

M Factory 211

[Chapter 211: Class 1 water quality](#)

The test was divided into eight water intake points.

Today it is sunny and windy, the weather is getting brighter.

The staff took a rubber boat and sampled the seawater within a few miles of the sewage pipeline.

The result of the water sample detection shocked everyone.

Standard water quality of the national standard!

The water quality is divided into four standards.

The fourth category is only suitable for use at the harbor terminal where the oil star is floating.

No breeding or bathing development is allowed.

As for Xiaoping Lake, it is the most serious one to go to the industrial chemical pollution water standard directly.

The same source of pollution is a completely different result of extreme water quality.

On the side of Longxitan, the water quality is in accordance with the standard.

The water can be directly applied to marine fishery waters, marine nature reserves, and rare and endangered marine life reserves.

And sea bathing, sea sports or entertainment areas where the human body is in direct contact with sea water, and water desalination areas directly related to human consumption.

According to the laboratory technician, the water quality standard of Longxitan is one.

That is because the national standard ceiling is only one type.

If there is a higher standard, the water quality of the sample taken from Longxitan will also be the first to be won.

Why has Longxitan Bay suffered for so many years from a strong underwater sewage dump, while now the quality of the water can reach a superb class of good quality?

The deputy mayor, Wu Shunyun, and a group of people from the Environmental Protection Bureau did not want to break their heads.

In the end, they had to temporarily classify this situation on the magical work to mother nature.

In the magical ocean, anything can happen. It is being possible to have a huge underwater spring in Longxitan Beach.

The springs have continually washed away pollutants all the year round.

This is the most likely scenario.

Undersea springs are common along the coast. Perhaps dark springs certainly do not leave any pollutants.

As for the possibility of man-made, the deputy mayor Wu Shunyun and the staff of the Environmental Protection Bureau did not think about it because it was too ridiculous.

The Vice Mayor, Shun Yun, planned to return to Xiaoping Lake.

The staff of the Environmental Protection Bureau, who was responsible for collecting evidence, proposed to go to the factory in the distance to ask about the situation.

At the end of their field of vision, there is an industrial factory located.

This factory must be more familiar with Longxi Beach than they are.

It is possible to provide more clues about Longxi Beach and why it is not polluted.

Vice Mayor Wu Shunyun decided to go to the same place.

The news that Longxitan was not polluted made him feel better.

But where the pollutants went, it is still a huge doubt in his heart, this mystery does not solve, he is hard to rest assured.

Returning to the Huanhai Highway, two of the cars headed for the factory in the distance.

Close to the factory, the driver of Wu Shunyun and several other EPA staff members in the cars, each eye wide open, stared at the factory on the right side as they looked at the magnificent scenic spots.

The roads extend in all directions, huge, to the amazing factory.

There are also a few machines that they have never seen before, and on those flattened floors, two robotic arms are used to flexibly install the plant.

When the driver turned the car into the main road connecting the factory, the deputy mayor, Wu Shunyun, could not sit still.

An amazing transit warehouse appeared in front of him.

Each parking space has a robotic arm standing on it, and there are dozens of robotic arms that carry the packed wooden boxes to the trucks.

This is an automatic loading and unloading robot.

When Wu Shunyun went abroad for a study, he saw similar products at the Davos Industrial Revolution Concept Exhibition.

It's just that kind of thing, it's slow to operate, and it's very demanding on the working environment.

It wasn't permitted with a dust workplace.

It is like the product in front of them, the loading and unloading of goods is extremely efficient, and it is also placed directly in the open air.

When Wu Shunyun saw the three words of Monster Heavy Factory, he suddenly realized it.

He has heard about this factory, whether it is the URA or the customs side, he is full of praise for this factory.

A few days ago, the Propaganda Department of the Municipal Party Committee reported that there were product fragments in his technology.

When the two cars passed through the transit warehouse, they were stopped by the master artisan.

The driver of Wu Shunyun, who was not satisfied with the report, the master artisan fluttered the sentence, "wait!"

Didn't let them wait too long, when Ye Qing received the call, he quickly gave the master artisan welcomed them in the core area of the barren hills.

Quickly tidying up a few hairstyles in the mirror, then Ye Qing ran into the yard.

It happened that five giants were working there to pick up the parts.

"Quickly, he has hidden them in the underground base and shut down the camouflage door."

These gangs of King Kong, although wearing camouflage overalls. If they are, get together, it will definitely cause others to be curious.

There can be no one in the factory, and Ye Qing has pulled four metal experts to make up the number.

Metal specialists, in the eyes of outsiders, are standard adult men with a golden ratio of body shape, who can go to the T-stage in a suit and attract women who like to be cool with their cold and heartless faces.

They were disrupted to the factory, and the car of Wu Shunyun has just arrived at the door.

Ye Qing was a little nervous when he received the phone call. Vice Mayor Wu Shunyun's destination here was not clear to him.

It is reasonable to say that now Vice Mayor Wu Shunyun should arrange for the inspection team to meet the work, and he is too busy to be divided into three parts.

How come to the wilderness of Longxitan?

"Hey Mayor, hello." When the car door opened, Ye Qing walked up to the back seat and looked a little tired, but the man with the gaze in his eyes nodded.

"Hello~ I didn't think Mr. Ye was really young." Wu Shunyun got off the car and shook Ye Qing's hands and smiled. "I have heard the name of Mr. Ye. I have heard it many times. It is just a matter of busy with the construction of urban health civilization before, and I did not invite Mr. Ye to see me."

Usually the more officials there are, the less ordinary people think they should have the shelf.

On the contrary, those who have sesame mung beans and have a three-pointer in their hands like to command orders by their eyes and take tunes with their voices.

It's a matter of personal accomplishment, is like Ye Qing going to the shop to buy a bottle of drink. The shelf is big. Isn't there a pit in his brain?

Ye Qing invited the Vice Mayor to the office and personally prepared him a hot tea.

Wu Shunyun squeezed his eyebrows and raised some eyebrows. Some doubts: "I don't know Mr. Ye. When you built a new factory here, did you find that there was an abnormal situation in the bay here?"

"For example, under the dark springs of the sea, or is there chemical pollution?"

Ye Qing's heart jumped, did he know that he had returned the original sewage road to Jinmei Chemical?

Although that it knows, Ye Qing does not have to worry too much.

The two gongs and drums went against each other to the EPA.

Ye Qing mostly compensated them for their losses, and Tang Jian had bad luck.

However, looking at the Vice Mayor is obviously a guest attitude.

It's not like looking for Ye Qing's responsibility, even if he is looking for responsibility, he doesn't need to come out.

Since it is not because of this, why does he ask about chemical pollution?

[Chapter 212: The equipment is removed](#)

"When I first bought a shipyard here, the water in Longxitan Beach was very poor. The whole bay was so dead that no fish could be found."

"As for as... the dark spring under the sea? There is not, at least I have not seen the phenomenon of seawater surge."

"There is no dark spring under the sea?" Wu Shunyun frowned. "There was a lot of pollution before, so why is the water quality of the bay better?"

"Mr. Ye, there is something in Xiaoping Lake, I think you already know."

"We traced the source of pollution and found Jinmei Chemical."

"They even secretly built a sewage pipeline until here, but we carried out seawater sampling and testing and found that the water quality here has reached the first-class seawater quality standard."

This shameful thing, most of the people in Zhongyun City know.

They took the lead to toss for a full three months, but the result was exchanged for this result.

If you are on the face of a thicker person, there will be a sense of guilt.

Now, Wu Shunyun is somewhat afraid to return to Xiaoping Lake.

In the face of the entire staff involved in the rescue of Xiaoping Lake, he is more and more desperate.

Ye Qing was busy in the assembly shop for the past two days.

Zhongyun TV did not broadcast this.

Ye Qing did not know what happened to Xiaoping Lake.

With the company over the phone communication, several managers will not gossip, and Ye Qing talks about this kind of work-independent things unless Ye Qing takes the initiative to mention.

How can we look at Xiaoping Lake now? What seems to have happened over there?

It seems to be related to Jinmei Chemical...

However, the Vice Mayor is doubtful about the water quality of the bay, and Ye Qing can still answer.

"The water quality of Longxitan Bay is my governance."

Since the deputy mayor did not ask, Ye Qing would not be stupid enough to take the initiative to shake him and Jinmei Chemical's grievances.

"The factory has settled in Longxitan Beach, so I naturally have the responsibility and obligation to maintain the entire ecological environment of Longxitan."

"Our technicians tested the seawater in Longxitan and found that there was a lot of chemical pollution in it."

"So we tailored a strong ionized wastewater treatment according to the chemical composition here..."

Ye Qing couldn't say any more.

Because at this time, the deputy mayor, and the two people wearing the uniforms of the Environmental Protection Agency next to him, all turned into devils.

They are all stunned, and when they open their mouths, they look at themselves.

What's happening here?

Ye Qing remembers that he just looked in the mirror and there is nothing on his face.

Everyone in the office, except Ye Qing, has a huge wave in his heart.

The owner of Longxitan Beach, even said that the polluted seawater in the bay was purified by himself?

"Impossible!" The staff of the Environmental Protection Agency stood up in a hurry:

"The Xiaoping Lake is heavily polluted by chemical wastewater. Longxitan Beach will not be better than Xiaoping Lake."

"This kind of polluted water can't be treated in a few time. It is possible to meet a class of water quality standards."

Wu Shunyun did not speak, but his expression was telling Ye Qing that he and the EPA staff held the same view.

"Nothing is impossible."

Ye Qing asked him strangely: "If I can't do it, why is the water quality of Longxitan Beach, are your inspection find a kind of water quality?"

"That's the bottom of the sea... It has needed a year and a half..." EPA's people have spent on time-lapse and could not say a word.

"Mr. Ye, the sea here at Longxitan Beach, is it really your governance?"

Vice Mayor Wu Shunyun stood up, and some could not control his excitement: "As you can see, we have had big trouble."

"The entire Xiaoping Lake was polluted by the waste smuggled by Jinmei Chemical. We gathered the whole city."

"The relevant technical personnel in the project managed through one day and one night, and the lake in Xiaoping Lake still has not changed much."

"Yes!" Ye Qing admitted that at the same time, his heart was sweating wildly.

"Xiaoping Lake is polluted, it is done by Jinmei Chemical?" Ye Qing said.

"This is this..." Vice Mayor Wu Shunyun was a bit messy, and he suspected that he was in a state of urgency.

Reason tells him that this kind of thing is impossible, or that it is impossible to have a miracle in two days.

Sewage treatment is a difficult problem all over the world. The way is not without misshapen, It takes time.

Even if Ye Qing has better governance, it also needs a longer governance process.

"Vice Mayor, you have to be calm, you have to believe in science."

The people of the Environmental Protection Agency are somewhat anxious, and even if the professional tells them the water in Longxitan Beach had made clearer, it is impossible to make a miracle happen on the other side of Xiaoping Lake.

"How do you tell me to be calm?" Vice Mayor Wu Shunyun clenched his fist: "Three months of hard work, with a high wastage."

"Master Wu, I will go and have someone lift the strong ionization treatment equipment to the truck, and then prepare some metal sheets, and shield the wooden water houses there."

Ye Qing looked at the scene in his mind and was a little chaotic, and he thought that the explanation of his mind was not clear for a while.

Clearly, it is better to let people send the equipment directly.

Listening to the tone of the Vice Mayor, the pollution on Xiaoping Lake is so serious.

The Vice Mayor looking at the door, this face is naturally to be given, then let the strong ionization sewage equipment go.

As soon as they saw the strong ionization equipment, their attention was diverted.

If they refused to greet Ye Qing, it is because they ran outside and looked around.

Two men in iron towers and overalls came out of the warehouse carrying a device they had never seen before.

Then they returned to the warehouse and loaded the old thick sheet metal with a forklift truck.

The truck was gradually filled with bundled metal sheets, and they really couldn't understand what to do with the metal sheets.

This equipment! The EPA people look left and right, there are some observatories in the roof.

It's just a few smaller numbers!

The semicircle is ceramic, and its appearance is milky white.

Seeing this, the staff of the Environmental Protection Agency could not help but shook his head.

What kind of high-tech should it be?

They used to follow the path of ceramic membrane filtration.

The semi-circular ceramic membrane casing is a bit creative.

On the other side of Xiaoping Lake, dozens of sets of ceramic membrane filtration stations are constantly filtering, and the filter tubes have been replaced by a truck.

The electromagnetic generator housing of the strong ionization sewage treatment equipment is indeed made of ceramic, ceramic material produced by powder metallurgy.

Seeing this, the Vice Mayor, Wu Shunyun, did not speak.

Ceramic membrane filtration equipment does have some effect, but...

Do not complain that they have such an idea, Ye Qing said that it is a strong ionization.

However, the non-conductive ceramic material on the outside is easy to associate with the ceramic membrane.

After all, strong ionization evolved sewage; they have never heard of it.

The high pollutant discharge on the equipment is also easy to associate with the filtered water discharge.

"Is there only one such device?"

"Yes, we only have one. The cost of making this kind of equipment is too high, we can't make too much."

"Mr. Ye, thank you for your kindness." Wu Shunyun and Ye Qing shook hands. I wanted to decline Ye Qing's kindness.

At this time the two tower-like strong men on the other side have already prepared the equipment.

Shaking his head, Wu Shunyun and Ye Qing have taken leave and got up and returned to Xiaoping Lake.

Along the way, Wu Shunyun licked his lips and said nothing.

When the two cars passed through the warning belt pulled up by the Environmental Protection Agency and returned to the temporary command office, the truck carrying heavy ionization equipment and metal sheets was also parked next to it.

Followed by monster laborers and a Master Craftsman.

"No, what is this company doing, and even the ceramic membrane filter accessories used are not prepared?"

The staff of the Environmental Protection Agency really did not know what to say.

The Master Craftsman jumped out of the car and ignored the staff of the EPA.

"Let the forklift go to help remove the equipment."

When Wu Shunyun went to check the scene, the staff on the side greeted him.

The same ceramic membrane filtration technology, Wu Shunyun believes that the equipment of the giant beast should be more effective than the edge.

Ordinary filtering equipment can filter out the brown lake water like tea, which should be able to filter the water directly.

Unfortunately, there is only one, if there are hundreds of units, there is still a chance to live.

Yes!

Better than nothing!

All of them have arrived, Wu Shunyun does not want to care too much.

The forklift carefully carried the equipment down.

When the driver asked where to move, the Master Craftsman directly asked him to throw the equipment to the water near the blue river.

The equipment was placed at the request of the Master Craftsman, and he took a lot of hard work and a large group of inexplicable side monster laborers, to the wooden water houses, with a piece of a metal sheet.

Said to be posted, is better to rely on.

A piece of metal sheet rests on the side of the fence of the wooden house and surrounds all the wooden houses.

When the Master Craftsman was nodded, a black car drove quickly.

The car was quite stable, and the mayor Xia Yuming drilled out from the back.

Now his mind is all here at Xiaoping Lake, as long as he has time to run here.

However, the lake, which has basically no change, makes him more and more sinking.

"The report has been typed." Xia Yuming went to Vice Mayor Wu Shunyun and said in a low voice, "But I didn't give an order to send it. As soon as this report is issued, all our efforts in Zhongyun City will disappear."

"Understand that our burden is too heavy, tossing millions of Yuan for three months, but we have to declare failure by ourselves."

"Well, you must all turn your cell phones off, and people go farther away, and all the electrical equipment on the side must be removed."

The master came over and shouted at the busy people.

[Chapter 213: What is the principle?](#)

"That's well, you have all turned your cell phones off, and people are farther away, and all the electrical equipment on the side is completely withdrawn."

The Master Craftsman came over and shouted at the busy people.

The Vice Mayor, Wu Shunyun, asked the Master Craftsman to be responsible for the installation of the equipment.

Therefore, dozens of people went to pile thin metal plates. Although the workers were puzzled, they did the same.

What happens to everyone's who turn their phones on, and why do they have to withdraw all the shore's electrical equipment?

Now there is a circle of ultraviolet light has been set up on the shore, and there are a large number of ceramic membrane filtration stations, which have been set up to clean up at full capacity.

The equipment must stay alone at work. They shouldn't work together.

The workers have a fascinating look at what he really wants to do, all turns off his cell phones and removes the electric devices.

"This is..." Xia Yuming asked Vice Mayor Wu Shunyun, somewhat doubtfully, "Why does he want us to turn off our mobile phones?"

"He's a worker from Monster Heavy Industry. He's here to help us deal with the sewage."

Simply explaining the matter, he could not explain why he had to turn off his cell phone and put metal plates on the water log cabin.

"Because it will affect your mobile phone and electrical appliances." Master Craftsman's expression has not changed much.

Several staff members couldn't help but laugh.

The two mayors were expressionless, and the burden on their shoulders was too heavy to be able to make a smile.

"No, you have this processing equipment, the same ceramic membrane casing, why does it affect the electrical appliances?"

The EPA people are full of fog: "I am sorry, we really do not understand what you mean, for example, using metal plates to blocked those wooden houses."

"We will know when we try." The Master Craftsman carefully walked away in turning his back.

He went directly to the strong ionized sewage treatment equipment, and his fingers were on the operation panel, and he quickly set the working parameters.

The Master Craftsman set up a working range of 50 meters, which is just over a dozen ceramic membrane filtration stations and two rows of ultraviolet radiation lamps.

The power is the strongest, ensuring that all of these people's mobile phones have not to be burned because the Master Craftsman doesn't want to trouble his boss.

These strange arrangements made by the Master Craftsman made many people on the scene curious.

Several staff members of the Environmental Protection Agency had a thick face, and they wanted to see what it was that they thought of ceramic membrane filtration.

The two mayors, Xia Yuming and Wu Shunyun also came over to the Master Craftsman who made such a big battle.

They said that they were curious that it was fake.

When the exquisite master craftsman left the operating table, he put it on the water's edge, and the strong ionization treatment equipment that had been connected to the power cord was lighted up slowly.

"Strong ionization industrial wastewater processor starts!"

"Let's sewage analysis!"

"5%...12%...17%..."

"Can this analyze sewage?" The staff of the Environmental Protection Agency looks at each other.

"Use of spectral detection or micro spectral detection?"

"Re-testing is also ceramic membrane filtration." A staff member whispered in the ear of his colleague:

"I am not biased against this company, but you can see what he is doing, and it is a thin metal plate. Let us Turn off the phone."

"Yeah, there is only one device."

"Be far from a distance, the sewage will be splashed on the body later." The Master Craftsman said when he watched that the audience was too close and that there was only one way to call them back.

Sure enough, the crowd backed off. The sewage and wastes had to kneel when they came, but also to get rid of it.

While chatting, the equipment test was completed.

Cyanide, phenol, arsenic, mercury, cadmium, lead, ketone, ether...

The ionization loading range is fifty meters, and the directional start begins.

Then stood next to the lively people, feeling numb.

The next moment, the original blue-brown polluted water illuminates a circle with a radius of 50 meters.

The light was purple as if the sewage in this area had become a conductor.

"Ah! Discolored?" The staff of the Environmental Protection Agency, who was behind the scenes, opened their eyes: "What is this principle?"

"My mobile phone, how come my mobile phone is out of order?"

A worker took pictures there.

As a result, the screen of the mobile phone jumped as fast as that of the radio current meter.

It seemed to be disturbed by something.

"My mobile phone is also."

The same problem occurred with the other person's mobile phone.

As a result, everyone else took out the mobile phone, and the result was that the same uninterrupted radio wave appeared on the screen.

At this time, they suddenly remembered the things that the Master Craftsman had explained before, and they let the mobile phone off.

Neither of them could bear to watch his mobile phones break down. They immediately put the phone off.

At this time, the lake has a bright purple light that has been lightning-like moving slowly.

"Why don't you drain the purified water?" This is a question for everyone on the scene.

They admit that this device has made a lot of noise and can interfere with their mobile phones.

But the root was connected to the shore, and a large plastic box outlet was placed underneath, and it has not started working yet.

The Vice Mayor, Wu Shunyun, turned his head over, and the inexplicable things that happened in front of him made him a thick shadow.

This device does not treat sewage but emits a wave like a jammer.

He personally ran a trip to Longxitan Beach and got the result in return.

Vice Mayor Wu Shunyun felt that his face was burning and there was a very shameful feeling.

Summer Yuming is also a face of puzzlement: "Monster Heavy Factory I have heard, how can it be so reliable?"

The voice had just dropped, and a drop of the frozen blue-brown semi-solids dropped down the pipe into a large plastic box.

The second drop!

The third drop!

The dripping speed is getting faster and faster, the purple water of the lake, also followed by being enchanted, slowly with a strong purple light gathered together, moving towards the strong ionization equipment.

Soon, the semi-solids discharged from the pipeline were connected into a line.

As more and more semi-solid contaminants accumulate in the box, everyone finds that the lake is covered by purple light and gradually becomes clear.

It is completely clear, and it is different from the brown lake water filtered by the ceramic membrane.

That is to let anyone see, they will feel comfortable and clear.

Just like a lake that has been occupied by duckweed in all its space, picking up a cluster of duckweed will see the original appearance of the lake.

A small spray of water, the original clear water, was stirred and turbid by the waves.

"My God!" Someone screamed with his hands in his temples: "Have you seen it? In the glowing lake, the pollutants were directly sucked out."

Vice Mayor Wu Shunyun and Mayor Xia Yuming felt that the sky was spinning.

[Chapter 214: Its Packed](#)

Vice Mayor Wu Shunyun and Mayor Xia Yuming felt that they faint and that the earth turns.

Of course, they saw that the pollutants seemed to have long legs and slowly ran into the strange equipment, and they were discharged into the prepared box along the pipeline.

It's not their imagination of ceramic membrane filtration, but a magical means they have never heard of.

But why, why is the blue light just not passing N meters, and covering the Blue River.

Not to mention interference with mobile phones, even if the endocrine interferes with them, they are willing.

The range of fifty meters!

Vice Mayor Wu Shunyun and Mayor Xia Yuming quickly calculated how many 50 meters needed to cover the entire Xiaoping Lake.

But some calculations let their hearts cool half.

Strictly speaking, the distance inspection team is only 36 hours in Zhongyun. Water has fluidity and must be purified two times in order to achieve the effect of treating sewage.

Time is too late.

"This... this master!" Mayor Xia Yuming stepped forward and grabbed the arm of the master:

"Do you can you provide more than one of this equipment? We are willing to pay..."

"Quantity!"

As long as there is a quantity, Mayor Xia Yuming feels that there is hope.

The Master Craftsman is still calm: "The manufacturing process of this kind of equipment is too complicated, there is only one."

"You must remove the live devices around you, or they will be affected by ionization."

It's not too difficult to fulfill this requirement.

In fact, the present people know that even if these devices work for another week, they will not be able to handle Xiaoping Lake to their satisfaction.

When the pieces of equipment were taken away, the master artisan was not idle.

Based on the area of Xiaoping Lake, he chose an optimal location to re-arrange the strong ionized sewage treatment equipment.

There are many FRP boats in the lake. The master artisan has picked one and settle the strong ionization equipment on the stern of the ship.

The expert master artisan looked around and confirmed that the entire site had a strong ionization on the condition and reset the startup parameters.

The maximum working range of strong ionization equipment is 2 kilometers, while the area of Xiaoping Lake is 1.4 square kilometers.

There is no doubt that the coverage of strong ionization equipment is a little larger than that of Xiaoping Lake.

The people on the shore are waiting for the purification effect of the 50-meter range.

At this point, let's learn fine and put our mobile phones far away in the office.

However, when the undetectable electromagnetic waves passed through the entire Xiaoping Lake, a scene where everyone was mad at the scene that occurred.

The entire surface of Xiaoping Lake turned into a faint purple light.

The staff of the Environmental Protection Agency has an inconceivable geometric expression on the face that is incredible, lively and ghostly.

The pupil was instantly enlarged to the limit, and the body was stiff like a woodcarving.

What happened just now has given them good science popularization. What do these purple lights stand for?

It was not until this moment that they understood the equipment in front of them, called strong ionization.

Strong!

ionization!

One of the strong things is the core. In the 50-meter range, they thought it was the maximum operating range.

In fact, it was only the lowest threshold of the strong ionization treatment equipment.

The two mayors are more excited than they are, they are eager for miracles, and they have no courage to aspire to miracles.

To be honest, the two mayors have already calculated in their hearts, whether they will be able to hold off until midnight when the inspection team is stationed.

They can drag and drop sewage from Xiaoping Lake at the middle of the night to gain time with this sewage purification equipment.

It's good now, it's covered with purple light across the lake, meaning one step in place...

This layer of purple light is like a gauze thrown by the goddess of fortune.

And the light that slowly gathered together and moved toward the lake boat was the hope of everyone.

The pollutants in the entire Xiaoping Lake water are affected by the invisible ionization.

Their atoms are electrostatically charged and slowly gather together, and the purple light seems to be thicker and thicker.

The long sewage pipelines also began to discharge semi-solid chemical waste.

"Miracle, this is a miracle!" Vice Mayor Wu Shunyun clenched his fists.

His thoughts had already flown to the boundless sea and sailed to Longxitan Beach on the seashore.

Now he finally understands why the water quality of Longxitan Beach is so good.

Looking at the sewage pipe with faster and faster flow rate, Wu Shunyun felt that Xiaoping Lake would definitely be the second Longxitan Beach.

The two mayors and the staff next to them watched a pile of pollutants collected and saw that when Xiaoping Lake became a clear shadow, it received a new order.

"To fully cooperate with the sewage disposal work, immediately dispatch container trucks to transport chemical waste. Also, inform Zhongyun Television Station to report the news to the general public."

"It is said that we have already found a way to govern Xiaoping Lake. Before the inspection team arrives, we will definitely give you a more clear Xiaoping Lake."

After Xia Yuming gave an account, he turned and explained the task of the Vice Mayor:

"We still have one and a half days. During this time, you must firmly grasp this matter, and you must wait until Xiaoping Lake is completely cured before you can relax."

"Mayor is assured that within a day and a half of the decision on success or failure:

"I will do my utmost to grasp this matter and give the Zhongyun City people and the staff a satisfactory answer."

"Are you going to leave Mr. Mayor?"

"Yes~ I have to leave first." When Xia Yuming left, he also took the driver of Wu Shunyun.

"Take me to Longxitan Beach, to that factory." When he got on the car, the summer rain and clouds were shining brightly and happy in his heart.

The biggest contributor to all this is undoubtedly the heavy work that is done by this giant mechanical tool.

It is they who turn the tide and use high-tech equipment to resolve the environmental crisis in Xiaoping Lake.

Xia Yuming decided to go to Longxitan Beach in person and meet Ye Qing.

Half an hour later, Xia Yuming's car stopped at the door of Longxitan's factory.

Ye Qing, who received the news, was shocked. My mayor was coming.

Tension is tense, Ye Qing opened the door appropriately to meet the mayor's car, waiting for the extraordinary figure Zhongyun No. 1 to get off the car.

Ye Qing was trying to step forward, and then her hands stretched over.

Ye Qing didn't expect Xia Yuming to take the initiative to welcome him and grasped Ye Qing's hands.

"Thank you very much, thank you very much. Mr. Ye has not only solved the big trouble for our Zhongyun City but also made an indelible contribution to the image of the urban environment of Zhongyun City."

"The Xiaoping Lake, which is reborn after bathing in the fire, must be the most beautiful scenery line of Zhongyun City." Xia Yuming said kindly.

"Mr. Ye, we can't take it for granted that you are relieving our worries."

"Do you have any requirements, or are there any problems that are not easy to solve?"

"Proposed, I promise on behalf of the leadership team of Zhongyun City, as long as it makes sense, we will help you solve it."

[Chapter 215: The exhibition will be launched](#)

This generous courtesy really made Ye Qing surprise.

In the face of the solemn promise made by the mayor, who tell the truth.

Ye Qing really can't find anything of it at this moment, because he has any difficulties to solve.

The huge heavy work is in progress, and Ye Qing is also wet because of the warmth and the sweat.

It is impossible to ask the mayor to help him get a job!

Looking at Ye Qing thinking, Xia Yuming smiled brightly and said:

"It doesn't matter, this promise has been veritable."

"Mr. Ye, you don't know when the worker of your factory had been open the magical equipment, and light up the whole Xiaoping Lake, we were all excited."

Looking at the mayor's intention of continuing to be a guest, Ye Qing welcomed him into the office and served out hot tea.

"Mr. Ye, I don't know how much the price of such strong ionized sewage equipment."

"Our Zhongyun Municipal Government wants to purchase a batch for the treatment of sewage."

"It's very expensive..." Ye Qing took a sip of tea and said.

"The strong ionization treatment equipment is based on the oppositely charged body, which has the principle of mutual attraction and creates a strong ionization position."

"It charges the atoms of the pollutants. Moving toward the opposite electrical target."

"The price is not a problem!" Xia Yuming erected his ears.

"Working in a hygienic environment has always been an extremely important part of all cities."

"We have absolutely seen the strength of the strong ionization pollution treatment equipment."

"If you put it into the work of urban sanitation, I think any city is willing to introduce this equipment."

The Zhongyun Municipal Government invests a lot of money in environmental protection every year.

If it is only because of the price, this is not a problem at all.

"It's not just the problem of money, the electromagnetic generator of strong ionization equipment is extremely demanding in terms of manufacturing, mainly the magnetic induction module inside."

Ye Qing also understands the outlook of this equipment, but in the case of mass production, The manufacture of strong ionization processing equipment is completely worth the loss.

The magnetic induction module inside has to be imported from the Siemens Co., Ltd.

"Now we haven't tackled the technology of quickly manufacturing the core components inside. This is just an experimental product."

"Of course, it is our without condition duty to contribute to the environmental protection work of Zhongyun City."

Ye Qing thought for a moment and said: "This equipment can be rented for your use. We send a technician to provide technical support."

"Of course, it is our duty to take part to the environmental protection work of Zhongyun City without condition."

"Good!" Xia Yuming nodded quickly and point out the efficiency of this equipment.

"I am afraid that it will not take too long. Zhongyun City can become a key water resource city without any water pollution."

The environment - has always been the face of a city.

And the water source is something that is closely related to life.

If there is much foul-smelling voracity in the city, I am afraid no one will have a good impression of the city.

Of course, the strong ionization treatment equipment is not all-powerful.

It is only suitable for treating sewage.

It is powerless for the common garbage pollution in rivers.

But in the eyes of Xia Yuming, this is enough for Zhongyun City to stand out from many cities.

After communicating the price of renting to the strong ionization equipment, Xia Yuming left with satisfaction.

When Ye Qing went out to take away the mayor at the gate, Xia Yuming wanted to carry out large-scale manufacturing research and development work on the core component of the strong ionization treatment equipment as soon as possible.

Once such equipment can be put into the market, the benefits will be amazing.

Ye Qing promised, but he did not agree.

Strongly ionized magnetic sensing modules and chips require the world's cutting-edge semiconductor technology and integrated electronic circuit technology to support it.

The Monster Factory should be able to count this technology.

Whether it is making a mobile phone or building a computer.

Can punch Apple, pedal Intel.

The gains will be amazing, it is a deep fear for the manufacturing industry around the world.

After the mayor leaves, Ye Qing went to the exhibition hall of the Industrial Park.

It is the venue for the online sales ceremony of the Mechanical Colossus Type I, which is one and a half days away from the time of the event.

The venue is also arranged by the company's staff.

Ye Qing is going to see and prepare the equipment for the work.

The exhibition hall is located at the entrance of the development zone avenue.

The exhibition hall is a well-regulated square, It is a square with moderate rules and regulations, there is no other special feature.

At present, the entire exhibition hall was contracted by Ye Qing, and the main residence is full of guests, the local tyrants.

The dispatched chef came to take charge of the luncheon.

On the way to the exhibition hall, Ye Qing sent a message to the students in the WeChat group, inviting them to participate in the launching ceremony of their products.

Yang Wenjuan: "Research always takes me to fly."

Liu Jian: "Ye Qing, when I was in school, I heard that you opened a factory in your home. I didn't expect the factory to be so big. As I came to Zhongyun. I must go to eat much. "

Li Bin: "Can I bring family members? I talk about a beautiful girlfriend. I want to take her to see the big scene."

"Yes!" When Ye Qing stopped at the traffic lights, he lowered his cell phone and typed, "I have ten tons of petrol."

Fifty-six students were chatting in the group. Ye Qing was scared of fewer people and was not lively enough.

He invited his classmates to gather together for a few tables, everyone gathers together.

Then Ye Qing made red envelopes of 200 Yuan.

Yang Wenjuan receives your red envelope, Jin Chao receives your red envelope, Sun Sisi receives your red envelope, Wang Daoxing receives your red envelope...

There are more people, and after a few minutes, the red envelope has been received, and there are already more than 20 online.

When Ye Qing arrived at the exhibition hall of the park, there were already many college students who all said that they would go to see the big scenes.

Outside the venue, a shocking poster with size has been erected, and a close-up photo of the mechanical giant I, like a dazzling star, was printed on the poster.

Ye Qing looked after the curtain wall of the poster who support the poster.

There were often some small videos on the Internet.

The poster wall was blown down by the wind and it was a screaming picture.

Ye Qing did not want his own exhibition, but also such a flaw.

This curtain wall is still solid, with a stable triangular structure behind it, extending to the background ground, and the nut fixing point is also strong enough.

Wandering inside, Propaganda Department Manager Yang Baihe is carrying a group of girls in the decoration of the lunch area.

Several natural restaurant staff is carefully placing 999 cups of the champagne tower.

"Ye Zong, do you see any need to adjust the scene?" Yang Baihe, who was wearing a ponytail, ran over, her forehead was covered with sweat:

"The souvenir for the guests is also ready."

"It's okay, you will ask someone to clean the front of the booth, and the equipment will come in the afternoon."

Yang Baihe nodded and ran with a touch of faint fragrance.

Ye Qing found a place to sit down and waited for the Mechanical Colossus Type I to enter.

At noon, the hotel sent a working meal.

Ye Qing and the employees had lunch together and waited for a little.

Outside the venue of the exhibition, the sound of high-powered engine roaring sounded.

Qing Yishuier's Heavy Steyr Truck Trailers, behind each trailer a huge Mechanical Colossus Type I with a red belt.

From the vehicles passing by the development zone avenue next to the exhibition, it was almost a collision caused by watching the lively.

It was a vast convoy where could be seen the logo of Monster Heavy Factory was shining in the sunshine.

[Chapter 216: The inspection begins](#)

But machinery, as long as it is large and in large quantities, will certainly attract men's hormones and attention.

These devices, which they had never seen before, were also hung with two large red silk flowers in a vast row, which made them feel like they were going to the front.

The heavy trucks are growing in the square of the exhibition hall. The two giant laborers who came with the car are as precise as the laser range finder.

They parked the Mechanicals Colossus Type I and stopped them in two rows of steel guardians waving in the wind.

Ye Qing chose the eight-shaped platform scheme, wheeled and caterpillar mixing, which is conducive to guests more intuitive appreciation.

In terms of guest invitations, the number of people and the amount of gold are absolutely sufficient.

And there are 21 orders that have been confirmed.

Among them, the construction team of the South Railway Station of the High-speed Railway station applied for financial allocation and ordered five Mechanical Colossus Type I.

The last time the film about Mechanical Colossus Type I, the promotional film there, left an indelible impression on them.

The director Tang directly packed the ticket on the report.

As long as there is five Mechanical Colossus Type I, they can advance the construction period of the South Station by one-third, and ensure that the three railways will be eye-catching.

The remaining sixteen units were ordered by local construction companies.

The Mechanical Colossus Type I, almost attracted local construction companies during the construction of the site.

At a price of 10 million Yuan, they are crazy to rush to the squad, they have to bite their teeth to order at least one.

With this device, they can save money on the purchase of many devices.

For example, large pipe diameter automatic pipe cutting machine, strong boring machine, pipe drawing machine, bulldozer... and so on.

The Mechanical Colossus Type I has too many possibilities, Although it is expensive, it is absolutely worth the money.

On the side of the exhibition hall, when the Mechanical Colossus Type I entered the end of the exhibition hall, the work is about to end at Xiaoping Lake.

Standing on the edge of Xiaoping Lake, Vice Mayor Wu Shunyun opened his eyes and smiled with joy.

The strong ionization sewage treatment equipment, which is located in the center of the lake, has been working for eight hours.

The semi-solid chemical waste discharged from by sewage pipeline has already been filled in the whole temporary transfer warehouse.

The rough calculation is 3,500 tons, which is several hundred tons more than the chemical waste actually smuggled by Jinmei Chemical Company.

More than 95% of the water molecules that are unintentionally brought in and the rest should be the original pollutants in Xiaoping Lake and the nearby Blue River.

Never underestimate 5% of these hundreds of tons.

Nowadays, the water quality of Xiaoping Lake should be exaggerated by anyone.

It is more clear and transparent than before pollution. That is the 5% contribution.

Originally, the water visibility of the lake in Xiaoping Lake was only one meter.

Now, in most places in Xiaoping Lake, you can see from the beach the white sand to the bottom.

The only regret is that the hundreds of thousands of koi carp that were stocked at the beginning were all dead.

Without these koi, Xiaoping Lake is beautiful, but there is no previous anger.

Wu Shunyun's way of solving this problem is very rude. He directly asked the secretary to contact Zhongyun City, three ornamental fish breeding bases for breeding koi, and also very eager to tell the three bosses very proudly that your fish pond was contracted by our government.

Busy time always goes by very fast.

On this day, not only Ye Qing, but also the entire organs and institutions of Zhongyun City are the busiest days.

The next morning at seven o'clock, the calendar turned over toward the new month of the year, the first day of this month is the most important day.

A Boeing 737-900 took off from the airport in the capital of China, 1,600 miles away, when the midsummer sun was hanging high in the sky and cicadas were ringing in the shade.

The fuselage was painted with red auspicious clouds. Most of the passengers inside were ordinary residents of the two cities.

The plane goes directly to Zhongyun Airport. There are two passengers inside the plane with very different identities.

After an hour and a half, the plane arrived at Zhongyun Airport.

When passengers began to pick up their luggage at the luggage turntable, a tall woman in a white skirt and slim shirt came out of the cabin.

Her name is Wu Qianyan, and she is the deputy leader of the inspection team.

Urban Health Civilization Inspection Team has always had a tradition. When it is formally stationed in the city for comprehensive assessment, the deputy team leader will arrive in the city one step ahead of schedule for a surprise inspection.

When the inspection team is stationed, the local government will surely withdraw all the staff used for cleaning, making the city natural, just like in peacetime.

To arrive one step ahead of schedule is the best opportunity to evaluate the image and appearance of the staff of institutions and institutes.

Because the streets are full of government workers!

Following Wu Qianyan, Li Xue, she was a rater in the group. She was holding a camera and holding a tablet computer in her hand, giving people a look like a traveler or job seeker.

At this time, it was clean and immaculate to the airport lobby, and the city propaganda film of Zhongyun City was being broadcast.

The passengers rushing to have a few glances did not even have time, and Wu Qianyan stood under the big screen and looked at it seriously.

The picture is very beautiful aerial photography. The camera is slowly passing along an antique street.

There are many antique signs on both sides of the street. Behind the shops, there is a clear river winding through.

The water of the river is rippling with blue waves, and the picture boat is full of happy-looking tourists, who are there to point out and appreciate the beautiful scenery on the shore poetically.

"This river has been treated with special effects, and it's sparkling." Wu Qianyan was very calm, and the adjacent rater said:

"This should be the scenery of Caiyi Street, the ancient paintings of the sect, Qiu Ying, and the few ladies who left behind are made by the masters of ancient painting circles. They made a big splash here. I heard that there are still 24 female stone carvings on the bridge. It is also from the hands of the masters. We can go and see them later."

The rater, Li Xue, looked it up on the electronic map and whispered, "Caiyi Street is exactly in the same direction as ours. We'll pass there when we go downtown."

Wu Qian nodded and continued to watch the promotional film.

After a few minutes, the promotional film slowly brought the audience's attention to the development of science and technology.

On a construction site full of various engineering equipment, a strange machine that Wu Qianyan had never seen before was quickly pushed into the whole picture.

[The industry is the cornerstone of promoting the development of urban science and technology civilization.]

By the time the slogan fades away, this strange machine slowly opens its sides and has the same arms as the robot in Transformers.

The sound of the gears and the motor were deliberately enlarged.

When the picture was broadcast, even the passengers who passed by in a hurry were temporarily attracted attention.

"This device looks really cool." Sighed the rater Li Xue: "I have never seen an excavator with two robotic arms."

"This is not an excavator, it should be multi-functional construction machinery."

"But I don't know much about mechanical technology. And our team leader will be interested in this."

Wu Qianyan saw the end of the promotional film, then turned his head and said, "Go, let's take a taxi to Caiyi Street."

Fortunately, the taxi driver who had the honor of driving these two rater was a slim, middle-aged man who was very polite to people.

When he heard that he was going to Caiyi Street, he immediately chatted with the two passengers who were inside about the cultural history of Caiyi Street.

The taxi driver's eyebrow dances with flying colors. It seems that he and Qiu Ying participated in the creation process of ladies' pictures, either grinding ink at the side or directing the painting style.

Then chatted and talked, the taxi driver accidentally took an extra detour.

After getting off the airport highway, he accidentally made a detour around the Development Zone Avenue and headed for Caiyi Street from there.

On the way to the traffic lights, the driver who looked around gave a very surprising clap and succeeded in attracting the eyes of two passengers.

"Look, there's a company in the park exhibition hall over there. What's painted on the billboard looks like Transformers."

[Chapter 217: The visitor is the gues](#)

At 9 o'clock in the morning, the Mechanical Colossus Type I of Monster Heavy Industry its product launch conference on time.

Ye Qing specifically invited Zhongyun TV to provide technical assistance during the ceremony.

Ye Qing wants to broadcast the conference live on the official website of Monster Heavy Industry.

This technical assistance, more like a gathering of good friends.

When the product launch conference was held, Ye Qing invited him to be his host.

Doudou also brought in the two masters of Zhongyun TV, Yu Fei, and Wu Xiaoya.

With these two beautiful women, it's too easy to get a set of broadcasting equipment from the TV station and dig out two little cameras to the handheld and take charge of the camera.

Oh, how hot it is!

It is not the warm atmosphere of the guests, but the weather is hot.

In the morning, the employees were squeaky when they were rowing the chairs and putting the name cards, even if they had awnings above them.

Ye Qing asked his employees to contact an ice-making factory in the park and let them send ice cubes to him.

30 kilograms of ice, put some in the guest area, put some on the stand, and cool when the wind blows in.

In the guest area, most of the employees from the company, as well as Ye Qing's business partners, and those customers who are really interested in purchasing the Mechanical Colossus Type I form the main audience of the guest seat.

At the same time, the video playback area on the front page of the official website of Monster Heavy Industry also opened live broadcasting at 9 o'clock on time.

"it has started!"

The mystery is finally coming to light. The pictures of the equipment have been put on for many days.

The excavator party and the robotic party are finally going to have the fight to win or lose the game.

"Happy day! Come and see, live broadcasting begins."

With the screen switching, when a huge poster curtain wall appeared on the screen, many waiting audiences immediately clicked in, and others posted and shouted in the forum.

Doudou stepped onto the stage under the poster curtain wall, broadcast the camera, and immediately focused the lens on her figure.

Long black hair slipped between the chest, and the white neck outlined a beautiful arc.

In a sky blue evening gown who contrasts with the jelly-like smooth skin, and the slender legs are covered under a thin underskirt, making it impossible for the lines to be looming.

Most of the users of the Giants Heavy Industry official website are men, once they are on the stage.

These people type their hands quickly and make a marvelous barrage.

"Good dear guests, good morning, everyone."

"I am Doudou. I am very honored to be invited to cover this conference. I also hope that I can have a wonderful and enjoyable day with all of you here."

"On behalf of all the staff of Monster Heavy Factory, I would like to thank you for taking time out of your busy schedule to attend this product launch conference."

With a charming smile and the light and sweet voice, she attracts the attention of all the people in the field and on the live broadcasting platform.

"I think ... many guests and the audience on the official website must be curious about what kind of products we are going to launch at this press conference?"

With a hand-held microphone, she smiled to the guests and the audience and said:

"Now, let me tell you. What's different about our products?"

"It's called Mechanic Giant I. There's no place on it for persons, that has the same function as the construction machinery we know well."

The guests burst into laughter, and Doudou in the official live broadcasting studio kept talking there.

"Reward ... it depends on what kind of ghost ... open reward function ... ah ... I want to reward the hosts."

"The host is so graceful and young ... but he can't come to the scene ... I'm going to drive my guest to the scene."

"Come with me to Audi r8, which should not be considered as the first crossing in the history."

"Ha-ha-ha-not that I hit you all ... I just want you to see the reality ... Didn't you see that the auditorium was lined with Mechanical Colossus Type I?"

"Twenty-one units, ten million each. Brothers, I think the car costs less than eight million Yuan, so don't go flashy."

The restless crowd was splattered with cold water.

The crowds were thicker-skinned than the walls, and they did not care to lead the topic to other directions.

They also started voting in the forum to let everyone guess whether the Mechanical Colossus Type I is the excavator party or the robotic party.

On the scene of the conference, Ye Qing was holding his shoulders, relying on the corner of the guest table, and some of them were intoxicated to watch the table of the auditorium.

Usually, he saw Doudou was dressed as a girl. Or, she wears whatever clothes only to look good, but Ye Qing still did not expect that she would wear a gown and be beautiful as a princess out of the painting.

Ye Qing stood under the platform and looked at her. On the platform, she also looked up at Ye Qing with affectionate eyes.

Her eyes were shining, and there seemed to be something in them.

Then she flushed to Ye Qing gently and gently stirred her eyebrows like a crescent moon.

Ye Qing was trying to go back. Suddenly, his eyes were blindfolded from behind.

"Guess who I am!" A deliberately suppressed voice reached Ye Qing's ear.

"I guess you? ..." Ye Qing is out of order, at the crucial moment, who the hell is this!

Turning his head, Ye Qing stunned.

Who knows when? ... they stood behind him more than a dozen, as young as him.

There were men and women with long-lost smiles on their faces.

"Li Bin, you scared me." Ye Qing handshake his hand and then hugged him with enthusiasm: "Hola ... Yang Wenjuan, Liu Jian, Jin Chao, you are all here."

"Yes, you've invited us all the group. Of course, we'll come and cheer you on." Jinchao, wearing a brand-new suit, also came to handshake Ye Qing's hands and embraced him warmly.

A total of seven male classmates greeted him and then turned their eyes to the girls who were dressed by the beautiful, Yingying Yanyan.

Ye Qing smiled unwillingly.

"Our Ye, Qing, I want to have a hug with you?" Sun Sisi, who was very popular with male students in the class, smiled and said: "Come here bravely with your arms open Ye Qing!"

Ye Qing scratched his head: "Handshake, shake hands!"

After greeting, Ye Qing invited these college students to go to the guest seat.

He suddenly found that behind the crowd, he also stood two women who he did not know.

The tall woman in a white shirt looks very graceful and long and beautiful at the same time.

The other which was next to the camera and the tablet gave a very quiet little girl feeling.

Ye Qing thought they were invited by Ye Qing's guests.

Ye Qing didn't know them, and now one-third of the guests who sat in the guest seat, Ye Qing did not know them.

"Welcome!" Ye Qing took the initiative to hand out his right hand to greet her, and the visitor was the guest.

The two women were obviously stunned and then hesitated to reach out.

"Please sit inside, this is just the beginning of the conference." Ye Qing said to the two to the guests.

"Hello, my name is Wu Qianyan." ...

[Chapter 218: Noisy](#)

"Hello, my name is Wu Qianyan."

"Hello, my name is Ye Qing." Ye Qing also introduced herself, and he could not guess what the two standing women wanted.

"We are visitors from another place. Sorry, Mr. Ye." Wu Qianyan smiled and said, "We just saw this device on your poster in the promotional film in the airport hall."

"When we took a taxi, the driver deliberately takes us around the long road, so we said to the driver stop here, and by the way, we took a look at this amazing device."

Ye Qing feels that his temperament is very good.

Of course, temperament can't be eaten as a meal.

Should it be slaughtered by the taxi driver or by the taxi driver?

Whether it is an airport or a high-speed rail, it is far from the development zone.

It is not surprising that they choose to get off because they look weak.

"Since you come all the way, you are a guest." Ye Qing could not help admiring the courage of the taxi driver and daring to slaughter the passengers.

"This is an empty taxi on the edge of the main road of the Kaikai District, he's been waiting for at least an hour, he is necessarily waiting. In the outside, solar energy has baked people, so let's take a break and eat some fruit first."

"After a while, our company has a car back to the city, I let them take you both."

Wu Qianyan intended to refuse, she did not know that it was difficult to find a taxi here, as soon as she heard Ye Qing say that, plus the fact that the sun was shining outside, there was not even a sun-shading platform there on the road.

Then she glanced at the guest seats with awnings and refrigerated ice cubes, and the guests on the guests' table with a variety of sliced fruits in the crushed ice.

Wu Qianyan can't find the courage to refuse...

She had to nod and say, "That's all the trouble. Mr. Ye's gracious invitation made me change a lot of ideas about this city."

When Wu Qianyan was given a seat, Ye Qing went to his classmates and talked and laughed about the past.

Wu Qianyan and Li Xue wear more conservative clothes, forehead and ears had hung a fine bead of sweat, when they sat at the guest table, comfortable they did not support not to hum a song.

The guests' seats have been cooled by many ice cubes.

The plastic seats have already become cold and cool and suddenly moved from the fiery outdoor to here cold.

It's just a pleasure for all the world.

A little girl wearing a sunhat quickly came to the front of the two women, placed a clear glass for the two, and poured two glasses of fresh orange juice.

"This is fresh orange juice with ice, please drink it slowly." The little girl smiled sweetly.

Wu Qianyan and Li Xue looked at each other and then nodded and were very satisfied with the hospitality of the company.

On Ye Qing's side, the atmosphere is also very good.

Of the sixteen students, only five were local, the rest are from the subordinate counties of Zhongyun City, who came over to the students who congratulated Ye Qing.

Each of them brought small gifts. Li Bin also brought his girlfriend. As he said, she was a good-looking girl.

Students met, except for some constraints of Ye Qing's identity at the beginning.

After chatting a few words, Ye Qing's free and easy-going feeling, so that they soon returned to the original feeling of the school.

"Originally, Wang Daoxing planned to come, and we all made an appointment. As a result, he was carried back by his leader in the morning."

Jin Chao tilted his head and glanced at Wu Qianyan of the next table from time to time. Then he touched Ye Qing's arm quietly.

"Based on my experience in Zhangzhou County Government Office, I feel that she is like a person in the system, and she has the temperament of leadership."

"She looks like she is two years older than us. Jin Chao, you are quick to talk about where is the leadership temperament in her body?"

Sun Sisi laughed and asked: "I feel she is like us, am I also a leader?"

"Eyes and temperament ... you, only look at people's faces are not beautiful."

Jin Chao said with a depressed voice: "Look at her she talks to her companion around, very relaxed, sitting is also very natural, but there are no fireworks in her eyes. The feeling of anger. Her companion is a little cramped and sitting very well."

"Maybe people are not sure about the executives." Sun Sisi couldn't help looking at Wu Qianyan more.

"I feel a little like it, of course, just like it. Sometimes it's not true." Ye Qing also looked back at Wu Qianyan. Maybe he noticed the sight there. Wu Qianyan gave Ye Qing a gentle nod.

"Well, let's not talk about other people." Ye Qing picked up the cold fresh juice and raised his glass.

"In the morning, there are some product introductions. It's boring for you. When we finish lunch at noon, there will be many wonderful links in the afternoon."

"Haha ... you are jealous of us, we can't bear to go. The host on the stage is so beautiful, and she still looks at us."

"Yang Lily, I just saw her." Liu Jian was a little blushing, and he was embarrassed: "Ye Qing, you are too bad to recruit all the people I secretly loved in those days to the company."

"That's to see us, Mr. Ye!" Sun Sisi's eyes were filled with a smile: "Oh, I wish I could not go back to school, I must be in front of the whole school teachers and students, to confess to General Ye."

"Count me in!" Jin Chao raised the orchid and imitated the feminine voice.

"Roll!" Ye Qing laughed and scolded.

.....

At two o'clock in the afternoon. In Zhongyun Airport.

Mayor Xia Yuming, Vice Mayor Wu Shunyun and the leaders of the major bureaus gathered at the VIP corridor in the airport.

The whole airport is just waiting for it.

The hall is cleaned up to look like a crystal palace, and the floor tiles are shiny enough to be used as mirrors.

“Tower report ... YZ1421 flight has been docked, the tower report...”

Upon hearing this news, everyone subconsciously put up their waist and sorted out their appearance.

Flight YZ1421 is the flight taken by the inspection team.

It has been three months' hard work.

From now on, it is necessary to formally evaluate the results of their work and conduct a trial.

"The last time I was so nervous, it was when my wife was going to divorce me."

Mayor Xia Yuming seldom jokes with them: "Whether we are dragons or insects in Zhongyun depends on this time!"

Five minutes later, at the end of the VIP aisle, there was a crisp tapping sound of leather shoes.

A man in his thirties is definitely worth, a young man took the lead coming out first.

His imposing manner can't be summed up only with spirit, although with a kind of majestic spirit.

His name is Gao Fengming, and he is the patriarch of this inspection team.

Gao Fengming was followed by no less than twenty men and women, each with a straight waist and a stern grin, or with light clouds and breezes.

A group of people from Zhongyun Municipal Government took a deep breath, hung up the most appropriate smile, and greeted them with a smile.

"Hello." Gao Fengming, who was at the front, took the initiative to shake hands with them.

“Hello ... Hello, on behalf of all the people of Zhongyun City, I would like to welcome the members of the inspection team to stay in Zhongyun City with the most sincere enthusiasm.”

Mayor Xia Yuming shook hands with the group members one by one.

Gao Fengming didn't have many expressions.

After simply touching them, he took the lead and walked outside the airport.

The members of the reception team of Zhongyun City carefully stayed next to each other, each playing their own eloquence, and talking with the group members while walking.

Gao Fengming's pace's walk was very fast.

He stopped suddenly when the mayor made a secret gesture to the staff nearby and told them to inform the outside motorcade to be ready to open the door to greet them.

He stopped at the huge LED TV in the hall, where the city promotional film of Zhongyun City was being broadcasted on the TV.

At this time, the promotional film just goes on: [Industry is the cornerstone for promoting the development of urban science and technology civilization].

The Mechanical Colossus Type I, is ranked first in the technology segment.

The entire team also stopped and watched the promo with interest.

Mayor Xia Yuming and Vice Mayor Wu Shunyun breathed a little relief. Since it can be put in the first place, the Mechanical Colossus Type I since it can be placed first has its advantages.

They have long heard that this young team leader attaches great importance to the construction of urban science and technology.

The Mechanical Colossus Type I had really attracted his attention at once. Now they are perfect to win the door.

Gao Fengming's original calm face suddenly changed.

He became a little angry.

"Nonsense!" Gao Fengming issued a stern voice.

The two mayors, who had originally a little delighted, were instantly stunned.

[Chapter 219: Misunderstanding](#)

"Nonsense!"

This word was like thunderbolts from the sky.

The two mayors' expectation of satisfaction did not change, but they have received severe criticism.

It shouldn't be...

If the Propaganda Department of the Municipal Committee has not fully grasped, how dare they regard this scientific and technological machinery and equipment as major propaganda.

They also early heard that the leader Gao Fengming attached great importance to the construction of urban science and technology.

Could it be there any mistake in the rumor?

In fact, he pays more attention to the development of history and culture?

"I can see that the reinforced pile frame is not too tired to be seen by others."

Gao Fengming sternly said: "In the promotional film, there are 32mm ribbed steel bars, a total of twelve."

"These twelve steel bars are welded into the pile frame, and the front end of each steel bar has been repeatedly bent and pressed by the steel bending machine. "

"There are so obvious signs of bending and compression marks, this steel pile frame has been seriously metal fatigue, let alone hydraulic, mechanical equipment, manual pipe bender can bend out."

"Is this a movie or a promotional film?"

The two mayors raised their eyes and looked at them carefully as Gao Fengming, the group leader, said.

Sure enough, they could see the surface of the steel bar at that end, surrounded by a faint grey-white mark.

When the screen jumps to the Mechanical Colossus Type I in the performance of cutting into the polyethylene spiral bellows.

Gao Fengming sneered: "There is a steel pipe interlayer in the polyethylene spiral bellows corrugated pipe."

"Do you think that the traces of the steel pipe will be cut open under the ripples? I can't see the traces of steel pipe cutting in it quietly?"

"Your promotional film is very good, and it's really good to shoot."

"Even the fraudulent means in the film have been used."

"In order to fool us, it must have cost a lot!"

Mayor Xia Yuming and Vice Mayor Wu Shunyun seem to have returned to the side of Xiaoping Lake a few days ago, and they are a mood in a huge panic.

On the other hand, director Yu of the Propaganda Department of the Municipal Party Committee had cold sweats all over his forehead.

The group leader, Gao Fengming's face, was really no much better than that of Xiaoping Lake at that time.

Where is the wrong news? It is clear that the news is too conservative, which seriously underestimated his understanding of urban construction.

After these criticizes, Gao Fengming turned directly and walked quickly outside the airport.

Mayor Xia Yuming and Vice Mayor Wu Shunyun hurried to keep up.

By the way, they kept gesturing to the staff to prepare the outside team.

When everyone gets on the car, the fleet starts.

Mayor Xia Yuming and Vice Mayor Wu Shunyun sat in the back seat, and director Yu of the Propaganda Department of the Municipal Party committee sat in the front, explaining unceasingly in some confusion.

"Mr. Mayor. In fact, it is not what the high-level leader imagined. The promotional film of Mechanical Colossus Type I is under the responsibility of the deputy director of Mi Jiangbei."

"The construction team of Zhongyun TV Station and South Railway Station assists in the shooting."

"I admit that there are a few slightly exaggerated items in the later science and technology promotional films."

"But first, director Mi Jiangbei patted his chest and promised that he will not joke on this kind of thing."

"And Tang, the director of the construction site, has not just applied for a financial allocation to purchase the Mechanical Colossus Type I."

"If its performance is not good, the government will not allocate funds, will not it?"

"Call the high-speed rail South Station." Mayor Xia Yuming clenched his fists against the lower jaw, and his brows wrinkled into a Sichuan character.

Xia Yuming is very confused. Whether it is business cooperation or inspection, the first impression is the most important.

This truth is well known to all women and children!

Last year, a technology company in the United States came over and sold a smart trash can, which is called solar power and can automatically sort garbage.

Even Central Park in Manhattan has been using this.

In this sentence, Xia Yuming strictly forbids all department of Zhongyun City to cooperate with this technology company.

Because last month, he and the mayors of several other cities organized a delegation to participate in the China-Canada Mayor Economic Forum Summit.

After the meeting, they went to Manhattan Central Park to inspect the urban park greening construction.

A similar thing it happened.

Gao Fengming, the team leader who attaches great importance to the construction of urban science and technology, has not even stepped out of the airport and has repeatedly found a lot of confusing things in the construction of science and technology in the promotional films one after another.

The first impression has been made in this way.

What kind of mentality and vision will the high-definition and inspection team below use to check the construction of health and civilization in Zhongyun City?

They think that "in order to fool us, it must have cost a lot!" In this sentence, the two mayors are frightened.

The director of the site of the High-speed Railway South Station is Tang Zheng. He received a fierce call from the director of the Propaganda Department of the Municipal Party Committee.

The director Tang appeared very innocent.

"But the Mechanics Colosse of Type I, we have to use it here the functions of the demonstration have shown it is more practical."

"You may rest assured, Mayor Xia Yuming, that when the five Mechanical Colossus Type I ordered by us arrive, the period of the construction will be advanced by one third."

"I..."

Director Tang hangs up. He really knows what he's talking about.

.....

In the exhibition hall of the Development Zone Avenue, the luncheon held at 11:30 will continue until 1 pm.

After the lunch, there was a break, and the bosses of the local construction companies who came in admiration of the Mechanical Colossus Type I all rushed to both sides of the stage, like matchmakers, surrounded the Mechanical Colossus Type I, and talked about it.

One machine with ten million!

Construction machinery has always been famous for its high price. This construction machinery car is even more expensive and frightening.

The key point is to buy and not pay in installments, only the full amount...

Installment payment must cooperate with the bank. Customers buy a machine and go to the bank to apply for a special loan.

The bank is responsible for approving the customer. If the customer has the purchasing power, the machine will be put down.

The time is too short, Ye Qing has only had time to apply for various patents of the Mechanical Colossus Type I, and special engineering vehicle production licenses, etc., some necessary documents.

In the long run, cooperation with banks can still promote the sales of the Mechanical Colossus Type I.

And adding installment payments does not mean that the behemoth heavy industry can only get the down payment.

It is the full amount, the bank will make up the remaining amount to the manufacturer.

How to transmit it, is the business of the bank and customers.

For the Mechanical Colossus Type I, there are company employees who are introducing these bosses his parametric performance.

On Ye Qing's side, he is with a group of his classmates and chatted at the guest table.

But to Ye Qing's discomfort, there were always some people coming to disturb him.

People who come over, take the initiative to introduce themselves, and hand out the business cards from their pockets.

They are not the boss of a certain company or the general manager of a certain company.

The purpose of handing a business card is very simple.

They want to invite people to take a trip and act as the host for the activities that their company will hold in the future.

These invitations were all politely declined.

Who knows? That the purpose of these companies is not innocent?

When the time went to half-past two, today's product launch conference is about to usher in the most interesting link.

— Product Show!

The Excavator Party and the Robot Party, which are controversial on official websites, are finally going to unravel the mystery.

The two mayors, who had originally a little delighted, were instantly stunned.

[Chapter 220: Shocking Show Begins!](#)

Product display is mainly for those potential customers on the network.

The price of the Mechanical Colossus Type I is expensive, and the entire Zhongyun City can sell 50 units, and Ye Qing can immediately set off firecrackers to celebrate.

The network is different, it faces the whole country.

The customers of mechanical chairs are the first loyal and practical customers that Ye Qing has trained. They are the elites of all walks of life.

It can be predicted that these people will mention this frequently in the future after watching the exhibition of the Mechanical Colossus Type I. Ye Qing has this confidence!

Carry the skirt in your pocket and climb to the central stage again.

At the beginning of the event, Ji Kezhang, the manager of the network department, counted the phone and called on Ye Qing's mobile phone.

"Boss, there's something wrong with the number of live broadcasters!"

"Why isn't it right?" Ye Qing was standing in the background at this time. Two ingenious masters also came.

This exhibition needs all the Mechanical Colossus Type I to work together.

Ye Qing could not find so many experts drivers, so he adopted a more Advanced way.

"The number of people is not right. In the morning, we broadcast live synchronously. There are only 40,000 people in the audience."

"Now the number of people jumped to 170,000 in half an hour, and it is still increasing. I have checked the ownership areas, all over the country,"

Said Ji Kezhang, the manager of the network department.

"And a large number of users registered accounts in the forum, I temporarily changed a set of self-written registration verification codes and found that when they registered, the error rate was very low."

"I am almost certain that all of them are real people, hundreds of thousands of people."

"Will there be mercenaries coming to attack us? and no one will hire a navy army to black us?"

"The CIA is not capable of employing more than 100,000 Navy officers."

Ye Qing was looking at the delicate debugging equipment, some uncertainties and said:

"Not new users can speak half an hour after registration, wait, and see what they say."

Ye Qing has some doubts that these users are brought by someone.

Because during the luncheon tasting the natural kitchen craftsmanship, Doudou, Yu Fei and Wu Xiaoya sat together for a while, then they also opened a live broadcast of the food program.

Ye Qing also used his mobile phone to open the official live broadcasting room to see if the guess was correct.

If not, these people are really likely to be the navy army.

Then they will let the manager of the network department directly count and open the right to prohibit all registered users today.

"The show is about to begin, I am looking forward to it."

"It may be excavation. Didn't you find that there were weedy wastelands on both sides of the exhibition area?"

"Product demonstration, at most two demonstrations, I just looked at the corner, there are two people wearing factory clothes flashing backstage."

"I don't think so. There weren't sixty drivers at all at the scene."

"Override the race!"

"Haha ... Half an hour has passed! Brothers, let's wave the flag and shout for the rhythm."

"My Doudou is so beautiful. She looks so charming in her dress."

"Wait a minute - what the hell are you? Where did you come from? We are a serious mechanical product website. Did you go the wrong way?"

"Let's support Doudou. What the hell are you?"

"It's not interesting to discuss mechanical products. Let's give them a reward."

"How can we not recharge? What are you doing? What are your broken websites? I'm so sorry to show you the machinery. How much is it? I'll buy ten! "

"Go and buy it. The broken machinery in your mouth is not expensive. It's only ten million."

"New brothers, we still have chairs for sale here. That is very cheap. You can buy one."

"..."

The barrage was quiet at once, and then there was a wave of sadness all over the country.

"Tuhao."

"Mom, I want to go home."

"I was hit by a chair."

And so on, they keep brushing.

On the side of the auditorium, the Master Craftsman debugged the equipment and nodded to Ye Qing, indicating that there was no problem.

Ye Qing came out and nodded with a smile as he looked up.

A piece of music, which was becoming more and more exciting, sounded at the press conference at the launch site.

The on-site guests could not help sitting up straight, even the screen on the official website stopped discussing.

The camera lens was pulled away in an instant, focusing on the Mechanical Colossus Type I on both sides of the platform.

"roaring sound."

Just when people were speculating, the far left one of the Mechanical Colossus Type I, launched without warning.

The roar of the diesel generator set instantly caught everyone's attention.

Followed by the other Mechanical Colossus Type I without warning, and then the third, fourth...

The roaring sounded a chain reaction, igniting all the Mechanical Colossus Type I diesel generator sets from left to right.

A total of Twenty-one Mechanical Colossus Type I, the sound of the scene of the music was completely covered, the whole conference site, are buzzing engine roar.

"How do they depend on the drivers?"

"Hell, how did they do it."

"That's called auto-start technology, and my car comes with this feature."

More surprisingly, it's still ahead, after the heat engine has finished in 30 seconds.

Two rows of Mechanical Colossus Type I, with both arms open at the same time.

The guests were exclaimed, and after the Mechanical Colossus Type I opened his arms, he even raised the right arm and neatly greeted the guest seat.

The sound resounded through the sky.

Twenty-one large machines, fully linked up, simply breathe through the rainbow, respecting the most standard etiquette action, but also completely shocked the hearts of all people.

The Mechanical Colossus Type I has no expression, but the audience can still feel the solemn and dignified momentum similar to that of a hundred-war soldier from its rhythm of moving body and lifting right arm.

This is not surprising, because Ye Qing completely intercepted the standard salute action of the Chinese soldiers.

The crowd then stood up and clapped the Mechanical Colossus Type I.

"My God, what is this? relying on it, that says it's a digger and roller to get out."

"This is a robot."

"It has been videotaped, I want to make an expression pack."

"Well done the forum to say, I have here a mechanical chair driver that countless people can't get, I will change him with you."

"Let's ask for one. By the way, I'm so nervous. The opening moves are so cool. Next, I'm going to kneel to watch the live broadcast?"

The audience guessed right. The next scene was even more dazzling.

After the completion of the Mechanical Colossus Type I eye-catching ceremony, 10 of them moved forward in a neat position.

Then there were five, moving forward one position.

Except for Ye Qing and the master artisan, nobody knows what these Mechanical Colossus Type I, who are in a triangular formation, will do.

The guests were breathless, nervous and expectant, ready to welcome the shock from the Mechanical Colossus Type I!
