

Magic Era 1181

Chapter 1181 The Ancestors' Test 2

Labard's expression changed instantly. A silver radiance flashed across his body as he instantly appeared several dozen meters away. Cracks appeared where he had been standing, spreading over a dozen meters like a tree's branches.

Everyone's expressions instantly changed.

Labard wiped his cold sweat as he looked at the cracks on the ground, still somewhat fearful.

'Damn, is that guy really a 9th Rank Archmage? Even a 1st Rank Heaven Mage didn't have such a violent attacking method, right?

'This ground had been pressured who knows how many times to the point where 1st Rank Heaven Mages wouldn't be able to create a crack on it when using Extraordinary Power. But now, it was torn apart for over ten meters.

'Damn. Those guys definitely knew that Mafa was so powerful. No wonder not a single one of them was willing to test the newcomer.'

Surprise also flashed in Lin Yun's eyes. After all, Heaven Rank powerhouses would just start to touch upon the power of space. Those below the Heaven Rank weren't qualified to touch upon spatial power.

Because spatial power in itself was a Law, and to use it, one had to first comprehend the Law of Space. Those that advanced to the Heaven Rank with the Law of Space were very rare, but as long as they matured, they would become powerful first-rate powerhouses.

Labard's Teleportation was a good example. Even though it was only a few dozen meters, it would increase a space mage's life-saving abilities.

After reappearing, Labard didn't dare to continue defending. A space mage's defensive methods might not necessarily be reliable here.

He once again released a Spatial Shield and rapidly chanted an incantation. Runes flickering with silver light appeared and ripples emerged in the air, rapidly approaching Lin Yun.

Lin Yun's four elemental shields rapidly revolved. The earthen shield was the first to clash with the ripple, and the metallic-like Earth Shield was split open, as if it encountered a sharp blade.

It was followed by the Ice Shield, which was also torn in two. The ripple was only stopped halfway through his Wind Shield and dissipated.

The dissipated ripple even shook the space around Lin Yun. A Heaven Mage would be unable to open a Spatial Door there for a few hours.

Space mages' Spatial Shockwave, it was known as a space mage's most basic offensive ability, but its power exceeded the strongest 8th Tier Spell!

Seeing that a Spatial Shockwave couldn't do anything to Lin Yun, Labard immediately turned serious.

As he rapidly chanted his incantations, transparent Spatial Shockwaves kept coming out of Labard's hands like a dozen transparent huge Wind Blades.

Lin Yun scattered his four elemental shields and immediately used his Law Runic Shield. Those Spatial Shockwaves impacted Lin Yun's Law Runic Shield and roused a large amount of law runes. Numerous law runes rose to the surface of the Law Runic Shield and easily resisted all the Spatial Shockwaves.

Seeing this scene, Labard's face turned green...

'Sh*t, hasn't he yet to advance to the Heaven Rank? How could he have so many law runes? How many are there? Five thousand? Eight thousand? Damn, has it surpassed ten thousand?

'With so many law runes forming the Law Runic Shield, I can't tear it apart even though it isn't fused with a Mana Shield and an Elemental Shield...

'How can I fight him? That guy is more troublesome than that spectating earth mage. No, I can't fight...

'But even if I don't want to fight, I can't really admit defeat... That would be a huge loss of reputation and these b*stards would definitely make fun of me for the next decade...'

Labard was at a loss, he still didn't know what to do. The large spellwave appeared in the surroundings, flowing toward Labard like a huge seawave.

These spells were transferred to other places by Labard's Spatial Shield, but Labard no longer dared to divert them towards the dense fog, he instead diverted them towards the ground a few hundred meters away.

Soon, everything within a few hundred meters was flooded with fierce elemental power. Labard was suddenly startled as he discovered that he had been encircled by the spell waves and that he had nowhere else to divert the fierce power.

Facing that terrifying Ice Fire Storm again, his Spatial Shield shivered. He simply couldn't divert that power again.

Labard decisively prepared to use Teleportation again, but his Spatial Shield was starting to tear apart and the fierce power in the surrounding was like the depths of a sea pressuring him from all directions.

Numerous silvery light surged from Labard's body as silver runes formed a spherical Fusion Shield surrounding him.

The fierce power continuously deformed his Fusion Shield and rapidly consumed his mana. His law runes frantically fluctuated and he was about to reach the limits of the law runes he could rouse.

At this time, Labard decisively shouted, "Sir Mafa, I concede, please stay your hand..."

Labard's panicked shout echoed, but before Reedman and Blakeman could make a move, the fierce power surrounding Labard instantly dissipated and returned. Within a second, the several-hundred-meter wide sea of chaotic elements thoroughly disappeared.

Reedman sighed.

'Formidable mana control, outstanding control over elements. He actually relied on elemental spells to pressure Labard into a death situation. He even forced him to use his Fusion Shield and made him unable to escape.

'Such a frightening guy... none of the 1st Rank Heaven powerhouses here could corner Labard to that degree. Even the barbarous Blakeman couldn't get such results.

'And it looks like Mafa didn't release all of his power, he only used one Magic Tool. It is said that he has three Magic Tools and a commonly used Magic Staff...'

Labard dejectedly scattered his Fusion Shield, which was claimed to be the strongest defense within the same tier, even stronger than Earth Shield. It had another name, absolute defense. It couldn't be torn apart unless there was a force powerful enough to tore through space, yet it showed signs of being deformed under Lin Yun's attack.

Seeing that Lin Yun hadn't even broken a sweat, Labard bitterly smiled and shook his head.

"Sir Mafa's fighting style is very fierce, it's really too terrifying. If an enemy encounters Sir Mafa for the first time, they would definitely pay a disastrous price..."

Labard's fight had been tragic, it had been a beating. The other mages looked at him and then pretended to be dead.

Reedman looked around as he wanted someone stronger to test Lin Yun's strength, but he discovered that these 2nd Rank Heaven powerhouses all played dead.

On the side, flames started burning in Blakeman's eyes. He reached out with his hand and a two-meter-long huge staff appeared. It was said to be a staff, but it looked more like a huge magic metal spear.

Blakeman fanatically walked over and laughed heartily as he raised his staff.

"Right, mage battles have to be fierce like that, enemies shouldn't have time to breath, that's what a real battle is.

"Come, Sir Mafa, these 1st Rank kids are definitely not your match. I'll only use the power of the 2nd Rank.

"Come, let's have a true mage battle, let's go berserk and attack as much as we like. Ahahah..."

Seeing Blakeman personally taking the stage, the group of Heaven powerhouses all took a step back. Reedman facepalmed as if it was a headache.

"Blakeman, you damn guy, have you lost your mind? Sir Mafa has yet to advance to the Heaven Rank..."

Blakeman disdainfully glanced at Reedman, his eyes filled with battle intent.

"Reedman, you old-fashioned guy, don't interfere. It's hard to find a mage fighting in a manly way. I have to let him continue and have him experience how a true man fight. I can't let him be led astray by softies like you..."

After that sentence, Blakeman's body suddenly burst out with a terrifying aura. His body seemed to have grown a bit and his fierce mana fluctuations even seemed to fuse with the heavy Aura of a Sword Saint.

Gales surrounded Blakeman's body and whirled within several dozen meters, but the air within ten meters of Blakeman seemed frozen, as if it was pressured and couldn't flow.

That huge staff twirled in Blakeman's hands and was ferociously thrust into the ground. The earth shook and cracks spread out over several dozen meters.

"Battlemage!"

Seeing Blakeman's actions, Lin Yun's pupils shrunk and he let that word slip.

Blakeman laughed heartily and calmly admitted it.

"Correct. I did hear that Sir Mafa's relationship with those Gaugass guys wasn't bad. Come, I'll only use the power of the 2nd Rank, let's fight."

In the distance, it looked like the mages were watching something terrifying unfold. They all raised their shields and moved as far as possible. Even Reedman raised a shield with some apprehension, before retreating far away.

Labard smirked and instantly forgot about being beaten up. He squinted and hid in the distance to watch the fight.

'Haha, Sir Blakeman is personally making a move. Eh, Sir Mafa, I sincerely pray for you. I hope you won't be beaten up too ruthlessly.'

'Sir Blakeman has half of the bloodline of a Gaugass Battlemage, and he is even more powerful than those Gaugass Battlemages. He even incorporated mages' spellcasting into his extremely fierce fighting style, and his fighting strength far exceeds powerhouses of the same level.'

'When that monster Santon came here, he was beaten up by Blakeman.'

'Once Sir Blakeman starts fighting, he would only remember to fight and won't stay his hand. That monster Santon was almost killed by Sir Blakeman.'

'Though, that monster Santon ended up beating Sir Blakeman back later on.'

'Although Sir Mafa is very talented and might beat him back in the future, that won't happen right now. Now, he could only wait for Sir Blakeman to ruthlessly beat him up. I hope that guy's body isn't as frail as it looks.'

Labard watched the show from a distance, waiting for Lin Yun to be beaten up until he soiled his pants.

As for the other mages, they all seemed to think of something and smiled as they watched the fight from a distance.

"How long do you think Sir Mafa will last? I bet three minutes..."

"Three minutes? You must be kidding, even lasting a minute would be outstanding!"

“No, you misunderstood me. I think that Sir Mafa will be knocked out within three minutes...”

“Oh, like this... I think Sir Mafa’s Law Runic Shield is very powerful and is a long stronger than a 1st Rank Heaven Mage Fusion Shield. There might already be 10,000 runes within. How could such a terrifying guy not last five minutes before being knocked out?”

Labard joined them and extended a finger with self-confidence.

“I’ll bet that Sir Mafa will last six minutes before being knocked out!”

After pausing, Labard walked to Reedman’s side.

“Sir Reedman, how long do you think Sir Mafa can last?”

Reedman pondered for a bit before answering, “I think that with his strength, Mafa should be able to resist Blakeman for half a minute, then be defeated after five minutes. For Blakeman to knock him out, it should take over ten minutes...”

While the mages were discussing how long it would take for Lin Yun to be knocked out, Lin Yun had already taken out the Ten Thousand Spell Wheel and the Book of Mantras.

Blakeman’s strength far exceeded him, his aura was a bit stronger than Clombton. Even if he only used the strength of 2nd Rank Heaven powerhouse, an ordinary 2nd Rank Heaven powerhouse couldn’t compare to him.

Enderfa controlled the Ten Thousand Spell Wheel, his three faces looking at the scene before him with horror, not understanding what was happening.

Syudos controlled the Book of Mantras and silently floated on Lin Yun’s left without saying a word.

Pure mana condensed into droplets around Lin Yun. The sound of a river could be heard coming from Lin Yun as mana erupted like a fountain. The fierce mana fluctuations spread out like waves.

The Book of Death scattered four colored radiances and the Draconic Staff’s Purple Dragon Incarnation flew out and transformed into the shadow of a huge Purple Dragon that solemnly floated behind Lin Yun. At the same time, the shadow of a wheel as deep as the starry sky was embraced by the Purple Dragon’s shadow.

After pronouncing four awkward-sounding syllables, a series of law runes surrounded Lin Yun’s body. These four-colored runes merged with Lin Yun’s body, and the four colored radiances instantly appeared on his body.

The power of earth, fire, water, and wind transformed into elemental spheres that revolved around Lin Yun. As for Lin Yun, he transformed into a nine-meter-tall elemental lifeform.

The fusion of the four elements’ Elemental Incarnations was something that could only be accomplished after grasping the essence of the four elements’ Elemental Incarnations.

The most important part was using the four Elemental Laws to establish the Law Foundation. Someone with balanced four elemental laws could use their formidable ability to integrate the abilities of all

Elemental Incarnations of the four elements. This could be said to be the most powerful Elemental Incarnation among the four elements.

As Lin Yun burst with power, his aura rapidly rose for a few seconds, until it was comparable to a Heaven Mage. It was even fiercer.

And this wasn't over yet. Lin Yun's body floated up and an ancient scales shadow appeared. Lin Yun's body floated in the center of the scale while the Spell Wheel and Book of Mantras transformed into a mirage of the Elemental Heart and Void Forge standing on both trays of the scales.

A huge power instantly burst through the void and poured into the Spell Wheel, raising the Spell Wheel's power to the Extraordinary grade.

A huge wheel shadow appeared and emitted a terrifying Extraordinary aura, while on the other side of the scales, a flaming entrance slowly opened. All kinds of flames surged from within the sea of fire inside the entrance.

The fiercest elemental storms spurted out of the Spell Wheel. Those calamitous elemental storms bursting out from the void were no different in terms of quality, it was only a difference in terms of scale.

As for the entrance formed by the Book of Mantras, it spurted out all kinds of flames and formed a flaming tsunami which made the temperature rise frantically.

The pale Corrosive Fire, golden red Hellfire, ashen black Bone-corroding Black Flames,...

In addition, Syodos used incantations to nurture the summoned flames. The boundless flames seemed to have targeting properties.

Lin Yun was holding the Book of Death in his left hand and the Draconic Staff in his right while condensing numerous law runes.

Four-Element Bombs suddenly condensed in midair like a swarm of poisonous wasps, rapidly flying out after appearing.

This was a new fighting technique that Lin Yun had recently developed after reaching a bottleneck in the development of the Four-Element Bombs, the Four-Element Bomb Flood!

Relying on indiscriminate bombing, it would create a zone of chaotic destruction, an elemental vacuum, an energy vacuum. No air and no power could be used, only large-scale destruction spells!

Lin Yun burst out with all his strength and startled the group of spectating mages.

Labard foolishly watched Lin Yun bursting with all his firepower and was a bit stunned.

'Damn, is this Mafa Merlin's strongest power? The gap is too big... If he had burst out with all his power, wouldn't I have been killed in less than ten seconds?

'Heavens, I'm a Heaven Mage, and a space mage! Isn't it common knowledge that a space mage can't be killed by someone of the same Rank?!

'Then why do I feel that a 9th Rank Archmage like Mafa could easily get rid of me?!

Chapter 1182 The Ancestors“ Test 3

The fighting intent burning in Blakeman’s eyes burnt even stronger

“Yes, this is it! Just like that, this is a true battle between men...”

Lightning bolts covered Blakeman’s body and that spear-like metal staff seemed as light as a feather in his hands. It was completely weightless and twisted just like a lightning snake.

Blakeman didn’t dodge, he fiercely stomped his feet and his body shot out like a bullet as he charged towards Lin Yun while swinging his spear-like Magic Staff.

While facing the bombardment of Four-Element Bombs, Blakeman held the spear staff by its extremity and the spear flashed like a shadow, its tip already covered by a spherical lightning bolt.

The sharp spear’s tip ferociously sliced towards a Four Element Bomb to forcibly deflect it towards the side.

But the Four Elemental Bomb exploded on impact and the berserk power indiscriminately spread in the surroundings. Blakeman took the impact head on.

As if guided by that explosion, the other Four Element Bombs flew over and simultaneously exploded.

The berserk chaotic energies were squeezed together and kept clashing, creating a terrifying zone of destruction within three hundred meters. At this moment, no one could sense what was happening inside.

And this wasn’t over, the Spell Wheel’s elemental storms and Syudos flood of flames already rushed to the zone of destruction.

The berserk power fiercely tore through everything and made everything within five hundred meters turn into a zone of death.

All of the Heaven Rank powerhouses were watching as this inconceivably fierce battle was just getting started.

On the edge of the battlefield, the solid ground was continuously being torn apart and fragments were sent flying before being torn into pieces in the air.

They couldn’t see what was happening inside the zone of destruction, but they could see that the ground was continuously collapsing over a hundred meters from the edge of that zone. Runes even started to appear in the distant fog.

The aftermath alone made runes appear within a kilometer of the dense fog to suppress that destruction power.

The group of mages watching the battle raised their shields before evading towards the Mage Tower in horror. This place was no longer safe. Only the defenses of the Mage Tower could resist this destructive impact.

“Damn, if someone told me that a 9th Rank Archmage could display this kind of strength, I would have definitely told him he was crazy. Sh*t, am I crazy?”

“A 9th Rank Archmage can actually display that kind of strength? Damn, even that monster Santon wasn’t that powerful as a 1st Rank Heaven Mage, right?”

Labard let out a startled cry, he looked as if he had seen a ghost.

Reedman berated him without looking back, “Labard, shut your damned mouth and watch. With the battle being like that, that lunatic Blakeman will definitely forget about everything and go crazy...”

On the battlefield, Lin Yun had a solemn expression. The others felt that it was terrifying, but Lin Yun could clearly sense that even the destruction zone created by the flood of Four Element Bombs didn’t break through Blakeman’s defenses. There was even a terrifying power rushing out of the destruction zone.

It firmly took on the Spell Wheel’s elemental storms, the Book of Mantras’ flood of flames, and Lin Yun flood of Four Element Bombs and slowly charged out.

‘Heaven Rank Battleimages are truly terrifying...’

Lin Yun gave up on the flood of Four Element Bombs and law runes of the four elements rapidly appeared before him. These law runes rapidly condensed according to the matrix of the Four Element Bomb and formed a huge Law Runic Bomb.

As Lin Yun’s Law Runic Bomb condensed, a thick lightning blade-like shadow emitting a glaring brilliance pierced through the destruction zone.

Then, a second blade of lightning came out, followed by a third,...

After a dozen thick lightning blades flashed and tore through the zone of destruction, Blakeman appeared. His now three-meter-tall body was covered in blade-like lightning bolts that frantically tore through everything in the surroundings.

They tore through the destructive power continuously attacking his body, and the sphere of lightning at the tip of the spear had already turned three-meter-big.

As Blakeman tore through the spatial pressure, that deep blue lightning sphere was ruthlessly whipped by Blakeman spear-like staff.

It flew towards Lin Yun, leaving a lightning trail behind as the Extraordinary Power shook the space here.

As for Lin Yun, he also shot his Law Runic Bomb.

The Law Runic Bomb made purely out of law runes was the strongest researched version of the Four Element Bomb that Lin Yun could use.

The pure law runes were all connected, and as it shot, the Extraordinary Power they emitted started rising dramatically!

Unless one reached the Heaven Rank, they couldn’t control Extraordinary Power. Lin Yun also couldn’t grasp Extraordinary Power. But he was able to grasp the Heaven Rank’s law runes.

And using the power of law runes, he was able to forcibly draw a huge power from the void. It was uncontrollable Extraordinary Power that could only act as destructive power!

Lin Yun had gotten the inspiration from those Pseudo Heaven Rank Magic Beasts' Destruction Energy Spheres. Since they couldn't control and manipulate Extraordinary Power, they used it as destructive power.

The power borrowed from the void by that Law Runic Bomb fused with the runic matrix and ruthlessly collided with Blakeman's lightning sphere.

A loud explosion instantly echoed, and then all sounds disappeared.

At the center of the collision between the Law Runic Bomb and the lightning sphere, a terrifying explosive power not only didn't burst out, their power instead collapsed towards the center.

The energies colliding within several dozen meters seemed to have been devoured by a black hole. In an instant, everything within several dozen meters was engulfed in the center and formed a four-meter-big sphere.

Then, the sphere exploded.

The shockwave of the explosion instantly swept over a kilometer and kept spreading.

The ground that had been reinforced countless times was like a patch of dead leaves blown away by the wind as it instantly shattered into countless fragments. And these countless fragments were floating in the sky.

A kilometer away, all those Mage Towers were swept by the shockwave and lit up, shining like lighthouses in the dark.

Every Mage Tower within three kilometers had their magic defenses activated. As for the dense fog, it kept churning as several unclear runes appeared within it. Runes appeared in the dense fog within three kilometers.

Blurry runes could even be seen jumping about in the depths of that dense fog.

And within this destructive attack, lightning light flickered and the terrifying Extraordinary aura roamed.

Lin Yun's Magic Array was roused to its pinnacle, his law runes were continuously assembling themselves according to the construction method of law runes.

Then, three huge law runes matrices once again moved in the shape of the construction method of law runes.

Double Structure!

If the construction was a success, it would be equivalent to using several hundred runes to form a law rune!

This was simply impossible. But Lin Yun only needed to use the little bit of power contained within that matrix. That was all he needed.

Following the matrix of that three-meter-tall law rune construct, a terrifying power filled the atmosphere, and a hair-thin spatial tear was torn open in this stable and terrifying space.

The law runes transformed into a pitch-black Wind Blade that tore through the fierce shockwave and flew towards Blakeman!

The terrifying shockwave meeting with the sharp Wind Blade, was like a river facing a sharp blade, it was easily cut through.

On the other side, Blakeman was already thoroughly wrapped in lightning, and his fighting intent was even more frightening than some Heaven Rank Sword Saints. His spear-staff had already turned into lightning.

A loud shout echoed as Blakeman held his staff and slashed forward fiercely. In an instant, a crescent dark blue light blade tore through the shockwave and rushed towards Lin Yun.

If one looked closely, they would find out that the dark blue light blade was made of countless small lightning bolts squeezed together. They didn't seem to flicker like lightning and they were compressed to a terrifying degree.

In the Mage Tower, Reedman instantly turned into a fireball and burst out.

'I knew that lunatic Blakeman would forget everything when he started fighting and would use the Dark Blue Moonblade. Damn it, does he plan to get rid of Mafa?

'Sh*t, I hope Mafa can resist a bit. That f*cker! How is that something a 2nd Rank Heaven powerhouse can use?'

"Blakeman, you damn moron! Do you have no shame!? You actually used the power of a 3rd Rank Heaven powerhouse! Are you trying to get rid of Mafa!?"

Reedman roared crazily, but his red-colored flaming body charged towards Lin Yun like a ray of light.

In the Mage Tower, the group of mages had strange expressions. No one thought that this would have turned like this.

Labard's face was green as he watched the two fighting fiercely. Everything in the battlefield seemed to have become a lot slower, but Labard understood that it wasn't time slowing down, but rather the destructive power being so high that it was making the screen lag. Light was twisted and the emission speed was slowed down by at least 50%.

They might already be looking at something that happened a second earlier. At this time, they all knew that they didn't have the power to be involved in this kind of battle.

'Heavens, I thought that Sir Blakeman would obviously beat up that monster Mafa, but who would have thought that this monster would be able to fight Blakeman to a standstill while the latter only used the power of a 2nd Rank Heaven powerhouse.

'He even made Sir Blakeman's fighting intent burst out. Oh no, he is finished now. Sir Blakeman is a complete lunatic, once his fighting intent is roused, he would be unable to stop fighting.

'Mafa is screwed, even Sir Reedman might not be able to save him. Sir Blakeman's Dark Blue Moonblade is said to have once pierced through a plane's spatial barrier, allowing him to forcibly enter that plane.

'Sir Reedman once said that he didn't have the assurance of taking on Sir Blakeman's Dark Blue Moonblade head on and had no other choice but to dodge.

'This is too troublesome. Sir Balakra specifically mentioned Sir Mafa before, and he mentioned him twice, even giving him a higher assessment than that monster Santon. He was even likened to the 2nd Santon of the Merlin Family.

'Sir Balakra would definitely go into a rage if he was killed by Sir Blakeman here.'

As he recalled that matter, Labard became unable to sit still. They had so many Heaven Rank powerhouses here, even Reedman who was as strong as Blakeman was here. They would definitely not have a good time if they let Lin Yun die here.

Labard rushed out of the Mage Tower. The other Heaven Rank powerhouses also thought of this and rushed out of the Mage Tower with no regards for the intense destructive energy fluctuations. They had to come out and intervene to save Lin Yun.

"I hope Sir Reedman will be fast enough and gain some time or this might become really troublesome..."

Labard sighed with a bitter expression as he followed the group of mages into the chaotic energy fluctuations with a Fusion Shield.

And over there, the flame-shaped Reedman still couldn't catch up to that Dark Blue Moonblade. Seeing as he couldn't catch up to that Dark Blue Moonblade, Reedman's heart sank.

'I can't catch up! Idiot Blakeman! What hell are you doing! Damn, could it be that you want me to say in my report that you used the Dark Blue Moonblade which could instantly get rid of a 1st Rank Heaven powerhouse and could even kill more than half of the 2nd Rank Heaven powerhouses, against a 9th Rank Archmage?'

Reedman turned into a red ray of light that chased relentlessly. But his speed couldn't compare to the Dark Blue Moonblade.

'It's over, it's really over now, even I would use a huge amount of power to resist Blakeman's Dark Blue Moonblade, and three in a row might even kill me. Sir Mafa still doesn't have Extraordinary Power, how could he resist?'

'A genius finally appeared in our Family, a talented child even stronger than that monster Santon, but he is about to be killed by a member of the family, he is about to be killed by that fool Blakeman. Damnit...'

'Has fate given up on our Merlin Family?'

Reedman thoroughly despaired. In this kind of battle, when facing this kind of attack, dodging was almost impossible. Mostly because dodging might make them die faster. They might expose even more flaws while they dodged. And dodging while being locked on by this kind of power was simply courting death.

Reedman was thoroughly despairing. He didn't think that Lin Yun could survive, he only kept going because he was hoping for a miracle.

But then, Reedman saw a strange black Wind Blade, formed with law runes, rapidly fly out. A spatial crack as thin as a hair was attached to the edge of the Wind Blade.

As the Wind Blade rapidly flew out, the surrounding space seemed to have been frozen. The Wind Blade tore through space like a hot knife cutting through butter, and left spatial tears behind.

But Reedman knew that there was a spatial tear at the edge of the Wind Blade, and that it was continuously tearing the space apart.

As this seemingly not-so special Wind Blade appeared, Reedman saw that a storm seemed to be set off behind it. The vibrating ripples transformed into waves that spread out from behind this Wind Blade.

It was as if the Wind Blade was dragging the space behind it and suppressing it together.

“Eh, damn, what is that, spatial tear, spatial shake, damn, what is that thing. Heavens...”

Reedman’s silhouette suddenly flashed out of the red ray and looked at that pitch-black Wind Blade clashing with the Dark Blue Moonblade with a shocked expression.

Then, Reedman immediately fled without even thinking about it. He was a bit too close to the point of impact.

The pitch-black Wind Blade and the Dark Blue Moonblade’s collision felt like the clash of two sharp weapons. The pitch-black Wind Blade was formed when slicing power was condensed to the extreme.

As for the Dark Blue Moonblade, it was formed when countless small lightning bolts were condensed to the extreme, forming a dark blue crescent moon blade. It was also a form of power condensed to its peak.

After the two powers collided, a head-sized space in the very center collapsed into pieces. Then, the spatial ripples spread towards the surroundings.

When faced with this kind of power, all other kinds of power lost their effects. These seemingly slow spatial shockwaves were expanding like a transparent sphere. Wherever they swept, all destructive power was swept clean and all other powers instantly shook into pieces.

A crimson orb appeared around Reedman’s body, wrapping him inside. But after being swept by that slowly moving spatial shockwave, mana fluctuations crazily flickered on his Fusion Shield and countless law runes filled the surface of his Fusion Shield.

He was even sent flying out.

And on the other side, those Heaven Mages, that had hurriedly rushed to the battlefield to try and protect Lin Yun with their own power, suddenly paled as they saw the slowly spreading spatial shockwaves.

“Damn, spatial shockwaves?! How could there be such a damn thing?! Hurry up and fall back...”

“Hurry up and fall back! Has Sir Blakeman gone crazy?! How much power did he use?!”

“What a monster...”

Chapter 1183 Secre

The group of mages were like panicking refugees rapidly retreating and hiding behind a Mage Tower. Then, the shockwave slowly swept across and formidable mana fluctuations instantly blossomed from that nine-layered Mage Tower. The Mage Tower's defenses automatically strengthened themselves to their limits and a layer of jade-colored crystal barrier enveloped the Mage Tower.

But before the numerous Heaven Mages could sigh in relief, a crystalline sound echoed from that jade-colored crystal floating at the summit of the Mage Tower.

"Snap..."

Labard's face turned green as that crystalline sound echoed, he then released his strongest defensive ability and played dead within his shell like a tortoise.

The crystal floating at the top of the Mage Tower instantly shattered into pieces, soon followed by the layer of jade-colored crystal barrier, it looked as if it had been forcibly crushed by someone.

The spatial shockwaves slowly impacted the Mage Tower and the Mage Tower's mana fluctuations were rapidly consumed. Three seconds later, the Mage Tower broke down and the top five layers turned into fragments that flew towards the sky alongside the shockwaves.

Fragments of the Mage Tower's bottom layers were also peeling off bit by bit. The walls already disappeared in many locations.

Everything swept by the spatial shockwaves seemed to disappear. Soon, the pitch-black Wind Blade and the Dark Blue Moonblade dissipated as they destroyed each other and the shattered space regained its peace.

Dust and debris filled the surroundings of the battlefield, along with chaotic mana fluctuations.

Everything was peaceful. Labard dispersed his Fusion Shield and walked over with a bitter smile.

'It's over, we are finished. Sir Blakeman got rid of Sir Mafa. We definitely won't have a good ending.

'What can we say if that person asks?

'Do we have to say that Sir Mafa just came to the Ancestral Land for the first time and broke the all-time record of crossing the severed fog before being killed by Sir Blakeman?

'That person might throw us into a remote plane to act as miners. And that's not mentioning that monster Santon.

'If he heard of this matter, he would definitely remember those unhappy memories and he might end up beating up Blakeman to the point where he will have to remain bedridden for a year, he might even seal our mana for half a year.'

The group of Heaven Rank powerhouses no longer felt like they were watching a show, they were all dejected. How could they feel great about being a spectator when that kind of thing happened.

After Reedman stabilized his body, the first thing he did was to fly to the dusty area filled with mana fluctuations and angrily charge at Blakeman's location.

A flaming law rune flew out as Reedman continuously spat out incantations in a hurry.

Sun-like fireballs flew out and rained down on Blakeman.

“Idiot! Idiot! Look at what you did, you brainless idiot!

“You have the intellect of a Beastman! You not only caused a catastrophe, you also ruined the future hope of the Merlin Family.

“Go and explain to Sir Balakra! Oh, and you can explain that to that monster Santon when he returns!

“You idiot! Moron...”

Reedman was fuming. He extended his hand and those sun-like fireballs turned into a torrential rain which thoroughly flooded Blakeman as explosions echoed one after another.

As for Blakeman, he became clear-headed. His face twisted and he only put on a shield to resist Reedman’s attack. He didn’t dare to say a single word and let Reedman vent.

While Reedman was continuously cursing Blakeman over and over again while releasing spells to beat him up, a breeze appeared in the area filled with dust and chaotic mana.

As the large amount of dust dispersed, a shadow slowly walked out from within.

The fierce gales had turned into a breeze. Lin Yun smiled bitterly and shook his head as he looked at his dilapidated robe.

He sighed, ‘Truly a powerhouse with the Gaugass Battlemages’ bloodline, his fighting style is extremely berserk. I used everything I had, but I was only able to fighting him to a standstill, and he had only been releasing the power of a 2nd Rank Heaven powerhouse.

‘And I can only use the power of the Equilibrium Law for over a minute. In other words, I can’t resist more than two minutes against Blakeman when he uses the power of a 2nd Rank Heaven powerhouse or I would die.

‘Whether it’s that spherical lightning or that deep blue moon slash, they were both very powerful, far more powerful than an ordinary mage’s attacks. No wonder it’s said that powerful Gaugass Battlemages were far more powerful than mages of the same Rank.

‘That’s a true powerhouse, eh...

‘Fortunately he pulled his fists. Had he gone all out, I would have had a hard time resisting. And it’s very likely that I would have lost if it was a life and death battle.’

Lin Yun sighed. He released another Hurricane, but it was just a breeze. As soon as he walked out, he saw Blakeman holding his shield with his head down, standing there without saying anything while Reedman was going mad and kept scolding him.

Small sun-like fireballs were raining down on Blakeman’s shield...

Lin Yun was distracted, he completely couldn’t understand what was happening.

He saw the group of mages in the distance staying far away from the fight, no one dared to approach Reedman.

Lin Yun pondered for a bit and also didn't dare to go over. He went to Labard's side and asked quietly, "Sir Labard, what happened to Sir Reedman?"

Labard bitterly smiled.

"We should just ignore it, let Sir Reedman vent, no one can persuade him. Be careful or you'll become like Sir Blakeman and be beaten up by Sir Reedman..."

Labard casually answered without even thinking about it, but he then turned around and saw Lin Yun standing behind him with a dilapidated robe. Labard was instantly stunned and his mouth opened wide, it was as if he had seen a ghost.

"Ma... Mafa... You... You... You..."

Lin Yun had a puzzled expression.

"What is it, Sir Labard?"

Suddenly, Lin Yun saw all the mages turn their heads towards him and stare at him as if he was a ghost. He came to a realisation and quickly added, "It's alright Sir Labard, I asked nothing. Talking about Sir Reedman and Sir Blakeman behind their backs isn't suitable, we should just watch from the sidelines."

"Sir Mafa! You didn't die!"

After stammering for a bit, Labard managed to let out a full sentence.

Hearing that sentence, Reedman seemed to have been hit by a Petrification. He froze and then threw Blakeman aside to fly over.

As for Blakeman, shock flashed in his eyes when he saw that Lin Yun was still alive. But it was soon followed by joy and a grin as he quickly ran over. The group of mages surrounded Lin Yun with strange expressions.

Especially Labard, he kept sizing Lin Yun up and down as if he was looking at a monster.

"Why are you looking at me like that? I was just comparing notes with Sir Blakeman, why would I die? Moreover, didn't Sir Blakeman only use the power of a 2nd Rank Heaven powerhouse?"

"But Sir Blakeman is really strong. I once fought with Gaugass Battlemages, but their fighting style was different from Sir Blakeman, while also being somewhat similar. It's just that Sir Blakeman is somewhat more berserk.

"Even among Beastman Berserkers, very few could compare to Sir Blakeman..."

Admiration could be seen on Lin Yun's face and it wasn't faked.

Lin Yun clearly remembered reading in the ancient decaying library in Heiss City that the current control casting was a thing of the past, something that had been discarded.

The strongest and most recommended fighting method was this one, and the research of Elemental Incarnation had reached a very high degree. It made up for the flaw of their weak bodies.

Thus, when Noscent developed to its peak, which Sword Saint would want to rely on close combat to put pressure on a mage's casting? That was courting death! Most mages were stronger than Sword Saints in close quarters combat.

The group looked at Lin Yun with strange expressions. Everyone could see that Lin Yun's sigh came from his heart, and no one could fault it.

Blakeman remained silent with an awkward expression, he had suddenly become more restrained.

'Did that guy really didn't see that my final attack already exceeded the 2nd Rank of the Heaven realm?

'That guy is even more of a monster than Santon, he actually took that attack and wasn't killed, he is only cutting a sorry figure and it doesn't look like he consumed a lot of mana.

'Fortunately, that guy wasn't trashed. I don't know who said that he was comparable to that monster Santon, that's completely bullsh*t. I beat up Santon when he was a 1st Rank Heaven Mage.

'But Mafa is a monster among monsters, he is only a 9th Rank Archmage. Damn, how could the younger generation be so terrifying?

'If I had seriously injured him, he might have returned to beat me up not long after. I've been stuck at the Peak of the 3rd Rank for a long time, if that guy advances to the 3rd Rank... No, that guy might be able to force me to lie down in bed for a year if he advances to the 2nd Rank.

'But did he really not see it?'

Blakeman had an awkward expression. He wanted to ask, but he also didn't dare to ask. He felt that it would be better if Lin Yun didn't know that the Dark Blue Moonblade had been used with the power of the 3rd Rank. Fortunately, this was a self-created spell.

Blakeman attentively watched Lin Yun for a few seconds, and only then did he confirm that Lin Yun didn't think much of it. Blakeman felt that the battle had been good and became pleased with himself.

Unfortunately, as soon as he smiled, Reedman sneered, "Sir Blakeman, your words are truly light. Sir Mafa is only at the peak of the Archmage realm right now. Even if he is powerful, he has yet to grasp Extraordinary Power, you really don't care about your reputation do you?"

Reedman's ridicule made Blakeman listless, it didn't look like he had just come out of a fierce battle.

Lin Yun actually didn't care that much, he had already reached the limit of the Archmage realm. Whether it was the comprehension of Laws or the growth of his mana, he couldn't make a single bit of progress, it was already at a perfect state.

He could only increase his fighting tricks, whether it was his spells or his Magic Tools. And he hadn't fought anyone that wasn't too far apart from him in terms of strength since he realized the terrifying effect of the Equilibrium Law in battle, or it was better to say that he hadn't fought anyone slightly stronger than himself.

Blakeman had released the power of the 2nd Rank and squeezed all of Lin Yun's power to his limit. Lin Yun also took the opportunity to thoroughly test his fighting strength.

When he burst with all his power, 1st Rank Heaven powerhouses were no longer his match and he was more or less on par with 2nd Rank Heaven powerhouses, it was only a matter of who had the upper hand. Defeating the other side wasn't that easy.

After all, with the support of the Natural Demiplane, Lin Yun wasn't afraid that he would run out of mana, his endurance was far greater than many Heaven Rank powerhouses.

The goal of the battle had been achieved, and Lin Yun's own goals were achieved, thus he didn't really care about the rest.

Moreover, there was no way to confirm whether that Dark Blue Moonblade needed the power of the 3rd Rank to be released. More importantly, Lin Yun didn't possess Extraordinary Power, so he couldn't find out.

Reedman attentively watched Lin Yun. Although he felt like tearing Blakeman apart when he saw his expression, shock couldn't help flashing in his eyes when he saw Lin Yun's tattered clothes.

'And he is only an Archmage, such a powerful Archmage that his fighting strength has already reached the 2nd Rank of the Heaven realm...

'Truly an unfathomable guy, he might not know that the Dark Blue Moonblade is a spell Blakeman had created at the 3rd Rank of the Heaven realm requiring Extraordinary Power of the 3rd Rank to cast. It's absolutely not something a 2nd Rank Heaven powerhouse could block.

'That monster Mafa actually blocked it, his fighting power seems much stronger than Santon when he was at the 1st Rank of the Heaven realm.

'When Santon entered the Ancestral Land, no mage of the same rank was his opponent, and he could already fight a 2nd Rank Heaven Mage as a 1st Rank Heaven Mage.

'He also fought with Blakeman, and that fool also lost reason and carelessly used a Dark Blue Moonblade.

'But that almost killed Santon. It was only because he soaked in pure first-rate True Spirit Grade medicines that he managed to regain consciousness within half a month.

'After waking up, his body had been in a critical condition for three months and he even suffered from necrosis. If not because we used a large amount of healing medicines to treat him and hired a holy light mage of the Cloud Tower to use an advanced Therapy using Extraordinary Power, Santon wouldn't have been able to walk within a year.

'But Mafa relied on his own magic to resist Blakeman's Dark Blue Moonblade This was the shocking part people couldn't understand.

'Santon Merlin was a monster whose strength was currently unknown. He already touched upon that realm, and it's not something I can help with. I even heard Sir Balakra say that Santon had already surpassed him.

'Mafa is even more frightening than that monster Santon, As long as he doesn't die midway, to what point would he grow?

'Damn, I simply can't imagine...'

Reedman's expression was very complicated as he looked at the stunned Lin Yun. Then, Blakeman chuckled to cover up his awkward mood.

And in the surroundings, there was a bunch of Heaven Rank powerhouses looking at Lin Yun with horrified expression. No one knew what to say.

Labard had a smile on his face, he was even gloating a bit.

'That Mafa is truly shocking people, this is no longer a monster I can handle. Sir Blakeman could only tie with him, me being defeated that fast isn't a loss in reputation.

'Moreover, space mages' fighting strength isn't that great early on, being able to resist a bit should be considered pretty good. Others might not even be able to block that elemental attack.

'Haha, maybe when Mafa reaches the level of a monster in the future, I would be able to say that I fought Sir Mafa and survived! Who would dare to say anything?'

Labard chuckled as he thought of that. The other mages remained silent, their expressions somewhat strange. As for Blakeman, he was looking at the ground while Reedman had a complicated expression.

Lin Yun finally figured out that something was wrong.

"Sir Reedman, this..."

Reedman sighed and kicked Blakeman hard.

"Idiot Blakeman, I think we can tell Mafa about that matter, what do you think?"

Blakeman couldn't pretend to be invisible anymore and could only sigh.

"Aren't you talking nonsense? If this monster Mafa isn't qualified to know, then who is?"

Hearing Reedman and Blakeman's words, the group of mages smartly approached to greet Lin Yun before leaving.

Lin Yun frowned, but calmly listened.

Reedman nodded at Lin Yun.

"Sir Mafa, come with me. Not only did you break the record of the severed fog, it is the all-time fastest record. And most importantly, your fighting strength surpasses 1st Rank Heaven Mages'.

"Thus, I'm not only going to tell you the secret, you can directly come with me and see it with your own eyes."

Chapter 1184 Secret 2

Reedman had a solemn expression as he took out a crystal rune and held it in his hand before continuing to walk towards the depths of the Ancestral Land.

There was still some space covered in a layer of thin fog, but the further in they went, the more stable the space felt to Lin Yun.

The more stable the space, the harder it was to shake it, and also the stronger the destruction after the space was shaken. In this area, even a crack as thin as a strand of hair might instantly kill a Heaven Rank powerhouse!

If space was shaken, the damage it would do to a mage would be no less than a large-scale Extraordinary Spell. If space was shattered, even the powerful barbarian-like Battlemage Blakeman might die here.

Similarly, the more stable the space, the stronger spatial pressure. This wasn't like gravity, it was more like slowly stepping into the depths of a deep ocean, with the pressure increasing from all directions.

After walking for a dozen minutes, Lin Yun's Mana Shield automatically activated. The pressure here had already increased to the point where it started injuring him. The elements were also harder to mobilize.

As he walked in this thin layer of dense fog, Lin Yun was becoming more and more doubtful.

The runes within the dense fog were clearly high level law runes, and there were even some runes he couldn't comprehend in the depths.

And unlike the runes of the severed fog which felt like a mountain and focused on a stable pressure, these runes felt like a deep sea.

After walking ten more minutes, Lin Yun had no other choice but to release some defensive shields. The pressure wasn't something an Archmage could resist. A 9th Rank Archmage might be unable to take another step from that point on or they would die in less than a minute, crushed to death.

With this, Lin Yun finally understood why the Heaven Rank was required to reach the depths of the Ancestral Land.

After walking for almost an hour, that layer of thin fog suddenly disappeared and a several-kilometer-wide huge forest of pillars could be seen in front of them.

Pillars were stuck to the ground which was as brilliant as a mirror. With a glance, Lin Yun could tell that the deep like the void ground under his feet was made of a huge amount of melted Star Magic Iron, the ground within several kilometers was a whole.

Furthermore, after special treatment, the Star Magic Iron had become somewhat transparent and runes and alchemy patterns could be seen inside.

This platform three to four kilometers in width was a huge array!

And those pillars twenty to fifty meters in height were all made from incomparably precious materials.

Lin Yun was shocked as he saw that.

These pillars were completely made out of Eternal Gold Essence and Eternal Dark Gold, this guaranteed that these pillars wouldn't decay after experiencing the passage of countless years.

'Damn, what kind of array is that?

'There is almost no Eternal Dark Gold produced in Noscent, where did that Eternal Dark Gold come from?

'And that Eternal Gold Essence... The biggest piece appearing in an auction was the size of a fist. These pillars need at least ten such pieces...'

Sizing up that huge array under his feet, Lin Yun's Magic Array automatically started studying it. After studying the runes and alchemy patterns of the array for a few seconds, Lin Yun couldn't help exclaiming, "This is a Planar Path?"

Most people couldn't notice, but as a first-rate Artisan that has even researched Heaven Grade arrays, even if he couldn't crack the array in an instant, he could see the general purpose of the array.

Surprise flashed on Reedman's face, soon replaced by relief.

"Correct, this can be said to be an array opening a Planar Path. This is what I wanted to tell you."

Lin Yun turned and glanced at the layer of fog surrounding this huge array and instantly understood.

'The changes in the space might have been caused by a terrifying powerhouse, most likely the ancestor of the Merlin Family, forcibly integrating a small plane into Noscent.

'This made the two world layer upon one another. The resulting space could be said to be Noscent's, and also the other plane's strange environment.

'The space is terrifyingly stable here and the dense fog's runes are suppressing the space to keep it stable to an alarming degree.

'Even if a Heaven Rank powerhouse self-detonated himself here, the space wouldn't shake.

'And everything was done in order to suppress this Heaven Grade array, so that any situation that could happen here would be pressured down and ended before any accident happened.'

Walking to the middle of the array, Reedman threw the crystal rune in his hand. The crystal rune slowly merged with the center of the array.

At that moment, Lin Yun felt the array under his feet activate, and sure enough, Reedman started releasing his own mana and chanted a strange incantation.

The chant lasted no less than five minutes before the array thoroughly activated and terrifying energy fluctuations wandered under their feet. Lin Yun even felt that if the energy fluctuations burst out from under his feet, he would instantly die.

All the energy fluctuations converged to the center of the array, and then a hundred meters part of the array lit up. It looked like a calm lake of flowing light. Gates emitting a very ancient aura slowly opened within that light.

Ancient lifeforms were carved onto the gates. A God's shadow could be seen at its peak, there were also traces of the Chromatic Dragons and Pureblood Elves.

All of the lifeforms were active before the 3rd Dynasty, and the overwhelming majority belonged to the Era of Gods.

The two doors had strange complicated characters carved onto them. Lin Yun couldn't understand some of the characters, but he could recognize them... These were runes of the Era of Gods, even older than the Nesser Dynasty.

The light was permeating the doors, and even if the doors didn't fully open, Lin Yun could feel boundless power coming from behind the entrance.

Reedman's expression was complicated as he looked at these doors. After a few minutes, he said, "This is the secret of the Ancestral Land, this Starry Sky Gate is the reason why the Merlin Family can stand at the forefront of the Andlusa Kingdom.

"And the reason why the Ancestral Lands and Holy Lands of the Andlusa Kingdom's most powerful forces don't concern themselves with the Andlusa Kingdom's matters isn't because they don't want to bother, but rather because they don't have the energy to spare.

"What we need to face is behind the Starry Sky Gate, our war is there.

"Those gifted enough to advance to the Heaven Rank would enter the depths of the Ancestral Land after their advancement. The Archmages surrounding the Ancestral Land and protecting it are retired Patriarchs or Elders that made great contributions.

"They have a very small chance of advancing to the Heaven Rank, so they could only stay there. In fact, it's not necessarily a bad thing to stay there.

"All the Heaven Rank powerhouses you have seen earlier, including Blakeman and myself, are preparing to enter the Starry Sky Gate.

"As for you, you are also qualified to know about this matter, I can even take you there."

Looking at this Starry Sky Door, Lin Yun had been feeling a very familiar aura. He couldn't help recalling the Heaven Enlightening Plane, that aura felt similar to the feeling he was getting...

"Sir Reedman, can you open this Starry Sky Gate? I want to take a look."

Reedman opened his mouth, but didn't say anything. He silently chanted his incantation.

One after another, law runes fell into the array under his feet. Then, the Starry Sky Gate slowly opened. There was no light within, only an endless deep starry sky. It seemed that inside was an endless world.

A galaxy apparently made of endless small stars spread out in front of the Starry Sky Gate as far as his eyes could see.

Reedman looked at this galaxy with a lifeless expression.

"Sir Mafa, I don't need to worry about your safety with your current strength, but please remember, you have to return immediately if you encounter some danger you can't resist against! You must remember this!"

Reedman's mumbling voice slowly echoed as he looked at that ancient starry sky path, as if he was recalling some bad memories.

Lin Yun stood in front of the Starry Sky Gate and looked at this ancient starry sky path. It was a galaxy spreading to an unknown space. It continuously emitted an ancient aura which gave Lin Yun the feeling that it was even more ancient than Gods.

“This ancient starry sky path, what is it? What is the battlefield?”

Lin Yun looked at the starry sky ancient path as he asked Reedman.

But Reedman softly shook his head.

“Everything there needs to be unearthed by yourself, and the most important thing is that I don’t know much. I can only tell you this, if you meet any danger you can’t resist, you have to hurry up and withdraw immediately or you’ll never have another chance.”

Reedman finished speaking, turned, and left.

Lin Yun opened his mouth, about to ask something else, but Reedman had already disappeared within the fog.

He frowned and gazed at that starry sky ancient path, faintly feeling that the secret of the Merlin Family was related to this starry sky ancient path. And the answers he was looking for might possibly be there.

The pressure surrounding him immediately disappeared as he stepped into the ancient starry sky path, it was replaced by a strange feeling that couldn’t be felt on Noscent Plane.

This was a boundless world, it wasn’t like the void, it was a true world!

As he stepped onto the ancient starry sky path, Lin Yun felt that the space was a lot more stable than Noscent’s. Moreover, he could feel that no formidable power could influence this starry sky, just like how small rivers couldn’t affect the sea.

He had set foot on a galaxy made of seemingly endless stars, and it was like a power was supporting him under his feet. He didn’t feel like his feet were firmly planted on the ground, but he wasn’t endlessly falling in a boundless void.

Up and down, left and right, everywhere was covered in an endless starry sky. He could even see meteorites rapidly sweeping past in this galaxy. The meteorites were full of holes while clearly visible steam and dust rose behind it.

Every meteorite was at least ten-kilometer-big, but when they swept past the ancient starry sky path, these meteorites looked as if they were affected by some power. They would at most brush past, but their power would never affect that slowly flowing galaxy.

There was no air here, no gravity, everything was endless nothingness. Lin Yun used a Mana Shield and replaced everything he needed with endless mana.

He followed the galaxy forward for who knew how long. Some meteorite fragments had started appearing in the surroundings of the galaxy, orbiting around the ancient galaxy path like moons.

At first, the fragments were at most the size of a person, with the smaller ones being only the size of a fist. But as they kept going forward, bigger and bigger fragments revolved around the ancient galaxy

path, until ultimately, ten-kilometer-big stone fragments were calmly revolving around the ancient galaxy path, looking like continents.

There was no sound at all, it was deathly silent. There was no living creature in the deathly stillness, only those bigger and bigger fragments of meteorites.

Slowly, twenty to thirty-kilometer-big meteorites appeared among the surrounding fragments. Some were regular in shape, like small continents. From the ancient galaxy path, he could even feel those pieces of land emitting a faint gravity.

More and more fragments were spread around the galaxy path, up until nothing other than fragments could be seen. Even when looking towards the void, all he could see were smaller fragments revolving further away from the galaxy path.

Lin Yun suddenly stopped. A thick and crazy evil intent appeared like a tidal wave. The huge mana fluctuations in this deathly silent path were as glaring as Noscent's sun.

He slowly raised his Draconic Staff and the Book of Death's shackles snapped, before transforming into runes that covered the surface of the Book of Death while its pages were automatically flipping.

In the surrounding void, a pitch-black dense fog enveloped the space around Lin Yun and turned the entire world into darkness. The starlight from the galaxy path was also dissipating, and even the radiance coming from under his feet was being covered.

A deranged and evil malice could be felt from this pitch-black dense fog surrounding Lin Yun. Those numerous rock fragments and fragments of continents had disappeared.

Lin Yun raised a shield and expressionlessly looked at this pitch-black fog enveloping his body, slowly shrinking the visible area around him.

The last place emitting radiance was the galaxy path under his feet, but even that galaxy path was darkening until its radiance thoroughly dissipated.

"Shroud Shadow Demon?"

Lin Yun blurted out, but he didn't seem so sure.

The moment the galaxy path's light under his feet completely dissipated, the Book of Death in Lin Yun's hands automatically flipped to the Truth Chapter.

Endless malice and crazy roars echoed in all directions when a phoenix roar suddenly echoed.

A crystal phoenix flew out from the Book of Death and within the endless darkness akin to a demonic light, it was like a scorching sun suddenly appeared. Its light frantically spread in all directions.

Within the area shrouded in light, multiple fierce monsters looking like huge bat corpses were unveiled.

An unknown number of Shroud Shadow Demons were covered with demonic light, and under the effect of the phoenix's light, those Shroud Shadow Demons were like vampires that had never seen the light of the sun. Burning scars appeared on their skins and frantically spread.

In an instant, the Shroud Shadow Demons within a hundred meters of Lin Yun turned to ashes, just like vampires would when in contact with sunlight.

Chapter 1185 Starry Sky Path

As for the remaining Shroud Shadow Demons, they turned and frantically fled as if they had encountered some terrifying predator. Unfortunately for them, they turned to ashes in less than a second.

In an instant, the surrounding space shone brightly once again and the galaxy under his foot emitted a faint radiance. Those boundless fragments could be seen calmly floating there while the starlight passed through the endless void, spreading to unknown areas.

The ashes were slowly attracted by the gravity of these landmass and slowly fell towards these fragments.

Lin Yun frowned. Doubt flashed in his eyes as he stood still.

Shroud Shadow Demons' characteristics were very obvious, light would be hidden wherever they appeared, replaced by pure darkness.

But this kind of monster only existed in the Era of Gods. They went extinct during the initial stage of the Nesser Dynasty.

In the Era of Gods, these things only existed in the Darkness God's God Nation. Shroud Shadow Demons could only exist in that pure land of darkness.

But after the end of the Era of Gods, the Shroud Shadow Demons lost the soil they relied on to live. As long as they appeared, they would inevitably cover up all the radiance in the surroundings, and the lifeforms surrounded by their darkness would have their blood absorbed, only leaving terrifying mummified corpses behind.

Unfortunately for them, the Pureblood Elven rulers of the Nesser Dynasty disliked these guys. They were bound to end up extinct when these idiots' ended up attacking a Pureblood Elf.

The Sunflame Elves' radiance wasn't something these guys could resist, and these seemingly terrifying Shroud Shadow Demon's only weak point was their biggest flaw, they couldn't be illuminated by any radiance. Even a firefly could injure them.

With the Sunflame Elves' radiance enveloping them, the only outcome was for them to be completely eradicated.

The Shadow Shroud Demons were forced into a dire situation and tried to take refuge with the only Chromatic Dragons that had a bit of connection to them, the Destruction Black Dragons. But it was a pity that the Destruction Black Dragons were also not very fond of these guys. The surviving Shroud Shadow Demons ended up burning to ashes under the Destruction Black Dragons' breathes.

And thus, Noscent's Shroud Shadow Demons went completely extinct. But it was said that there was another kind of Shroud Shadow Demons in Hell, or a subrace to be more exact. When those Shroud Shadow demons were burnt to ashes by flames, they would carry a thick smell of blood and sulfur.

Doubt could be seen in Lin Yun's eyes, 'Weren't these disgusting guys already extinct during the Nesser Dynasty? How could such a big group appear here? There had been over ten thousand Shroud Shadow Demons covering my sight...'

Lin Yun was on alert and summoned Syudos and Enderfa to follow him as he treaded the galaxy path. The Starry Sky Gate he had come from was already nowhere to be seen, only this galaxy path could be seen spreading through the void.

After another hour of moving forward, Lin Yun once again stopped. A small black dot jumped out of one of the fragments and rapidly flew towards him.

After a few seconds, Lin Yun noticed what that small black dot was.

A long three-headed monster with the body of an orangutan and six arms. It was hairless, its fur had been replaced by pitch-black scales. White scales were forming a strange rune on its chest.

The monster kept jumping from fragment to fragment, and a few seconds later, it was close to the galaxy path. Its two-hundred-meter-tall body was emitting an ancient and heavy pressure.

Its three pairs of eyes turned red as it saw Lin Yun and two layers of shark-like teeth were exposed in a creepy smile. Its saliva dripped down onto the fragments, and the acidic substance created a vast amount of white vapours upon contact, as well as a stinky smell.

Lin Yun frowned and immediately spat out a rune. Twelve flame vortexes appeared above his head and boundless fire spells transformed into a flood flowing towards that monster.

Syudos immediately summoned a flame gate and a large amount of high grade flames transformed into a flood that charged into that monster.

Enderfa's three faces had horrified expressions.

"Merlin, where the f*ck is this goddamned place. How could that kind of monster be there? Sh*t, don't let it get close! Definitely don't let that guy spit out its saliva!"

One of Enderfa's faces gave an urgent warning to Lin Yun while the other two vigilantly looked at that monster. The Ten Thousand Spell Wheel also rapidly revolved and elemental storms transformed into a hundred-meter-thick multi-colored storm that ruthlessly pressured that monster.

The monster couldn't approach due to the pressure and its six pairs of red eyes were filled with hostility while its six arms kept tearing forward. Its ten-meter-long sharp fingernails were forcibly cutting through the spellwaves and spellstorm while its six huge legs kept stirring those powerful attacks away like pinwheels. It was forcibly taking on Lin Yun's attacks in order to get closer to him.

Lin Yun frowned and his body slowly floated up. The Book of Death's Element Chapter buffed him, alongside the Draconic Staff's Purple Dragon who turned into a shadow on Lin Yun's back.

At the same time, an ancient scales' shadow appeared and the Ten Thousand Spell Wheel and Book of Mantras fell onto the trays on both sides as power gushed out from the void and into the Spell Wheel.

The Spell Wheel started bursting with Extraordinary power at a faster rate than it had on Noscent and on the Raging Flame Plane.

The flaming flood and elemental storm merged together and formed a huge flood of destruction that thoroughly pressured that monster. The monster's claws that could easily tear through the elemental storm could no longer do so, its body was suppressed on the spot and simply couldn't budge. It could only let out an angry roar.

A big mouth opened in the center of one of the monster's heads and a dense sticky liquid came out, forcibly extinguished the flames in front of it.

Whether it was the Bone-corroding Black Flames or Hellfire, they all ended like ordinary flames doused by a basin water.

Even the destructive elemental storm was forcibly extinguished. The monster took advantage of this opportunity to brandish its six arms and frantically slash forward, instantly crossing over a hundred meters in an instant. Based on the monster's build, it only needed to rush out once more before those huge sharp claws could tear through Lin Yun.

Enderfa let out a frightened shriek, "Merlin! Hurry up and get rid of this guy, its saliva can easily tear through your runic shield! Even Syudos and I can be destroyed if that guy's saliva fall onto us!

"Its claws are sharp enough to tear through space and can destroy mana itself! Its heads! Shatter its heads!"

Lin Yun coldly looked at the monster before him and calmly waited for that monster to open its huge mouth to throw a huge Law Runic Bomb in.

Then, before the Law Runic Bomb devoured the surrounding power, Lin Yun threw it out.

At that instant, it looked like a multi-colored light appeared behind the Law Runic Bomb as the void's energies were more easily absorbed than Noscent's, and were even fiercer.

As the sticky and dense sphere of water condensed in that monster's mouth, the Law Runic Bomb rushed in.

"Rumble..."

A loud sound echoed as the berserk power exploded in the monster's mouth. In an instant, half of the monster's head exploded into pieces and that condensed water also burst, instantly destroying all power it came in contact with. It looked as if the berserk power thoroughly dissipated within a second.

After losing a head, the monster seemed to go crazy and completely ignored defense. The white rune on its chest turned black, its six arms thrusting towards Lin Yun like a fish going against the current as it rapidly charged towards Lin Yun.

Lin Yun's eyes turned cold, he remained motionless and unhurriedly chanted an incantation. Law runes kept appearing behind him and soon, a pitch-black Wind Blade was condensed.

Enderfa and Syudos understood that this was the critical moment. The flaming gates opened wide and flames turned into a berserk flood that kept clashing against the monster's body. There were even quite a few flames that entered the monster's body through its wounded head and burnt it from the inside.

As for Enderfa, he seemed to have gone mad and roused the Ten Thousand Spell Wheel to revolve like a pinwheel. Boundless elemental storms looked like a multi-colored tornado that pressured the monster.

The monster's speed somewhat weakened, but it could definitely appear in front of Lin Yun within three seconds!

Lin Yun's pitch-black Wind Blade wasn't immediately thrown out, rather, he condensed another pitch-black Wind Blade. This was the law rune frame used to create law runes from runes, it contained a wisp of power far exceeding what he could currently grasp.

The Magic Array was also roused to its peak and kept calculating the trajectories of the monster's arms in order to find an opportunity.

Seconds slowly passed one after another, but Enderfa's three faces somewhat changed colors after two seconds passed.

"Merlin! Damnit, we are done for if you don't get rid of that guy!"

The monster was already eighty meters away from Lin Yun and it only needed one more step before its six sharp claws could instantly tear them apart.

At this time, the two pitch-black Wind Blades Lin Yun controlled flew out simultaneously. It looked like everything was a coincidence as the two pitch-black Wind Blades threaded through the small gaps of the monster's rapidly slashing claws and simultaneously landed on the two remaining heads.

One of the Wind Blades landed on the monster's mouth and cut off half of the head, while the other cut through the monster's neck and beheaded its last head.

Just as the remaining two heads were beheaded, Enderfa and Syudos' attacks fell onto the monster's beheaded heads and reduced them to pieces. Having lost its life didn't stop its body from falling. It was instantly covered in flames and the elemental storm tore its corpse into fragments while the boundless flames burnt those fragments down.

A couple things resisted the flames and were behind, one of which was a water sphere. Whether it was the elemental storm or the flames, they couldn't sway it in the slightest.

As the fight was over, the scales' shadow dissipated.

Enderfa's three heads were still alarmed and Lin Yun's expression wasn't great.

"Merlin, where is this damned place? How could such a terrifying monster be there?"

Lin Yun didn't speak, he waited for the flames to stop burning before slowly advancing. The monster's huge body had already been turned to ashes, but there were still a few things remaining.

Some sharp claws had been deformed by the flames, they looked like pitch-black metal and could even tear through elemental storms.

This was the Submerged Magic Essence Iron from Noscent's legends. It could completely restrict mana and elemental power. This Submerged Magic Essence Iron only existed in the Era of Gods, but it wasn't a magic metal ore.

And because it wasn't a magic metal ore, it couldn't be mine from an ore vein.

For a long time everyone thought that it was a kind of mineral, but it wasn't until Noscent's peak that a mage proficient in archaeology unearthed the truth. There had been no Submerged Magic Essence Iron ore vein, all the Submerged Magic Essence Iron had been handed down.

It was produced by a kind of lifeform called Laustraul, Mana Outcasts!

That kind of lifeform was birthed during the Era of Gods and was a lifeform that could completely eliminate mana and elemental power. Their bodies didn't contain any mana or elemental power. They were just like the rarely appearing good-for-nothings of the human race that appeared once in a millennium and couldn't store a wisp of mana even with the use of the Mana Baptism Potion.

But the Mana Outcasts weren't weak. No one was willing to provoke them during the Era of Gods, their sharp claws could easily tear through all mana and elemental power. They could forcibly tear through even the most dangerous elemental storms, which were deadly to everyone else, with their body's formidable resistance to elemental power and their sharp claws.

Moreover, this kind of powerful monster would be at the Heaven Rank upon reaching adulthood, they could even have physical fights with Dragons.

But later, the war between Gods started and one of the Gods made plans against the Mana Outcasts, he slaughtered them all and left none behind. This was all in order to get their claws and refine them into a weapon. This was the famous Submerged Magic Blade. Even Constance would take the initiative to dodge when faced with the Submerged Magic Blade.

And the thing that made people even more reluctant to provoke that race was their saliva. That terrifying thing could extinguish all elements and mana. As long as it came in contact with one's body, it would continuously destroy one's mana up until their mana dissipated.

Even after the saliva dissipated, this kind of power would still remain like a curse, and mana would slowly thoroughly dissipate.

And in the Era of Gods, all lifeforms possessed mana, many people even relied on mana to live. Mana dissipating was no different from losing their lives, just like the Dark Elves back then.

Thus, Mana Outcasts' saliva had a resounding name, Water of Misfortune.

Even Extraordinary Spells could be extinguished by the Water of Misfortune. It was rumored that the Godfire of a powerhouse surpassing the Heaven Rank had once been carelessly sprayed on by a Mana Outcast, only to end up thoroughly extinguished.

Lin Yun picked up the Submerged Magic Essence Iron deformed by the heat and cautiously looked at the lump of water on the ground. That "sphere" of water was wrapped in a membrane containing the sticky and dense liquid. That was the famous Water of Misfortune.

It had thoroughly disappeared in the current era. It was only after 3,800 years that a mage discovered a lump in a small plane. Then, that mage poured that Water of Misfortune onto his own foe and made his foe exhaust all his mana until he passed.

“Heavens, Merlin, you aren’t planning on taking this dangerous thing, are you? Sh*t, this is playing with fire. You’ll be done for if you are carelessly infected by it! That’s a dangerous thing that can even extinguish a Godfire!”

Enderfa hid a few dozen meters away, his three faces looking at the Water of Misfortune in alarm.

Lin Yun shook his head and said nothing.

Water of Misfortune was relatively dangerous, but it wasn’t something that couldn’t be used. After all, a few millennia later, those crazy mages were pursuing the truth behind everything. There was nothing they wouldn’t do and no dangerous thing they wouldn’t touch. They even dared to capture Hell’s Devils and dissect them in laboratories.

Water of Misfortune could be used to make a single-use weapon. Even if it could be used only once, it was a formidable killing tool. That Mana Outcast was level 41 or 42, but if this Water of Misfortune was used properly, it could absolutely get rid of a 2nd Rank powerhouse, it could even infect a 3rd Rank Heaven Mage’s mana.

Lin Yun took out a pile of ordinary steel and a pile of glass and then released flames to burn the glass. Once the glass was melted, he turned it into a sphere and wrapped it around that sphere of head-sized Water of Misfortune.

Once the glass cooled down, the Water of Misfortune had already been wrapped into this ordinary glass sphere. Then Lin Yun melted the steel and turned it into a sphere that wrapped around the glass, forming a steel sphere.

The Water of Misfortune was perfectly stored once the steel sphere cooled down. It was that simple. That thing completely suppressed mana and elemental power, but ordinary glass and ordinary steel could suppress it.

After two layers of protection, Lin Yun took out a Spatial Ring and put the metal sphere in.

He didn’t dare to be careless with such a dangerous thing.

After getting the loot, Lin Yun continued forward on the starry sky ancient path.

A few minutes later, Lin Yun saw a corpse on the fragments.

The slender body was wearing an exquisitely carved battle armor which seemed too flashy, but Lin Yun knew that it was already an extinct Pureblood Elven crafting art. That seemingly frail battle armor had terrifying defensive abilities.

The sharp long ears displayed this corpse’s identity, it was an Elf bearing a crescent moon on his forehead, and holding a longbow that had lost its luster. Added to the clear style of the battle armor, this clearly showed that the corpse was a Silvermoon Elf.

‘A Silvermoon Elf, one of the Pureblood Elves!’

Lin Yun stood on the edge of the starry sky path and looked at the Silvermoon Elf’s corpse on that fragment. His battle armor had already lost its luster and his delicate longbow had already lost its mana, even the crescent moon on his forehead had lost its light and had turned into a dark imprint.

He had been dead for an unknown amount of time, but due to this place's special environment, his corpse has remained intact. However, Lin Yun knew that if he so much as lightly touched that corpse, or if any external force came in contact with his body, then the corpse would turn into ashes and dissipate.

He saw another corpse three minutes later, but it was the corpse of a Sunflame Elf this time.

As he slowly made his way forward, Lin Yun encountered more and more corpses as the fragments surrounding the starry sky path became covered in the corpses of a large number of Pureblood Elves.

Chapter 1186 Corpses of the Pas

Silvermoon Elves, Sunflame Elves, Darknight Elves, Holysong Elves...

The corpses of the Pureblood Elves were there... The corpses of the former rulers of the Nesser Dynasty were just littered on those fragments of meteorites like trash.

And sure enough, the corpses of Dragons started appearing as he kept going forward. Then, Chromatic Dragons' corpses appeared. The huge Chromatic Dragons' corpses were like small mountains surrounding the starry sky path. Many Pureblood Elves' corpses fell on top of the Chromatic Dragons' corpses.

Lin Yun saw the corpse of a Three-Headed Gold Dragon less than three minutes later.

Lin Yun's eyes were covered with shock as he foolishly looked at that Three-Headed Gold Dragon's corpse.

'What the hell happened here? Where is this? What happened in the end?'

Involuntarily, Lin Yun recalled what he had seen on his journey leading to the Heaven Enlightening Plane.

There was the same unknown number of Dragons' corpses, and countless Pureblood Elves' corpses. The corpses of Chromatic Dragons could be seen everywhere.

Even if the Three-Headed Gold Dragons were the strongest among the Chromatic Dragons and were existences comparable to Gods, one of them had still fallen on that path.

And now, the corpse of a Three-Headed Gold Dragon was floating in front of Lin Yun's eyes.

The Three-Headed Gold Dragon had already died, but his eyes were wide open, looking towards the depths of the ancient starry sky path with some unknown emotion.

Lin Yun frowned and continued forward, he was slowly becoming numb to it.

The corpses of the legendary Pureblood Elves were spread out like trash, and Lin Yun had already seen over a hundred corpses of the even rarer Chromatic Dragons.

As he continued forward, it didn't take long before shock could be seen on his numbed face.

A corpse spanning over several kilometers was calmly floating on the side of the ancient starry sky path.

The corpse was covered with emerald-colored plants that could drip water. There were even several flowers blooming among those clusters of plants.

The corpse had a deer body with six long legs and the upper body of a humanoid. Atop the corpse's head were antlers akin to withered branches.

It looked like a centaur covered in numerous exotic patterns, with an extra pair of legs, and and emerald-colored skin.

Lin Yun foolishly looked at this corpse as a loud ringing echoed in his head.

'God!

'A God's corpse!'

It was the God that left the most profound impression on Lin Yun. That God's power and characteristics were the most recognizable, that was the God of Nature!

When he had just arrived at the end of the Magic Era, in Heiss City's endless desert, not a speck of vegetation could be seen in the entire world. The only edible food were those disgusting sandworms.

At that time, Lin Yun heard someone say that it would have been good if the God of Nature was still alive. The God of Nature was the shepherd of the forests, all forest shepherds were subjects of the God of Nature. During the Era of Gods, many elves were subordinate races of the God of Nature.

The Nature God was one of the very few Gods that loved peace. His power was related to plants, he could turn deserts into oasis and could give birth to endless vegetation.

When he first arrived at the end of the Magic Era, Lin Yun had been extremely interested in the power of the Nature God. If he had that power, he would have been able to eat some vegetables and fruits. Even gnawing on bark would have been better than eating those disgusting sandworms.

Thus, at that time, he looked for many things related to the Nature God in Heiss' library.

Lin Yun was very clear about the Nature God's appearance, the characteristics of his power, as well as the patterns covering his body.

In the legends, the Nature God had already fallen in the calamity at the end of the Era of Gods, yet no one found his body, or it had never been recorded. His body being here was unexpected!

As he thought of this, Lin Yun couldn't help pondering. The corpses of the 72 Gods, and many powerful existences comparable to gods, weren't found after the end of the Era of Gods and during the Nesser Dynasty.

After all, even if a God's corpse decayed, it couldn't not leave any trace. Destroying a God's body was a lot more difficult than destroying a God's soul. Many Gods' bodies could be described as invincible.

The Gods' corpses had been nowhere to be found, yet the corpse of the God of Nature appeared here... Did that mean that the corpses of the other Gods would be further along this path?

Lin Yun gazed at that ancient starry sky path, his expression somewhat empty.

"Merlin, did you notice? The Nature God's death was a bit strange."

As Lin Yun was blankly staring at the end of the ancient starry sky path, Enderfa's bewildered voice echoed in his ears.

Enderfa's three faces were looking at the corpse with bewilderment and horror, he was even trembling a bit.

"Merlin, did you not notice? The Nature God apparently died under his own power..."

Lin Yun's head instantly turned towards the Nature God's corpse and he started studying it once again.

Lin Yun's pupils suddenly shrunk.

"Damn, how could this be?" Lin Yun couldn't help letting out a surprised exclamation.

He had been startled by having discovered the corpse of the God he had the most knowledge on and which had left the deepest impression on him, so he hadn't noticed.

But after being reminded by Enderfa, Lin Yun froze.

'The Nature God died from his own power?'

The emerald glistening plants and those pretty flowers were all the trademark of the Nature God, the corpse of any creature killed by the Nature God would end up like this.

'But the one dead is the Nature God!

'Among all Gods, only the Nature God had this kind of power. Just what happened?'

Lin Yun crazily turned around and flew to a ten-kilometer-big fragment. He located the body of a Darknight Elf and carefully examined it. He then discovered that this Darknight Elf's corpse had been pierced by a formidable power, and the traces remaining within the wound clearly belonged to a Darknight Elf's piercing magic arrow.

He walked back a bit more and checked every corpse once.

Whether it was the Pureblood Elves or the Chromatic Dragons, none were left. But after inspecting a few hundreds, Lin Yun's expression turned strange.

The Sunflame Elves' corpses had died from blazing sunlight.

The Destruction Black Dragons had been deformed beyond recognition by terrifying corrosive power.

When he finally reached the Three-Headed Gold Dragon, he discovered that the cause of his death had been the back of his head being pierced by a huge power, and from the shape and traces, that wound completely fit the claw of a Three-Headed Gold Dragon.

In other words, this Three-Headed Gold Dragon had been eliminated by another Three-Headed Gold Dragon.

And the corpses inspected before, whether they belonged to Pureblood Elves or Chromatic Dragons, had all been killed by the power they themselves excelled at.

'All the corpses have the exact same cause of death as the Nature God, they all died from their own power!'

Lin Yun blankly looked at the corpses of these Pureblood Elves and Chromatic Dragons.

"Could it be that an internal strife happened in the past and they massacred one another? How come they all died from the power they were proficient with?" Enderfa shivered as he spoke, asking this question with a strange expression.

Lin Yun shook his head and looked in the distance.

"No, Impossible, I've already done a careful examination, and whether it's the Chromatic Dragons or the Pureblood Elves, their corpses would turn to ashes upon touch. In other words, they look exactly the same as when they died.

"The way they collapsed indicates that they had experienced a cruel battle, and they had all fought side by side until they all died there.

"It's unlikely that two groups of Pureblood Elves and Chromatic Dragons killed each other and died there.

"The most important reason is that the God of Nature also died from his own power. While that scenario could have been possible for the Pureblood Elves and Chromatic Dragons, it's impossible for a second Nature God to kill him. I can't understand what happened there..."

Even if he didn't understand, Lin Yun kept moving forward. But soon after passing the Nature God's corpse, Lin Yun stopped.

He could faintly feel an energy storm wreaking havoc ahead, he could even feel the energy storm spreading towards him and it wouldn't take long before it reached this place.

After hesitating, Lin Yun recalled Reedman's warning. The energy storm was still far from here but it already gave Lin Yun a feeling of powerlessness. He mumbled and was about to go back...

But just as he turned his head, shock flashed in his eyes as he looked into the depths of the starry sky.

The energy storm was wreaking havoc in the depths of the starry sky. The ancient starry sky path Lin Yun was standing on was at most on the outskirts, but he could still feel that the terrifying energy storm's power could tear a small plane apart.

And he also felt battle fluctuations behind that energy storm. Looking at it from a distance, it was like an area where terrifying energy wreaked havoc suddenly appeared which even affected the stars in that location.

The seemingly small stars looked like pebbles drawn into a whirlpool as they fell into the energy storm, before being ripped apart and transformed into fragments.

Lin Yun knew that although those stars seemed very small, it was only because they were very far away. Those pebble-like stars were all at least several-thousand-kilometers in diameter.

There was even a gaseous star that was clearly bigger than the other stars and which had countless fragments of meteorites forming disks around it.

That star was several-dozen-times bigger than the other stars, yet it still looked like an egg being continuously deformed by the power of the energy storm. The gas revolved and sunk into the raging energy storm.

The energy storm distorted the starry sky and it looked like the starry sky was about to collapse. This terrifying change would instantly kill Heaven Rank powerhouses if they entered.

This was a real Void Storm capable of destroying planes.

But what really shocked Lin Yun were the battle fluctuations coming from behind the energy storm. The energy storm couldn't suppress the battle fluctuations as they spread through it.

Because of that kind of powerful battle, Lin Yun could faintly see the void constantly collapsing behind the energy storm.

'Who? Who is fighting in the depths of the starry sky?'

It was unknown how far the battle was, but the fact that their battle fluctuations could pass through the energy storm shocked Lin Yun. He was completely frightened.

This clearly exceeded the power of the Heaven Rank. No, they were terrifying existences that exceeded the Heaven Rank by a great degree.

Lin Yun looked at the depths of the starry sky, unable to calm down for a very long time. After a few seconds, he decisively turned around and left.

He could see very far in this open starry sky. That energy storm was still a few dozen kilometers away, but Lin Yun could see it from that far. The area being torn apart by the energy storm spread over a few dozen kilometers. It was unreasonable...

The energy storm might be raging over here in less than an hour. Lin Yun could already see the starry sky ancient path crumbling. If it reached over here, then even if Lin Yun didn't die, he would be forever lost in the starry sky.

Although he was somewhat curious about the two powerhouses fighting in the depths of the starry sky, he didn't dare to explore.

After another look at the Nature God's corpse, Lin Yun frowned and followed the path of the ancient starry sky path back.

After walking for a long time, he saw the huge gate of light calmly floating on the surface of the galaxy path, while the galaxy path continued to spread to unknown depths.

Seeing the Starry Sky Gate, Lin Yun stopped and sat on the path to calmly comprehend his surroundings.

The battle fluctuations from the depths of the starry sky spread to that location and he could faintly sense them now and then. He could even sense that devastating energy storm and see a rough outline.

Lin Yun suddenly raised his head and looked into the depths of the starry sky. A seemingly fingernail-sized dot of light flickered in the starry sky.

After a dozen seconds, that flickering dot of light slowly darkened, and he could even faintly see that orange light dot being twisted and torn apart, until it completely disappeared.

Lin Yun was terrified.

'Star...

'F*ck, those powerhouses actually tore a star to shreds?

'Damn, even the smallest star should be at least a few hundred thousand kilometers in diameter, right? Who the hell are they? Who is fighting in the starry sky?

'They are so far... Did the fluctuations of the energy storm appear because of that star's destruction?'

Lin Yun stared blankly at the location where that dot of light flickered before darkening, he was still in disbelief.

Chapter 1187 Reedpush Plate

Lin Yun didn't exactly know how big the smallest star was, but he knew that only a star could emit that kind of light, and it had to be very big to be visible. Even if the body of a God was lying on that star, it would be comparable to a stone on a beach.

But what kind of power was formidable enough to extinguish a star?

Lin Yun suddenly felt that many of the things he read about in Heiss City's decaying library couldn't express this situation. Descriptions couldn't be used as reference points especially when it came to the Heaven Rank or power beyond the Heaven Rank.

That kind of power could be felt but couldn't be expressed with words.

Lin Yun had always used the records in the books as reference and suddenly felt that he might have been restricted by the books. He had completely underestimated Heaven Rank powerhouses and powerhouses surpassing the Heaven Rank. Just how much power could they use...

The books always explained that those under the Heaven Rank were mortals, that the gap between mortals and Heaven Rank powerhouses was terrifyingly high and that the gap between every subsequent rank was similarly terrifyingly big. The higher the rank, the harder it was to advance.

Now, Lin Yun clearly understood that it couldn't be expressed in words at all. Just how powerful were those God-like mages during Noscent's peak?

Lin Yun suddenly felt that he had greatly underestimated Noscent at its peak...

Sitting in front of the Starry Sky Gate, Lin Yun's heart slowly calmed down. Even if some danger befell this place, he would be able to instantly step across the Starry Sky Gate to return. As for that huge deepsea-like pressure on the other side of the Starry Sky Gate, it might be there in order to stop any accident from surging out of the starry sky.

Even the energy storm wreaking havoc would be unable to tear this Starry Sky Gate to shreds. Even if it poured in the Starry Sky Gate, it wouldn't spurt out on the other side.

Lin Yun closed his eyes and calmly sensed the fluctuations within the starry sky. There were all kinds of laws and they could be felt clearly, with the Spatial Law being the easiest to feel. Anyone entering this place would feel insignificant to the point where it would even give birth to a deep fear.

Even the terrifying force that made a part of the starry sky collapse and destroyed a star was only a small wave when compared to the entire starry sky.

Lin Yun sat in the starry sky and closed his eyes, remaining motionless. The mana fluctuations coming from his body slowly weakened until they ultimately dissipated.

Then his life aura slowly weakened until it thoroughly dissipated. It was like his entire self merged into the starry sky. The ancient and all-inclusive aura spread through the entire starry sky.

An unknown amount of time passed before Lin Yun suddenly opened his eyes with a dull gaze. A starry sky could faintly be seen flickering within his eyes.

Lin Yun's body didn't emit mana fluctuations, he was like an ordinary person that had never learnt magic, even his life aura had greatly weakened. It had weakened to the point where Lin Yun's existence might not be discoverable with Detect Life.

After taking a deep look into the starry sky, Lin Yun turned and entered the Starry Sky Gate.

As he walked out, the deepsea-like pressure appeared once again and pressured Lin Yun's body from various directions.

But Lin Yun didn't use mana, nor did he raise a shield. It looked like he was just relying on his body to resist the pressure.

Reedman was waiting outside the Starry Sky Gate and couldn't help sighing in relief when he finally saw Lin Yun.

"Sir Mafa, you finally returned! I was about to go look for you... Hold on, Sir Mafa, what about your mana?"

Reedman looked at Lin Yun in shock, he completely hadn't expected Lin Yun's body to have no mana fluctuations. He thought that Lin Yun encountered some accident in the ancient starry sky path. But he soon reacted, even he had to use a shield to resist the pressure here, yet Lin Yun was resisting without a shield, and didn't look uncomfortable...

'Damn, what happened in the end? What did that monster Mafa encounter in the starry sky ancient path?

'Is he resisting that huge pressure just with his body? Even Heaven Sword Saint need to rouse their Aura to resist the pressure of this place... Has he found a treasure that increased his physique to an unfathomable level?

'No, no, Mafa's body doesn't seem different from before, but he isn't using a shield...

'It's as if the pressure is sliding alongside his body and isn't pressuring him down, as if he had already merged with this space and became a part of the pressure...

'What the hell happened...'

Reedman's expression was indescribable. Even he, as a Peak 3rd Rank Heaven Mage, still needed to use mana to resist the pressure while Lin Yun, an Archmage, didn't need mana to resist the pressure.

Most importantly, he couldn't make sense of it. Ever since he returned from the starry sky path, Lin Yun had become even more mysterious and he couldn't figure it out.

Lin Yun smiled but didn't answer Reedman's question, he only said the following three words.

"I greatly benefited."

Reedman sighed.

"I've been worried that you would never return after entering the starry sky path. Many powerhouses of the Merlin Family have been thoroughly lost after entering the starry sky path.

That galaxy could be said to be the most crucial coordinates and guide, but there are too many dangers on the ancient starry sky path. Nothing can be expected and accidents could happen at any time making it impossible to find the galaxy. The galaxy might temporarily disappear too.

After all, in this kind of place, a small gap in an angle could result in a ten-thousand-kilometer-wide gap. Being lost within the endless void is very normal..."

Lin Yun nodded. Some mages might be unable to understand, but Lin Yun was a transmigrator, he couldn't be more clear about it. In the starry sky, if there was no complete coordinates, it would be impossible to find a target. Without coordinates, even something as big as a sun might not be found.

Throughout Noscent's eras, the few powerhouses that entered the endless void ultimately disappeared forever, never to be seen again.

And the most likely possibility was that they didn't die in the starry sky, but became lost.

"Could it be that after so many years, none of those that were lost managed to return?" Lin Yun asked casually.

Others might be lost, but the ancient starry sky path that the Merlin Family possessed had a guidance, even if that guidance wasn't fail-proof.

Reedman seemed to think of something.

"As for the people lost, no one came back, but an ancestor managed to transmit a piece of information back after getting lost. It was a letter to be more precise.

"But the information was too vague, it looked like coordinates, but they were no coordinates of Noscent's world, we can't figure out what was recorded."

Lin Yun was originally just asking for the sake of it, but he hadn't expected that there would be something.

Reedman seemed to have ignored this news for a long time as he had a hard time remembering it.

“It’s already been a long time, so we have neglected this message.

“When this message was sent back, we specially sought people proficient in archaeology to study the letter’s raw material and craft. It came from the early stages of the 3rd Dynasty.

“This letter was sent without damage and the content didn’t change, but the raw materials had already gone extinct in the later stages of the 3rd Dynasty. Moreover, that type of craft is something only the peak powerhouses of the 3rd Dynasty mastered.

“It was when a substitute to the magic scrolls’ materials appeared, with its effect being only a bit weaker than beast hide.”

“3rd Dynasty’s magic scroll paper?” Lin Yun suddenly interjected.

Using paper to replace magic beasts’ hide for magic scrolls... In this era and the previous ones, only the 3rd Dynasty’s magic scroll paper had this ability.

Reedman nodded.

“Indeed, this is a bit strange. At that time, the ancestor used the paper of the 3rd Dynasty to send some information back. This was naturally treated seriously by the family.

“The information on top of it had been deciphered, but the deciphered information were coordinates and we didn’t get anything of value after checking the place.

“Aside from those, there was this complicated disk symbol on the letter. At the time, our family hired an Artisan but he only figured out that it was a perfect symbol. He couldn’t ascertain what that was, it could be a kind of precise alchemy device, or some kind of special symbol.”

Lin Yun became interested.

“Can you let me take a look at that letter? You should have stored it, right?”

Reedman shook his head.

“The original letter is stored in our Family’s depths, I don’t have the qualifications to take out the original. But there is no lack of copies. In order to figure out the meaning behind it, every Heaven Rank powerhouse in the family has a copy.”

Reedman took out a smooth crystal with the copy sealed within.

Lin Yun took the crystal and looked at the crooked and baffling characters, as well as the symbol of the disk below it. While he remained calm on the outside, a storm raged in his mind.

‘Reedpush Plate!

‘One of the core components of the Shelter Tower!’

Even if he forgot anything else, Lin Yun simply couldn’t forget this, he couldn’t have made a mistake. That special structure looked like a disk, but the frame and patterns were completely different from ordinary alchemy.

It was also completely different from the Full Right Angle alchemy patterns that would appear in the future. It was a kind of strange and unique construction method.

In addition to the patterns constructed on that thing, a unique rune was merged into it. He definitely couldn't be wrong!

Lin Yun held the crystal plate and looked at the content of the piece of paper with a blank expression. He couldn't hide the shock in his eyes and it looked like the starry sky in his eyes flickered frantically.

'A person of this era used paper of the 3rd Dynasty to send a very obscure piece of news containing the symbol of the Reedpush Plate, one of the core components of the Shelter Tower.

'After all, Reedpush Plate appeared during the peak of Noscent.

'A piece of paper spanned three eras, was there anything weirder than that?'

He looked at the crooked characters, but it seems that the Merlin Family had already gone through the trouble of researching them and found no valuables there.

Lin Yun was stunned as he used the Magic Array to calculate the coordinates.

This was truly a coordinate, but the algorithms and references it used weren't from this era. Or it could be said that they simply hadn't spread in this era.

Coordinates needed a reference object as point of comparison. Using that reference object, they could accurately describe the coordinates' location.

Just one coordinate was meaningless.

And the reference point above the crooked characters definitely wasn't something that could be calculated in the current era.

Lin Yun looked at the crystal plate and felt that it would be very difficult to calculate them within a short time, because he didn't know the calculation pattern used by this coordinate.

"Sir Reedman, can I keep this piece of crystal to study it?"

To be sure, Lin Yun decided to keep the copy to research it. Although the information had already been deciphered, it wasn't guaranteed that they didn't overlook anything.

"Sir Mafa taking it is for the best." Reedman casually answered.

He then closed the starry sky path, led Lin Yun out, and immediately left.

'Heavens, I'll go crazy if I stay with this monster. His strength has reached the point where I can't understand it. How did he do it? I couldn't feel his life aura even though I was standing next to him!

'A monster, he is a complete monster. I didn't feel that way when I met Santon back then. After all, Santon was already a Heaven Rank powerhouse.

'Even now that his strength far surpasses my own and I can no longer sense his strength, it's still nowhere close to the feeling I get from Mafa. Just what the hell is going on?'

'Forget it, it doesn't matter. That monster isn't something I can analyze, I'd better report to Sir Balakra...'

Reedman hurriedly left as if he had seen a ghost and just left Lin Yun in the Ancestral Land.

As Reedman left, Lin Yun started impatiently deciphering the letter's information.

After an hour, he finally sighed in relief.

He hadn't expected that it was using a kind of algorithm of the 3rd Dynasty, an algorithm using the suns and stars as a three-dimension reference point.

That algorithm appeared in the 3rd Dynasty and was greatly appreciated by the many alchemists fond of accuracy.

But because it was too complicated, the knowledge needed was extremely high. Aside from some first-rate alchemists, it wasn't very popular. Now, there was already no alchemists that knew this kind of algorithm.

Up until Noscent's peak. When conquering endless planes, the ordinary positioning algorithms were no longer sufficient and the error rate was relatively high. This kind of complex algorithm that could be used for planes and space spread widely once it was unearthed.

From the outcome of the calculations, it pointed out a certain area in the Odin Kingdom.

After putting away the crystal, Lin Yun's previous plan re-surfaced.

Building the Shelter Tower ahead of time!

When he got his Natural Demiplane, and with the Natural Demiplane operating more and more like a real world, Lin Yun temporarily shelved his plan to build the Shelter Tower ahead of time.

Because building the Shelter Tower didn't only require a huge amount of wealth, it also required the plans of the Shelter Tower.

The wealth Lin Yun currently possessed could be said to be comparable to a major force, but it was far from enough to build the Shelter Tower, and the most important part was the complete design of the Shelter Tower.

Lin Yun simply didn't have them.

Because there was no complete design of the Shelter Tower in the decaying library, there was only the designs of some lesser parts.

Many core components simply didn't have a plan.

Just like this Reedpush Plate, one of the core components of the Shelter Tower. During the peak of Noscent, it was already a complete component that hadn't been crafted by the mages of that era. Without the guarantee that they could recreate it, none of those crazy mages was daring enough to tear that Reedpush Plate apart.

But now, the location pointed out by this letter was most likely the place where the Reedpush Plate was hidden. And this once again raised the idea of building the Shelter Tower in advance in Lin Yun's mind.

As he grew stronger, that invisible feeling grew stronger and stronger.

When he saw the symbol of the Reedpush Plate, Lin Yun suddenly felt that the Shelter Tower might possibly be crucial.

The knowledge that Noscent would be destroyed in the future was like a sharp sword hanging above his head, and he could only watch as that sharp sword slowly fell.

He couldn't be sure whether he could reach a transcending realm before Noscent's mana started drying up, or whether he could reach the stage where Noscent's destruction had no effect on him. There was no difference between a Magic Apprentice and a powerhouse that transcended the Heaven Rank in front of that calamity.

As for his Natural Demiplane, it had now developed very smoothly and perfectly, it had the potential to develop into a true world.

But the Natural Demiplane wasn't too reliable. As he came in contact with more and more secrets and clues, Lin Yun felt that even if the Natural Demiplane developed into a true world before Noscent's end, it might not necessarily be able to shelter him.

More importantly, the Natural Demiplane's development was becoming more and more difficult, whether it could develop into a true world before Noscent's destruction was uncertain, the possibility was quite low.

The Shelter Tower may be the key. After transmigrating to this era, Lin Yun had been exposed to the events of the previous eras and faintly felt that it was impossible for those powerful God-like mages to not have noticed the signs of Noscent's mana exhaustion calamity ahead of time.

Building the Shelter Tower might be the last method to fight Noscent's destruction.

Chapter 1188 Ambush

It's just that building the Shelter Tower would require too much work and an enormous amount of material. Moreover, at this time, it was like crossing a river blindfolded, everything had to be done step by step. Even Saint Alchemists couldn't directly come up with the Shelter Tower's design.

For various reasons, the Shelter Tower hadn't been completed. The mana started becoming exhausted and the construction of the Shelter Tower halted.

But even an incomplete Shelter Tower sheltered Noscent for a few dozen millennia, forcibly delaying its destruction until Noscent's mana was thoroughly exhausted and no vegetation could be seen for a very long time.

When the Shelter Tower's radiance thoroughly dissipated, Noscent ended up destroyed.

'If there was a complete Shelter Tower, would it be possible that the calamity wouldn't even start? That the mana exhaustion wouldn't happen?

'If we start building a Shelter Tower and complete its construction while Noscent is at its peak, would Noscent's mana even be exhausted? Maybe it wouldn't deteriorate at all?'

Lin Yun frowned and thought hard, the knowledge and wisdom he inherited almost all came from those terrifying mages of Noscent's peak era.

'Then, why did those mages ultimately chose to construct the Shelter Tower? It's not like there was no mage with a Natural Demiplane at that time, so why did they regard the Shelter Tower with so much importance?'

Lin Yun massaged his forehead and made up his mind to build the Shelter Tower ahead of time. After all, even if he couldn't reach a transcending realm, he could still easily live until Noscent's mana calamity started.

And at that time, powerful mages like him would be the first to be affected. In other words, they would die the fastest.

It is impossible for anyone to remain indifferent in the face of death, he had to do proper preparations.

Especially now that he found one of the Shelter Tower's core components. It was only a clue leading to the Reedpush Plate, but he couldn't give up.

Going to the Odin Kingdom to get that Reedpush Plate was a must. With this, the difficulty in building the Shelter Tower would be somewhat reduced.

He had to start even if he only had a rough draft and no design.

Lin Yun returned to the edge of the dense fog with a load on his mind. There, Labard appeared in a flash of silver smile with a smile on his face.

"Hey, Sir Mafa, are you going back? I heard you were now the Patriarch of the Merlin Family. Remember to leave a magic imprint here to use as a coordinate or you would have to force your way through the severed fog next time you come in. When going out, you only have to feel the imprint on the other side of the severed fog and open a Spatial Door to return to the Merlin Family."

Lin Yun nodded with a smile and then spat out a rune, leaving his mark on the mage tower closest to the edge before entering the severed fog once again.

Once Lin Yun entered the severed fog, Labard facepalmed.

'Eh, sh*t, I completely forgot Sir Mafa isn't a Heaven Rank powerhouse, he doesn't have the power to open a Spatial Door. He would have to break through the severed fog every time he enters and exits the Ancestral Land...'

But Lin Yun had already entered the severed fog and Labard couldn't chase after him, who knows where he would end up in that chaotic space.

As for Lin Yun, he sensed the imprint on the edge of the severed fog just as Labard said, that imprint was like a lighthouse on the other side of the severed fog, giving a directional guidance and a set of coordinates.

As Lin Yun sensed the coordinates, he just went forward as if he was on a walk, instantly crossed through the space as if that chaotic space had no effect on him.

Lin Yun's body walked in and simply didn't move alongside these continuously moving chaotic spaces, he moved straight towards that lighthouse's coordinates.

After a dozen minutes, Lin Yun left the severed fog and his surrounding space also returned to normal, only the surrounding dense fog was covered in runes.

A few minutes after walking out of the layer of fog, he reached the entrance of the fog canyon.

The fog full of runes showed no reaction when Lin Yun left, as if no one ever came in.

Lin Yun turned back and glanced at the fog canyon, the indescribable aura covering his body slowly dissipating. It seemed that Lin Yun was truly appearing in the world at this time, his faint aura of life and soul fluctuations slowly appeared, but his mana fluctuations were still nowhere to be seen. No matter how one looked at it, he only looked like an ordinary person.

Lin Yun's expression was dull as he walked towards the Merlin family.

...

On another side, in a pitch-black room within the Charlotte Family, the Patriarch of the Charlotte Family was sitting across a black smoke in the shape of a Devil's face. On the side, there was a strange half-skeletal Beastman covered in black smoke.

"Sir Duncan, this is the last chance. I just got the news that Mafa Merlin has just come out of the Merlin Family's Ancestral Land and is on his way back to the Merlin Family to take on the position as Patriarch.

"Once he controls the entire Merlin Family, with that damned Mafa Merlin's personality, he would definitely suppress our Charlotte Family and might even look for an opportunity to kill many of our Charlotte Family's members.

"As for the Ancestral Land, it simply has no power available to get involved in this struggle.

"At the same time, Sir Duncan, when Mafa Merlin becomes the Patriarch of the Merlin Family, the power he could mobilize simply wouldn't be able to compare to his current power and you would never have your opportunity to take revenge against Mafa Merlin!"

The smoke fluttered, displaying a sinister devilish face. The Greater Devil currently living as the Thousand Souls Sacrifice's Incarnation gnashed his teeth as his eyes emitted a scarlet radiance.

Flames burned in the eyes of the half-skeleton Duncan, a thick abyssal power aura was emitted from his body as he was fuming, "We have to get rid of Mafa Merlin! I was deceived by that damned guy last time, he didn't grasp that kind of terrifying power, he was just an Archmage, how could he have grasped this kind of power?"

"He has yet to advance to the Heaven Rank, but he is terrifyingly fast. Once he advances to the Heaven Rank, he would definitely master that terrifying power and everyone would be screwed. Not just I, your Family as well.

"If not for that hateful Mafa Merlin, I wouldn't have ended up like this, I would have definitely perfectly advanced to the Heaven Rank, not like this. I crawled back up from the Abyss and tracked him back to this world for the sole purpose of taking revenge!

“But I have to thank that damned Mafa Merlin for being able to advance to the Heaven Rank, I want to make his soul howl in grief in the Abyss every single night.”

The Charlotte Patriarch sneered.

“The Merlin Family definitely wouldn’t expect us to suddenly make a move. Even if that damned Mafa Merlin can display the power of the Heaven Rank, if we act together, we will definitely kill that damned guy before the Merlin Family’s reinforcements arrive!”

Soon, the Charlotte Patriarch took the Thousand Souls Sacrifice and led Duncan, who had recently crawled out of the Abyss, out of the Charlotte Family’s land.

The spy of the Charlotte Family already told them Lin Yun’s whereabouts.

...

As he walked back to the Merlin family, Lin Yun suddenly stopped.

In front of him, a half skeletal Duncan covered in black smoke was standing before him.

“Mafa Merlin, you f*cker! You wasted a millennium of my efforts and turned me into a monster! But I still have to thank you for throwing me into the filthy Abyss.

“If not for that place I wouldn’t have been able to advance to the Heaven Rank and I wouldn’t have been able to obtain that formidable power. I’ll make you wail under my power, I’ll make your soul weep in the deepest parts of the abyss!”

Duncan was emitting sinister black smoke all over his body and his Heaven Rank power was released without any reservation. He was like a Demon that walked out of the Abyss, full of sinister and abyssal power.

Pitch-black runes curled around Duncan’s body until these runes rapidly converged together to form a pitch-black heart in Duncan’s hands. Every time the heart throbbed, a large amount of black smoke was released, and as the heart throbbed, Duncan’s mana rapidly rose.

Lin Yun was stunned when he saw Duncan blocking the way, he had completely forgotten about that guy. Back then, Duncan had been staying next to Constance’s heart for a millennium in order to advance to the Heaven Rank.

He then chased Lin Yun, but Lin Yun took a risk and opened an Abyssal Gate and banished him to an unknown layer of the Abyss. But he hadn’t expected him to be able to advance to the Heaven Rank and chase him back to Noscent.

Lin Yun didn’t have time to say anything before an even more sinister power appeared behind him, a thick bloody smell could be felt within this dense evil power.

The black smoke converged into the bust of a Hell’s Devil that kept roaring at Lin Yun and the Charlotte Family’s Patriarch walked out from it while the black smoke converged into the head of a Devil floating next to him. A scarlet radiance was flickering in his eyes, it felt that his gaze would be able to corrupt a soul with a single gaze.

“Mafa Merlin, you didn’t expect it, did you? You didn’t think that we would block your path at such a time! You were too careless! My spy already told me your whereabouts.

“It’s a pity for you, if that old Ofran was here, I wouldn’t have been 100% certain that I could have gotten rid of you. But now, I already borrowed the power of the Thousand Souls Sacrifice and I can display the power of the Heaven Rank. Moreover, Sir Duncan is also at the peak of the 1st Rank.

“No one can save you now, Mafa Merlin, you are trapped. I won’t be able to live peacefully once you inherit the Patriarch position of the Merlin Family, unless you are dead. You simply have to die.”

The Greater Devil transformed into the Incarnation of the Thousand Souls Sacrifice. And nastily laughed at Lin Yun, letting out malicious curses.

“Mafa Merlin, you have to die. I can foresee that unless you die, I’ll die by your hands. That kind of power isn’t something you should control. Damn b*stard, you have to die, and your soul must fall in Hell.

“There are two Heaven Rank powerhouses here, and my real body is on its way. For three Heaven Rank powerhouses to deal with an Archmage... Even if you are stronger than those on the same rank, our Extraordinary Powers can pressure you to death.

“Weeping, howling, despairing and pained souls are the most intoxicating, hahaha...”

The Patriarch of the Charlotte Family and Duncan surrounded Lin Yun from the front and back. Moreover, the surrounding area was already covered in black smoke, it was obvious that they had set up a trap here, and in order to prevent him from discovering it, there had been no mana fluctuations before he entered the trap.

Lin Yun remained silent and looked at Duncan and the Patriarch of the Charlotte Family with astonishment.

The Patriarch sneered as he looked at Lin Yun.

‘That damned guy must be terrified. It is said that he has the fighting strength of a Heaven Rank powerhouse. Unfortunately, the strongest power of the Heaven Rank is Extraordinary Power. The pressure of three different kinds of Extraordinary Powers would make anyone below the Heaven Rank unable to display their strength. Even if he is powerful, it would lose all importance there.

‘Stupid guy, you dared to set yourself against the Charlotte Family. If we let you take on the position as the Patriarch of the Merlin Family, how could our Charlotte Family not suffer pressure?’

‘Recently, the Cloud Tower and the Black Tower are hooking up with the Merlin Family. Even a few of the collaborations between the Watson Family and my Charlotte Family had become collaborations between the Watson Family and the Merlin Family. Everything is because of that damned Mafa Merlin’s return and the leaked news that he was taking over as a Patriarch.

‘Those guys are like sharks smelling blood, surrounding the Merlin Family for the sake of profits, they truly have no bottom line.

‘But they will see, Mafa Merlin’s head will be hung at the city’s gates.’

The body of the Greater Devil arrived and the three Heaven Rank powerhouses surrounded Lin Yun and blossomed with Extraordinary Power, pressuring Lin Yun. Then, they cautiously blocked all his escape routes. They clearly planned on eliminating Lin Yun today.

Enderfa's three faces smiled as he floated beside Lin Yun and one of his faces glanced at Duncan.

"You want to throw Merlin's soul in the deepest part of the Abyss right?"

Another face turned to look at the Greater Devil.

"You want to drag Merlin's soul in Hell, right?"

His middle face then concluded, "One of you has abyssal power stronger and thicker than an Abyssal Demon, and the other is a Greater Devil of Hell... Since when do the denizens of the Abyss and Hell cooperate?"

"Did you two discuss properly where Merlin's soul is going to be thrown?"

Patriarch Charlotte sneered

"Mafa Merlin, you and your damned Magic Tool Incarnation can just wait for your death. There is no use no matter what you say, we have made thorough preparations."

Lin Yun smiled.

"Patriarch of the Charlotte Family, have you picked a successor?"

The Patriarch froze, before sneering.

"Mafa Merlin, there is no need to stall for time. We have already sealed this location, the reinforcements of the Merlin Family definitely won't appear within half an hour."

Lin Yun sighed.

"I was only reminding you out of good intention. I'll do a good deed today and do something for your Charlotte Family.

"I'll avert your Charlotte Family's extinction and stop that Greater Devil from sacrificing your entire Family to regain his power.

"Naturally, I'll also help your Charlotte Family pick a wiser Patriarch."

Chapter 1189 Ambush 2

Hearing Lin Yun's words, the Greater Devil's expression instantly changed, Lin Yun's words were correct. Hell's Devils were more crafty than Demons, betrayal, deception, lies, enticement were the creed Devils abided by. Believing in a Devil's words was equivalent to giving away one's soul.

"Stupid kid, you can't avoid death no matter what you say!"

The Greater Devil, the Patriarch of the Charlotte Family, and Duncan were surrounding Lin Yun in a triangle formation. They were approaching slowly and cautiously, enveloping Lin Yun with their Extraordinary Powers even though Lin Yun didn't raise a shield.

Lin Yun's breath suddenly became more erratic and the bit of life aura he leaked was quickly dissipating. Enderfa, who was watching the show with amusement, didn't smile and looked at the three of them with pity.

"These idiots are going to die. I bet it'll take thirty seconds." Enderfa's left face solemnly said.

The face on the right side sneered, "I'll bet that someone will die within ten seconds, and that all these fools will die in a minute."

The middle face had a strange smile.

"No, these three idiots would die in twenty seconds..."

Enderfa was floating in the air, watching the show with amusement and clearly not planning to help.

Just as the encirclement shrunk to a hundred meters, the three of them could no longer bear with it.

"No need to wait, this guy has been suppressed by our Extraordinary Powers and can't move a finger!"

"Get rid of him!"

"I want his soul!"

The three of them simultaneously attacked. The Patriarch of the Charlotte Family was shrouded in black smoke, his body was covered in black scales and the raging black smoke transformed into countless evil and ugly creatures that charged towards Lin Yun.

Duncan was holding that pitch-black heart in a hand and the dense black smoke transformed into a black cloud. The countless abyssal spells transformed into a flood of spells that flew towards Lin Yun.

As for the Greater Devil, his real body was floating in the air and turned into a several-dozen-meter-tall face with a cruel smile. A flood that seemed to contain the shouts of countless pained wailing ghosts came out of his mouth.

At that moment, stars seemed to shine in Lin Yun's eyes, and with a twinkle, it seemed as if a star exploded in the deathly still starry sky.

Terrifying mana fluctuations burst out of Lin Yun's body, and the mana fluctuations alone greatly slowed their attacks!

Lin Yun took out the Book of Death with his left hand. Its shackles snapped and it automatically flipped to the Truth Chapter, as if it felt the dense evil aura.

The Crystal Phoenix flew out of the Book of Death. As Lin Yun's mana surged, the Crystal Phoenix grew to several dozen meters in size and an evil-shattering light blossomed from its body.

The three assailants simultaneously let out miserable shrieks. The Greater Devil's shriek was the most mournful, his several-dozen-meter-big Devil face looked as if it had been doused in acid.

"Damn, how could there be such a thing, to hell with it!"

The Greater Devil perfectly illustrated what it meant to get cold feet and having no principles. Seeing the Crystal Phoenix appear, the Greater Devil immediately transformed into a wisp of smoke and fled.

But the Crystal Phoenix let out a phoenix cry and the multi-colored evil-shattering radiance emitted from its body enveloped everything within several kilometers.

The Greater Devil let out an alarmed scream under the evil-shattering light and the smoke covering his body kept dissipating. His fleeing speed even became abnormally slow.

He had already lost his body and only a part of his Devil Soul survived. He had once been a Greater Devil, but he was now reduced to a Magic Tool Incarnation only able to display the power of the Heaven Rank.

As for the Crystal Phoenix, it just happened to be the perfect counter to that guy.

The Greater Devil's body kept shrinking under the rays of light until it was finally grabbed by the Crystal Phoenix. Its sharp claws tore the Greater Devil apart before devouring the shattered Devil Soul.

A Devil Soul wouldn't disappear if it was torn apart, a Greater Devil would be able to keep on living even if just a part of the Devil Soul remained, it's just that they would lose most of their power and memories.

Being devoured by the Crystal Phoenix, the Greater Devil's shattered Devil Soul kept howling in grief in the Crystal Phoenix's belly. This was the place where the evil-shattering light was the densest, all evil would be purified there.

As the Crystal Phoenix chased the Greater Devil, Lin Yun surprisingly didn't take out his Draconic Staff and instead took out a twisted sharp blade.

Lin Yun took a step towards the Patriarch of the Charlotte Family, his body seemingly merging with the space and crossing several dozen meters with a single step.

The spells cast by the Patriarch of the Charlotte Family were like a pack of wild beasts. And it looked like Lin Yun was taking a walk among those beasts, he would appear between two spells with each step.

He didn't raise any shield, he only relied on his body to travel through this flood of spells. It was as if he was dancing on the edge of a blade.

The Patriarch of the Charlotte Family became pale and started casting even more frantically, but no matter how he cast, he could only watch Lin Yun easily crossing through the flood of spells and getting closer without using a spell or raising a shield.

He obviously looked like an ordinary person, but the Patriarch of the Charlotte Family felt that he was the ordinary person while Lin Yun was the Heaven Rank powerhouse, and as he grew closer, a huge feeling of crisis enveloped his body just like a disease.

"Ah, Mafa Merlin, die! Die! Die! I'm a Heaven Rank powerhouse, I'm..."

Fear could be seen all over the Patriarch of the Charlotte Family's face, but he himself didn't know what was frightening him.

Lin Yun calmly travelled through the flood of spells, one step at a time, and it felt as if that flood of spells was purposefully avoiding Lin Yun.

When Lin Yun was within three meters of the Patriarch of the Charlotte Family, the latter had already stopped casting and raised defensive spells.

Lin Yun coldly looked at the Patriarch of the Charlotte Family.

“Being tempted by a Greater Devil from Hell and even sacrificing your family’s children, it’s a disgrace for a mage. Using a spell to get rid of you would be an insult to magic.”

The Patriarch of the Charlotte Family looked frightened.

“Mafa Merlin, you can’t kill me, you can’t do this...”

The Patriarch of the Charlotte Family had at least nine layers of shield, while Lin Yun had none. but even though he had no shields, the Patriarch of the Charlotte Family was already scared senseless.

Lin Yun sneered and swung the strange blade in his right hand. The blade flashed and popped the shields as it came in contact with them before beheading the Patriarch of the Charlotte Family, even shredding all the mana and elemental power in front of him.

In the air, a clear trace kept floating there for a very long time, no mana or elemental power could approach that trace.

After beheading the Patriarch of the Charlotte Family, Lin Yun put away the sharp blade. It was one of the claws of the Mana Outcast he had encountered on the starry sky path. The power of the Submerged Magic Essence Iron was clearly reflected there.

Lin Yun also couldn’t release mana while holding that sharp blade, but any mana and elemental power that approached that Submerged Magic Essence Iron would brush past like a river meeting a stone. No matter how powerful the attack was, it would slide past.

An ordinary mage who couldn’t perfectly control their own mana, would be hurt the moment they touched the Submerged Magic Essence Iron and might destroy their own mana.

The Patriarch of the Charlotte Family clearly didn’t know that while Lin Yun was arrogantly walking over, it was because he greatly relied on the power of the Submerged Magic Essence Iron.

To be able to dodge spells without defenses the way he did, one usually had to be over ten ranks higher than their opponent.

That huge gap couldn’t be breached no matter the method used. It was the difference between a grain of sand compared to the sea and two grains of sand compared to the sea.

The Patriarch was scared witless and ended up easily beheaded.

On the other side, the Greater Devil was also devoured by the Crystal Phoenix within ten seconds!

Duncan was completely terrified, shock and fear could be seen on the Beastman’s half of his face.

“Who... Who are you? You aren’t Mafa Merlin. Damnit, how could Mafa Merlin be so powerful? It’s impossible...”

“Archmage, impossible... An Archmage can’t be that powerful, it’s impossible...”

“Sh*t, who the hell are you?! Who are you...”

Duncan kept drawing back while shouting in alarm. After a few steps, Duncan gritted his teeth and spat out a few abyssal runes formed from black smoke.

The runes flew out and the black smoke formed a vortex there. The vortex rapidly expanded and an Abyssal Gate appeared.

The Abyssal Gate had yet to be thoroughly shaped that Duncan rapidly jumped into it.

He had worked really hard to crawl out of the Abyss, yet he wanted to flee back there in fear.

Lin Yun coldly looked at Duncan who jumped into the Abyssal Gate and rapidly spat out a few runes, which then took the shape of a pitch-black Wind Blade.

The Wind Blade instantly disappeared and appeared in front of the Abyssal Gate before disappearing within.

After a second, Duncan’s miserable shrieks came out of the Abyssal Gate before it collapsed and a throbbing pitch-black heart fell to the group. It then broke down into abyssal runes and vanished under the light of the Crystal Phoenix.

“Damn, he only used 15 seconds... Just how powerful is that damned Merlin now?”

Enderfa angrily cursed, none of the three faces had guessed correctly.

Lin Yun didn’t worry too much about it after dealing with that battle, but he couldn’t help remembering the two idiots he had banished to the Endless Abyss in Constance’s God Nation. Since Duncan crawled out of the Abyss, then the other one should also have crawled out of the Abyss. Why didn’t he see him?

He had wanted to ask Duncan, unfortunately Duncan already died in the collapse of that passage, even if that Wind Blade didn’t get rid of him, the collapsing space of the passage would kill him without leaving a single trace behind.

The Patriarch of the Charlotte Family, Duncan, and the Greater Devil Incarnation of the Thousand Souls Sacrifice had all been eliminated. The surrounding black smoke slowly dissipated and the auras of many mages could be felt in the surroundings. They were members of the Charlotte Family that came to help seal off this area.

As the seal was disappearing, battle fluctuations could be felt, alongside a loud roar.

“Stupid b*stards, you actually dare to ambush Sir Merlin! You fools, you’ll die, all of you! Get a taste of Xiuban’s hammer, I’ll crush you and feed your blood to Carnage!”

Xiuban’s angry shout echoed like thunder. Even if the seal wasn’t completely removed, Lin Yun could clearly hear what was happening.

As the black smoke was slowly dissipating, Lin Yun could see many members of the Merlin Family, as well as Xiuban and Reina, fighting a group of Charlotte Family members.

No, saying fighting was overrating the Charlotte Family's members. They didn't have the symbol of the Charlotte Family and were all stiff. They all looked stiff and rigid and looked ready to sacrifice their lives for the sake of the Charlotte Family.

As for Xiuban and the Merlins, they could be described as slaughterers. Xiuban would forcibly shatter a mage's shield every time he swung and would blow the mage into fragments.

As for Reina, she kept blowing out mouthfuls of cold with a cold expression and ice statues kept appearing.

Ofran was anxious and enraged as he led the group of Merlins and loudly shouted, "Damn b*stards, you actually ambushed the next Patriarch of the Merlin Family in our territory! How daring! Are you trying to start a war?!"

"Get rid of these damned b*stards..."

The fight ended, but the black smoke soon dissipated, before the Merlin Family could bring an alchemist to remove the seal, and Lin Yun walked out from within.

"Sir Mafa, are... Are you okay? What about the Charlotte Family's b*stards?"

Ofran had a nervous and angry expression and an ashen complexion.

The person about to become the next Patriarch of the Merlin Family had been ambushed on the path between their Ancestral Land and their Family's area, this was a huge blow to the Merlin Family, a ruthlessly slap on the face.

"Sir Mafa, What about those idiots? Eh, why is there no one? Did they escape? We should blow up their nest and get rid of everyone to take over their wealth!" Xiuban bared his fangs as he arrogantly exclaimed.

Lin Yun looked at Ofran and the mages he brought, a bit suspicious as to how they managed to rush over so fast.

"Patriarch Ofran, how come you suddenly appeared here?"

Ofran was fuming, he said with an ashen complexion, "A traitor, there was a traitor in our Family. That traitor shared your whereabouts, but he was accidentally discovered by one of your subordinates. But, the news could no longer be intercepted, and the traitor unfortunately killed themselves. As we obtained the news, we immediately rushed over but we were still a step behind.

"It was those idiots of the Charlotte Family, right? What happened to them? Did they flee?"

Enderfa floated at Lin Yun's side and remained silent, but his three faces looked a little strange.

Lin Yun smiled.

"Eh, Patriarch Ofran might have misunderstood. It was an Abyssal Demon coming to retaliate against me. It just happened that the Charlotte Family's Patriarch was here.

"Unfortunately, the Charlotte Family's Patriarch had already been eliminated and their Family's Thousand Souls Sacrifice had already been destroyed. Naturally, the Demon was also eliminated.

“As for these people, they were willing to sacrifice themselves and ended up dying, what a pity.

“Eh, Patriarch Ofran, I’ll trouble you to notify the Charlotte Family’s people so that they can get a new Patriarch.”

After Lin Yun said those words, Ofran’s expression became strange and the Merlin Archmages in the surroundings were all stunned.

The dense sinister power permeating the surroundings was not only composed of abyssal aura, there was also hellish aura and the fluctuations had yet to dissipate. Moreover, the traces of Extraordinary Powers could clearly be felt there.

Anyone could tell that there had been three people sieging one person. And the one besieged was obviously Lin Yun, yet the other three had disappeared, not leaving anything behind.

Ofran wiped the cold sweat dripping down his forehead and couldn’t help shivering when he noticed Lin Yun’s indifferent expression.

‘Damn, that foolish Novi has already been killed? How long has it been?’

‘That fool was already at the Peak of the 9th Rank, and with the strange Magic Tool of the Charlotte Family, he would be no different from a Heaven Rank powerhouse.’

‘Along with that strange Magic Tool Incarnation, the abyssal power here clearly came from a Heaven Rank powerhouse, did Mafa kill all of them?’

‘We received the news almost at the same time as that foolish Novi and we immediately rushed over, shouldn’t the battle have started for less than a couple minutes?’

‘It was over immediately? Damn, we were prepared to beat back those idiots, but who would have thought that Mafa already got rid of them?’

‘Did he need to be so casual when telling me to inform the Charlotte Family that they have to find a new Patriarch? Damn, that’s the Patriarch of the Charlotte Family! He was actually killed?!’

‘It’s been countless years since the Patriarch of a Family had to be changed in the Andlusa Kingdom. How long has it been, five hundred years? Eight hundred years?’

The last Patriarch that fell in a war among the top few mages Families standing at the peak of the Andlusa Kingdom died over a millennium ago.

‘That foolish Novi came to help? And died alongside the Demon? That’s obviously fake, it’s not like we are blind!’

Ofran opened his mouth, but didn’t know what to say. After all, the death of a Patriarch wasn’t a trivial matter. If they dared to say that they killed him, then the two Families would inevitably start a war and there would be no leeway to restore the situation.

The surrounding mages looked at Lin Yun with strange expressions. When the black smoke completely dissipated, even a Magic Apprentice could see the traces of the battle and understand what happened, yet Lin Yun didn’t look fazed. His ability to turn black into white was admirable.

There had been many old Merlin powerhouses that weren't convinced by having such a young guy like Lin Yun as a Patriarch. They came to save him only because they felt that it was a huge blow to the Merlin Family's reputation. After all, the future Patriarch of the Merlin Family being killed in his own territory would be a very shameful matter and other mages would laugh about it for the next few centuries.

But now, even the most cruel mages bowed their heads. Within a few minutes, two Heaven Rank powerhouses, as well as an Incarnation that could display the power of the Heaven Rank, were killed. This wasn't something an ordinary Heaven Rank powerhouse could do.

Most importantly, Lin Yun was only at the Peak of the Archmage realm...

Ofran was overjoyed by the fact that Lin Yun was uninjured. The group of people surrounded Lin Yun and led him back to the Merlin Family.

"Go, inform the idiots of the Charlotte Family that they should be looking for a new Patriarch. Their stupid Patriarch unfortunately died, taking down a Demon along the way. Our Merlin Family deeply regret it."

Ofran grinned as he loudly transmitted this order after returning the Merlin Family.

After finishing speaking, he quickly asked Lin Yun, who was next to him, "Sir Mafa, what do you think of this?"

Lin Yun sighed.

Chapter 1190 Guests

"The Charlotte Family was indeed unfortunate. Our Merlin Family naturally has to say something. Find a minstrel and have him write a letter of condolences and send a few mana crystals. After all, they had fallen in our Merlin Family's territory. We deeply regret and have to work harder in annihilating Demons." "Eh, right, when agreeing to help the Patriarch of the Charlotte Family fight the Demon, he promised us many things as rewards. Have the Charlotte Family deliver them.

As for what they should deliver, Patriarch Ofran, you can go and pick. Patriarch Novi had been anxious and forgot to say what he would give.."

Ofran's expression suddenly changed, he was like an apprentice looking up to a master, as if a mountain stood before him.

"That Mafa kid is just too suited to become the Patriarch, giving him the position of Patriarch is really the wisest decision I made in my entire lifetime.

"Just look, he just accepted becoming the next Patriarch and killed the Patriarch of the Charlotte Family, while casually scamming the Charlotte Family on the way.

"And the Charlotte Family can only endure that humiliation. Even if they know the truth, they have no other choice but to admit that the old Novi sacrificed himself to kill a Demon.

'Would they dare to admit that they came to the Merlin Family's territory to assassinate the next Patriarch of the Merlin Family? Hell, if they dared to admit it, then no Family in the Andlusa Kingdom would dare to cooperate with them in the future.

'There is a tacit rule among mage families, even if they had to go to war, they couldn't use despicable methods to assassinate the other side's Patriarch or important members. After all, not every important member of the Family had the strength of a Heaven Rank powerhouse.

'If the Charlotte Family dared to admit to it, then the other forces and Family of the Andlusa Kingdom definitely wouldn't mind casually exploiting the Charlotte Family.

'Regardless of what we say, they have to acknowledge it. Let's have them cough up a plane, they don't have a choice anyway.

'If they refuse, then we might as well just go to war!

'That kid Mafa is so suited to being the Patriarch of the Merlin Family. He was able to gain more benefits than if we won a war... Without even starting a war and without a single casualty.

'Errr, there is no point in taking over a plane controlled by the Charlotte Family. Who knows if those heartless idiots would leak the coordinates, we might as well take over some ore veins or some stores.

'It was said that they recently discovered a large-scale ore vein of Dazzling Light Rock, that should be a good pick. They also have a few Magic Tool Shops and Workshops which have pretty decent business, their profits are almost comparable to alchemy medicine shops.'

Ofran hurriedly left, his head lowered as he was scheming his blackmail... No, as he was thinking of the suitable rewards he could get from the Charlotte Family.

The next day, the news of the Charlotte Family's Patriarch falling spread. Not only had he died in the Merlin Family's territory, it had been a righteous death as he bravely attacked a Demon that had just left the Abyss with no regard for his safety. Unfortunately, the Demon Overlord had been too powerful... It was at this time that the future Patriarch of the Merlin Family passed by.

Then, for the safety of the Andlusa Kingdom, the Patriarch of the Charlotte Family promised generous rewards in exchange for the support of the future Patriarch of the Merlin Family before ultimately taking down the Demon Overlord with his life. Even his Family's Magic Tool had been destroyed.

...

In the Black Tower, Harren looked at the report and immediately started laughing.

"That idiotic Charlotte Family actually tried to deal with Sir Mafa. Are they really tired of living? There is no need to go so far if you want to kill yourself, it would be a lot easier to blow up your Mana Whirlpool.

"Haha, what righteousness. Fight to the death with a Demon in order to protect Andlusa's peace?

"Damn, who came up with it? Those old farts of the Charlotte Family should be too ashamed to come out.

“Hear my command, all collaborations between the Black Tower and the Charlotte Family have to cease. Mafa is inheriting the Patriarch position of the Merlin Family, we simply can’t offend Sir Mafa for the sake of the Charlotte Family idiots.

“Eh, there are no collaborations? Only a small shop? Even a small shop won’t do!”

...

Jouyi was frowning in the Cloud Tower.

“Didn’t our Cloud Tower just purchase a batch of Magic Tools from the Charlotte Family? Oh, send them all back. Reason? Just make one up.

“That idiotic family actually dared to collude with a Demon and ran to the territory of the Merlin Family to try to assassinate Sir Mafa, they are beyond help. Do not come in contact with those guys in the future or your intelligence will greatly decrease.

“Sir Mafa is about to succeed as the Patriarch of the Merlin Family. Help me choose a congratulatory gift, no, forget it, I’ll personally prepare the gift.”

On the streets, bards were chanting about the achievement of the Patriarch of the Charlotte Family, but only ordinary people would believe it. Any mage with a bit of brain would understand what happened.

But no one exposed the matter. Ofran was even more reluctant to expose it. There was still three days before he would resign as a Patriarch, but he had already recovered four shops and an alchemy workshop for the Merlin Family. There was even two large-scale ore veins.

The Charlotte Family’s new Patriarch chose to endure and gave up on these things, he didn’t have much choice.

Now, everyone knew that the Charlotte Family’s Patriarch sacrificed himself in battle against a Demon. But they were well aware that everyone knew what happened.

But it’s not like they could say that the Charlotte Family’s Patriarch died while trying to assassinate the next Patriarch of the Merlin Family?

The new Patriarch of the Charlotte Family looked exhausted, but he was helpless.

“Patriarch, hasn’t this month’s tribute money decreased? Moreover, more than half of the orders delivered by our Family’s workshops have been returned for all kinds of reasons. Also...”

The newly appointed Patriarch waved his hand.

“Alright, put those matters aside and first prepare a generous gift. Sir Mafa Merlin is going to inherit the Patriarch position of the Merlin Family in three days, we have to handle this matter first.”

Sitting in his study, the new Patriarch of the Charlotte Family looked through the dense piles of information regarding Lin Yun with a bitter smile.

‘Damn old Patriarch, have you been led astray by a Devil? You actually went to assassinate that monster Mafa Merlin... You deserved to die, but you actually implicated the Family...

'Have you not heard what that monster did in the Raging Flame Plane? He got rid of members of the Odin Kingdom's Shadow Tower, yet that tower of mage assassins who are said to leave no enmity last overnight still didn't try to take revenge. It's said that a Heaven Rank powerhouse died and that the cause of her death might be related to Mafa Merlin.

'Moreover, the Quicksand Tower, that legendary desert mage tower who rules the desert had had many casualties due to Mafa Merlin, but the Heaven Rank of the Quicksand Tower seemed to have a good relationship with Mafa Merlin.

'As for the Raging Flame Plane's most prosperous fort, it is under Mafa Merlin's control, even one of the eight Beastman Tribes of the Raging Flame Plane has sworn allegiance to Mafa Merlin.

'It's not like those damned Beastmen could forget their hatred of humans, right?

'Even Heaven Rank powerhouses were eliminated by Mafa Merlin and he is only an Archmage... He is definitely another Santon Merlin...

'That idiotic old Patriarch actually tried to assassinate that kind of monster. Even the Ancestral Land's answer is only four words: He deserved to die!

'Sh*t, now I have to inherit this mess... Forget it, I'd better think of a way to ease the relationship with the Merlin Family. No, it would be more correct to say easing the relationship with Mafa Merlin. Sh*t, Mafa Merlin didn't make a move yet our Charlotte Family is already on its last legs. Our cooperative partners retracted their orders and the resources given to the higher-ups of the Family have to be reduced by half.

'The old Patriarch really deserved to die, didn't he do his investigation before acting...'

Three days passed quickly and the Merlin Family suddenly became very lively. Every Mage Tower in the Andlusa Kingdom sent someone to congratulate them.

"Look, isn't that Sir Jouyi of the Cloud Tower? It's said that Sir Jouyi already advanced to the Heaven Rank. He actually came personally?!"

"It's amazing, look over there! Sir Harren of the Black Tower personally came, and Sir Harren also advanced to the Heaven Rank. And did you see that old mage? That's the sage of the Battlemages."

"Eh, damn, that's the only sage among those barbarians? Why did he come? Isn't their relationship with the Andlusa Kingdom bad? Especially the Black Tower, eh, how come he is chatting with Sir Harren that happily?"

"Idiot, you are too naive. They all came to congratulate Sir Mafa Merlin. Didn't you see? Four Heaven Rank powerhouses came, two of which I can't even recognize, but I heard they are old Heaven Rank powerhouses..."

So many people came to congratulate, and apart from the Heaven Rank powerhouses, the others were Patriarchs. The end of the Charlotte Family's Patriarch was vivid in their mind, even a Patriarch could be killed so they could only endure. No one would be stupid enough to provoke him.

"The envoy from the Odin Kingdom's Sky City is here."

“The envoy from the Odin Kingdom’s Quicksand Tower is here.”

“The envoy from the Odin Kingdom’s Burning Tower is here.”

The resounding announcements kept echoing from the entrance, making the crowd grow silent. They were all stunned and shocked as they looked at the few people coming in.

These mages were prideful, the mana fluctuations of the robes they wore and the magic staves they held were somewhat stronger than the Andlusa Kingdom’s.

“Sky City, Quicksand Tower, Burning Tower, those are major forces of the Odin Kingdom, each one of them are more powerful than the Cloud Tower or the Black Tower.

“They actually dispatched envoys to congratulate Mafa Merlin inheriting the position of Patriarch? Heavens, I must be dreaming, aren’t these guys 9th Rank Archmages? And their mana fluctuations are stronger than ordinary 9th Rank Archmages.”

When the envoys of these three forces came in and saw the respectful and shocked expressions of these onlookers, they couldn’t help looking somewhat arrogant.

But after entering the Merlin Family Manor and seeing Lin Yun calmly standing in the middle with a smile, their lofty expression instantly disappeared and two of them even exposed fearful expressions.

“Sir Mafa, Sir Dedale couldn’t free himself so he sent me to congratulate you, I hope you won’t take offense.”

“Sir Mafa, this is a gift Sir Raphael specially prepared for you. I hope you’ll like it. Sir Raphael has to personally handle some of Sky City’s matter and thus couldn’t show up. I hope you can understand. Sir Raphael said that he will personally come to apologize a bit later.”

“Sir Mafa, this is a specialty of our Quicksand Tower. Congratulations on your inheritance of the Merlin Family’s Patriarch position.”

The envoys of the three forces were all respectful and none of their former arrogance could be seen. This overwhelmed the surrounding mages with shock.

Zeuss Watson was also among those mages, he was here to represent the Watson Family. After all, a Peak 9th Rank Archmage was definitely enough to represent the Watson Family, and he did have some reputation.

But here, Zeuss Watson couldn’t even join that small inner circle, because they were all Heaven Rank powerhouses!

Heaven Rank powerhouses rarely showed their faces, but four of them had simultaneously appeared to congratulate Lin Yun, and now, even forces of the Odin Kingdom came...

‘Mafa Merlin is really becoming more and more terrifying. Only Archmages could be called “Sir”, unless it was used by one’s own subordinates. One had to be at the Heaven Rank, or be respected for other Archmages to call them “Sir”!

'And these three 9th Rank Archmages are all using "Sir" when talking to Mafa Merlin. And they are so respectful, as if Mafa Merlin's strength reached a stage they could only look up to, as if his strength was comparable to an old Heaven Rank powerhouse!

'These three envoys are very respectful of Mafa Merlin, two of them even seem very afraid of him. Sh*t, my eyesight must have gone bad, Odin Kingdom's forces can actually be afraid of Mafa Merlin?'

Zeuss stood more than ten meters away and watched Lin Yun chat with the few Heaven Rank powerhouses. He simply didn't dare to approach, there were a dozen 9th Rank Archmages around him!

Zeuss looked at him with an envious and complicated expression. It hasn't been that long but he could only look up to him.

"Hahaha, Sir Mafa, How could you not notify me about something as big as becoming a Patriarch, this is really mean. Thankfully, I learnt about it on time."

A loud laugh could be heard from the sky as the aura of the Heaven Rank spread out and instantly silenced everyone. The weaker ones were instantly pressured by the aura of the Heaven Rank and let alone moving their fingertips, even speaking was challenging.

Then, everyone looked up and saw a black-robed man sitting on a malevolent monster flying down.

Suddenly, a faint fluctuation swept over and the aura of the Heaven Rank was immediately swept clean, Morgan's pressure seemed to have completely disappeared.

The four elements converged together in midair and condensed into a three-meter-big Four Element Bomb which instantly tore through the air, leaving behind a long white trail.

A loud explosion echoed in the sky as the Four Element Bomb hit the Darkness Elemental God. The terrifying mana fluctuations burst out like a volcanic eruption and Morgan screamed as he was sent flying. As for his Darkness Elemental God, half of his head had been blown up.

"Morgan, I haven't seen you for a while, you seem to be doing good, are entrances nothing more than a decoration to you?"

Lin Yun's voice softly echoed and made people look at him foolishly.

'He actually dared to attack a Heaven Rank powerhouse...'

Outside of the Merlin Family Manor, the newly-appointed Charlotte Family Patriarch was walking to the doorway when he suddenly saw this scene.

'Mafa Merlin is really arrogant, he actually dared to attack a true Heaven Rank powerhouse. And that Heaven Rank powerhouse was from the Henry Family of the Odin Kingdom, according to his robe!

'That's a major family of the Odin Kingdom. The wealth they possessed may be more important than the entire Andlusa Kingdom's wealth, they are really wealthy powerful mages. Yet Mafa Merlin actually offended a member of the Henry Family, hahaha, amazing.'

'If other forces hear this, they would definitely not dare to get in contact with Mafa Merlin. The Henry Family wouldn't need to act personally if they wanted to deal with Mafa Merlin, they would just need to flash their money to destroy the Merlin Family!'

The new Patriarch of the Charlotte Family originally intended to go in, but he ended up hesitating and kept standing outside the Merlin Family Manor.

"Morgan, you fool! I told you!"
