

Madam's 1951

Chapter 1951 - 1951 Sister Nian: Don't Care, I Was Just Casually Saying It

"I thought you were a god of exams and could get first place in any exam. It turns out that there are times when you can't get first place. Tsk! How should I put it? This feeling—"

Before he could finish, Qiao Nian glanced at him and leaned back. She placed her hand on the back of her head and lazily interrupted his nagging. "I didn't say that I wouldn't get first place."

Her words successfully shut him up!

Qin Si was speechless.

—Then what are you talking about?

The girl's eyes seemed to be able to see through what he was thinking. She smiled again with a relaxed expression. "Yes, I was just saying it casually."

Qin Si, who took it seriously, was speechless.

Qiao Nian was just joking with him. She lowered her eyes, straightened her expression, and coughed. "Ahem, it's really not certain this time."

"I don't know the progress of the other teams. Anyway, we've determined the direction we're going for. The rest will depend on tomorrow."

She estimated that they would not be first or last this time.

As for which rank they could get tomorrow, it would depend on the other teams.

* * *

The next day.

It was the First Research Institute's December group assessment.

Qiao Nian arrived at the examination hall at 8:30 AM sharp.

There were already a few groups in the lecture theater. Many people gathered together for discussions.

She entered and saw Xu Yi and the others in the corner.

They were different from the others.

There was no one around them. Everyone avoided them as if they were avoiding a plague.

Qiao Nian hummed and walked in with her eyes lowered. She passed through the crowd and walked straight towards the three of them.

She was the Newcomer King this time.

The first person in the First Research Institute to score full marks in the first round and complete the Level 8 simulation experiment with an almost 100% completion rate in the second round.

Qiao Nian was one of the more eye-catching newcomers.

Especially since she did not seem like a researcher.

Even in the First Research Institute, which did not value appearances, some people also liked to discuss the eye-catching appearance of the newbie king this year.

However, Qiao Nian was usually very simple. Most of the time, she sat in the laboratory with Shen Qingfeng and the others to do research.

The others rarely saw her in person.

Qiao Nian's appearance attracted the attention of many people.

"That's her?"

"Team 10—"

As she walked over, she could roughly hear some bits and pieces like "Team 10", "Death Team", and "last place".

However, Qiao Nian did not care. She walked straight toward Xu Yi and the others under everyone's gaze.

* * *

Xu Yi and the others were already used to the coldness of the First Research Institute. They were also used to being ostracized.

Therefore, they did not care when they arrived at the lecture theater and no one came over to talk to them. The three of them sat together and even discussed who would go on stage later. magic

Coincidentally, Shen Qingfeng saw the girl walking over. His eyes lit up and he smiled to greet her. "Qiao Nian, over here."

He thought that Qiao Nian didn't see them.

In fact, the girl had been walking towards them without looking sideways the entire time.

Xue Zhu pulled her and smiled as soon as Qiao Nian arrived. "We're discussing who should go on stage to do the presentation later."

The group assessment was not considered an exam or a competition, but it represented honor!

Everyone tried their best to get a good result in this key assessment so that the various laboratory leaders could see their abilities.

Therefore, the presenter slots for each group were precious. Usually, only the core members of the group could go up.

Chapter 1952 - 1952 Xu Yi Represents the Team

"Qiao Nian, how about you go up?" Shen Qingfeng asked the girl bluntly.

Xue Zhu had the same thought. "That's right. I think it's more suitable for you to go up. We were able to successfully complete this experiment and obtain the results this time because of the information you sorted out. You're the most suitable one to represent our team!"

Xu Yi did not say anything, but he did not deny their words. He looked at Qiao Nian with a pair of cold eyes, clearly agreeing with them. magic

Qiao Nian took off her baseball cap and placed it on the table. Then, she pulled out a chair, sat down, and said casually, "I won't go."

"Why?" Thinking that she was probably too embarrassed, Shen Qingfeng quickly said, "Qiao Nian, don't think too much. The three of us acknowledge your contribution this time. We just think that you were responsible for the main part of this experiment result. It's reasonable for you to go up and explain on the team's behalf. Although you're still a newcomer, our team doesn't have so many rules. You deserve this opportunity."

Qiao Nian smiled and shook her head under their gazes. She placed her hand on the table and said concisely, "I'll be easily targeted if I go up."

All three of them looked at her.

Qiao Nian did not hide anything and said slowly, "You should have heard that there are some people in the research institute who don't like me. Instead of me going up, why don't one of you go?"

She suddenly looked at the handsome young man who had been silent this entire time. "Xu Yi will represent the team."

Xue Zhu's personality was too jumpy. He was easily nervous during big occasions, and when he was nervous, he was prone to making mistakes.

On the other hand, Shen Qingfeng was calm, but he was too calm. He was a little too rigid and was not suitable to be a presenter.

Only Xu Yi's personality was a mesclé of the two.

Qiao Nian had observed him during this time.

He did not speak much usually, but his words were sharp and his opinions were strong. He had a strong personality.

He was the kind of person who usually did not reveal himself but could hold the fort at critical moments.

"Me?" There was a hint of surprise and shock in Xu Yi's eyes. He pointed at himself, not expecting Qiao Nian to give him this opportunity.

"Yes, you." The girl nodded. Her snow-white jaw was exquisite and smooth, and her eyes were filled with trust and encouragement.

Xu Yi was silent for a moment. He clenched his fists and suddenly felt a little embarrassed, not daring to meet the girl's gaze.

Actually, when Xue Zhu suggested that Qiao Nian represent their team, he felt a little disappointed, and his mood was complicated.

However, he could tell that Shen Qingfeng had the same intention.

In addition, he knew that Qiao Nian was indeed in the lead this time. Their success would not be possible without her help.

Therefore, he suppressed his complicated feelings and did not say anything.

"Can you do it?" The girl's voice was clear and cold as if she did not know the unbearable jealousy in his heart.

Xu Yi looked into her eyes and felt that she seemed to know. In fact, what she said just now was deliberately giving him a chance.

He clenched his fists even tighter. His throat dried. "I..."

Xue Zhu slapped his shoulder and put her arm around it. "Then it's you! Xu Yi, you have to work hard for our group and for me to hold my head high for once!"

Shen Qingfeng looked at the calm Qiao Nian and then at the silent and speechless Xu Yi. Having a rough idea of what was going on, he quickly joined in. He hammered his chest with a smile. "Then it's decided. Good luck later."

Chapter 1953 - 1953 Oh, We're Still a Little Better

"What are they doing?"

Team 1 came in last.

The round-faced girl who had previously mocked Team 10 for being trash looked in the direction of the corner behind the lecture theater and sneered. "Are they crazy? Or are they used to being the last and planning to have a vicious cycle? They've thought it through."

"I don't know." Yu Hai looked at the few people laughing and fooling around. He pursed his lips disapprovingly. "They probably worked hard for half a month and realized that it was useless. They're over it already."

The new members of the First Research Institute all knew that Team 10 had been staying in the laboratory for the past half a month.

Not only did they apply for permission to use the laboratory 24/7, but they also took turns staying in the laboratory. They even ate and slept there.

Ji Ziyin looked at them indifferently and could not even be bothered to speak. She did not want to make any comments and only said, "Let's go. There's still 10 minutes. We'll be the first to start. Everyone, get ready. Don't care about irrelevant people."

Strictly speaking, the group assessment of the First Research Institute was not considered an internal competition. It was only an assessment with a scoring system.

Therefore, the assessment order would not need to be arranged by drawing lots like an exam.

Basically, it was done in group order.

Ji Ziyin and the others were in Team 1, so they were first.

Qiao Nian and the others were the last to go.

After a few minutes, a group of instructors in lab coats filed in.

Typically, such an assessment would not involve the heads of the major laboratories. It would be graded by the team leaders under the heads of the major laboratories.

These people were also veterans of the First Research Institute.

They had a certain amount of qualifications in the research institute. magic

Among them was Liao Quan, who was on good terms with the Ji family.

For such a public event, Liao Quan did not specially greet Ji Ziyin and sat down very formally.

Then, the teams began to showcase their research results for this month.

Everyone knew that the December assessment was the most important. Most of them left their greatest trump card for the entire year for this group assessment.

Ji Ziyin went up on behalf of Team 1. She inserted the USB drive into the computer. After some time, a PowerPoint appeared on the projection screen.

As Ji Ziyin began to introduce her research results, the lecture theater instantly fell silent.

Everyone listened attentively.

Ji Ziyin was indeed powerful. She appeared generous on stage and explained everything clearly. She did not panic, and her every word was clear and logical.

After she finished her explanation, the members of Team 1 moved the prototype they had developed and demonstrated it to everyone on the spot.

Qiao Nian watched from the back row as the person on the stage explained confidently. At a glance, she understood Ji Ziyin's results this time.

“There’s a certain time difference in the automated echo acquisition, generation, and transmission of the latest radar detection results into the configuration computer. Ji Ziyin shortened this time difference.”

Ji Ziyin shortened the time difference by about three seconds.

This might not seem awesome, but it was actually a very impressive result. It was the kind of research result that could be published in top journals.

It was probably similar to publishing an article on the SCI.

Xue Zhu could tell as well, but she was calm this time. She did not panic at all and only crossed her arms calmly. “Oh, we’re still a little better.”

Chapter 1954 - 1954 Sister Nian: I Guess They’re Getting A-

Retracting her gaze and leaning her head back slightly, Qiao Nian said casually, “Let’s wait and see. There might be other developments.”

“Okay.” Xue Zhu nodded and turned to look at the stage.

On the stage.

Ji Ziyin demonstrated the results of her group to the mentors and won a round of applause. Many people were also discussing the aces that Team 1 had taken out for the December assessment below the lecture theater. Everyone was waiting for the final score.

The group assessment was scored according to six different grades: A, B, C, D, E, and F.

Of course, for convenience’s sake.

There were also plus and minus sub-scores for each grade.

For example, the A-ranks were divided into A+, A, and A-. This would distinguish the best group when they encountered two groups that received A grades and could not tell who was better.

Ji Ziyin was already making her final summary.

An entire row of instructors sitting below was whispering to each other and interacting. It was obvious that they were very satisfied with the results of Team 1. They kept nodding in their conversation.

“How many points do you think Team 1 will get?” Shen Qingfeng was a little nervous. He suddenly turned around and asked the three of them.

Xue Zhu did not care. “Likely A.”

Xu Yi was going to represent their group on stage to compete with the other groups later. A rare nervous expression appeared on his ice-cold face, but he could still maintain his composure. There was not much expression on his handsome face as he gave a more precise result. “A-.” magic

Shen Qingfeng was stunned at his prediction. He was a little surprised. After a while, he said, “I guessed A+.”

“They can’t get such high results.” Xu Yi turned his gaze to the glowing Ji Ziyin on the stage. His thin lips pursed for a moment, and his eyes were like torches. “She did increase the time for the automatic rewind by 3 seconds, but such optimization results of the original technology won’t give them high marks. It’s already not bad that they can get an A. Ji Ziyin even made some small mistakes when she was making her statement and a portion of her score was deducted. I think they’re going to get an A-.”

After saying that, he turned his head and asked Qiao Nian, “What do you think?”

The girl wearing a baseball cap probably did not expect Xu Yi to push the topic on her. She lazily tilted her head and looked at the person on the stage.

Ji Ziyin was waiting for the score to come out.

From her expression, she was obviously determined to win this time.

Qiao Nian retracted her gaze and smiled. "A-."

"The overall score of the first group is A-."

There was another round of discussion in the lecture theater. The group behind had already begun to wail.

After all, it was very difficult to get an A in the group assessment. Usually, it was C or D. Some groups got even worse results. For example, Team 10 was known as the death group because they got Fs every time.

A was an unimaginable achievement.

Ji Ziyin felt a little disappointed, but it was well hidden by her. She walked off the stage surrounded by the members of Team 1 and glanced at the isolated corner of the lecture theater from afar.

Qiao Nian was sitting on the chair at the back. She seemed to be playing with her phone with her head lowered. Her entire face was hidden under her baseball cap, and it was unknown if she had heard her team's results.

She retracted her gaze expressionlessly and focused on Team 2.

Chapter 1955 - 1955 It's Actually Not Qiao Nian?

Next up were Group 2, Group 3... Towards Group 8, the final scores were all within the normal range.

Most of them were C or D.

Among them, Team 6 performed exceptionally well. They got a B-, and everyone on the team screamed with joy.

After Team 9 finished speaking and the ten-odd mentors gave the score, they already looked tired. Everyone was obviously tired.

Team 9's score was not ideal. It was a D-, the worst score this time.

The person representing his team went down the stage with a crying face. He couldn't hold back his tears anymore. When he went down, he hugged his friend and looked like he was about to cry.

Although the Team 9 members felt quite uncomfortable, fortunately, there was another group behind them. Due to the other party's long history of F scores, they could still calm down. After comforting their team members, they waited for the last group to go up.

"The last group can come up now." Liao Quan threw his fountain pen on the table. He looked tired as he rubbed his temples and called the next group expressionlessly.

A few of the mentors knew Team 10's level. Most of them were not as serious as before. They were drinking tea and chatting with each other. It was obvious that they did not take them to heart!

Someone in the lecture theater already wanted to leave.

However, according to the research institute's rules, the assessment of the ten groups had to be completed before everyone could leave the lecture theater.

No one could leave the venue midway.

Therefore, everyone could only wait for Team 10 to finish their presentation.

Ji Ziyin had also been waiting for the last group to go up.

She glanced in Team 10's direction with bright eyes. She thought that Qiao Nian would represent Team 10 this time, so she did not expect Xu Yi to pick up his laptop and walk straight up the stage under everyone's gaze. magic

"Is it Xu Yi?"

"I thought Shen Qingfeng would go up this time."

"Tsk, does it matter who goes up? Anyway, they're all in last place. It doesn't matter who represents them."

There was a flurry of discussion in the lecture theater.

Looking at Xu Yi standing on the stage and calmly inserting the USB drive, Yu Hai looked at Ji Ziyin and said with disdain, "I thought that the Newcomer King would represent them. Tsk, she's quite smart. She knows that she'll only embarrass herself on such an occasion and so has to hide behind others! However, it's useless. The group assessment depends on the group score. If Xu Yi gets an F, she'll also get an F..."

"They chose the same research direction as us. This kind of thing is a big taboo in group assessment. We showed the results in front of them and obtained an A-. What kind of score can they get?" Yu Hai looked at Xu Yi on the stage and sneered.

Ji Ziyin stopped talking, but an uneasy feeling rose in her heart.

She felt that Qiao Nian was too calm!

If Team 10 did not have any killer moves hidden, why were they so calm after seeing them get an A-? They did not seem to be afraid of fighting them head-on.

"Don't be too confident. Let's take a look first."

Since she said that, Yu Hai could only suppress his excitement and look at the stage.

Chapter 1956 - 1956 They Raised the Accuracy of Automatic Echo Detection

Xu Yi quickly finished the preparatory work. Then, he took a deep breath and looked at the instructors below the stage, who had long lost interest. However, he was not discouraged.

He operated the mouse and keyboard and found the contents of the USB flash drive in the folder. With a handsome face that was mature and steady, exceeding his age, he began his explanation...

At first, no one listened to him seriously.

The mentors were drinking water and resting.

The other teams below the stage were playing with their phones and asking each other what and where to eat tonight...

!!

However, as he explained methodically, some people began to pay attention to him. They pricked up their ears and listened attentively.

The first person to listen carefully said to the person beside him in surprise, "F*ck, Team 10 is too heaven-defying."

"What?" The people around him were attracted by what he said and also pricked up their ears to listen.

More and more people began to notice what Xu Yi was talking about, and more and more people took the results of the last group seriously.

Among these people were the research institute mentors sitting in the first row, including Liao Quan.

“This is...”

“Is that possible?” magic

Two mentors whispered to each other, and they could see the shock on each other’s faces.

Liao Quan’s expression became uglier and uglier, and he clenched his fists.

Xu Yi continued to explain the results they had produced without sleep or rest in the past half a month. He was as Qiao Nian had thought—calmer than Xue Zhu and sharper than Shen Qingfeng. The young man’s cold appearance, coupled with his eloquent speech, seemed to create a spotlight on him. At this moment, everyone’s eyes were focused on him...

“Xu Yi is not bad.”

In the corner, Xue Zhu smacked her lips and sighed. “Why did I not notice that he was not bad-looking in the past? I only felt that he was super handsome when he went up on stage today.”

“He speaks well.” Shen Qingfeng also revealed a gratified expression. His eyes were filled with affinity and enthusiasm.

Qiao Nian was the calmest of the three.

The girl crossed her arms over her chest and watched Xu Yi’s speech on the stage very calmly.

Xu Yi perfectly displayed their results this time.

He first explained the contents of the USB flash drive. Then, he took out the experiment they had prepared and performed it on the spot for the mentors to see.

After Xu Yi finished speaking...

A mentor pushed his frame glasses up the bridge of his nose and said solemnly, "Wait a moment. We have to discuss it."

Xu Yi was usually cold, but he paid attention to his manners in public. He humbly said that the mentors could take their time. If they had any questions, they could ask him. He was not in a hurry.

* * *

Below the stage.

Ji Ziyin and her team members were in the first row.

At this moment, Ji Ziyin's expression had already changed slightly. Her fists were clenched tight by her side. "They've increased the accuracy of the automatic echo detection."

Yu Hai and the others still did not understand what this meant.

Ji Ziyin had grown up in the Ji family and enjoyed their best resources. She had more contact with them than others.

She knew very well how sensational Team 10's results were this time.

"We optimized based on existing technology. They didn't do that. They suggested a new approach."

What was experimental research!

Research was innovation.

Chapter 1957 - 1957 Xu Yi Specially Gave You This Chance

They could only get an A- this time because their research results were not considered innovative. They only optimized existing technology. magic

But Team 10's results this time were innovative!

It was both innovation and optimization!

Ji Ziyin's expression was ugly. She did not expect Qiao Nian to be so talented as to lead these people in the death group.

Was her talent that terrifying?

Ji Ziyin suddenly felt a sense of danger, and her eyes flickered. Her face was pale and ugly, and her complexion was bad.

The dozen or so mentors in the first row finally came to a conclusion.

This time, Liao Quan appeared. He looked at Xu Yi seriously and asked him, "Can you tell us in detail about your algorithm again?"

Xu Yi said frankly, "Of course."

Everyone held their breaths and waited for him to explain this algorithm.

Xu Yi suddenly raised his head and looked at the girl in the last row of the lecture theater. He pursed his lips and retracted his gaze. Suddenly, he looked at the row of mentors and said coldly, "Can I get one of our team members to explain?"

Liao Quan was stunned. Since this request was not too much, he nodded. "Sure."

Xu Yi called out a name without thinking. “Qiao Nian, this is the algorithm you came up with. Explain it to them!”

Whoosh—

Almost everyone’s gaze fell on the girl in the last row, who was playing with her phone with her head lowered.

“Hey, did you hear Xu Yi say that this is the algorithm she came up with?”

“Damn, are all newbies nowadays so awesome?”

“Compared to Ji Ziyin, she seems to be even more impressive.”

Some people gossiped softly.

Some waited for an explanation.

How did Qiao Nian think of such an algorithm!

What was its core!

Xue Zhu did not expect Xu Yi to give up this opportunity in the end and call Qiao Nian. Smiling and blinking her bright eyes, she secretly elbowed the girl and whispered to her.

Qiao Nian had been leaning against the chair and playing with her phone, mainly sending messages to Ye Wangchuan.

She didn’t even notice the changes around her.

Until Xue Zhu reminded her.

She put the phone down and looked up. Only then did she notice that everyone's eyes were on her.

Qiao Nian was speechless.

She was silent for two seconds before looking at the excited Xue Zhu. Her voice was hoarse as she asked, "So, two people can explain the group assessment separately?"

"In principle, no, but this time, the mentors asked the question first, so it's an exception. Xu Yi especially gave you this opportunity." Xue Zhu was elated.

Could she not want it?

But everyone was waiting for her explanation.

Qiao Nian was caught between a rock and a hard place. Pursing her lips and standing up with a strong aura, she subconsciously pressed down on her baseball cap and said slowly, "This algorithm is very simple. It uses the median value of Doppler radial velocity, the horizontal mutation rate of the reflectivity factor, and the vertical gradient of the reflectivity factor. It's processed library by library on the lowest PPI of the radar body scan to recognize the ultra-refraction echo."

She casually pulled down the brim of her cap. Amidst the silence, she summarized the results casually. "...So this algorithm can be used in radar detection and other aspects."

The tutor with the glasses looked at her with a burning gaze. "Have you given this algorithm a name?"

Chapter 1958 - 1958 Sister Nian: Its Name Is Super Algorithm

Qiao Nian raised her eyelids, thought for a moment, and then said, "Its name is Super Algorithm."

It was a really obvious name.

Simple and rough.

It was an algorithm that was better than ordinary algorithms.

Ji Ziyin frowned when she heard 'super algorithm'. She kept feeling that she had seen a similar saying somewhere, but she couldn't remember for a while. magic

Time waited for no one.

After a few mentors discussed among themselves again, they gave Team 10's score for this group assessment.

A+.

As soon as this result was out, everyone was in an uproar.

There was a flurry of discussion.

However, although they were discussing it, no one questioned it.

Only the members of Team 1 had ugly expressions as they hurriedly left the lecture theater.

* * *

Outside.

Ji Xiao specially came to pick Ji Ziyin up. The black Lincoln parked outside the First Research Institute looked especially imposing.

Ji Ziyin's expression darkened when she saw the Ji family's car. She lowered her head and hurriedly got into the car.

She saw Ji Xiao inside, and the sinister look in her eyes deepened.

"Miss, are you going back to your residence?" The chauffeur asked.

Ji Xiao waved his hand and replied on her behalf, "Go to my place first."

The chauffeur responded and started the car. He drove according to the address Ji Xiao had mentioned.

The car was very silent along the way.

Ji Ziyin seemed to be in a bad mood. Ever since she got into the car, she had sat there without saying a word with her eyes closed. No one knew what she was thinking.

Ji Ziyin opened her eyes, which were cold. She clenched her fists by her sides, her nails digging into the flesh of her palms.

Ji Xiao did not notice her cheap shot and cheap trick. He continued, "Didn't you show the results of this time to your teacher? Even your teacher said that you can get first place this time."

Gu Hengbo was a top authoritative figure in the First Research Institute.

If he said that Ji Ziyin's team could get first place in the group assessment this time, it would be close to the mark and not far off.

Ji Xiao really did not expect something to go wrong at this point, but when he saw Ji Ziyin's increasingly ugly expression, he could not help but panic. "Ziyin, could it be that something really went wrong?"

Ji Ziyin was frustrated by his questioning. She pressed her temples and said in frustration, “We didn’t get first place.”

“You didn’t get first place?” Ji Xiao was shocked and raised his voice. Clearly, he was extremely surprised by this outcome. He couldn’t wait to ask her, “If you didn’t get first place, who got first place...”

He stopped abruptly as an ominous feeling rose in his heart.

As expected.

Ji Ziyin’s voice was sickly as she spat out a name. “Qiao Nian. Her group got first place and even came up with a super algorithm.”

“It’s her again.” Ji Xiao was slightly in a daze. For a moment, he did not know what to say. “She’s just a country bumpkin. How can she have such luck?”

The car gradually fell silent.

The atmosphere was gloomy.

Neither of them wanted to talk.

Feeling even more uncomfortable by this suffocating atmosphere, Ji Ziyin opened the window.

A cold wind blew on her face.

The fire suppressed in Ji Ziyin’s heart was finally dissipated, but the residual pressure and impetuosity still did not allow her to completely calm down.

Chapter 1959 - 1959 I’ve Seen Their So-called Super Algorithm

She glanced at Ji Xiao from the corner of her eye with a solemn expression. "I keep feeling that I've seen their so-called super algorithm somewhere."

"You mean..." Ji Xiao excitedly looked at her. "They stole someone else's research?"

Ji Ziyin looked frustrated and shook her head. "I'm not sure yet. We'll talk about it when I go back and look for it." She lowered her eyelids to hide her jealousy and muttered in a low voice, "We still have a chance to turn the tables if they didn't win this group assessment with their own strength." magic

* * *

At the same time, the Ji family immediately received the results of the group assessment.

"Patriarch, this is the final result we got from the First Research Institute." He Lin hurriedly handed the note to the man sitting at the long table.

Ji Lingfeng took the note, unfolded it, and skimmed through it.

After reading it, he threw the note on the table with a slightly solemn expression.

Ji Hongyuan was also there. He hurriedly asked in a low voice, "Patriarch, how was the group assessment this time?"

"Sixth Uncle, take a look for yourself." Ji Lingfeng did not say anything else and pushed the note in front of him.

"She did well?" Ji Hongyuan picked up the note skeptically and looked down. Then, his expression immediately changed and he suddenly looked up. "First place?!"

This time, his voice was clearly trembling. He was so excited that he almost stood up.

“Didn’t she join Team 10? Team 10 is a famous death group in the First Research Institute. They always get last place in the annual assessment. This year, Ji Ziyin got Gu Hengbo to mentor her. How could she not get first place? This...”

He Lin was well-informed and had long heard some internal information about the research institute. At this moment, he interrupted respectfully and answered his doubts. “I heard from the people from the research institute that Young Miss’s group seems to have come up with some kind of super algorithm. This super algorithm can apply an automatic echo to the radar detection field, so the research institute made an exception and gave them an A+.

“Although Miss Ji’s results for this assessment are not bad, she only got an A-.”

A+ and A- looked like they were both in the A rank, but there was a difference of three levels between them. It could be said that their results were worlds apart!

When Ji Hongyuan heard that the ‘super algorithm’ could be used in the field of radar detection, his weathered face changed again and again, and his turbid eyes burst out with a burning light.

The field of radar detection seemed inconspicuous.

However, almost all the advanced weapons in the world involved radar detection!

He looked at Ji Lingfeng without hesitation, unable to sit still anymore. He said anxiously, “No, we need her to come back!”

Ji Hongyuan was stunned. He immediately remembered that he had looked for the girl once before and the girl’s cold attitude.

It was as if someone had poured a bucket of cold water over his head.

However, he still refused to give up. “Previously, I also wanted to grind her personality a little more. She’s too wild. It’s easy for her to cause trouble if we acknowledge her directly. I thought that she’d definitely be ostracized after entering the research institute. We would initially ignore her. When she

suffered, we'd look for her and have a good chat with her. She's a smart person. She should know what's best for her..."

Chapter 1960 - 1960 The Ji Family Wants to Recognize Her Even More Now!

Ji Hongyuan frowned. He was distraught when he thought of the girl's unruly personality.

However, this kind of frustration was far inferior to the shock the results this time gave him!

Ji Hongyuan pursed his lips and, for the first time, a compromising expression appeared on his old face. "...That's what I thought originally. After she comes back, she'll be more obedient and listen to the family's arrangements obediently."

"What do you mean?" He Lin knew from the beginning that this method would not work. Qiao Nian was not the kind of person who could be easily angered.

Ji Hongyuan smiled bitterly and gave in. "What else can I do at this point?"

"We can't let her terrifying talent be used by outsiders.

"She has the Ji family's bloodline, so it's only right for her to return to the Ji family," he said matter-of-factly, not thinking about Qiao Nian's attitude when he saw her last time.

At that time, he had put on airs, as if he was waiting for the girl to regret and come back to beg him.

Ji Hongyuan seemed to have completely forgotten it.

He only remembered that Qiao Nian was a direct descendant of the Ji family who had wandered outside, but he did not remember that the Ji family had no intention of acknowledging Qiao Nian back at the beginning. They were afraid that she would embarrass them.

If not for the results of this group assessment, he would still have to discipline the girl.

“I’ll look for her again.”

Ji Hongyuan probably knew that he had put on too much airs last time.

Qiao Nian was an unruly wolf cub.

The more arrogant he was, the more the other party refused to lower her head.

This time, Ji Hongyuan made up his mind to lower himself. He would try to persuade her again with reason and emotion.

“I’ll talk to her nicely this time. We’re family. There’s no reason for her to be willing to drift outside and not come home.” magic

* * *

On the other side.

Ji Ziyin had already returned home.

Ji Ziyin’s gaze swept across them as if she wanted to find relevant information.

However, most of the things that could be found on the Internet were boring. They were just using the clickbait of a ‘super algorithm’ to get people to click on the links. It had nothing to do with the so-called super algorithm.

Ji Ziyin was disappointed.

However, she did not give up.

She searched the webpage but could not find any relevant content. Then, she logged into a forum.

This forum was a hidden domain name and looked very mysterious.

After Ji Ziyin entered the domain name, a small box that required a verification code immediately popped up.

She had obtained the account password from Gu Hengbo, so she was not worried. She skillfully entered Gu Hengbo's account and password and hit the Enter key.

Soon, she successfully logged into the forum.

The forum itself was not as mysterious after she logged in. It seemed to be just an ordinary forum.

Ji Ziyin began to search through the vast sea of posts.

She was quite smart. She did not look for the latest year's posts. Instead, she started looking three years ago and specially searched for some hidden posts.

Some time passed.

After searching for two to three hours, her eyes were already a little dry and swollen. She had also become tired.

"Could I have remembered wrongly..." Just as she was about to give up, a post from four years ago suddenly came into view.
