

Madam's 1901

Chapter 1901 - 1901 I'm Done!

He was the first to start, and his behavior was standardized and methodical, attracting the attention of several laboratory heads.

"Who's that?" The person in charge of the Level 2 laboratory asked.

The person in charge of the Level 1 laboratory clearly knew the list of members for this recruitment assessment better. He glanced at Ji Hongfeng and said softly with a smile, "He's from the Ji family."

"Oh, no wonder." The person in charge of the Level 2 laboratory looked enlightened and gradually retracted his gaze.

The resources in the hands of the three big families of the Independent Continent were no small matter. The people from these families had a much higher starting point than others.

It was not surprising that Ji Hongfeng could immediately determine the experimental project he could do and immediately take action.

After he retracted his gaze, he remembered something. He looked at the people who were conducting experiments in full swing below the lecture theater. He looked around and said curiously, "I remember that someone scored full marks yesterday. Which experiment table is that person at? This is the first time I've heard of a person scoring full marks in the first round of our assessment. What's her name? I remember it's a girl."

Zhou Zhou had never participated in their conversation, but now, she was in high spirits and interrupted them. "Her name is Qiao Nian."

"Qiao Nian?" The person repeated the name awkwardly and then looked around. "Which experiment table is she at?"

Zhou Zhou told him the experiment table number, and he immediately looked in that direction.

He thought that he would see someone who had already begun to prepare methodically like Ji Hongfeng. Unexpectedly, when he looked over with curiosity and anticipation, he only saw the girl standing there casually, still flipping through the experiment questions.

He was stunned.

But he couldn't say anything. He looked away and only said, "Let's wait for the results."

The two-and-a-half-hour simulation experiment was not long. Many people might not even be able to complete one simulation experiment.

As it was a simulation experiment, it was not really a real experiment.

The experiment table only let them try the steps of the early experiment. In fact, the reaction experiment was completed by computer simulation.

Of course, technology was advanced now, and the computer could roughly determine the results of an experiment. The heads of the various laboratories could judge the completion of the experiment through this result.

Ji Hongfeng was tense the entire time and sped up.

He first set up a simple experimental instrument on the experiment table and went through the process to get the experimental data. Then, he operated the simulated experiment app on the computer and entered the process and data he had gone through previously, waiting for the results.

He was very nervous during the entire process. His heart was beating very fast, worried that before he could finish, the girl would have finished hers first like last time.

Fortunately, the results of the simulation on the computer were out, and he did not hear anyone say they were done.

Ji Hongfeng briefly checked his experimental steps. After confirming that there was no problem, he immediately called out, "Teachers, I'm done."

The lecture theater had been very quiet. Even the person in charge of the Level 2 laboratory, who had chatted a little previously, slowly shut up and became alert.

His loud shout at this time was enough to shock the entire lecture theater. magic

Zhou Zhou looked at the time on her watch. There were still 26 minutes before the end of the assessment. Ji Hongfeng completed his assessment early.

Chapter 1902 - 1902 The Spot for the Research Institute Is Basically Set

She frowned and looked at the experiment table in the left corner of the last row.

As Ji Hongfeng had completed his task in advance, it caused quite a commotion in the lecture theater. Many people who were busy with the experimental test looked in his direction.

Only Qiao Nian did not look up the entire time. She was holding a test tube in her hand and conducting the reagent reaction experiment at a moderate speed. magic

Zhou Zhou was stunned. She couldn't figure out what this big boss was thinking.

Ji Hongfeng had completed the assessment in advance. Wasn't she the least bit anxious?

Zhou Zhou looked over from afar. The girl's eyes were cold as she focused on the reagent reaction. Her face was expressionless as she was completely immersed in the experiment.

Not to mention anxious, Zhou Zhou did not even see any... interest on that face.

She began to suspect that Qiao Nian might not have heard Ji Hongfeng.

If someone completed the simulation experiment in advance, a teacher would definitely check the level and completion rate of the experiment.

“I’ll go.” The person in charge of the Level 2 laboratory thought highly of Ji Hongfeng and felt that he was a talented person. Thus, he took the initiative to speak.

The others had no objections. He took the lead and the few laboratory heads walked over.

Ji Hongfeng moved aside to let them examine the experiment table.

Without another word, the person in charge of the Level 2 laboratory operated the mouse and checked the experimental data.

Soon, he realized that Ji Hongfeng had chosen to do a Level 5 experiment question. He was surprised.

“You did a Level 5 experiment?”

He lowered his voice so as not to disturb the others who were still doing the simulation experimental exam.

However, the people at the experiment tables around Ji Hongfeng still heard it.

The lecture theater was in an uproar again.

“Ji Hongfeng did a Level 5 experiment...”

“It’s actually a Level 5 experiment.”

“It’s over...”

Ji Hongfeng had gotten second place in the first round of the theoretical assessment. He was only a dozen points lower than Qiao Nian and had a higher score than the others.

If he scored high in the second round of the assessment, what else would they compete for?

The spot to enter the research institute this year had basically been decided internally!

Some people were flustered and hurriedly knocked over their test tubes.

Some people gradually stopped their simulation experiments on the computer.

Everyone in the lecture theater waited nervously for the final results of the laboratory heads...

If Ji Hongfeng's experiment completion rate was high, there was no need for them to continue.

Zhou Zhou's heart skipped a beat when she heard him say that Ji Hongfeng had done a Level 5 experiment. She was worried for Qiao Nian.

Soon, the person in charge of the Level 2 laboratory finished checking the simulated experiment data on Ji Hongfeng's computer. He pursed his lips tightly and could not hide his admiration. He glanced at the tall boy standing at the side and turned around to explain the final results to the few laboratory heads.

"His completion rate is about 78%. The experiment was done very well and is relatively complete. Do you want to check again?"

The few laboratory heads did not expect Ji Hongfeng to not only complete the Level 5 experiment but also reach a completion rate of 78%.

Although this completion rate was not as high as Ji Ziyin's 80% completion rate back then, it was almost the same. He was only 2% away.

It could be seen that Ji Hongfeng was not bad!

After all, how many people could be called the once-in-a-century genius of the Ji family?

Ji Ziyin's talent was a cheat given by the heavens. It was already very shocking that Ji Hongfeng could do a 70% completion rate experiment at his age.

Chapter 1903 - 1903 Sister Nian Completed the Experiment in the Last Two Seconds

Not only did the others in the lecture theater think that the spot to enter the research institute this year had been decided, but even the few laboratory heads thought the same.

Zhou Zhou frowned and looked at the last row.

It was so noisy and lively in front. magic

However, the person in the last row did not seem to hear them and did not look in their direction.

Her heart was racing. She pursed her lips and said to the others in a low voice, "There's still 20 minutes. Let's wait a little longer."

The person in charge of the Level 2 laboratory glanced at her. He wanted to say something but hesitated. In the end, he did not say anything and only nodded. "That's true. There's still time. Let's wait a little longer. Perhaps someone else will complete their experiment."

In the past, about five to six people who entered the second round of the simulation test could complete the experiment.

This year, compared to before, more than a dozen people entered the second round. They estimated that about three to four people could complete the experiment.

With a gem like Ji Hongfeng in front of them, most people felt that it was impossible for a miracle to happen again.

However, according to the rules of the research institute, there was still time, which meant that the assessment was not over yet. It was not good for them to leave early.

People continued their experiments for the next 20 minutes.

Just as the laboratory heads had estimated, about four people completed their experiments.

Time was ticking away.

Ji Hongfeng was the first to complete it, but he was not in a hurry to go out. Instead, he cleaned up his experiment table and waited for Qiao Nian's results.

Initially, he thought that Qiao Nian was not faster than him. At the very least, she would be the second or third person to complete the experiment. Unexpectedly, after waiting for so long, the girl still did not finish it.

She didn't seem to be done yet.

For a moment, Ji Hongfeng could not figure out if Qiao Nian had not finished it or if she did not know how to do it at all.

...

Time passed in a flash. There was still a minute before the assessment ended.

Some of the people in the lecture theater who had not finished their experiments had already given up struggling and were dejected.

Zhou Zhou couldn't hold it in anymore and kept looking at the time.

She watched as the seconds turned half a circle and the other people in charge began to pack. Her expression was solemn and her nerves were tense.

There were only 10 seconds left.

Zhou Zhou's heart was beating so fast that she thought she was about to die.

Ji Hongfeng also began to pack his things. His doubts dissipated, and his handsome face revealed a determined expression. The corners of his mouth had already begun to curl up.

The last five seconds.

Even the few unwilling people looked at the time and chose to give up. They looked around to see who had not given up and saw Qiao Nian in the corner.

"Why is she still doing it?"

"It's almost time. It's useless for her to continue. Why bother?"

"Maybe she's indignant. After all, she got such good results in the first round. She's probably unwilling to fall apart in the second round."

"It's almost time."

...

Just as there was a commotion in the lecture theater, the girl hit the Enter key and her hands left the keyboard. She picked up her baseball cap on the experiment table and put it on. Then, she said very casually, "Teacher, I'm done."

There were only two seconds left until the end of the assessment. The second and minute hands were about to overlap. The girl's voice in the lecture theater seemed so sudden, like a thunderclap, causing everyone who was already prepared to leave to stop.

Her experiment... was completed?

Chapter 1904 - 1904 Face Slap, Level 8 Experiment!

Zhou Zhou had picked up her things and was preparing to go back with the few laboratory heads before comforting Qiao Nian.

But now, she suddenly turned around and saw the calm person standing there. Her eyelids twitched violently, and she only wanted to give her a thumbs up and say, "What a show-off!"

However, now was not the time to do this. Zhou Zhou quickly put down her things and said to the other people in charge, who had yet to react to Qiao Nian's coquettish actions, "Ahem, I'll go over and take a look."

The others followed after a moment of shock.

This kind of step-by-step completion experiment was usually done in Level 1 or Level 2 simulation experiments. It was the kind of situation where the standard was not high and could only be completed in a specified time...

If not for the fact that Qiao Nian's results in the first round of assessment were too heaven-defying, not many of the people in charge would be willing to stay.

In the end, they asked Zhou Zhou to take a look alone and give her a score.

However, although they did not have much hope and did not think that Qiao Nian could make a comeback, they were still interested in seeing the result.

“Please make way. Let me see your experiment completion rate.”

Zhou Zhou was quite good at pretending to be unfamiliar with her in front of others. She spoke politely as if she was doing business and they didn’t know each other. magic

Qiao Nian moved aside to give up her seat.

She walked over and operated the mouse with one hand. Then, she asked casually, “What level of experimental questions did you do?”

God knew that Zhou Zhou was just asking casually. She didn’t know what level Qiao Nian could reach previously.

Unexpectedly, the girl raised her eyelids and replied casually with a pair of deep black eyes, “Level 8.”

“What?” Zhou Zhou’s hand trembled as she held the mouse. She suddenly turned to look at her and was so shocked that she blurted out a common catchphrase.

She was causing trouble!

Qiao Nian calmly met her eyes. “Yes, Level 8.”

No one in the lecture theater left.

The girl’s lazy “Level 8” was enough to make the noise louder than Ji Hongfeng’s earlier completion of a Level 5 experiment.

The entire lecture theater was about to explode.

“Is my ear damaged? I f*cking heard her say Level 8...” Someone was so shocked that his jaw was about to drop.

The person beside him replied faintly, "What a coincidence. I'm in the same situation as you. My ears are damaged. I heard it too! Level 8."

Ji Hongfeng loosened his grip and the item in his hand slipped onto the experiment table, making a clear clink.

However, no one noticed it.

Everyone was looking in Qiao Nian's direction.

If not for the fact that the heads of the few laboratories were all there, they might have gone over to take a look. At the very least, they would have surrounded that place...

Level 8 was ridiculous!

Back then, Ji Ziyin, who was known as a genius, did not dare to touch simulation experiment questions above Level 5. Picking a Level 5 question caused a sensation.

They could almost imagine that once today's Level 8 experiment completion was released, the history of the Independent Continent's First Research Institute would change.

"Level 8 experiment..." Ji Hongfeng's face was pale as he clenched his fists tightly. His nails dug into his flesh, but he did not feel any pain.

His mind went blank as his blood surged to the top of his head. His breathing also grew unstable.

Zhou Zhou soon calmed down and began to seriously check the data of the simulation experiment on Qiao Nian's computer.

The simulation experiment on the computer was similar to a real experiment. Every step could be seen, as well as experimental data.

Chapter 1905 - 1905 This Is Definitely a Crushing Result!

She checked it very seriously.

It was mainly because, under such circumstances, she couldn't help but be serious.

Everyone was waiting for the results!

This time, Zhou Zhou took 15 minutes to check it. Then, she straightened her back, looked away from the computer screen, and immediately spoke.

"Leader Zhou, how is it?" The person in charge of the Level 2 laboratory hurriedly asked her for the results.

The others also paid close attention to her.

Even Ji Ziyin's mentor, Gu Hengbo, the person in charge of the Level 5 laboratory, had a serious expression as he quietly waited for Zhou Zhou to finish checking the final results.

"She completed the experiment. The completion rate is 98%."

It was very difficult to obtain a 100% completion rate for simulation experiments. 98% was already the completion rate of a god.

Even Zhou Zhou did not dare to say that she could achieve a high completion rate of 98% with a computer.

Otherwise, when Ji Ziyin obtained an 80% completion rate and Ji Hongfeng obtained a 78% completion rate, no one would be amazed by their talent.

Qiao Nian had chosen the most difficult experiment, but she had obtained the highest completion rate!

98%!

This completion rate could completely make her a god!

“98% completion. The remaining 2% completion is deducted from some practical experimental operating standards. She might not have practical experience, so I deducted 2% of the completion rate.”

Zhou Zhou’s voice was trembling, dry and slow.

She made it clear.

According to the completion rate of the experiment, Qiao Nian could be said to have completed this Level 8 experiment at 100%.

It was just not perfect in some small details.

She was perfect in a single round of experiments!

“Let me take a look.” Gu Hengbo, who had been silent all this while, suddenly spoke.

Zhou Zhou gave up her seat indifferently. She was not afraid of his follow-up because she was not biased toward Qiao Nian. In fact, as this person was Qiao Nian, she was actually stricter.

Usually, under such circumstances, most people would choose not to deduct points and directly give her a 100% completion rate.

Gu Hengbo took a little longer than Zhou Zhou. He used almost 20 minutes to check the simulation experiment on the computer.

20 minutes later.

He moved aside solemnly and looked at the others waiting for his conclusion. He pursed his lips and said softly, "I think I can give you a 100% completion rate."

He was the highest-ranking person among the few people present and represented the First Research Institute's authority.

And he had already said that.

There was a strange silence in the lecture theater.

Then, everyone came back to their senses and looked at each other. Then, a discussion erupted.

"100% completion? Level 8 experiment?!"

"F*ck!"

"I'm convinced. I didn't lose in vain this time."

"Am I witnessing history?" magic

"Everyone says that Ji Ziyin is a rare genius. Qiao Nian is a f*cking genius! The Nan family indeed won't let just anyone participate in the assessment. She's a genius."

Someone murmured softly.

"I heard that she even went through systematic learning. In the future, when she enters the research institute, she'll systematically learn from the heads of the various laboratories. How impressive will that be?"

“Ji Ziyin broke through to Level 1 in three years. She might only need a year, right?”

The lecture theater was filled with noisy discussions. Everyone had forgotten that Ji Hongfeng had completed the Level 5 experimental simulation question and obtained a 78% completion rate.

After all, there was no comparison between Ji Hongfeng’s Level 5 experiment with a 78% completion rate and Qiao Nian’s Level 8 experiment with a 100% completion rate.

This was definitely a crushing outcome!

Chapter 1906 - 1906 Looking at the First Place in the First Row

A group of people was waiting outside the First Research Institute.

Ji Ziyin, He Lin, and Ji Xiao were all there. A large group of people was waiting for the results of the assessment.

“Why is it so slow?” Ji Xiao looked at his watch a few times and finally couldn’t help but get up from his seat. He walked to the entrance of the aisle and craned his neck to take a look.

There was no sign of anyone coming out yet.

He turned back and said to Ji Ziyin with an annoyed expression, “Usually, the assessment would have ended long ago at this time. It’s been more than half an hour, but no one came out. What’s going on?”

Ji Ziyin was also looking at the time.

She wasn’t wearing a watch, so she looked at the time on the quartz clock hanging on the wall.

The hour and minute hand on the quartz clock had long passed the intersection point. It was already 12:35 PM.

She remembered very clearly that the second round of assessment should end at 12:00 PM. In other words, 35 minutes had passed since the end of the assessment.

35 minutes had passed, but no one came out.

Ji Ziyin pursed her red lips tightly. Unable to hold it in anymore, she stood up and picked up her phone to call someone she knew to ask about the situation inside.

She had yet to make the call when there was a commotion in the lounge.

Someone said loudly, "The results of the assessment are out!"

"The results are out? Where?"

"The results are finally out! I thought something unexpected had happened inside. Otherwise, why didn't anyone come out? The results haven't been announced for a long time."

Everyone looked at the scrolling screen.

The results were finally announced after 40 minutes.

This time, only 29 people participated in the second round of assessment, and the results were announced quickly.

According to the old rules, the 21st to 29th place came out first. magic

Ji Ziyin was not interested in the low rankings and only looked up routinely.

Soon, the scrolling screen updated to display those in 11th to 20th place.

Similarly, Qiao Nian's name was not on this ranking, nor was Ji Hongfeng's name. Obviously, the two of them had entered the top ten.

Seeing that Qiao Nian's name was not among the 11th to 20th place, Ji Xiao looked up in surprise and said in a low voice, "That Qiao Nian entered the top ten?"

He Lin was also paying close attention to the rankings and saw that Qiao Nian was not in the rankings behind.

He was a little calmer than yesterday but also very excited and nervous. However, he almost couldn't hold it in like yesterday.

He was mentally prepared today.

Therefore, when he saw that Qiao Nian's name was not in the 11th to 20th place on the rolling screen, although he was very nervous, he did not show it on his face.

"She seems to have entered the top ten." Ji Ziyin stared at the rolling screen expressionlessly and answered Ji Xiao's question.

Ji Xiao pursed his lips as he looked at the scrolling screen. He began to feel nervous.

In the first round, only Qiao Nian and Xie Yu's results qualified to compete with Ji Hongfeng for a spot in the research institute. As long as these two people's results in the second round were inferior to his, Ji Hongfeng would be able to enter.

However, he was very unlucky. Qiao Nian and Xie Yu seemed to have entered the top ten.

Whether Ji Hongfeng could successfully obtain the qualifications to enter the research institute became uncertain.

A few seconds later.

The scrolling screen refreshed again.

According to the previous rules, the results would be released directly this time. It would be different from the first round where they had to wait and verify again.

Ji Ziyin's eyes darkened as she waited for the final results.

As soon as the scrolling screen was refreshed, she saw the first ranking in the first row.

Chapter 1907 - 1907 Such Heaven-Defying Results Were Actually Overshadowed

She thought that Ji Hongfeng's first place was almost certain this time.

Unexpectedly, upon a closer look, she saw that the first ranking in the first row was written—1st place, Qiao Nian!

The results column behind the first place name was still blank. It had not been announced at all. magic

Ji Ziyin suppressed her shock and forced herself to look down. Second place was Ji Hongfeng. The results column behind his name was not empty. Instead, it filled in the experiment level and completion rate like before.

"The second place did a Level 5 experiment with a 78% completion rate? Damn, what experiment level did the first place do? What was the completion rate?"

"Second place did a Level 5 experiment? Are the candidates so good this year?"

"Why is the first place's results column blank?"

“Has this happened before?”

Someone answered him, “I’ve never heard of it. In the past, the results were always announced at once. I’ve never heard of anyone suppressing the results and not making them public.”

“Why did the research institute make an exception this time? What’s going on?”

The lounge was filled with noisy discussion. These discussions were basically focused on Qiao Nian and Ji Hongfeng.

There was no doubt about Ji Hongfeng’s results. A 78% completion rate for a Level 5 experiment was already very heaven-defying.

However, such a heaven-defying result was suppressed by someone.

Everyone was more curious about how heaven-defying the result of the first place was. It could make the First Research Institute choose not to make it public.

“Qiao Nian got first place?” Ji Xiao couldn’t believe his eyes. His face was filled with shock as he looked at the rolling screen. “What’s wrong with her? Was there a mistake?”

He Lin did not expect Qiao Nian’s name to be firmly at the top. He had never dreamed of it.

He Lin also turned to speak to Ji Ziyin. “Miss Ji, why haven’t the results of the first place been announced? Do you know what’s going on?”

Ji Ziyin opened her mouth, but nothing came out.

Ji Hongfeng had yet to come out. How could she know what was going on inside?!

Ji Ziyin took a deep breath and said with a solemn expression, “I’ll call and ask.”

Ji Ziyin took her cell phone and walked away to make a call.

She was also from the First Research Institute. These people outside did not have the means to inquire about internal information, but she had her own connections and ways.

After a while, Ji Ziyin found out about the results of the first place in the second round this year.

“What?!”

The lounge was filled with people. Everyone was still discussing the results this time.

Ji Ziyin’s sudden shout caused everyone’s eyes to focus on her.

Ji Ziyin was quite famous on the Independent Continent. Someone recognized her and whispered to his companion who she was.

He Lin frowned and walked over. Seeing Ji Ziyin’s pale face, he couldn’t help but ask her, “Miss Ji, what’s wrong?”

Ji Ziyin hurriedly hung up the phone and met his curious gaze. She stood rooted to the ground, her eyes blank. She couldn’t recover for a long time. “I asked about the first place’s results.”

“What experiment level did she do?” He Lin’s eyes lit up. He immediately grabbed her shoulder, clearly concerned.

Ji Ziyin’s expression was very complicated. She looked at him and hesitated, then pursed her lips and finally said with difficulty, “Level 8.”

Many people were paying attention to her. When she said that she had found out the first place’s results, they anxiously waited to hear what she would say next.

Chapter 1908 - 1908 Face Slap, She Represents the Nan Family!

When Ji Ziyin revealed Qiao Nian's results, the lounge exploded like the previous lecture theater.

It was like a drop of water falling into a pot of boiling oil. Everyone talked at once.

"Damn! Level 8!" magic

"I suspected a Level 6 experiment, but I didn't expect her to do the most difficult Level 8 experiment. I'm going crazy."

"Oh my god, it's actually a Level 8 experiment."

...

He Lin was also shocked and numb. "Qiao Nian did a Level 8 experiment?"

Ji Ziyin took a deep breath and looked at him again. Her next words gave He Lin an even greater shock. "It's said that she obtained a 100% completion rate."

A Level 8 experiment with a 100% completion rate. What kind of outcome was this?!

The First Research Institute had never produced such a heaven-defying result.

He Lin was so surprised that his hands trembled. He instantly understood why the First Research Institute did not announce Qiao Nian's results.

A person who had not undergone any systematic learning could already complete Level 8 experimental simulation questions and obtain a completion rate of 100%...

This was an absolute genius!

It was fine if such a hidden genius did not appear, but once others found out, it would be an existence that would shake the entire Independent Continent.

No wonder even the First Research Institute had to cover up her results.

“She actually has such talent.” The muscles on He Lin’s face trembled, and his excited eyes burst out with a fanatical light. He couldn’t hide his excitement at all.

She was from the Ji family.

A direct descendant of the Ji family!

Ji Ziyin instantly pulled him to the bottom of the valley. “That’s right. I didn’t expect her to have such talent. The Nan family will benefit from the spot to enter the research institute this year.”

“The Nan family benefited?” He Lin was stunned from extreme ecstasy and looked at her.

With Ji Hongfeng’s results, he would have definitely entered the First Research Institute in the past. However, he returned in defeat this time. It was more or less upsetting.

He Lin was not only upset. His heart, liver, spleen, lungs, kidneys, and internal organs were almost squeezed together. He could not accept reality at all.

He was so happy just now that he completely forgot that Qiao Nian represented the Nan family, not the Ji family!

He Lin felt as if he had fallen from heaven to hell. The strong sense of loss made him feel even worse than Qiao Nian’s results from the first round of assessment.

Such a genius was clearly from the Ji family, and she was even a direct descendant.

At this moment, the Ji family should be enjoying the glory.

In the end, it became the Nan family's glory!

In the lounge, everyone was talking about the first place's heaven-defying results.

Some people were discussing Qiao Nian's results, and naturally, some people mentioned the Nan family that Qiao Nian represented this time. Their words were filled with admiration and respect for them.

Every word was like a sarcastic knife cutting He Lin's heart. His heart bled.

Not caring less about Ji Hongfeng, who had yet to come out, he said in a hurry, "I suddenly remembered that I still have something to do. Miss Ji, wait here. I'll leave first."

* *

Ten minutes later.

Qiao Nian left the lecture theater.

She had to pack her things, so she was the last to leave.

As soon as she left the lecture theater, the few laboratory heads sighed. "I'm afraid this year's recruitment assessment will be recorded in history..."

Chapter 1909 - 1909 Showing the Results to the Other People in Charge

The one speaking was the person in charge of the Level 2 laboratory. Previously, he was more optimistic about Ji Hongfeng getting a spot in the research institute.

He even especially led the way to examine his simulation experiment results.

At that time, he gave Ji Hongfeng a high completion rate.

“Other than the deceased genius of the Ji family, it’s been a long time since anyone in the research institute has this level of talent.”

He was in a good mood today, so he blurted out some words without holding back. magic

As soon as he said this, those who knew the inside story immediately glanced at him, telling him to speak less.

He sighed as he watched the girl leave. “What a pity that such a person isn’t from the Independent Continent.”

Qiao Nian was from Country Z.

Although the Independent Continent was very inclusive, every region hoped to nurture its own people. Qiao Nian wasn’t from the Independent Continent. It was probably the greatest regret of the laboratory leaders.

Gu Hengbo was expressionless as he interrupted them indifferently. “The higher-ups have already temporarily hidden her results. We’ll see who she’ll be assigned to after she enters the research institute. Or we’ll see which laboratory she chooses.”

The First Research Institute could assign laboratories.

Of course, those who could enter were also qualified to choose the laboratory they wanted to go to.

If that laboratory didn't accept them, they would be assigned one.

With Qiao Nian's results, there was a high chance that she would choose the laboratory she wanted to enter, not the various laboratories...

Zhou Zhou had been leaning against the side, playing with her phone and sending messages. She sent a "kneel" emoji to the person named "Sun".

The other party might not have looked at her cell phone yet and did not reply to her for the time being.

She didn't mind. After sending the emoji, she sent the other party a "to cozy up to someone powerful" emoji.

Zhou Zhou sent two emojis in a row. Only then did her heart feel a little calmer. She silently put her phone back into her pocket and looked up at the rest. "Let's go. Let's show the results to the other laboratory heads first."

The other laboratory heads she was referring to were those who had not come to observe the second round of the assessment.

Logically speaking, there was no need to show these results to the people in charge of the Level 6 to 8 laboratories. They wouldn't bother looking at them.

Sun's heaven-defying results might be able to move those people. As a friend, Zhou Zhou naturally had to do her best to help and give her another push.

"Yes." The other people in charge had no objections.

Gu Hengbo wanted to say something, but in the end, he didn't. He left the lecture theater with Zhou Zhou.

* *

Outside the research institute.

Qiao Nian had just walked out when her cell phone buzzed twice.

She casually took it out and looked down at it. It was a WeChat message from Zhou Zhou.

She clicked on it and saw two cartoon characters, one kneeling down and the other cozying up to someone powerful. They were also shy and muscular. Who knew where Zhou Zhou had gotten them from?

Qiao Nian didn't reply to such a spammy WeChat message.

She had yet to go far when Qin Si's excited voice rang out from outside. "Sister Qiao, here."

After putting her phone back into her pocket and looking up, Qiao Nian saw Qin Si leaning against the car and waving at her.

Qiao Nian stuffed her hands into the pockets of her short windbreaker and strode towards him casually.

Chapter 1910 - 1910 The Ji Family Wants to Acknowledge Sister Nian

The various large factions of the Independent Continent immediately received the news after this year's recruitment list for the First Research Institute was confirmed.

"Qiao Nian? Who's that? Shouldn't Ji Hongfeng or Xie Yu have passed the assessment this year? Where did this Qiao Nian come from?"

The moment the name list was released, almost all the major factions were puzzled about who had defeated Ji Hongfeng and Xie Yu.

Soon, they connected this name to the person representing the Nan family in the assessment.

In addition, Qiao Nian's assessment results were too heaven-defying.

Even if the First Research Institute deliberately hid her second round results from the public, everyone who could make a name for themselves in the Independent Continent had their own connections. Soon, everyone learned about the newcomer king's results this time.

It was already very impressive for her to score full marks in the first round.

The people who had found out about Qiao Nian's results had never expected her to score a 100% completion rate for the Level 8 mock experiment question she did in the second round. magic

This time, the name "Qiao Nian" began to spread like wildfire among the various large factions of the Independent Continent.

After such a genius appeared out of nowhere, all the factions were tempted to rope her into their circle.

At the same time.

It was rare for the Ji family to hold an internal family meeting.

The various hall masters arrived at the meeting point early in the morning. They could no longer hold back their emotions after sitting in their seats and began to chat enthusiastically.

They were all members of the Ji family.

Even if they were not from the direct line of descent, they were still respected seniors from the collateral branches.

These people controlled all the forces in the family, big and small. They were the ones who truly had the right to speak in the family.

At this moment, these old men, who usually carried themselves dignifiedly, were all whispering to each other, unable to hide their excitement.

He Lin served tea to each of them and placed teacups on the table in front of them respectfully.

Soon, Ji Lingfeng arrived.

He sat at the most prominent seat.

He Lin also brought him a cup of freshly brewed tea. Then, he pushed it to the side and stood silently in a corner not far away.

Ji Lingfeng picked up his teacup and lowered his head to take a sip before looking up again. The expression on his handsome face was normal as he said slowly, "Uncles, you should know why I called everyone here. I want to hear your opinions."

As soon as he finished speaking, some people below immediately couldn't sit still anymore.

Someone immediately said, "Patriarch, that Qiao Nian is of the Ji family's bloodline. There's no reason for our direct bloodline to represent the Nan family in the research institute. We have to acknowledge her!"

His words touched everyone's hearts.

Under any other circumstances, these people might not be willing to acknowledge a bumpkin who had not grown up in the Independent Continent.

After all, the Ji family's threshold was high. There were so many people watching them. If they acknowledged a bumpkin who had grown up somewhere and returned because she was a direct descendant, those forces outside would definitely laugh at them.

They would rather support a talented branch family member than acknowledge such an embarrassing direct descendant.

But now it was different.

Qiao Nian was now highly sought after by the various large factions in the Independent Continent. It would be a great honor for anyone to know that such a genius who had appeared out of nowhere was a member of the Ji family.

There was no reason for them not to want Qiao Nian to return to the family.
