

Making a plan

Chapter 30

Once we left the cells, we went straight to Talia's oco.

"Well now that we have all the evidence and confessions sorted and your wolf trained, we can work out what to do next" Talia says.

"I am not sure the best course of action or what I am allowed to do in the eyes of the law" I say.

"You were abused and neglected for years. Your father does not follow the rules that he agreed to when he signed the agreement with the rest of the Alpha's and Luna's. At this stage, we are free to do what we please to stop them. You can challenge one or both of them. We can capture and execute them if you like. Banish them or lock them up for the rest of their lives" she presents all the options.

"Thats a lot of choice, I want to challenge him. If he pushes for it, I will accept it to the death. As for Selma, she is pure evil and doesn't deserve to live. I would like to discuss what to do with Suzie with Zander. She is not of age yet and has been corrupted by her parents. There may be something else we can do with her" I say.

"I agree, I am happy with that decision. Your father can pick ght to the death or submit and be imprisoned, I don't trust him not to seek revenge if we banish him" Talia says.

"So when are we going? I have always hated that man. I can't wait to have a decent Alpha in charge of the pack" Tristan says.

"You know you are strong enough to lead the pack, Aurora?" Tyler advices.

"It is my brothers pack, I didn't go through all that with Lucian just to take it from him. I did it so he could get his rightful place" I say to them.

"Besides ruling that pack is not Aurora's destiny, it is not where she is meant to be. Now I say we don't bother to waste time and leave tomorrow morning" Talia suggests.

"I am happy with that. The sooner this is dealt with, the better" I say.

"Scott is on his way now" Tyler let's us know.

"When we get there, I will announce the charges against them, then you can execute Selma before challenging your father" Talia says.

"I would prefer to challenge my father rst. I don't want him to accuse me of weakening him to gain an advantage" I say.

"Very well, that's probably a good idea" Talia agrees as Scott walks in the door.

"You wanted me?" he asks.

"Yes we are going to the Light Moon Pack in the morning to nally deal with Alpha Bernard and Luna Selma. Could you organise the warriors for me. We shall leave after breakfast around 9" Talia says.

"No problem, I will get right on it" he agrees before leaving the room.

"After we get back, will we be dealing with Jessica and her father?" Shawn asks.

"We can discuss them now" Talia says.

"She should be executed. She tried to murder Aurora and break a mate bond" Shawn says.

"I agree with him. Regardless of her being a special wolf, she knew Aurora was the true Luna of the pack. Death is the only fair sentence" Tyler says.

We all look to Tristan to see his opinion on it.

"She needs to die. She can not be trusted to live. Her crimes are too great" he says.

"I am in agreement with them Aurora what do you think the crimes were against you" Talia says

"I don't think she will stop scheming if let out and keeping her locked up is probably more cruel not to mention a waste of resources. I don't like making a choice on people's lives, but I can't see how we can let her live" I say, reluctantly agreeing.

I hate the woman, but I don't like the thought of unnecessary loss of life. Unfortunately, I see no other way in her case she is not the type to be reformed. Suzie may have a chance, and that is why I will discuss it with Zander rst.

"I don't think Beta Jerry deserves to die. He has shown remorse and didn't know how far she had pushed her plans" I say.

"Maybe a prison sentence for him, and we can release him if we are sure he will not seek revenge" Tristan suggests.

"We should also have his title stripped from him" Tyler adds.

"I can agree to that, say 3 years, then his mate doesn't have to suffer too much. I will also give her the choice to reject him if she wants to" Talia says.

"That is fair. She should not have to suffer for what her family has done. If she wants to reject him and have a fresh start, we should offer to help her resettle in a new pack" I say.

"I will give her that option also. I will invite their pack down the day before and talk with her in private before the sentencing" Talia says.

"If she wants to speak with me, I will make sure I am available to her" I offer.

"Thank you Aurora"

Now that the decisions have all been made, I decide to get in some combat training in preparation for tomorrow, Shawn and their Delta John join me so I can spar against the two of them at the same time. I need to be strong and precise for tomorrow.

I don't want to get distracted and lose, so clearing my head with some training is the perfect thing right now.

"Well I denitely don't think you have anything to worry about tomorrow. You are beating us up like we are fu.cking amateurs" Shawn says, laughing.

"Oh come on, it wasn't that bad" I say, rolling my eyes at him.

"No of course not. It is just as well that I have my man at home to kiss me better and look after me as I recover" John teases.

"Lucky bas.tard not all of us have someone waiting on us, you know" Shawn grumbles, throwing his water bottle at him.

"They are not always a good thing, I am quite happy to be going to my room alone" I say.

"Yeah well that's because you did all the beating. You have nothing to kiss better" Shawn snorts, making me laugh.

"I'm sure your wolf will heal you before you have even nished showering, big baby" I tease

"I wish I still had my water bottle" he says as we laugh at him.

I am feeling a lot more condent and relaxed about tomorrow. I know I am on top form and at full strength right now, I just need to make sure I keep my condence.

I am looking forward to seeing Zander, I wish it was under better circumstances. I just hope he does not hate me for what I have to do. I really want to have a proper relationship with him again.

I make sure to eat plenty that night to give me extra strength and energy. after all the training I have been doing, then I decided to have an early night. I need as much rest as possible.

My mind is lled with thoughts of my childhood, good and bad, as it takes me a while to fall asleep. Then, my dreams are lled with all the bad memories that they put me through, causing a restless night.

When I get up, I feel more determined than ever to make them pay for everything they have done.
