Chapter 153

The disease was detected! Unfortunately, carcinoma in situ is between benign and malignant, with a high degree of differentiation. The experts invited by Lao Liu are conservative experts. Once the disease is reported as cancer, the surrounding lymph nodes should be cleaned no matter how high the degree of differentiation is.

Although the damage is particularly large, it is safe! Another school is that carcinoma in situ is not cleaned, and observation may need to be combined with radiotherapy and chemotherapy. The advantage is that the damage is small, and the disadvantage is that it is easy to relapse.

If you are a conservative in the Department and your director is a radical, you will die of pain. This is the main reason why doctors have to get a director in the medical industry. The dispute over the medical line is the same as Confucius' killing shaozhengmao. This kind of line dispute is the most cruel and often life and death. One department eventually becomes a faction, and other factions separate, and then everyone is happy!

Start cleaning lymph nodes, experts are very careful, from bottom to top, from top to bottom, can clean will not let go. It's very clean. Generally, in hospitals in the capital, it's time for him to start this kind of operation. The front ones are all done by disciples. Here, he has received money and should pay attention to professional ethics. He does it himself throughout the whole process.

At the end of the operation, the patient was sent to the ICU by the anesthesiologist and itinerant nurse. Lao Li took Zhang Fan and all the doctors in the Department to invite experts to dinner. Of course, this meal was paid by the family, but the family did not attend!

Instead of drinking, the experts ate mutton, beef, horse meat and green vegetables with frontier characteristics. After eating for a while, Lao Liu quickly took the experts to the airport. The car was still a Mercedes Benz found by his family.

The expert left and the operation was finished. The family thanked the experts for not having the opportunity. They didn't meet with the family. They did too many operations and operated on too many people. For ordinary patients, it's just his one-day work. There's no need to think about it!

The expert left. Before leaving, Zhang Fan hurriedly asked, "teacher, what should we do for the follow-up treatment of this patient?"

"Discharge observation! No treatment is required. " This is the advantage of the Conservatives. They do great damage and clean up very quickly. They are not afraid of follow-up! No chemo! This is also an affirmation of self-level.

When Zhang Fan was on the operating table, he saw that others had exquisite skills and mentality. This mentality is not what Zhang fan can master at present. It's too stable! Little by little, no hurry. Mentality without experience, really can't do it! This is what Zhang Fan lacks! Three people walk, there must be my teacher.

Liu Wenli's wife is really a strong woman. When the nurse went out in advance to tell that it was carcinoma in situ and there was no metastasis, other family members cried everywhere. It was a happy cry and a happy cry! His wife dried her tears and hurried to thank the nurse and prepare a red envelope!

The expert is gone, and the rest depends on the local doctor. Although the experts were also invited by the doctors of the municipal hospital, in general, they looked down on the local doctors a little. In order to avoid this embarrassment, her wife made all kinds of preparations! What a heart! Maybe this is the characteristic of primary school teachers!

Lao Liu has a big life and survived! After three days of observation in ICU, he moved into the ward of cardiothoracic surgery. children! wife! They were all around. Their parents didn't dare to let them come. They were covered with pipes. It was too miserable. Maybe it could make the old man angry.

Because the trachea is inserted, I can't speak! Lao Liu touched his son's face and his wife's hand. It's good to live! You can also see the rising sun, accompany your wife and children, and feed your parents! Really good!

As a doctor in charge, Zhang Fan is also interested in this patient. After all, this operation is also a major operation. I make rounds three times a day and haven't dropped it once. Liu Wenli recovered day by day and was able to speak, go to the ground and leave the hospital.

This is really lucky! Early discovery and timely treatment. If we delay for another half a year, the result will not be so happy. When leaving the hospital, Zhang Fan grabbed Liu Wenli's hand and said, "you have also experienced a life and death. Did the God of death say anything to you?"

"Have a cigarette! Death said to me like this! "

"Ha ha! Just understand! " Zhang Fan sent away the bald old Liu. The responsibility of the middle-aged man is again. Dare you die! afraid to! Then protect yourself! When all the responsibilities are completed, go wandering again! Man is always a little child!

Ma Wentao's hospital business is getting better and better awesome. With a good attitude and no queuing, Ma Wentao is ambitious and pays more and more attention to the management of the hospital. Small hospitals have made him very standardized. Combined with the western management model and the characteristics of China, they have specially developed a set of management methods. At present, it seems that the effect is good.

Li Liang is discouraged! Really feel no future! In just one year, there is a suffix behind the entry examination conditions of the municipal hospital, graduate or above! Undergraduates don't want it anymore! His father's relationship can only go to the county level. The municipal hospital has no hope, or go to graduate school!

"Why are you here? What happened?" Li Liang called Lao Chen.

"Director, I came to the city today to see the entry examination conditions of the city hospital. As a result, undergraduates didn't want it!" Li Liang was about to cry. The little fat man struggled for a year. In the end, he didn't even have a chance to compete.

Hey! Step by step, Lao Chen patted Li Liang on the shoulder and didn't know how to comfort him. The current situation of the county hospital is that there is no disease to see, no disease to cure and a good place for the elderly. Where does it cost when you are young? It won't be long before Li Liang can be abandoned in three years!

"Go to sleep first. Your spirit is too poor. I'll call my master in the evening. Let's have a good chat and see if there is any good way."

Now Li Liang meets the situation encountered by Zhang Fan in those years. In those years, the enrollment of universities was expanded, and now the enrollment of postgraduates is expanded. A joke is good. A unit lacks a boiler burning person, so it is required to recruit a graduate student in thermodynamics, who has studied thermodynamics to burn boilers and save coal!

In the afternoon, Zhang Fan came. Li Liang said that Zhang Fan had no choice. This was the requirement of hospital customization. He was a small doctor who had no right to change. The county hospital made a mess of old Zou. Even if he changed his leadership, he would not make any improvement in a few years.

How many years does a person have! Don't tell me to stay and fight! We are all adults who have graduated and worked for several years. Don't make cold jokes! We should know a little about everything in the system, and everything can be accomplished only by the general trend of the times.

At present, the state is vigorously developing key hospitals. You say that you, a resident, stay in the orthopedics department of the county hospital and that you should strive to develop the county hospital. The head doesn't fit!

"What are your plans now? Make a decision when you are young." The three sat together and Zhang Fan

asked.

"I don't want to stay in the county hospital anyway! Brother, please help me see what I should do!" Li Liang knows that he has little knowledge. It can be seen that many people have more knowledge! He doesn't feel shy at all~

"You're still young. It's a pity to go to a private hospital. If you can't, go to graduate school! Anyway, this is the trend of the medical industry. Maybe I will read it too!"

"Well! Even if I study, I finally graduated and got the qualification certificate. It's better to kill me if I go to school again. I really don't want to study, so I want to do my orthopedics well!" Li Liang quickly waved his hand. He knew that he was not the material for reading. It would be better to do well in his current work and make more money if he wasted that time!

"Then follow Lao Chen?"

"Well! I just don't know how the boss is!"

"Lao Chen, you know a little more. Tell me." Zhang Fan said to Lao Chen.

"Well, how to say, boss Ma is a man who does things, and I think he has more ambitious goals, which is OK at present."

"OK, first discuss it with my family. If my family agrees, I'll come here and talk to boss Ma! You are a certified doctor, and now you can do some operations independently. Your income should not be too low."

"Thank you, brother Zhang."

"You're welcome. Just as you are here, Shao Hua will invite you to dinner in the evening. Hot pot bar. Be lively. Which one do you want to eat? I'll book a place now."

"I'd better forget it. I'm in a bad state recently. Don't affect your mood."

"Nonsense, Wang Yanan will go too! Are you going?"

"Well! Go, director Chen, hurry up. I'll wash my hair first!"

"Ha ha!" After all, young people, in addition to work, there are more important things, that is, girls!

This is the first time Shaohua invited everyone as Zhang Fan's girlfriend. Originally, I wanted to invite the old Chen couple alone, but I just wanted to invite them all once again. It's also a formal intervention in Zhang Fan's circle of friends. There are many people to invite.

Xue Fei and Zhou Chengfu, Su Jing from the breast department, Wang Zipeng from the transferred department, Hu Zengxiang from the digestive department, Tang Xiong from cardiothoracic surgery, Wang Yanan, Li Hui and his girlfriend, and Jia SuYue, Shaohua's best friend. Zhang Fan, who hesitated for a long time, finally invited Tang Jingjing. He has been in the urban area for nearly a year. Although he rarely met, he still contacted by SMS occasionally. It happened that she was studying in the city recently and was going to be promoted!

These are young colleagues and friends who are close to Zhang Fan. The treat was a chain of little fat sheep hot pot, which asked for a big box. Apart from Lao Chen and his wife, others are young people. Soon they became familiar with each other.

For more than half a year, Zhang Fan and Shaohua have come together. Jia SuYue is surprised by this result. She always feels that the rustic Zhang Fan is not worthy of her best friend, but Shaohua is willing, and she has nothing to say.

Tang Jingjing has been promoted. After several years of service, he has received the deputy director of the economic and Trade Bureau, which is also a fat job. And with her professional counterpart, the future is bright. She knew Zhang Fan's ability and made friends deliberately. She had a meal. After receiving Zhang Fan's call, she directly pushed the front meal.

Shaohua toasts everyone as a hostess. The generous Shaohua is better than Zhang Fanqiang in interpersonal communication. Zhang Fan is OK in private. If he really wants to speak on the table and doesn't let him speak professionally, it's still a little difficult for him.

The dinner was very lively and the atmosphere was very good. Wang Yanan bullied Xue Fei and Zhou Chengfu in the first Department of orthopedics! She is a girl, and she looks good. In addition, there is an uncle of the health bureau who often rob their patients. She is not for money, but to improve the operation. It's just that the technique is a little rough. It's not as round as Zhang Fan's.

They seized the opportunity to run Wang Yanan with words and poured a lot of glasses of wine to Wang Yanan. Li Liang had no chance to enter the municipal hospital. The former teacher could also let go. They bravely stopped Wang Yanan from drinking, but they didn't know whether there was any result in the end.

Jia SuYue had a good chat with Tang Jingjing. They came from the same family background. Tang Jingjing has a high EQ, and now they work in the urban area. They have to deal with people in all aspects. In a few words, they can understand Jia SuYue's family background. So they talked well.

Li Hui is now much more stable and wants to be a father. He seems to have suddenly grown up. He is calm and takes care of his girlfriend from beginning to end. He is not greedy for wine.

The elder martial sister holds Shaohua's hand. She likes this younger martial brother very much. She loves Wu and Wu, and is also very good to Shaohua.

Although Lao Chen is the oldest, he will always be the back of Zhang Fan. Someone wants to fill Zhang Fan. He's here! Zhang Fan wants a toast. He helps him drink! The people Zhang Fan helped inadvertently in those years really reported to Zhang Fan Yongquan. Regardless of his age, he took good care of Zhang Fan!

At the end of the meal, Zhang Fan drank a glass of wine with Lao Chen alone, the only glass of wine in the meal! This big disciple really moved Zhang Fan! A man's persistence! return!
