

Jerry's confession

Chapter 25

I am shocked and amused as we watch the video's Lucian has sent. I was a bit pissed at first that he went so easy on her in the first one, until I realised it was because Luca would tear her apart.

The way she instantly crumbled into a screaming mess was pathetic. George, the guard, barely touched her. His hits were much softer than Lucian's. He did look like he had enjoyed giving her the punishment, though.

"Goddess isn't she weak? I thought her father was a Beta. She crumbled at the first hit" Talia says.

"Yeah she has a pretty weak aura. To be honest, she must take after her mother. My sister is the same, she acts like an Alpha but I am sure she is an omega like her mother, everyone just fears her and does what they are told because of the Alpha" I tell her

"Most likely, what is with these women? I had my own Jessica years ago, and I will tell you about her sometime. It might give you some perspective on your situation, although my mates were not as bad as your one, and I was lucky enough to have family support if I wanted it" she tells me.

"I would like to hear your story" I tell her.

"It's a long one, but plenty of drama" she laughs "now let's go interrogate a Beta" she says with a wink leading the way.

Beta Jerry is already in an interrogation room, Shawn and the Kings go into the adjoining room to watch us.

He looks surprised to see the Queen come in, especially with another woman, I am sure he has no idea who I am or what rank as I am cloaking my aura.

"Queen Talia, I am not sure why I have been brought here and kept for a week. I have done nothing wrong, and all this time, my daughter is rotting in a cell at the Blood Moon Pack" he says politely, going for the sympathy vote.

"Come on Beta let's not insult any of our intelligence. I think you know exactly why you are here and why your daughter is locked up. Are you not curious who this young lady is and why she is here" she says, smiling at him.

"I assure you I have no idea about this or who this girl is, why would I know who an omega from another pack is" he says innocently as he can manage while Talia starts laughing as if it's the funniest thing she has ever heard.

"That's so funny. You think she is an omega? She is more powerful than my mates, you fool. You and your daughter screwed with the wrong couple. It's not nice to break up mates, Beta. Aurora it's time to stop hiding and show him who you are" she says.

I let out my aura so he can feel my full power he is looking at me in shock, I'm not sure if it's because of the strength he feels or learning my identity.

"You, how? Your father always said you were weak and worthless. My daughter is a better match for him" he stutters out.

Athena pulls forward, my eyes swirling "A better match than his fated mate, her an omega than me a special wolf? How is a weak **** like her better you worthless fool?" Athena shouts at him before retreating.

He is now shaking in his seat as Talia snickers.

"Well I would answer Athena. She isn't named after the goddess of war for nothing" she says, chuckling.

"You are a special wolf? Jessica didn't say. I am sorry I shouldn't have helped her" he says in shock.

"Why did you do it, who's idea was it?" Talia asks.

"Jessica has always liked Lucian. We have always wanted them to be chosen mates. When you turned up and he wasn't interested, I encouraged her to act and get what she wanted. It would be good for our family to have Lucian as a member. Jessica was mated to an omega. She rejected him because he wasn't up to her rank. It was only the two of us involved her mother or brother doesn't know" he answers.

"Are you telling me the full truth?" Talia commands him.

"Yes Queen, it was all Jessica and I. I didn't help with her schemes, but I did encourage her to do it" he answers.

"Right you will be placed in the cells. Your daughter is still denying many things. We need a full confession from her before we decide on the sentence. It is a serious crime to break up mates and cause harm to a Luna. The fact that Aurora is vital to our future will not help her case. Or the fact she knew they were mates. This will take time. The moon goddess has other things we need to take care of first, so you will be with us for a while" Talia informs him.

"Yes my Queen, I apologise, Aurora, for my part" he says with his head down.

We leave him sitting there without replying. Shawn and the Kings join us as we walk silently out of the prison.

No one speaks until we reach Talia's ope.

"Well it didn't take him long to talk after Athena said her piece. She's almost as scary as Alina" Tristan jokes.

"Yeah she doesn't like to be disrespected" I shrug.

"Most Alpha's dont" Tyler agrees.

"So what's the plan now? When do we send for the bitch?" Shawn asks.

"We will wait for a week or two, then we will hold the sentencing a while after. When I send for her, I will ask Lucian to stay with his pack until she has been interrogated, and I will send for him for the sentencing. That should give us more time" Talia explains.

"I can't imagine he will be happy about it, but he won't refuse an order from you" Shawn says.

"I don't care if he is unhappy, Aurora dealing with her family is the priority. Then, we will deal with Jessica and her father. Only then will Lucian get the chance to be in her presence. It is the way it's meant to be" Talia says.

"By the way, would you like to meet your family? I was going to invite your cousin this weekend. I have something important to tell him, and it is important that you both meet" Talia asks me.

"I would love to the Alpha always kept mum and us away from her family, it would be good to meet them she always spoke fondly of her brother and his family" I say.

"I will make sure that your aunt and uncle are invited too along with your cousins two boys. It is about time you had some family. Soon, you will be able to have a proper relationship with your brother as well" she assures me.

"Thank you for everything you are doing for me" I say gratefully.

"One day, you will pay it back to another, and we are all needed for the future. I can not do this without you or the other special ones. I am afraid someone is going to go through so much, just like you have, maybe even more, and she will need you. You will be better for her than me, and all of us need her" she says.

"Wow do you ever get confused with all of this? Because I feel like my head will explode" I say as she chuckles.

"All the time, the moon goddess never tells you anything straight out. It is always little bits and riddles. Some are clearer than others thankfully" she says with amusement.

"It's so strange to hear you speak from the goddess. You are so straightforward, no crap most of the time" I say.

"Yes it's always amusing to see the looks on people's faces when I give them a message. They are really not used to me being like that" she laughs.

"I bet" I say, laughing.

Alpha Frank

Chapter 26

We spent the week trying to get a hold of my new power, I have managed to call a small rain cloud above my hand and make it rain for a couple of minutes. Talia was impressed by it, but I just felt it was going so slow.

"I know it is frustrating, and it feels like it is taking forever, and nothing much is happening. This is a big step even if it does not feel like it. You have successfully made something out of nothing. I remember feeling the frustration when I was starting out with my re abilities, I thought I would never get the hang of it" she tells me.

"I know you are right. It's just so hard to feel positive at times when there is barely anything to show for your efforts. I will keep trying to stay positive. It won't help getting worked up and frustrated by it" I say.

"That's my girl, let's get something to eat and some rest it's a big day tomorrow. Your family will be here after lunch" she says brightly.

"I know, I hope they like me" I say, unsure.

"Of course they will. Don't let those assholes that were supposed to be family get to your head. Anyone with eyes and a brain can see how amazing you are" she says encouragingly

"Thank you, it means a lot" I say gratefully.

We meet the others to eat, then I take her advice and have some rest and an early night. All this trying to get a grasp on my powers is tiring.

When I get up in the morning, I am excited and nervous. I have breakfast and then ask Shawn if he wants to go for a run in our wolf forms to waste some time and settle my nerves. We spend a couple of hours running and playing, and then we head back. I spend some time with Talia's pups before lunch. They are a great distraction, and we have grown quite close in the time I have been here. I am relieved when it is time for lunch, knowing I won't need to wait for much longer as the nerves are killing me.

I wait in the garden with the pups when Talia, Tyler, and Tristan go to greet them it will be much more relaxed that way. I hear them chatting and laughing as they make their way round to us.

"So there are a couple of reasons why I asked you all here, the main one being the person sitting right here" I hear Talia saying, followed by a gasp.

"It can't be can it, are you Aurora dear?" a lady asks.

I nod, not feeling able to speak.

"Fredrick it's our Aurora she looks so much like our Ashley" she says, crying.

"I am your Auntie Violet, this is your uncle Frederick, your cousin Frank and his wife Lilly and their children Aiden and Adam" she introduces.

"Now come here and give me a hug. I have been waiting a long time for this" she says, smiling as I get up and hug her now in tears.

"Now now my dear, it's ne. We are here" she coos while stroking my back.

"My turn" my uncle says, taking me from her and giving me a hug as well.

"You are so much like Ashley, I missed her so much when she moved" he says to me.

"Can I meet my cousin now?" Frank asks, laughing as Uncle Frederick let's me go.

"I have spent my life hearing about your mum, and you, and Zander" he says, hugging me.

"Mum used to talk about all of you too" I say.

"Your father wouldn't let us have any contact with you" Uncle Frederick says.

"I know mum told me it wasn't your fault" I say.

"How was your life dear?" Auntie Violet asks.

"It was good while mum was alive and well, not so good after, it has been hard" I say.

"Aurora has had a particularly hard life at the expense of her father and step family, then at the hands of her mate that's why she is here now. It is not an easy tale to hear, I am afraid" Talia tells them.

"Would you feel comfortable sharing it with us?" Frank asks, holding my hand.

"I will" I say. Then I go on to tell all about my life growing up right up to the arranged marriage.

"I want to kill him" Uncle Frederick says, his eyes turning black.

"Me too" Frank growls his eyes black too.

"Aurora will be dealing with them herself. She is much more powerful than all of them, and it's not fair to take it away from her" Talia tells them.

"What about this mate then? I have a feeling I will want to kill him, too. I also think I know who he is. Judging by the fact that the Gamma has ditched him, it has to be pretty bad?" Uncle Frederick says.

"It is" Talia warns.

I tell them everything right from recognising him as my true mate and what he said in the car to whipping me with silver. By the time I am nished, both women are growling, and both men have their claws out ready to shift.

"Calm down" Talia orders, helping them gain back control.

"Sorry that was hard to hear" Uncle Frederick says.

"That's why his Gamma left, and all his family and ranked members helped Aurora, not him" Talia says.

"Now he is living in hell because of his actions, and he will stay there until she is ready to deal with him" she adds.

"Now we have other important issues to deal with that involves all of you. First off, Aurora is a special wolf, so she is important to our future. Next, in the future way in the future, Aiden will almost be grown by then a girl will appear who needs your help. It will be Aiden who nds her, you will probably need Aurora's support with her in the future she will have had a similar life unfortunately if not worse" Talia tells us.

"We will watch for her and care for her don't worry" Frank says.

"She will be like our own daughter" Lilly agrees.

"I will be there if you need me for anything" I offer.

"Remember we are here for you, also. You are our family, Aurora, and we want to know you and be a part of your life" Uncle Frederick says

"I would like that a lot" I reply.

"So a special wolf that's pretty cool, there are not many of those. Are you a cool colour like the queen?" Frank asks.

"I am just white, but my eyes are quite a bit different from others" I say.

"Different how?" he asks.

Athena comes forward to show them her green and purple swirling eyes.

"I guess we can see how my sister came up with your name. They are beautiful" Uncle Frederick says.

"Thank you"

"They also give a clue to her power" Talia tells them.

"Cool, what can you do?"

"Play with the weather when I learn it properly" I tell them.

"It's a little more than that, and it is a powerful gift. She is coming along nicely, making much more progress than she gives herself credit for" Talia says.

"That's pretty amazing" Violet says

"I take it this girl will be a special wolf? That's why we will need Aurora?" Lilly asks.

"She will be a special wolf, her fur even more unique than my own. I am not sure of her powers yet. It is more for her life story what they have both been through. I am afraid the moon goddess is never clear. We always have to gure it out for ourselves" Talia tells us.

"Ok I will keep that in mind. Between us, I am sure we will do what is best for her" Lilly says.
