt Ice Spider." Cecilia's brows frowned slightly, as if analyzing something, and then she spoke a moment later. The spider queen catalyzes the birth. It is very likely that after the catalysis, the spider eggs will be sealed by freezing technology, and then a batch of ice spider eggs will be collected to continue the catalysis until they have enough nutrients to catalyze a crypt cold spider queen."

Freezing technology.

Sean noticed this keyword, presumably this is also the reason why the magician would freeze.

"The ambitions of these people are really big." A sharp look flashed in Sean's eyes, and he found that he still underestimated the ambitions of the Medusa Chamber of Commerce.

If it is said that a crypt ice spider queen was catalyzed, Sean can also understand that they want to create a new dungeon power. But if it was the Queen of Crypt Spiders, Sean would not have this idea, because it is not a high-level monster that can be manipulated at all. What the Medusa Chamber of Commerce wants is to directly let the entire underground area of Tindes Complete chaos, and then bring this chaos to the surface.

Pure chaos, it really resembles the style of the Medusa Chamber of Commerce. —Sean thought with disdain.

"What do they seem to be caring about?" Alfred finally spoke up rarely at the moment.

"The magician escaped under the protection of two crypt demon. I'm afraid that there has been a tragic fight in that tunnel before." Sean motioned to the crypt demon to face everyone. Then he said, "But this saves us a lot of trouble. It's best if those people still have the ability to kill them again, and then have another head-on with these crypt demons."

"This is your goal?" Alfred was taken aback when he heard Sean's words, and then asked as if he had reacted.

"No, this is actually purely a surprise." Xiao En chuckled, but he had another idea in his heart, "My real goal is actually to be further down here, that's the Crypt Demon. The real residence...but I'm probably not far from here. After all, the Crypt Demon has to take care of the Crypt Ice Spider in this lair. I'm afraid I can't build the residence too far away, otherwise it's very inconvenient. take care of."

Cecilia and Alfred nodded. Regarding this normal logic, they can judge it without even thinking about it.

At this moment, an earth-shattering roar suddenly came from the tunnel, shaking the dome in the cave to drop a lot of dust and stones, and even the ground felt a slight tremor. And immediately afterwards, a whole body of ocher worm rushed out of the tunnel. Its defensive layer of soft leather was already scarred at this moment, and amber-like liquid was constantly pouring from these wounds. Then, as soon as it touches the ground, it becomes some kind of extremely hard substance.

This worm is the cave monster tamed by the Crypt Demon!

The amber liquid secreted from them is not only a kind of adhesive, but also the blood of the cave monster!

At present, this cave monster has been so badly injured, I am afraid it will never recover.

Without waiting for the cave monster to completely drill out of the tunnel, there was a sound of shouting in the tunnel, and nearly 30 humans armed with various weapons rushed out of it, and at the same time they did not forget to go to this cave. The demon worm greeted him, and soon the cave demon worm was killed directly. And until then, these people seemed to suddenly find that they were still standing in front of the enemy, and they returned to their senses and deployed their defensive vigilance.

It's just that these people's faces didn't show a trace of alertness. On the contrary, they looked relaxed and free, and they didn't put the six crypt demon and the magician in their eyes at all.

Alfred glanced at the blood-red badge attached to these humans, and sighed slightly: "The people of the Blood Weeping Mercenary Group are the most powerful villainous mercenary group in Cerroda Village. It is a mercenary group like the Jackal that will not take the initiative to provoke this group of lunatics.... It seems that this time, those crypt demon may not have our share of action."

"No." Sean shook his head and said in a deep voice, "Those mercenaries are going to be bad luck."
