

Lord of War Vol 2-171

Chapter 171: Belated raid

"What's the situation?" Sean asked, there seemed to be a hint of eagerness in his voice.

"The opponent's number should not exceed five hundred." Yimu said.

Five hundred!

The number of people is more than half compared to the morning! If the opponent is not an elite force, then with the strength of the Cecilia Guards and the strength of the slave-catching team of Iron Wings and Andre, it shouldn't be a big problem to defeat the opponent. After all, the Cecilia's guards are in a clearly good state. Although dozens of people were injured, the injuries were not too great, and there was still a possibility of continuing to fight.

Of course, Sean doesn't doubt Yim's intelligence at all.

Because he has allocated all werewolves, gray elves, and goblins to Yimu, a special team formed by him is responsible for intelligence investigation. Of course, the most important thing is to use this investigation team to train and cultivate Rupiah, because Rupiah is the talent that Sean really values, but the current experience in all aspects is still lacking.

As we all know, both gray elves and werewolves have night vision capabilities. It is naturally not difficult for these people to detect an accurate number of people.

But before Sean was over happy, Yim gave out a new piece of information.

"It seems that many people on the other side are ill, and they seem to be in a situation where there is no ammunition and food. Although there are nearly 500 people, there are probably less than 300 people who can really participate in the battle." Yimu continued, " Moreover, according to our investigation, the morale of the other party has also fallen into a trough, and it is very likely that the response will not be too late."

"Is it possible that it is a trap?" Sean pondered for a moment before speaking.

"We have investigated the situation nearby, and there is no ambush." Yimu obviously considered this possibility, so he replied, but this answer was not a positive answer, but a side answer.

In fact, it can't be blamed for Sean to think so.

Under normal circumstances, if there is an accident in the army, it must be the first time to choose to retreat. At least if the team is led by Sean in this situation, then he will definitely give up tracking, and then try his best to find a safer place to camp, and send out a signal for help at the same time. However, the situation of the opponent's unit is obviously different from normal practices, so Sean is a little worried that the opponent will use 500 people as bait, and wants to lure himself and others into a surprise attack, and then outflank him.

He would never have imagined that the wolf army had suffered a series of almost devastating doom entanglements, so it ended up like this. Of course, the wolf also thought about giving up tracking, but the support troops she ordered have never caught up, so they can only temporarily rest here, and there is no plan to continue tracking at all. But at this time, they were discovered by Xiao En and others, and they were only two hundred meters away from the place where Xiao En and others camped!

This has to be said, it is a big joke.

"How about the number of strong people?" Sean asked.

"Two." Yim said, "But the aura from these two people is very strong. Even if the two of them are not at their peak, at least their combat effectiveness will not drop too much."

Sean nodded slightly, expressing his understanding.

At this time, everyone's eyes were already looking at Sean.

Sean's current strength, although only the upper silver pinnacle, everyone knows that in a one-to-one situation, Sean can easily kill a lower-level golden powerhouse. But what they don't know is that it's not a problem for Sean to kill two low-ranking golden powerhouses. Of course, the premise is that he can launch a Requiem. But this view is a bit perverted in everyone's eyes. Therefore, they have no problem with Xiao. Well, the so-called being able to deal with two gold powerhouses is to maintain a restraining attitude.

And now, the enemy's troops are two hundred meters away from him and others. And there are only two golden powerhouses and three hundred soldiers. This number has no advantage at all for Sean and others, and it can even be said to be a disadvantage.

As long as Sean can contain the two golden powerhouses, and Clover leads everyone to annihilate or defeat the enemy at the fastest speed, then I am afraid that the two lower-level gold powerhouses will fall here.

Don't forget, Clover and his Cecilia Guards have the ability to kill a low-level golden powerhouse and two hundred armed soldiers head-on. If the opponent's army were not for an army, Sean didn't even need to contain the two lower gold powerhouses. As long as the whole army assaulted, he could easily handle the army that had been behind them.

"Kill!" Without the slightest hesitation, Sean made a decision quickly, "We must move faster, try to eliminate the opponent in the shortest time, and then leave here immediately.... I suspect that the opponent is a vanguard. The reconnaissance troops, once we fight them, I am afraid that the reinforcements in the rear will receive news soon. When we rush over to support us, we have not solved the other party, but are entangled by the other party, then it will be a great disadvantage to us."

Everyone nodded and said nothing.

Even Clover, who did not put Sean in his eyes at all, this time also complied with Sean's command and arrangement. At this point, Sean didn't feel surprised, because this troop has always followed behind, and it is also a threat to Cecilia, and Croft is already enthusiastic enough to completely kill all threats in the cradle. , So he decided to destroy the opponent at this time, of course he would not have the slightest hesitation.

After all, the opponent's face-to-face force is not their opponent at all.

As the night filled, Sean's unit quickly began operations.

They cautiously passed through the highlands and the rocky forest, then went around a huge crack formed somehow, and soon came to the wolf unit near fifty meters. But at this distance, they don't dare to move at will, because even though the night is gloomy, it seems that even God is helping Sean, but if the golden power is really alert, this range of distance will not hide people at

all, and if you get closer, then I am afraid that even the opponent's soldiers will be able to spot Xiao En and others.

So everyone lurked here, quietly waiting for the night to become darker.

Because according to normal habits, once late at night, the temperature will drop even lower, and under normal circumstances, people's reaction ability and thinking will also decrease accordingly, especially for a troop that seems to be demoralized. On the other hand, Sean, although they left the leeward place and felt the coldness of the wild land, after all, they were full of food and drink, and the whole army had a good rest, so they were not very afraid.

At least, at this point, I can bear it and can afford to wait.

All of this looks like a replica of Sean and the others ambushing Burair's army. The only difference is that this time there is no sharp knife squad who rushed to kill the enemy sentry first- and in fact, this is naturally unnecessary, because the enemy army of Sean and others is not even a sentry at all. There are no arrangements.

is really an unprofessional army.

Sean couldn't help but think secretly that there is no arrangement for a man standing guard and guard. Isn't this army unprofessional, what is it?

In fact, the wolf did have some negligence.

If it was the past, she certainly couldn't ignore the most important point in the march. But I don't know why, today's successive accidents and bad luck have made the wolf a little crazy, so she doesn't need to urge and remind her to make a mistake, and she was given it today. Ignore it!

What she is thinking now is why the main force has not arrived yet. According to her calculation, as early as night, the following two thousand troops will catch up with Joe and two other golden powerhouses, and the continuous supply of supplies will restore their combat effectiveness immediately. As for what it is like now, two to thirty people have died from freezing, and even more than a hundred people have also fallen ill.

This blow can be described as disastrous.

It is precisely because of this that the wolf and another strong man did not notice at all. Sean, the guy she listed as the number one enemy, has led the troops to encircle them, and is only five minutes away from them. Less than ten meters. If at this time the wolf and another golden powerhouse can concentrate, and judge the surrounding environment a little, they will immediately be able to find the ambush of Xiao En and others.

However, the bad luck seems to have not left the wolf's body yet.

As the night darkens and the chill gets heavier, everyone knows that the coldest moment in the wild has arrived.

For a time, most people in the wolf camp immediately became shivering, and the number of soldiers who were frozen to death began to rise immediately.

But when the wolf hadn't figured out how to solve this problem, a sudden shout of killing sounded from all directions.

Wolf and another golden powerhouse were slightly taken aback. At this time, their aura broke out completely, and their perceptions immediately expanded in all directions. For an instant, the two of them were stunned, because they found that a group of people were rushing towards them 30 meters away from them, and the speed was not as fast as normal, and the distance quickly changed again. It has become 20 meters, 10 meters, the next moment there will be a complete contact war.

Soon, the wolves realized the problem, and they were raided by the enemy!

As a person who is best at launching raids and fighting ambushes, the wolf is really outrageous at this moment. She hasn't launched a raid on Sean yet, so Sean dare to use the raid tactics to instigate her. How does this make the wolf not? What about anger? It's just anger that turns to anger, and the wolf soon discovered that the current situation is still more favorable for them, because at the moment the dark clouds cover the moon, and although the surrounding situation is not to be seen, it is still difficult to distinguish between the person and the enemy. , Especially in situations of melee.

In the battle that broke out in this case, the false injury rate was very high.

But the wolf is a low-level golden powerhouse after all, so in perceptual judgment, the other party may cringe a little, but she definitely won't! And as long as she and another golden

powerhouse can exert their full strength, even if the troops that attacked them are elite troops, the wolves are confident that they can kill them back, because the attack itself is to create chaos at the same time. , To maintain the order of one's own troops, rather than completely falling into chaos.

But before the wolf was happy, the dark clouds in the sky seemed to fade a lot for a while, and then a gust of wind blew away the dark clouds, and the bright moonlight instantly seemed to spread across the entire land. Like the upper layer of silver gauze, except for a slightly vague meaning, if you can't distinguish the enemy from your own at this time, then you are really a group of blind people.

At this moment, the wolf suddenly had an urge to cry!

Chapter 172: .One-sided raid (recommended ticket plus more)

War is never a trivial matter.

This is a cruel to ***** fight.

But sometimes, the war doesn't look very cruel, and it will not start a fierce fight, but it is also a ***** scene.

is like now.

A slaughter that can be regarded as one-sided.

Just like the scene that Sean had seen when he was in Hongye Town, it was so naked and cruel that it made people completely desperate.

Blood, amputated limbs, corpses, all are so real.

Only at this moment, Sean has no time to take care of the blood of this raid. At the beginning of the battle, he rushed towards the two most powerful people on the battlefield, and easily attracted the attention of these two people-the wolf's target was originally Sean, and Sean came to him to trouble her. Naturally, he couldn't ask for it; and although the starting point of the other golden powerhouse was different from that of the wolf, he was of course also attacking Sean based on the idea of capturing the thieves first.

Two golden powerhouses shot together, and they wanted to win a master who was on the top of the silver pinnacle. Isn't that right? What's more, this golden powerhouse also believes that as long as they attack Sean together, then the enemy will definitely support them. The encirclement will not be too perfect at that time, and they will even have to throw a rat trap, so that they can have more Big win.

But what he didn't expect was that he and the wolf attacked Sean together, but the opponent's army was actually indifferent, and continued to fight with his own army, without even thinking about helping him. This made this golden powerhouse feel incredibly unbelievable, and when he and the wolf teamed up and confronted Sean, a flash of shock flashed in his eyes. In front of him, the lord whose strength was averagely evaluated by the outside world could actually stop him from meeting with Sean. The combination of the two wolves? !

Clough glanced coldly at the match between Sean and the two golden powerhouses, and then focused all his attention on his home court.

Before the raid was launched, he had already agreed with Sean that he would only move to the battlefield on Sean's side when he completely wiped out these enemies and made sure that they would not make trouble. Before that, no matter what he fights with the two golden powerhouses, he will not lend a hand, and if the situation is not good, then he will take away Cecilia at the first time instead of staying. Continue to fight to death.

Of course, Sean will not object to this, but he also made it clear that Clover must resolve the battle within three minutes.

Klov is noncommittal.

In the glance he just swept through, he found that Shaun and the other two had the upper hand in the fight, and there would be no danger in a short period of time. So he settled down and focused completely on his own battlefield command, because his time was very limited.

It turns out that Clover is not a person who can only speak big words.

can be valued by William, and even considered as the first rescue force. In fact, this is tantamount to showing everyone the strength of Clover.

The entire army was more than 350 people, even the bears, the northern barbarians and the wounded soldiers, Clover did not hesitate to use them.

The charge at the front line is the bear with a heavy hammer. They did not use the impact shield this time, but carried the impact shield behind them. This made them look like a tower. Any attack from behind is obviously impossible to cause any harm to them. And when feeling the rumbling charges of these bear people comparable to heavy cavalry, many people in this unit under the wolf's army became pale and paler instantly, looking like they were being brought by those underground demons who claimed to be blood clan. It's like a big sucker.

However, the attack that is faster than the bear is still a wave of arrows from the night sky.

There are hundreds of arrows, and at the same time they don't cover a large area like ordinary shooting, but fall towards the densest place of the enemy camp.

Looking at hundreds of arrows falling from the air, many soldiers used their weapons to resist. But it's a pity that the soldiers brought by the wolf this time have no units responsible for defense at all, and for the possible pursuit-although in fact it did happen-so this group of people are all dedicated. For the pursuit and offensive arms, most of the weapons in the hands of the soldiers are mainly long swords and short combat weapons, and the armor is all leather armor.

This kind of equipment has great advantages in pursuit war because of its light weight. But the disadvantages are also extremely obvious, just like now, in the face of this wave of arrows falling, many soldiers simply can't resist it.

A soldier waved a long sword in his hand, pulled out an arrow that was shot in his eyes, and then looked at the other two arrows that were shot at him at the same time, but soon he focused on the one in the middle. One, because he could already see that the arrow that was slightly to the left dropped should be at his shoulder blade, and this position happened to be protected by the leather armor.

But unfortunately, the soldier miscalculated the defense power of the leather armor and the armor-breaking ability of the arrow that fell from mid-air. So in the next moment, the arrow pierced into his left shoulder blade effortlessly. The intense pain made him snorted, and the sword-swinging hand naturally slowed down by half a beat accordingly, not completely. Blocked the arrow in the center, just knocked it on the shaft and missed it, but the sharp arrow still tore a scar on his face.

Almost at the same time, another arrow has also fallen in, and the position is exactly at the center of his brow!

The soldier's face was still a bit unwilling and unbelievable, but his consciousness was quickly swallowed by darkness after this arrow, even the sound of the long sword in his hand when it fell to the ground. Can't hear it anymore. And before he completely fell to the ground, he heard the muffled sounds of "puff" and "puff", and the arrows that fell one after another were nailed into his throat as if they were shot on a wooden stake. ,body.

Then the soldier finally fell down, causing a burst of dust to fly.

Blood began to flow from under the soldier's body, and began to spread out like a stream. But soon, one of the bloodstains that spread out merged with a bloodstain that flowed down from the upper left, perhaps because the topography of the converging point was slightly lower, so the merging of the two bloodstains did not spread to one. Instead, new blood stains began to gather in this place, and then swirled to form a small pool of blood.

However, not long after the formation of the pool of blood, almost just one or two seconds, there was a hand slapped on the pool of blood, making a soft "pop", and at the same time splashing a **** scene similar to water splashes.

The ring finger and tail finger of this hand twitched slightly, and the owner seemed to be struggling, and he seemed to be trying to get up. But after another muffled sound of "puff", this hand completely stopped all movements, and then new bloodstains flowed out soon, but this time the carrying capacity of this pool of blood seemed to have reached its limit, so the blood was very heavy. Quickly split into several streams, meandering to open up new roads.

A wave of arrows rained down densely, and forty to fifty soldiers fell.

Long sword and short Ge, scattered all over the place.

At this time, the bears charging at the forefront finally collided with the soldiers who had just had time to react, but had no time to deploy the defensive line.

The number of bearman is not much, only more than twenty, but the front they opened is nearly forty meters wide, and the distance between each bearman is almost more than one meter. But thinking about the weapons of these bear people, it is not difficult to understand this distance and width.

In the sight that Clover happened to take back from Sean, a bearman barely used the heavy hammer in his hand. He just made a brutal collision and slammed into a soldier who stood in front

of him. Perhaps because the strength of his control was very appropriate, the soldier was not hit and flew out after being hit by this collision. Instead, he fell to a position less than half a meter in front of the bear, and saw this in the next moment. The bear man raised the heavy hammer in his hand, showing a grin, and then smashed the heavy hammer in his hand severely.

The ground seemed to shake.

When the bearman raised the heavy hammer in his hand, the entire upper body of the soldier had become a red paste, and even the bottom of the hammer was stained with these disgusting pastes. Stop dripping blood.

A soldier next to seemed unable to bear this kind of stimulation. He let out a crazy cry, as if he had a nervous breakdown, and waved Dan Ge and slashed at the bear man. These bears don't have much defensive equipment. After all, they are heavy hammers and impact shields. Even if the bears have good endurance and strength, they can't carry so many things on their backs. Down, the bearman's chest was quickly cut by the sharpness of the weapon, and blood began to flow from it, dyeing the fur red.

The bearman let out a painful howl, and then before the soldier swung a second time, he was already holding a heavy hammer in one hand, and his right hand grabbed the head of the soldier.

Facing the bear man's huge palm, the soldier's head quickly made a crackling sound. He howled in pain, even the short Ge in his hand was abandoned, and his hands kept breaking the bear man. Fingers, trying to escape this terrible place. But no matter how hard he tried, he couldn't escape, so his feet quickly kicked and kicked, and the bear man seemed to be a little impatient with the hardness of the human skull, so the bear man slammed his hand. A soldier hit the ground, and then lifted the heavy hammer once more.

Under the bombardment of the heavy hammer, the blood water exploded quickly, and there was another paste on the ground.

The bearman roared in excitement, seeming to be venting something, and then when he turned his head and looked left and right, he found that there were no human soldiers by his side, and even his companions were already deep in the enemy's camp. Rushed in. It seemed that he could not kill anyone if he was afraid of falling behind. The bear man immediately stepped toward the depths and rushed in. At this time, the second wave of arrows had already fallen, and he shot another twenty or thirty. Enemy soldiers in the camp.

Behind the bear were nearly fifty soldiers of the Cecilia Guards. Their all-colored light armor and long swords seemed to have a terrifying sense of killing.

These black armored soldiers, like a black whirlwind, easily rushed into the enemy camp.

Klov slowly retracted his gaze, and the enemy's resistance was weaker than he expected, because it only took less than half a minute before and after, the attack from three directions easily broke through the enemy's battle formation. On the front line, the number of kills reached one hundred!

Without the slightest hesitation, Clover immediately waved his right hand. The wounded soldiers of the Cecilia Guards and more than twenty northern barbarians who were still in charge of archery immediately put down their bows and arrows and began to pick up long swords and spears. The deafening cry of killing rushed towards the enemy camp.

Chapter 173: . Cold-blooded Clover

Looking down from the air, the Cecilia's Guards are like a black wave.

turbulent, silent, but full of merciless killing intent.

The soldiers blocking in front of them soon died one after another.

Especially when the initial line of defense was breached, none of these soldiers could stop the force's charge.

On the front line of the battlefield, after hurriedly dropping hundreds of corpses, all the soldiers retreated to the second line of defense. However, because of the lack of shields, bows and arrows, etc., which can be used to resist offensive equipment, the second line of defense soon appeared precarious. At this time, Klov finally understood why this army looks obviously regular, but its combat effectiveness is. The reason for being so weak.

Because this unit not only has no morale, but even its physical strength has been obviously overdrawn, because it is naturally impossible to be an opponent of this unit under his command.

Even if his army has dozens of wounded, but in the face of such an army that has no confidence and courage to fight, Clover still feels that he has a chance to win.

It's just that he also knows that this situation will obviously not last long, because once the opposing golden powerhouse recovers and cooperates with this troop to counterattack, it will still bring them a lot of trouble. So Croft took a look at Sean and made sure that he was still holding the opposing two golden powerhouses securely, and even when they started to launch a fierce counterattack, Croff ordered a strong offensive.

The cat's mentality of playing with mice is not a game he is thinking about playing right now.

It's just that when the black wave surged from all directions again, it was unexpected that it didn't break through the enemy's defenses!

The Cecilia Guards continued to attack like the previous charge. They used the long sword as a spear, and stab at the enemy who was blocking them in front of them, instead of doing it like a normal army using a long sword. Open and close movements such as slashing and slashing. In this way, the charge initiated by the soldiers of the Cecilia Guards regiment is relatively concentrated, and the charge and lethality will undoubtedly increase a lot, unlike the bears who wield heavy hammers like crazy, they need to maintain each other. A distance of more than one meter can ensure that you will not accidentally injure your own people.

In the face of the Cecilia Guards, which uses infantry as a cavalry combat method, this unit that also uses long swords and daggers also shows a kind of fierceness that regards death as home. They also erected the long swords in their hands and raised them flatly, facing the impact of the Cecilia Guards, without the slightest fear of going head-to-head with the Cecilia's guards.

But they ignored the equipment gap between each other!

Cecilia's guards all wear uniform black light armor. Although this type of armor uses a relatively high density of materials and its defensive performance has declined, it has also gained lightness. This allows the Cecilia Guards to have the same speed advantage when facing ordinary light infantry, and light armor is obviously more defensive than leather armor no matter how you look at it.

Moreover, the long swords used by the Cecilia Guards are also high-quality long swords. Although these long swords are all assembly line equipment in the workshop, they also have a very big advantage: ensuring sharpness. At the same time, it also has the characteristics of easy maintenance and easy replacement. In terms of combat effectiveness, the equipment of the Cecilia Guards is not inferior to the elite troops of other countries, and even more advantageous than those of the poorer and backward countries.

In this situation, the two sides used the same attack method to fight each other, and the result can be imagined.

The long swords of the enemy soldiers can't pierce the Cecilia Guards' armor at all. Most of the long swords are even broken after being pierced with too much force. The appearance of this scene made many soldiers a little sluggish, and it was only when the violent tingling sensation came from their bodies that they realized that their leather armor could not resist the same direct stabbing of the other party.

When the black wave once again hit the enemy's defense line violently, it killed another 20 or 30 soldiers in an instant.

But this time, this highly targeted and charged impact did not break the enemy's defense line. Because Clover also ignored the fact that there is a difference in height between a manpower charge and a horsepower charge and a difference in the follow-up force—the cavalry charge does not rely on their own net weight and power to charge, but by As horses travel, they can concentrate on their attack methods.

But manpower is not enough. Once this kind of charge collides, the party that initiates the charge will lose the advantage of the height difference and the net weight difference. Moreover, although the long sword is used as a spear-like sprint here is indeed Klov's unintentional genius performance, but the sword cannot replace the gun after all, and because the charge is too dense, the soldiers in the rear are afraid of hurting the soldiers in front. , So naturally there is no way to attack, only people pushing people up.

But in this way, the Cecilia Guards soldiers who rushed to the forefront and have penetrated their long swords through the enemy's body were unable to withdraw their swords. As a result, they were completely like sandwich biscuits at the forefront. Same, nothing.

Once the line of defense was not broken, the morale of the enemy army, which was already shaky, suddenly stabilized.

In the next second, the enemy's weapons emerged from the dead body, and then stab at the soldiers of the Cecilia Guards. But this time, the enemy is obviously smarter. Their attack target is no longer on the armor of the Cecilia Guards, but starts from the connection of its light armor. In this way, the Cecilia Guards There were casualties immediately. Looking at the soldiers who were originally aggressive and killed so many of them in the face of their faces was not a panacea, because the courage generated in the desperate situation immediately exchanged for an increase in morale, and the battle of the entire enemy army immediately became active.

Longsword and Short Ge are offensive weapons in the first place, so playing defensive warfare is naturally not their good.

As a result, the enemy immediately launched a fierce counterattack.

The Cecilia Guards who were regarded as sandwich biscuits suddenly suffered great casualties, and the situation was even completely opened by the enemy.

But looking at such a scene, there was a sneer at the corner of Crof's mouth.

If the enemy force insists on holding group defense, he really has no good solution for a while. But since the enemy wants to open up the battle situation, so even though his subordinates have casualties, and the number of dead in the war is as many as a dozen at a time, it is actually more beneficial to the Cecilia Guards.

In a sense, Clover is a very cold-blooded general.

He is not like Alfred, Rena, or even Stalin, Aldolf, and Knok in command. There will be no casualties if there are no casualties, and the number of troops will be retained as much as possible. In Klov's eyes, war has never been a game. It is a naked and **** fight. Therefore, there is never a scene where people will not die. When the situation allows, Klov will even deliberately sacrifice his subordinates. Of the soldiers in order to open the original deadlock in the fighting situation.

Just like the current war.

Originally, as long as he ordered the troops to retreat and slow down the attack rhythm and frequency, then there would be no casualties. It may take a little more time. There is no way to defeat the enemy in three minutes, but he can definitely ensure the entire enemy. Annihilation of the army. Even if he continues to maintain this encirclement method of blunt knife and meat, he can cause the enemy to have a direct mental breakdown. As long as Cecilia takes a shot, it is also a victory with a hand, and even time can be guaranteed to end within three minutes. .

But Klov didn't do this, and he didn't even think about letting Cecilia take the shot. His immediate choice was to sacrifice the lives of a dozen soldiers under his command, to give the enemy hope and let them turn the defense into an offensive. A recoil.

In this way, the original deadlock was naturally broken.

At the same time, Clover finally stopped being silent. He raised the chopper in his hand, rushed forward as quickly as a cheetah, and then swept in toward the enemy's open line. The Cecilia Guards soldiers who followed him let out a burst of excitement after a delay of one second, and then rushed up with Clover, breaking through the enemy's defensive line in an instant. , Directly cut the enemy army into two parts, and at the same time the battle situation changed, it changed from assault cutting to strangulation, completely fighting with the two divided troops.

One has the commander personally led the attack, the other one is under the command of no commander. The situation of the battle is completely predictable.

And after this situation only lasted for a minute, a breath of horror erupted on the battlefield. It seemed that at this moment, everyone's heart stopped beating, and it was as if the entire world's time had been stopped. generally. In the next second, the blood began to flow again, and the heart slowly rang with a beating sound of "dongdong", but everyone felt cold hands and feet, and the hairs all over his body stood upright. That was a manifestation of extreme fear!

On the battlefield, a scream suddenly sounded!

Clover keenly captured that the enemy had a short pause at this moment, but Clover did not hesitate at all, and the intensity of the battle suddenly increased by a few points. It was just a shock in his heart, but he still let him quickly glance at the situation on Xiao En's side from the corner of his eye.

I don't know. At a glance, Klov felt his heart stopped beating again.

Two golden powerhouses, one of them was cut by a sword by Sean!

The other, the golden strong man who screamed, obviously saw a picture of extreme fear, otherwise it would be impossible for the golden strong mind to make such a scream.

Then in the next second, Clover saw this female golden powerhouse distanced from Sean at an extremely fast speed, and quickly swept towards him.

Klov was shocked and immediately ordered the whole army to disperse.

But this order was still a step slower, because after the golden strong landed, he attacked and killed more than a dozen soldiers of the Cecilia Guards without stopping, and then returned to the army's battlefield. Immediately afterwards, when Clover was still a little surprised and wondered whether he should continue to order the assault, the golden powerhouse directly ordered the entire army to retreat. At this moment, he even ignored the wounded soldiers. , And left quickly with only hundreds of soldiers who were still able to fight.

The moment Clover came back to his senses, the golden powerhouse had already taken a man several tens of meters away. He wanted to order a follow-up, but he realized that the commander on the battlefield was not himself, so he forbore it abruptly. Zhuan didn't shout these words out, but turned his head and looked at Sean.

"Chasing!" What Croff didn't expect, but Sean gave the order to chase with a gloomy face, "That woman is called a wolf, and she is the supreme commander of this enemy army! We must rush to the enemy's reinforcements. Before you join her, leave her behind!"

Chapter 174: .Reinforcement

When Sean fought against the wolf and another golden powerhouse, he soon realized that it was very difficult to kill the wolf, because it was actually an assassin class!

A raider who is proficient in daggers, short swords, long swords, and can even use dual weapons.

is also commonly known as the lurking warrior in the game. The main attribute is agility and the secondary attribute is power. Compared with ordinary assassins and assassins, this kind of profession has stronger lethality, defensive power, and protracted combat capabilities, but at the same time, they are proficient in assassination and surprise attacks. The only weakness is that they are not as good as assassins and assassins. Assassins are so varied and possess endless means.

So in this situation, Sean completely focused his attention on another golden powerhouse.

This is a golden powerhouse with similar occupations as Billy. The only difference is that this golden powerhouse is not a pure boxing fighter, but a part-time job as a magician. He is a magic fighter. While possessing excellent physical offensive methods and physical strength, they can also use some magic methods to disturb the enemy and provide them with certain advantages, so as to use these advantages to accumulate victory.

Faced with the siege of these two special professions, it is naturally extremely difficult for Sean to cope.

Fortunately, it is also impossible for the opponent to sack him within the three-minute time limit. And Sean also used this time to entangle with the opponent, try to get close to the opponent, and at the same time inquire about some information he wants.

The strong usually do not reject the answer that the weak must die, because telling the opponent why he died and why he wanted to kill him is indeed easy to give people a sense of superiority in strength. Therefore, Sean quickly figured out that Raider Wolf was the commander-in-chief who came against him this time. She and Yin served the same master, and Yin seemed to be the master's forbidden, and of course the wolf was also for revenge. , The wolf and another person named eagle attacked themselves.

As for the others, they are people who seem to have some interest in this nobleman.

However, these interest relationships are all related to the Great Rift Valley. If Sean hadn't caused so much trouble in the Great Rift Valley, and even destroyed several trading points, of course these people would not come to Sean's trouble.

Two minutes have passed by the time these problems are clarified, so when Sean deliberately missed and exposed the flaw to reduce the distance between the magic fighter and himself to within one meter, Sean did not hesitate to use Requiem. .

With only one blow, the world changed its color, and the powerful magic fighter was divided on the spot.

As for the wolf, when she saw the unexpectedly powerful strength of Sean, she quickly realized the information about the cursed swordsman she had obtained from the wolf, because in this battle, she did feel the cursed seal. Silver The terrible scales, as well as the endless small means. Therefore, at this moment, the wolf did not hesitate at all, and immediately chose to retreat strategically. She must immediately merge with the large forces before it is possible to deal with Sean.

And in such a counterattack, it will also consume Sean's ability.

Although the wolf does not know that Sean's other ability is adrenal stimulation, the wolf does know that as the most standard light body technique for a curse-marked swordsman.

This is what it is now.

Under the dimly beautiful night, two troops ran one after the other.

But this time, it was the wolf who had been chasing after Sean, and it was Sean who had planned to leave the Wildlands quickly.

Both sides are very clear that this is already a life-and-death battle.

If Sean is dead, then the task of the eagle and the wolf will be completed; and if the wolf is dead, then the action against Sean will stop immediately because of the loss of the top commander and the other people's disagreement. It is definitely not a matter of a day or two to elect a supreme commander, and in the process, Sean has already left the wilderness and returned to his territory.

So the real key to this battle lies in whether Sean and others can catch up with the wolf in time and kill her!

The earth roared.

The two sides who were constantly running, the distance soon began to shorten.

The wolf unit itself is already very weak, and most people have even exhausted their energy. Coupled with the previous battle with the Cecilia Guards, they can insist on running again. Hours are already a very difficult task. But after all, physical fitness is still limited, no matter how much potential is squeezed, these people can't all escape.

If they had fled in all directions due to a rout in the first place, they might still be alive. However, although this can be regarded as a rout, everyone flees in a concentrated direction, so once they are caught up, it is definitely not small to survive.

Of course, it is difficult to maintain the formation of the chasing Sean and others.

The ones who chased the most closely were naturally the Cecilia Guards and others in lightweight and light armor; the troops of the Northern Barbarians were about 20 to 30 meters behind, and the

distance of this disconnection is obviously still increasing. Even the northern barbarians of barbaric origin, with square shields, javelins, spears, long swords and other weapons on their backs, their endurance will naturally not be much better. They are even being caught up by the last bears. .

The distance to the front of gradually shortened from two digits to single digits.

At this distance, it is already the distance that vindictiveness can be used.

However, Clover did not show off his anger, but still charged at the forefront. Because of his requiem relationship, Sean is behind Cecilia and Dini at the back of the team at the moment, and is walking with the bears. The two brothers Krumah and Cruz also follow, but Andre and The members of his slave hunting team are all charging at Clover's side.

When Clover gradually came into contact with the last of the enemy troops, Clover finally slashed without hesitation.

In the air, there was a faint air blade faintly emitting, but this only extended Clover's attack range, and did not send out a scene similar to a grudge bombardment. However, the soldier could not help but let out a scream due to this attack, and then fell down, but he was wounded but not dead, but he never had a chance to get up again, because Cecilia from behind him was close. All the guards stepped on him, and several of them even made up a sword when they passed by, completely killing him.

When there is the first person, there will naturally be a second person and a third person.

Soon, the successive screams finally caused the collapse of this defeated army. Many people stopped running with the wolf, but began to disperse in all directions. As for the escape of these people, Sean and others did not pay any attention to it. As a result, the collapsed unit seemed to have seen some hope, and began to flee towards both sides, no longer blocking the Cecilia guards. In front of the regiment.

Looking down from a high altitude, you will see a black line that is constantly advancing, but when the black line is approaching, the team that is blocking the black line automatically disperses to the two sides and flees towards the two sides, just like that The shark's dorsal fin broke through like waves.

Seeing that his unit seemed hopeless, the wolf frowned slightly, and finally gritted his teeth and chose to abandon it cruelly.

In an instant, I saw the wolf's speed suddenly mentioned, and once again quickly moved away from Clover's troops. At this time, the wolf already knew very well that an army could still bite so tightly under such circumstances. It was definitely an elite unit, but she did not expect that there would be an elite unit in Sean's territory. But it was extremely bad news, because of the murderous aura from this troop, even she felt a palpitating heart.

Wolf is very clear, this means that this unit has the ability to kill itself.

Under this kind of threat, how can the wolf dare to fall into the encirclement of this force?

In the process of chasing and fleeing like this, another twenty minutes passed in a blink of an eye.

Except for Clover and others, the physical strength of all the soldiers has obviously reached the limit, because the distance between them and the wolf is rapidly increasing. This made Klov and the others a bit annoyed, because it was only a short time before the enemy's highest commander could be killed, but because of the difference in individual strength, the pursuit of nearly an hour was completely useless. It even exhausted the physical stamina of everyone in the entire army.

Seeing things cannot be violated, Xiao En finally ordered to stop the pursuit, and immediately turned from the bright side to the dark side, they must find a place to hide in the fastest time. Because everyone knows very well that even if the wolf loses these five hundred people, she still has more than two thousand troops under her command. If there is an encounter with the opponent at this time, the own troops that have completely exhausted their physical strength, I am afraid Will be completely buried here.

But before Xiao En and the others left quickly, they saw that the wolf had turned around and rushed towards him and the others.

What does she want to do?

All the doubts flashed in everyone's mind, and the face of everyone changed in the next moment!

Because a wave of arrows fell from the air to the entire Cecilia Guards regiment of Clover, and the problems caused by fatigue caused the entire army to hesitate for a moment at this moment, so Sisi The Leah Guards did not raise a shield in time to resist.

Even though it has light armor defense, Clover also roared to help out again and again, and even had the support of Andre and others.

But the number of this wave of arrow rain is really too big, it is several times more than the previous arrow rain of Clover and others!

The Cecilia Guards with only more than two hundred people, faced with more than three hundred arrows, there is no need to consider the issue of density at all, only the coverage is wide enough, then the entire Cecilia It is impossible for the Asian Guards to escape the covering blow of this round of arrow rain.

In just one round of arrow rain, more than 50 Cecilia Guards fell straight down!

What's even more frightening is that as soon as the first wave of arrow rain fell, the second wave of arrow rain fell again with a whistling sound, and the third wave of arrow rain was even seen in the eyes of Clover and others!

If it is not for the opponent's archers with more than 500 people, then it means that the opponent is using forcibly continuous shooting that does not hesitate to lose the durability of the bow and arrow and the physical strength of the archer! And this shooting technique doesn't pay attention to accuracy and density at all, the only pursuit is the high frequency of shooting speed and the wide coverage area!

When the second round of arrow rain fell, the Cecilia Guards finally had time to defend with a shield, and even teamed up to defend, and at the same time dragged those injured but surviving companions into the protection circle. But all this did not make people feel happy, because there were more than hundreds of soldiers who rushed out behind the wolf!

With Clover's sophistication, he immediately found that the number of soldiers on the other side exceeded 300!

This time, even Sean's face changed.

Chapter 175: .bloody battle

One is exhausted troops, but the other is well-equipped.

As a result of this kind of confrontation, there is no need to think about it at all.

Shaun glanced at Cecilia, then finally said in a deep voice, "End!"

Soon, all the bears dispersed immediately. This time they did not use a heavy hammer, but took down the impact shield behind them, and quickly deployed a defensive circle with the iron wings of the northern barbarians.

Dini also knew that when the situation was extremely critical, she would begin to use the ice armor at the expense of her divine power.

But when the first ice armor was just put on a bearman, Sean immediately stopped her from doing it.

"Give everyone snow and ice activity!" Sean said.

This is a low-level divine art. Any second-tier professional missionary who believes in the goddess of ice and winter can learn it. This magical technique can quickly restore the physical strength and energy of the subject, but it is also an overdraft method of squeezing the body's potential. The famous high-level magical technique "Eswinter's Vitality" is the high of this magical technique. Tier version.

As a low-level divine spell, the divine power that an ice armor needs to consume can even maintain four or five snow actives.

Tini was taken aback for a moment, and immediately understood the meaning of Sean's doing this.

Now the entire army has completely exhausted its physical strength due to long-term pursuits, and without physical strength, the troops will naturally be unable to fight. Even if the defensive formation is laid down, they will soon be breached. But if you restore physical strength for everyone at this moment, even if the potential in your body is overdrawn, you will be in a weak state for the next few days, but it is definitely worth it at this moment.

So Dini did not hesitate at all, and immediately began to switch to casting snow and ice activity.

For a time, the light blue brilliance of the light blue gleamed continuously.

In this dark night, the light blue gleaming like stars is as bright as a lighthouse in the dark night.

Wolf's face instantly became very ugly.

She had known for a long time that there was a priest in Sean's army, but she hadn't seen any movements of this priest before. She thought that her divine power had been exhausted, and she did not expect that the previous battles actually disdain to use divine magic. This made the wolf feel a kind of humiliated anger, and was forced to flee for such a long way. With the new hatred and the old hatred, the wolf could almost completely control its own reason, and immediately ordered the whole army to speed up the charge.

No matter what the function of this magical technique is, it will definitely cause her trouble if it is used here at this moment.

Just, can the opponent with a force like this still block their attack?

A cruel look flashed in the eyes of Wolf, she had already decided that Sean must be dismembered anyway!

At this time, Andre and Klov, who are also at the forefront, have also led everyone to gradually retreat.

With Clover's rich experience, he had already seen that no matter how fast the enemy troops rushed, it would take at least twenty seconds to start a confrontation with them. If you use this time to start retreating, When the confrontation is fully launched, they can smoothly retreat into the defensive formation that Sean has begun to deploy at this time.

So without any hesitation, Clover immediately began to retreat.

The Cecilia Guards, which had already raised their shields, immediately began to slowly retreat. But obviously, even if the enemy's assault troops were unable to engage the Cecilia Guards in a short period of time, the archer troops at the rear did not have this distress. Waves of arrow rain continued. Absolutely, I'm afraid these archers will not stop shooting before all the arrows are shot.

At this moment, Cecilia's Guards, like a black cloud blown by the wind, began to slowly recede.

Even with shields and light armor for defense, each wave of arrow rain will at least leave Cecilia's guards with more than a dozen corpses. The distance of less than 50 meters turned into a cruel road completely reddened by blood at this moment. After the first wave of arrows, the Cecilia Guards had two hundred people left. By the time he retreated into the defensive circle composed of the northern barbarians and bears, there were only less than one hundred and fifty people left.

In a blink of an eye, there were already more than 300 troops, but fewer than two hundred people remained.

This loss is extremely heavy.

And when the entire Cecilia guards retreated into the defensive circle constructed by the northern barbarians and bears, Sean did not hesitate to order the entire force to start moving. And Dini has also applied the magical technique of ice and snow activation to all the northern barbarians and bears at this moment. For a time, the state of all the bears and the northern barbarians immediately restored to the peak. In the face of the upcoming confrontation, at least by The line of defense they built will not be broken in an instant.

A few seconds later, the three hundred soldiers behind the wolf slammed into the defensive circle like a wave of a shore.

This time, the tactics used by the wolf are exactly the same as those used by Clover to deal with the soldier under the wolf!

also concentrates forces and launches a fierce attack on a point, which is undoubtedly the best choice when dealing with a circular defensive array. Especially in the wolf's cognition, with the defensive ability of this exhausted army, I am afraid that it only takes a wave of charges to easily break through this line of defense.

But the result of the facts surprised the wolf and everyone.

Because of the seemingly ferocious impact, the line of defense was not completely broken. Instead, Klov took advantage of this momentary delay to shrink the defense line of the entire army. In a blink of an eye, the number of this line of defense was less than two hundred people. The defensive capabilities of the troops suddenly reached a new level. But what is really surprising is more than that. After the charge and the defeat, the wolf and the others ushered in a round of javelin throws by the opponent!

This time, the wolf finally knew what magical magic the other priest was performing!

is actually a magical technique that can restore the vitality of troops!

The next second, the wolf immediately ordered a siege without hesitation.

Looking down from a high altitude, I saw that the wolf unit suddenly turned into a torrent of water and quickly surrounded Xiao En's unit. At this moment, Xiao En's entire army felt like a lone boat on the torrent, as if it would capsize at any time. But if you look closely, you will find that Sean's unit is a bit like gears, and the unit surrounding them is like a small gear. With the rotation of these countless gears, it can't stop at all. Sean's army was fighting and retreating, but the movement speed was a little slower, and it was possible to move one meter almost every few minutes.

But does this approach make sense?

Soon, the wolf knew the significance of this approach.

A strong wave of magic suddenly broke out from the middle of Sean's army in a blink of an eye.

Magic!

The wolf's eyes were a bit shocked, and he did not expect that there would be a magician behind the priest!

I saw the night sky that had only gradually become a little bleak, but suddenly it was completely dark. A dark cloud quickly condensed and formed in the sky, and there was a vague red streamer shining in the dark cloud, instantly turning this dark cloud into A crimson fire cloud appeared. As

soon as this fire cloud was formed, Cecilia hadn't even had time to continue to infuse the magic power into the fire cloud to expand the area of the fire cloud, she had already activated the magic without hesitation, and then she saw countless fist-sized figures. Fireball is pouring down from this cloud of fire!

Fire rain technique!

It turned out that as early as the moment the two forces joined, Cecilia had already started to cast the fire rain technique. The singing time of this magic was relatively long. If it had not been prepared, it would have been impossible to perform this magic successfully, especially in the face of a gold-level powerhouse, once the magic fluctuations are leaked, the opponent will not give Cecilia time to cast magic at all.

So before that, Cecilia started to chant the spell very vaguely, and then gradually formed this fire cloud in place at a very slow speed. And Sean ordered the entire army to start and fight back to prevent his army from being included in the coverage area of the fire cloud, and Cecilia waited until the magic was almost over before suddenly exploding all the magic power. After coming out, this magic was formed in an instant, and then without waiting to continue to infuse magic power, it launched a magic attack.

For Cecilia, the mana needed to be consumed is undoubtedly more than three times more than the usual fire rain technique, and this sudden explosion of magic power has a great impact on her. To explain with the terms in the game, that is the drop in the upper limit of the mp, and even in the serious point, it will even drop. The average magician will not do this at all if it is not the moment of life and death.

I saw the fire and rain falling all over the sky, and this wolf's unit would suddenly begin to have a large number of attritions.

At this moment!

A figure suddenly jumped out of the wolf's side at an extremely fast speed, and then when a shot was pierced out, a white light burst out suddenly, and it directly killed several bear-men and northern barbarians, completely. A gap was torn from the defensive line.

Under such a fierce attack from this figure, the enemy quickly let out a cheer.

Immediately after this figure, he rushed towards Cecilia without hesitation.

The spear was dragged upside down, it really has an amazing aura of bravery.

But the opposite of this momentum, it was the wolf's almost terrified roar: "Don't go in!"

It's just this roar, it's still too late.

The aura that made the wolf unforgettable in this life suddenly exploded. It was a peaceful and peaceful, desperate to almost numb, tranquil feeling, and there was a momentary pause in the entire battlefield. In the next second, a piece of blood erupted from in front of Sean, drenched everywhere, the golden powerhouse who rushed into the defensive circle with an astonishing vigor, was killed by Sean on the spot!

For an instant, there was a moment of silence on the entire battlefield.

Then the next second was the cheers from the Cecilia Guards and the Northern Barbarians and Barmen.

The momentum and morale of both sides unexpectedly reversed at this moment!

However, for Xiao En and others, it is only a temporary respite. Because both Sean and the people around Sean know very well that in the next battle, I am afraid that Sean will no longer be able to exert any combat power. And Dini, after continuously applying snow and ice activity to nearly a hundred people, she also completely lost her fighting ability.

The only one with combat capability is Cecilia.

But in large-scale wars, everyone knows that the role and value that a magician can play is extremely limited. And Cecilia is not like Elizabeth. Many of her magics are not learned for war, and even because the contact time is not long enough, Cecilia currently has no magic power and realm, but has not learned too much magic. Unlike Elizabeth, who even developed a thunder magic specifically for war.

The defeat did not seem to have been reversed.

"You are going to break through!" Sean said in a deep voice, "Take Cecilia away!"

"No!" Cecilia turned her head and looked at Sean, her expression a little pale.

Clover just glanced at Sean, his eyes were still cold, but after a second he nodded: "Even if you don't say that, I will do it."

"Very good." Sean smiled and nodded, "Then Cecilia, it's up to you."

At the same time, Sean also opened his skill panel.

Chapter 176: .For honor

On Sean's skill panel, the skills that originally appeared black occupies almost the entire panel.

But now, less than one-third of the skills that still appear black, and more than two-thirds of the skills are gray. As long as Sean is willing to consume proficiency points, these skills can be activated immediately. Because the game "Miracle" is improved from the template of "Sheng Shi", many systems are actually only slightly changed, such as the skill system-this system has been greatly improved on the original template, unless it is compared Special skills, otherwise the game itself does not restrict professional learning, but is purely required by personal attribute standards.

In other words, warriors can also use bows and arrows, and even use abilities such as strong strike arrow and double shooting. It is just that some archers' exclusive skills cannot be learned, and of course they will not receive the passive bonus of archers. Of course, the proficiency of players is extremely limited, so it is actually impossible to learn too many skills, especially after the seventh level, the development of the career path has a clear direction, the emergence of a large number of unique skills and high learning requirements, Let the player stop this behavior.

And Sean, in order to give himself more flexibility and changeable fighting style, the skills he learned are actually quite mixed. What's more, he also worked part-time as a scholar and priest at the beginning like all rookie players, so the skills he can learn naturally become more. It's just that most of them are only low-level, and there are almost no other types of skills above the fifth or sixth level.

In addition, Sean now knows that this world is not like a game. Many skills do not mean strong combat effectiveness. Therefore, he has always invested his proficiency in the most important places. This is also the current list of Sean's skills. Two out of them can be activated, but Sean has no reason to activate.

Because most of the skills in it, there is no need to activate them anymore.

Even this skill at the moment, Sean thought that there was no need to activate it.

anger broke out.

[Fighting Qi burst: Instantly restore 50% of the fighting energy by squeezing the potential, and within the next 1 hour, the recovery speed of the fighting energy surges to 5 times the usual, and after 1 hour, it enters the "fighting exhausted" state: the recovery of fighting energy is temporarily stopped and continues 24 hours. Auxiliary sixth-order special, level 13, proficiency 15.]

The activation of a common Tier 6 skill requires six proficiency points, but the label of this skill is a special skill, so activation requires seven proficiency points.

When Xiao En was promoted to Tier 5 and Tier 6, he left a total of 40 proficiency points, 30 of which were used to activate Requiem, so there were still ten proficiency points left at this time. And at this moment, he didn't hesitate at all, putting all seven of his proficiency points into the outbreak of fighting energy, successfully activating this skill.

Requiem casts a layer of debuff every time, because it has been cast twice in a row, so Sean's weak state at the moment is superimposed on two layers, and the attribute value temporarily deducted is already scarily high. But in this situation, Sean doesn't care at all. Because the Requiem comes with an absolute hit within one meter, Sean doesn't need to rely on attributes to fight anymore. He just needs to be close to the opponent. At the time, there is enough vindictiveness to use this skill.

The recovery of fighting energy is 10% per hour. Previously, after Shaun played a requiem, his vigor remained at 55%. During the hour of the chase, he recovered to 65%, and then used a requiem to reduce it to 2%. Ten, and at this moment, besides the wolf, the opponent has another golden powerhouse. As long as the two are not attacking at the same time, then Sean needs to give him another half an hour to solve an enemy instantly after activating the grievance burst. There is enough vindictiveness to perform the fourth requiem.

As long as the two golden powerhouses die, it will naturally be very difficult for the remaining troops to keep Sean and others.

But even if Sean and others can break through afterwards, I am afraid they will suffer heavy casualties.

But if this result can be exchanged for the death of the wolf, then everything is worth it.

So the real key is whether these people can delay half an hour for Sean!

Shaun stood with a pale face, leaning his sword, and his attributes were greatly weakened, which made him unable to exert his true fighting power. Even if he activates adrenal stimulation and light body skills, his strength may be stronger than when he had just entered the wild. When the earth is weaker. But this is no way, because the intensity of the war at the moment has reached a shocking situation, and Xiao En even wondered if he and others were ambushing because of the previous rash advances.

But Shaun didn't know that this was not a rash move, it could only be said that he had bad luck.

The large forces under the wolves did come to support early, but because the wolf slaughtered a group of monsters to solve the food problem at noon, the result was that the aftermath was not done well, so a large number of monsters were attracted. There was an encounter with the troops that came to support. After paying a certain price, they finally killed all these monsters, but the place was obviously not suitable for staying, so they moved to another place to camp, and after resting for a period of time to recover their strength, Only then temporarily organized a vanguard force of 500 people to come to support.

The enemy's archers are not as many as Sean and Clover imagined, only two hundred.

But these two hundred people are all veteran archers who have been trained for more than three years, so it is not a problem to pretend that there are more than hundreds of archers under the cover of darkness. If William was present, only by relying on the subtle layering of the arrow rain falling in the air, he would be able to find that these archers were not as many as he had imagined. It's just that Clover, Andre, and Sean don't have the vicious eyesight of William, so they didn't find this little trick.

Wolf's real killer moves are actually three low-level golden powerhouses including her and the other two. As for the three hundred soldiers who besieged Xiao En and the others, they were actually just for breaking through the defensive line and mixing the water to completely strangle the enemy's cannon fodder.

Compared with Clover's cold blood, wolves are also worse.

What made the wolf very depressed was that the golden gunman did not obey her command at all, and directly killed the magician next to Xiao En. If the magician was so easy to kill, the wolf would have done it a long time ago. After all, when it comes to sneak attacks and assassinations, everyone around is naturally not as professional as the wolf, but in that extremely obvious flaw, the wolf is She was not moved at all, it was obvious that she had been cautious to a certain extent.

At this moment, with the gradual retreat of the enemy, during the shaking of the figure, the wolf could see Sean's pale face that was almost bloodless. He even needs to rely on other people's support even when he walks around. All this shows a message: Sean is at the end of his life. But I don't know why, but at this time the wolf is more calm, and did not rush to make a move or order a death attack.

The battlefield situation between the two sides seemed to be stuck in a stalemate.

But both Clover and Sean know very well that if this continues, their defeat will only be a matter of time. Because the opponent still has a group of archers, the continuous rain of arrows has changed from a wide area coverage to a concentrated attack. Although each drop did not cause a large number of deaths as before, it always happened every time. The fall of several people has caused more injuries.

In this way, defeat is only a matter of time.

"They are going to break through." The wolf suddenly said in a deep voice, looking at the situation on the battlefield.

Because she has already felt that the intensity of the attack encountered in the northwest has obviously increased.

"I will stop." Another golden powerhouse said without hesitation.

Wolf did not stop this, just nodded, and said: "Go, but be careful, no matter what flaws the other party reveals, you can't penetrate into the opponent's defense circle!"

The golden powerhouse did not speak. He glanced at Sean's situation, then at the wolf, nodded slightly, and ran to the other side.

"Our intention to break through has been discovered." Klov's voice was a bit chilly, and the evil spirit on his body was obviously heavier.

"I won't go." Cecilia protested.

Her face is pale and distressing, which is obviously a sequelae of excessive consumption of magic power. In the next few minutes after the rain of fire fell, Cecilia was really like a moving turret, without casting any large-scale magic, but constantly smashing the fireball in all directions, facing this In a dense crowd, Cecilia doesn't even need spiritual guidance, it is enough to wipe out a lot of enemy troops.

"I'll be the bait!" Sean glanced at Cecilia, did not say anything, but spoke.

"No!" This time, it was not only Cecilia who opposed it, but also Dini and Andre.

But Sean ignored them at all. He just stumbled around and ran. Although all combat powers had fallen to a palpitating level, Sean did not hesitate to activate the light body technique and adrenal stimulation again. Then he rushed towards another gold powerhouse.

At this moment, Xiao En already had a sense of grief and anger in his body.

As a lord, Sean's personal battle, especially the behavior of rushing to the front line of the battlefield, is undoubtedly extremely inspiring. Therefore, the morale of the entire army has reached its peak at this moment. Even if the Cecilia Guards is not under Sean's command, but watching this nominal lord's face is so pale that he might fall down at any time, he still rushes. On the forefront of the battlefield, they seemed to have burst out of their potential and kept up madly.

For a time, the originally circular defensive formation instantly turned into an assault arrow, rushing towards the weakest gap in the northwest.

The low-ranking golden powerhouse who was responsible for resisting the breakthrough here glanced contemptuously at Sean, his expression extremely disdainful. He is also a strong swordsman, but his sword is not a long sword, but a two-handed wide-bladed sword. The wide-open and wide-open attack method allows him to have a very strong attack ability and attack range,

although he 'S strength is not as high as that of wolves, but it is also not weak among other low-level golden powerhouses.

He had seen the funeral of Thirteen Swords before, and he was holding that if Xiao En and others were strong enough, he would choose to retreat. But now, looking at Sean's apparently dead appearance, he dared to rush towards him, he immediately felt a kind of naked contempt and humiliation. Even if the wolf's warning was thrown away, he didn't think that Sean could be anymore. Performed the kind of sword skill that made one's heart palpitating just now.

Because he can clearly see that that sword skill obviously has very strong sequelae.

So at this moment, he also rushed towards Sean without hesitation.

"For honor!" Shaun raised his sword and shouted.

"For honor!" All the soldiers, whether they were the Cecilia Guards, the Bears, or the Northern Barbarians, roared in unison.

The high morale and unyielding fighting spirit made the entire army become one at this moment. The soldiers who tried to block the charging speed of Sean and others along the way were quickly followed by Clover, who was next to Sean. Andre and others beheaded one by one. In order to maintain the momentum of Sean's charge, Clover and Andre are already playing with injury-for-injury. They don't care about the weapons that are slashed at them. The only idea is to keep the momentum of the charge. Go down!

until.....

Pierce the opponent's encirclement!

Chapter 177: .Desperate (recommended ticket plus more)

The front is suddenly empty!

The people who were still charging and killing each other, the arrow at the forefront suddenly felt the pressure around them, and there were not many people next to them. Only then did they discover that they had actually penetrated each other's encirclement!

But everyone was too late to feel happy, and a strong coercion came like a tsunami.

The golden powerhouse stood in front of everyone.

He alone, it feels as terrible as an army.

Ten meters!

The straight-line distance between Sean and the opponent is only ten meters!

And the other party didn't stand there and waited at all. Instead, he rushed towards Sean at a very fast speed. The wide-bladed sword was held in one hand by him, only a small part of the sword tip was exposed and dragged on the ground. A stream of sparks splashed on the ground like a blast, and countless sands and stones splashed with the splash of sparks. Along the distance the strong man traversed, there was a long crack on the ground.

Five meters!

It was just a blink of an eye. Almost everyone hadn't reacted much before, and this strong man had already crossed a distance of five meters.

The astonishing aura exuding from him is even stronger. Obviously, this is definitely a strong man who is getting stronger and stronger in the Vietnam War. Judging from this, at the very least, Sean is sure that this person in front of him is definitely a Berserker's professional system. .

At a distance of five meters, this strong man has already taken the initiative without hesitation.

It was a tsunami-like light white sword energy rushing towards everyone with an overwhelming aura.

Under this condensed sword qi, the earth shattered one after another, and several cracks extended. Under the pressure of the qi, countless stones were continuously broken and splashed, and then they were turned into by the qi qi. 齏粉.

Under normal circumstances, in the face of such a sword-qi shock, the most correct way is to avoid it.

But in the current situation, it is impossible to avoid it. In other words, even if Sean and the others could evade, the soldiers behind them could not evade, and the other side only performed this trick at a distance of five meters, perhaps because of the strong momentum, the vindictiveness was thick. The degree is also consumed to a certain extent, but if it is just facing Xiao En and others, it is definitely more than enough.

Clover and Andre, the performances at this moment are almost inspiring.

The two of them also exploded with amazing aura, and the remaining grudge in their bodies swayed out like no money. There is a qualitative difference between silver and gold, so if these two people still want to have reservations, then what is waiting for them is to be directly crushed by this fighting energy-even if they do not die, everyone will be seriously injured. At that time, it was like a mermaid, so I didn't want to fight hard here.

However, the gap in strength is always irreparable.

The vindictiveness of the two of them almost was consumed, and it was only a third of the vindictiveness that the opponent cast. Perhaps the power has dropped again, but everyone still can't stop the damage caused by this grudge.

But at this moment, the ten bear people closest to Xiao En and others suddenly uttered a roar. Almost all of their eyes had turned blood red, they rushed out quickly, passed the crowd, and stood still in front. In the next second, the momentum of the crowd could not help but stop, because they heard a muffled sound of a heavy object landing, and the bear man in the front had actually turned on the pegs of the impact shield and directly nailed the impact shield. After hitting the ground, the whole body leaned up, firmly resisting the impact shield.

The five bear people in the back also pushed their shields against the back of the five bear people in the front. They also drove the pegs into the ground, and then leaned up with their bodies as support for gravity.

At this moment, these bear people are actually using their bodies as shields, preparing to block the impact of this grudge on behalf of Sean and the others.

Almost all the bears had just driven the pegs in, and their bodies were leaning on the shields, and that amazing anger had already struck.

"Boom!"

A weird and dull sound erupted.

Everyone on the entire battlefield seems to be able to vaguely see that when the fighting spirit and the impact shield collide, the entire space seems to have a pause for an instant. But this was just a blink of an eye. When everyone's consciousness gradually recovered, the skin of the ten bear people in two rows had been completely torn apart with countless scars, and the bright red blood was like a blowout. These scars splattered out.

That is the injury of the powerful sword energy penetrating directly on these bear people.

Although the five front impact shields were not broken on the spot, they were thinned by almost half of the thickness visible to the naked eye. There were even countless traces of cracks on them. The core steam power source was also destroyed. NS. Even the five bears standing in the second row were also hit hard by this. It is conceivable that the penetrating power of that grudge is terrible, not to mention that the steam power source of the five-sided impact shield in the second row can be retained. .

Although this vindictiveness has been completely blocked, this is the price of sacrificing the lives of ten bear people!

At this time, the distance between the two sides is less than two meters.

The corners of the golden man's mouth curled slightly. Obviously, he did not expect that these bear people were so fearless of death, and their defensive capabilities were slightly beyond his imagination, so there was no will to defeat the opponent with this vindictive spirit. And feel a little dissatisfied. It's just that this dissatisfaction quickly disappeared, because he could already see that the opposing force had no power to fight anymore.

Maybe the other party still has ten bear people, but this is no longer able to stop him from fighting.

The golden powerhouse just swept his sword and picked up the bear man who was in the way, and before the bear man landed, he had already crossed the defensive line.

one meter!

The distance between him and Sean is only one meter!

Fighting energy began to surround his broad-edged sword, and the roaring gust of wind became louder and louder. As long as two steps forward, the vindictive spirit he swayed along the way could severely inflict and destroy at least half of the opponent's number!

One step!

A trace of determination flashed in Sean's eyes.

Grass broke out!

An equally astonishing rushing force suddenly burst out from Xiao En's body, and its strength was not inferior to the grudge that the golden powerhouse just wielded.

A trace of panic flashed in the eyes of this strong golden man. He couldn't even wait to condense his vindictive energy to the maximum, and he began to wave his hand and prepare to dance the sword.

Requiem!

But his movements are still a step slower after all!

Xiao En did not hesitate at all. At this moment, his eyes became abnormally cold, and his right hand just raised the sword flatly.

But all the luster of the whole world is completely overshadowed at this moment!

A blood stain emerged from the front of the man's forehead, spreading quickly like a red light, until it reached the crotch.

Immediately afterwards, red blood splattered out. This golden strong man still had an incredible look, his whole person had been slowly divided into two, falling toward both sides.

"Cough!"

handed out a sword, but Xiao En couldn't help but let out a cough, and bright red blood instantly coughed out of his mouth, staining his entire right hand. His face was as pale as paper, and his whole person seemed to be aging several dozen years old at this moment, and he couldn't even straighten his waist!

opportunity!

Since seeing that powerful companion's shot, the wolf has already been a little expectant, and he also doesn't believe that Sean has the power to fight back. Especially when he saw a grudge and killed ten bear men, and when he himself even broke the formation and came to Sean, at that moment the wolf almost thought that the battle was about to end. But when she saw Sean perform such a terrifying sword skill once again, she felt a moment of cold hands and feet like falling into an ice cave. It was a kind of deathly silence.

I just didn't expect that after despair, there is still new hope!

At this moment when Sean coughed up blood, the wolf knew that Sean was now the end of the real battle!

So, she bullied herself immediately without hesitation!

was originally the wolf that mainly grew agile, and naturally also has a great advantage in speed, so once it broke out, her speed and lethality made her reach an amazing peak. All the people who blocked her along the way, whether it was her own or an enemy, were quickly cut in the middle under her charge. At this moment, her hands were holding two short swords!

Because of this amazing aura suddenly erupting, people on the battlefield want to not notice it.

Looking at this person swiftly killing towards Sean, Krumah was the first person to jump out and block, because he was the closest to the wolf.

"Go away!"

However, the one who greeted Krumah was extremely rough and simple with two swords. It only blocked Krumah's spear with one square, and then unloaded it to the side, and Krumah's center was deflected. In the next step, the wolf swung out the sword, and the strong eruption of anger directly knocked Krumah into the air, and even left an extremely terrible scar on his chest, which even came after Krumah and tried to stop him. Cruz, directly greeted the Krumah who was flying upside down, and the two flew out together.

At this time, Andre finally had time to react.

He just took a breath, renewed a bit of vindictive energy to condense on the sword, and rushed towards the wolf.

But the wolf's movements were equally rude, this time he didn't even parry, and Andre's whole body was already folded and flying.

The distance between Wolf and Sean is less than three meters!

But what was unexpected, it was this time that blocked it, and it was Croft, who has always been at odds with Sean!

As a Clover who has extremely rich combat experience and his own strength is also crawling out of the sea of blood in the corpse mountain, he has naturally persisted for a little longer. However, when faced with the wolf who was only one step away from the upper gold, Clover was completely unable to withstand it after all. He was quickly strangled by the wolf's two daggers, and Clover's armor was completely torn. When he and the wolf When he passed by, it was Clover who had fallen.

At this time, several soldiers from the Cecilia Guards had only had time to withdraw Sean a few steps.

Seeing that the wolf had caught up, the soldiers of the Cecilia Guards did not hesitate to turn around and rush towards the wolf, trying to stop the wolf from approaching.

At this time, the war has become completely at the expense of human lives.

It's just that if these people can assemble into a war and be moderated by Clover, they might even threaten the wolf. But a wave of rushing up like this would have no effect on the wolf. She

even tried to get in the way, and she didn't care whether the person standing in front of her was a cat or a dog.

The splash of blood was just a bit more desolate and ***** on the road she rushed towards Sean.

One step!

The wolf has rushed to Sean's face. At this moment, she did not look hideous, but calmed down. But the dagger in her hand, without any hesitation or pause, directly pierced towards Sean's heart.

But facing the wolf's almost killer blow, Sean's expression is also calm and indifferent, as if this life is not his own. A long time ago, Sean always felt that he would be afraid of facing death, but when this day really came, Sean was so calm, it seemed as if he was welcoming his own destiny, without the slightest. Fear and anger, he glanced at his own grudge energy gutter, and it was a pity that he couldn't even win 30 minutes.

Chapter 178: .The earth is trembling (recommended ticket plus more)

Suddenly, a light blue light shone on Xiao En.

Ice armor!

Tini finally accumulated a little bit of supernatural power, and finally cast an ice armor on Sean's body.

Because it was done with full strength, under this blow, it was only worthy of smashing this ice armor. However, the powerful impact force completely knocked Sean away. Although the intense pain made Sean feel that his whole body was about to fall apart, at least he was not killed by a wolf like this. At this time, more than a dozen Cecilia's guards dared to surround themselves with the wolf.

Even the few remaining bear-men and the northern barbarians began to move quickly toward the wolf, trying to block and squeeze the wolf with a shield to force the wolf to be unable to move. And if the general powerhouse is surrounded by such means, as long as the soldiers are not afraid of death, then the powerhouse surrounded by this means is very likely to fall.

It's just that they don't know. It's okay to use this method to deal with the two strong men who used long spears and broad-bladed swords before, and to deal with the strong men who follow the agile route like the wolf, it will have little effect. Therefore, before the encirclement was about to be completely closed, the wolf was already swinging the sword. Her movements were graceful as a kind of dance, but there was an extremely strong killing intent.

The two daggers are in her hands, relying on the unsteady vindictiveness, the attack range is also correspondingly expanded and reduced from time to time, so that everyone can't feel the tactical movements of the wolf at all. In this way, how can they predict the wolf's movements, thereby completely compressing her attack range? Therefore, the means by which these people swarmed up was just a matter of delaying the wolf for more than ten seconds, and she rushed out again by killing and opening a **** path.

Several Northland barbarian veterans hissed and shouted: "Hurry up and lead the lord away!"

"Can you still go!" The wolf shouted angrily, and the breath on his body became stronger.

Because she was so fed up with these endless flies, the attack that could kill with one blow, she was dragged out by these people for several minutes, even because these soldiers were not afraid to die before and after, he and The distance between Sean also began to grow farther and farther. She was even more annoyed, because after the encirclement was pierced through, the whole scene became completely chaotic. In the confrontation between the two armies, it was already a situation where you have me in you and you in me.

As a result, those archers certainly did not dare to continue shooting.

But in such a entangled situation, Xiao En and others, who have completely lost the encirclement of the circle, naturally no one can stop them.

Wolf, but because of being deeply trapped in the chaos, at this moment there is a sense of difficulty.

In this case, how can the wolf not be angry?

The wolf under the anger naturally became more fierce when she shot, she almost completely squeezed out the potential of her whole body. With the sudden change in the attacking rhythm, coupled with the fact that it was originally to win with speed, the wolf quickly killed all those who stood in front of it. The bright red blood almost has to dye her cloak and hair completely red, the

whole person is like a **** person, especially the cold breath that strangers don't enter, it makes her look even more crazy and determined. .

Like Sean, the wolf also has an absolute reason to kill Sean.

It is this kind of aura, this reason, coupled with Sean's apparently extremely weak state at this moment, that's why the wolf's madness at this moment is created, and it is even vaguely about to break through its own realm limit. Shaun knew very well that if the wolf could not be killed in this battle, then the wolf's strength would definitely be improved after the battle. The next time he meets, I am afraid that he will really be a high-ranking powerhouse.

But at this time, even if he wanted to kill the wolf, he had more than enough energy.

It will take more than 20 minutes for the fighting spirit to be able to use Requiem again. Without Requiem, there are only less than a hundred soldiers left, let alone killing the wolf. I am afraid that it is impossible to trap her now. . And will the wolf give Sean more than twenty minutes? This is also impossible. The wolf can't wait to solve Sean in the next second. How can he give Sean time and opportunity to talk nonsense?

Ten seconds!

In just ten seconds, the wolf broke through the blockade, and the straight line distance from Sean was less than five meters.

is also a distance of five meters, but the wolf did not display the domineering vindictive impact of that wide-bladed sword powerhouse. Wolf is a very shrewd person. She will never use the skills she is not good at to deal with enemies. She will only use her best skills to kill enemies. She never even wastes time on killing people. Compared with the situation where silver would talk endlessly after success, the wolf is undoubtedly a more terrifying opponent.

So this five-meter distance is only one or one second to the wolf.

Cecilia gritted her teeth, finally waved her hand to condense the last remaining magic power, and then swayed dozens of egg-sized fireballs. The power of these fireballs is not great, but as a magic flame, its temperature is also not low, and the burning durability is not lower than that of ordinary fireballs. Even because of the coverage area, this fireball plays a role. It's bigger than fireball.

Because even in the face of this weak fireball, the wolf did not dare to charge, after all, she knew too much about the magic flame, so she could only stop, wield the two short swords airtight, and put all of them. All fire bombs fell. But because of this, the wolf also had to stop chasing, and for this, he gave Sean a few seconds of breathing time, which made the wolf tickled with hatred, and she looked at Cecilia and Dini with a cold look. .

Obviously, after she kills Sean, I am afraid it will be the turn of these two people.

After blocking all the fireballs, the wolf took a deep breath, and finally burst out his strength, and the whole person rushed towards Xiao En. And the ground was even shaken with a cobweb-like crack because of the sudden burst of power.

This time, I'm afraid no one will save Sean anymore.

Everyone could only watch as the tip of the wolf's short sword finally stuck to Sean's throat.

Curse seal. Silver scales!

Sparks flew everywhere, but the wolf's attack, in any case, didn't pierce Sean's throat, even if it used the power of vindictiveness, it only slightly broke the skin. No matter how hard the wolf tried, the silver luster covering Sean's throat was like a solid wall, and it blocked the wolf's destruction.

At this moment, thunder exploded from the ground!

The pupils of the wolf suddenly widened at this moment, because at the moment the thunder blasted, the wolf felt the real fear of death.

She didn't know if she could kill Sean if she tried her best. But she knew that if she insisted on wrestling with Sean's silver luster, she would definitely be the one who died here, not Sean!

So, without hesitation, the wolf immediately took the sword.

The whole person only paused in mid-air, but to her, it seemed to be in the water. She suddenly turned her body upside down, and stepped her right foot in the air. The whole person was like

pedaling on the edge of the swimming pool in a game game, and quickly moved away from Sean. ,
And then steadily landed on a clearing.

A cold light with a red flame taillight shot from the darkness at the moment when the wolf pulled away, and then fell half a meter in front of Sean.

If the wolf hadn't withdrawn in time just now, this cold light would definitely cut her down completely.

And when Dao Hanmang fell into the Gobi, there was a sense of silence, no roaring noise, no shocking aura, but it gave people a panic and dead silence. Because of the place where this cold light fell, a small area around it actually collapsed directly, and countless grayish-yellow aerosols emerged. It was the scene of the hard sandy ground of the Gobi being directly evaporated!

When the mist dissipated, all Xiao En saw was a puddle of light gray molten iron falling in this dirt pit.

Everyone looked into the darkness shot by the cold light.

In the next second, a silhouette finally appeared in front of everyone.

That is the outline of a cavalry.

But when this figure broke through the darkness, the wolf felt his scalp numb suddenly, and even the whole body's hairs were erected.

White horse, black armor, red gun.

There is a ride alone.

Rena!

Under Sean Connery, the commander of the 1st Cavalry Regiment, the goddess of war Rina!

is just a sprint, but it feels like a tsunami gushing out. This momentum alone is enough to make everyone feel palpitation and panic.

The white horse is galloping, and in the next second there is a roar of hoofs.

In the dark environment, the silhouette of a famous cavalry gradually appeared.

They followed Rina 20 meters behind them, forming a cavalry phalanx, and at this moment they rushed towards the battlefield quickly. Every cavalryman exudes a majestic killing aura, and when this aura is condensed into one, it seems that a red and black brilliance can be seen covering all the cavalry. It is countless battles. The **** murderously condensed after the **** battle!

This breath is no less inferior to Clover's Cecilia Guards!

Xiao En didn't expect that the light cavalry unit under Rena had actually been promoted to the level of a four-level elite unit!

But at this moment, it is Rina, who is leading the way, that really attracts all of Sean's attention!

"For Lord Lord!" Rina let out an anger, and this voice on this silent night battlefield was no less than the previous thunder on the ground.

"For the Lord Lord!" He roared feverishly, and it seemed that even the dark clouds in the sky had been shaken away.

In Sean's eyes, when Rena shouted the charge slogan, there was a brilliance blooming on her body, and then spread out like a ripple, directly covering the entire battlefield. Immediately afterwards, there was a faint light shining on the body of all the soldiers on the one's side. At this moment, it seemed that every one of the soldiers on the one's side felt the blood in the body boiling, and the whole person became full of combat effectiveness.

Aura skills!

Rina actually advanced to the armed knight, not the berserk knight!

Shaun was stunned.

And the roaring horseshoes sounded as if a magnitude seven earthquake had occurred, and the entire ground was constantly shaking and roaring.

That is the earth trembling!

Obviously it was just a light cavalry force, but at this moment it rushed out of the momentum of a heavy cavalry.

Chapter 179: .I'm late

Rena charges extremely fast.

Originally kept a distance of 20 meters from the cavalry unit behind him, but in a blink of an eye, it was only a sudden acceleration and it was pulled to a distance of nearly 50 meters, and he ran straight towards the wolf. The hoofs of the galloping war horses were concealed by the roar of the horse hooves of the large troops behind, but the momentum radiating from Rina was far more powerful and frightening than the cavalry behind her.

Sand and stones splashed under the horse's hooves. The majestic figure of the war horse was full of explosive power beauty. Rina riding on the war horse also had a dazzling heroic posture with a gun in her right hand. If you look closely, it is not difficult to find that Rina's figure at the moment is slightly leaning to the left, which means that her attack will be launched from the enemy's left side.

But in such a fierce battlefield, I am afraid that few people can observe Rina's actions like Sean.

Several soldiers quickly left the battlefield, and then quickly rushed towards Rina.

Their idea is obviously the same as the previous situation of the Cecilia Guards, the Bears, and the Northern Barbarians, they are all trying to stop Rina's charge. Any soldier, even a recruit, knows very well that once the cavalry charge loses speed, its strength will also be weakened to the extreme. If the cavalry can be dismounted, the combat effectiveness will be greatly weakened.

It's just that these people have forgotten the two most important points.

First, Rina is not a cavalry, but a knight!

Secondly, she is the next gold powerhouse, even if she gets off the horse, she is still a real gold powerhouse!

Several soldiers who came up under the siege, soon tasted the fear of encountering Rina's charge.

Seeing Rina's left hand gently pulled, the horse immediately moved to the left side knowingly. The distance of this movement is very small, and it still moves by inertia, so unless it is a strong person with extremely rich experience against the enemy, it is difficult. Discover this little act of Rena. And these soldiers are obviously just ordinary people in the lower-ranked bronze, let alone masters, and even the upper-ranking bronzes don't have the strength, so how can they discover this subtlety?

So when Rina approached these soldiers, they were horrified to find that the original encirclement had become a joke, because Rina was almost one meter away from their encirclement!

Before these soldiers could react, Rina's spear had already been shot.

The red long spear only flashed slightly, and a small hole burst out from the center of the eyebrow of the soldier on the far left, and blood shot out like a blood arrow.

Immediately afterwards, she saw Rina's spear swiping to the right, and her body's center of gravity seemed to be leaning toward the right. Several soldiers who were too close to dodge froze on the spot. Unbelievable fear appeared in their eyes. The weapons in their hands had fallen to the ground, but their hands were firmly covering their throats, making a "hehe" gasp, but they couldn't stop the red in any case. Blood flowed from between their fingers.

It was almost an instant effort, and Rena had already passed by these soldiers.

But at this moment, the horse under Rina's hips has moved to the right side of Rina's center of gravity and slightly adjusted its direction. And Rina also raised her gun and stabbed to the left. This time there was a faint "puff" in the air. A vaguely red vigor flashed in the air, but the left chest of the three soldiers on the left. , The center of the chest cavity and the right chest were shot through a hole at the same time, and blood was flowing out like a stream.

This is actually an energy that uses angles to attack and kill three people at the same time!

The next moment, the red light burst out like a fairy scattered flowers, and the dozen or so soldiers who blocked Rena along the way immediately froze.

is just the dull look on everyone's face, as well as the hole in the throat that runs through the front and back, but it is a clear statement that the lives of these soldiers have left their bodies.

Is the attack of the golden strong man so easy to stop?

Even Clover, even if he had to face the attack of the wolf head-on, he would at least need a battle formation laid down by three hundred elite soldiers.

A few minutes ago, the wolf just explained to everyone present what a frontal attack is. So many people blocked and formed the line of defense, even the unreserved shots of Klov, Krumah, Andre, were easily torn apart by the wolf, if it weren't for Sean, there was a silver scale curse. With this extremely authoritative defensive ability, Sean had already died under the wolf's short sword in the previous rush.

In just a few minutes before and after, the situation of the battle at this moment has come to a complete reversal.

Now, it is Rina who is rushing towards the wolf with an astonishing aura, and it is obvious that she will be shot to death by her aura!

But the only difference from the wolf is that Rina's attack is very hierarchical, and it is obviously extremely lethal and threatening, but no one of her soldiers will be accidentally injured by Rina's attack. Even if two soldiers belonging to two different camps stood in front of Rina to fight, when Rina rushed past, the enemy soldier covered his throat with a look of horror and fell. On the other hand, the soldier on his side was not injured at all.

A distance of tens of meters is just a blink of an eye for Rina.

However, in the blink of an eye, in everyone's eyes, a red light flashed first, and then a red trajectory flashed in the air, followed by a red energy shot out, and finally it was like that The celestial lady's red light shone like a flower in the sky.

All the attacking skills were done in one go. During this process, Rina's charging speed did not even slow down, but she did not hurt anyone. Looking at the horse under the control of Rena, like a nimble fish, roaming around in this muddy water, it was full of an indescribable pleasing to the eye.

The white horse, the black armor, and the red spear are destined to be the protagonist tonight.

"Retreat!"

Finally, when approaching the wolf with only one meter left, he saw that Rena's spear was about to pierce out—Sean and others could even see Rena's right hand slightly raised, obviously already raising the gun, with a red vigor. It was already flowing in Rena's hand, and then slowly poured into the spear, and a layer of light red gas could be seen faintly surrounding the spear.

No one would doubt that when Rena stabbed this shot, the wolf would be killed here!

But what everyone didn't expect was that the wolf's reaction power and speed were indeed beyond everyone's expectations. Because it only takes another 0.1 seconds to see the wolf's head exploded, the wolf completely exploded half of the fighting energy in the body, and the whole person quickly flew backwards, and her double swords were also facing at the same time. From behind, that strong vindictiveness also erupted from the two daggers, strangling all the people behind her, whether foe or foe, into a piece of debris.

Such a terrifying and even cold-blooded move, and then the wolf's hoarse retreat command, all the soldiers who were still fighting with the Cecilia Guards, the Bearmen, the Northern Barbarians and others were stunned. Seconds later, it finally collapsed completely.

And when the 0.1 second finally skipped, Rena's spear finally stabbed out, but at this time the enemy had already jumped more than ten meters away.

So everyone can only see a little red light condensed on Rina's spear. This red light is not big, only the size of a nail piece, but when this light is exposed from the tip of the gun, it is Suddenly it broke out completely. In the eyes of outsiders, Rena's spear is almost like a sun hanging on the tip of the spear. The thick red vindictiveness spirals frantically, absorbing all the surrounding air forcibly, and then it explodes completely.

The wind is raging!

Looking at this shot of Rena, a trace of terror flashed in the wolf's eyes. She believed that if she took a short time and was hit by this shot, she would probably explode her head completely in the next second. However, when the wolf saw Rina's face suddenly white, she also understood that the use of this spear technique would also have a great adverse effect on Rina, and even side effects.

At this moment, no one thought that the wolf could grasp the timing so accurately!

Because no matter if it is one second early or one second later, she cannot escape to death. Only when Rena is stuck because of the burst of spearmanship she is about to perform, can she escape Rena's anger. Machine lock and attack. Otherwise, she would end with her head exploded one second later; and one second earlier, she would still face Rina's pursuit.

When Rina paused for a moment because of this blow, the wolf had already pulled away from a distance of 20 meters to a distance of 40 meters. When Rina wanted to charge her horse again, the wolf was already headed. She quickly escaped without returning—she almost completely exploded all her anger into fleeing for her life, but in just one or two seconds, the wolf could no longer see her at all.

At this time, the light cavalry unit with the roar of horseshoes finally rushed to this battlefield.

They faced a group of enemies who had lost their will to fight and collapsed and fled.

Everyone knows that when facing the charge of the cavalry, if they can continue to entangle with the enemy and cause a large-scale melee, then naturally there is no way for the enemy cavalry to attack, because of the charge of the cavalry. It is simply that there is no way to distinguish the situation between the enemy and the enemy. The battlefield charge cut is a strike tactic that directly cuts the formation completely. It is also mainly to weaken the morale of the enemy and cause the enemy to collapse.

But this time, while a large number of soldiers fled, there are still a small number of veterans who are still entangled with the Cecilia Guards. Their choice is entirely based on their own rich combat experience.

It's just obvious that they definitely picked the wrong opponent this time.

The entire cavalry unit quickly divided one hundred and fifty horses into three directions to chase the rout soldiers, fifty men in each direction. The other fifty people began to run in a circular motion around the entire battlefield. Their speed was not fast, but they were full of a terrible murderous aura. The short guns at the rear threw these short guns at the enemy one by one.

is just a round of short guns. After shooting about a dozen enemies, these veterans finally collapsed and began to flee.

At this time, Rina had already rode her horse and came to Sean's side. When she was a few meters away from Sean, she had already turned over and got off her horse and started trotting. When she was in front of Sean, Rina was already kneeling on one knee, hanging down. Her long hair was condensed into a ball because of blood and sweat. The black armor on her body also had large patches of dried blood. The whole person exuded a pungent stench, but her eyes were full of determination.

In the eyes of everyone, Rena at this moment is still so heroic, full of the real majesty of a strong man.

The white steed swiftly stepped to Rina's side, lowered her head and slapped her nose, then rubbed Rina's head.

"Sorry, my lord, you have suffered." This is the first sentence Rina said, "I'm late."

Chapter 180: . Sean's Reflection

The sky finally began to pale slightly.

The **** battle last night was a very normal thing for the Wild Land itself. In this **** land, for a battle involving tens of thousands and dozens of people, a thousand-person battle is not even a small-scale conflict. People's palpitations naturally increase in scale.

But for the six regions of the head and tail snake course, this is indeed the most shocking **** battle since the head and tail snake course was established.

The establishment of the six major areas of the head and tail snake route was indeed a pile of life. However, since the establishment of regional chiefs, sub-regional chiefs, and trade chiefs, there has never been a war of more than 500 people in the six major regions. However, the number of people involved in the **** battle last night exceeded a thousand. people.

If you want to count the series of other battlefields that involved the root cause of the **** battle last night, it would be a war involving tens of thousands of people. Of course, Xiao En didn't know that Vivian had entered the savage land, and even led five thousand thundering fronts to support him. Naturally, he would not know that a strong sanctuary was blocking Vivian's support. And because the war that broke out on this battlefield attracted the attention of the sanctuary powerhouses sent by the Millennium Covenant Empire and the Pan-Continent Chamber of Commerce Alliance, the **** battle between Sean and the wolf last night was annihilated in history. In the truth.

Except for the parties involved.

After the war, Xiao En and others dared not stay longer on the battlefield, but after hurriedly cleaning up the battlefield and the bodies of the dead, Rina and her light cavalry unit escorted Xiao as soon as possible. En and others left the battlefield.

is servitude. There are only more than 70 people left in the Cecilia's guards, less than ten people in the Northland Barbarians, three people in the Bear people, and only twelve members in the slave-catching team. Krumah's injuries were not serious because he was a lizardman. The terrible wound quickly turned into a minor injury under Dini's healing. On the contrary, both Clove and Andre were both seriously injured. In the next few months or even a year, I am afraid that there is no power to fight again, among which Klov's injury is much more serious than Andre's.

But the real sad thing is that Yim died in battle.

This person is already a father-like existence for Rupiah. In the **** battle last night, he killed his own life in order to block a fatal blow for Rupiah. Ruby just hugged Yim's body and sat in a daze, just like the situation when he heard of his adoptive father's death, but when Sean and others were worried about Ruby's situation, this determined genius boy was already stood up again.

He only asked Sean a word.

"Do I have a chance to take revenge?"

Sean's answer is also very simple, just one word.

"have."

Then Ruby said that from today his life will belong to Sean.

This was originally something that should make Sean feel happy and happy, but I don't know why, no one is happy, whether it is Sean, Andrea, or Cecilia. They just quietly watched Ruby bury Yim on the Gobi, and then took down the dagger that Yim had been carrying with him. Everyone could feel that this young man seemed to have become completely mature at this moment. .

This battle is extremely tragic for Sean and others.

It can be said that Sean's journey from the Kingdom of Portoroa across several kingdoms and principalities to the Principality of Lane is even more tragic. This battle allowed Sean to see what a real nobleman should have in his background, influence, network, and allies. It also made Sean truly understand that even if it's just a veteran nobleman in a small country, he also has Shocking strength.

Before that, Sean had always been whimsical that he was completely invincible by virtue of his understanding and cognition of the old nobles in the game. However, he has always ignored one of the most important factors, that is, in the game, even if he dies, he will only deduct some attributes and drop a level, and will not really die, and because of the existence of a large number of players, they have The ability of is almost equivalent to countless golden powerhouses, sanctuary powerhouses, and naturally has an overwhelming advantage when facing those nobles.

But now, the world he lives in is a real world!

There are no countless players here, so there won't be countless golden powerhouses, sanctuary powerhouses, everything can only rely on his own development, the real capable person is one dead one and one less. If it wasn't because of Rena who arrived in time last night, I am afraid that even if Sean felt that he could survive in the end, none of them, including Cecilia, would have survived.

The cruelty and straightforwardness of reality finally made Sean completely awake.

What he needs most now is not an opportunity to make big plans, but a stable political position, and the allies and benefits that this position brings. In the face of the endless methods and conspiracies of the nobles and kingdoms, if there is no ally willing to advance and retreat together, then his future may be difficult to achieve. At that time, let alone regaining the holy land Utopia, I am afraid that even now it is hard to lay the foundation. Also be taken completely by others.

But not everything is bad.

Rena's advancement to the seventh-order professional armed knight is definitely a surprise for Sean.

Originally, Xiao En thought that with Rena's situation, there was a more than 70% chance that her Tier 7 profession would be transferred to Berserker. This is a profession that is truly one rider. In the charge on the frontal battlefield, the combat power of a berserker knight is almost as good as three to four powerful players of the same rank, because all of its skills are entirely for fighting. Born, and in the evaluation of players, this profession has a different name, known as "the berserker on a horse."

belongs to the type of occupation that is more terrifying the more you fight, and the more severe the injury, the stronger the combat effectiveness. In the game, there is a team of berserker knights, dps can definitely soar up to a level, and even can be used as 2t, 3t when necessary, and a series of tactics and play styles surrounding the berserk knights are also extremely mature in the game, and This profession is also a profession with relatively low difficulty in finding jobs among all rank 7 knight professions.

While armed knights, this class is not comparable to the berserker knights in terms of combat ability. In one-on-one singles, the armed knights and the berserk knights will lose ten games in ten games. However, in the game, many professional teams would fight for an armed knight, nothing else, because the armed knight has extremely rare aura skills, and this type of skills is very low in single-handedness, but It is extremely important for the growth of the entire team.

Don't say anything else, just the two brilliant skills that Rina currently masters are enough to make the entire light cavalry unit be used as a heavy cavalry unit.

[War Aura: Greatly improve the morale of the whole army, strengthen the attack power and defense power of the army (team), save 25% of physical damage, and at the same time all members of your side gain strength +10, endurance +10, and agility +10 bonus .]

【Command halo: greatly increase the morale of the entire army, strengthen the movement speed and defense of the army (team), save 35% of long-range damage, and all members of your side have a +15 stamina and agility +15 bonus. 】

If the morale of an army is high, its attack power, defense power and even movement speed will be significantly improved, and the enthusiasm for fighting will be very high, which will make

an army very difficult and terrifying. The aura skills will not only greatly increase the morale of the army, but also on this basis, based on the different abilities of the two auras, it will increase the attack power, defense power, or movement speed and defense power. At the same time, the third The attribute increase of times has been improved.

The targeted bonus of 30 total attributes, which is almost equal to abruptly increasing the combat effectiveness and quality of an army.

Even if the army is at the same level, there are strong and weak points.

At least four-level elite heavy cavalry units are definitely better than the same four-level elite light cavalry. But as soon as Rina's war halo was activated, this light cavalry unit was not equivalent to a Tier 4 heavy cavalry unit, but was directly promoted to two levels to become a Tier 5 heavy cavalry unit. How terrible is this combat power? , It is completely conceivable.

Even more rare, is that these two auras also have the ability to exempt a certain percentage of damage.

This is the horror of the armed knight, and these two auras are both first-level auras! If Rina focuses on this aspect, her aura skills can also be promoted to a second-level aura, a third-level aura, and even the highest level of a fifth-level aura, and the improvement will be much more than that.

But Sean still found some differences between reality and the game.

At least, in the game, the armed knight can only use the halo effect in a targeted manner-that is, if you choose to use it on the army, then you can't use it on the team, so Rina's halo effect is not in the case of an army. Will act on Sean and others. But when Rina launched the command halo last night, Sean could clearly feel the power surging in his body, even Dini, Cecilia, and the entire Cecilia Guards also got it. addition.

This shows that Rena's aura skills are likely to be regional area capabilities, rather than group skills that only function in the same formation in the game!

So Rina's advancement made Shaun feel a real surprise. This kind of surprise is even more pleasant than knowing that Rina's army has become a fourth-level elite unit. Because as long as Rena is on the battlefield, I am afraid that the combat effectiveness of all the troops under Sean's command can be increased by at least one level.

Under such circumstances, Xiao En and others were relieved to find a place to rest temporarily.

Soon, after a short two-day rest, when Andre and Cloff's injuries slightly improved, Sean ordered to set off immediately. Because he had already seen that the situation in the Barren Land was becoming more and more confusing and dangerous, so they had to leave here and return to their territory as soon as possible.
